WECC will implement the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure (which for purposes of this section 1.0 shall not include Attachment 2, Hearing Procedures), to monitor and enforce compliance with Reliability Standards by the owners, operators, and users within **WECC's** geographic or electrical boundaries, and such other scope, set forth on **Exhibit A** of this Agreement ; provided, however, that Section 5.3(vii) of the WECC Compliance Monitoring and Enforcement Program does not refer to shortened hearing procedures.

2.0 REGIONAL HEARING OF COMPLIANCE MATTERS

WECC shall establish and maintain a hearing body with authority to conduct and render decisions in compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan, which shall be either **WECC's** board or a balanced compliance panel reporting directly to **WECC's** board. **WECC's** hearing body is the Compliance Hearing Body, as established under the WECC Compliance Hearing Body Charter.

Under the Compliance Hearing Body Charter, the Compliance Hearing Body consists of Class A and Class B members. Class A members are WECC non-affiliated directors, personnel employed by WECC Members who are not engaged in the Electric Line of Business, and consultants who meet the same standards of independence required by the WECC Bylaws for non-affiliated directors. Class B members are personnel employed by WECC Members engaged in the Electric Line of Business or who are otherwise affiliated with such Members. For each hearing, the Chair of the Compliance Hearing Body selects a five-member Hearing Panel (or a three-member Hearing Panel if the parties to the hearing agree) with a majority consisting of Class A members, with at least two members (one member of a three-member Hearing Panel) having technical knowledge of electric industry systems.

WECC shall conduct all compliance hearings in which a Registered Entity may contest a proposed registration, finding of alleged violation, proposed penalty or sanction, proposed Mitigation Plan, or a proposed Remedial Action Directive, in accordance with the Attachment to this Exhibit D.

3.0 OTHER DECISION-MAKING BODIES

None. The WECC Compliance Committee provides general oversight and policy guidance but does not have decision-making authority with respect to compliance matters.

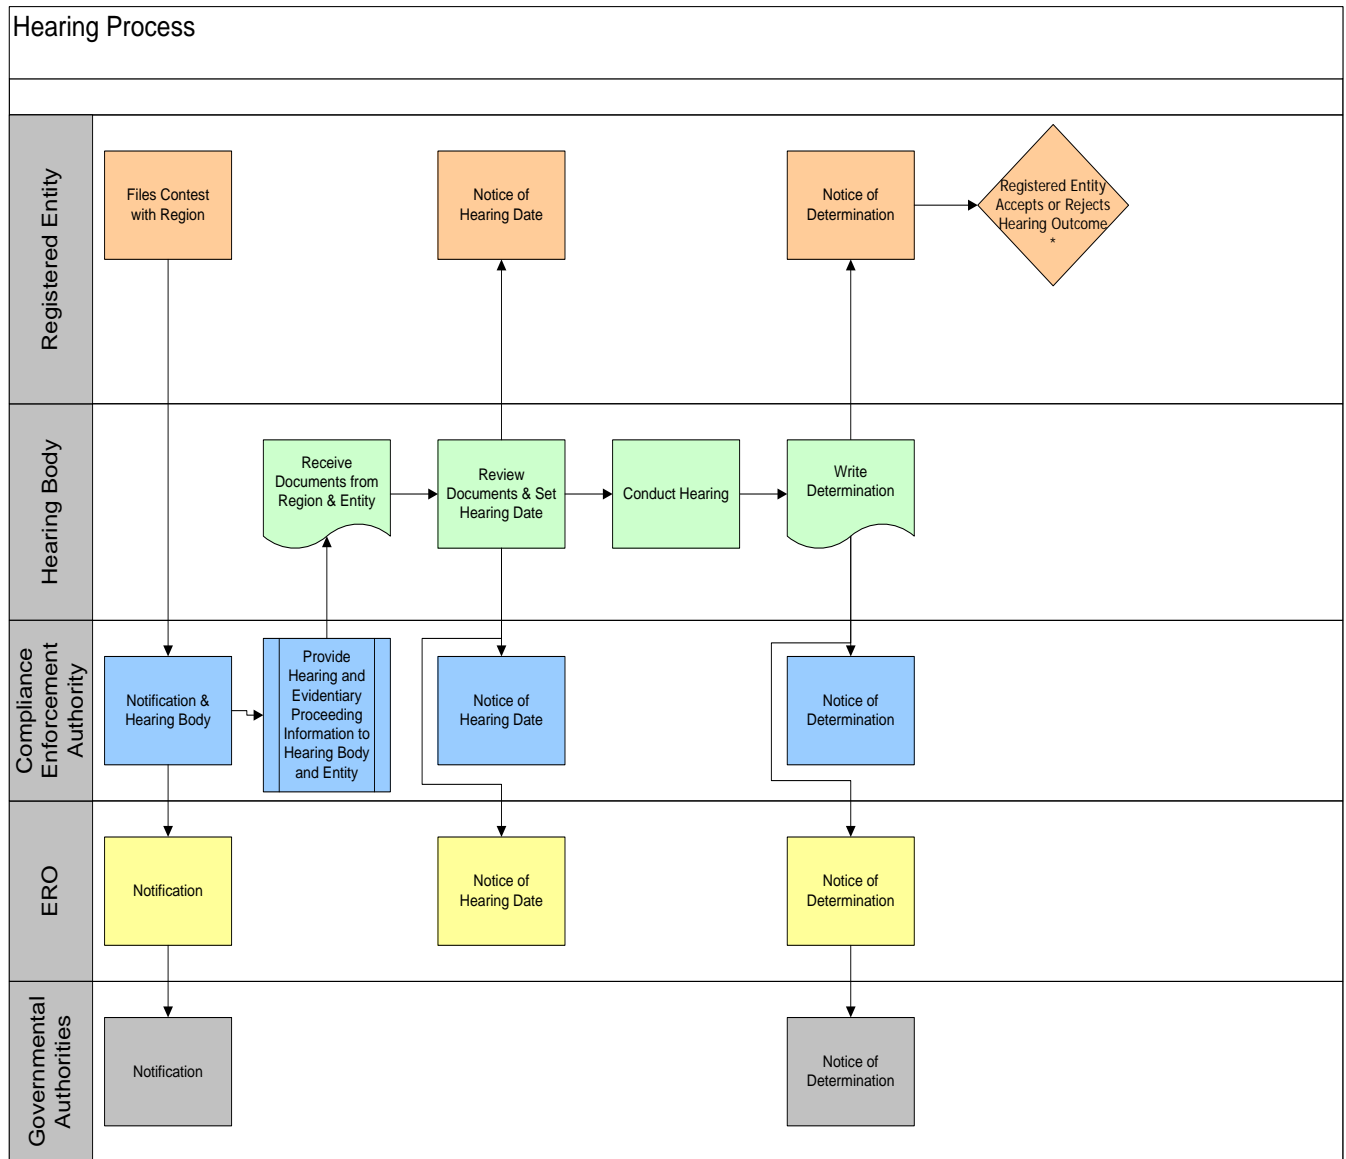

ATTACHMENT 2

COMPLIANCE ENFORCEMENT AUTHORITY HEARING PROCEDURES

This **Attachment 2** sets forth the procedures to be followed to conduct compliance hearings. In this **Attachment 2**, the Compliance Enforcement Authority and the Registered Entity are sometimes referred to as the “parties.” Subject to the authority of the hearing body to alter or extend any time periods or deadlines specified in this **Attachment 2** and to hold such numbers of conferences and hearings as are necessary, it shall be the objective of the hearing process to complete the steps specified herein for formal compliance hearings within ninety (90) days following the issuance of written notice that the hearing body is convened.

Figure ATT-2 shows the hearing process steps.

1.0 HEARING PROCEDURES

1.1 APPLICABILITY, DEFINITIONS AND INTERPRETATION

1.1.1 Procedure Governed

These Hearing Procedures shall govern the procedure before the Western Electricity Coordinating Council (“WECC”) in proceedings concerning (i) disputes regarding whether any entity should be or has been properly registered or certified, (ii) whether Registered Entities within WECC’s area of responsibility have violated Reliability Standards, (iii) if so, to determine the appropriate Mitigation Plans as well as any remedial actions, penalties or sanctions in accordance with the NERC *Sanction Guidelines* and other applicable penalty guidelines

approved by FERC pursuant to 18 C.F.R. Section 39.7(g)(2), or (iv) any other dispute that relates to enforcement of reliability standards properly before the WECC.

The standard of proof in any proceeding under these Hearing Procedures shall be by a preponderance of the evidence. The burden of persuasion on the merits of the proceedings shall rest upon the Compliance Staff alleging noncompliance with a Reliability Standard, proposing a penalty, opposing a Registered Entity's Mitigation Plan, or requiring compliance with a Remedial Action Directive.

1.1.2 Deviation

To the extent permitted by law, any provision in these Hearing Procedures may be waived, suspended or modified by the Hearing Officer or the Hearing Panel for good cause shown, either upon the Hearing Officer's or the Hearing Panel's own motion or upon the motion of any Party.

1.1.3 Standards for Discretion

These Hearing Procedures, and any discretion exercised hereunder, shall be interpreted in a manner intended to ensure just and reasonable proceedings and to effectuate the following Standards for Discretion:

- a) Integrity of the Fact-Finding Process - The principal goal of the hearing process is to assemble a complete factual record to serve as a basis for a correct and legally sustainable ruling, decision or order.
- b) Fairness - Persons appearing in WECC proceedings should be treated fairly. To this end, Parties should be given fair notice and opportunity to present explanations, factual information, documentation and legal argument. Action shall be taken as necessary to eliminate any disadvantage or prejudice to a Party that would otherwise result from another Party's failure to act diligently and in good faith.
- c) Independence - The hearing process should be tailored to protect against undue influence from any Person, Party or interest group.
- d) Balanced Decision-Making - Decisions should be based solely on the facts and arguments of record in a proceeding and by individuals who satisfy the conflict of interest provisions of section 1.8.4 of these Hearing Procedures.
- e) Impartiality - Persons appearing before the Hearing Panel should not be subject to discriminatory or preferential treatment. Registered Entities should be treated consistently unless a reasonable basis is shown in any particular proceeding to depart from prior rulings, decisions or orders.
- f) Administrative Efficiency and Expedition - Proceedings shall be brought to a conclusion as swiftly as is possible in keeping with the other goals of the hearing process.

1.1.4 Definitions and Interpretation

Unless otherwise defined, capitalized terms shall have the meanings described in the WECC Compliance Monitoring and Enforcement Program. Unless the context otherwise requires, the singular of a term used herein shall include the plural and the plural of a term shall include the singular. To the extent the text of a rule is inconsistent with its caption, the text of the rule shall control.

The following terms shall have the following meanings:

“Adjudicatory Officer,” means any person serving as a member of the Hearing Panel, Hearing Officer or Technical Advisor with respect to any proceeding.

“Clerk” means the person designated by WECC to receive filings and serve documents issued by or on behalf of, and otherwise provide support for, the Hearing Panel and Hearing Officer.

“Compliance Hearing Body,” is as defined in the WECC Compliance Hearing Body Charter.

“Critical Energy Infrastructure Information,” as defined in Section 1501 of the NERC Rules of Procedure.

“Critical Energy Infrastructure Information,” as defined in Section 1501 of the NERC Rules of Procedure, means specific engineering, vulnerability, or detailed design information about proposed or existing critical infrastructure that: (1) relates to details about the production, generation, transportation, transmission, or distribution of energy; (2) could be useful to a person in planning an attack on critical infrastructure; (3) is exempt from mandatory disclosure under the Freedom of Information Act, 5 U.S.C. 552 (2000); and (4) does not simply give the general location of the critical infrastructure.

“Cybersecurity Incident,” as defined in 18 C.F.R. § 39.1.

“Director of Compliance” means the Director of Compliance of WECC, who is responsible for the management and supervision of Staff.

“Document” means, in addition to the commonly understood meaning of the term as information written or printed on paper, any electronically stored information, including writings, drawings, graphs, charts, photographs, sound recordings, images and other data or data compilations stored in any medium from which information can be obtained, and shall be translated by the producing party into reasonably usable form.

“ERO” means the Electric Reliability Organization, currently the North American Electric Reliability Corporation, or any successor organization, certified by FERC pursuant to 18 C.F.R. Section 39.3.

“FERC” means the Federal Energy Regulatory Commission.

“Hearing Panel” means the persons assigned to render a final decision in matters requiring a determination under these Hearing Procedures.

“NERC” means North American Electric Reliability Corporation.

“Notice of Proceeding” means (1) a request for a hearing by a Registered Entity to contest an Alleged Violation, a proposed Penalty or a Remedial Action Directive, (2) a request for hearing by a Registered Entity or the Staff concerning a dispute as to whether the entity should be registered or certified, (3) a request for hearing by a Registered Entity in response to a Staff rejection of a proposed revised Mitigation Plan submitted after Compliance Staff rejected the Registered Entity’s initial proposed Mitigation Plan, or (4) any other notice that a proceeding has been properly commenced.

“Penalty” as used herein includes all penalties and sanctions, including but not limited to a monetary or non-monetary penalty; a limitation on an activity, function, operation or other appropriate sanction; or the addition of the Registered Entity to a reliability watch list composed of major violators.

“Person” means any individual, partnership, corporation, limited liability company, governmental body, association, joint stock company, public trust, organized group of persons, whether incorporated or not, or any other legal entity.

“Service List,” means the list maintained by the Clerk identifying the name, address, telephone number, and facsimile number and email address, if available, of each Party, the Hearing Officer, the Director of Compliance, the Registered Entity’s designated agent for service and any other individuals designated for service by a Party.

“Staff” means individuals employed or contracted by WECC who have the authority, among other things, to make initial determinations as to need for registration, compliance or violation with Reliability Standards by Registered Entities and associated Penalties, Mitigation Plans, and Remedial Action Directives.

“WECC’s area of responsibility” means WECC’s corporate region.

1.2 FILING AND SERVICE

1.2.1 Form and Content of Filings

All filings shall include (1) a caption that sets forth the title and docket number (if any) of the proceeding, (2) a heading that describes the filing and the Party on whose behalf the filing is made, (3) the name, address, telephone number and email address of the Party’s representative of the making, and (4) the service list. All filings shall be signed by an authorized representative of the Party on whose behalf the filing is made. The signature constitutes a certificate that the signer has read the filing, that the contents are true to the best of the signer’s knowledge and belief, and that service required by these Hearing Procedures has been made. Each filing shall include a service list identifying the Parties and authorized representatives served.

All filings shall be typewritten, printed, reproduced or prepared using a computer or other word or data processing equipment on white paper 8½ inches by 11 inches with inside text margins of not less than one inch. Page numbers shall be centered and have a bottom margin of not less than ½ inch. Line numbers, if any, shall have a left-hand margin of not less than ½ inch. Typeface shall be either Arial or Times New Roman font, black type on white background, and at least 12-point (at least 10-point for footnotes). Written testimony shall include continuous line numbers on the left-hand side of each page of text. Attachments shall, whenever practical,

conform to these requirements, except that any typeface shall be at least 8-point. Confidential documents shall comply with the requirements of any Protective Order issued under Section 1.10.

1.2.2 Submission of Filings

The original and five copies of any filing shall be made with the Clerk of WECC during WECC business hours (0800-1630 Mountain Time) each day except Saturday, Sunday, legal holidays and any other day declared by the WECC. Filing is complete when date stamped by the Clerk or received in the electronic mail by the Clerk.

Unless as otherwise provided, a filing may be effected by electronic mail if the filed documents are in pdf format and the requisite number of copies are delivered to the Clerk's office within seven business days thereafter.

1.2.3 Service

A copy of each filing must served on each person listed on the service list, by personal delivery, email (with paper copy to follow), United States mail (first class or registered) mail or deposit with an express courier service. The Clerk shall provide copies of all issuances of the Hearing Officer and Hearing Panel by similar means to each person listed on the service list and each member of the Hearing Panel, provided that the Initial and Final Decisions shall be served electronically and by certified mail on the Registered Entity and the Staff. Service is effective immediately if by personal delivery or email, upon deposit in the U.S. mail, or upon delivery to an express courier service.

1.2.4 Time

The time in which any action is required to be done shall be computed by excluding the day of the act or event from which the time period begins to run, and by including the last day of the time period, unless the last day is a Saturday, Sunday, legal holiday or any other day upon which the Office of WECC is closed, in which event the last day shall be the first succeeding day that is not such a day. Any Party requesting an extension of time after the expiration of the period prescribed shall demonstrate circumstances sufficient to justify the failure to act in a timely manner. Unless otherwise provided, whenever a Party has the right or is required to do some act within a prescribed period after the service, four days shall be added to the prescribed period when served by mail and the period until the next business day shall be added if served by courier.

1.3 PLEADINGS, MOTIONS AND OTHER FILINGS

1.3.1 Initiation of a Proceeding

A proceeding is initiated by a Notice of Proceeding. Any Notice of Alleged Violation or other action triggering a right to a hearing shall clearly state (as applicable) that the Registered Entity has the right to contest proposed registration or certification, that the Registered Entity has a right to a hearing, and shall describe or include (as applicable) the alleged violation, the proposed Penalty, the Staff's rejection of the proposed Mitigation Plan, or the issuance of a Remedial Action Directive. Upon receipt of a Notice of Proceeding, the Clerk shall issue a notice of

hearing, which identifies the Hearing Panel and, if applicable, the Hearing Officer assigned to the proceeding, and assigns a docket number that includes (separated by dashes) (1) the last two digits of the month and year, (2) the letters “[Regional Entity designation]”, and (3) a four digit number that is assigned sequentially beginning January 1 of each year (*e.g.*, 0707-WECC-0001).

Within five business days after the issuance of a Notice of Proceeding, WECC staff shall file and serve the notice of the Alleged Violation, the sanction originally provided to the Registered Entity and copies of any documents gathered and reviewed by WECC in the course of determining an Alleged Violation has occurred and in determining the proposed sanction or penalty. Within twenty days after the issuance of the Notice of Proceeding, (1) the Registered Entity shall file (as applicable) an explanation of why the Alleged Violation is in error, why the registration determination is in error, why the proposed penalty or sanction is inappropriate and/or the Registered Entity’s proposed Mitigation Plan, together with copies of all documents relied on by the Registered Entity to support its position, and (2) (if applicable) the Staff shall file its explanation why the Registered Entity’s proposed Mitigation Plan was not accepted, and copies of all documents relied on by the Registered Entity to support its position.

1.3.2 Amendments

Amendments to any filings initiating a proceeding or requesting a hearing may be allowed by the Hearing Officer or the Hearing Panel upon motion made within a reasonable time after the basis for the amendment became apparent, on such terms and conditions as are deemed to be just and reasonable.

1.3.3 Requirements for Motions

Unless otherwise provided, a Party may at any time seek any relief provided for under these Hearing Procedures or otherwise applicable authority by filing a motion in writing (or orally if during a hearing). All motions shall include a plain and concise statement of any facts upon which the motion is based, citations to the record or other sources, if available, any required verification under oath by a person having knowledge of the matters set forth in the filing, a description of the specific relief sought, and the authority that supports the request for relief. Unless otherwise provided, any responses to motions shall be filed within 14 business days after service of the motion, and replies to responses shall be filed within seven business days after service of the responses.

The Hearing Panel or Hearing Officer, in their discretion, may elect to hold oral argument on any matters in dispute.

1.3.4 Intervention; Consolidation of Related Proceedings

No interventions shall be permitted except upon approval of FERC. The Hearing Panel or Hearing Officer may, upon motion or their own initiative, order two or more matters partially or fully consolidated for any or all purposes if (1) events giving rise to the proceeding are the subject of another proceeding involving another Registered Entity, (2) it appears likely that consolidation is necessary to obtain all information necessary for decision and (3) reasonable procedures can be developed to prevent inappropriate disclosure of confidential information. Consolidation shall not be ordered unless all Parties in all proceedings have been provided notice and opportunity to be heard

1.3.5 Summary Disposition

The Hearing Panel or Hearing Officer may, upon motion or their own initiative, order summary disposition, in whole or in part, if there are no genuine issues of material fact with respect to the matters subject to summary disposition and the Party is entitled to summary disposition as a matter of law. Any factual allegations contained in a motion for Summary Disposition shall be supported by affidavit.

1.3.6 Interlocutory Review

Where the ruling for which interlocutory review is sought (1) presents an extraordinary circumstance which makes prompt review necessary to prevent prejudice to a Participant's ability to present its position in the proceeding or (2) involves a requirement that a non-Party produce information or testimony, a Party or person subject to the ruling may seek interlocutory review of any Hearing Officer ruling within 14 business days after the ruling. The Hearing Panel may affirm, reverse, remand, decline to act or take any other action on the Hearing Officer's ruling.

1.3.7 Pre-Evidentiary Hearing Submission of Testimony and Evidence

With the exception of examination of an adverse witness and of testimony and documents of a non-Party subject to an order to compel, all witness testimony, exhibits, and any documents intended to be introduced in connection with cross-examination, shall be filed at least five business days in advance of the evidentiary hearing pursuant to a schedule adopted for the proceeding.

1.3.8 Pre-Evidentiary Hearing Memorandum

Upon request of the Hearing Officer or the Hearing Panel, the Parties may be required to submit a memorandum prior to hearing describing the Party's position on the issue(s) in dispute, the key facts and arguments, and the applicable Reliability Standard, rules, orders or other authority. A Party will not be deemed to have waived any issue, fact or argument that is not set forth in a pre-evidentiary hearing memorandum.

1.4. DOCUMENT PRODUCTION

1.4.1 Inspection and Copying of Documents in Possession of Staff

(a) Documents to be Available for Inspection and Copying

Within five (5) business days of the initiation of the proceeding, the Staff shall make available to the Registered Entity for inspection and copying, all documents prepared by the Staff or obtained from the WECC, the Registered Entity or other sources, through or in connection with any compliance process that led to the institution of proceedings and not previously made available, including but not limited to all requests for information and responses, transcripts and transcript exhibits. Documents shall be made available during normal business hours at the WECC office where the documents are ordinarily maintained, or at such other office as the Hearing Panel or Hearing Officer, in his or her discretion, shall designate, or the Parties otherwise agree. The Registered Entity shall be responsible for the cost of photocopying, which shall be at a

reasonable rate. Documents received by the Staff thereafter shall be made available to the Registered Entity within 14 business days after receipt or as soon as possible if within 14 business days of the evidentiary hearing. In cases involving more than one Party other than the Staff, the Hearing Officer or Hearing Panel shall determine the extent to the extent to which, and conditions governing the provision of, documents relating to one Party shall be made available to another Party.

(b) Documents That May Be Withheld

The following documents are not subject to disclosure:

(1) Documents subject to a privilege available to the Staff or constituting attorney work-product of Staff's counsel (in applying this provision, the attorney-client privilege shall be recognized as absolute and any demand for production of attorney work product shall be granted only after a showing of substantial need by the Respondent);

(2) Documents that would disclose (i) an examination, investigatory or enforcement technique or guideline of WECC, a federal, state, or foreign regulatory authority, or a self-regulatory organization; (ii) the identity of a source, including a federal, state, or foreign regulatory authority or a self-regulatory organization that furnished information or was furnished information on a confidential basis regarding an investigation, an examination, an enforcement proceeding, or any other type of civil or criminal enforcement action; or (iii) an examination, an investigation, an enforcement proceeding, or any other type of civil or criminal enforcement action under consideration by, or initiated by, WECC, a federal, state, or foreign regulatory authority, or a self-regulatory organization;

(3) Documents containing confidential information, to the extent that disclosure would violate any applicable confidentiality requirement; or

(4) Documents not relevant to the subject matter of the proceeding or, upon order of the Adjudicatory Officer, for other good cause shown.

Provided, however, that nothing in Subparagraphs 1.4.1(b)(2), (3), (4) authorizes Staff to withhold a document, or part thereof, that contains exculpatory evidence, and nothing in Subparagraph (b)(1) requires Staff to withhold a document from disclosure.

The Staff shall provide to the Registered Entity, at the time the documents are provided, a list of documents withheld. Upon motion based on reasonable belief of a violation of these provisions or on their own motion, the Hearing Panel or Hearing Officer may require Staff (1) to submit any withheld document and (2) disclose to Registered Entity any document not meeting the standards of this subsection.

1.4.2 Other Discovery Procedures

In addition to the production of documents by Staff for inspection and copying by Registered Entity pursuant to Subparagraph 1.4.1(a), the Parties shall be entitled to utilize all other methods for obtaining information provided for in Rules 402 through 409 of the FERC Rules of Practice and Procedure, 18 C.F.R. §385.402 through 385.409, including data requests, written interrogatories and requests for production of documents or things, depositions by oral examination, requests for inspection of documents and other property, requests for admission and orders to compel (with respect to references to subpoenas, and which may be directed to non-

Party Registered Entities as well as Parties). Unless otherwise directed by the Hearing Officer or Hearing Panel upon motion by a Party or by the Hearing Officer, or by the Hearing Panel on its own motion, such discovery, and the resolution of any disputes concerning such discovery, shall be conducted in accordance with the provisions of Rules 402 through 410 and 510(e) of the FERC Rules of Practice and Procedure, 18 C.F.R. §385.402 through 385.410 and 510(e), which are hereby incorporated by reference into these Hearing Procedures, subject to the following limitations and modifications to such Rules:

- 1) The provisions of Subparagraph 1.4.1(b) shall apply to any such discovery.
- 2) Rule 403(b)(2) (18 C.F.R. §385.403(b)(2)) and Rule 410(d)(2) (18 C.F.R. §385.410(b)(2)) shall not be applicable.
- 3) The Hearing Officer and the Hearing Panel have the authority to issue orders to compel the appearance by, or production of documents or information by, only a Person that is a Party or a Registered Entity that is not a Party. The Hearing Officer and the Hearing Panel do not have authority to require a United States marshal or deputy marshal to serve any order to compel.
- 4) A list of documents withheld shall be provided, by the deadline for production of the documents, to the Adjudicatory Officer and each Party entitled to receive the documents.
- 5) References to the “Commission” in Rules 402 through 408 and 410 and 510(e) shall be to FERC except as follows: (i) the references in Rules 402(a), 404(b)(1) and 405(b), the second reference in Rule 410(d) and the references in Rule 510(e)(1) and (2) shall be deemed to be to the Hearing Panel, and (ii) the reference in Rule 385.406(b)(4) to “Commission trial staff” shall be deemed to be to Staff, and the reference in Rule 510(e)(3) shall be deemed to be to the Adjudicatory Officer.
- 6) Unless otherwise ordered by the Hearing Officer or Hearing Panel, a data request, set of interrogatories, request for production of documents or things, request for inspection of documents or other property, request for admissions, or order to produce or provide documents, information or testimony, shall not specify a due date or response date that is fewer than 21 days from the date of service of the request or the date of the order.
- 6) Unless otherwise ordered by the Hearing Officer or Hearing Panel, all such discovery shall be requested, scheduled and conducted so as to be completed within six (6) months following the date of the initial prehearing conference held pursuant to Paragraph 1.5.2.

The Hearing Officer’s ruling on all motions relating to disputes concerning such discovery shall consider the following objectives: (i) full disclosure of all relevant documents and information; (ii) the exercise of due diligence in the conduct of discovery by a Participant; and (iii) disallowing use of discovery as a means to delay the proceeding or to harass or burden any other Participant.

1.5 HEARINGS AND CONFERENCES

1.5.1 General

The Clerk shall issue a notice for each conference and hearing, which shall identify the matter(s) to be considered, the person(s) comprising the Hearing Panel or Hearing Officer, and the date, time and place of the hearing or conference. Unless otherwise ordered, all hearings and conferences shall be held during normal business hours at the principal office of WECC. Hearings need not be held on consecutive days.

All hearings, conferences, and other meetings shall be closed to the public, and all notices, rulings, orders or any other issuances of the Hearing Officer or Hearing Panel shall be nonpublic and held in confidence by the Parties unless the ERO (within the U.S., in accordance with the authorization previously granted by FERC to release information about a non-public proceeding) or FERC (in the case of U.S.-related information) or another Applicable Governmental Authority (in the case of non-U.S.-related information) determines that public release is appropriate. Only the Adjudicatory Officers, representatives of the Parties, and other necessary personnel (such as court reporters) shall be allowed to participate in or obtain information relating to the proceeding.

Upon a request, the Hearing Panel or Hearing Officer may permit Parties to appear and witnesses to testify via videoconference or teleconference at any conference or hearing if necessary to avoid undue expense or undue delay in the proceeding.

All hearings and (at the discretion of the Hearing Panel or Hearing Officer) all conferences shall be transcribed verbatim by a certified court reporter. A Party may request corrections to the transcript within 35 days after receipt of the transcript and any responses shall be filed within ten business days thereafter. Each Party is responsible for the costs of a copy of any transcript ordered by it.

1.5.2 Prehearing and Status Conferences

A prehearing conference shall be held within a thirty days after initiation of a proceeding, to identify issues then known to the Parties, establish a schedule and to address any other relevant matter. Any Party may request, and the Hearing Panel or Hearing Officer may call, a status conference at any time subsequent to the Prehearing Conference to address any issues that have arisen. The Hearing Panel or Hearing Officer may summarize actions taken in a memorandum.

1.5.3 Evidentiary Hearings

A Party has the right to present such evidence, to make such objections and arguments, and to conduct such cross-examination as may be necessary to assure the true and full disclosure of the facts. All testimony shall be under oath.

Evidence is admissible if it is of a type commonly relied upon by reasonably prudent persons in the conduct of their affairs, but may be excluded if immaterial or unduly repetitious or

prejudicial. The Hearing Panel or Hearing Officer may exclude material from the record only in response to a motion or objection by a Party.

Upon 14 business days' advance notice and subject to the objection by another Party, any Party may call and cross-examine as an adverse witness, any other Party, or any employee or agent thereof or Registered Entity that has been subject to an order to compel.

Upon motion, the Hearing Panel or Hearing Officer may take official notice of and the type of information any of the following:

- 1) Rules, regulations, administrative rulings and orders, and written policies of governmental bodies and Regional Entities, including WECC;
- 2) Municipal and other ordinances;
- 5) Generally recognized scientific or technical facts within the specialized knowledge of WECC;
- 4) Other facts not reasonably subject to dispute; and
- 6) All other matters of which the courts of the United States may take judicial notice.

Any document, and any item officially noticed that exists in document form, shall be introduced into the record in the form of an exhibit.

The Hearing Panel or (prior to issuance of an Initial Decision) the Hearing Officer may allow oral argument, and also may reopen the evidentiary record and hold additional hearings if warranted by any changes in fact or law since the hearing.

1.5.4 The Record

The record shall include the following:

- 1) The filing(s) that initiated the proceeding, responsive documents, and a list of all documents comprising the record;
- 2) Notices, rulings, orders, decisions and other issuances of the Hearing Officer and Hearing Panel;
- 3) All motions, briefs and other filings;
- 4) All prefiled testimony, exhibits, other evidence, information excluded from evidence, transcripts and matters officially noticed;
- 5) All Notices of *ex parte* communications and any notifications of recusal and motions for disqualification of any Adjudicatory Officer and any responses or replies thereto;
- 6) The Hearing Officer's Initial Decision, and exceptions thereto; and

- 7) The Hearing Panel's Final Decision and any Notice of Penalty therewith.

1.5.5 Briefs and Other Post-Hearing Pleadings

At the close of the evidentiary hearing, Parties may file initial briefs, proposed findings of fact and reply briefs. Absent good cause shown, post-hearing pleadings shall not seek to introduce additional evidence into the record after the hearing has ended.

1.6 DECISIONS

1.6.1 Initial Decisions

The Hearing Officer shall issue an Initial Decision that shall include (1) a statement of each finding and conclusion, and the reasons or basis therefore, for all material issues of fact, law or discretion presented on the record, and (2) appropriate proposed orders to dispose of the proceeding, including any Penalty, sanction, remedial action or Mitigation Plan required. Any proposal for a Penalty shall include a proposed Notice of Penalty. The Initial Decision shall note if the subject of the proceeding has been deemed to involve a Cybersecurity Incident or if any information in the proceeding was deemed to be Critical Energy Infrastructure Information protected pursuant to Paragraph 1.10. The Initial Decision shall normally be issued within thirty days following the submission of post-hearing briefs, or, if waived, following the conclusion of the hearing.

Any Party may file exceptions to the Initial Decision and replies consistent with any deadlines established in the proceeding.

1.6.2 Hearing Panel Final Decision

The Hearing Panel shall issue a Final Decision following the receipt of (1) the Initial Decision, any exceptions and replies thereto, and oral argument, if any, (where a Hearing Officer has been appointed) or (2) the briefs and reply briefs (where no Hearing Officer was appointed). The Hearing Panel shall strive, but shall not be required, to issue its Final Decision within thirty (30) days after the matter is ready for decision.

In cases where a Hearing Officer is appointed, the Final Decision may adopt, modify, amend or reject the initial opinion in its entirety or in part. The Final Decision shall include (1) a statement of each finding and conclusion, and the reasons or basis therefore, for all material issues of fact, law or discretion presented on the record, and (2) appropriate orders to dispose of the proceeding, including any Penalty, sanction, remedial action or Mitigation Plan required. If the Final Decision imposes a Penalty, it shall be entitled Final Order and Notice of Penalty. The Final Order shall note if the subject of the proceeding has been deemed to involve a Cybersecurity Incident or if any information in the proceeding was deemed to be critical energy infrastructure information protected pursuant to Paragraph 1.5.9.

When the Hearing Panel serves the Final Decision, it will inform the Parties of their appeal rights. The Clerk shall transmit the documents identified in Section 1.5.4, which shall constitute the record for purposes of 18 C.F.R. § 39.7(d)(5), to the ERO at the time it serves the ERO with the Final Decision.

1.6.3 Appeal

A Final Decision of the Hearing Panel may be appealed to NERC in accordance with NERC's Rules of Procedure, Section 410. The Clerk shall transmit the record of any docket to NERC that is the subject of an appealed Final Order.

1.6.4 Settlement

Settlement Agreements may be entered into at any time including prior to the issuance of a Notice of Proceeding or during an appeal at the ERO, until a Notice of Confirmed Violation, Notice of Penalty, Notice of Mitigation Plan or Remedial Action Directive, whichever is applicable, is filed with the appropriate regulatory authority. All Settlement Agreements entered into prior to the issuance of a Final Decision shall be subject to approval of the Hearing Panel. Any rejected Settlement Agreement shall not be admissible into evidence and the proceedings shall continue as if the Settlement Agreement had not been filed.

1.7 PARTIES AND APPEARANCES

1.7.1 Parties

The Parties shall include: the Registered Entity who is subject of the Notice of Alleged Violation, contested Mitigation Plan or contested Remedial Action Directive that is the basis for the proceeding, whichever is applicable; the Staff and any other person allowed or required by FERC to participate as an intervenor in a proceeding conducted pursuant to these Hearing Procedures.

1.7.2 Appearances

Parties shall file written appearances within seven (7) business days after service of the filing initiating the proceeding. A Party's written appearance shall identify the name(s) of each individual authorized to represent the Party in the proceeding exclusive of witnesses. An individual may appear on his or her own behalf. A corporation, association, partnership or governmental body may appear by an attorney or any *bona fide* officer or designee who has the authority to act on behalf of the Party.

A Party's written appearance shall state, with respect to each individual that the Party identifies for service, the individual's name, address, telephone number, and facsimile number and email address, if available, where service shall be made.

A Party may withdraw any individual from the Party's representation or otherwise change the identity of individuals authorized to represent the Party in a proceeding by filing a notice of a change in service list.

Any attorney appearing on behalf of a Party shall be licensed to practice and in good standing before the Supreme Court of the United States or the highest court of any State, territory of the United States or the District of Columbia.

1.7.3 Confidentiality

All participants in any proceeding before the Hearing Panel shall be take all actions necessary to be bound by confidentiality obligations consistent with NERC Rule of Procedure 1504.

1.8 RESPONSIBILITIES OF ADJUDICATORY OFFICERS

1.8.1 Hearing Panel

The Hearing Panel shall be selected from the Compliance Hearing Body, as provided in the WECC Compliance Hearing Body Charter, and the composition of the Hearing Panel shall assure that no two industry segments may control, and no single industry segment may veto, any decision by the Hearing Panel. The Hearing Panel is vested with all necessary the authority to preside over all matters relating to a proceeding, including the following:

1. To establish the scope of the proceeding, including segregation of issues into separate phases of the proceeding and consolidation of related proceedings;
2. Take such action as necessary to assure the confidentiality of the proceeding and documents produced in connection with the proceeding;
3. Establish and modify the schedule for the proceeding, and modify any deadline or required interval;
4. Supervise discovery and rule on any disputes relating thereto;
5. Preside over prehearing conferences, status hearings, oral arguments and evidentiary hearings, including administering oaths and affirmations, ruling on evidentiary matters, requiring the introduction of additional evidence;
6. Issue a Final Decision and rule upon all motions and all other requests for relief;
7. Take other actions necessary and appropriate for the adjudication of the proceeding.

All actions (including all rulings, orders and determinations) of the Hearing Panel shall require a quorum consisting of a majority of the persons assigned to the Hearing Panel, unless waived by the Parties in a particular circumstance, subject in all events to the requirement that no two industry segments may control, and no single industry segment may veto, Hearing Panel actions. All rulings, orders and determinations of the Hearing Panel shall require the vote of a majority of the persons constituting a quorum. Where necessary, one or more persons assigned to the Hearing Panel may participate by teleconference as long as a majority are present in person; provided that all persons assigned to the Hearing Panel may participate by teleconference with respect to a Remedial Action Directive hearing. All rulings, orders and determinations shall be recorded in a written ruling or in a transcript and shall be designed to promote the conduct of a full, fair and impartial proceeding and to effectuate the standards of discretion.

1.8.2 Hearing Officer

WECC may designate one or more Staff members, third-party contractors, or industry stakeholders to serve as Hearing Officers and may thereby preside over any aspect of the proceeding to the same extent as the Hearing Panel, except that the Hearing Officer will issue an

Initial Decision and the Final Decision or other order finally disposing of the proceeding or issues within the proceeding must be issued by the Hearing Panel.

1.8.3 Technical Advisor

The Hearing Officer and/or the Hearing Panel may designate one or more Staff members, third-party contractors, or industry stakeholders to serve as Technical Advisors to assist in any proceeding by providing technical advice.

1.8.4 Conflict of Interest

A person shall be disqualified from serving as an Adjudicatory Officer in any proceeding if (1) he or she has been involved in or consulted at any time in regard to any Staff investigation, initial determination of violation or Penalty, or assessment of a Registered Entity's proposed Mitigation Plan relating to the proceeding or (2) his or her participation would violate WECC's applicable conflict of interest policies. An Adjudicatory Officer shall recuse himself or herself from serving in proceeding if disqualified.

