### II. Discussion

On October 23, 2014, the NRC published for comment draft RIS 2014-XX. The purpose of draft RIS 2014-XX, "Applicability of ASME Code Case N-770-1 As Conditioned In 10 CFR [Title 10 of the *Code of Federal Regulations*] 50.55a, 'Codes and Standards,' To Branch Connection Butt Welds," is to inform addressees about reactor coolant system Alloy 82/182 branch connection dissimilar metal nozzle welds that may be of a butt weld configuration and therefore require inspection under 10 CFR 50.55a(g)(6)(ii)(F). The RIS, if issued in final form, would be used by all holders of an operating license or construction permit for a pressurized water nuclear power reactor under 10 CFR part 50, "Domestic Licensing of Production and Utilization Facilities," except those who have permanently ceased operations and have certified that fuel has been permanently removed from the reactor vessel. The draft RIS explains that these entities should review this information for applicability to their Alloy 600 management plan to ensure all applicable butt welds are being inspected.

The public comment period was originally scheduled to close on December 8, 2014. The NRC has decided to extend the public comment period to allow more time for members of the

public to submit their comments. The deadline for submitting comments is extended to December 22, 2014.

Dated at Rockville, Maryland, this 24th day of November 2014.

## II. Additional Information

The NRC is issuing for public comment a DG in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The DG, entitled, "Fitness-for-Duty Programs at New Reactor Construction Sites," is temporarily identified by its task number, DG-5036. This guidance is provided to ensure the effective and consistent implementation of the requirements in subpart K, "FFD Programs for Construction," of part 26, "Fitness-for-Duty Programs," in Title 10 of the *Code of Federal Regulations* (10 CFR). Part 26 requires certain individuals involved in the construction of nuclear power plants to be fit-for-duty. The requirements in part 26 are prescriptive in a number of areas, such as drug and alcohol testing; however, in other areas, such as those associated with subpart K, "FFD Program for Construction," the regulations contain less prescriptive, performance-based requirements. The performance-based regulations in subpart K enable licensees, applicants, and other entities to develop, implement, and/or maintain site-specific (or fleet-wide) FFD programs in a manner that best suits their needs while still meeting regulatory requirements. However, this flexibility, without regulatory guidance,

can challenge consistent and effective rule implementation. For example, a licensee can implement sanctions for FFD policy violations that are markedly more or less severe than sanctions for an equivalent violation at another licensee's construction site. This DG endorses the methodologies described in industry guidance document Nuclear Energy Institute (NEI) 06-06, "Fitness for Duty Program Guidance for New Nuclear Power Plant Construction Sites," revision 6, dated April 2013 (ADAMS Accession No. ML13093A340).

## III. Backfitting and Issue Finality

This DG, if finalized, would provide guidance on the methods acceptable to the NRC staff for complying with the NRC's regulations associated with FFD programs of licensees or other entities during construction of new power reactors. The guide would apply to certain current and future applicants for, and holders of, power reactor licenses and construction permits under 10 CFR part 50 and power reactor licenses and early site permits under 10 CFR part 52. Issuance of DG-5036, if finalized, would not constitute backfitting under 10 CFR part 50 and would not otherwise be inconsistent with the issue finality provisions in 10 CFR part 52. As discussed in the "Implementation" section of DG-5036, the NRC has no current intention to impose the DG, if finalized, on current holders of 10 CFR part 50 operating licenses or 10 CFR part 52 combined licenses.

This DG, if finalized, could be applied to applications for certain 10 CFR part 50 operating licenses or construction permits and 10 CFR part 52 combined licenses and early site permits. Such action would not constitute backfitting as defined in 10 CFR 50.109 or be otherwise inconsistent with the applicable issue finality provision in 10 CFR part 52, inasmuch as such applicants are not within the scope of entities protected by 10 CFR 50.109 or the relevant issue finality provisions in 10 CFR part 52.

Dated at Rockville, Maryland, this 20th day of November, 2014.
