Reference: Amended Midwest Reliability Organization Regional Reliability Standards
Process Manual

On August 16, 2021, North American Electric Reliability Corporation (NERC) submitted a petition requesting approval to amend the Midwest Reliability Organization (MRO) Regional Reliability Standards Process Manual (RSPM). Specifically, NERC states that MRO made several non-material revisions to its RSPM, including updating the title of the committee responsible for standards and process oversight at MRO and removing outdated references.

The filing was publicly noticed, with interventions and protests due on or before September 7, 2021. Pursuant to Rule 214 of the Commission's regulations (18 C.F.R. § 385.214 (2020)), notices of intervention, timely-filed motions to intervene, and any unopposed motions to intervene out-of-time filed before the issuance date of this order are granted. Granting a late intervention at this stage of the proceeding will not disrupt the proceeding or place additional burdens on existing parties. No protests or adverse comments were filed.

NERC's uncontested filing is accepted pursuant to the relevant authority delegated to the Director, Office of Energy Market Regulation, under 18 C.F.R. § 375.307 (2020).

This action shall not be construed as approving any other application, including proposed revisions of Electric Reliability Organization or Regional Entity rules or procedures pursuant to 18 C.F.R. § 375.307(a)(2)(vi) (2020). This action does not constitute approval of any service, rate, charge, classification, or any rule, regulation, contract, or practice affecting such rate or service provided for in the filed documents.