Any Adjudicatory Officer shall disclose to the Service List his or her identity, employment history and professional affiliations within two business days of assignment to the proceeding.

1.8.5 Ex Parte Communications

No Adjudicatory Officer assigned to a proceeding may communicate concerning any matter relating to the proceeding, directly or indirectly with any Person who is not an Adjudicatory Officer with respect to a proceeding, except after reasonable notice to all Parties and opportunity to participate.

Any Adjudicatory Officer who makes or receives an *ex parte* communication shall, within seven (7) business days, file and serve on the Parties a description of the date, time, place, substance of and a list of each person making or receiving the *ex parte* communication, and include any written *ex parte* communication.

1.8.6 Motion for Disqualification

Any Party may move to disqualify an Adjudicatory Officer on the basis of conflict of interest, or on the basis of a prohibited *ex parte* communication or other circumstances that could interfere with the impartial performance of his or her duties. The motion shall describe the underlying facts by affidavit and shall be filed within fifteen days after the Party learns of the facts believed to constitute the basis for disqualification or reasonably in advance of any hearing, whichever is earlier. The ruling on a motion to disqualify an Adjudicatory Officer shall be made by the Hearing Panel, provided that the ruling on a motion to disqualify a Hearing Panel member shall be made by the Hearing Panel without participation by the member subject to the motion. Any challenge to a disqualification ruling by a Hearing Officer is waived if no interlocutory appeal has been filed within five business days of the ruling. Any disqualified Adjudicatory Officer shall be replaced as soon as practicable.

1.9 REMEDIAL ACTION DIRECTIVES

1.9.1 Initiation of Remedial Action Directive Hearing

Staff may issue a Remedial Action Directive to a Registered Entity at any time, including during any proceeding related to an alleged violation of a Reliability Standard. Notice of the Remedial Action Directive shall not be effective until actual receipt by the Registered Entity, as provided in Section 7.0 of the Compliance Monitoring and Enforcement Program. WECC will notify NERC within two (2) business days after its Staff issues a Remedial Action Directive.

The Registered Entity may contest the Remedial Action Directive by filing a written notice with the Clerk of the WECC that states that the Registered Entity contests the Remedial Action Directive and that the Registered Entity requests a Remedial Action Directive hearing. The Registered Entity shall attach a copy of the Remedial Action Directive to its written notice. The Registered Entity must provide such notice within two (2) business days following actual receipt of the Remedial Action Directive. If the Registered Entity does not give written notice to WECC within the required time period, the Registered Entity shall be deemed to have waived its right to contest the Remedial Action Directive.

The Clerk shall assign a docket number, and issue a Notice of Hearing.

1.9.2 Remedial Action Directive Procedure

Proceedings to address Remedial Action Directives shall be conducted only under the expedited hearing process set forth in this Paragraph 1.9.2. All other provisions of the Hearing Procedures shall apply to the Remedial Action Directive hearing unless inconsistent with or inapplicable to the procedures set forth in this paragraph.

The Remedial Action Directive hearing will be conducted according to the following guidelines:

- a) The Hearing Panel or Hearing Officer will hold a prehearing conference within two (2) business days after receipt of the Registered Entity's request for a hearing.
- b) An evidentiary hearing will be conducted on the matter, in person or by teleconference, within seven (7) business days after the prehearing conference. The provisions in Section 1.4 concerning document production shall not apply.
- c) At the evidentiary hearing, Staff and the Registered Entity shall have the opportunity to present oral witness testimony and evidence, which shall be rendered under oath, and to conduct cross-examination.
- d) At the evidentiary hearing, the Parties shall have the opportunity to make opening and closing statements, but shall not file any briefs or draft opinions, and oral argument shall not be held.
- e) The Hearing Panel shall issue a summary written decision within ten (10) business days following the hearing, stating whether the Registered Entity shall (upon receipt of the decision) or shall not be required to comply with the Remedial Action Directive and identifying any modifications to the Remedial Action Directive that it finds appropriate. In the event a Hearing Officer has been appointed, the Initial Decision will be issued within a timeframe that permits review and comment by the Parties and issuance of a summary written decision within the ten-day deadline.

- f) Within thirty (30) days following issuance of its summary written decision, the Hearing Panel shall issue a full written decision. The written decision shall state the conclusions of the Hearing Panel with respect to the Remedial Action Directive, and shall explain the reasons for the Hearing Panel's conclusions.
- g) The Final Decision may be appealed to NERC pursuant to section 1.6.3.

1.10. PROTECTIVE ORDERS

- a) At any time during a proceeding, including in connection with document production under section 1.4, on the Hearing Officer's or the Hearing Panel's own motion or on the motion of any Party, an order may be entered to designate as proprietary and protect the confidential, proprietary or trade secret nature of any data, information or studies, or any other information the public release of which may cause a security risk or harm to a Party.
- b) The following types of information will be considered entitled to protection through a Protective Order: (i) confidential business and market information, including information that is proprietary, commercially valuable, or competitively sensitive; (ii) critical energy infrastructure information; (iii) information related to a Cybersecurity Incident; (iv) personnel information that identifies or could be used to identify a specific individual, or that reveals personnel, financial, medical or other personal information; (v) audit work papers; or (vi) investigative files that would disclose investigative techniques. Nothing in this Subparagraph shall require Staff to produce any documents it is entitled to withhold under Subparagraph 1.4.1(b)
- c) A Party submitting a motion for a protective order shall specify the proposed expiration date for the proprietary status of the data, information or studies, if any, and shall propose requirements or safeguards to be met for individuals participating in the proceeding to review the protected information.
- d) A document submitted and marked as proprietary, or a statement made at a hearing and identified as proprietary, shall be afforded proprietary treatment pending the timely submission of a motion to protect the confidential, proprietary or trade secret nature of that document or statement and a ruling on such a motion by the Hearing Officer or Hearing Panel.
- e) The protective order shall identify the data, information or studies that will be accorded proprietary treatment; the individuals participating in the proceeding, by category or otherwise, entitled to view the proprietary information; and the requirements, conditions or safeguards that must be met before an individual may view the information. The order shall also specify any required indications of confidentiality, such as colored paper or notation.
- f) A public redacted version of each document and transcript that contains information that is protected pursuant to this Paragraph must be filed with the proprietary version and must be served on each Party for distribution to those individuals participating in the proceeding who are not entitled to view the proprietary information.

- g) Should it be necessary to address proprietary information during a hearing, the Hearing Officer or Hearing Panel shall exclude from the hearing all individuals other than those entitled to access to the proprietary information in accordance with the protective order.

EXHIBIT E

Exhibit E — Funding

1. Scope of activities funded through the ERO funding mechanism

WECC shall include in its annual budget submission to NERC amounts for costs it will incur in performing its delegated functions and related activities as described in Sections 5, 6 and 7 of the Agreement. These activities shall include:

- Reliability Standards Development

- Compliance Monitoring and Enforcement

This category encompasses WECC's Compliance Monitoring and Enforcement Program, including activities under the WECC Reliability Management System

- Organization Registration and Certification

- Reliability Assessment and Performance Analysis (including necessary data gathering activities)

This category includes WECC's Transmission Expansion Planning Program, Loads and Resources Activities, and all necessary supporting activities

- Event Analysis and Reliability Improvement

- Training and Education

This category includes WECC's Training Programs

- Situation Awareness

This category includes WECC's Reliability Coordinator Functions, Western Interconnection Synchrophasor Program, WECC Interchange Tool, and all necessary supporting activities

- Infrastructure Security

2. Preparation of Annual Business Plan and Budget

(a) NERC and WECC, in conjunction with the other Regional Entities, shall collaboratively develop an annual schedule for the development, submission, review and approval of WECC's business plan and budget. The annual schedule for the preparation of business plans and budgets shall require WECC (i) to submit to NERC draft(s) of WECC's proposed business plan and budget and other preliminary documents and information, and (ii) to submit a final proposed business plan and budget that has been

approved by WECC Board of Trustees to NERC by July 1 or such other agreed date as provides sufficient time for NERC's review, approval and submission of WECC's business plan and budget to the Commission 130 days in advance of the beginning of each fiscal year. The WECC business plan and budget submission shall include supporting materials, including WECC's complete business plan and organization chart, explaining the proposed collection of all assessments, dues, fees and charges, the proposed expenditure of the funds to be collected in sufficient detail to justify the requested budgeted expenditures and assessments. WECC's business plan and budget and proposed assessments shall provide for reasonable reserve mechanisms for unforeseen and extraordinary expenses and other contingencies, consistent with generally accepted accounting principles.

(b) NERC shall review and approve WECC's proposed business plan and budget and proposed assessments for performing the delegated functions and related activities described in Sections 5, 6 and 7 of this Agreement and listed above in Section 1 of this **Exhibit E**, or shall direct WECC to make such revisions as NERC deems appropriate prior to approval. NERC shall submit WECC's approved business plan and budget and proposed assessments to the Commission for approval as part of NERC's overall business plan and budget submission, in accordance with the ERO Regulations.

3. Allocation of Costs

Assessments to fund the costs of WECC's delegated functions and related activities pursuant to the Agreement shall be allocated among all load-serving entities on the basis of Net Energy for Load, unless a different method(s) of allocating and calculating such assessments has been submitted to and approved by NERC and the Commission in accordance with Section 9(b) of the Agreement. WECC shall submit to NERC annually at the same time it submits its budget request a list of the load-serving entities or designees within its geographic boundaries that shall be responsible for paying WECC's assessment and the load-serving entities' proportionate Net Energy for Load, and such other data and information as is necessary to allocate and calculate the allocation of the assessment to the load-serving entities or designees under the method(s) of allocation and calculation that will be used.

Entities on the list of LSEs or Balancing Authorities will be responsible for collection and/or payment of charges through the mechanism described in either Option 1 or 2 below. Each Balancing Authority will inform WECC by June 1st of each year of its choice of Option 1 or 2, and will give WECC at least 90 days notice of its intention to change from one option to the other.

a. OPTION 1 -- The Balancing Authority will provide WECC a list of all LSEs located within its area, including each LSE's name, contact information, and Net Energy for Load. This information will be updated annually and provided to WECC no later than June 1st of each year. WECC will use this list to bill each LSE for all costs on an annual basis.

b. OPTION 2 -- WECC will bill the Balancing Authority for all costs on an annual basis. The Balancing Authority will be responsible for equitably allocating WECC costs among the LSEs in its area (if applicable) on the basis of Net Energy for Load, collecting the funds, and ensuring that WECC receives full payment on an annual basis.

4. Collection of Funding

(a) NERC and WECC agree that WECC shall act as the billing and collection agent on behalf of NERC to bill and collect WECC's assessments from load-serving entities and designees (or such other entities as agreed by NERC and WECC). WECC agrees that it shall (i) issue all invoices to each LSE or Balancing Authority (depending on the Balancing Authority's choice of Option 1 or 2 above) in a prompt and timely manner after receipt from NERC of the information needed to issue invoices, but no later than November 15th each year; (ii) exercise commercially reasonable efforts to collect invoices that are not paid as of the due date(s); and (iii) transfer all funds collected to NERC in a timely manner, as follows: Once per week until all billings are collected, WECC will electronically transfer to NERC, in immediately available funds, all payments received by WECC from load-serving entities or other entities for the payment of annual invoices. On the same day that WECC makes each electronic transfer of funds to NERC, WECC shall send an e-mail to the Chief Financial Officer or Controller of NERC detailing the collections being transmitted, including a listing of the load-serving entities or other entities from which payments were collected and the amount collected from each entity

and the breakdown of the total payments collected among NERC statutory funding, WECC statutory funding and WIRAB statutory funding.

WECC agrees that it shall not in any way use its position as billing and collection agent for NERC to attempt to influence NERC's policies or decisions on matters relating to adoption of Reliability Standards (including Regional Reliability Standards and Regional Variances), administration of the Compliance Monitoring and Enforcement program and other compliance and enforcement matters, determination and imposition of penalties and sanctions, budgeting matters including review and approval of WECC's budgets and business plans, or any other NERC decisions, including by issuing invoices, engaging in collection activities or transferring funds collected to NERC in an untimely manner or other than in accordance with this Agreement. To the extent WECC uses another entity as collection agent, it will incorporate these safeguards in the arrangements with the collection agent.

Within three (3) business days following receipt of an electronic transfer of collected assessments from WECC in accordance with Section 4(a) of this Exhibit E, NERC will electronically transfer (i) to WECC, in immediately available funds, the portion of the payment received from WECC constituting WECC statutory funding, and (ii) to WIRAB, in immediately available funds, the portion of the payment received from WECC constituting WIRAB statutory funding.

(b) NERC shall pursue any non-payments of assessment amounts and shall request assistance from ERO Governmental Authorities as necessary to secure collection. To the extent reasonably practicable, WECC shall assist NERC in pursuing and collecting any non-payments. Notwithstanding the foregoing, WECC is not responsible and does not assume any liability for recovering non-payments or underpayments of assessment amounts. NERC shall retain sole responsibility for recovering non-payments or underpayments of assessment amounts. NERC shall add the amount of any non-payments by end-users or designees within WECC's region, that are reasonably determined to be uncollectible, to NERC's assessments for a subsequent year with the amount of such non-payments to be allocated to end-users within WECC's region.

5. Application of Penalties

Except as otherwise approved by the Commission, all penalty monies received by WECC, other than penalty monies received from an operational function or division or affiliated entity of WECC, shall be applied as a general offset to WECC's budget requirements for U.S.-related activities under this Agreement for a subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity. Except as otherwise approved by the Commission, any penalty monies received by NERC from an operational function or division or affiliated entity of WECC shall be transmitted to or retained by NERC and shall be used by NERC as a general offset to NERC's budget for its activities as the ERO under the Act for the following year.

6. Budget and Funding for WECC's Non-Statutory Activities

In addition to its delegated functions and related activities, as specified in Sections 5, 6 and 7 of the Agreement and in Section 1 of this **Exhibit E** (such delegated functions and activities referred to in this Section 6 as "statutory activities"), WECC performs the following other functions and activities (such other functions and activities being referred to in this Section 6 as "non-statutory activities"): Western Renewable Generation Information System ("WREGIS").

WECC shall employ the following methods and procedures to (i) keep its funding mechanisms for its statutory activities separate from its funding mechanisms for its non-statutory activities, and (ii) record the costs it incurs in the performance of its non-statutory functions separately from the costs it incurs in the performance of its statutory functions: WECC utilizes a fund accounting system with capabilities to segregate receipts and expenses based on function or activity. WECC has segregated non-statutory activities by assigning a separate fund code to those receipts and expenses. All expenditures or receipts that are entered into WECC's accounting system must include a fund code identifying whether the transaction is related to statutory or non-statutory activities. General and administrative costs are allocated to non-statutory activities based on an FTE ratio that is consistent with NERC's accounting methodology for allocation of overhead to

statutory activities. For these reasons, time records are not necessary for WECC to properly allocate costs between statutory and non-statutory activities.

WECC shall provide its budget for such non-statutory activities to NERC at the same time that WECC submits its proposed annual business plan and budget for statutory activities to NERC pursuant to Section 9 of the Agreement. WECC's budget for non-statutory activities that is provided to NERC shall contain a detailed list of WECC's non-statutory activities and a description of the funding sources for the non-statutory activities. WECC agrees that no costs (which shall include a reasonable allocation of WECC's general and administrative costs) of non-statutory activities are to be included in the calculation of WECC's assessments, dues, fees, and other charges for its statutory activities.

7. Amended or Supplemental Business Plans and Budgets

During the course of the fiscal year, if WECC determines it does not or will not have sufficient funds to carry out its delegated functions and related activities, WECC shall submit to NERC one or more proposed amended or supplemental business plans and budgets and requests for approval of supplemental assessments, reflecting costs, cost increases or funding shortfalls not provided for in WECC's approved business plan and budget for the fiscal year. NERC shall review and approve the proposed amended or supplemental business plan and budget and proposed supplemental assessment, or shall direct WECC to make such revisions as NERC deems appropriate prior to approval. NERC shall submit WECC's approved amended or supplemental business plan and budget and proposed supplemental assessment to the Commission for approval.

8. NERC Review of Regional Entity Financial Statements

NERC shall conduct reviews of the quarterly and annual financial statements submitted by WECC pursuant to Section 9(h) and (i) of the Agreement. WECC shall provide supporting documentation for the quarterly and annual audited financial statements as reasonably requested by NERC based on its reviews.

ATTACHMENT 9B

NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION

REVISED DELEGATION AGREEMENT

WITH

WESTERN ELECTRICITY COORDINATING COUNCIL

REDLINED AGAINST

REVISED PRO FORMA DELEGATION AGREEMENT

**AMENDED AND RESTATED DELEGATION AGREEMENT BETWEEN
NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION
AND ~~REGIONAL ENTITY~~**

AND WESTERN ELECTRICITY COORDINATING COUNCIL

AMENDED AND RESTATED DELEGATION AGREEMENT (“Agreement”) made as of ~~January 1, 2011~~, 2011, between the North American Electric Reliability Corporation (“NERC”), an organization certified by the Federal Energy Regulatory Commission (“Commission”) pursuant to Section 215(c) of the Federal Power Act to establish and enforce Reliability Standards for the Bulk-Power System, and ~~REGIONAL ENTITY~~ the Western Electricity Coordinating Council (“WECC”), an organization established to develop and enforce Reliability Standards within the geographic boundaries identified on **Exhibit A** to this Agreement, and for other purposes. NERC and ~~REGIONAL ENTITY~~ WECC may be individually referred to herein as “Party” or collectively as “Parties.”

WITNESSETH

WHEREAS, Subtitle A of the Electricity Modernization Act of 2005 added Section 215 to the Federal Power Act (16 U.S.C. § 824n) (hereafter “the Act”), which, among other things, provides for the establishment of an electric reliability organization (“ERO”) to develop and enforce Reliability Standards applicable to all owners, operators, and users of the Bulk-Power System;

WHEREAS, the Commission has adopted regulations for the implementation of the Act, which are set forth at Chapter I, Title 18, Code of Federal Regulations, Part 39 (the “ERO Regulations”);

WHEREAS, the Commission has certified NERC as the ERO that will, in accordance with the Act, establish and enforce Reliability Standards for the Bulk-Power System, subject to certain delegation provisions described below;

WHEREAS, the Act recognizes the international interdependency of electric reliability within North America and envisions the ERO and such applicable Regional Entities as international organizations;

WHEREAS, the Act and Section 39.8 of the ERO Regulations provide for the delegation by the ERO of authority to propose and enforce Reliability Standards to regional entities (“Regional Entities”) such as ~~[REGIONAL ENTITY]~~WECC provided that:

(A) The Regional Entity is governed by —

- (i) an independent board;
- (ii) a balanced stakeholder board; or
- (iii) a combination independent and balanced stakeholder board.

(B) The Regional Entity otherwise satisfies the provisions of Section 215(c)(1) and (2) of the Act; and

(C) The agreement promotes effective and efficient administration of Bulk-Power System reliability;

WHEREAS, certain Regional Entities are organized on an Interconnection-wide basis and are therefore entitled to the presumption set forth in the Act that: “[t]he ERO and the Commission shall rebuttably presume that a proposal for delegation to a Regional Entity organized on an Interconnection-wide basis promotes effective and efficient administration of bulk power system reliability and should be approved”;

WHEREAS, the Act further provides that the ERO shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Reliability Standard or modification to a Reliability Standard to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest;

WHEREAS, ~~[REGIONAL ENTITY]~~ ~~[is/is not]~~WECC is organized on an Interconnection-wide basis and therefore ~~[is/is not]~~ entitled to the rebuttable presumptions accorded such an entity;

WHEREAS, NERC will work through ~~{REGIONAL ENTITY}~~WECC to carry out certain of its activities in furtherance of its responsibilities as the ERO under the Act;

WHEREAS, NERC has concluded that ~~{REGIONAL ENTITY}~~WECC meets all requirements of the Act, the ERO Regulations, and the NERC Rules of Procedure as approved by the Commission (“NERC Rules of Procedure”) necessary to qualify for delegation; and

WHEREAS, NERC and ~~{REGIONAL ENTITY}~~WECC, having operated under a predecessor agreement to this Agreement, have negotiated this amended and restated Agreement so as to incorporate the benefits of their mutual experience and lessons learned while operating under the predecessor agreement and thereby provide for the more efficient and effective execution of their respective responsibilities in a transparent manner that is pursuant to Section 215 of the Act and the ERO Regulations;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, NERC and ~~{REGIONAL ENTITY}~~WECC agree as follows:

1. Definitions. The capitalized terms used in this Agreement shall be defined as set forth in the Act, the ERO Regulations, the NERC Rules of Procedure, or the NERC Glossary of Terms Used in Reliability Standards, or, if not so defined, shall be defined as set forth in this Section 1 or elsewhere in the text of this Agreement:

(a) Breach means (i) the failure of a Party to perform or observe any material term, condition or covenant of the Agreement or (ii) a representation in Section 2 of the Agreement shall have become materially untrue.

(b) Cross-Border Regional Entity means a Regional Entity that encompasses a part of the United States and a part of Canada or Mexico.

(c) Delegated Authority means the authority delegated by NERC to ~~{REGIONAL ENTITY}~~WECC to propose and enforce Reliability Standards pursuant to the Act and to undertake related activities set forth in this Agreement in furtherance of

these delegated functions in accordance with the Act, the ERO Regulations and this Agreement.

2. Representations.

(a) For purposes of its Delegated Authority, ~~{REGIONAL ENTITY}~~WECC hereby represents and warrants to NERC that:

(i) ~~{REGIONAL ENTITY}~~WECC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder.

~~{REGIONAL ENTITY}~~WECC is governed in accordance with its bylaws by ~~{select appropriate: an independent board/a balanced stakeholder board/}~~a combination independent and balanced stakeholder board~~}~~. Pursuant to these bylaws, no two industry sectors can control any ~~{REGIONAL ENTITY}~~WECC decision and no single industry sector can veto any ~~{REGIONAL ENTITY}~~WECC decision. The relevant portions of such bylaws are attached hereto in **Exhibit B**¹, and as so attached are in full force and effect. No other such corporate governance documents are binding upon ~~{REGIONAL ENTITY}~~WECC.

(ii) As set forth in **Exhibit C** hereto², ~~{REGIONAL ENTITY}~~WECC has developed a standards development procedure, which provides the process that ~~{REGIONAL ENTITY}~~WECC may use to develop Regional Reliability Standards ~~{and Regional Variances, if the regional entity is organized on an Interconnection-wide basis}~~ that are proposed to NERC for adoption.

(iii) As set forth in **Exhibit D** hereto, ~~{REGIONAL ENTITY}~~WECC has adopted the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure, which provides for the enforcement of Reliability

¹ The **Exhibit B** from ~~{REGIONAL ENTITY}~~WECC shall meet the requirements contained in **Exhibit B** to this Agreement.

² The **Exhibit C** from ~~{REGIONAL ENTITY}~~WECC shall meet the requirements contained in **Exhibit C** to this Agreement.

Standards within ~~[REGIONAL ENTITY]~~WECC's geographic boundaries as shown on **Exhibit A.**

(b) NERC hereby represents and warrants to ~~[REGIONAL ENTITY]~~WECC that:

(i) NERC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder; and

(ii) NERC has been certified as the ERO by the Commission pursuant to the Act.

3. Covenants.

(a) During the term of this Agreement, ~~[REGIONAL ENTITY]~~WECC shall maintain and preserve its qualifications for delegation pursuant to the Act and shall not amend its Regional Entity Rules without NERC's approval, which shall not be unreasonably withheld or delayed and which shall, in the case of a Regional Entity organized on an Interconnection-wide basis, be governed by the presumptions provided for in Section 215(d)(2) and (e)(4)(C) of the Act, and be subject to any required Commission approval.

(b) During the term of this Agreement, NERC shall maintain its qualification and status as the ERO pursuant to the Act and, subject to the provisions of Sections 17 and 18 of this Agreement, NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations or programs of ~~[REGIONAL ENTITY]~~WECC under this Agreement without first obtaining the consent of ~~[REGIONAL ENTITY]~~WECC, which consent shall not be unreasonably withheld or delayed.

(c) During the term of this Agreement, NERC and ~~[REGIONAL ENTITY]~~WECC shall adhere to and require that all participants in their respective activities under this Agreement follow and comply with the NERC Antitrust Compliance Guidelines.

4. **Delegation of Authority.**

(a) Based upon the representations, warranties and covenants of ~~{REGIONAL ENTITY}~~WECC in Sections 2 and 3 above, the corporate governance documents set forth in **Exhibit B**, the standards development process set forth in **Exhibit C**, and the compliance monitoring and enforcement program set forth in **Exhibit D**, NERC hereby delegates authority, pursuant to Section 215(e)(4) of the Act, to ~~{REGIONAL ENTITY}~~WECC for the purpose of proposing Reliability Standards to NERC, as set forth in Section 5 of this Agreement, and enforcing Reliability Standards, as set forth in Section 6 of this Agreement, within the geographic boundaries and such other scope set forth on **Exhibit A**, *provided*, that ~~{REGIONAL ENTITY}~~ WECC shall not monitor and enforce compliance with Reliability Standards for ~~{REGIONAL ENTITY}~~WECC or an affiliated entity with respect to reliability functions for which ~~{REGIONAL ENTITY}~~WECC or an affiliate is a Registered Entity. Any exclusions from this delegation of authority to ~~{REGIONAL ENTITY}~~WECC within, or additions to this delegation of authority to ~~{REGIONAL ENTITY}~~WECC beyond, the geographic boundaries set forth on **Exhibit A** are stated on **Exhibit A**.

(b) In circumstances where ~~{REGIONAL ENTITY}~~WECC or an affiliated entity is a Registered Entity, ~~{REGIONAL ENTITY}~~WECC shall enter into an agreement with another Regional Entity or NERC for the other Regional Entity or NERC to monitor and enforce ~~{REGIONAL ENTITY}~~WECC's or affiliate's compliance with Reliability Standards. Such agreements are subject to NERC and Commission approval.

(c) Nothing in this Agreement shall prohibit ~~{REGIONAL ENTITY}~~WECC from entering into an arrangement between one or more other Regional Entities to perform compliance monitoring and enforcement activities outside of its region, on behalf of NERC and/or other Regional Entities, for Registered Entities that have registered functions monitored by more than one Regional Entity, subject to approval by NERC.

(d) For Cross-Border Regional Entities, the authority delegated by this Agreement shall extend only to the portion of the region identified on **Exhibit A** that is within the United States. Any delegation of authority by ERO Governmental Authorities

in Canada or Mexico shall be governed by a separate agreement and is outside the scope of this Agreement; provided, however, that both ~~{REGIONAL ENTITY}~~WECC and NERC shall endeavor to ensure that this Agreement and such separate agreements are compatible.

(e) As a condition to this delegation of authority and subject to the provisions of Section 17 of this Agreement, ~~{REGIONAL ENTITY}~~WECC shall comply with the applicable provisions of NERC's Certificate of Incorporation, Bylaws, Rules of Procedure, and Reliability Standards, as from time to time adopted, approved, or amended.

5. Development and Proposal of Reliability Standards.

(a) In connection with its Delegated Authority, ~~{REGIONAL ENTITY}~~WECC shall be entitled to:

(i) propose Reliability Standards, Regional Variances, or modifications thereof to NERC, which shall be considered by NERC through an open and inclusive process for proposing and adopting Reliability Standards that affords ~~{REGIONAL ENTITY}~~WECC reasonable notice and opportunity to be heard; and

(ii) develop Regional Reliability Standards ~~{and Regional Variances, if Regional Entity is organized on an Interconnection-wide basis}~~ through ~~{REGIONAL ENTITY}~~WECC's process as set forth in **Exhibit C**. Proposals approved through ~~{REGIONAL ENTITY}~~WECC's process shall be reviewed by the NERC Board after NERC provides notice and an opportunity for interested persons to comment. In the case of a proposal from a Regional Entity organized on an Interconnection-wide basis, comments shall be limited to the factors identified in NERC Rule of Procedure 312.3 as it may be amended from time to time. The NERC Board shall promptly thereafter consider such proposed Regional Reliability Standard or Regional Variance, applying the rebuttable presumption described in subsection 5(b) of this Agreement if the proposed Regional Reliability Standard or Regional Variance is from a Regional Entity organized on an Interconnection-wide basis, and either approve the proposed Regional Reliability Standard or Regional Variance and submit it to the Commission for approval, or disapprove it in writing setting forth its reasons. ~~{REGIONAL ENTITY}~~WECC may

appeal any disapproval of a proposed Regional Reliability Standard or Regional Variance to the Commission.

(b) Pursuant to Section 215(d)(3) of the Act, NERC shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Regional Reliability Standard or Regional Variance or modification thereof to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. Any person challenging such proposal from the Regional Entity organized on an Interconnection-wide basis shall have the burden of proof. NERC shall not find that this presumption has been rebutted except based upon substantial evidence that has been disclosed to, and been subject to comment by, the Interconnection-wide Regional Entity during NERC's review of the proposal.

6. Enforcement of Compliance with Reliability Standards.

(a) In connection with its delegated authority pursuant to this Agreement, ~~REGIONAL ENTITY~~WECC shall enforce Reliability Standards (including Regional Reliability Standards and Regional Variances) within the geographic boundaries set forth, or as otherwise specified, in **Exhibit A** through the compliance monitoring and enforcement program set forth in **Exhibit D**. NERC and ~~REGIONAL ENTITY~~WECC agree that this compliance monitoring and enforcement program meets all applicable requirements of the Act, Order No. 672 of the Commission, and the ERO Regulations, including, *inter alia*, the requirement for an audit program pursuant to Section 39.7(a) of the ERO Regulations, the assessment of penalties pursuant to Section 39.7(c) through 39.7(g) of the ERO Regulations and the requirements for due process. ~~REGIONAL ENTITY~~WECC may not change its compliance monitoring and enforcement program set forth in **Exhibit D** absent NERC's approval, which shall not be unreasonably withheld or delayed, and the approval of the Commission. Subject to the rights and limitations specified in Sections 17 and 18 of this Agreement, ~~REGIONAL ENTITY~~WECC agrees to comply with the NERC Rules of Procedure, with any directives issued pursuant to Section 8(c) of this Agreement, and with any guidance and directions issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, in implementing this program.

(b) ~~REGIONAL ENTITY~~WECC shall report promptly to NERC any Possible Violation, Alleged Violation, or Confirmed Violation of a Reliability Standard, and its eventual disposition by ~~REGIONAL ENTITY~~WECC. Such report shall include the owner's, operator's, or user's name, which Reliability Standard or Reliability Standards were the subject of the Possible Violation, Alleged Violation, or Confirmed Violation, when the Possible Violation, Alleged Violation, or Confirmed Violation occurred, other pertinent facts including circumstances surrounding the Possible Violation, Alleged Violation, or Confirmed Violation with any known risk to the Bulk-Power System, when the Possible Violation, Alleged Violation, or Confirmed Violation was or will be mitigated, the name of a person knowledgeable about the Possible Violation, Alleged Violation, or Confirmed Violation to serve as a point of contact with the Commission, and any other information required by NERC compliance program procedures. NERC shall promptly forward such report to the Commission. NERC and ~~REGIONAL ENTITY~~WECC shall cooperate in filing such periodic summary reports as the Commission shall from time to time direct on Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards and summary analyses of such Possible Violations, Alleged Violations, and Confirmed Violations.

(c) Each Possible Violation, Alleged Violation, or Confirmed Violation shall be treated as nonpublic unless the matter is filed with the Commission as a Notice of Penalty, or, if disclosure is required, dismissed. The disposition of each Possible Violation, Alleged Violation, or Confirmed Violation that relates to a Cybersecurity Incident or that would jeopardize the security of the Bulk-Power System if publicly disclosed shall remain nonpublic unless the Commission directs otherwise.

(d) All dispositions by ~~REGIONAL ENTITY~~WECC of Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards shall be reported to NERC for review and, in the case of Confirmed Violations, penalties or sanctions, and settlements, for approval. Following approval of a disposition by NERC, NERC shall file the disposition with the Commission, if required by, and in accordance with, Section 215(e) of the Act and Section 39.7 of the ERO Regulations. NERC shall review ~~REGIONAL ENTITY~~WECC's dispositions based on the following criteria:

(i) whether the disposition is supported by a sufficient record compiled by ~~REGIONAL ENTITY~~WECC in accordance with the NERC Rules of Procedure, NERC directives and Commission requirements, taking into account the nature of the Possible Violation, Alleged Violation, or Confirmed Violation,

(ii) whether the disposition is consistent with any applicable directives issued pursuant to Section 8(c) of this Agreement, any applicable directions or guidance issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, or other applicable NERC guidance, concerning the Reliability Standards to which the Possible Violation, Alleged Violation, or Confirmed Violation relates,

(iii) if the disposition is a Confirmed Violation or settlement, whether it provides for a penalty or sanction, or a determination of no penalty or sanction, determined in accordance with the NERC Sanction Guidelines, Appendix 4B to the NERC Rules of Procedure, and

(iv) whether the disposition is reasonably consistent with other dispositions by ~~REGIONAL ENTITY~~WECC and by other Regional Entities of Possible Violations, Alleged Violations, and Confirmed Violations involving the same or similar facts and circumstances.

NERC may reject any disposition, with an explanation of why NERC believes the disposition does not meet the above criteria. ~~REGIONAL ENTITY~~WECC may submit a disposition requiring NERC approval that has been rejected by NERC, or a revised disposition following a rejection, directly to the NERC Board Compliance Committee for approval without revising the disposition to address all the grounds on which NERC originally rejected the disposition. The final approval of ~~REGIONAL ENTITY~~WECC's disposition of a Possible Violation, Alleged Violation, or Confirmed Violation shall be made by the NERC Board Compliance Committee, provided, that the NERC Board or NERC Board Compliance Committee may, by appropriate resolution, delegate authority for final approval of dispositions of specified categories of Possible Violations, Alleged Violations, or Confirmed Violations to the NERC President.

(e) All appeals of penalties imposed by ~~[REGIONAL ENTITY]~~WECC as a result of a decision by ~~[REGIONAL ENTITY]~~WECC's Hearing Body shall be filed with, heard by and disposed of by, NERC in accordance with the NERC Rules of Procedure.

(f) ~~[REGIONAL ENTITY]~~WECC shall maintain the capability to conduct investigations of Possible Violations and Alleged Violations of Reliability Standards and to conduct such investigations in a confidential manner.

(g) ~~[REGIONAL ENTITY]~~WECC shall maintain a program of proactive monitoring and enforcement of compliance with Reliability Standards, in accordance with the NERC Compliance Monitoring and Enforcement Program and the annual NERC Compliance Monitoring and Enforcement Program Implementation Plan.

(h) As part of its compliance monitoring and enforcement program, ~~[REGIONAL ENTITY]~~WECC shall maintain a conflict of interest policy that assures the integrity and independence of such program, including the integrity and independence of the persons or decision-making bodies making final determinations in compliance enforcement actions under Section 5.0 of the NERC Compliance Monitoring and Enforcement Program. ~~A Regional Entity~~WECC may have stakeholders lead or participate in its board compliance committee so long as integrity and independence are assured through reasonable and appropriate recusal procedures.

(i) As often as NERC deems necessary, but no less than every five years, NERC shall review ~~[REGIONAL ENTITY]~~WECC's compliance monitoring and enforcement program to determine that: (i) the program meets all applicable legal requirements; (ii) actual practices reflect the requirements; and (iii) the program administered pursuant to the Delegated Authority promotes consistent interpretations across North America of Reliability Standards and comparable levels of sanctions and penalties for violations of Reliability Standards constituting comparable levels of threat to reliability of the Bulk-Power System.

7. Delegation-Related Activities.

NERC will engage ~~[REGIONAL ENTITY]~~WECC on its behalf to carry out certain of its activities that are in furtherance of Bulk-Power System reliability and NERC's responsibilities as the ERO under the Act or in support of the Delegated Authority, as specified in the NERC Rules of Procedure and listed on **Exhibit E**. These

delegation-related activities shall include, but are not limited to, those described in subsections (a) through (f), each of which shall be considered a statutory activity:

(a) Certification of Bulk-Power System Entities. The NERC Board shall set criteria for certification in accordance with the NERC Rules of Procedure. ~~REGIONAL ENTITY~~WECC shall issue certifications in accordance with the NERC Rules of Procedure.

(b) Registration of owners, operators, and users of the Bulk-Power System as responsible for compliance with requirements of Reliability Standards.

(i) The NERC Board shall develop criteria for registration of owners, operators, and users of the Bulk-Power System as Registered Entities and shall apply the registration criteria to register owners, operators and users of the Bulk-Power System as Registered Entities.

(ii) NERC shall maintain a registration database of Registered Entities, based on data and information provided by ~~REGIONAL ENTITY~~WECC and other Regional Entities. ~~REGIONAL ENTITY~~WECC shall provide timely and accurate information relating to registrations to NERC, on at least a monthly basis, to enable NERC to maintain a registration database that is accurate and up-to-date.

(iii) The NERC Board Compliance Committee shall hear and decide appeals from owners, operators and users of the Bulk-Power System contesting registration, in accordance with the NERC Rules of Procedure. If the NERC Board Compliance Committee upholds the decision to register an owner, operator, or user, NERC shall defend the decision in any subsequent appeal of the decision by the Registered Entity to the Commission.

(c) Reliability Assessment and Performance Analysis. ~~REGIONAL ENTITY~~WECC shall develop assessments of the reliability of the Bulk-Power System, or ensure that data and information are collected, analyzed and provided to NERC in support of the development of reliability assessments, in accordance with the NERC Rules of Procedure. ~~REGIONAL ENTITY~~WECC shall also develop and maintain, and collect data in support of the development and maintenance of, reliability performance metrics and assessments of risks to the Reliable Operation of the Bulk-Power System, in accordance with the NERC Rules of Procedure and NERC directives. NERC shall

develop data-gathering quality control procedures, forms and reporting mechanisms, which shall be used by ~~{REGIONAL ENTITY}~~WECC and other Regional Entities in carrying out their responsibilities under this subsection (c).

(d) Event Analysis and Reliability Improvement. ~~{REGIONAL ENTITY}~~WECC shall conduct event analysis pursuant to the NERC Rules of Procedure and applicable governmental regulations. NERC and ~~{REGIONAL ENTITY}~~WECC shall coordinate event analysis to support the effective and efficient use of their collective resources, consistency in event analysis, and timely delivery of event analysis reports. In collaboration with NERC, ~~{REGIONAL ENTITY}~~WECC shall disseminate to the electric industry lessons learned and other information obtained or resulting from event analysis.

(e) Training and Education. ~~{REGIONAL ENTITY}~~WECC may provide training and education to Registered Entities, as it deems necessary, in support of its performance of delegated functions and related activities under this Agreement. NERC may also provide training and education programs to Registered Entities on topics relating to NERC's responsibilities as the ERO.

(f) Situation Awareness and Infrastructure Security.

(i) ~~{REGIONAL ENTITY}~~WECC shall gather and assess situation awareness information provided by Registered Entities pursuant to the NERC Rules of Procedure and applicable governmental regulations, and shall provide other data, information and assistance to NERC in support of NERC's activities in monitoring present conditions, and responding to events, on the Bulk-Power System

(ii) ~~{REGIONAL ENTITY}~~WECC shall collaborate with NERC in its efforts to coordinate electric industry activities to promote critical infrastructure protection of the Bulk-Power System in North America.

8. Oversight of Performance of Delegated Functions and Related Activities.

This Section 8 sets forth processes and procedures which the Parties intend shall be used in NERC's oversight of ~~{REGIONAL ENTITY}~~WECC's performance of its Delegated Authority and related activities pursuant to this Agreement. It is the intent of NERC and ~~{REGIONAL ENTITY}~~WECC that matters relating to NERC's oversight of ~~{REGIONAL ENTITY}~~WECC's performance of its Delegated Authority and related

activities shall be established or resolved by collaboration between NERC and ~~{REGIONAL ENTITY}~~WECC and, where applicable, other Regional Entities, to the maximum extent possible, consistent with the construct that NERC and the Regional Entities are operating together in a collaborative manner to carry out the responsibilities of the ERO under Section 215 of the Act and the ERO Regulations.

(a) (i) NERC shall develop, in collaboration with ~~{REGIONAL ENTITY}~~WECC and other Regional Entities, performance goals, measures and other parameters (including, without limiting the scope of such goals, measures and parameters, financial performance goals, measures and parameters), and performance reports, which shall be used to measure NERC's and ~~{REGIONAL ENTITY}~~WECC's performance of their respective functions and related activities. The performance goals, measures and parameters and the form of performance reports shall be approved by the NERC President and shall be made public. ~~{REGIONAL ENTITY}~~WECC shall provide data, information and reports to NERC, in accordance with established schedules, to enable NERC to calculate ~~{REGIONAL ENTITY}~~WECC's performance to the agreed-upon goals, measures and parameters.

(ii) NERC shall use the performance goals, measures and parameters and performance reports to evaluate ~~{REGIONAL ENTITY}~~WECC's performance of its delegated functions and related activities and to provide advice and direction to ~~{REGIONAL ENTITY}~~WECC on performance improvements. The performance goals, measures and other parameters and the values of such goals, measures and parameters, shall be reviewed by NERC, ~~{REGIONAL ENTITY}~~WECC and the other Regional Entities, revised if appropriate, and made public, on the same timeline as the annual business planning and budgeting process described in Section 9 of this Agreement.

(iii) At the request of the President of NERC, ~~{REGIONAL ENTITY}~~WECC shall be required to develop, submit for NERC approval, and implement action plans to address areas of its performance that are reasonably determined by NERC, based on analysis of ~~{REGIONAL ENTITY}~~WECC's performance against the performance goals, measures and parameters, or performance of specific activities, to be unsatisfactory, *provided*, that prior to requiring ~~{REGIONAL ENTITY}~~WECC to adopt and implement an action plan or other remedial action, NERC shall issue a notice to

~~[REGIONAL ENTITY]~~WECC of the need and basis for an action plan or other remedial action and provide an opportunity for ~~[REGIONAL ENTITY]~~WECC to submit a written response contesting NERC's evaluation of ~~[REGIONAL ENTITY]~~WECC's performance and the need for an action plan. ~~[REGIONAL ENTITY]~~WECC may request that the President of NERC reconsider the request, and thereafter may request that the NERC Board review and reconsider the request. NERC and ~~[REGIONAL ENTITY]~~WECC shall work collaboratively as needed in the development and implementation of ~~[REGIONAL ENTITY]~~WECC's action plan. A final action plan submitted by ~~[REGIONAL ENTITY]~~WECC to NERC shall be made public unless the President of NERC makes a written determination that the action plan or specific portions of the plan should be maintained as non-public.

(b) NERC shall make available to ~~[REGIONAL ENTITY]~~WECC standardized training and education programs, which shall be designed taking into account input from ~~[REGIONAL ENTITY]~~WECC and other Regional Entities, for ~~[REGIONAL ENTITY]~~WECC personnel on topics relating to the delegated functions and related activities.

(c) (i) NERC may issue directives to ~~[REGIONAL ENTITY]~~WECC concerning the manner in which ~~[REGIONAL ENTITY]~~WECC shall perform its delegated functions and related activities under this Agreement. The NERC Rules of Procedure, or any other ERO Rule requiring approval of the Commission, shall not be considered "directives." NERC shall initiate the development of a directive through a collaborative process with ~~[REGIONAL ENTITY]~~WECC and, if applicable, other Regional Entities to which the directive will apply. Any directive developed through the collaborative process shall be approved by, and issued under the signature of, the NERC President.

(ii) If after a period of time that is reasonable under the circumstances, NERC and ~~[REGIONAL ENTITY]~~WECC and, if applicable, other Regional Entities are unable to reach agreement on the contents of the directive, NERC may issue the directive with the approval of and under the signature of the NERC President; *provided*, that before the NERC President issues a directive pursuant to this paragraph (ii), ~~[REGIONAL ENTITY]~~WECC and, if applicable, other Regional Entities, shall be given

a reasonable opportunity to present their positions on, and a suggested alternative version or versions of, the proposed directive to the NERC President.

(iii) Upon issuance of a directive by the NERC President, it shall be binding upon, and shall be complied with by, ~~[REGIONAL ENTITY]~~WECC, subject to reasonable time periods for adoption, implementation, and funding of any necessary resources. Upon request by ~~[REGIONAL ENTITY]~~WECC, the NERC Board (or a committee of the Board to which the Board delegates appropriate authority) shall review and shall confirm, revise or revoke any directive that was issued by the NERC President without ~~[REGIONAL ENTITY]~~WECC's agreement, *provided*, that ~~[REGIONAL ENTITY]~~WECC shall request such review within thirty (30) days following issuance of the directive by the NERC President unless good cause can be shown for a later request.

(iv) NERC and ~~[REGIONAL ENTITY]~~WECC and, if applicable, other Regional Entities, shall collaborate in deciding whether a directive (whether issued pursuant to paragraph (ii) or paragraph (iii)) shall be made public. If no agreement is reached by the date of issuance as to whether the directive shall be made public, the NERC President shall decide whether the directive will be made public, *provided*, that is the intent of the Parties that the NERC President shall apply a presumption that directives should be made public, unless the NERC President makes a written determination stating a specific reason for maintaining a particular directive as non-public.

(d) In addition to the issuance of directives pursuant to subsection (c), the NERC Board (or a Board committee to which the Board has delegated authority) may issue guidance or directions as to the manner in which ~~[REGIONAL ENTITY]~~WECC, and, if applicable, other Regional Entities, shall perform delegated functions and related activities. The Board or Board committee shall also establish reasonable time periods for the implementation of any such guidance or directions, taking into account the impact on the reliability of the Bulk-Power System and the need for funding of additional resources. Any such guidance or directions shall be stated in writing and shall be public, unless the Board or Board committee makes a written determination stating a specific reason for maintaining particular guidance or directions as non-public. ~~[REGIONAL ENTITY]~~WECC, either individually or in conjunction with other Regional Entities, may

request that the NERC Board or Board committee reconsider or revise the guidance or direction.

(e) NERC shall conduct collaborative reviews with ~~{REGIONAL ENTITY}~~WECC, either individually or in conjunction with one or more other Regional Entities, that provide for the exchange of information on practices, experiences, and lessons learned in the implementation of the delegated functions.

(f) Any audits of ~~{REGIONAL ENTITY}~~WECC performed by NERC shall be limited to an examination of ~~{REGIONAL ENTITY}~~WECC's compliance with this Agreement, NERC's Rules of Procedure, the Compliance Monitoring and Enforcement Program, Commission requirements, and directives that are in effect pursuant to Section 8(c)

9. Funding. ~~{REGIONAL ENTITY}~~WECC and NERC shall ensure, subject to Commission approval in accordance with the ERO Regulations, that the delegated functions and related activities described in Sections 5, 6 and 7 and listed on **Exhibit E** have reasonable and adequate funding and resources by undertaking the following:

(a) ~~{REGIONAL ENTITY}~~WECC shall develop, through a collaborative process with NERC, and propose, an annual business plan and budget, in accordance with ERO Regulations, Commission orders and NERC business planning and budgeting policies and instructions. ~~{REGIONAL ENTITY}~~WECC's proposed business plan and budget shall describe the activities necessary for, and provide a budget with adequate resources for, ~~{REGIONAL ENTITY}~~WECC to carry out its Delegated Authority under this Agreement, including the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E**. ~~{REGIONAL ENTITY}~~WECC's business plan and budget shall show the funding sources and amounts to fund the proposed budget, including as applicable assessments to end users, penalty monies, and other sources of funds.

(b) ~~{REGIONAL ENTITY}~~WECC and NERC agree that the portion of ~~{REGIONAL ENTITY}~~WECC's approved budget for the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E** that is to be funded by assessments, will be equitably allocated among end users within the geographic boundaries described in **Exhibit A** and recovered through a formula based on Net

Energy for Load, or through such other formula as is proposed by ~~[REGIONAL ENTITY]~~WECC and approved by NERC and the Commission. If ~~[REGIONAL ENTITY]~~WECC proposes to use a formula other than Net Energy for Load beginning in the following year, ~~[REGIONAL ENTITY]~~WECC shall submit the proposed formula to NERC in sufficient time that NERC may review and approve the proposed formula and file it with the Commission by May 15 for approval, and the proposed formula shall be effective for the following year if approved by the Commission on or before the date the Commission approves the annual business plan and budget submitted by NERC and ~~[REGIONAL ENTITY]~~WECC to the Commission pursuant to the ERO Regulations for such year.

(c) NERC shall determine that the assessments to fund the costs for its statutory functions in its Commission-approved budget are first allocated fairly among the Interconnections and regions according to the applicability of this work to those Interconnections and regions, and then equitably among the end users of the applicable interconnections and regions as appropriate. Allocation on a Net Energy for Load basis will be presumed to satisfy this equitability requirement.

(d) NERC shall provide ~~[REGIONAL ENTITY]~~WECC with the form or forms for business plan and budget submittal, and any accompanying instructions, in accordance with the schedule for preparation of the business plan and budget developed by NERC and the Regional Entities.

(e) ~~[REGIONAL ENTITY]~~WECC shall submit its proposed annual business plan and budget for carrying out its Delegated Authority functions and related activities described in Sections 5, 6 and 7 and listed on Exhibit E, as well as for all other activities of ~~[REGIONAL ENTITY]~~WECC, to NERC for review and approval in accordance with the annual schedule for the preparation of business plans and budgets which shall be developed collaboratively by NERC and the Regional Entities, as more fully described in **Exhibit E**.

(f) NERC shall fund ~~[REGIONAL ENTITY]~~WECC's performance of its Delegated Authority and related activities in accordance with ~~[REGIONAL ENTITY]~~WECC's Commission-approved business plan and budget, in the amount of ~~[REGIONAL ENTITY]~~WECC's assessments to end users approved by the Commission.

Exhibit E sets forth the procedures and timing for billing and collecting ~~{REGIONAL ENTITY}~~WECC's approved assessments from end users and other entities and payment of the approved assessment amount to ~~{REGIONAL ENTITY}~~WECC, unless otherwise modified and approved by NERC and the Commission. NERC shall not impose any material obligation or requirement regarding the Delegated Authority upon ~~{REGIONAL ENTITY}~~WECC that has not been provided for in an approved business plan and budget or an approved amended or supplemental business plan and budget, without ~~{REGIONAL ENTITY}~~WECC's consent.

(g) NERC shall develop, in consultation with the Regional Entities, a reasonable and consistent system of accounts, with a level of detail and record keeping comparable to the Commission's Uniform System of Accounts and sufficient to allow the Commission to compare each Commission-approved NERC and ~~{REGIONAL ENTITY}~~WECC fiscal year budget with the actual results at the NERC and Regional Entity levels. ~~{REGIONAL ENTITY}~~WECC shall follow NERC's prescribed system of accounts except to the extent that NERC permits a departure from the prescribed system of accounts. NERC shall make an informational filing with the Commission describing any such waiver it permits and providing an explanation supporting the permitted departure.

(h) ~~{REGIONAL ENTITY}~~WECC shall submit unaudited quarterly interim financial statements in form provided by NERC no later than 20 days after the end of the fiscal quarter (March 31, June 30, September 30, and December 31).

(i) ~~{REGIONAL ENTITY}~~WECC shall submit audited financial statements annually, including supporting materials, in a form provided by NERC no later than May 1 of the following year.

(j) **Exhibit E** to this Agreement sets forth the mechanism through which ~~{REGIONAL ENTITY}~~WECC shall offset penalty monies it receives (other than penalty monies received from an operational function or division or affiliated entity of ~~{REGIONAL ENTITY}~~WECC) against its next year's annual budget for carrying out functions under this Agreement, and the mechanism by which ~~{REGIONAL ENTITY}~~WECC shall transmit to NERC any penalty monies received from an operational function or division or affiliated entity of ~~{REGIONAL ENTITY}~~WECC.

Provided, that, subject to approval by NERC and the Commission, ~~REGIONAL ENTITY~~WECC may propose and implement an alternative use of penalty monies to that set forth in **Exhibit E**.

10. Assignment. This Agreement may be assigned by either Party only with the prior written consent of the other, which consent shall be granted or withheld in such non-assigning Party's sole discretion, subject to approval by the Commission. Any assignment under this Agreement shall not relieve a Party of its obligations, nor shall a Party's obligations be enlarged, in whole or in part, by reason thereof. ~~REGIONAL ENTITY~~WECC may not delegate in whole or in part its Delegated Authority to any other entity without NERC's express consent; provided, however, that nothing in this provision shall prohibit ~~REGIONAL ENTITY~~WECC from contracting with other entities to assist it in carrying out its Delegated Authority, provided ~~REGIONAL ENTITY~~WECC retains control and responsibility for such Delegated Authority.

11. Default and Cure. Upon a Breach, the non-breaching Party shall give written notice of such Breach to the breaching Party (the "Default Notice"). Subject to a suspension of the following deadlines as specified below, the breaching Party shall have thirty (30) calendar days from receipt of the Default Notice within which to cure such Breach; *provided however*, that if such Breach is not capable of cure within thirty (30) calendar days, the breaching Party shall commence such cure within thirty (30) calendar days after notice and continuously and diligently complete such cure within ninety (90) calendar days from receipt of the Default Notice; and, if cured within such time, the Breach specified in such notice shall cease to exist. Subject to the limitation specified in the following sentence, if a Breach is not cured as provided in this Section 11, or if a Breach is not capable of being cured within the period provided for herein, the nonbreaching Party shall have the right to declare a default and terminate this Agreement by written notice at any time until cure occurs, and be relieved of any further obligation hereunder. The deadlines for cure and the right to declare a default and terminate this Agreement shall be suspended during the pendency of any efforts or proceedings in accordance with Section 18 of this Agreement to resolve a dispute as to whether a Breach

has occurred or been cured. The provisions of this Section 11 will survive termination of this Agreement.

12. Term and Termination

(a) This Agreement shall become effective on ~~January 1, 2011~~ (the “Effective Date”).

(b) The term of the Agreement shall be five (5) years from the Effective Date, prior to which time NERC shall conduct an audit pursuant to subsection 6(i) to ensure that ~~REGIONAL ENTITY~~WECC continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. If ~~REGIONAL ENTITY~~WECC meets such requirements, this Agreement may be renewed for another five (5) year term. This Agreement may be renewed for successive additional five (5) year renewal terms provided that prior to the end of each renewal term, NERC shall conduct an audit pursuant to subsection 6(i) to ensure that ~~REGIONAL ENTITY~~WECC continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. Provided, that either Party may terminate this Agreement as of the end of a term by giving written notice to terminate at least one (1) year prior to the end of the term. If this Agreement is not renewed or becomes subject to termination for any reason, the Parties shall work to provide for a transition of ~~REGIONAL ENTITY~~WECC's Delegated Authority to NERC or to another eligible entity and to provide for the resolution of any wind-up costs associated with termination of this Agreement. The termination of this Agreement shall not take effect until such transition has been effected, unless the transition period exceeds one year, at which time ~~REGIONAL ENTITY~~WECC may unilaterally terminate.

(c) If any provision of this Agreement, or the application thereof to any person, entity or circumstance, is held by a court or regulatory authority of competent jurisdiction to be invalid, void, or unenforceable, or if a modification or condition to this Agreement is imposed by a regulatory authority exercising jurisdiction over this Agreement, the Parties shall endeavor in good faith to negotiate such amendment or amendments to this Agreement as will restore the relative benefits and obligations of the signatories under this Agreement immediately prior to such holding, modification or

condition. If either Party finds such holding, modification or condition unacceptable and the Parties are unable to renegotiate a mutually acceptable resolution, either Party may unilaterally terminate this Agreement. Such termination shall be effective one year following written notice by either Party to the other Party and to the Commission, or at such other time as may be mutually agreed by ~~{REGIONAL ENTITY}~~WECC and NERC.

(d) Notwithstanding any termination of this Agreement, provisions contained in Limitation of Liability (Section 13), No Third Party Beneficiaries (Section 14) and Confidentiality (Section 15) shall survive this Agreement in accordance with their terms until sixty (60) days following the expiration of any applicable statute of limitations.

13. Limitation of Liability. ~~{REGIONAL ENTITY}~~WECC and NERC agree not to sue each other or their directors, officers, employees, and persons serving on their committees and subgroups based on any act or omission of any of the foregoing in the performance of duties pursuant to this Agreement or in conducting activities under the authority of Section 215 of the Act, other than seeking a review of such action or inaction by the Commission. NERC and ~~{REGIONAL ENTITY}~~WECC shall not be liable to one another for any damages whatsoever, including without limitation, direct, indirect, incidental, special, multiple, consequential (including attorneys' fees and litigation costs), exemplary, or punitive damages arising out of or resulting from any act or omission associated with the performance of the ~~{REGIONAL ENTITY}~~WECC's or NERC's responsibilities under this Agreement or in conducting activities under the authority of Section 215 of the Act, except to the extent that the ~~{REGIONAL ENTITY}~~WECC or NERC is found liable for gross negligence or intentional misconduct, in which case ~~{REGIONAL ENTITY}~~WECC or NERC shall not be liable for any indirect, incidental, special, multiple, consequential (including without limitation attorneys' fees and litigation costs), exemplary, or punitive damages.

14. No Third Party Beneficiaries. Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to, or any liability to, any third party.

15. Confidentiality. During the course of the Parties' performance under this Agreement, a Party may receive Confidential Information, as defined in Section 1500 of NERC's Rules of Procedure. Except as set forth herein, the Parties agree to keep in confidence and not to copy, disclose, or distribute any Confidential Information or any part thereof, without the prior written permission of the issuing Party, unless disclosure is required by subpoena, law, or other directive of a court, administrative agency, or arbitration panel, in which event the recipient hereby agrees to provide the Party that provided the Confidential Information with prompt notice of such request or requirement in order to enable such issuing Party to (a) seek an appropriate protective order or other remedy, (b) consult with the recipient with respect to taking steps to resist or narrow the scope of such request or legal process, or (c) waive compliance, in whole or in part, with the terms of this Section. In the event a protective order or other remedy is not obtained or the issuing Party waives compliance with the provisions, the recipient agrees to furnish only that portion of the Confidential Information which the recipient's counsel advises is legally required and to exercise best efforts to obtain assurance that confidential treatment will be accorded to such Confidential Information. In addition, each Party shall ensure that its officers, trustees, directors, employees, subcontractors and subcontractors' employees, and agents to whom Confidential Information is exposed are under obligations of confidentiality that are at least as restrictive as those contained herein. This confidentiality provision does not prohibit reporting and disclosure as directed by NERC, as set forth in Section 6 of this Agreement.

16. Amendment. Neither this Agreement nor any of the terms hereof, may be amended unless such amendment is made in writing, signed by the Parties, and filed with and approved by the Commission.

17. Amendments to the NERC Rules of Procedure. NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations, or programs of ~~[REGIONAL ENTITY]~~WECC under this Agreement without first obtaining the consent of ~~[REGIONAL ENTITY]~~WECC, which consent shall not be unreasonably

withheld or delayed. To the extent ~~{REGIONAL ENTITY}~~WECC does not consent, NERC shall have the right to invoke the dispute resolution provisions of Section 18 and, if such effort fails to resolve the dispute, to petition the Commission to adopt the amendment to the NERC Rules of Procedure. To the extent that the Commission issues an order amending or materially affecting the rights or obligations of ~~{REGIONAL ENTITY}~~WECC under this Agreement, ~~{REGIONAL ENTITY}~~WECC shall have the option, exercisable no later than 60 days after issuance of such order, to terminate this Agreement. Such termination shall be effective one year following written notice by ~~{REGIONAL ENTITY}~~WECC to NERC and the Commission, or at such other time as may be mutually agreed by ~~{REGIONAL ENTITY}~~WECC and NERC.

18. Dispute Resolution. In the event a dispute arises under this Agreement between NERC and ~~{REGIONAL ENTITY}~~WECC (including disputes relating to NERC's performance of its obligations under this Agreement and/or disputes relating to ~~{REGIONAL ENTITY}~~WECC's performance of its obligations under this Agreement) which cannot be resolved through discussions between representatives of the Parties in the normal course of operations, the Parties shall use the following procedures ("Dispute Resolution") to attempt to resolve the dispute. ~~{REGIONAL ENTITY}~~WECC shall not suspend performance of any delegated function, and the Parties shall continue to make reasonable, good faith efforts to comply with their obligations under this Agreement, during the pendency of Dispute Resolution. All notices required to be sent pursuant to this Dispute Resolution procedure shall be sent in accordance with Section 19 of this Agreement. This Dispute Resolution procedure is separate from and in addition to all other processes provided for in this Agreement.

(a) The Party invoking Dispute Resolution shall send a notice to the other Party describing the dispute, stating the invoking Party's position with respect to the dispute, stating that the Party is invoking Dispute Resolution, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the invoking Party.

(b) Within three (3) business days after receipt of the notice invoking Dispute Resolution, the receiving Party shall send a notice to the invoking Party acknowledging

receipt of the notice invoking Dispute Resolution, stating the receiving Party's position with respect to the dispute, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the receiving Party.

(c) During the period commencing three (3) business days and ending twenty (20) business days after the date of the receiving Party's notice, the designated representatives shall engage in good faith negotiations to attempt to resolve the dispute, *provided*, that the designated representatives may agree prior to the end of such twenty (20) business day period that the process should move to the next step of Dispute Resolution.

(d) If the designated representatives are unable to arrive at a resolution of the dispute by the end of the time period described in subsection (c), they shall notify the chief executive officers of their respective Parties. The chief executive officers of the Parties shall thereafter engage in good faith negotiations to attempt to resolve the dispute during the period of twenty (20) business days immediately following the time period described in subsection (c), *provided*, that the chief executive officers may agree prior to the end of such twenty (20) business day period that negotiations are at impasse and the process may move to the next step as described in subsection (f). Upon mutual agreement of the Parties, the twenty (20) business day period may be extended to pursue ongoing good faith negotiations.

(e) If a resolution of the dispute is achieved by the Parties, it shall be memorialized in a writing that is acceptable in form and substance to each party and is signed by the designated representative or chief executive officer on behalf of each Party.

(f) If the Parties are unable to resolve the dispute pursuant to the process described in subsections (a) through (e), then either Party may invoke any other available dispute resolution mechanism, including, without limitation, filing a complaint or petition with the Commission requesting resolution of the dispute by the Commission, or filing a complaint for relief in a court having jurisdiction over Parties and the subject matter of the dispute in accordance with Section 20. *Provided, however*, that: (i) it is the intent of the Parties that unresolved disputes shall be presented to and resolved by the Commission if the Commission has and accepts jurisdiction over the subject matter of the dispute, (ii)

the Parties may, by mutual agreement, attempt to resolve the dispute through arbitration, mediation, or other process involving resort to an impartial neutral, and (iii) it is the intent of the Parties that resolution of disputes through Commission proceedings, arbitration, mediation, or other use of an impartial neutral, is preferred over resort to judicial proceedings.

(g) This Section 18 shall not apply to compliance enforcement actions against individual Registered Entities.

19. Notice. Whether expressly so stated or not, all notices, demands, requests, and other communications required or permitted by or provided for in this Agreement shall be given in writing to a Party at the address set forth below, or at such other address as a Party shall designate for itself in writing in accordance with this Section, and shall be delivered by hand or reputable overnight courier:

20. Governing Law. When not in conflict with or preempted by federal law, this Agreement will be governed by and construed in accordance with the laws of New Jersey without giving effect to the conflict of law principles thereof. The Parties recognize and agree not to contest the exclusive or primary jurisdiction of the Commission to interpret and apply this Agreement; provided however that if the Commission declines to exercise or is precluded from exercising jurisdiction of any action arising out of or concerning this Agreement, such action shall be brought in any state or federal court of competent jurisdiction in New Jersey. All Parties hereby consent to the jurisdiction of any state or federal court of competent jurisdiction in New Jersey for the purpose of hearing and determining any action not heard and determined by the Commission.

21. **Headings.** The headings and captions in this Agreement are for convenience of reference only and shall not define, limit, or otherwise affect any of the terms or provisions hereof.

22. **Savings Clause.** Nothing in this Agreement shall be construed to preempt or limit any authority that ~~REGIONAL ENTITY~~WECC may have to adopt reliability requirements or take other actions to maintain reliability of the Bulk-Power System within the geographic boundaries described in **Exhibit A** that are outside the Delegated Authority, as long as such reliability requirements and actions are not inconsistent with Reliability Standards applicable to the region described in **Exhibit A** and do not result in a lessening of reliability outside the region described in **Exhibit A**.

23. **Entire Agreement.** This Agreement constitutes the entire agreement, and supersedes all prior agreements and understandings, both written and oral, among the parties with respect to the subject matter of this Agreement.

24. **Execution of Counterparts.** This Agreement may be executed in counterparts and each shall have the same force and effect as the original.

NOW THEREFORE, the parties have caused this Agreement to be executed by its duly authorized representatives, effective as of the Effective Date.

NORTH AMERICAN
ELECTRIC RELIABILITY CORPORATION

~~[REGIONAL ENTITY]~~WECC

EXHIBIT A

Exhibit A — Regional Boundaries

WECC's physical boundaries coincide with the boundaries of the Western Interconnection. The Western Interconnection consists of the synchronously operated electric transmission grid in the western part of North America, which includes parts of Montana, Nebraska, New Mexico, South Dakota, Texas, Wyoming, and Mexico and all of Arizona, California, Colorado, Idaho, Nevada, Oregon, Utah, Washington and the Canadian Provinces of British Columbia and Alberta. The WECC region encompasses approximately 1.8 million square miles.

WECC's northern border runs along the northern border of British Columbia and Alberta. The western border extends along the western coast of North America from British Columbia into northern Baja California, Mexico. The southern border traverses northern Baja and extends along the southern United States border to Texas. The eastern border bisects North America from Alberta, Canada through the states of Montana, South Dakota, Wyoming, Nebraska, Texas and New Mexico to the southern United States border.

EXHIBIT B

Exhibit B – Governance

Exhibit B shall set forth the Regional Entity’s bylaws, which NERC agrees demonstrate that the Regional Entity meets the following criteria:

CRITERION 1: The Regional Entity shall be governed by an independent board, a balanced stakeholder board, or a combination independent and balanced stakeholder board. (Federal Power Act § 215(e)(4)(A), 18 C.F.R. § 39.8(c)(1), Order No. 672 at ¶ 727.)

CRITERION 2: The Regional Entity has established rules that assure its independence of the users and owners and operators of the bulk power system, while assuring fair stakeholder representation in the selection of its directors. Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 699, 700.)

CRITERION 3: If the Regional Entity has members, the Regional Entity has established rules that assure that its membership is open, that it charges no more than a nominal membership fee and agrees to waive the fee for good cause shown, and that membership is not a condition for participating in the development of or voting on proposed Regional Reliability Standards. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 170-173.)

CRITERION 4: The Regional Entity has established rules that assure balance in its decision-making committees and subordinate organizational structures and assure no two industry sectors can control any action and no one industry sector can veto any action. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶ 728.)

CRITERION 5: The Regional Entity has established rules that provide reasonable notice and opportunity for public comment, due process, openness, and balance of interests in exercising its duties. (Federal Power Act § 215(c)(2)(D) and (e)(4), 18 C.F.R. § 39.8(c)(2).)

BYLAWS
Of
The
WESTERN ELECTRICITY COORDINATING COUNCIL

1. Mission.

The Western Interconnection is the geographic area containing the synchronously operated electric grid in the western part of North America, which includes parts of Montana, Nebraska, New Mexico, South Dakota, Texas, Wyoming, and Mexico and all of Arizona, California, Colorado, Idaho, Nevada, Oregon, Utah, Washington and the Canadian provinces of British Columbia and Alberta.

The Western Electricity Coordinating Council (“WECC”) is a Utah nonprofit corporation with the mission to do the following consistent with these Bylaws: 1) maintain a reliable electric power system in the Western Interconnection that supports efficient competitive power markets (“Reliability Mission”); and 2) assure open and non-discriminatory transmission access among Members and provide a forum for resolving transmission access disputes between Members consistent with FERC policies where alternative forums are unavailable or where the Members agree to resolve a dispute using the mechanism provided in Section 11 (“Transmission Access Mission”).

2. Furtherance of the WECC’s Mission

2.1 Activities to Carry Out WECC’s Reliability Mission.

- 2.1.1 Compliance with the Federal Power Act. The WECC will carry out responsibilities and exercise rights of a Regional Entity organized on an interconnection-wide basis pursuant to Section 215 of the Federal Power Act, including any responsibilities and rights delegated to it by the ERO pursuant to a Delegation Agreement.
- 2.1.2 Agreements with Canada and Mexico. The WECC will carry out responsibilities and exercise rights pursuant to International Reliability Agreements with Canadian or Mexican authorities.
- 2.1.3 Regional Coordination. The WECC will act as a coordinating entity for the entire Western Interconnection for activities of regional organizations with responsibilities for reliability and market functions.
- 2.1.4 Standard Setting. The WECC will develop and adopt reliability, operating, and planning standards, criteria and guidelines necessary to maintain the reliable operation of the Western Interconnection’s interconnected bulk power system, including seeking, as appropriate, variances from standards of the ERO (or any

successor organization which may be created by legislation or otherwise), as well as providing a process for regional variances.

- 2.1.5 Certification of Grid Operating Entities. The WECC will certify Grid Operating Entities in the Western Interconnection.
- 2.1.6 Reliability Assessment. The WECC will ensure that interconnected bulk electric system reliability assessments are conducted as needed. The WECC will do this work in conjunction with the Regional Entities to the greatest extent possible. The WECC will also facilitate coordinated reliability assessments among Regional Entities.
- 2.1.7 Compliance Activities. With respect to enforcement of reliability standards, the WECC will:
 - 2.1.7.1 implement the Reliability Management System in effect as of the WECC's formation and as the Reliability Management System may be subsequently modified in accordance with its terms;
 - 2.1.7.2 implement any enforcement mechanisms delegated to it pursuant to Section 215 of the Federal Power Act and any Delegation Agreement with the ERO, or required by any International Reliability Agreement with a Canadian or Mexican authority; and
 - 2.1.7.3 administer any other enforcement mechanisms developed through voluntary processes after the WECC's formation, where the WECC is designated to perform administration.
- 2.1.8 Coordinated Regional Planning. With respect to the coordination of regional planning activities, the WECC:
 - 2.1.8.1 will develop coordinated planning policies and procedures for the Western Interconnection, including facilitation of market-based solutions, consistent with WECC/ERO standards and FERC policy.
 - 2.1.8.2 will review and assess Local Regional Entity planning processes to determine whether WECC planning procedures have been satisfied;
 - 2.1.8.3 will refer planning matters back to the originating Local Regional Entity for revision or other corrective actions when the WECC Board determines that WECC planning procedures have not been satisfied; and
 - 2.1.8.4 may perform other interconnection-wide studies as needed.
- 2.1.9 Coordinated Operations. With respect to coordinating reliable operating activities within the Western Interconnection, the WECC will develop, coordinate and promote

consistent interregional operating policies and procedures for the Western Interconnection, consistent with WECC/ERO standards and FERC policy.

2.1.10 Market Interface Issues. With respect to Market Interface issues the WECC will:

2.1.10.1 facilitate development of compatible and efficient practices across the Western Interconnection; and

2.1.10.2 exercise Backstop Authority where an unresolved Market Interface issue will cause Material External Impacts by taking some or all of the following actions: 1) providing a forum for and coordinating voluntary solutions among Members; 2) recommending specific solutions for voluntary adoption by Members; and 3) if necessary, proposing solutions to an Applicable Regulatory Authority.

2.1.11 Dispute Resolution. The WECC will provide a process for the timely resolution of disputes between WECC Members as set forth in Section 11.

2.2 Activities to Carry Out WECC's Non-Discriminatory Access Mission.

2.2.1 In accordance with Section 10 of these Bylaws, the WECC will ensure the provision of non-discriminatory transmission access between Members.

2.2.2 In accordance with Section 10 of these Bylaws, the WECC will provide for the submission of Open Access Transmission Tariffs (or petitions for exemption) by all Members that own or operate Transmission Facilities.

2.3 Organizational Characteristics.

As the WECC carries out activities to fulfill its mission, it will seek to develop and maintain the following characteristics:

2.3.1 dedication to serving the individuals, businesses, and other organizations that generate, transmit, distribute, market, and use electrical energy in the Western Interconnection;

2.3.2 efficiency in its administration, decision-making, policy and standards development, and dispute resolution processes;

2.3.3 the ability to maintain status as an Interconnection-wide regional reliability entity and be afforded deference and delegation by ERO (or successor organization); and

2.3.4 fair and open processes through which practices, policies, and standards are developed and implemented based on sound technical and policy analysis.

2.3.5 Promote an efficient western electric market by reducing or eliminating conflict, duplication and overlap among electric organizations in the Western Interconnection.

3. Definitions.

3.1 Affiliate.

An Entity that directly or indirectly through one (1) or more intermediaries, controls, or is controlled by, or is under common control with, another Entity. An Entity "controls" any Entity in which it has the power to vote, directly or indirectly, 5% or more of the voting interests in such entity or, in the case of a partnership, if it is a general partner. Notwithstanding the foregoing definition, for purposes of these Bylaws: 1) electric distribution cooperatives that are member-owners of a generation and transmission cooperative are not Affiliates of the generation and transmission cooperative or of each other; 2) an entity controlled by or operating as a unit, agency, or subdivision of a local, state, provincial, or U.S. federal or Canadian or Mexican national government will not be considered an Affiliate of any other entity controlled by or operating as a unit, agency, or subdivision of a local, state, provincial, or federal government; 3) separate agencies of a single state or province, or of the U.S. federal or Canadian or Mexican national government will not be considered Affiliates of each other, regardless of any commonality of political control; 4) members of any joint powers authority, and such joint powers authority, will not be considered Affiliates of each other; and 5) members of an RTO will not be considered Affiliates of such RTO or of each other solely as a result of such membership.

3.2 Annual Meeting.

The annual membership meeting of WECC, as described in Section 5.3.

3.3 Applicable Regulatory Authority.

The FERC or any state or provincial government agency with jurisdiction to regulate or directly affect the transmission of electricity within the Western Interconnection.

3.4 Backstop Authority.

The ability, obligation, or responsibility of the WECC to address an issue when the WECC Board determines that a Local Regional Entity(ies) holding Primary Authority has not resolved an issue, has created incompatible resolutions or has not acted. In each case where these Bylaws authorize the WECC to exercise Backstop Authority, the provisions that authorize Backstop Authority will also specify the conditions necessary to trigger Backstop Authority and the actions that fall within the WECC's exercise of Backstop Authority.

3.5 Board of Directors (Board).

WECC Board of Directors, collectively, as described in Section 6.

3.6 Canadian Delegation.

Canadian WECC Members.

- 3.7 Canadian Director.**
A member of the WECC Board of Directors that is either a representative from a Canadian Member of WECC or an individual currently residing in Canada and qualified to provide expertise on Canadian interests on the WECC Board of Directors.
- 3.8 Class.**
A grouping of Members described in Sections 4.2.1 through 4.2.7 and 4.3.
- 3.9 Commercial Practices.**
The products and practices involved in trading electricity. The term “Commercial Practices” only refers to an interaction among market entities that does not affect or require assistance from Grid Operating Entities that have grid reliability responsibilities.
- 3.10 Compliance Hearing Body.**
The hearing body formed in accordance with procedures established in the WECC Delegation Agreement with the ERO for the purpose of providing a balanced compliance panel to conduct hearings for the resolution of disputes concerning compliance with or enforcement of Reliability Standards that may arise between WECC (acting as Compliance Enforcement Authority for the Western Interconnection) and a Registered Entity.
- 3.11 Control Area.**
An electric power system (or combination of electric power systems) to which a common automatic generation control scheme is applied in order to: 1) match, at all times, the power output of the generating units within the electric power system(s), plus the energy purchased from entities outside the electric system(s), minus energy sold to entities outside the electric system(s), with the demand within the electric power system(s); 2) maintain scheduled interchange with other Control Areas, within the limits of Good Utility Practice; 3) maintain the frequency of the electric power system(s) within reasonable limits in accordance with Good Utility Practice; and 4) provide sufficient generating capacity to maintain operating reserves in accordance with Good Utility Practice.
- 3.12 Cross-Border Regional Entity.**
A Regional Entity that encompasses a part of the United States and a part of Canada or Mexico, and may therefore be delegated authority to propose and enforce Reliability Standards in Canada or Mexico by virtue of applicable contractual or regulatory mechanisms.
- 3.13 Delegation Agreement.**
An agreement between the ERO and the WECC pursuant to Section 215 of the Federal Power Act by which the ERO delegates to the WECC designated powers, rights and responsibilities regarding the administration within the Western Interconnection of electric Reliability Standards adopted or approved by the ERO and the FERC.
- 3.14 Director.**
An individual member of the WECC’s Board of Directors.

- 3.15 Electric Line of Business.**
The generation, transmission, distribution, or trading of electricity or the provision of related energy services in the Western Interconnection.
- 3.16 Electric Reliability Organization (ERO).**
The organization certified by FERC under 18 C.F.R. §39.3, the purpose of which is to establish and enforce Reliability Standards for the bulk-power system in the United States, subject to FERC review.
- 3.17 Entity.**
Any individual, person, corporation, partnership, association, governmental body or organization of any kind.
- 3.18 FERC.**
The Federal Energy Regulatory Commission or any successor.
- 3.19 Good Utility Practice.**
Any of the practices, methods and acts engaged in or approved by a significant portion of the electric utility industry during the relevant time period, or any of the practices, methods and acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result at a reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice, method, or act to the exclusion of all others, but rather to be acceptable practices, methods, or acts generally accepted in the region.
- 3.20 Grid Operating Entity.**
Any operating entity, such as a control area operator, that is certified pursuant to Section 2.1.5 of these Bylaws to be responsible for reliable operation of a portion of the Western Interconnection.
- 3.21 Participating Stakeholder.**
Any person or entity that is not a WECC Member, but is an interested stakeholder and has applied and been granted, pursuant to Section 8.6.2, the participation and voting rights set forth in Section 8.6.1.
- 3.22 International Reliability Agreement.**
An agreement between the WECC and any appropriate Canadian or Mexican authority related to WECC's powers, rights and responsibilities regarding the administration within the Western Interconnection of electric Reliability Standards.
- 3.23 Local Regional Entity.**
A regional transmission organization or some other formally or informally constituted regional organization or group within the Western Interconnection, including but not limited to a Control Area, a group of Control Areas acting in concert, or a group of Entities that own or operate Transmission Facilities acting in concert. These Local

Regional Entity boundaries can be reevaluated or modified over time.

3.24 Market Interface.

Market Interface involves all interactions among market entities and Grid Operating Entities related to transmission service and physical delivery.

3.25 Material External Impacts (MEI).

Significant effects on another Local Regional Entity or market within the Western Interconnection but outside of the Local Regional Entity or market adopting a policy, standard, practice or procedure, or implementing an action.

3.26 Member.

Any entity that has applied and been accepted for membership in the WECC and is current in the payment of dues.

3.27 Member Class Director.

A Director elected by a Class in accordance with Section 6.4 of these Bylaws.

3.28 Mexican Delegation.

Mexican WECC Members.

3.29 Mexican Director.

A member of the WECC Board of Directors that is either a representative from a Mexican Member of WECC or an individual currently residing in Mexico and qualified to represent Mexican interests on the WECC Board of Directors.

3.30 Non-Affiliated Director.

A Director elected by the Members who satisfies the requirements of Section 6.5.1 of these Bylaws.

3.31 Open Access Tariff.

A tariff offering transmission service which meets the requirements applicable to FERC orders regarding open access.

3.32 Organizing Meeting.

The first formal membership meeting of the WECC.

3.33 Primary Authority.

The ability, obligation, or responsibility of an entity to address an issue in the first instance.

3.34 Regional Entity (RE).

An entity having enforcement authority pursuant to 18 C.F.R. §39.8.

- 3.35 Regional Transmission Organization (RTO).**
An entity approved by the Federal Energy Regulatory Commission as meeting the requirements and performing the functions of a regional transmission organization pursuant to FERC Order 2000 and subsequent related orders.
- 3.36 Registered Entity.**
An owner, operator, or user of the bulk-power system or the entities registered as their delegates for the purpose of compliance in the North American Electric Reliability Corporation Regional Compliance Registry.
- 3.37 Reliability Management System**
The contracts, separate from these Bylaws, by which Members and other parties agree to certain procedures and sanctions intended to enforce specified Reliability Practices to maintain reliable electric service throughout the Western Interconnection.
- 3.38 Reliability Practices.**
Policies, practices and standards designed to ensure the adequacy and security of the Western Interconnection in accordance with applicable reliability criteria (e.g. ERO, WECC, Local Regional Entity criteria).
- 3.39 Reliability Standard.**
A requirement approved by FERC under section 215 of the Federal Power Act, to provide for reliable operation of the bulk-power system in the United States. The term includes requirements for the operation of existing bulk-power system facilities, including cybersecurity protection, and the design of planned additions or modifications to such facilities to the extent necessary to provide for reliable operation of the bulk-power system, but the term does not include any requirement to enlarge such facilities or to construct new transmission capacity or generation capacity. A Reliability Standard for the Western Interconnection may also be approved by Canadian and Mexican regulatory authorities.
- 3.40 Reliability Standards Development Procedures.**
The Process for Developing and Approving WECC Standards (or its successor) attached as Exhibit C to the Delegation Agreement between WECC and North American Electric Reliability Corporation.
- 3.41 Transmission Facilities.**
Those facilities that are defined as “transmission facilities” by FERC for purposes of the open access requirements of Section 210 and 211 of the Federal Power Act or any facilities which would be so defined if the Member were subject to FERC jurisdiction.
- 3.42 Western Interconnection.**
The geographic area containing the synchronously operated electric transmission grid in the western part of North America, which includes parts of Montana, Nebraska, New Mexico, South Dakota, Texas, Wyoming, and Mexico and all of Arizona, California, Colorado,

Idaho, Nevada, Oregon, Utah, Washington and the Canadian Provinces of British Columbia and Alberta.

4. Members and Membership.

4.1 Voluntary Membership.

Except as otherwise may be required by applicable authority, membership in the WECC is voluntary. A Member may withdraw upon giving the Secretary thirty (30) days' advance written notice. Notwithstanding such notice of withdrawal, all contracts (including any Reliability Management System Agreement), FERC orders, unpaid Member costs, decisions of arbitration and requests for transmission service made to the withdrawing Member in effect or pending as of the date of the written notice of withdrawal will be followed through to completion, pursuant to these Bylaws, by the withdrawing Member; however, pending requests for transmission service to be provided to such withdrawing Member will be void for the purposes of these Bylaws. Nothing herein will relieve any Member withdrawing from the WECC from any obligation it may have under applicable law including, but not limited to, Section 215 of the Federal Power Act. A Member that withdraws is obligated to pay any unpaid dues owed through the remainder of the fiscal year in which its resignation becomes effective. Any Director employed by a withdrawing Member will be deemed to have resigned pursuant to Section 6.8.

4.2 Eligibility for Membership.

Subject to Section 4.5, any Entity that is an interested stakeholder or that meets the criteria for membership in the membership classes described in Sections 4.2.1 through 4.2.7 may be a Member of the WECC:

- 4.2.1 Class 1. Electric Line of Business Entities owning, controlling or operating more than 1000 circuit miles of transmission lines of 115 kV and higher voltages within the Western Interconnection.
- 4.2.2 Class 2. Electric Line of Business Entities owning, controlling or operating transmission or distribution lines, but not more than 1,000 circuit miles of transmission lines of 115 kV or greater, within the Western Interconnection.
- 4.2.3 Class 3. Electric Line of Business Entities doing business in the Western Interconnection that do not own, control or operate transmission or distribution lines in the Western Interconnection, including power marketers, independent power producers, load serving entities and any other Entity whose primary business is the provision of energy services.
- 4.2.4 Class 4. End users of significant amounts of electricity in the Western Interconnection, including industrial, agricultural, commercial and retail entities as well as organizations in the Western Interconnection that represent the interests of a substantial number of end users or a substantial number of persons interested in the impacts of electric systems on the public or the environment.

4.2.5 Class 5. Representatives of states and provinces in the Western Interconnection, provided that such representatives will have policy or regulatory roles and do not represent state or provincial agencies and departments whose function involves significant direct participation in the market as end users or in Electric Line of Business activities.

4.2.6 Class 6. Canadian members of other classes pursuant to Section 4.3.

4.2.7 Class 7. Members at large, that is, entities that are not eligible for membership in the other Member Classes and who have a substantial interest in the purposes of the WECC.

4.3 Designation of Membership Class.

A Member of WECC may not belong to more than one Class except that for purposes of electing Canadian Directors and for populating the Governance and Nominating Committee, there shall be a Class 6 composed of all Canadian Members from any of the Member Classes defined in Section 4.2 except Class 7. An applicant for membership will designate the Class for which it qualifies based upon the criteria for membership set forth in Section 4.2 and these additional requirements: 1) all Members that are Electric Line of Business Entities must belong to Classes 1, 2 or 3; and 2) any Member owning, controlling or operating Transmission Facilities or distribution facilities must belong to Class 1 or 2 unless the Board grants the Member's petition for a change in Member Class pursuant to the provisions of Section 4.4 of these Bylaws. Applications for membership will be submitted to the WECC. WECC staff will review the application to verify eligibility for membership and Member Class designation. An applicant whose application has been rejected or any Member who disputes the WECC staff's determination regarding the appropriate Member Class designation may request review by the Governance and Nominating Committee. If the applicant or any Member disagrees with the Governance and Nominating Committee's decision, the applicant or such Member may appeal this decision to the Board.

4.4 Changes in Membership Class.

Notwithstanding any other provision of these Bylaws, upon a petition from a Member, the WECC staff (subject to review by the Governance and Nominating Committee and appeal to the Board) may allow the Member to change Member Class if the interest of the Member is more closely aligned with the proposed Class than the Member's current Class.

4.5 Affiliates and Distinct Business Entities.

An Affiliate of a Member that satisfies the membership qualifications may also become a Member provided:

4.5.1 The Affiliate applying for membership and the Member disclose to the Chief Executive Officer all Affiliates that are WECC Members and the Classes to which the Affiliates belong. Every Member will promptly notify the Chief Executive Officer whenever it becomes, or ceases to be, an Affiliate of any other Member.

- 4.5.2 Affiliates may be members of the same Class; provided, however, a group of Affiliates within a single Class may only have one vote in any WECC forum. A group of Affiliates within a single Class may, by providing written notice to the Chief Executive Officer, split their single vote pro rata or designate a single Affiliate as the group's voting Member.
- 4.5.3 For good cause shown and with the express approval of the Board, a company or organization containing functionally distinct entities within it may obtain separate memberships for such entities; provided that such entities will be considered Affiliates.
- 4.5.4 The Board may adopt a policy regarding whether Members may share the benefits of membership (including the right to receive information that is only available to Members) with a non-member Affiliate.

4.6

Rights and Obligations of Membership.

Except as otherwise provided in these Bylaws or other applicable authority, Members of the WECC have the following general rights and obligations:

- 4.6.1 The right to elect and remove Directors as described in Sections 6.4, 6.5 and 6.7;
- 4.6.2 The right to amend these Bylaws, and to review and rescind any Board amendment of these Bylaws, in accordance with Section 13;
- 4.6.3 The right to receive appropriate meeting notices, as well as reports and information produced by the WECC;
- 4.6.4 The right to attend, participate and vote in all WECC Member meetings and the right to attend Board meetings (other than closed sessions of Board meetings) and to comment upon all matters considered in such meetings;
- 4.6.5 The right to be a member of, attend meetings of, and to introduce motions, debate and to vote in the deliberations of WECC committees, subject to the limitations of these Bylaws and such other reasonable limitations as the Board may adopt from time to time;
- 4.6.6 The right to obtain non-discriminatory transmission access from other Members in accordance with applicable law and Section 10 of these Bylaws;
- 4.6.7 The right to invoke the dispute resolution provisions of these Bylaws;
- 4.6.8 The right to petition the Board to take any action consistent with applicable law (including Section 215 of the Federal Power Act and implementing orders and regulations), these Bylaws and the articles of incorporation and to have such petition voted upon in a reasonable and timely manner;

- 4.6.9 The obligation to abide by these Bylaws, decisions resulting from the dispute resolution process, and all standards or decisions of the WECC, subject to the exceptions set forth in Section 4.7 and the enforcement provisions of Section 4.8.
- 4.6.10 For Members owning or operating Transmission Facilities, or possessing transmission capacity rights by contract, the obligation to provide non-discriminatory transmission access to other Members through a regional transmission organization, the submittal of an Open Access Tariff with the FERC or in accordance with Section 10 of these Bylaws;
- 4.6.11 The obligation to notify the Chief Executive Officer promptly of changes with respect to Affiliates as provided in Section 4.5.1 of these Bylaws; and
- 4.6.12 The obligation to pay in a timely manner the membership dues pursuant to Section 12.
- 4.6.13 The obligation to provide system data that the Board has determined is necessary for WECC functions and does not impose an undue burden on the Members; provided, however, that the Board shall adopt appropriate limitations on this obligation or procedures that protect, and avoid the unnecessary collection of, confidential, privileged, trade secret, cybersecurity or critical energy infrastructure information or other information that the Board determines merits such protection consistent with applicable law.

4.7

Limitations on Member Obligations.

The obligation of Members pursuant to Section 4.6.9 will not require any Member to take any action which the Member in good faith determines: 1) would exceed the physical capabilities of the Member's electric system (or any part of another's electric system that the Member has the legal right to cause to comply with a WECC action governed by Section 4.6.9); 2) would create serious and immediate risks to public health or safety (provided, however, that the shedding of load shall not in and of itself be deemed a serious and immediate risk to public health and safety for the purpose of this section); 3) would create an immediate risk of serious damage to facilities or equipment within its electric system or cause it to operate any of its electric facilities or equipment in an unsafe manner; 4) would cause the Member to violate or improperly implement an applicable law, regulation, rule, order, FERC license provision or other legal obligation; or 5) would conflict with any non-power requirement applicable to the Member (including without limitation any obligation under environmental laws, regulations, court and administrative decisions or biological opinions).

Each Member shall retain sole control of its facilities and the use thereof, and a Member shall not be required to construct or dedicate facilities for the benefit of any other Member, or be required to take action, or refrain from action, as may be deemed necessary to maintain reliable service to its own customers and/or to fulfill its obligations to third parties; provided, that a Member shall comply with duly-adopted reliability standards applicable to its system and shall comply with any directives under existing security coordination agreements.

Nothing in these Bylaws is intended to preclude application of Section 210 or 211 of the Federal Power Act and Section 10 of these Bylaws. The above limitations shall not be construed as altering a Member's obligation to comply with applicable Reliability Standards or enforcement orders, or any other obligation arising under 18 C.F.R. Part 39.

4.8

Compliance and Enforcement.

The power of the WECC to enforce Member obligations other than compliance with Reliability Standards and other obligations arising under 18 C.F.R. Part 39 and applicable Canadian and Mexican regulatory requirements is limited to suspension or termination of membership as set forth in this Section; provided, however, that: 1) nothing in this Section will limit the power of Members to agree to additional enforcement provisions in separate contracts (such as contracts pursuant to the Reliability Management System); 2) nothing in this Section will limit the power of the WECC to propose solutions regarding Market Interface issues to any Applicable Regulatory Authority as described in Section 2.1.10; and 3) nothing in this Section will limit WECC's delegated authority under Section 215 of the Federal Power Act and 18 C.F.R. Part 39 and applicable Canadian and Mexican regulatory requirements to enforce Reliability Standards and perform other delegated functions within the Western Interconnection. The Board may suspend or, to the extent consistent with applicable law, terminate the membership of any Member for a material failure to meet any obligation of membership set forth in these Bylaws, including, but not limited to: 1) non-payment of dues sixty (60) days after the dues become delinquent; 2) intentionally or repeatedly violating any WECC Bylaw; 3) materially breaching or intentionally violating any FERC order or arbitration decision issued pursuant to these Bylaws; or 4) willfully obstructing any lawful purpose or activity of the WECC. The Board will give the affected Member not less than twenty-one (21) days prior written notice of any proposed suspension or termination, which will include the specific basis for the proposed action and, if applicable, instructions on curing the problem.

4.8.1 Suspension. The suspension of a Member will not affect the Member's rights and obligations other than that the Member, and any Director employed by or affiliated with the Member, will not be entitled to vote at any meeting of the Members, Classes, Directors, or any committee until the suspension is removed except that a suspended Member may vote in WECC committee and subcommittee meetings on proposed Reliability Standards or revisions to Reliability Standards.

4.8.2 Termination. The termination of membership will have the same effect, and be subject to the same continuing obligations, as such Member's withdrawal pursuant to Section 4.1 (including the provision therein regarding resignation of any Director employed by such Member), except that it will be effective immediately upon the noticed date pursuant to Section 4.8.

4.9 **WECC Structure and Governance Review Related to Regional Transmission Organizations.**

At least each five years, the Board of Directors will conduct a thorough assessment of whether the WECC is fulfilling its purposes in a manner that is consistent with: 1) the provisions of Section 2.3 of these Bylaws; and 2) the then-current state and the expected future evolution of the electric power industry within the Western Interconnection. In

particular, the Board will focus on whether the standards, obligations, processes, and decisions the WECC imposes on its Members are timely, fair, effective, and reasonable in view of the commercial, legal, regulatory, and economic needs and objectives of the affected Members. The Board will evaluate the WECC's Board composition, Member Class structure, committee structure and activities, and staff responsibilities as they relate to the foregoing considerations. The assessment required by this Section 4.9 will be accompanied by Board recommendations for any changes the Board determines are warranted by the assessment. The assessment and recommendations prepared by the Board in accordance with this Section 4.9 will be submitted in writing to the Members at the first annual Member meeting held after they are completed.

5. Procedures for Member Decisions.

5.1 Quorum.

Members may conduct business and take votes only at duly noticed Member meetings. Members may not conduct any business of the membership as a whole at any meeting unless a quorum is first established. A majority of all Members, including a majority in at least three (3) Classes, will constitute a quorum for all meetings of the membership as a whole. A majority of the members of a Class will constitute a quorum for all Member Class meetings. Inactive Members, as defined in Section 5.9 of these Bylaws, will not be counted in determining a quorum at membership or Member Class meetings. A quorum, once established, will be deemed to continue for the balance of any Member or Member Class meeting, except that no election of Directors may occur without a quorum being present. Members may designate an alternate representative or submit an absentee ballot in a form consistent with Section 6.6 for any Member or Member Class meeting. No Class may elect Member Class Directors without a majority of the members of the class being present either in person, or by designation of an alternate representative, or by the submission of an absentee vote. At a duly noticed meeting of the membership as a whole where a quorum of the membership has not been established, or at any duly noticed meeting of a Class meeting on its own, a Class may elect Member Class Directors notwithstanding the lack of quorum for action by the membership as a whole, provided a majority of the Members of a Class are present in person, or by designation of an alternate representative, or have submitted an absentee vote.

5.2 General Membership Meetings.

All business of the Members acting as a whole will be conducted at meetings called by advance notice to all WECC Members provided in accordance with Section 5.5. Unless stated otherwise in these Bylaws, decisions at all meetings of the Members or of Member Classes will be by simple majority vote of the Members present or otherwise represented in accordance with these Bylaws, with each Member having one vote. The Chair of the Board will preside over all Member meetings.

5.3 Annual Member Meetings.

The WECC will hold an Annual Meeting of all Members at a time and place determined by the Board. At the Annual Meeting, in addition to such other actions the Members may take, all Member Classes together will elect Non-Affiliated Directors and each Class eligible to do so will elect Member Class Directors.

5.4 Special Member Meetings.

Members may hold special meetings whenever called by the Board. The Board will call special Member meetings whenever a majority of the Members of any Class request a special meeting or at such other times as it deems appropriate. The Chair of the Board will preside over all special Member meetings.

5.5 Member Class Meetings

An individual WECC Member Class, including Class 6 consisting of the Canadian Delegation, may hold a meeting for any purpose relevant to the interests of Class Members, including the election of Member Class Directors by Classes eligible to do so. Such meeting will be initiated by request by one or more Class Member(s), and agreement by at least fifty percent (50%) of Class Members.

5.6 Notice of Member Meetings.

5.6.1 Annual Meeting. The Chief Executive Officer will provide at least thirty (30) days' advance notice to all Members and the Board of the date, place and time of the Annual Meeting of the Members and an agenda of the business to be conducted at such meeting.

5.6.2 Other Member Meetings. The Chief Executive Officer will provide notice of regularly scheduled and special meetings of the Members to the Members not less than fifteen (15) days before the meeting if delivered by first-class mail, or not less than ten (10) days before the meeting if the notice is delivered personally, by telephone, by facsimile, electronic mail or express mail. Notice of meetings may not be sent solely by electronic mail. If mailed, such notice will be deemed given when deposited in the United States mail, with first-class postage thereon prepaid, addressed to a Member. Such notice will state the date, time and place of the meeting and the meeting agenda.

5.6.3 Public and Web Site Notice. Public notice of each meeting of the Members will be placed on WECC's Web site at least ten (10) days before such meeting. In addition, the Chief Executive Officer will provide notice in the same manner and time as set forth in Section 5.6.2 of each meeting to each member of the public who so requests and who has provided appropriate information regarding delivery of notice.

5.7 Open Meetings.

All Membership meetings are open to observation by the public.

5.8 Policymaking Authority.

The Board of Directors may adopt policies for the interpretation and implementation of the meeting and voting procedures established in this Section 5.

5.9 Minimum Participation Requirement.

In order to be counted for quorum purposes at a meeting of the membership as a whole or Class meeting, a WECC Member must actively participate (by attending in person, sending

an alternate, or voting absentee) in at least one WECC meeting (including meetings of the Board, committees and subcommittees) each year. At least two weeks prior to the WECC Annual Meeting, WECC staff will send a notice to any Member that has, according to organizational records, not satisfied this minimum participation requirement within the previous year. The notice will inform the Member that in order to be counted as an active Member of WECC for voting and quorum purposes, the Member must at a minimum either register for an attend the Annual Meeting and associated Class meetings or participate in the Annual Meeting and associated Class meetings by casting an absentee ballot. If the Member does not meet this minimum participate requirement, the Member will be considered an "inactive" Member until its active status is restored by participation in a WECC Annual Meeting. An inactive Member will not be counted toward establishing a quorum of the membership as a whole or of a Class, and an inactive Member will not be entitled to vote at WECC meetings until the Member is reinstated to "active" status by attending in person, sending an alternate or voting absentee at an Annual Meeting and associated Class meetings. An applicant for WECC membership or a WECC Member may at any time self-designate itself an inactive Member. Such designation will be effective until the Member is reinstated to "active" status.

6. Governance.

6.1 Board of Directors.

Subject to those matters expressly requiring approval of the Membership, a Board of Directors elected by the Members will govern the WECC.

6.2 Composition of the Board.

Except as provided in Sections 6.2.1 and 6.2.2, the Board consists of thirty-two Directors as follows: 1) twenty-four (24) Member Class Directors elected by the Member Classes eligible to do so, including Class 6 as defined in Section 6.2.1, (four from Classes 1 through 6); 2) seven (7) Non-Affiliated Directors elected by the WECC Members as a whole (which may include the Chief Executive Officer), and 3) one Mexican Director elected according to Section 6.2.2. As indicated in Section 6.2.1, if there is no Non-affiliated Director whose background and experience would provide the Board expertise on Canadian interests, then the Board size would be increased by one more Director elected by Class 6.

6.2.1 Canadian Interests. For purposes of providing fair and adequate representation of Canadian Interests in numbers that are approximately proportionate to the contribution of net energy for load in that portion of the Western Interconnection located in Canada, the Canadian Delegation shall constitute Class 6 and shall elect four (4) Canadian Directors, provided that at least one of these Canadian Directors must be affiliated with each of Member Classes 1, 3, and 5. Members of the Canadian Delegation shall vote for Directors in this Class 6 and shall not vote in other Member Class elections. In the initial election of these four Class 6 Directors, one shall have a term of four years, one shall have a term of three years, one shall have a term of two years, and one shall have a term of one year. Thereafter all Canadian Directors will serve a term of three years. Class 6 will also elect a fifth Canadian Director if, following the election of Non-Affiliated Directors at the

Annual Meeting, there is no Non-Affiliated Director qualified by virtue of background and experience in Canadian industry or government to provide Board expertise on Canadian interests. This fifth Canadian Director shall serve until the earlier of: 1) the end of a three-year term (provided that this provision will remain in effect and may continue to cause the election of an additional Director); or 2) the election by the Members of a Non-Affiliated Director with the background and experience described in this Section.

6.2.2 Mexican Interests. Whenever there are at least two (2) Members whose head offices and principal place of business are in Mexico or there is one such Member that operates a portion of the Western Interconnection and has signed the Reliability Management System agreement or has agreed to abide by any successor standards compliance system and no person has been elected to the Board by the Classes or Members whose experience or affiliation reflects Mexican interests, the number of Class Member Directors will be expanded by one (1) and the additional Member Class Director will be elected by the Mexican Delegation. This Mexican Director will serve until the earlier of: 1) the end of a three-year term (provided that this provision will remain in effect and may continue to cause the election of an additional Director); or 2) the election by the Members or a Member Class of a person with the experience or affiliation described in this Section.

6.3 Term of Office.

Each Director will hold office for three (3) years. For Directors elected at the Annual Membership Meeting, each three (3) year term shall commence upon the adjournment of the portion of the Annual Member Meeting provided for in Section 5.3, in which all Members are counted for purposes of determining a quorum. Similarly, the three year terms of outgoing Directors shall end upon the adjournment of that portion of the Annual Member Meeting in which all Members are counted for purposes of determining a quorum, whether that results in a longer or shorter term than exactly three years.

6.4 Selection and Compensation of Member Class Directors.

6.4.1 Selection of Member Class Directors. With the exception of Class 7, each Member Class shall be eligible to elect Member Class Directors. Member Class Directors will be elected by Members of their respective Classes of Membership. Each Member Class eligible to elect Member Class Directors may develop its own list of Director candidates or it may ask the Governance and Nominating Committee to develop a list of candidates. If the Governance Nominating Committee is used, it will select at least two (2) candidates for each vacancy for Member Class Director. In addition, in identifying candidates for Member Class Director positions, the Governance and Nominating Committee will seek to produce a slate of candidates who, together with the Directors from all Member Classes standing for election and continuing in office, will reflect the diversity of regional interests and characteristics within the Western Interconnection. The proposed slate of candidates will be mailed to the Members of the Class at least sixty (60) days before each Member Class Meeting at which the elections are to be held. Additional candidates may be added to the slate upon the

submittal of a nomination to the Chief Executive Officer signed by three (3) Members of the Class, or ten percent (10%) of the total number of Members of the Class, whichever is greater. The Chief Executive Officer must receive such nominations at least thirty (30) days before the Member Class Meeting. All candidates identified by the Class (as provided above) or by the Governance and Nominating Committee will be submitted to the Class for election at the Member Class Meeting. Candidates will provide reasonable background information regarding their qualifications and a disclosure statement regarding any affiliations with Electric Line of Business Entities in the Western Interconnection to the Members before each election. The Director candidate(s) receiving the highest number of votes cast by Members of the Class will be elected to the position of Director.

- 6.4.2 Member Class Director Qualifications. Member Classes eligible to elect Member Class Directors may elect any person as a Member Class Director, provided that no Member or group of Affiliated Members may have more than one Director associated with them. Nothing in this Section regarding the election of Directors by Classes of Members is intended to limit, qualify or alter in any manner the fiduciary obligation of Directors to the WECC set forth in Section 6.10.1. A Member Class Director shall notify all Members of the Class from which the Director was elected of any significant change in employment or other significant change in circumstances relevant to the Director's qualifications. Such notice shall be provided in writing as soon as possible and not later than sixty (60) days following the change.
- 6.4.3 Minimum Number of Class Members. Each Class eligible to elect Member Class Directors must have at least four (4) Members to be qualified to nominate and elect representatives to the Board of Directors. If a Class eligible to elect Member Class Directors contains less than four (4) members, then the Director positions for that Class will remain vacant until the first Annual Meeting at which the Class has the minimum number of members, at which time two of the vacant positions will be filled by election to three year terms and two by election to two year terms. If a Class eligible to elect Member Class Directors falls below the minimum number of members after having elected Directors, such Directors will continue to serve out their terms. However, upon expiration of their terms, the Director positions will remain vacant until such time as the Class contains sufficient members.
- 6.4.4 Member Class Director Compensation. Member Class Directors will not be compensated for their service by the WECC. The WECC will reimburse Member Class Directors for reasonable and actual out-of-pocket expenses (such as travel and lodging) that are not subject to reimbursement from any Member or other source.

6.5 Selection and Compensation of Non-Affiliated Directors.

- 6.5.1 Non-Affiliated Director Qualifications.

6.5.1.1 Non-Affiliation. The Non-Affiliated Directors of the Board may not be affiliated with any Entity that is a Member of the WECC or is eligible for membership in Classes 1 through 3 of the WECC, provided that status as a residential electricity customer will not disqualify a person from sitting as a Director. A candidate will not be qualified to serve as a Director if the candidate, or the spouse or a minor child of the candidate, derives any of his or her annual income from a Member of WECC, an Entity that is eligible for membership in Classes 1 through 3, or a bulk power user in the Western Interconnection. The WECC shall maintain a list of such Members and Entities which shall be updated periodically. Non-Affiliated Directors, candidates and others shall be entitled to rely upon the list to determine compliance with these requirements.

6.5.1.1.1 Notwithstanding the provisions of Section 6.5.1.1, a candidate for Non-Affiliated Director will not be disqualified for owning shares in a mutual fund that owns an interest in a Member or an Affiliate of a Member as long as the mutual fund does not specialize exclusively or predominantly in the energy sector. The disqualification standards described in Section 6.5.1.1 will not disqualify a candidate who is receiving payments from a pension plan of a Member or an Affiliate of a Member in a form other than securities of such Member or Affiliate and the pension plan payments bear no relationship to the economic performance of the Member or Affiliate.

6.5.1.1.2 The disqualification standards described in Section 6.5.1.1 will not apply to disqualify a candidate solely by virtue of an employment or contractual relationship with a state that has one or more agencies that are eligible to be Members of Class 5 of WECC, provided that:

1. In the case of a candidate's employment relationship, the employer is not a member of WECC;
2. In the case of a candidate's contractual relationship with a state agency, no member or employee of the state agency is a member of the WECC Board;
3. In the case of a candidate's employment relationship with a contractor to a state agency, no member or employee of the state agency is a member of the WECC Board; and
4. In the case of a candidate's employment or contractual relationship with a state agency which is a WECC Member or employs a WECC Board member, if the Governance and Nominating Committee determines that

the candidate's employment duties do not include significant work for or representation of that state agency.

6.5.1.1.3 Notwithstanding the provisions of this Section 6.5.1.1, a candidate for Non-Affiliated Director will not be disqualified for being affiliated with an organization that represents a substantial number of end users or a substantial number of persons interested in the impacts of electric systems on the public interest or the environment.

6.5.1.2 Expertise. The Governance and Nominating Committee will nominate Non-Affiliated Director candidates with the objective of having at least one Non-Affiliated Director with expertise in electric transmission operations and planning. The Governance and Nominating Committee will also have the objective of nominating persons with: 1) experience in corporate leadership at the senior management or board of directors level; 2) leadership experience in law, finance, economics, accounting, engineering, regulation, natural resources or commercial commodity markets and associated risk management; 3) experience representing a substantial number of end users or a substantial number of persons interested in the impacts of electric systems on the public or the environment; 4) a well-developed understanding of the distinct operational, resource, political, and interest-based characteristics of various regions within the Western Interconnection; and 5) a well-developed understanding of Canadian power systems or Canadian regulatory issues.

6.5.2 Selection of Non-Affiliated Directors.

6.5.2.1 Selection of Non-Affiliated Directors. After the initial election of Non-Affiliated Directors, the Governance and Nominating Committee will make nominations. Before the end of each Non-Affiliated Director's term, the Governance and Nominating Committee may select an independent search firm to provide the Governance and Nominating Committee with a list of qualified candidates for each vacant position. Incumbent Directors, if qualified and willing to serve, may be considered for nomination by the Governance and Nominating Committee. The Governance and Nominating Committee will consider each candidate for Non-Affiliated Director to determine whether that candidate is qualified to stand for election to the Board. From the list of candidates accepted by the Governance and Nominating Committee to stand for election, the Governance and Nominating Committee will select a slate of candidates for the vacant Non-Affiliated Director positions. The Governance and Nominating Committee's slate of candidates will be e-mailed to the Members no later than sixty (60) days prior to the Annual Meeting. Additional candidates may be added to the slate upon the submittal of a nomination to the Chief Executive Officer signed by three (3) Members of any Class, or ten percent

(10%) of the total number of Members of any Class, whichever is greater. The Chief Executive Officer must receive such nomination at least thirty (30) days before the Annual Meeting. The Chief Executive Officer will place such nominations before the Members for possible election unless he or she determines in writing that a proposed nominee does not meet the criteria for eligibility to be a Non-Affiliated Director in these Bylaws.

6.5.2.2 Disclosure Statement. Candidates for Non-Affiliated Director will provide to the Governance and Nominating Committee and, if nominated, to the Members, a statement describing their expertise and disclosing any present or past affiliations, relationships or associations relevant to their qualification to serve as a Non-Affiliated Director. A candidate for Non-Affiliated Director will be required to disclose any economic interest in any Member of the WECC or any Entity eligible for membership in Classes 1 through 3 of the WECC held by themselves, their spouse or their children as well as any such interest known to the candidate held by the candidate's parents, siblings, aunts, uncles, or first cousins.

6.5.2.3 Election. The number of Non-Affiliated Director candidate(s) corresponding to the number of vacant positions receiving the highest number of votes cast at the Annual Meetings of the Members will be elected to the position of Non-Affiliated Director.

6.5.3 Non-Affiliated Director Compensation. The Non-Affiliated Directors will receive a level of compensation as determined from time to time by the Member Class Directors.

6.6 Tie Vote.

In the event of an inability to select Directors due to a tie vote, a second vote will be taken to determine the placement of the tied candidates. The second vote will be limited to the tied candidates, with the candidate(s) receiving the highest number of votes being selected. If another tie vote results, additional votes will be taken (after the elimination of any candidate receiving fewer votes than the tied candidates) until a candidate can be selected. If a tie cannot be resolved pursuant to the foregoing procedures, it will be resolved by lot. For the purpose of such second (and subsequent) votes, absentee ballots shall allow voters to list all candidates in order of preference such that absentee ballots may be counted by striking those candidates not participating in the run-off. Absentee ballots that express an order of preference for fewer than all candidates will be counted if the ballot demonstrates clear preference among the runoff candidates.

6.7 Removal of Directors.

The Members or the Board may remove a Director before completion of the Director's term of office pursuant to the following provisions.

6.7.1 Removal by the Members. Member Class Directors may be removed at will by a vote of at least sixty percent (60%) of the Members of the Class that elected that Director. Non-Affiliated Directors may be removed only for gross negligence,

violation of local, state, provincial, or federal laws, gross misconduct, or failure to meet the fiduciary obligations of Directors. Removal of a Non-Affiliated Director will be by a vote of at least fifty percent (50%) of the entire WECC membership, including a vote of at least fifty percent (50%) of each Class.

6.7.2 Removal by the Board. The Board may remove any Director for gross negligence, violation of local, state, provincial, or federal laws, gross misconduct, or failure to meet the fiduciary obligations of Directors. Such removal will only occur upon the affirmative vote of not less than twenty-one (21) Directors.

6.8 Resignation.

Any Director may resign from his or her office or position at any time by written notice to the Board by delivery to the Chair. Pursuant to Sections 4.1 and 4.8.2, a Director employed by a withdrawing or expelled Member will be deemed to have resigned. The acceptance of a resignation will not be required to make it effective.

6.9 Procedures for Filling Vacant Director Positions.

6.9.1 Member Class Director Vacancies. If the position of any Director elected by a Member Class becomes vacant, the remaining Directors elected by the same Class will promptly choose a successor to that position who will serve until the next Annual Meeting.

6.9.2 Non-Affiliated Director Vacancies. If the position of any Non-Affiliated Director becomes vacant, the remaining Directors may charge the Governance and Nominating Committee with selecting a successor immediately. The Governance and Nominating Committee will follow the requirements set out in Section 6.5.2.1 in its selection of any successor Non-Affiliated Director. Alternatively, if less than one (1) year remains in the term of that Director, the remaining Directors may choose to leave the position vacant for the remainder of the term.

6.9.3 Holdover to Cure Procedural Vacancies. Whenever a vacancy in any Member Class or Non-Affiliated Director position would be created due to expiration of a Director's term combined with a lack of a quorum or other procedural inability to elect a new Director, the expired Director's term shall be extended until such time as a proper election of a new Director can be conducted.

6.10 Duties of Directors.

The Directors will have the following duties:

6.10.1 Fiduciary Obligation to the WECC: All Directors, including Member Class Directors, will have a fiduciary obligation to the WECC consistent with the requirements for Directors of Utah non-profit corporations. Notwithstanding any affiliation with individual Members or Class of membership, Members of the Board will at all times act in conformance with such requirements, these Bylaws and the Standards of Conduct set forth in Appendix A.

6.10.2 Preserve Non-Affiliated Status: Throughout their terms, Non-Affiliated Directors will have a duty to avoid any affiliation that is inconsistent with the standards for Non-Affiliated Directors in Section 6.5.1.1 of these Bylaws. If a Non-Affiliated Director becomes aware of any such affiliation, he/she must either resign or eliminate the affiliation (e.g., dispose of securities) within six (6) months.

6.11 Powers of Directors.

The management of all the property and affairs of the WECC will be vested in the Board of Directors. The Board will hold annual elections to select a Board Chair and to fill any other Board officer positions that may be created by the Board or required by applicable law. The Board may exercise all the powers of the WECC and do all lawful acts and things (including the adoption of such rules and regulations for the conduct of its meetings, the exercise of its powers and the management of the WECC) as are consistent with these Bylaws and the Articles of Incorporation.

6.12 Delegation of Board Authority.

The Board may delegate to the Chief Executive Officer or to any Board Committee formed pursuant to Section 7.7 any or all of its powers and authority except: 1) any power which it may not delegate pursuant to applicable Utah law; 2) the power to adopt any reliability standard; 3) the power to determine when to exercise the Backstop Authority of the WECC; 4) the power to approve budgets; 5) the power to form committees; 6) the power to amend the Bylaws; 7) the power to elect the Chair and other officers of the Board; 8) the power to enter into contracts obligating the WECC to pay an amount exceeding \$50,000; and 9) the power to hire, fire or set the terms of employment of the Chief Executive Officer. The Board may also delegate to any Member committee the power to make specific decisions, subject to the right of any Member to appeal any of such decisions to the Board within 30 days of the committee vote on the decision by writing a letter to the Chief Executive Officer that describes in reasonable detail the grounds for appeal, and requests that the appeal be considered by the Board at its next regularly scheduled meeting, subject to applicable notice requirements. Delegation will be by express decision and will require the affirmative vote of not less than twenty (20) Directors. Any Director may call for a vote to rescind such delegation at any time and such delegation will be rescinded if eight (8) or more Directors vote to do so.

6.12.1 Notice to Members. Within seven (7) days of any decision delegated pursuant to Section 6.12, except for routine decisions of the Chief Executive Officer, Members will be notified of the decision by electronic mail, posting on the WECC Web site and any other means determined appropriate by the Board. Routine decisions of the Chief Executive Officer will be noticed in periodic reports to the Board and Members as determined by the Board, which will be sent to Members by electronic mail and posted on the WECC Web site.

6.12.2 Board Review of Delegated Decisions. Decisions delegated pursuant to Section 6.12 will be reviewed by the Board at the request of any Director, provided such request is lodged with the Secretary within thirty (30) days of the notice. Whenever it determines that a matter requires an urgent decision, the Board may shorten the

deadline for requests for review, provided that: 1) the notice and opportunity for review will be reasonable under the circumstances; and 2) notices to Members will always contain clear notification of the procedures and deadlines for Board review. A request for review of a decision will stay the effect of the decision pending review unless the Board in making the delegation expressly determines otherwise.

7. Procedures for Board Decisions.

7.1 Quorum.

No business will be conducted by the Board unless at least seventeen (17) Directors are present, including at least three (3) Non-Affiliated Directors and at least one Director elected by each of not less than four (4) of the Member Classes; provided, that if all Member Class Director positions for a Class are vacant, or if a Class is not entitled to elect Member Class Directors, then no Director elected by such Class will be required to be present for the Board to conduct business.

7.2 Majority Vote.

A decision of the Board will require an affirmative vote of a majority of Directors present. Directors may not vote by proxy or by absentee ballot, but Directors may participate in Board meetings by telephone as provided in Section 7.3 of these Bylaws.

7.3 Attendance at Board Meetings by Teleconference.

Any or all of the WECC's Directors may participate in any meeting of the Board by telephone conference or any other means of communication that enable all Directors participating in the meeting to simultaneously hear one another. Every Director participating in a meeting in the manner described in the preceding sentence will be deemed to be present in person at that meeting.

7.4 Board Action by Unanimous Consent.

7.4.1 Action Without a Meeting. Unless the WECC's Articles of Incorporation or applicable law provides otherwise, action required or permitted to be taken at a meeting of the Board may be taken without a meeting through one or more written consents describing the action taken. Any Board action taken by written consent must be signed by all Directors in office at the time the action is taken. Such actions must be noticed to Members in accordance with Section 7.5 and Members must be given an opportunity to comment prior to the Board taking such actions through electronic mail, comments on the Web site or other appropriate means. The required notice of such meeting may generally describe the arrangements (rather than the place) for the holding of the meeting. All other provisions herein contained or referred to will apply to such meeting as though it were physically held at a single place. All Board actions by written consent must be filed with the WECC's Board meeting minutes. Action taken under this Section is effective when the last Director signs the consent, unless the consent specifies an earlier or later effective date. Any action by written consent has the same effect as a meeting vote and may be described as such in any document.

7.4.2 **Waiver of Procedures.** For any specific action at any noticed meeting of the Board, and under exigent or unusual circumstances, the Board by unanimous vote of those present may waive any procedural requirement applicable to Board decision-making, including any requirement for notice of a specific potential action, except for the following: 1) the requirement for notice of the time and place of the meeting pursuant to Section 7.5; 2) the quorum and voting requirements of Sections 7.1 and 7.2; and 3) any non-procedural limitation on the power of the Board to make a decision, including, but not limited to, those restrictions in Sections 6.12 (limiting the power to delegate) and 13.1 (limiting the power to amend the Bylaws). Whenever such action is taken, a statement describing the action, the exigent or unusual circumstances, the specific procedure waived, the basis for the waiver and the votes of all Directors present shall be posted on the web site and communicated in writing or by email to all Members within five (5) days.

7.5 Notice of Board Meetings.

- 7.5.1 **Regular Meetings.** Except as set forth in Section 7.5.2 regarding urgent business, all regular business of the Board will occur at the Board meetings, at least twenty-one (21) days' advance notice of which has been provided by the Chief Executive Officer to all Directors and all Members. Notice will include an agenda that will identify those matters on which a vote will be taken at the meeting. The foregoing requirement shall not preclude the Board from taking an action that is different from the specific proposed action identified in the agenda, as long as the relevant subject matter has been reasonably identified in the agenda. The Directors will establish a regular meeting schedule that will be made available to the Members. The schedule will include not less than two meetings of the Board annually.
- 7.5.2 **Special Meetings.** Whenever the Chair of the Board or any three (3) Directors find that there is urgent business requiring Board action before the next regular Board meeting, a special meeting of the Board may be called. Such special meetings will be held upon as much written notice to each Board Member and all Members as is possible under the circumstances, which will not be less than three (3) days. However, this notice of special meetings may be waived if: 1) the waiver is by a writing signed by a quorum of Board members; and 2) as much notice of the meeting as practicable has been given to WECC Members via e-mail and posting on the WECC Web site.
- 7.5.3 **Public and Web Site Notice.** Public notice of each meeting of the Board will be placed on WECC's Web site at least ten (10) days before such meeting (or such lesser time as provided pursuant to Section 7.5.2). In addition, the Chief Executive Officer will provide notice of each meeting by first-class mail, facsimile or electronic mail to each member of the public who so requests and who has provided appropriate information regarding delivery of notice.

7.6 Open Meetings.

Except as provided in Section 7.6.1, all regular and special meetings of the Board will be open to observation by any Member and any member of the public.

7.6.1 Closed Session. Notwithstanding the provisions of Section 7.6, upon an affirmative vote of two-thirds (2/3) of the Directors present, the Board may meet in closed session: 1) to consider the employment, evaluation of performance, or dismissal of an employee of WECC and to deliberate regarding decisions the Board may be called upon to make regarding the nomination, qualification, appointment, or removal of a member of the Board of Directors; 2) to discuss pending or proposed litigation and to receive confidential attorney-client communications from legal counsel; and 3) to receive and discuss any information that is privileged, trade secret, cybersecurity, critical energy infrastructure information (as defined by the FERC), protected from public disclosure by law or that the Board determines should be confidential in order to protect a legitimate public interest.

7.6.1.1 Attendance by an Affected Director. Closed sessions of the Board may not be attended by a Director under the following circumstances: 1) where the qualifications or performance of the Director or the Director's spouse or children are being discussed; 2) where the Director is employed by an entity that is or is likely to become a party to the litigation being discussed; and 3) where the Director or the Board determines that the Director would have a serious and substantial conflict of interest by becoming privy to confidential attorney-client or trade secret information that is to be presented to the Board in closed session.

7.6.1.2 Announcement of Closed Session. Before adjourning into closed session, the Chair of the Board will announce the purpose of the closed session in a manner that provides the public an understanding of the general subject matter to be discussed but which does not reveal sensitive or personal information. The Board will not discuss additional items outside the scope of this description.

7.6.1.3 Confidentiality of Closed Session. All Directors and others present will maintain the confidentiality of discussions and decisions made in closed session. The Board will appoint a secretary for closed session to keep a minute book for the purpose of recording the subject matter discussed in closed session and any actions taken in closed session.

7.7 Board Committees.

7.7.1 Governance and Nominating Committee. The Chair will appoint a Governance and Nominating Committee that shall: 1) return slates of candidates as required by these Bylaws; 2) oversee implementation and amendment of these Bylaws; and 3) address such other issues pertinent to Governance as the Board may choose to delegate to it. The Governance and Nominating Committee will consist of one Director from each

of the six Member Classes eligible to elect such Directors and one Non-Affiliated Director. The Chair will designate one of the appointed Directors to be the Chair of the Governance and Nominating Committee.

7.7.2 Other Board Committees. The Board may appoint such Board committees as it deems necessary from time to time to carry out its business affairs. In appointing such committees, the Board will specify their purpose, membership, voting, notice and meeting procedures and such other direction as the Board may deem appropriate. The Board may appoint one or more Members or other persons to participate in Board committees as full voting members or as non-voting advisory members.

7.7.3 Standards of Conduct for Board Committee Members. Members of Board committees shall comply with the Board Member Standards of Conduct set forth in Appendix A.

8. Member Committees.

8.1 Purpose.

The WECC will have committees composed of its Members to advise and make recommendations to the Board. Such committees will include both standing committees required by these Bylaws and such other committees as the Board may choose to create.

8.2 Standing Committees.

WECC will have the following standing committees:

8.2.1 Planning Coordination Committee. This committee will advise and make recommendations to the Board on all matters within the jurisdiction of the WECC pertaining to maintaining reliability through evaluating generation and load balance and the adequacy of the physical infrastructure of interconnected bulk electric systems within the Western Interconnection.

8.2.2 Operating Committee. This committee will advise and make recommendations to the Board on all matters within the jurisdiction of the WECC pertaining to maintaining reliability through the operation and security of the interconnected bulk western electric systems in the Western Interconnection.

8.2.3 Market Interface Committee. This committee will advise and make recommendations to the Board on the development of consistent Market Interface practices and compatible commercial practices within the Western Interconnection. It will consider matters pertaining to the impact of WECC's reliability standards, practices, and procedures on the commercial electricity market in the Western Interconnection, and facilitate analysis of the impact of electricity market practices on electric system reliability.

8.3 Other Committees.

The Board may create such other committees as it may desire from time to time. The Board will specify the functions, duties and responsibilities of any such committee at the time of its creation. The Board will also specify the membership rules, quorum requirements, voting levels and meeting and notice requirements at the time of creation. Any changes in the membership rules, quorum requirements, or voting levels of a committee, once established by the Board, will require a seventy-five percent (75%) vote of the Board to alter. The specific function or sunset date for a committee will be designated by the Board at the time of the committee's creation. The committee will terminate its activities upon the completion of its function or the expiration of the date set by the Board.

8.4 Committee Assessment and Streamlining.

8.4.1 **Assessment of Standing Committee Activities.** No later than three (3) years following the Organizing Meeting of the WECC, the Board of Directors will conduct a thorough review of the activities of each of the WECC's standing committees (as defined in Section 8.2 of these Bylaws) to assess whether they are effectively furthering the WECC's purposes in a manner that is consistent with: 1) the provisions of Section 2.3 of these Bylaws; and 2) the then-current state and the expected future evolution of the electric power industry within the Western Interconnection. The Board's review will assess whether there are any aspects of the standing committees' functions or procedures that impede development of WECC standards, obligations, processes, and decisions that are timely, fair, effective, and reasonable in view of the commercial, legal, regulatory, and economic needs and objectives of the affected Members. The Board will propose to the membership, at the first annual Member meeting held after completion of the review required by this Section 8.4.1, any changes to standing committee structures, functions, or procedures that the Board determines are warranted by its review.

8.4.2 Dissolution of Additional Member Groups.

8.4.2.1 Except as otherwise provided in Section 8.4.2.2 below, no later than three (3) years following the Organizing Meeting of the WECC, all WECC Member groups other than the WECC's standing committees (as defined in Section 8.2 of these Bylaws) will dissolve automatically. The Member groups to automatically dissolve under this Section 8.4.2.1 will include, without limitation, all WECC Member subcommittees, work groups, and task forces. There will thereafter be no committees, subcommittees, or other groups of WECC Members other than: 1) the WECC's standing committees (as defined in Section 8.2 of these Bylaws); and 2) any established by the Board after it determines that the committee, subcommittee, or other group, when established, will satisfy the terms of assessment for standing committees set forth in Section 8.4.1 above.

8.4.2.2 If, at the time specified for dissolution of Member groups that are not standing committees in accordance with Section 8.4.2.1 above, FERC-

approved Regional Transmission organizations carrying on commercial operations within the Western Interconnection do not cover at least one-half the load in the Western Interconnection, the Board may delay the implementation of the actions specified in Section 8.4.2.1 until no later than six (6) months after FERC-approved regional transmission organizations covering at least one-half the load within the Western Interconnection are in place and carrying on commercial operations.

8.5 Procedures for Committee Decision-Making.

- 8.5.1 Reports to Board of Directors. Action by a committee will be in the form of a recommendation for Board action except in those instances in which the Board has, by resolution, specifically delegated to a committee the power to take action subject to an appeal to the Board by any Member. The recommendation of a committee must be forwarded to the Board for its action along with any minority or dissenting reports filed with the committee Chair or Vice-Chair.
- 8.5.2 Subcommittees, Task Forces and Ad Hoc Groups. Any Board or member committee may create such subcommittees, task forces or other ad hoc groups ("subcommittee") as it deems appropriate to carry out the committee's responsibilities consistent with these Bylaws and the direction of the Board. The composition, responsibilities and procedures of such groups shall be specified by the committee as appropriate; provided, however that: 1) the committee may only delegate to such subcommittee responsibilities that are within the scope of the committee's responsibilities pursuant to these Bylaws and direction of the Board; and 2) the subcommittee may only make recommendations to the committee. A committee may create a subcommittee without prior approval of the Board; provided, however, that the committee shall promptly inform the Board in writing and at the next Board meeting regarding the creation of the subcommittee. The notification to the Board shall include a charter for the subcommittee that describes how members of the subcommittee will be selected, the duties of the subcommittee, and whether the committee has established a sunset date for review of (1) the need for the subcommittee and (2) the charter of the subcommittee.
- 8.5.3 Committee Officers. The Board will appoint the Chair and Vice-Chair of each committee. The Committee Chair or Vice-Chair will preside over all meetings of the committee and will report recommendations of the committee to the Board of Directors. The Chair and Vice-Chair will be responsible for informing the Board regarding minority opinions and other information required by the Board along with overall committee recommendations. Whenever the committee elects to form a subcommittee to represent regions or address specific tasks, the Chair (or in the absence of the Chair, the Vice-Chair) will have the power to appoint the members of such subcommittee from both members of the committees and non-members. Upon resignation of the Committee Chair, the Vice Chair shall serve as Chair until the Board appoints a replacement. Upon resignation of the Vice Chair, the Chair may appoint a temporary Vice Chair to serve until the Board appoints a replacement. Upon resignation of both the Chair and Vice Chair, the Chair of the Board may

appoint one or more temporary replacements to serve until the Board appoints permanent replacements.

8.5.4 Committee Membership. Except as provided in Section 8.5.4.1, any Member of WECC may designate one representative as its committee member to any standing committee or other committee. The WECC Member will have one vote at any committee meeting through that committee member. Any number of other persons may attend a committee meeting, but such persons will have no right to vote without a prior designation of representation by a WECC Member, except that interested stakeholders may, under Section 8.6, vote on proposed Reliability Standards or revisions to Reliability Standards.

8.5.4.1 Dual Representation for Functionally-Separated Members. A Member which has distinct and functionally-separated interests as both a transmission provider and a transmission customer may designate two representatives as committee members to any standing committee, one to represent each functionally separate interest. Each such committee member will have one vote. The privilege granted by this Section is subject to revocation by the Board on a case-by-case basis or generally whenever the Board finds, upon petition from any Member or its own motion, that such dual representation creates unfairness or imbalance within a committee.

8.5.5 Committee Voting and Classes.

8.5.5.1 Classes. For purposes of voting, committees will have three classes of membership:

8.5.5.1.1 Transmission Provider Members or Participating Stakeholders;

8.5.5.1.2 Transmission Customer Members or Participating Stakeholders;
and

8.5.5.1.3 States and Provincial Members (Member Class 5).

8.5.5.2 Voting. Except as provided in Section 4.5.2, each committee member and Participating Stakeholder (if any) will have one vote. In order for a recommendation to be made to the Board, such recommendation must receive a simple majority vote of both: 1) committee members and Participating Stakeholders (if any) present and voting from the Transmission Provider Class; and 2) committee members and Participating Stakeholders (if any) present and voting from Transmission Customer Class. Committees will adopt voting and record-keeping procedures to ensure that committee voting is conducted consistent with these Bylaws. This requirement will also apply where decision making power has been delegated to a committee pursuant to Section 6.12.

8.5.5.2.1 State and Provincial Votes. The position of the state and provincial Class committee members must be recorded, but the failure of a proposed recommendation or decision to obtain a simple majority vote of the state and provincial committee members will not prevent the recommendation or decision from being posted for due process comment or sent to the Board of Directors.

8.5.6 Notice and Review of Committee Recommendations and Decisions (Due Process). Committee recommendations or decisions delegated to a committee pursuant to Section 6.12 will be subject to the due process provisions of this Section. Committee recommendations or decisions related to the development or approval of Reliability Standards will be subject to the provisions of this Section 8.5.6 and Section 8.6. Following a committee's development of a proposed recommendation or decision, the committee will post the proposed recommendation or decision on the WECC Web site for review and comment by other WECC Members, interested stakeholders (if the recommendation or decision concerns a Reliability Standard or revision), and other interested parties. The committee will provide all Members and Participating Stakeholders (if the recommendation or decision concerns a Reliability Standard or revision) e-mail notification of the posting and will allow at least thirty (30) days for comment on the proposal. The committee will consider all such additional input before reaching its final recommendation or decision. If the committee's recommendation or decision changes significantly as a result of comment received, the committee will post the revised recommendation or decision on the Web site, provide e-mail notification to Members and Participating Stakeholders (if the recommendation or decision concerns a Reliability Standard or revision), and provide no less than ten (10) days for additional comment before reaching its final recommendation or decision. Upon reaching its final recommendation or decision, the committee will forward it to the Board. Whenever it determines that a matter requires an urgent decision, the Board may shorten any time period set forth in this Section, provided that: 1) notice and opportunity for comment on recommendations or decisions will be reasonable under the circumstances; and 2) notices to Members will always contain clear notification of the procedures and deadlines for comment.

8.6 Procedures for Developing and Voting on Reliability Standards.

8.6.1 Rights and Obligations of WECC Members and Participating Stakeholders. All WECC Members and interested stakeholders are entitled to participate in the development of and to vote on Reliability Standards or revisions to Reliability Standards, subject to any applicable obligations, limitations and conditions set forth in these Bylaws, and in accordance with the WECC Reliability Standards Development Procedures.

8.6.1.1 Participation. The right to participate in Reliability Standards development and voting includes the right to request the development or revision of a Reliability Standard, the right to receive notice of, attend and participate in

related WECC committee and subcommittee discussions, the right to review information relevant to a Reliability Standard or revision, the right to provide written comments on a proposed Reliability Standard or revision, the right to participate in committee or subcommittee voting on a Reliability Standard or revision and the right to file an appeal requesting review of any committee or subcommittee decision on a Reliability Standard or revision.

8.6.1.2 Voting. The procedures and conditions for voting by WECC Members and Participating Stakeholders are set forth in the Reliability Standards Development Procedures and in Section 8.5.5 and 8.5.5.2 of these Bylaws. A Participating Stakeholder may only vote on a proposed Reliability Standard or revision if they have applied for and been granted Participating Stakeholder status in accordance with Section 8.6.2 below. A Participating Stakeholder is only entitled to vote on Reliability Standards and revisions. A Participating Stakeholder is not entitled to vote in any other WECC committee balloting process or in elections for WECC Directors.

8.6.2 Participating Stakeholder Application Process. Any person or entity that is an interested stakeholder may apply to WECC for Participating Stakeholder status and, upon WECC's acceptance of such application, acquire the participation and voting rights set forth above in Section 8.6.1. WECC staff, under the direction of the CEO, will process applications and make the initial determination of eligibility for Participating Stakeholder status. Denial of Participating Stakeholder status may be appealed to the WECC Governance and Nominating Committee and, if denied by the Governance and Nominating Committee, to the WECC Board. A person or entity's Participating Stakeholder status will be maintained so long as the Participating Stakeholder continues to meet the requirements set forth in Section 3.21 and participates in at least one WECC meeting per year at which a Reliability Standard or revision is discussed and/or voted on. In the event a person or entity's Participating Stakeholder status lapses due to failure to meet the above minimum participation requirement, the person or entity may restore Participating Stakeholder status by re-applying for Participating Stakeholder status and attending a WECC meeting at which a Reliability Standard is discussed and/or voted on.

8.7 Notice of Committee Meetings.

8.7.1 Standing Committees. The committee Chair, with the assistance of the Chief Executive Officer, will ensure that not less than ten (10) days' notice of all standing committee meetings is posted on the WECC Web site and is also provided to: 1) members of the committee; 2) Participating Stakeholders (if the meeting concerns development or approval of a Reliability Standard or revision); and 3) any WECC Member or member of the public requesting notice. A committee may take up any matter at a duly noticed meeting including matters not expressly identified in the notice; provided, however, that a final recommendation to the Board must be made in accordance with Section 8.5.6.

8.7.2 Other Committees. Notice of other committee meetings will be provided in the manner adopted for such notice by the affected Members and in accordance with the requirements of Section 8.6.1.

8.8 Open Meetings.

All committee meetings of the WECC (including Board committees) will be open to any WECC Member and for observation by any member of the public, except as set forth in policies on closed sessions that the Board may adopt for the purpose of preventing public disclosure of information that the Board might consider in closed session pursuant to Section 7.6.1.

9. The Chief Executive Officer, Officers, and Employees.

9.1 Designation of Officers and Terms of Office.

The WECC will have a Chief Executive Officer, a Secretary, and any other officers specified by the Board from time to time. The Chief Executive Officer will also hold the title of President of the WECC if applicable law requires the WECC to have a President. Each officer will be appointed by the Board and will serve for the term of office specified in the Board action appointing the officer and until his or her successor is appointed. Any two or more offices may be held by the same person except the offices of Chief Executive Officer and Secretary.

9.2 Chief Executive Officer Qualifications.

The Chief Executive Officer will be a person with senior management level experience and knowledge of bulk power electric transmission systems reliability, planning and operations.

9.3 Standards Applicable to All Employees.

A person may not be an officer or employee of WECC if: 1) the person is also the employee of or has a contractual relationship with any Entity, or any Affiliate of any Entity, that is eligible for membership in the WECC; or 2) the person has a financial interest that, in the judgment of the Board or the Chief Executive Officer, creates the fact or appearance of bias, undue influence or lack of objectivity regarding any action or decision of the WECC. The Board will adopt Standards of Conduct for officers and employees setting forth their duty of care, duty of loyalty, duty to avoid conflicts of interest and related matters intended to promote their neutrality, objectivity and professionalism. Upon adoption, such standards shall be attached hereto as Appendix B.

9.3.1 Exemptions from the disqualification criteria found in Section 9.3 are as follows:

9.3.1.1 Status as a residential electricity customer will not disqualify a person from employment with WECC.

9.3.1.2 A candidate for Chief Executive Officer or employee of WECC will not be disqualified for owning shares in a mutual fund because the mutual fund owns an interest in a Member or an Affiliate of a Member.

9.3.1.3 The disqualification standards described in Section 9.3 will not apply to disqualify a candidate who is receiving payments from a pension plan of a Member or an Affiliate of a Member in a form other than securities of such Member or Affiliate if the pension plan payments bear no relationship to the economic performance of the Member or Affiliate.

9.3.2 If an officer or employee receives a gift or inheritance of securities in any Member or Affiliate, he/she must resign or dispose of such securities within six (6) months of the date of receipt. Within six (6) months of the time a new Member is added in which an officer or employee owns securities, the officer or employee will resign or dispose of those securities.

9.4 Employment.

The Chief Executive Officer will be employed by the Board of Directors and will serve at the Board's pleasure. Any contract of employment with a Chief Executive Officer will permit the Board to dismiss the officer with or without cause.

9.5 Chief Executive Officer's Duties.

Subject to the Board's direction, the Chief Executive Officer or his/her designees will have the following duties, among others:

9.5.1 Execute policies at the direction of the Board and be responsible to the Board for the performance of the WECC functions described in Section 2;

9.5.2 Hire and fire staff within the constraints of the annual budget;

9.5.3 Perform administrative duties, such as preparing annual budgets for the approval of the Board, making employment decisions and ensuring conformance with regulatory requirements;

9.5.4 Develop and implement employment policies and standards of conduct; and

9.5.5 Accept or reject membership applications in accordance with the criteria of these Bylaws.

9.6 Secretary's Duties.

9.6.1 Maintain Member and Affiliates Lists. The Secretary will maintain continuously updated lists of all Members and Affiliates.

9.6.2 Maintain Official Records. The Secretary will keep minutes of all WECC Board and Member meetings and will receive and maintain minutes of committee meetings and all other official records of the WECC. Within five (5) business days after any vote taken by Members, the Board, a Class or any committee, the Secretary will provide notice to all Members and Interested Stakeholders (if applicable) of the results of

such a vote through postings on the website, email and/or other means of communication.

9.6.3 Maintain Web Site. The Secretary will oversee the creation, maintenance, and updating of the WECC's Web site and the information published through it.

10. Transmission Service Obligations.

10.1 Non-Discriminatory Transmission Access.

All Members owning, controlling or operating Transmission Facilities, or possessing rights to transmission capacity through contract, will provide interconnection and access to available transmission capacity to all other Members in a non-discriminatory manner through one of the following mechanisms: 1) a Regional Transmission Organization approved by the FERC in accordance with FERC Order 2000 and any successor order(s); 2) submission of an Open Access Tariff to the FERC; or 3) provision of non-discriminatory service in accordance with this Section 10.

10.1.1 Regional Transmission Organizations. A Member that is a Regional Transmission Organization approved by the FERC in accordance with FERC Order 2000 and any successor order(s), or a Member whose transmission capacity is controlled or operated by such a Regional Transmission Organization, will be deemed to be in compliance with Section 10 by virtue of its compliance with FERC Order 2000 and any successor order(s) and is exempt from Sections 10.2 through 10.4. Such a member will use the dispute resolution process specified in the bylaws, contracts, or tariffs of the applicable Regional Transmission Organization or other Local Regional Entity, provided that nothing in these Bylaws will prevent such a Member from using the dispute resolution process set forth in Section 11 where authorized or required by the bylaws, contracts, or tariffs of the applicable Regional Transmission Organization.

10.1.2 Members with Open Access Tariffs Filed with FERC. A Member which is not exempt pursuant to Section 10.1.1, but which has an Open Access Tariff which has been accepted for filing by the FERC, will be deemed to be in compliance with this Section 10 by virtue of its compliance with applicable FERC requirements governing its Open Access Tariff. Such Member is exempt from Sections 10.2 and 10.3; provided, however, that such Member must resolve transmission access disputes with other Member(s) in accordance with Sections 10.4, 10.5.2 and 11 of these Bylaws.

10.1.3 Other Members. Any Member subject to Section 10.1, but not eligible for exemption pursuant to Sections 10.1.1 or 10.1.2, will provide non-discriminatory interconnection and transmission access to other Members in accordance with Sections 10.2 through 10.5 of these Bylaws.

10.1.4 Canadian and Mexican Members. At the request of any Canadian or Mexican Member, the Board may adopt alternative provisions to this Section 10 applicable to the requesting Member provided that: 1) the alternative provisions differ from this

Section 10 to the minimum extent necessary to respect the laws and regulatory authorities governing the requesting Member; and 2) the alternative provisions require the requesting Member to provide interconnection and transmission service to other Members that is substantively equivalent to that required by this Section 10.

10.2 Service to be Provided.

Members described in Section 10.1.3 will provide non-discriminatory interconnection and transmission service to other Members comparable to that which would be required of an entity subject to Sections 210 through 213 of the Federal Power Act. The provision of service may be pursuant to an agreement negotiated between such Members, or, if applicable, pursuant to a service agreement under a tariff filed in accordance with Section 10.3. In no event will these Bylaws require a Member to provide transmission service that FERC is precluded from ordering under Sections 212(g) and 212(h) of the Federal Power Act. However, nothing in these Bylaws will be construed as prohibiting any Member from providing retail wheeling voluntarily or pursuant to a state statute or a lawful decision of a regulatory agency or court of law. Nothing in this section is intended to imply that any non-jurisdictional entity Member is subject to FERC jurisdiction.

10.3 Open Access Tariffs.

Except as provided in Section 10.3.1, Members described in Section 10.1.3 will file an Open Access Tariff or Tariffs consistent with Section 10.2 with the Secretary within sixty (60) days of becoming a Member. Upon the request of any Member, a Member subject to this Section 10.3 will provide a copy of its Open Access Tariff or Tariffs. Additionally, any change in any Open Access Tariff or Tariffs previously filed with the Secretary will be promptly filed with the Secretary after its adoption.

10.3.1 Petition for Exemption. Any Member described in Section 10.1.3 may petition the Board for an exemption from Section 10.3. The Board may grant such petition only if it finds that such Member is unlikely to receive a transmission service request. The granting of such a petition will not relieve the Member from the requirement to provide non-discriminatory access pursuant to Section 10.2 if the Member receives a transmission service request. If a Member has been granted an exemption from the filing of an Open Access Tariff by a Local Regional Entity based on criteria equivalent to this Section, such Member will be exempt from Section 10.3 of these Bylaws without the filing of a petition unless the Board determines otherwise.

10.4 Requests Involving Members of Regional Entities.

If a request for transmission service involves only Members who are also members of the same Local Regional Entity and the tariffs or governing documents of such Local Regional Entity provide for a process for requesting interconnection or transmission service, the process of the Local Regional Entity, as opposed to that set forth in this Section 10, will be followed. To the extent the governing documents of the Local Regional Entity establish different principles regarding the provision of interconnection or transmission service than those of the WECC, the principles of the Local Regional Entity will govern as among members of the Local Regional Entity; provided, however, that Members who are members of Regional Entities who receive requests for interconnection or transmission service from

Members who are not members of the same Local Regional Entity will not be precluded from substantively responding to such requests in a manner consistent with the tariffs or governing documents of such Local Regional Entity, provided that such responses will be subject to the dispute resolution provisions of Section 11.

10.5 Request Process and Dispute Resolution.

Members requesting interconnection or transmission service from Members described in Section 10.1.1 or 10.1.2 will do so in accordance with the applicable tariffs of the Member receiving the request. Members requesting such service from Members described in Section 10.1.3 will do so in accordance with this Section 10.5 in lieu of filing for such service pursuant to Sections 210 through 213 of the Federal Power Act.

10.5.1 Request Process and Interpretation of FERC Policy. Members described in Section 10.1.3 receiving requests from another Member for interconnection or transmission service pursuant to these Bylaws will respond to such requests in an expeditious and good faith manner. The Board may adopt procedural requirements regarding the processing of such requests to the extent it deems necessary and appropriate; provided, however, that the Board may not impose substantive obligations for the provision of interconnection or transmission service that are different from the substantive policies of the FERC applicable to such Members pursuant to Section 10.2. For the general guidance of arbitrators and Members and as it deems necessary, the Board may either request statements of policy from the FERC or adopt its own interpretations of FERC policy which will be subject to appeal to the FERC.

10.5.2 Dispute Resolution. Except as otherwise provided in Section 10.4, Members described in Sections 10.1.2 and 10.1.3, and any Member requesting interconnection or transmission service from such a Member, will resolve disputes regarding such requests in accordance with Section 11.

11. Dispute Resolution.

Except as may be otherwise provided herein, and subject to the conditions set forth in Appendix C, Section A.1, disputes between Members and/or the WECC will be resolved pursuant to the WECC Dispute Resolution Procedures set forth in Appendix C. Matters subject to the jurisdiction of the WECC Compliance Hearing Body are not subject to the procedures in Appendix C.

12. Costs and Finances.

12.1 Funding of Reliability Activities.

12.1.1 U.S. Statutory Funding. The WECC shall fund all activities undertaken pursuant to Section 215 of the Federal Power Act in accordance with the funding provisions and procedures of that law and related FERC regulations and orders. The Board shall approve a budget for such activities in time for submission to the ERO and to the FERC for approval of such funding in accordance with applicable requirements.

12.1.2 International Funding. The WECC shall fund reliability activities undertaken pursuant to any agreements with appropriate Canadian or Mexican authorities in accordance with the provisions of those agreements.

12.1.3 Equitable Allocation of Funding. In adopting budgets for the costs of reliability activities, the Board shall endeavor to achieve an equitable allocation as between funding through Sections 12.1.1 and 12.1.2 based upon the net energy to load and other relevant factors consistent with applicable law, the Delegation Agreement and any International Reliability Agreements.

12.2 Dues.

The Board may require Members and Participating Stakeholders to pay nominal annual dues consistent with applicable FERC requirements (or those of International Reliability Agreements as applicable) to cover reasonable costs of membership and/or participation in standards development that are not funded through Sections 12.1.1 or 12.1.2. Initial dues of a Member or Participating Stakeholder will be submitted with a completed application for membership or Participating Stakeholder status and will be for the prorated share of the full annual amount based on the Member's or Participating Stakeholder's actual months of membership or participation in the calendar year. In determining nominal dues, the Board may consider all relevant factors including, but not limited to, the ability of different classes of membership or Participating Stakeholders to pay such dues. The Board may also reduce, defer or eliminate the dues obligation of an individual Member or Participating Stakeholder for good cause shown.

12.3 Funding of Non-Statutory Activities.

To the extent that the WECC elects to fund any activities not eligible for funding pursuant to Sections 12.1.1 and 12.1.2, it shall do so through the use of service fees, charges or dues applicable to the persons or entities that voluntarily participate in such activities. Participation in or funding of such activities shall not be a condition of membership in the WECC.

13. Amendments to these Bylaws.

These Bylaws may be amended by either the Board or by the Members in accordance with the following procedures.

13.1 Amendment by the Board.

Except for those provisions described below, the Board may approve an amendment of the Bylaws after providing not less than thirty (30) days' notice of the proposed amendment to all Members. Approval of such an amendment requires the affirmative votes of not less than two-thirds (2/3) of the Directors in office. Such amendment will become effective sixty (60) days after its approval by the Board unless the vote is appealed to the Members prior to that time. Such an appeal will occur whenever a majority of any Class files a petition with the Secretary seeking such amendment. A vote on the appeal will occur at the next Annual Meeting unless the Board calls a special meeting of the Members beforehand. Upon appeal, the amendment will be deemed approved unless a majority of all Members vote to rescind the amendment. Notwithstanding the foregoing, the Board may not amend Sections 6.2 through 6.10 of the Bylaws, Section 8.4, Appendix C or this Section 13.1 without submitting such amendment to the Members for their prior approval.

13.2 Amendment by the Members.

Upon petition filed with the Secretary by any Member or Director, at any Annual Meeting the Members may amend any provision of these Bylaws; provided: 1) the proposed amendment has first been presented to the Board and not adopted (this provision will not apply to amendments which the Board is prohibited from adopting); 2) Members have received not less than sixty (60) days' notice of the proposed amendment, the reasons there for and a statement of the Board's position regarding it; and 3) the amendment receives the affirmative votes of not less than two-thirds (2/3) of all Members.

13.3 Amendments in Response to Mandatory Membership.

If at any time, pursuant to legislation or otherwise, membership becomes mandatory for some or all Members, upon the request of the affected Member(s) the Board will consider amendments to these Bylaws appropriate to such mandatory membership.

13.4 Amendments proposed by FERC.

FERC, upon its own motion or upon complaint, may propose an amendment to these Bylaws pursuant to 18 C.F.R. § 39.10(b).

14. Termination of Organization.

The WECC may be terminated upon a vote of a majority of the Members in accordance with the provisions of Utah law, the Federal Power Act and the requirements of the Delegation Agreement and applicable International Reliability Agreements. Immediately upon such a vote, the Board will, after paying all debts of the WECC, distribute any remaining assets in accordance with the requirements of Utah law, the Internal Revenue Code and these Bylaws.

15. Miscellaneous Provisions.

15.1 Limitation on Liability.

It is the express intent, understanding and agreement of the Members that the remedies for nonperformance expressly included in Section 4.8 hereof shall be the sole and exclusive remedies available hereunder for any nonperformance of obligations under these Bylaws. Subject to any applicable state or federal law which may specifically limit a Member's ability to limit its liability, no Member, its directors, members of its governing bodies, officers or employees shall be liable to any other Member or Members or to third parties for any loss or damage to property, loss of earnings or revenues, personal injury, or any other direct, indirect, or consequential damages or injury which may occur or result from the performance or nonperformance of these Bylaws, including any negligence, gross negligence, or willful misconduct arising hereunder. This Section 15.1 of these Bylaws applies to such liability as might arise between Members under these Bylaws. This Section 15.1 does not apply to parties to the Agreement Limiting Liability Among Western Interconnected Systems ("WIS Agreement") with respect to matters covered by the WIS Agreement and does not apply to any liability provision in any other agreement.

15.2 Indemnification.

WECC shall indemnify and hold harmless its Directors, officers, employees, agents and advisors against any and all damages, losses, fines, costs and expenses (including attorneys'

fees and disbursements), resulting from or relating to, in any way, any claim, action, proceeding or investigation, instituted or threatened, arising out of or in any way relating to any action taken or omitted to have been taken (or alleged to have been taken or omitted to have been taken) by such person in connection with actions on behalf of WECC, and against any and all damages, losses, fines, costs and expenses (including attorneys' fees and disbursements) incurred in connection with any settlement of any such claim, action, proceeding or investigation unless such action of such person is determined to constitute fraud, gross negligence, bad faith or willful misconduct with respect to the matter or matters as to which indemnity is sought.

15.3 No Third Party Beneficiaries.

Nothing in these Bylaws shall be construed to create any duty to, any standard of care with reference to or any liability to any third party.

15.4 Informal Inquiries for Information.

Nothing in these Bylaws shall preclude: 1) a Member from making an informal inquiry for information outside of the procedures outlined in Section 4.6.13 hereof to another Member and 2) that other Member from responding voluntarily to that informal inquiry, provided, however, that any such response to an informal inquiry for information shall not be binding upon that other Member and shall be used by the Member making the informal inquiry for informational purposes only.

16. Incorporation.

WECC shall organize itself as a non-profit corporation pursuant to the laws of the state of Utah regarding non-profit corporations under the name "Western Electricity Coordinating Council." All Members agree to take no actions that would contravene the ability of the WECC to maintain its status as a non-profit corporation existing pursuant to the Utah Act. The Board shall adopt these Bylaws as the Bylaws of the WECC as a non-profit corporation.

WECC is intended to qualify as an organization described in Section 501(c)(6) of the Internal Revenue Code. No part of any net earnings of the WECC shall inure to the benefit of any Member or individual. Upon liquidation, to the extent consistent with the Internal Revenue Code and Utah law, any monies remaining from assessments paid by Members for the costs of the WECC shall be rebated to Members in proportion to their payments. Any remaining assets of the WECC shall be transferred to another organization exempt from tax under Section 501(a) of the Internal Revenue Code, or government agency, promoting the same purposes as the WECC, as designated by the Board.

17. Governing Law.

Unless otherwise agreed, if any conflict of law arises under these Bylaws among the Members, the laws of the United States of America shall govern, as applicable. The venue for any legal action initiated under these Bylaws which concerns a specific request for transmission service shall be the city and state (or province) in which the headquarters of the Member providing the service is located. The venue for any other legal action initiated under these Bylaws shall be the city and state (or province) in which the headquarters of the WECC is located.

- C. WECC Dispute Resolution Procedures

Appendix A
Standards of Conduct for
Members of the WECC Board of Directors

By accepting appointment to the Board of Directors (the "Board") of the Western Electricity Coordinating Council (the "WECC"), a Director agrees to abide by the duties required of corporate directors and trustees. Utah law (and similar law in other states) imposes quasi-fiduciary duties of care and loyalty on all corporate directors or trustees, including directors and trustees of nonprofit corporations. For as long as he or she remains a member of the Board of Directors of the WECC, a Director will abide by the following standards of conduct.

- I. Duty of care. The Directors of a corporation are bound to use due care and to be diligent in respect to the management and administration of the affairs of the corporation. This duty of care is generally thought to have two components: the time and attention devoted to corporate affairs and the skill and judgment reflected in business decisions.
 - A. Each Director will regularly attend Board of Directors meetings, digest the materials sent to him or her, participate in Board discussions and make independent inquiries as needed.
 - B. In voting on any matter before the Board or otherwise acting in his or her capacity as a Director, each Director will:
 1. make reasonable inquiry to inform himself or herself of the nature and consequences of the matter or action at issue;
 2. exercise, at a minimum, the degree of care, skill, and diligence that an ordinarily prudent business person would exercise under similar circumstances; and
 3. act in a manner the Director, in the exercise of his or her independent judgment, believes to be in the best interests of the WECC and the membership of the WECC, taken as a whole.
 - C. In exercising the duty of care described in paragraphs IA and B above, a Director has the right to rely on statements by the persons immediately in charge of business areas of the WECC, to rely on professionals and experts (such as engineers, accountants and lawyers) and to rely on committees of the WECC, unless facts or circumstances appear which would prompt further concerns of the ordinarily prudent person.
- II. Duty of loyalty. The duty of loyalty imposes on a Director the obligation to remain loyal to the WECC, acting at all times in the best interests of WECC and its Members as a whole and unhampered by any personal pecuniary gain. This duty does not preclude a Director from being employed in a competing or related business so long as the Director acts in good faith and does not interfere with the business of the WECC.
 - A. Each Director will carry out his or her duties as a Director in good faith.

- B. Each Director will refrain from using any influence, access, or information gained through his or her service as a Director to confer any improper personal benefit (financial or otherwise) upon himself or herself, any family member, or any person living in the Director's household.
- C. Each Director will refrain from using any influence, access, or information gained through his or her service as a Director to confer an improper benefit (financial or otherwise) on any organization:
 - 1. for which the Director serves as an officer, director, employee, consultant, or in any other compensated or management position; or
 - 2. in which the Director or any family member or person living in the Director's household has a material financial interest (whether as a shareholder, partner, or otherwise).
- D. To the extent permitted by law, each Director will maintain the confidentiality of:
 - 1. any confidential or proprietary information of the WECC disclosed or available to the Director;
 - 2. any confidential or proprietary information of WECC Member(s) to which the Director has access by virtue of his or her status as Director; and
 - 3. any confidential or proprietary information of third parties that has been provided to the WECC or the Board on condition of confidentiality.
- E. Conflicts of Interest. Because conflicts of interest may arise from time to time, specific guidelines are provided. In general, conflicts of interest involving a Director are not inherently illegal nor are they to be regarded as a reflection on the integrity of the Board or of the Director. It is the manner in which the Director and the Board deal with a disclosed conflict that determines the propriety of the transaction.

Directors of nonprofit corporations may have interests in conflict with those of the corporation. The duty of loyalty requires that a Director be conscious of the potential for such conflicts and act with candor and care in dealing with these situations.

The following are guidelines for Directors with actual or potential conflicts of interest:

- 1. Each Director has a responsibility to recognize potential conflicts of interest and to be guided when acting as a Director by his or her independent judgment of what is in the best interests of the WECC and the membership of the WECC, taken as a whole. If any Director has questions about whether a conflict of interest exists, he or she may make inquiry to the Chief Executive Officer of the WECC for advice.

2. Potential conflicts of interest may arise because of a Director's private, individual interests (personal conflicts of interest) or because of relationships the Director may have with other organizations or interest groups (organizational conflicts of interest). Current or past employment or other compensation-based relationships with one or more WECC Members are examples of potential organizational conflicts of interest. Whether a potential conflict of interest is personal or organizational, in all cases involving WECC affairs a Director's conflicting interests are subordinate to those of the WECC and the membership of the WECC, taken as a whole.
3. Personal conflicts of interest.
 - a. Personal conflicts of interest exist if a Director, a member of the Director's family, or a person sharing the Director's household: 1) has a material financial interest in a matter or transaction that comes before the Board for action; or 2) stands to receive a benefit (in money, property, or services) from a transaction involving the WECC to which the person is not legally entitled.
 - b. In cases of personal conflicts of interest, the affected Director's obligations are to:
 - (1) disclose to the Board, before the Board acts with respect to that matter, the material facts concerning the Director's personal conflict of interest; and
 - (2) refrain from voting, and from attempting to influence the vote of any other Director(s), in those matters in which the Director has a personal conflict of interest.
4. Organizational conflicts of interest.
 - a. An organization has a "direct" conflict of interest if a decision by the Board would confer material benefits on that organization that other WECC Members would not share, or impose material detriments or costs on that organization that other WECC Members would not share. The fact that many if not all Members are affected to some extent by Board decisions on core issues such as standards, new transmission lines and their ratings, does not create or constitute a "direct" conflict of interest.
 - b. It is not a "direct" conflict of interest for a Director to be associated with an organization or an interest group that may stand to benefit from decisions made or actions taken by the Board, so long as the Director does not attempt to use his or her position as a Director to confer special benefits on associated organizations or interest groups when other WECC Members would not share in those benefits.

- c. In cases of potential “direct” organizational conflicts of interest, the affected Director’s obligations are to:
- (1) disclose to the Board, before the Board acts with respect to the matter, the material facts concerning the organizational conflict of interest; and
 - (2) refrain from voting and from attempting to influence the vote of any other Director(s) with respect to the proposed action or decision.

Appendix B
Officers and Employee
Standards of Conduct

By accepting employment with the Western Electricity Coordinating Council (the "WECC"), an Employee agrees to abide by these Standards of Conduct. For the purpose of these Standards, an Employee includes each and all officers, employees and substantially full-time consultants and contractors of the WECC.

- I. Duty of care. The Employees of the WECC are bound to use due care and to be diligent in respect to the management and administration of the affairs of the corporation. This duty of care is generally thought to have two components: the time and attention devoted to corporate affairs and the skill and judgment reflected in business decisions.

Employees shall not have any outside employment that limits in any way their ability to fulfill their employment responsibilities to WECC. If an Employee has any question about whether outside employment is consistent with this standard, they should consult with their supervisor.

- II. Duty of loyalty. The duty of loyalty imposes on an Employee the obligation to remain loyal to the WECC, acting at all times in the best interests of WECC and its Members as a whole and unhampered by any personal pecuniary gain. The WECC expects all Employees to avoid adversely affecting the public's confidence in the integrity and reputation of the WECC. Any conduct or activities of any Employee should be capable of being justified and withstanding public scrutiny.

- A. Each Employee will carry out his or her duties as an Employee in good faith, with integrity and in a manner consistent with these Standards and all applicable laws governing the WECC.
- B. Each Employee will refrain from using, or creating the appearance of using, any influence, access, or information gained through his or her service as an Employee to confer any improper personal benefit (financial or otherwise) upon himself or herself, or Family Member.¹ Employees shall not accept gifts or entertainment that would tend to affect, or give the appearance of affecting, the performance of their duties; provided, however, that Employees may accept de minimus food or entertainment or non-cash gifts received as part of a social or special occasion in amounts not to exceed \$1000 per source per year.
- C. Each Employee will refrain from using, or creating the appearance of using, any influence, access, funds or information gained through his or her service as an Employee to confer an improper benefit (financial or otherwise) on any organization. The

¹ For purposes of these Standards, a Family Member includes a spouse, domestic partner, child of the Employee, or a relative living in the same home as the Employee.

obligation to avoid the appearance of impropriety shall apply in particular to any organization:

1. for which the Employee is serving or has in the past served as an officer, director, employee, consultant, or in any other compensated or management position; or
 2. in which the Employee, or Family Member has a material financial interest known to the Employee (whether as a shareholder, partner, or otherwise).
- D. Employees shall not use their WECC position, WECC funds or WECC resources to support any political party, candidate or proposition except as expressly authorized by the Board.
- E. To the extent permitted by law, each Employee shall maintain the confidentiality of:
1. any confidential or proprietary information of the WECC disclosed or available to the Employee;
 2. any confidential or proprietary information of WECC Member(s) to which the Employee has access by virtue of his or her status as Employee; and
 3. any confidential or proprietary information of third parties that has been provided to the WECC or the Board on condition of confidentiality.
- F. Conflicts of Interest. The following conflicts of interest policy shall apply to all WECC Employees. Conflicts of interest may arise from time to time. In general, conflicts of interest involving an Employee are not inherently illegal, nor are they to be regarded as a reflection on the integrity of the WECC or of the Employee. It is the manner in which the Employee and the WECC deal with a disclosed conflict that determines the propriety of the transaction. The following are guidelines for Employees with actual or potential conflicts of interest:
1. In general, personal conflicts of interest exist if an Employee, or a Family Member, has a material financial interest in a matter or transaction that comes before WECC for action, or stands to receive a benefit (in money, property, or services) from a transaction involving WECC to which the person is not legally entitled. For purposes of determining whether stock constitutes a material financial interest, see Paragraph F(6) below.
 2. Organizational conflicts of interest exist if an Employee, or a Family Member, has a relationship with an organization or interest group that would cause a reasonable person to believe such Employee's judgment, loyalty, or objectivity might be influenced in a way that is adverse to the interests of WECC.
 3. Where there is any question about potential conflicts of interest, the Employee shall disclose to the Chief Executive Officer as soon as possible and prior to when

WECC takes action with respect to that matter, the material facts concerning the Employee's personal conflict of interest, and refrain from participating in, or from attempting to influence the action of any Directors or Employee(s) of WECC regarding those matters in which the Employee has a conflict of interest.

4. No Employee may be an employee, director of, or consultant to or provide services to or be associated in any way with any WECC Member without full disclosure to, and written consent of, the Chief Executive Officer. To the extent that an Employee becomes aware that a Family Member is or will in the future be engaged in activity described in this Paragraph F(4), the Employee shall promptly notify the Chief Executive Officer, who shall review all the material facts and determine whether they constitute a conflict of interest pursuant to Paragraphs F(1) and F(2), above.
5. No Employee shall participate in any electric energy transaction other than for ordinary personal use except to the extent necessary to, and consistent with, the functions of WECC. Participation in an energy transaction includes, but is not limited to, purchasing, selling, marketing, or brokering of electricity, ancillary services, electricity transmission or electricity distribution. To the extent that an Employee becomes aware that a Family Member is or will in the future be engaged in activity described in this Paragraph F(5), the Employee shall promptly notify the Chief Executive Officer who shall review all the material facts and determine whether they constitute a conflict of interest pursuant to Paragraphs F(1) and F(2), above.
6. All Employees shall promptly disclose to the CEO and the Chair of the Board any direct or indirect financial interest in excess of \$5,000 (including the direct or indirect ownership of securities) held by the Employee or a Family Member living with the Employee² in any Electric Line of Business entity as defined in Section 3.15 of the Bylaws doing business in the Western Interconnection. Upon such disclosure, the CEO and the Chair of the Board shall determine whether such financial interest constitutes a conflict of interest, or the appearance thereof, in light of the duties of the Employee, the ability to divest such financial interest without undue hardship and the totality of the circumstances. In response to such disclosure, the CEO and the Chair may impose such remedies as are reasonable under the circumstances and consistent with section 9.3 of the Bylaws. Such remedies may include, but are not limited to, restrictions on the Employee's duties or involvement in certain matters, transfer of the Employee to another position, broader disclosure of the financial interest, voluntary or mandatory divestiture of the interest (in whole or in part) or other remedies. Pursuant to section 9.3.2 of the Bylaws, if an Employee (not a Family Member) receives a gift or inheritance of securities

² Nothing in this section shall require an Employee to investigate the financial interests of Family Members not living with the Employee. However, to the extent known to the Employee, the financial interests of a Family Member not living with the Employee may create a potential conflict of interest (or appearance thereof) subject to Sections II(B) and/or II(F)(1) of these standards, in which case disclosure pursuant to Section II(F)(3) is appropriate.

of a Member of the WECC, or if a new Member joins the WECC in which the Employee (not a Family Member) holds securities, the Employee must resign or divest such securities within six months thereafter. For the purposes of this section, none of the following shall constitute a direct or indirect financial interest:

- a. An interest that exists through diversified mutual funds;
- b. An interest that exists for six months following receipt of a gift or inheritance of securities of a Market Participant or acceptance of employment with the WECC, whichever is later (provided that employees of the WSCC shall have two years from the WECC organizational meeting to divest securities in their possession as of that date);
- c. An interest that exists through a pre-existing participation in a qualified defined benefits pension plan or health benefits plan of a Market Participant so long as the benefits under such plan do not vary with the economic performance or value of the securities of such Market Participant.

Appendix C

WECC Dispute Resolution Procedures

C. DISPUTE RESOLUTION.

C.1 Obligation To Comply with Dispute Resolution Procedures. If any dispute concerning one or more issues identified in Section C.2 below arises between a Member and one or more other Members, or between one or more Members and WECC, all of the parties to the dispute shall, to the extent permitted by law, be obligated to comply with the dispute resolution procedures specified in these Bylaws (except to the extent all of the parties to the dispute may agree otherwise as provided in Section C.4 below). Only Members and WECC have the right to invoke the provisions of this Appendix C and, except where all affected parties have separately agreed otherwise with respect to a particular dispute, only Members and WECC are obligated to carry out the dispute resolution procedures set forth herein. Any dispute subject to the provisions of this Appendix C to which WECC is made a party shall be subject to the additional requirements specified in Section C.3 below if the dispute is initiated by a party other than WECC. To the extent permitted by law (and except as otherwise permitted by the provisions of Section C.6.3), no party to a dispute subject to the provisions of this Appendix C may pursue any other available remedy with respect to the dispute until all of the parties to the dispute have fully complied with the dispute resolution procedures specified herein, *provided, however*, that if any party to a dispute subject to the provisions of this Appendix C refuses to comply with the dispute resolution procedures specified herein, all other parties to the dispute shall subsequently be relieved of any further obligation to comply with these dispute resolution procedures before pursuing other remedies in connection with that dispute.

C.2 Issues Subject to Dispute Resolution Procedures. Any dispute between or among the parties identified in Section C.1 above (that the parties to the dispute do not resolve through negotiations between or among themselves) shall be subject to the dispute resolution procedures set forth in this Appendix C if the dispute concerns: (i) the application, implementation, interpretation, or fulfillment of any guidelines, criteria, policies, procedures, or Bylaws of WECC or the North American Electric Reliability Council (or any successor organization); or (ii) any matter specified in Section C.6.2 below; except that any matter that is subject to the jurisdiction of the WECC Compliance Hearing Body is not subject to the requirements of this Appendix C. Notwithstanding the foregoing provisions of this Section C.2, however, neither WECC nor any Member shall be obligated to comply with the dispute resolution procedures of these Bylaws if: (a) the matter in dispute falls within the scope of the dispute resolution procedures set forth in the governing agreements of the Western Regional Transmission Association, the Southwest Regional Transmission Association, or the Northwest Regional Transmission Association to the extent that such organizations continue to exist; (b) the dispute is between two or more Members (or WECC), all of which, at the time of the dispute, are parties to the WECC Reliability Management System Agreement and the matter is within the scope of the dispute resolution procedures set forth in that agreement; or (c) the dispute is between two or more Members, all of which, at the time of the dispute, are parties to a separate agreement or treaty or where an applicable tariff, rate schedule, or other legal obligation of one of the parties provides for the parties to resolve the dispute in a manner other than in accordance with the provisions of this Appendix C of the Bylaws. With regard to a transmission access matter pursuant to Sections 10.1.2, 10.1.3, 10.5 and C.6.2.3, however, members agree that their rights and obligations pursuant to

Sections 210 and 211 of the FPA shall not by themselves supersede or relieve them of their obligation, if any, to participate in the procedures set forth in this Appendix C.

C.3 Limitations on Members' Rights To Make WECC a Party to a Dispute. In addition to the other provisions of this Appendix C of the Bylaws, any dispute (other than a dispute initiated by WECC) to which WECC is made a party shall be subject to the limitations set forth in Sections C.3.1 and C.3.2 below.

C.3.1 Bases for Using Dispute Resolution Procedures To Challenge WECC Action.

Subject to any limitation set forth in these Bylaws or in applicable statute, regulation or FERC order, one or more Members may use the dispute resolution procedures specified in this Appendix C to challenge any final action of WECC only on one or more of the following bases: (i) the action is contrary to applicable law or regulation; (ii) the action is contrary to WECC's Articles of Incorporation or these Bylaws (including WECC's purposes as set forth in those documents); (iii) the action was taken in violation of applicable procedures of WECC governing that action; or (iv) the action encompasses a decision in which there was plain error material to the decision. For purposes of this Appendix C, action taken by WECC shall be deemed final if: (a) the action has been taken or adopted or approved or accepted by WECC's Board of Directors (other than by a motion specifically providing that the action is conditional or will have temporary application not to exceed six months); (b) all conditions specified to make any conditional action of WECC's Board of Directors effective have been fulfilled; or (c) the action has been taken or adopted or approved or accepted by a committee, subcommittee, task force, or other group or person acting under authority of WECC without any provision making the action

subject to further approval or adoption or acceptance by the Board of Directors. Nothing contained in this Appendix C shall limit any rights any Member (or any other party) may have under applicable law or regulation to initiate or participate in an administrative or legal action to which WECC is made a party in accordance with applicable provisions of law or regulation.

C.3.2 Obligation to Bear WECC's Share of Facilitator Costs. If one or more Members initiate a dispute under this Appendix C to challenge an action of WECC, the Member(s) initiating the challenge shall be obligated to bear all of the costs of facilitators' services incurred to comply with the requirement of Section C.5 below, except to the extent WECC agrees to pay a share of the costs of facilitators' services.

C.4 Ability to Modify Dispute Resolution Procedures by Agreement. Any provision of the dispute resolution procedures set forth in this Appendix C may be modified, waived, or omitted by agreement of all of the parties to the dispute. Parties to a dispute subject to these provisions are obligated to comply with its procedures unless all of the parties to the dispute agree to do otherwise. The manner in which the dispute resolution procedures set forth in this Appendix C may be varied include (by way of example and not as limitation): the manner of selecting a facilitator or arbitrator; the procedures or time lines to be followed during mediation or arbitration; the grounds or forum or right to appeal an arbitrator's decision; the manner of allocating fees and costs associated with the dispute; whether the parties are obligated to proceed to arbitration if the dispute is not resolved through mediation; and whether a decision rendered through arbitration is binding on the parties. In addition, any dispute that does not fall within the scope specified in Section C.2 above may

be resolved according to the procedures set forth in Appendix C of these Bylaws if all of the parties to the dispute agree to do so.

C.5 Mediation.

C.5.1 Notice to Other Parties and WECC's Chief Executive Officer. To initiate the dispute resolution process with respect to a dispute governed by the provisions of this Appendix C, the Member or WECC that has elected to initiate the dispute shall deliver to all other parties to the dispute and to WECC's Chief Executive Officer (whether or not WECC is a party to the dispute) written notice invoking the dispute resolution procedures set forth in this Appendix C (a "Dispute Notice").

C.5.1.1 The Dispute Notice shall: (i) include a brief, general description of the matter(s) in dispute; (ii) include a complete list of all other Members the party submitting the Dispute Notice intends to make a party to the dispute; and (iii) state whether or not WECC is to be made a party to the dispute.

C.5.1.2 Within five business days of receiving a Dispute Notice, any party to the dispute may elect to deliver a brief supplemental description of the dispute to WECC's Chief Executive Officer.

C.5.1.3 Within 10 business days of receiving an initial Dispute Notice, WECC's Chief Executive Officer shall: (a) publish (or cause to be published) in WECC's newsletter or on its electronic bulletin board a notice containing a list of the parties to the dispute and a summary of the descriptions of the matter(s) in dispute provided by the parties to the dispute; and (b) deliver to each party to the dispute a copy of WECC's then-current standing list of

qualified facilitators, knowledgeable in the matters addressed by WECC (as approved by the Board of Directors).

C.5.1.4 No person may be listed on WECC's standing list of qualified facilitators unless the person has agreed to: (i) disclose, at any time the person is selected to serve as a facilitator under this Appendix C, any personal or financial interest the facilitator may have with respect to the matter(s) in dispute (including any indirect personal or financial interest that could arise because of interests or relationships affecting any of the facilitator's immediate family members); (ii) disclose any relationship the facilitator may have with any party to the dispute that is not permitted under Section C.5.2 below; and (iii) abide by all applicable provisions of these Bylaws, including restrictions on disclosure of matters discussed and information exchanged during mediation as provided in Section C.5.3 below.

C.5.2 Selection of a Facilitator. Within 10 calendar days after the delivery of a Dispute Notice, the parties to the dispute shall select a neutral facilitator by mutual agreement. If the parties to the dispute cannot agree on a facilitator within 10 calendar days after delivery of a Dispute Notice, the facilitator shall be selected from WECC's standing list of qualified facilitators as follows: The parties to the dispute shall take turns striking names from WECC's standing list of qualified facilitators until there is only one name remaining. (The parties to the dispute shall draw lots to determine the order in which they take turns striking names.) The last person whose name remains on the list shall serve as the facilitator. No facilitator other than a facilitator chosen by agreement of all the parties to the dispute may (i) have a

personal or financial interest in the matter(s) in dispute (including any indirect personal or financial interest that could arise because of interests or relationships affecting any of the facilitator's immediate family members); or (ii) be (or have an immediate family member who is) a past or present director, commissioner, officer, employee, consultant, agent, or other representative of any of the parties to the dispute. If the facilitator selected through the process of striking names specified above is disqualified under the preceding sentence, the facilitator whose name was stricken last shall serve in his or her place. In addition, if WECC is a party to a dispute initiated by one or more Members, turns striking names from the standing list of qualified facilitators shall alternate between WECC on the one hand and all other parties to the dispute on the other.

C.5.3 Mediation Process. The facilitator and representatives of all of the parties to the dispute shall meet within 14 calendar days after the facilitator has been selected and attempt in good faith to negotiate a resolution to the dispute. Each party's representative designated to participate in the mediation process must have the authority to settle the dispute (or, at a minimum, be authorized to negotiate on behalf of the party and make recommendations with respect to settlement of the dispute if final authority to approve a settlement is reserved to a party's board, executive committee, commission, or other governing body). At the parties' initial meeting with the facilitator, the facilitator shall, after soliciting input from the parties to the dispute, set the schedule for further meetings among the parties to the dispute (subject to the 60-day maximum mediation period specified in Section C.5.6 below). The parties to the dispute shall comply with the schedule set by the facilitator and attempt in good faith at every meeting to negotiate a resolution to the dispute. To the

extent permitted by law, neither the facilitator nor any party to the dispute may publicly disclose, rely on, or introduce as evidence in any subsequent arbitration, FERC proceeding, Canadian Regulatory Authority proceeding, proceeding before a Mexican Regulatory Authority, appeal, or litigation concerning the same or any related dispute: (i) any views expressed or suggestions made by another party to the dispute with respect to a possible settlement of the dispute; (ii) admissions made by another party to the dispute in the course of the mediation proceedings; (iii) proposals made or views expressed by the facilitator; or (iv) the fact that another party to the dispute has or has not indicated willingness to accept a proposal for settlement made by the facilitator. In those cases in which a party to a dispute subject to the provisions of this Appendix C of the Bylaws is a membership organization (including WECC, if applicable), nothing in the preceding sentence shall prohibit that organization from reasonably communicating with its members and governing body to share general information about the dispute, such as the parties, status, disputed issues, and positions of each of the parties with respect to the disputed issues.

C.5.4 Referral for Resolution. With the consent of all parties to the dispute, a resolution may include referring the matter to a technical body (such as a technical advisory panel of WECC) for resolution or an advisory opinion, to arbitration, directly to FERC or, in a dispute involving a Canadian Member, directly to the appropriate Canadian Regulatory Authority, or, in a dispute involving a Mexican Member, directly to the appropriate Mexican Regulatory Authority.

C.5.5 Mediation Participation by WECC Staff When WECC Not a Party. If, during the course of mediation to which WECC is not a party, the facilitator or any party to the dispute wishes to solicit the views of WECC concerning the application,

implementation, interpretation, or fulfillment of any guidelines, criteria, standards, policies, or procedures of WECC, the facilitator may request or permit the submission of WECC staff views only if: (i) any participation by WECC staff takes place exclusively in the presence of all parties to the dispute; (ii) participating WECC staff members agree to be equally available upon request to all parties to the dispute; and (iii) participating WECC staff members agree to comply with the restrictions on disclosure contained in Section C.5.3.

C.5.6 Mediation Deemed at Impasse After 60 Days. If the parties to the dispute have met and negotiated in good faith in accordance with the schedule set by the facilitator but have not succeeded in negotiating a resolution of the dispute within 60 calendar days after the first meeting with the facilitator pursuant to Section C.5.3 above, the parties to the dispute shall be deemed to be at impasse and, except as otherwise provided in Section C.5.6.2 below, shall also be deemed to have fulfilled their obligations under Section C.1 of these Bylaws to fully comply with the dispute resolution provisions before pursuing any other available remedy. If any party participating in the mediation process is subject to a contractual or statutory limitations period with respect to the matter in dispute, and the limitations period will expire before the 60-day period for mediation under this Section C.5.6 is completed, then the parties shall be deemed at impasse on the seventh calendar day preceding the expiration of the shortest applicable limitations period.

C.5.6.1 Disputes Not Subject to Provisions of Section C.6.2. Unless the matter in dispute is subject to the provisions of Section C.6.2 below, at any time after the parties to the dispute are deemed at impasse, the dispute may be submitted to binding arbitration in accordance with the procedures set forth in Section C.7 of these Bylaws (but only by agreement of all of the parties to the dispute). If the matter in dispute is subject to the provisions of

Section C.6.2 below, the parties' obligations with respect to submitting the matter to binding arbitration under Sections C.6 and C.7 of these Bylaws shall be as specified in Section C.5.6.2 below. In all other cases, if the parties to the dispute do not agree to submit the dispute to binding arbitration in accordance with the procedures set forth in Section C.7 of these Bylaws, any party to the dispute may at any time thereafter pursue any other remedy available under regulation, law, or equity (subject to the restrictions on disclosure set forth in Section C.5.3 above).

C.5.6.2 Disputes Covered by Section C.6.2. If the parties to a dispute concerning a matter subject to the provisions of Section C.6.2 either: (i) are deemed at impasse after attempting to resolve the matter through mediation as provided in Sections C.5.1 through C.5.6 above; or (ii) have agreed to submit the matter directly to binding arbitration without attempting to resolve the matter through mediation as provided in Sections C.5.1 through C.5.6 above, the parties to the dispute shall submit the matter to binding arbitration in accordance with the procedures set forth in Sections C.6 and C.7 of these Bylaws.

C.5.7 Costs of Facilitator's Services. Except as otherwise provided under Section C.3.2, the costs of the facilitator's services shall be born equally by all parties to the dispute unless the parties to the dispute agree otherwise, but the parties also intend that the costs of mediation should be taken into account in any resolution proposed through the mediation process.

C.5.8 Notice to WECC of Completion of Mediation. Within 10 calendar days after either: (i) reaching a negotiated resolution through the mediation process set forth in Section C.5; or (ii) reaching deemed impasse in accordance with Section C.5.6 above, the parties to the dispute shall jointly deliver to WECC's Chief Executive Officer a written notice briefly describing the outcome of the mediation process. Promptly

after receiving written notice describing the outcome of a mediation conducted in accordance with Section C.5, WECC's Chief Executive Officer shall publish (or cause to be published) in WECC's newsletter or on its electronic bulletin board a brief description of the outcome of the mediation, together with a list of all of the parties to the dispute.

C.6 General Provisions Relating to Binding Arbitration.

C.6.1 Matters for Which Binding Arbitration is Elective. Except with respect to any dispute that concerns one or more matters specified in Section C.6.2 below, the binding arbitration procedures set forth in Section C.7 may be invoked only by agreement of all of the parties to the dispute to be arbitrated and are solely for the convenience of WECC and its Members. If a dispute governed by this Appendix C does not concern a matter specified in Section C.6.2 below, a party to the dispute shall be deemed to have fulfilled its obligations to comply with Appendix C of these Bylaws (irrespective of whether the parties to the dispute agree to proceed with binding arbitration) to the extent that either: (i) that party has fully performed the obligations set forth in Sections C.1 through C.5.8; or (ii) all of the parties to the dispute have agreed to a different process for resolving the dispute and the agreed-upon process has been fully carried out.

C.6.2 Matters for Which Binding Arbitration Is Obligatory. If a dispute is governed by Appendix C of these Bylaws and is not resolved through the process of mediation in accordance with Sections C.5.1 through C.5.6 above, the parties shall be obligated to submit the matter to binding arbitration in accordance with the procedures set forth in Section C.7 (subject to the limitations on the arbitrator's authority set forth in Section C.6.3 below) if the dispute concerns one or more of the following matters:

- C.6.2.1 a decision of WECC's Board of Directors or a Committee of the Board acting on the recommendation of, or on a matter within the jurisdiction of, the Operating Transfer Capability Policy Group ("OTCPG") or successor;
- C.6.2.2 a transmission path rating, or a modification to a transmission path rating, assigned to one or more transmission paths operated by a Member (or jointly operated by more than one Member);
- C.6.2.3 transmission access, pursuant to Sections 10.1.2, 10.1.3, and 10.5; or
- C.6.2.4 any matter that, by vote of both WECC's Board of Directors and WECC's Membership, is designated as a matter to be subject to the provisions of Section C.6.2 of these Bylaws, provided that any matter submitted to WECC's Membership pursuant to this provision must be approved by at least the number of votes required to amend these Bylaws under Section 13.2.

C.6.3 Limitations on Arbitrator's Authority with Respect to Matters Specified in Section C.6.2. Unless all of the parties to a dispute agree otherwise, an arbitrator rendering a decision with respect to any matter specified in Section C.6.2 above shall have no authority to consider or award remedies for past economic harm or damages of any kind, including without limitation actual or direct damages; indirect, consequential, or incidental damages; or exemplary or punitive damages. Nothing in this Section C.6.3 shall: (i) limit any rights that a party to a dispute concerning a matter specified in Section C.6.2 above may have to pursue legal claims for damages or other economic remedies after the arbitrator has rendered his or her decision on that matter (within the scope of his or her authority under this Section C.6.3); or (ii) limit an

arbitrator's authority under Section C.8 below to shift costs or impose monetary sanctions for "good cause" (as that term is defined in Section C.8).

C.6.4 Arbitration Decisions Not To Modify Underlying Rights and Obligations. Unless all of the parties to a dispute agree otherwise, the resolution through binding arbitration of any dispute governed by this Appendix C shall not have the effect of increasing, decreasing, or otherwise modifying WECC's or any Member's obligation to abide by, or ability to enforce or impose penalties or sanctions with respect to, any guidelines, criteria, standards, policies, procedures, decisions, or Bylaws of WECC or any limitation on the foregoing, whether established by law; regulation; judicial, executive, or administrative order, decree, or decision; tariff; contract; course of performance; treaty; or otherwise.

C.6.5 Laws Relating to Binding Arbitration. WECC and its Members recognize that some Members may be subject to laws (including without limitation United States federal or state laws, Canadian or provincial laws, or Mexican laws) that limit or define those Members' ability to agree in advance to be subject to binding arbitration. If a Member has the right or obligation under applicable law to refuse to submit to binding arbitration in connection with any dispute that would otherwise be subject to binding arbitration under Section C.6.2 of these Bylaws, that Member shall not be obligated to comply with the binding arbitration procedures set forth in Sections C.6 and C.7. Any Member subject to any law or other legally binding authority that may limit (or permit the Member to limit) its obligation to comply with the provisions requiring binding arbitration under Sections C.6 and C.7 or to fully comply with a valid arbitrator's decision rendered in accordance with this Appendix C shall provide

notice to this effect to all other disputing parties and WECC's Chief Executive Officer upon initiation of any dispute involving that Member if the dispute is subject to Section C.6.2. Upon receiving a notice under Section C.6.5, any other party to the dispute shall thereafter be relieved of any obligation to comply with the provisions Sections C.6 and C.7 in connection with that dispute, except to the extent that the Member giving notice agrees to be fully bound by procedures governing and results of any arbitration proceeding. If there are more than two parties to a dispute covered by the preceding sentence, however, then all parties to the dispute other than the party giving notice under Section C.6.5 shall make good faith efforts to establish a mutually acceptable approach for resolving among themselves whatever aspects of the dispute can reasonably be resolved through the procedures set forth in this Appendix C without the participation of the party giving notice under Section C.6.5. If any Member fails to submit to binding arbitration, or fails to abide by a valid arbitrator's decision rendered in accordance with this Appendix C, that Member shall thereafter have no right to enforce any of the provisions of Section C.6.2 (concerning obligations to submit specified disputes to binding arbitration) against any other Member or WECC until such time as the WECC Board of Directors, or a delegate designated by the Board, determines that it is appropriate to restore the Member's ability to enforce the provisions of Section C.6.2.

C.6.6 Consistency with Laws, Regulatory Jurisdiction and Orders, Etc. Nothing contained in this Appendix C and no arbitrator's decision rendered in accordance with Section C.7 shall be construed to require or shall otherwise operate to cause any Member or WECC to incur any obligation or take any action that is contrary to: (i) any

applicable law or regulation; (ii) any applicable authority, order, decree, rule, or decision of a regulatory, judicial, administrative, executive, or other governmental body having jurisdiction over one or more of the matters or parties subject to this Appendix C or covered by an arbitrator's decision; or (iii) any applicable rate schedule, tariff, treaty, or valid, pre-existing contractual obligation with which any party subject to this Appendix C or covered by an arbitrator's decision is legally obligated to comply.

C.7 Arbitration Procedures.

C.7.1 Notice to WECC of Initiation of Binding Arbitration. Within 10 calendar days after all of the parties to a dispute have agreed (or become obligated under Section C.6.2 above) to submit the dispute to binding arbitration under Sections C.6 and C.7, the parties to the dispute shall deliver written notice to WECC's Chief Executive Officer (an "Arbitration Notice").

C.7.1.1 The Arbitration Notice shall: (i) include a brief, general description of the issues to be arbitrated; and (ii) identify all parties who have agreed (or become obligated) to submit the dispute to binding arbitration under Sections C.6 and C.7.

C.7.1.2 Within five business days of receiving an Arbitration Notice, WECC's Chief Executive Officer shall: (a) publish (or cause to be published) in WECC's newsletter or on its electronic bulletin board a notice containing a list of the parties to the arbitration and the parties' brief, general description of the issues to be arbitrated; and (b) deliver to each party to the dispute a copy of

WECC's then-current standing list of qualified arbitrators, knowledgeable in matters addressed by WECC (as approved by the Board of Directors).

C.7.1.3 No person may be listed on WECC's standing list of qualified arbitrators unless the person has agreed to: (a) disclose, at any time the person is selected to serve as a arbitrator under this Appendix C, any personal or financial interest the arbitrator may have with respect to the matter(s) in dispute (including any indirect personal or financial interest that could arise because of interests or relationships affecting any of the arbitrator's immediate family members); (b) disclose any relationship the arbitrator may have with any party to the dispute that is not permitted under Section C.7.2 below; (c) assemble a complete record of the arbitration process and the materials received as evidence by the arbitrator if any of the parties to the dispute elect to appeal or contest the arbitrator's decision; and (d) abide by all applicable provisions of and procedures specified by Sections C.6 and C.7.

C.7.2 Selection of an Arbitrator. Within 10 calendar days after all of the parties to a dispute have agreed (or become obligated) to submit the dispute to binding arbitration under Sections C.6 and C.7, the parties to the dispute shall select an arbitrator by mutual agreement. If the parties cannot agree on an arbitrator within 10 calendar days after agreeing to arbitrate their dispute, the arbitrator shall be selected from WECC's standing list of qualified arbitrators as follows: The parties to the dispute shall take turns striking names from WECC's standing list of qualified arbitrators until there is only one name remaining. (The parties to the dispute shall draw lots to determine the order in which they take turns striking names.) The last

person whose name remains on the list shall serve as the arbitrator. No arbitrator other than an arbitrator chosen by agreement of all the parties to the dispute may (i) have a personal or financial interest in the matter(s) in dispute (including any indirect personal or financial interest that could arise because of interests or relationships affecting any of the arbitrator's immediate family members); or (ii) be (or have an immediate family member who is) a past or present director, commissioner, officer, employee, consultant, agent, or other representative of any of the parties to the dispute. If the arbitrator selected through the process of striking names specified above is disqualified under the preceding sentence, the arbitrator whose name was stricken last shall serve in his or her place.

C.7.3 Initial Statements and Proposed Arbitration Decisions. Within 10 calendar days after the selection of an arbitrator under Section C.7.2 above, each party to the dispute shall submit a statement in writing to all other parties to the dispute and to the arbitrator. Each disputing party's statement shall set forth in reasonable detail the nature of the dispute, the issues to be arbitrated, and the party's reasonable, good faith proposal for resolving the dispute. As provided in Section C.5.3 above, to the extent permitted by law, no party to an arbitration conducted under Sections C.6 and C.7 shall publicly disclose, rely on, or introduce as evidence in any arbitration, FERC proceeding, Canadian Regulatory Authority proceeding, proceeding before a Mexican Regulatory Authority, appeal, or litigation concerning the same or any related dispute any information required to be kept confidential by the terms of Section C.5.3.

C.7.4 Procedural Matters. The arbitrator shall determine discovery procedures, how evidence shall be taken, what written submittals may be made, and other such procedural matters, taking into account the complexity of the issues involved, the extent to which factual matters are disputed and the extent to which the credibility of witnesses is relevant to a resolution. Each party to the dispute shall produce all evidence determined by the arbitrator to be relevant and material to the issues presented. If such evidence involves proprietary or confidential information, the party submitting the evidence shall petition the arbitrator for a protective order, and to the extent the arbitrator determines there is good cause the arbitrator shall issue an appropriate protective order and all parties to the dispute shall comply with the protective order. The arbitrator may elect to resolve the arbitration matter solely on the basis of written evidence and arguments.

C.7.5 Out-of-Court Sworn Testimony. At the request of any disputing party, the arbitrator shall have the discretion to allow that party to examine witnesses through sworn out-of-court testimony (referred to in the United States as “deposition” and in Canada as “discovery”) to the extent the arbitrator deems the evidence sought to be relevant and appropriate. In general, out-of-court witness examinations shall be limited to a maximum of three per party and shall be held within 30 calendar days after the making of a request. Each witness examination shall be limited to a maximum of three hours’ duration. The arbitrator shall have the discretion to permit the number and duration of examination sessions allowed under this Section C.7.5 to be increased, and to extend the 30-day time limit, upon request for good cause shown.

All objections are reserved for the arbitration hearing except for objections based on privilege and proprietary or confidential information.

C.7.6 Intervention by Other Parties. Unless all of the parties to the dispute agree otherwise, no one (whether a Member, WECC, or any other entity or person) that is not a party to a dispute at the initiation of arbitration under Sections C.6 and C.7 shall have the right to intervene in the arbitration. Any party wishing to intervene in an arbitration under Sections C.6 and C.7 may petition the arbitrator for permission to intervene, provided that the petition is submitted to the arbitrator not more than 30 calendar days after notice of the arbitration is posted by WECC's Chief Executive Officer in accordance with Section C.7.1. The arbitrator shall have the discretion to permit a party to intervene if the arbitrator determines that the party petitioning to intervene has a direct and substantial interest in the outcome of the arbitration. In exercising his or her discretion concerning a requested intervention, the arbitrator shall also consider any additional complexity or delay that may be caused by allowing the intervention and also any other remedies available to the party requesting intervention. Any party that is granted the privilege of intervening in an arbitration under Sections C.6 and C.7 shall be permitted to intervene subject to the same terms, conditions, limitations, rights, and obligations of all other parties to the dispute, including without limitation the binding effect of arbitrator's decision, limitations on rights of appeal, the obligation to share equally in the costs of the arbitrator, and the obligation to be subject to the provisions of Section C.8.

C.7.7 Consideration of WECC Criteria, Etc. The Arbitrator shall give due consideration to the reliability criteria, standards, guidelines, policies, and procedures of WECC and

the North American Electric Reliability Council (or any successor organization) to the extent they are relevant to resolution of the matter(s) in dispute. If the arbitrator's decision will include interpretation of any of WECC's reliability criteria, standards, guidelines, policies, and procedures, (and WECC is not a party to the arbitration), the arbitrator shall, before rendering his or her decision, consult with WECC (subject to the provisions of Section C.7.10 below) concerning the interpretation of WECC's applicable reliability criteria, standards, guidelines, policies, and procedures.

C.7.8 Evidence and Rebuttal. The arbitrator shall consider all issues material to the matter(s) in dispute. The arbitrator shall take evidence submitted by the parties to the dispute in accordance with procedures established by the arbitrator and may request additional information the arbitrator deems material to the resolution of the dispute. With the consent of all parties to the dispute, the arbitrator's request for additional information may include the opinion of any individual or organization with recognized expertise in the matter(s) in dispute, subject to the following conditions: (i) any verbal communication with an expert consulted by the arbitrator must take place exclusively in the presence of all parties to the dispute and copies of any written communications must be provided to all parties to the dispute; (ii) any expert consulted by the arbitrator must agree to be equally available upon request to all of the parties to the dispute; (iii) any expert consulted by the arbitrator must agree to comply with the restrictions on disclosure contained in Section C.5.3; and (iv) all parties to the dispute shall be afforded a reasonable opportunity to question the expert and to rebut any additional information submitted by the expert at the request of the arbitrator.

C.7.9 Arbitrator's Decision. The arbitrator shall make all reasonable efforts to complete hearings (if applicable) and submissions of written evidence not more than 90 calendar days after receiving initial statements submitted under Section C.7.3 above. As soon as practicable, but in no event more than 30 calendar days after the completion of hearings and evidence submittals, the arbitrator shall render his or her final decision for resolving the dispute. By agreement of all of the parties to the dispute or at the discretion of the arbitrator for good cause, the foregoing deadline for delivery of the arbitrator's decision may be extended. The arbitrator's decision shall be based on the arbitrator's good faith determination of a resolution that will: (i) be consistent with any laws, rules, and regulations applicable to the matter(s) in dispute; (ii) be consistent with any valid pre-existing agreements among the parties to the dispute that bear on the matter(s) in dispute; (iii) not require any party to the dispute to take action that is not in compliance with any of WECC's reliability criteria, standards, guidelines, policies, and procedures; and (iv) best serve to promote or maintain reliable operation of the interconnected bulk power systems of the Western Interconnection, without imposing inequitable burdens or benefits on any of the parties to the dispute or others that may be affected by implementation of the arbitrator's decision. The arbitrator shall deliver to each of the parties to the dispute, along with his or her decision, a written statement including specific findings of fact, conclusions of law (if applicable), and an explanation of the arbitrator's basis for rendering his or her decision. Subject to any protective order that may have been issued under Section C.7.4 above, WECC's Chief Executive Officer shall publish (or cause to be published) in WECC's newsletter or electronic bulletin board a brief

summary of the arbitrator's decision. An arbitrator's decision that is not appealed shall not be deemed to be precedential in any other arbitration related to a different dispute.

C.7.10 WECC Staff Participation in Arbitration When WECC Not a Party. If, during the course of binding arbitration conducted under Sections C.6 and C.7 (in which WECC is not a party) the arbitrator or any party to the dispute wishes to solicit the views of WECC staff concerning the application, implementation, interpretation, or fulfillment of any guidelines, criteria, standards, policies, or procedures of WECC, the arbitrator may request or permit the submission of WECC staff views only with the consent of all of the parties to the dispute and only if: (i) any participation by WECC staff takes place exclusively in the presence of all parties to the dispute; (ii) participating WECC staff members agree to be equally available upon request to all parties to the dispute; and (iii) participating WECC staff members agree to comply with the restrictions on disclosure contained in Section C.5.3.

C.7.11 Compliance and Costs. Unless one or more of the parties to the dispute initiates and notifies all other parties to the dispute that it has initiated a process to contest or appeal the arbitrator's decision under Sections C.9 through C.13, upon the decision by the arbitrator, the parties to the dispute shall, within the time frame specified by the arbitrator, and, subject to Section C.6.6 above, take whatever action is required to comply with the arbitrator's decision to the extent the arbitrator's decision does not require regulatory action. To the extent the arbitrator's decision affects jurisdictional rates, terms and conditions of service, or facilities or otherwise requires local, state, federal, or provincial approval or regulatory action, or a FERC filing or a Canadian

Regulatory Authority filing by a Canadian Member or a Mexican Regulatory Authority filing by a Mexican Member, the affected Member (or WECC, if WECC is the party with the obligation to seek regulatory action) shall, within the time frame specified by the arbitrator, submit the arbitrator's decision or an appropriate filing to implement the arbitrator's decision and support the appropriate authority's acceptance or approval of the arbitrator's decision or implementation filing, except in cases where any party to the dispute has given notice of its intent to contest or appeal the arbitrator's decision. All costs associated with the arbitration (not including costs associated with attorney and expert witness fees incurred by the parties to the dispute) shall be divided equally among the parties to the dispute unless: (i) all of the parties to the dispute agree to an alternate method of allocating costs; or (ii) in rendering his or her decision, the arbitrator exercises his or her discretion under Section C.8 below to assess fees, costs, or other monetary sanctions against one or more of the parties to the dispute for good cause.

C.7.12 Entry of Judgment. At any time after an arbitrator has rendered his or her decision in an arbitration conducted under Sections C.6 and C.7 (provided that the time provided for initiating an appeal under Sections C.11.1 and C.12 below has expired and no appeal or other means of contesting the arbitrator's decision has been initiated), judgment on the decision rendered by the arbitrator may be entered by any court of competent jurisdiction (subject to the provisions of Sections C.6.3, C.6.4, and C.6.6 above). If the award is against the United States, a party to the arbitration may apply to the United States District Court for the district in which the principal office of the

applicable United States department or agency is located for an order confirming the award pursuant to 5 U.S.C. § 580.

C.8 Arbitrator's Discretion to Shift Costs or Impose Sanctions for Cause. Each party to any dispute submitted to arbitration under Sections C.6 and C.7 shall bear its own costs and fees associated with representation and participation in the arbitration process, and shall share equally in the arbitrator's fees except that the arbitrator shall have the discretion, to the extent permitted by law, to require one or more of the parties to the dispute to pay part or all of the costs and fees (including without limitation attorneys' and arbitrator's fees) of one or more other parties to the dispute, or to impose monetary sanctions on some other basis that is reasonable under the circumstances, for good cause. As used in this Section C.8, "good cause" means conduct involving serious abuse of or failure to comply with the dispute resolution process set forth in this Appendix C, willfully undertaken to harass or delay other parties to the dispute or to substantially impede the arbitrator's ability to render a decision consistent with the provisions set forth in Section C.7.9.

C.9 Rights to Appeal Arbitration Decisions. Except to the extent otherwise provided by applicable United States state or federal law, applicable Canadian or provincial law, or applicable Mexican law, a party to a dispute resolved by arbitration under Sections C.6 and C.7 may appeal or contest the arbitrator's decision only on one or more of the bases specified in Section C.9.1 below and only in accordance with the procedures set forth in Sections C.9.2 through C.13.

C.9.1 Grounds for Appealing Arbitration Decisions. A party to a dispute resolved by arbitration under Sections C.6 and C.7 may contest or appeal the arbitrator's decision only on the basis that: (i) the arbitrator's decision is contrary to applicable law or

regulation (including without limitation the FPA or FERC's then-applicable standards or policies, or comparable types of provisions that may apply under applicable Canadian, provincial, Mexican, or other laws and regulations); (ii) the arbitrator's decision is demonstrably arbitrary and capricious and without support in the record assembled during the arbitration; (iii) the arbitrator failed to afford one or more parties to the dispute an opportunity for a fair and meaningful hearing; (iv) the arbitrator engaged in serious misconduct in connection with the arbitration; (v) the arbitrator exceeded the authority conferred upon him or her under this Appendix C or as otherwise established by agreement of all the parties to the dispute; or (vi) the arbitrator's decision is contrary to the provisions of Section C.6.6.

C.9.2 Matter and One or More Parties to Dispute Subject to FERC Jurisdiction. If (i) the subject matter of a dispute arbitrated under Sections C.6 and C.7 is within the jurisdiction of FERC, and (ii) the conditions specified in Section C.12.1 or C.12.2 are satisfied, the rights of the parties to contest or appeal the arbitrator's decision shall be as set forth in Sections C.10 and C.12 below (subject also to the provisions of Section C.9.1 above). Notwithstanding the foregoing, nothing herein shall be construed or operate to require any Canadian or Mexican party or any other party that is not a "public utility" within the meaning of the FPA to make any filing with FERC under Sections 205 or 206 of the FPA.

C.9.3 All Parties and Matters in Dispute Subject to Jurisdiction of a Canadian Regulatory Authority. If all of the parties to an arbitrated dispute are subject to the jurisdiction of a particular Canadian Regulatory Authority, and if all matters in dispute are also subject to the jurisdiction of the same Canadian Regulatory Authority, any disputing

party may appeal an arbitrator's decision to that Canadian Regulatory Authority, where such Canadian Regulatory Authority has jurisdiction to hear the appeal, or to the appropriate Canadian court. Any appeal to a Canadian Regulatory Authority or Canadian court shall be subject to the provisions set forth in Sections C.10 and C.11 below.

C.9.4 All Parties and the Matter in Dispute Subject to Jurisdiction of a Mexican Regulatory Authority. If all of the parties to an arbitrated dispute are subject to the jurisdiction of a particular Mexican Regulatory Authority, and if all matters in dispute are also subject to the jurisdiction of the same Mexican Regulatory Authority, any disputing party may appeal an arbitrator's decision to the appropriate Mexican Regulatory Authority, subject to the provisions set forth in Sections C.10 and C.11 below.

C.9.5 Appeal to Court. If none of the preceding provisions concerning appealing or contesting an arbitrator's decision before FERC, a Canadian Regulatory Authority, or a Mexican Regulatory Authority apply to an arbitrated dispute, any party to an arbitrator's decision rendered in accordance with the provisions of Sections C.6 and C.7 may appeal the arbitrator's decision to a court of competent jurisdiction as provided under Section C.13 below.

C.10 Appealing or Contesting Arbitrator's Decision to FERC or a Presiding Authority. Subject to the conditions specified in Sections C.9.1 through C.9.5 above, any disputing party may appeal or contest an arbitrator's decision to FERC or an appropriate Presiding Authority as follows:

C.10.1 Record on Appeal. Except as otherwise provided in Section C.10.3 below, any appeal or action to contest an arbitrator's decision to FERC or a Presiding Authority

shall be based solely upon the record assembled by the arbitrator. All parties to arbitrations conducted under Sections C.6 and C.7 intend that: (i) the FERC or other Presiding Authority should afford substantial deference to the factual findings of the arbitrator; (ii) the portion, if any, of the arbitrator's decision relating to issues not of first impression (i.e., matters previously decided by the FERC or other Presiding Authority or a court of competent jurisdiction in cases involving comparable facts and circumstances) should be afforded appropriate deference by the FERC or other Presiding Authority; and (iii) the portion, if any, of the arbitrator's decision relating to issues of first impression should be afforded no deference by the FERC or other Presiding Authority.

C.10.2 No Expansion of Record on Appeal. Except as otherwise provided in Section C.10.3 below, no Member, non-Member, or WECC that has been a party to an arbitration under Sections C.6 and C.7 shall seek to expand the factual record before FERC or a Presiding Authority beyond that assembled by the arbitrator.

C.10.3 Exceptions to Limitations on Record on Appeal. If the arbitrator fails to assemble a complete record of the evidence submitted with respect to an arbitrated decision that is appealed pursuant to Sections C.9 through C.13, the parties to the appeal shall, notwithstanding the provisions of Sections C.10.1 and C.10.2 above, have the right to supplement the arbitrator's record before FERC or the Presiding Authority with any materials received into evidence by the arbitrator but omitted from the record assembled by the arbitrator. If an arbitrator's decision is appealed under Section C.9.1(iii) or (iv) above on the grounds that the arbitrator improperly excluded evidence so as to materially prejudice the outcome of the arbitration with respect to

one or more of the parties to the dispute, any party to the appeal may submit the evidence asserted to be improperly excluded, but only as a basis to request that FERC or the Presiding Authority vacate the arbitrator's decision and remand the matter to the arbitrator (or, if FERC or the Presiding Authority determines that the arbitrator engaged in serious misconduct, to a newly selected arbitrator) for reconsideration of the matter with inclusion of the improperly excluded evidence. If an arbitrator's decision is appealed under Section C.9.1(iv) above on the grounds of serious misconduct by the arbitrator, any party to the appeal may offer new evidence relating to the arbitrator's alleged misconduct.

C.11 Procedures for Appeals to Presiding Authority. If any party to an arbitration under Sections C.6 and C.7 desires to appeal an arbitrator's decision to an appropriate Presiding Authority, it shall provide written notice to that effect to all other parties to the arbitration, the arbitrator, and WECC's Chief Executive Officer within 14 calendar days following the date of the arbitrator's decision. If notice of appeal is timely provided:

C.11.1 Within 30 calendar days after the date of the appealing party's first notice of appeal, the party providing notice of appeal shall file its statement of position regarding the appeal with the Presiding Authority, together with the complete evidentiary record of the arbitration and a copy of the arbitrator's decision. The statement of position shall state that the appeal requested has been the subject of an arbitration pursuant to this Agreement.

C.11.2 Within 30 calendar days after the date of the appealing party's first notice of appeal, any other party that was a party to the arbitration may file its statement of position regarding the appeal with the Presiding Authority.

C.11.3 Copies of all materials filed with the Presiding Authority by any party during the course of an appeal shall be delivered to all other parties to the arbitration and to WECC's Chief Executive Officer.

C.11.4 Implementation of the arbitrator's decision shall be deemed stayed pending an appeal unless and until, at the request of a disputing party, the Presiding Authority issues an order shortening or extending the stay of implementation.

C.11.5 WECC's Chief Executive Officer shall publish (or cause to be published) a summary of each appeal in WECC's newsletter or electronic bulletin board.

C.11.6 The Members and WECC intend that any Presiding Authority's order resulting from an appeal under Sections C.9 and C.11 shall be subject to judicial review pursuant to laws governing the Presiding Authority and the matter in dispute that provide for judicial review of Presiding Authority action.

C.12 Procedures for Contesting or Appealing Arbitrator's Decision Before FERC. If any party to a dispute arbitrated under Sections C.6 and C.7 elects, subject to the limitations set forth in Sections C.9.1 through C.9.5 above, to contest or appeal an arbitrator's decision before FERC, the party so electing shall provide written notice to that effect to all other parties to the arbitration, the arbitrator, and WECC's Chief Executive Officer within 14 calendar days following the date of the arbitrator's decision. The provisions contained in Sections C.10.1, C.10.2, and C.10.3 above shall apply with respect to the record of the arbitration submitted to FERC. In addition, the following provisions shall apply:

C.12.1 FERC Filing by Prevailing Party. If the arbitrator's decision requires the prevailing party to take action that must have FERC approval or involves the provision of FERC-jurisdictional service by the prevailing party, the prevailing party shall file the

arbitrator's decision or make an appropriate filing with FERC to implement the arbitrator's decision. Provided that it has given notice as required under Section C.12 above, any non-prevailing party may contest the prevailing party's filing in accordance's with FERC's applicable rules and regulations.

C.12.2 Complaint to FERC by Prevailing Party. If the arbitrator's decision requires a non-prevailing party to take action that must have FERC approval or involves the provision of FERC-jurisdictional service by any non-prevailing party, then, if the non-prevailing party has given notice as required under Section C.12 above, the prevailing party may submit the arbitrator's decision to FERC in the form of a complaint.

C.13 Appeal to Court. If none of the provisions that govern appealing or contesting an arbitrator's decision before FERC, a Canadian Regulatory Authority, or a Mexican Regulatory Authority as set forth in Sections C.9.2, C.9.3, or C.9.4 above apply, any disputing party may appeal an arbitrator's decision to any court of competent jurisdiction, subject to the conditions specified in Section C.9.1 above. Except as otherwise provided in Section C.10.3 above (substituting the words "court of competent jurisdiction" for "FERC or the Presiding Authority"), any appeal to a court shall be based solely upon the record assembled by the arbitrator, and no Member, non-Member, or WECC who is a party to an arbitration under Sections C.6 and C.7 shall seek to expand the factual record before the court beyond that assembled by the arbitrator.

Appendix of Additional Definitions Relating to Alternative Dispute Resolution Provisions

Arbitration Notice has the meaning specified in Section C.7.1 of these Bylaws.

Canadian Regulatory Authority. The agency or agencies established under the laws of Canada or the applicable Provinces of Canada and having jurisdiction over facilities, interconnections, transmission rates, charges, terms, and conditions of service of a Canadian Member.

Dispute Notice has the meaning specified in Section C.5.1 of these Bylaws.

FERC. The Federal Energy Regulatory Commission or a successor agency.

FPA. The Federal Power Act (16 U.S.C. §§ 824 *et. seq.*), as it may be amended from time to time.

Mexican Regulatory Authority. The agency or agencies established under the laws of Mexico or the applicable states of Mexico and having jurisdiction over facilities, interconnections, transmission rates, charges, terms, and conditions of service of a Mexican Member.

Presiding Authority. As used in Sections C.10 and C.11, the term “Presiding Authority” has the following meanings: with respect to an appeal to an appropriate Canadian Regulatory Authority, “Presiding Authority” means the presiding Canadian Regulatory Authority or Canadian court with jurisdiction to hear the appeal; and with respect to an appeal to an appropriate Mexican Regulatory Authority, “Presiding Authority” means the presiding Mexican Regulatory Authority or Mexican court with jurisdiction to hear the appeal.

EXHIBIT C

Exhibit C – Regional Standard Development Procedure

Exhibit C shall set forth WECC’s standards development procedure, which NERC agrees meets the following common attributes:

COMMON ATTRIBUTE 1

Proposed regional reliability standards shall be subject to approval by NERC, as the electric reliability organization, and by FERC before becoming mandatory and enforceable under Section 215 of the FPA in the United States. In Canada and Mexico, regional standards must be approved by applicable governmental authorities before becoming mandatory in those respective jurisdictions. No regional reliability standard shall be effective within the WECC area unless filed by NERC with FERC, and any applicable authorities in Canada and Mexico, and approved by FERC and any applicable authorities in Canada and Mexico.

COMMON ATTRIBUTE 2

WECC regional reliability standards shall provide for as much uniformity as possible with reliability standards across the interconnected bulk power system of the North American continent. A WECC reliability standard shall be more stringent than a continent-wide reliability standard, including a regional difference that addresses matters that the continent-wide reliability standard does not, or shall be a regional difference necessitated by a physical difference in the bulk power system. A regional reliability standard that satisfies the statutory and regulatory criteria for approval of proposed North American reliability standards, and that is more stringent than a continent-wide reliability standard, would generally be acceptable.

COMMON ATTRIBUTE 3

WECC regional reliability standards, when approved by FERC and applicable authorities in Canada and Mexico, shall be made part of the body of NERC reliability standards and shall be enforced upon all applicable bulk power system owners, operators, and users within the WECC area, regardless of membership in the region.

COMMON ATTRIBUTE 4

Requester — The requester is the sponsor of the regional reliability standard request and may assist in the development of the standard. Any member of WECC, or group within WECC, shall be allowed to request that a regional reliability standard be developed, modified, or withdrawn. Additionally, any entity (person, organization, company, government agency, individual, etc.) that is directly and materially affected by the

reliability of the bulk power system in the WECC area shall be allowed to request a regional reliability standard be developed, modified, or withdrawn.

COMMON ATTRIBUTE 5

Standards Request Routing Committee and Lead Standing Committees — The WECC Standards Request Routing Committee (SRRC) manages the standards development process. The SRRC will consider which requests for new or revised standards shall be assigned for development (or existing standards considered for deletion). The lead standing committee will advise the WECC board on standards presented for adoption.

COMMON ATTRIBUTE 6

Registered ballot body — The registered ballot body comprises all entities or individuals that qualify for one of the stakeholder segments; are registered with WECC as potential ballot participants in the voting on standards; and are current with any designated fees. Each member of the registered ballot body is eligible to vote on standards. Each standard action is balloted by the lead standing committee and any registered Participating Stakeholders. The representation model of the registered ballot body is provided in Appendix A.

COMMON ATTRIBUTE 7

WECC will coordinate with NERC such that the acknowledgement of receipt of a standard request identified in step 2, notice of comment posting period identified in step 4, and notice for vote identified in step 6 below are concurrently posted on both the WECC and NERC websites.

COMMON ATTRIBUTE 8

An acceptable standard request shall contain a description of the proposed regional reliability standard subject matter containing sufficiently descriptive detail to clearly define the purpose, scope, impacted parties, and other relevant information of the proposed standard.

COMMON ATTRIBUTE 9

Within 14 days of receipt of a completed standard request, the SRRC shall determine the disposition of the standard request.

COMMON ATTRIBUTE 10

The SRRC may take one of the following actions:

- Accept the standard request as a candidate for development of a new standard, revision of an existing standard, or deletion of an existing standard. The SRRC may, at its discretion, expand or narrow the scope of the standard request under consideration. The lead standing committee shall prioritize the development of standard in relation to other proposed standards, as may be required based on the volume of requests and resources.
- Reject the standard request. If the SRRC rejects a standard request, a written explanation for rejection will be delivered to the requester within 14 days of the decision.
- Remand the standard request back to the requester for additional work. The standards process manager will make reasonable efforts to assist the requester in addressing the deficiencies identified by the SRRC. The requester may then resubmit the modified standard request using the process above. The requester may choose to withdraw the standard request from further consideration prior to acceptance by the SRRC.

COMMON ATTRIBUTE 11

Any standard request that is accepted by the SRRC for development of a standard (or modification or deletion of an existing standard) shall be posted for public viewing on the WECC website within 30 days of acceptance by the committee.

COMMON ATTRIBUTE 12

The standards process manager shall submit the proposed members of the drafting team to the lead standing committee and the SRRC. The lead standing committee and the SRRC shall approve the drafting team membership within 60 days of accepting a standard request for development, modifying the recommendations of the standards process manager as the committee deems appropriate, and assign development of the proposed standard to the drafting team.

COMMON ATTRIBUTE 13

At the direction from the lead standing committee, the standards process manager shall facilitate the posting of the draft standard on the WECC website, along with a draft implementation plan and supporting documents, for a no less than a 30-day comment

period. The standards process manager shall provide notice to WECC stakeholders and other potentially interested entities, both within and outside of the WECC area, of the posting using communication procedures then currently in effect or by other means as deemed appropriate.

COMMON ATTRIBUTE 14

The drafting team shall prepare a summary of the comments received and the changes made to the proposed standard as a result of these comments. The drafting team shall summarize comments that were rejected by the drafting team and the reason(s) that these comments were rejected, in part or whole. The summary, along with a response to each comment received will be posted on the WECC website no later than the next posting of the proposed standard.

COMMON ATTRIBUTE 15

Upon recommendation of the drafting team, and if the lead standing committee concurs that all of the requirements for development of the standard have been met, the standards process manager shall post the proposed standard and implementation plan for ballot and shall announce the vote to approve the standard, including when the vote will be conducted and the method for voting. Once the notice for a vote has been issued, no substantive modifications may be made to the proposed standard unless the revisions are posted and a new notice of the vote is issued.

COMMON ATTRIBUTE 16

The standards process manager shall schedule a vote by the WECC lead standing committee]. The vote shall commence no sooner than [15] days and no later than [30] days following the issuance of the notice for the vote.

COMMON ATTRIBUTE 17

The WECC registered ballot body shall be able to vote on the proposed standard during a period of not less than 10 days.

COMMON ATTRIBUTE 18

All lead standing committee members of WECC and Participating Stakeholders are eligible to participate in voting on proposed new standards, standard revisions or standard deletions.

COMMON ATTRIBUTE 19

Approval of the proposed regional reliability standard shall require a majority in the affirmative (affirmative votes divided by the sum of affirmative and negative votes) by both voting classes of the lead standing committee. Abstentions and non-responses shall not count toward the results.

COMMON ATTRIBUTE 20

Under no circumstances may the board substantively modify the proposed regional reliability standard.

COMMON ATTRIBUTE 21

Once a regional reliability standard is approved by the board, the standard will be submitted to NERC for approval and filing with FERC and applicable authorities in Canada and Mexico.

COMMON ATTRIBUTE 22

- **Open** - Participation in the development of a regional reliability standard shall be open to all organizations that are directly and materially affected by the WECC bulk power system reliability. There shall be no undue financial barriers to participation. Participation shall not be conditioned upon membership in WECC, and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements. Meetings of drafting teams shall be open to the WECC members and others.

COMMON ATTRIBUTE 23

- **Balanced** - The WECC standards development process strives to have an appropriate balance of interests and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter.

COMMON ATTRIBUTE 24

- **Inclusive** — Any entity (person, organization, company, government agency, individual, etc.) with a direct and material interest in the bulk power system in the

WECC area shall have a right to participate by: a) expressing a position and its basis, b) having that position considered, and c) having the right to appeal.

COMMON ATTRIBUTE 25

- **Fair due process** — The regional reliability standards development procedure shall provide for reasonable notice and opportunity for public comment. At a minimum, the procedure shall include public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of Participating Stakeholders.

COMMON ATTRIBUTE 26

- **Transparent** — All actions material to the development of regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the regional entity’s Web site.

COMMON ATTRIBUTE 27

- Does not unnecessarily delay development of the proposed reliability standard.

COMMON ATTRIBUTE 28

Each standard shall enable or support one or more of the reliability principles, thereby ensuring that each standard serves a purpose in support of the reliability of the regional bulk power system. Each standard shall also be consistent with all of the reliability principles, thereby ensuring that no standard undermines reliability through an unintended consequence.

COMMON ATTRIBUTE 29

While reliability standards are intended to promote reliability, they must at the same time accommodate competitive electricity markets. Reliability is a necessity for electricity markets, and robust electricity markets can support reliability. Recognizing that bulk power system reliability and electricity markets are inseparable and mutually interdependent, all regional reliability standards shall be consistent with NERC’s market interface principles. Consideration of the market interface principles is intended to ensure that standards are written such that they achieve their reliability objective without causing undue restrictions or adverse impacts on competitive electricity markets.

COMMON ATTRIBUTE 30

To ensure uniformity of regional reliability standards, a regional reliability standard shall consist of the elements identified in this section of the procedure. These elements are intended to apply a systematic discipline in the development and revision of standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

COMMON ATTRIBUTE 31

All mandatory requirements of a regional reliability standard shall be within the standard. Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself.

COMMON ATTRIBUTE 32

Applicability	Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions. If not applicable to the entire WECC area, then a clear identification of the portion of the bulk power system to which the standard applies. Any limitation on the applicability of the standard based on electric facility requirements should be described.
----------------------	--

COMMON ATTRIBUTE 33

Measure(s)	Each requirement shall be addressed by one or more measures. Measures are used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure will identify to whom the measure applies and the expected level of performance or outcomes required demonstrating compliance. Each measure shall be tangible, practical, and as objective as is practical. It is important to realize that measures are proxies to assess required performance or outcomes. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.
-------------------	--

COMMON ATTRIBUTE 34

Compliance Monitoring Process	Defines for each measure: <ul style="list-style-type: none">• The specific data or information that is required to measure performance or outcomes.• The entity that is responsible for providing the data or information for measuring performance or outcomes.• The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes.• The entity that is responsible for evaluating data or information to assess performance or outcomes.• The time period in which performance or outcomes is measured, evaluated, and then reset.• Measurement data retention requirements and assignment of responsibility for data archiving.
--------------------------------------	--

PROCESS FOR DEVELOPING AND APPROVING WECC STANDARDS

Introduction

This document explains the WECC process for requesting, announcing, developing, revising, withdrawing and approving WECC Standards as defined below (“WECC Standards Process”). The process involves several steps:

- A request to develop a new Standard or revise an existing Standard
- Decision to proceed with development or revision of a Standard and assignment to a Standing Committee and Subgroup
- Public (including members) notification of intent to develop or revise a Standard
- Drafting stage
- Posting of draft for public comment
- Review of all comments and public posting of decisions reached on each comment
- WECC Standing Committee/Participating Stakeholder balloting of proposed Standard
- Consideration of any appeals
- WECC Board of Directors (Board) decision regarding approval, disapproval or remand of proposed Standard
- Forwarding proposed WECC Reliability Standards to ERO

The process for developing and approving WECC Standards includes:

1. Notification of pending Standard change before a wide audience of all “interested and affected parties”
2. Posting Standard change drafts for all parties to review
3. Provision for gathering and posting comments from all parties
4. Provision for an appeals process – both “due process” and “technical” appeals

WECC Standing Committees have the responsibility for developing and balloting WECC Standards. Standing Committee chairs are responsible for ensuring administration of the process and completion of all Standing Committee responsibilities. Standing Committees are assisted by a Standards Request Routing Committee and supported by Subgroups that draft the Standards, ensure the draft Standard is properly reviewed consistent with WECC due process requirements, respond to comments on the draft Standard, and revise the draft Standard in response to these comments. Board approval signifies that WECC has adopted the Standard. WECC staff has the role of tracking the Standard as it moves through the process and facilitating resolution of issues. In accordance with Section 8.6 of the WECC Bylaws, interested stakeholders may participate in Reliability Standard development and vote at the Standing Committee level on Reliability Standards or revisions to Reliability Standards.

WECC Bylaws Controlling

It is the intention of the drafters of the WECC Standards Process that the procedures described herein be interpreted and applied in a manner that is consistent with the WECC Bylaws. Should

any conflict between this WECC Standards Process and the WECC Bylaws arise, the WECC Bylaws will control.

Terms

Days. All references to days in this document refer to calendar days.

Due Process Appeals Committee. The committee that receives all appeals alleging that WECC's due process procedure was not properly followed during the development or revision of a Standard. The Due Process Appeals Committee consists of three Directors appointed by the Board Chair. The WECC Chief Executive Officer or his/her designee will be the staff coordinator for the Due Process Appeals Committee.

Participating Stakeholder. A Participating Stakeholder as defined in Section 3.21 of the WECC Bylaws.

Standard. In the context of this document, the term Standard refers to a Reliability Standard or a commercial Business Practice.

Standard Request Form. The form titled WECC Standards/Business Practice Request Form approved by WECC for the purpose of requesting a new Standard or a revision to an existing Standard.

Standards Request Routing Committee. This committee consists of the chairs of the three Standing Committees or their designees. This Committee is responsible for determining if a Standard Request is within the scope of WECC's activities, and assigning the request to the appropriate Standing Committee(s).

Standing Committee. The Market Interface Committee (MIC), Operating Committee (OC) or Planning Coordination Committee (PCC).¹ MIC, OC, and PCC will coordinate their responsibilities for those Standards that have a combination of market, operating, and planning implications.

Subgroup. A subcommittee, work group, or task force of the MIC, OC, PCC, or a combination of representatives from these committees that is responsible for developing a draft WECC Standard, posting it for review, and addressing public comments on the draft.² Voting members of a Subgroup are the individuals appointed to the group. In addition, one representative of the entity requesting a Standard has the option of joining the Subgroup as a voting member.

Technical Appeals Committee. The committee that receives appeals alleging that a party's technical comments were not properly addressed during the development of a Standard. The Technical Appeals Committee consists of the Vice Chairs of the Market Interface Committee, Operating Committee, Planning Coordination Committee, and a Director appointed by the Board Chair. The WECC Chief Executive Officer or his/her designee will be the staff coordinator for the Technical Appeals Committee. The Director appointed to the committee will act as chair. Replacement of a Technical Appeals Committee member in the event of a

¹ In accordance with WECC Bylaws Section 8.5.4, Membership in WECC's Standing Committees is open to all WECC members.

² Formation of Subgroups is in accordance with the Market Interface Committee's, Planning Coordination Committee's, and Operating Committee's Organizational Guidelines.

conflict of interest will be at the discretion of the Technical Appeals Committee Chair. If the chair has a conflict of interest, the WECC Board Chair will appoint another Director to serve as chair for the duration of the appeal in question.

Normal Process for Standards

Step 1 – Request To Revise or Develop a Standard

Requests to develop or revise a Standard will be submitted to the WECC staff through the use of the WECC Standard Request Form. Requesters may be any individual or organization. WECC membership is not a requirement as long as the requester has an interest in electric system reliability or commercial business practices in the Western Interconnection.

Step 2 – Request Validation and Routing

The Standard Request Form will be reviewed for completeness and assigned a tracking number by the WECC staff. Staff may assist with completing the request, or report to the Standards Request Routing Committee that the request is incomplete and request guidance. When complete, the WECC staff will forward the request to the Standards Request Routing Committee. This committee will confer either in person or via conference call within two weeks of receipt of a completed request to determine whether the request is within WECC's scope.

The WECC staff will maintain a web-based form that tracks all requests through the standard development process, as well as a standards development tracking log that is posted on the WECC website.

Upon ascertaining that a request is within the scope of WECC's activities, the Standards Request Routing Committee will assign the request to the chair of the appropriate Standing Committee(s), who will in turn assign it to a Subgroup. One Standing Committee will be designated as the lead Standing Committee. If the request has implications for any combination of planning, operations, or market issues, the chair of the lead Standing Committee, in consultation with the Standards Request Routing Committee, will evaluate the technical expertise of the Subgroup and may augment membership in the Subgroup for the purpose of drafting the proposed Standard or revision(s) to ensure that the Subgroup includes a composite of individuals having the appropriate planning, operations, and market expertise. Notification of such assignments will be posted on the WECC website and sent to all parties that subscribe to the WECC standards e-mail list. In addition, such assignments will be simultaneously noticed to NERC. The Subgroup will act in accordance with duly approved Subgroup guidelines. Any other interested parties may participate in the deliberations of the Subgroup.

Step 3 – Subgroup Begins Drafting Phase and Announces on WECC Web Site

The Subgroup will begin working on the request at the Subgroup's next scheduled meeting, or no later than a designated number of days following assignment from the Routing Committee, as directed by the lead Standing Committee chair. Notification of Subgroup meetings will be posted on the WECC website and sent to all parties that subscribe to the WECC standards e-mail list at least 30 days prior to the meeting. In addition notification of all Subgroup meetings will be simultaneously noticed to NERC. These meetings will be open to interested

stakeholders. The Subgroup chair will facilitate interested stakeholder participation in the discussion in order to encourage Subgroup understanding of the issues and consensus among the meeting participants. The Subgroup will work to achieve a consensus recommendation.

Standard requesters have the right, and are encouraged to participate in the Subgroup drafting process. Requesters may be called on to provide additional information, supporting studies, and other information to support the requirements of the proposed Standard or revision(s).

All WECC Standards will follow a standard format that refers to the Responsible Entities included in the NERC Functional Model and includes compliance measures according to the WECC standard template. The drafting group will include definitions for any terms included in the Standard or revision(s) that need to be added to the WECC glossary.

In the course of its review, the Subgroup:

- will review the preliminary technical assessment provided by the requester.
- will compare with existing standards to determine whether a the request is better served by drafting a new standard or modifying an existing standard.
- may perform or request additional technical studies, if necessary.
- will complete an impact assessment report as part of its evaluation to assess the potential effects of the request.
- may request from the Board or Standing Committee additional time to study the proposed request if the Subgroup believes it necessary to fully assess the proposed change.

Upon reaching a determination, by majority vote, that the requested Standard or revision to an existing Standard is needed, the Subgroup will announce the proposed Standard or proposed revision(s) in an existing Standard by posting on the WECC website a summary of the Standard or revision(s) it expects to draft, and an explanation as to why the new Standard or revision(s) in an existing Standard is needed. Notice of this posting, and its location on the WECC website, will be sent to all parties that subscribe to the WECC standards e-mail list. In addition these notifications will be simultaneously noticed to NERC.

If the Subgroup determines, by majority vote, that a new or revised Standard is not needed, it will prepare an explanation in consultation with the Standards Request Routing Committee and post it on the WECC website for a specified comment period. The party that submitted the request, parties subscribing to the WECC standards email list, the Standing Committees, and Board will all be notified of the posting and its location on the WECC website.

Step 4 – Draft Standard Posted for Comment

The Subgroup will post the first draft of the new or revised Standard on the WECC website and provide 45 days for comments. Along with the draft, the Subgroup will prepare and post an impact assessment report. Alternatively, the Subgroup may request input from affected parties regarding their estimated cost to implement the draft Standard and will use that data to prepare an impact assessment report, which will be posted for comment when it becomes available. The draft will include all mandatory requirements. In addition, it will include measurements, Violation Risk Factors, and Violation Severity Levels. Notice of this posting and a solicitation for comments on the draft will be sent to all WECC members and all individuals who subscribe

to the WECC standards e-mail list. In addition the notification of posting and solicitation for comments will be simultaneously noticed to NERC. Members of electric industry organizations may respond through their organizations, or directly, or both. All comments will be supplied electronically and will be posted on the WECC website.

Step 5 – Subgroup Deliberates on Comments

Subgroup chairs are responsible for ensuring that comments are addressed in a timely manner. The Subgroup will post its response to comments on the WECC website within 30 days of the close of the comment period. All parties that submit comments are strongly encouraged to participate in Subgroup deliberations.

If the Subgroup determines, by majority vote, any technical comments including those on the draft or the impact assessment report are significant, it will repeat Steps 3 and 4 as many times as considered necessary by the Subgroup to ensure adequate opportunity for interested stakeholder input. All interested stakeholders are strongly encouraged to submit their comments as early in the process as possible. The number of days for comment on each subsequent revision to the draft of the proposed Standard or revision(s) will be 30 days. Parties whose comments have been rejected by a Subgroup may request review of such comments by the Standing Committee and Participating Stakeholders when the proposed Standard or revision(s) is brought before the Standing Committee for a vote (in Step 7).

The Subgroup will attempt to achieve a consensus recommendation on a final draft. A majority vote of the Subgroup is required to approve submitting the recommended Standard or revision(s) to the Standing Committee and Participating Stakeholders. Voting will be conducted in accordance with this WECC Standards Process, the WECC Bylaws, and any other applicable regulatory requirements. Balloting results will be documented. All dissenting voters, as well as others participating in the Subgroup deliberations, will be encouraged to provide dissenting comments and, if possible, specific language that would make the Standard acceptable. If the Subgroup vote fails to capture a simple majority to approve the submittal to the Standing Committee and Participating Stakeholders, and there is no apparent way to reach a majority agreement, the Subgroup will report to and seek guidance from the Standing Committee Chair.

Step 6 – Subgroup Submits Draft for Standing Committee/Participating Stakeholder Vote

The Subgroup's final draft Standard or revision(s) will be posted on the WECC website and the appropriate Standing Committees and Participating Stakeholders will be notified of the Subgroup's recommendation. The posting will include the final Subgroup vote, all comments that were not incorporated into the draft Standard, the impact assessment report and the date on which the Standing Committee and Participating Stakeholders are scheduled to vote on the Subgroup's recommendation. Notice of the posting will be sent to the Standing Committees, all Participating Stakeholders, and the standards e-mail list. In addition the notification of posting for ballot will be simultaneously noticed to NERC.

Step 7 – Standing Committee/Participating Stakeholders Vote on Recommendation to Board

In accordance with Sections 8.5 and 8.6 of the WECC Bylaws, the Standing Committee and Participating Stakeholders will vote on the draft Standard, revision(s) or withdrawal no later than at the next Standing Committee meeting, subject to applicable notice requirements. A minimum of 30 days notice will be provided prior to all Standing Committee meetings at which new or revised Standards will be considered for approval.³ Notification of such meetings will be posted on the WECC website and sent to all parties that subscribe to the WECC standards e-mail list. Whenever it determines that a matter requires an urgent decision, the Board may shorten the time period set forth in this section in accordance with the requirements in the WECC Bylaws.⁴

The Standing Committee and Participating Stakeholders may vote to amend or modify a proposed Standard or revision(s) or remand it back to the Subgroup to propose needed modifications. The reasons for the modification(s) will be documented, posted, and provided to the Board. If any changes are made at the Standing Committee meeting, the roll call of votes for and against the proposal and abstentions will be recorded at the meeting, and the revised proposal will be posted for 10 days for comments.³ The comments will be posted and distributed to the Standing Committee and Participating Stakeholders. All Standing Committee members and Participating Stakeholders, including those who did not vote at the meeting, will be allowed 10 days from the time comments are posted to submit or change their votes, and the Standing Committee/Participating Stakeholder votes will be recounted based on these new and revised votes to determine whether a majority has voted for the proposal. Any parties that object to the modifications may appeal to the appropriate appeals committee as provided in Step 8.

A majority vote of the Standing Committee and Participating Stakeholders, as specified in Section 8.5.5.2 of the WECC Bylaws, is required to approve submitting the recommended Standard or revision(s) to the Board for a vote. In accordance with Section 8.5.5.2 only Standing Committee members and Participating Stakeholders who are present at a meeting of the Standing Committee may vote on a Standard.

Although any of the three Standing Committees (together with Participating Stakeholders) may vote on submitting the recommended Standard or revision(s) to the Board, only the vote of the lead Standing Committee and Participating Stakeholders will determine the course of action. If the Standing Committees do not agree, the lead Standing Committee and Participating Stakeholders will decide whether to return the draft to the Subgroup for further work, to submit the recommended Standard or revision(s) to the Board, or terminate the Standard development activity with the posting of an appropriate notice to the Standards requester, the Subgroup, and the Board (if appropriate). The Standing Committee chairs will coordinate input from their respective Committees and Participating Stakeholders to the lead Standing Committee so that the lead Standing Committee and Participating Stakeholders will have all relevant information when

³ WECC Bylaws, Section 8.5.6 – “If the committee’s recommendation or decision changes significantly as a result of comment received, the committee will post the revised recommendation or decision on the Web site, provide e-mail notification to Members and Participating Stakeholders (if the recommendation or decision concerns a Reliability Standard or revision), and provide no less than ten (10) days for additional comment before reaching its final recommendation or decision.”

voting. Relevant voting information from all Standing Committees will be submitted to the Board for its consideration in determining whether or not to approve the Standard.

If the Standing Committee and Participating Stakeholders approve the Standard or revision(s), the Standing Committee sends its recommendation, together with the proposed Standard or revision(s), and any comments on which the Standing Committee and Participating Stakeholders did not agree, plus minority opinions, to the Board for final approval. To be considered by the Board, any “no” votes on a proposed Standard or revision(s) should be accompanied by a text explaining the “no” vote and if possible specific language that would make the Standard or revision(s) acceptable. Proposed Standards or revision(s) will be posted no less than 30 days prior to the Board vote.⁴ The date of the expected Board vote will also be posted.

Step 8 – Appeals Process

Appeals are available at various levels of the Standards Development Process as follows:

Rejection of a Standards Request by the Standards Request Routing Committee may be appealed to a Standing Committee and Participating Stakeholders, and if necessary, to either a Due Process or Technical Appeal Committee, as appropriate.

Appeals of Subgroup decisions, including Routing Committee decisions, may be made to a Standing Committee and Participating Stakeholders. The Standing Committee will post its findings. The subsequent rejection of such an appeal by a Standing Committee and Participating Stakeholders may be further appealed to an appeals committee. The appeals committee will post and submit its findings and recommendations to the Standing Committee chair who will determine the appropriate course of action. Any submittal to the Board of Directors for approval will include any findings and recommendations of the appeals committee.

A new Standard or revision(s) to an existing Standard recommended by a Standing Committee and Participating Stakeholders may be appealed on either technical or due process grounds. Any due process or technical appeals must be submitted, in writing, to the WECC staff within 15 days of the date the Standing Committee posts a recommendation.

The WECC staff will conduct an investigation and issue a written report of its findings and recommendations to the appealing party and Standing Committee. If the appealing party does not agree with the staff report, it can request that the appeal be referred to the Technical or Due Process Appeals Committee, which will conduct an investigation and issue a report including findings and recommendations. The Technical Appeals Committee will make assignments as necessary to existing WECC technical work groups and task forces, form new technical groups if necessary, and use other technical resources as required to address technical appeals. The appealing party has the burden of proof and must demonstrate that the decision will adversely impact it. The Technical or Due Process Appeals Committee will issue a majority decision.

Each level of appeal will be completed within 30 days. The Board of Directors, at its discretion, may implement the Standard or revision(s) on an interim or emergency basis during the appeals process using the Urgent Action interim Standard Process set forth below.

⁴ WECC Bylaws, Section 7.5.1 – “Except as set forth in Section 7.5.2 regarding urgent business, all regular business of the Board will occur at the Board meetings, at least twenty-one (21) days’ advance notice of which has been provided...”

Step 9 – Board Approval

The WECC Board of Directors will consider the proposed Standard or revision(s) no later than at its next meeting occurring at least 30 days after the lead Standing Committee vote. The Board will consider the Standing Committee’s recommendations and minority opinions, all comments that were not incorporated into the draft Standard or revision(s), the impact assessment report, and inputs from the Due Process and Technical Appeals Committees. The Board will not amend or modify a proposed Standard, except to make nonmaterial changes to the language of a Standard or revision thereto. If approved, the Standard will be posted on the WECC website and all parties notified.

If the new or modified Standard is not approved, the Board may return the Standard to the Standing Committee and Participating Stakeholders for further work, or the Board may terminate the Standard activity with an appropriate notice and explanation to the Standard requester, Standing Committee, and Participating Stakeholders. These Board actions will also be posted.

A majority vote of the Directors present at a Board meeting, as specified in Section 7.2 of the WECC Bylaws, is required to approve the recommended Standard or revision(s).

Step 10 – ERO Review, FERC Approval and Implementation of Reliability Standards

To the extent required under Section 215 of the Federal Power Act, 18 C.F.R. Part 39, and according to procedures established in the delegation agreement between WECC and the Electric Reliability Organization (“ERO”), the Board shall submit new Reliability Standards and revisions to existing Reliability Standards for review by the ERO and approval by FERC. Upon approval by FERC, the Reliability Standards will be made part of the body of NERC reliability standards and enforced upon all applicable bulk power system owners, operators, and users within the WECC region. Parties’ right to participate in the ERO and FERC review processes shall be as established in the applicable regulations and the ERO/WECC delegation agreement. Reliability Standards subject to ERO review shall become effective as approved by FERC or applicable Canadian or Mexican authorities.

Step 11 – Implementation of Standards Not Subject to ERO/FERC/Other Approval

All new and modified Standards not subject to ERO review and FERC, Canadian or Mexican approval as provided in Step 10 shall become effective as ordered by the WECC Board. As of the effective date of such new or modified Standard, all industry participants in the Western Interconnection that such Standard is applicable to are expected to implement and abide by the Standard. Any and all parties to this Process retain the right of appeal to other authorities as the law allows.

Special Procedures

Expedited Process for Urgent Action Interim Standards

In cases requiring urgent action, such as in the development of emergency operating procedures, the Standing Committees and Participating Stakeholders may propose a new or modified interim Standard for approval by the WECC Board through a process that eliminates any or all of the steps outlined above, but only to the extent necessary, and only in a manner that is consistent with the WECC Bylaws. Such interim Standard shall be replaced by a Board-approved permanent Standard, developed using all the steps identified in this document within one year (or such additional time as may reasonably be required to complete all steps) from the date on which the WECC Board approved the interim standard. An interim Standard may be converted to a successor permanent Standard as long as any procedural steps bypassed in developing the interim Standard are completed with respect to the permanent Standard. If necessary, the Board may renew an interim Standard to allow additional time for the development of a successor permanent Standard. Renewal may occur more than once, but a good faith effort must be made to develop a successor permanent Standard.

Interpretation of Regional Standards

Any entity may request an interpretation of a Regional Standard by sending a request through the WECC web portal identifying the standard and requirement or requirements for which additional clarity is sought. The request shall indicate the material impact to the requesting entity or others caused by the actual or potential lack of clarity. An interpretation is limited to clarifying existing requirements in approved reliability standards. Interpretations may not be developed that expand upon a requirement or that provide guidance on how to apply a requirement.

The Director of Standards shall review the request for clarity and completeness and shall work with the requestor to clarify the request or complete any missing elements of the request if needed. The Director of Standards shall forward the request to the Standards Request Routing Committee (SRRC). If the Director believes that the request is intended to change a requirement or is seeking feedback on how to apply a requirement, rather than interpret the requirement, the Director shall note that to the SRRC. If the SRRC agrees by majority vote, the request shall be denied and returned to the requestor with an explanation. If denied, the requestor shall be advised of the appeals process.

Within 10 calendar days after receipt of the request, the SRRC shall assign the interpretation request to the Standing Committee (SC) responsible for creating the Standard. Within 21 days of receiving the request, the SC Chair shall assemble an Interpretation Drafting Team (IDT) with the relevant expertise to address the clarification. The IDT should include members from the original Standard Drafting Team to the extent possible, and may be supplemented as deemed appropriate by the SC Chair, but shall not contain any members representing the entity that submitted the request.

As soon as practicable, but not more than 45 calendar days after the SC assembles the IDT, the IDT shall draft a written interpretation to the Standard providing the requested clarity. The

interpretation shall be posted for a 30-day formal comment period. The IDT shall then have 15 days to respond to the comments and to make any changes to the interpretation. The IDT shall then return the interpretation to the SC which shall then post the interpretation for another 30 days to give entities time to review the interpretation prior to the SC vote. The SC shall vote on the interpretation as soon as practicable after the posting period consistent with the Voting Procedure for WECC Standing Committees. Use of a conference call or web meeting and electronic or e-mail balloting is encouraged to shorten the interpretation process. If the interpretation is approved, the SC shall forward the interpretation to the WECC Board of Directors for approval. If the SC rejects the interpretation, the Director of Standards shall notify the requestor.

The interpretation shall be submitted to NERC for processing with a request that the interpretation be adopted by the NERC Board of Trustees and then filed for approval with FERC and applicable Governmental Authorities in British Columbia, Alberta and Mexico.

Once the interpretation is approved by FERC and applicable Governmental Authorities in British Columbia, Alberta and Mexico, the interpretation shall become effective and shall be appended to the Standard. The interpretation will remain appended to the Standard until such time as the Standard is revised through the normal process incorporating the clarifications provided by the interpretation.

Approved by the WECC Board April 28, 2010

Process for Developing and Approving WECC Standards

EXHIBIT D

EXHIBIT D – COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

1.0 REGIONAL COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

WECC[REGIONAL ENTITY] will implement the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure (which for purposes of this section 1.0 shall not include Attachment 2, Hearing Procedures), to monitor and enforce compliance with Reliability Standards by the owners, operators, and users within WECC[REGIONAL ENTITY]'s geographic or electrical boundaries, and such other scope, set forth on **Exhibit A** of this Agreement; provided, however, that Section 5.3(vii) of the WECC Compliance Monitoring and Enforcement Program does not refer to shortened hearing procedures.

2.0 REGIONAL HEARING OF COMPLIANCE MATTERS

WECC[REGIONAL ENTITY] shall establish and maintain a hearing body with authority to conduct and render decisions in compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan, which shall be either WECC[REGIONAL ENTITY]'s board or a balanced compliance panel reporting directly to WECC[REGIONAL ENTITY]'s board. WECC's hearing body is the Compliance Hearing Body, as established under the WECC Compliance Hearing Body Charter[REGIONAL ENTITY]'s hearing body is [its board] [if not the board, insert the name of the committee or group serving as the hearing body].

Under the Compliance Hearing Body Charter, the Compliance Hearing Body consists of Class A and Class B members. Class A members are WECC non-affiliated directors, personnel employed by WECC Members who are not engaged in the Electric Line of Business, and consultants who meet the same standards of independence required by the WECC Bylaws for non-affiliated directors. Class B members are personnel employed by WECC Members engaged in the Electric Line of Business or who are otherwise affiliated with such Members. For each hearing, the Chair of the Compliance Hearing Body selects a five-member Hearing Panel (or a three-member Hearing Panel if the parties to the hearing agree) with a majority consisting of Class A members, with at least two members (one member of a three-member Hearing Panel) having technical knowledge of electric industry systems.

WECC[If the hearing body is a compliance panel other than the board, provide here a description of how the members of the compliance panel are selected and the qualifications to be selected for the compliance panel.]

[REGIONAL ENTITY] shall conduct all compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, proposed Mitigation Plan, or a proposed Remedial Action Directive, in accordance with the Attachment 2, Hearing Procedures, to the NERC Compliance Monitoring and Enforcement Program, subject to the following deviations, if any: [Describe any deviations, or state "None". If there are deviations from the NERC pro forma Hearing Procedures, [REGIONAL ENTITY]'s Hearing Procedures shall be included as a separate attachment to this Exhibit D.]

Formatted: Left

3.0 OTHER DECISION-MAKING BODIES

~~If [Regional Entity] uses other decision-making bodies within its compliance program, provide here a description of the function of that body to the extent not described elsewhere in the Agreement or exhibits, how the members of that body are selected, and the qualifications to be selected for that body.~~ None. The WECC Compliance Committee provides general oversight and policy guidance but does not have decision-making authority with respect to compliance matters.

Figure ATT-2 –Hearing Process

*This merges with the Compliance Monitoring & Enforcement Program flow diagram at the Registered Entity Accepts or Rejects Hearing Outcome decision box

1.0 HEARING PROCEDURES

1.1 APPLICABILITY, DEFINITIONS AND INTERPRETATION

1.1.1 Procedure Governed

These Hearing Procedures shall govern the procedure before the Western Electricity Coordinating Council (“WECC”) in proceedings concerning (i) disputes regarding whether any entity should be or has been properly registered or certified, (ii) whether Registered Entities within WECC’s area of responsibility have violated Reliability Standards, (iii) if so, to determine the appropriate Mitigation Plans as well as any remedial actions, penalties or sanctions in accordance with the NERC *Sanction Guidelines* and other applicable penalty guidelines

approved by FERC pursuant to 18 C.F.R. Section 39.7(g)(2), or (iv) any other dispute that relates to enforcement of reliability standards properly before the WECC.

The standard of proof in any proceeding under these Hearing Procedures shall be by a preponderance of the evidence. The burden of persuasion on the merits of the proceedings shall rest upon the Compliance Staff alleging noncompliance with a Reliability Standard, proposing a penalty, opposing a Registered Entity's Mitigation Plan, or requiring compliance with a Remedial Action Directive.

1.1.2 Deviation

To the extent permitted by law, any provision in these Hearing Procedures may be waived, suspended or modified by the Hearing Officer or the Hearing Panel for good cause shown, either upon the Hearing Officer's or the Hearing Panel's own motion or upon the motion of any Party.

1.1.3 Standards for Discretion

These Hearing Procedures, and any discretion exercised hereunder, shall be interpreted in a manner intended to ensure just and reasonable proceedings and to effectuate the following Standards for Discretion:

- a) Integrity of the Fact-Finding Process - The principal goal of the hearing process is to assemble a complete factual record to serve as a basis for a correct and legally sustainable ruling, decision or order.
- b) Fairness - Persons appearing in WECC proceedings should be treated fairly. To this end, Parties should be given fair notice and opportunity to present explanations, factual information, documentation and legal argument. Action shall be taken as necessary to eliminate any disadvantage or prejudice to a Party that would otherwise result from another Party's failure to act diligently and in good faith.
- c) Independence - The hearing process should be tailored to protect against undue influence from any Person, Party or interest group.
- d) Balanced Decision-Making - Decisions should be based solely on the facts and arguments of record in a proceeding and by individuals who satisfy the conflict of interest provisions of section 1.8.4 of these Hearing Procedures.
- e) Impartiality - Persons appearing before the Hearing Panel should not be subject to discriminatory or preferential treatment. Registered Entities should be treated consistently unless a reasonable basis is shown in any particular proceeding to depart from prior rulings, decisions or orders.
- f) Administrative Efficiency and Expedition - Proceedings shall be brought to a conclusion as swiftly as is possible in keeping with the other goals of the hearing process.

1.1.4 Definitions and Interpretation

Unless otherwise defined, capitalized terms shall have the meanings described in the WECC Compliance Monitoring and Enforcement Program. Unless the context otherwise requires, the singular of a term used herein shall include the plural and the plural of a term shall include the singular. To the extent the text of a rule is inconsistent with its caption, the text of the rule shall control.

The following terms shall have the following meanings:

“Adjudicatory Officer,” means any person serving as a member of the Hearing Panel, Hearing Officer or Technical Advisor with respect to any proceeding.

“Clerk” means the person designated by WECC to receive filings and serve documents issued by or on behalf of, and otherwise provide support for, the Hearing Panel and Hearing Officer.

“Compliance Hearing Body,” is as defined in the WECC Compliance Hearing Body Charter.

“Critical Energy Infrastructure Information,” as defined in Section 1501 of the NERC Rules of Procedure.

“Critical Energy Infrastructure Information,” as defined in Section 1501 of the NERC Rules of Procedure, means specific engineering, vulnerability, or detailed design information about proposed or existing critical infrastructure that: (1) relates to details about the production, generation, transportation, transmission, or distribution of energy; (2) could be useful to a person in planning an attack on critical infrastructure; (3) is exempt from mandatory disclosure under the Freedom of Information Act, 5 U.S.C. 552 (2000); and (4) does not simply give the general location of the critical infrastructure.

“Cybersecurity Incident,” as defined in 18 C.F.R. § 39.1.

“Director of Compliance” means the Director of Compliance of WECC, who is responsible for the management and supervision of Staff.

“Document” means, in addition to the commonly understood meaning of the term as information written or printed on paper, any electronically stored information, including writings, drawings, graphs, charts, photographs, sound recordings, images and other data or data compilations stored in any medium from which information can be obtained, and shall be translated by the producing party into reasonably usable form.

“ERO” means the Electric Reliability Organization, currently the North American Electric Reliability Corporation, or any successor organization, certified by FERC pursuant to 18 C.F.R. Section 39.3.

“FERC” means the Federal Energy Regulatory Commission.

“Hearing Panel” means the persons assigned to render a final decision in matters requiring a determination under these Hearing Procedures.

“NERC” means North American Electric Reliability Corporation.

“Notice of Proceeding” means (1) a request for a hearing by a Registered Entity to contest an Alleged Violation, a proposed Penalty or a Remedial Action Directive, (2) a request for hearing by a Registered Entity or the Staff concerning a dispute as to whether the entity should be registered or certified, (3) a request for hearing by a Registered Entity in response to a Staff rejection of a proposed revised Mitigation Plan submitted after Compliance Staff rejected the Registered Entity’s initial proposed Mitigation Plan, or (4) any other notice that a proceeding has been properly commenced.

“Penalty” as used herein includes all penalties and sanctions, including but not limited to a monetary or non-monetary penalty; a limitation on an activity, function, operation or other appropriate sanction; or the addition of the Registered Entity to a reliability watch list composed of major violators.

“Person” means any individual, partnership, corporation, limited liability company, governmental body, association, joint stock company, public trust, organized group of persons, whether incorporated or not, or any other legal entity.

“Service List,” means the list maintained by the Clerk identifying the name, address, telephone number, and facsimile number and email address, if available, of each Party, the Hearing Officer, the Director of Compliance, the Registered Entity’s designated agent for service and any other individuals designated for service by a Party.

“Staff” means individuals employed or contracted by WECC who have the authority, among other things, to make initial determinations as to need for registration, compliance or violation with Reliability Standards by Registered Entities and associated Penalties, Mitigation Plans, and Remedial Action Directives.

“WECC’s area of responsibility” means WECC’s corporate region.

1.2 FILING AND SERVICE

1.2.1 Form and Content of Filings

All filings shall include (1) a caption that sets forth the title and docket number (if any) of the proceeding, (2) a heading that describes the filing and the Party on whose behalf the filing is made, (3) the name, address, telephone number and email address of the Party’s representative of the making, and (4) the service list. All filings shall be signed by an authorized representative of the Party on whose behalf the filing is made. The signature constitutes a certificate that the signer has read the filing, that the contents are true to the best of the signer’s knowledge and belief, and that service required by these Hearing Procedures has been made. Each filing shall include a service list identifying the Parties and authorized representatives served.

All filings shall be typewritten, printed, reproduced or prepared using a computer or other word or data processing equipment on white paper 8½ inches by 11 inches with inside text margins of not less than one inch. Page numbers shall be centered and have a bottom margin of not less than ½ inch. Line numbers, if any, shall have a left-hand margin of not less than ½ inch. Typeface shall be either Arial or Times New Roman font, black type on white background, and at least 12-point (at least 10-point for footnotes). Written testimony shall include continuous line numbers on the left-hand side of each page of text. Attachments shall, whenever practical,

conform to these requirements, except that any typeface shall be at least 8-point. Confidential documents shall comply with the requirements of any Protective Order issued under Section 1.10.

1.2.2 Submission of Filings

The original and five copies of any filing shall be made with the Clerk of WECC during WECC business hours (0800-1630 Mountain Time) each day except Saturday, Sunday, legal holidays and any other day declared by the WECC. Filing is complete when date stamped by the Clerk or received in the electronic mail by the Clerk.

Unless as otherwise provided, a filing may be effected by electronic mail if the filed documents are in pdf format and the requisite number of copies are delivered to the Clerk's office within seven business days thereafter.

1.2.3 Service

A copy of each filing must served on each person listed on the service list, by personal delivery, email (with paper copy to follow), United States mail (first class or registered) mail or deposit with an express courier service. The Clerk shall provide copies of all issuances of the Hearing Officer and Hearing Panel by similar means to each person listed on the service list and each member of the Hearing Panel, provided that the Initial and Final Decisions shall be served electronically and by certified mail on the Registered Entity and the Staff. Service is effective immediately if by personal delivery or email, upon deposit in the U.S. mail, or upon delivery to an express courier service.

1.2.4 Time

The time in which any action is required to be done shall be computed by excluding the day of the act or event from which the time period begins to run, and by including the last day of the time period, unless the last day is a Saturday, Sunday, legal holiday or any other day upon which the Office of WECC is closed, in which event the last day shall be the first succeeding day that is not such a day. Any Party requesting an extension of time after the expiration of the period prescribed shall demonstrate circumstances sufficient to justify the failure to act in a timely manner. Unless otherwise provided, whenever a Party has the right or is required to do some act within a prescribed period after the service, four days shall be added to the prescribed period when served by mail and the period until the next business day shall be added if served by courier.

1.3 PLEADINGS, MOTIONS AND OTHER FILINGS

1.3.1 Initiation of a Proceeding

A proceeding is initiated by a Notice of Proceeding. Any Notice of Alleged Violation or other action triggering a right to a hearing shall clearly state (as applicable) that the Registered Entity has the right to contest proposed registration or certification, that the Registered Entity has a right to a hearing, and shall describe or include (as applicable) the alleged violation, the proposed Penalty, the Staff's rejection of the proposed Mitigation Plan, or the issuance of a Remedial Action Directive. Upon receipt of a Notice of Proceeding, the Clerk shall issue a notice of

hearing, which identifies the Hearing Panel and, if applicable, the Hearing Officer assigned to the proceeding, and assigns a docket number that includes (separated by dashes) (1) the last two digits of the month and year, (2) the letters “[Regional Entity designation]”, and (3) a four digit number that is assigned sequentially beginning January 1 of each year (*e.g.*, 0707-WECC-0001).

Within five business days after the issuance of a Notice of Proceeding, WECC staff shall file and serve the notice of the Alleged Violation, the sanction originally provided to the Registered Entity and copies of any documents gathered and reviewed by WECC in the course of determining an Alleged Violation has occurred and in determining the proposed sanction or penalty. Within twenty days after the issuance of the Notice of Proceeding, (1) the Registered Entity shall file (as applicable) an explanation of why the Alleged Violation is in error, why the registration determination is in error, why the proposed penalty or sanction is inappropriate and/or the Registered Entity’s proposed Mitigation Plan, together with copies of all documents relied on by the Registered Entity to support its position, and (2) (if applicable) the Staff shall file its explanation why the Registered Entity’s proposed Mitigation Plan was not accepted, and copies of all documents relied on by the Registered Entity to support its position.

1.3.2 Amendments

Amendments to any filings initiating a proceeding or requesting a hearing may be allowed by the Hearing Officer or the Hearing Panel upon motion made within a reasonable time after the basis for the amendment became apparent, on such terms and conditions as are deemed to be just and reasonable.

1.3.3 Requirements for Motions

Unless otherwise provided, a Party may at any time seek any relief provided for under these Hearing Procedures or otherwise applicable authority by filing a motion in writing (or orally if during a hearing). All motions shall include a plain and concise statement of any facts upon which the motion is based, citations to the record or other sources, if available, any required verification under oath by a person having knowledge of the matters set forth in the filing, a description of the specific relief sought, and the authority that supports the request for relief. Unless otherwise provided, any responses to motions shall be filed within 14 business days after service of the motion, and replies to responses shall be filed within seven business days after service of the responses.

The Hearing Panel or Hearing Officer, in their discretion, may elect to hold oral argument on any matters in dispute.

1.3.4 Intervention; Consolidation of Related Proceedings

No interventions shall be permitted except upon approval of FERC. The Hearing Panel or Hearing Officer may, upon motion or their own initiative, order two or more matters partially or fully consolidated for any or all purposes if (1) events giving rise to the proceeding are the subject of another proceeding involving another Registered Entity, (2) it appears likely that consolidation is necessary to obtain all information necessary for decision and (3) reasonable procedures can be developed to prevent inappropriate disclosure of confidential information. Consolidation shall not be ordered unless all Parties in all proceedings have been provided notice and opportunity to be heard

1.3.5 Summary Disposition

The Hearing Panel or Hearing Officer may, upon motion or their own initiative, order summary disposition, in whole or in part, if there are no genuine issues of material fact with respect to the matters subject to summary disposition and the Party is entitled to summary disposition as a matter of law. Any factual allegations contained in a motion for Summary Disposition shall be supported by affidavit.

1.3.6 Interlocutory Review

Where the ruling for which interlocutory review is sought (1) presents an extraordinary circumstance which makes prompt review necessary to prevent prejudice to a Participant's ability to present its position in the proceeding or (2) involves a requirement that a non-Party produce information or testimony, a Party or person subject to the ruling may seek interlocutory review of any Hearing Officer ruling within 14 business days after the ruling. The Hearing Panel may affirm, reverse, remand, decline to act or take any other action on the Hearing Officer's ruling.

1.3.7 Pre-Evidentiary Hearing Submission of Testimony and Evidence

With the exception of examination of an adverse witness and of testimony and documents of a non-Party subject to an order to compel, all witness testimony, exhibits, and any documents intended to be introduced in connection with cross-examination, shall be filed at least five business days in advance of the evidentiary hearing pursuant to a schedule adopted for the proceeding.

1.3.8 Pre-Evidentiary Hearing Memorandum

Upon request of the Hearing Officer or the Hearing Panel, the Parties may be required to submit a memorandum prior to hearing describing the Party's position on the issue(s) in dispute, the key facts and arguments, and the applicable Reliability Standard, rules, orders or other authority. A Party will not be deemed to have waived any issue, fact or argument that is not set forth in a pre-evidentiary hearing memorandum.

1.4. DOCUMENT PRODUCTION

1.4.1 Inspection and Copying of Documents in Possession of Staff

(a) Documents to be Available for Inspection and Copying

Within five (5) business days of the initiation of the proceeding, the Staff shall make available to the Registered Entity for inspection and copying, all documents prepared by the Staff or obtained from the WECC, the Registered Entity or other sources, through or in connection with any compliance process that led to the institution of proceedings and not previously made available, including but not limited to all requests for information and responses, transcripts and transcript exhibits. Documents shall be made available during normal business hours at the WECC office where the documents are ordinarily maintained, or at such other office as the Hearing Panel or Hearing Officer, in his or her discretion, shall designate, or the Parties otherwise agree. The Registered Entity shall be responsible for the cost of photocopying, which shall be at a

reasonable rate. Documents received by the Staff thereafter shall be made available to the Registered Entity within 14 business days after receipt or as soon as possible if within 14 business days of the evidentiary hearing. In cases involving more than one Party other than the Staff, the Hearing Officer or Hearing Panel shall determine the extent to the extent to which, and conditions governing the provision of, documents relating to one Party shall be made available to another Party.

(b) Documents That May Be Withheld

The following documents are not subject to disclosure:

(1) Documents subject to a privilege available to the Staff or constituting attorney work-product of Staff's counsel (in applying this provision, the attorney-client privilege shall be recognized as absolute and any demand for production of attorney work product shall be granted only after a showing of substantial need by the Respondent);

(2) Documents that would disclose (i) an examination, investigatory or enforcement technique or guideline of WECC, a federal, state, or foreign regulatory authority, or a self-regulatory organization; (ii) the identity of a source, including a federal, state, or foreign regulatory authority or a self-regulatory organization that furnished information or was furnished information on a confidential basis regarding an investigation, an examination, an enforcement proceeding, or any other type of civil or criminal enforcement action; or (iii) an examination, an investigation, an enforcement proceeding, or any other type of civil or criminal enforcement action under consideration by, or initiated by, WECC, a federal, state, or foreign regulatory authority, or a self-regulatory organization;

(3) Documents containing confidential information, to the extent that disclosure would violate any applicable confidentiality requirement; or

(4) Documents not relevant to the subject matter of the proceeding or, upon order of the Adjudicatory Officer, for other good cause shown.

Provided, however, that nothing in Subparagraphs 1.4.1(b)(2), (3), (4) authorizes Staff to withhold a document, or part thereof, that contains exculpatory evidence, and nothing in Subparagraph (b)(1) requires Staff to withhold a document from disclosure.

The Staff shall provide to the Registered Entity, at the time the documents are provided, a list of documents withheld. Upon motion based on reasonable belief of a violation of these provisions or on their own motion, the Hearing Panel or Hearing Officer may require Staff (1) to submit any withheld document and (2) disclose to Registered Entity any document not meeting the standards of this subsection.

1.4.2 Other Discovery Procedures

In addition to the production of documents by Staff for inspection and copying by Registered Entity pursuant to Subparagraph 1.4.1(a), the Parties shall be entitled to utilize all other methods for obtaining information provided for in Rules 402 through 409 of the FERC Rules of Practice and Procedure, 18 C.F.R. §385.402 through 385.409, including data requests, written interrogatories and requests for production of documents or things, depositions by oral examination, requests for inspection of documents and other property, requests for admission and orders to compel (with respect to references to subpoenas, and which may be directed to non-

Party Registered Entities as well as Parties). Unless otherwise directed by the Hearing Officer or Hearing Panel upon motion by a Party or by the Hearing Officer, or by the Hearing Panel on its own motion, such discovery, and the resolution of any disputes concerning such discovery, shall be conducted in accordance with the provisions of Rules 402 through 410 and 510(e) of the FERC Rules of Practice and Procedure, 18 C.F.R. §385.402 through 385.410 and 510(e), which are hereby incorporated by reference into these Hearing Procedures, subject to the following limitations and modifications to such Rules:

- 1) The provisions of Subparagraph 1.4.1(b) shall apply to any such discovery.
- 2) Rule 403(b)(2) (18 C.F.R. §385.403(b)(2)) and Rule 410(d)(2) (18 C.F.R. §385.410(b)(2)) shall not be applicable.
- 3) The Hearing Officer and the Hearing Panel have the authority to issue orders to compel the appearance by, or production of documents or information by, only a Person that is a Party or a Registered Entity that is not a Party. The Hearing Officer and the Hearing Panel do not have authority to require a United States marshal or deputy marshal to serve any order to compel.
- 4) A list of documents withheld shall be provided, by the deadline for production of the documents, to the Adjudicatory Officer and each Party entitled to receive the documents.
- 5) References to the “Commission” in Rules 402 through 408 and 410 and 510(e) shall be to FERC except as follows: (i) the references in Rules 402(a), 404(b)(1) and 405(b), the second reference in Rule 410(d) and the references in Rule 510(e)(1) and (2) shall be deemed to be to the Hearing Panel, and (ii) the reference in Rule 385.406(b)(4) to “Commission trial staff” shall be deemed to be to Staff, and the reference in Rule 510(e)(3) shall be deemed to be to the Adjudicatory Officer.
- 6) Unless otherwise ordered by the Hearing Officer or Hearing Panel, a data request, set of interrogatories, request for production of documents or things, request for inspection of documents or other property, request for admissions, or order to produce or provide documents, information or testimony, shall not specify a due date or response date that is fewer than 21 days from the date of service of the request or the date of the order.
- 6) Unless otherwise ordered by the Hearing Officer or Hearing Panel, all such discovery shall be requested, scheduled and conducted so as to be completed within six (6) months following the date of the initial prehearing conference held pursuant to Paragraph 1.5.2.

The Hearing Officer’s ruling on all motions relating to disputes concerning such discovery shall consider the following objectives: (i) full disclosure of all relevant documents and information; (ii) the exercise of due diligence in the conduct of discovery by a Participant; and (iii) disallowing use of discovery as a means to delay the proceeding or to harass or burden any other Participant.

1.5 HEARINGS AND CONFERENCES

1.5.1 General

The Clerk shall issue a notice for each conference and hearing, which shall identify the matter(s) to be considered, the person(s) comprising the Hearing Panel or Hearing Officer, and the date, time and place of the hearing or conference. Unless otherwise ordered, all hearings and conferences shall be held during normal business hours at the principal office of WECC. Hearings need not be held on consecutive days.

All hearings, conferences, and other meetings shall be closed to the public, and all notices, rulings, orders or any other issuances of the Hearing Officer or Hearing Panel shall be nonpublic and held in confidence by the Parties unless the ERO (within the U.S., in accordance with the authorization previously granted by FERC to release information about a non-public proceeding) or FERC (in the case of U.S.-related information) or another Applicable Governmental Authority (in the case of non-U.S.-related information) determines that public release is appropriate. Only the Adjudicatory Officers, representatives of the Parties, and other necessary personnel (such as court reporters) shall be allowed to participate in or obtain information relating to the proceeding.

Upon a request, the Hearing Panel or Hearing Officer may permit Parties to appear and witnesses to testify via videoconference or teleconference at any conference or hearing if necessary to avoid undue expense or undue delay in the proceeding.

All hearings and (at the discretion of the Hearing Panel or Hearing Officer) all conferences shall be transcribed verbatim by a certified court reporter. A Party may request corrections to the transcript within 35 days after receipt of the transcript and any responses shall be filed within ten business days thereafter. Each Party is responsible for the costs of a copy of any transcript ordered by it.

1.5.2 Prehearing and Status Conferences

A prehearing conference shall be held within a thirty days after initiation of a proceeding, to identify issues then known to the Parties, establish a schedule and to address any other relevant matter. Any Party may request, and the Hearing Panel or Hearing Officer may call, a status conference at any time subsequent to the Prehearing Conference to address any issues that have arisen. The Hearing Panel or Hearing Officer may summarize actions taken in a memorandum.

1.5.3 Evidentiary Hearings

A Party has the right to present such evidence, to make such objections and arguments, and to conduct such cross-examination as may be necessary to assure the true and full disclosure of the facts. All testimony shall be under oath.

Evidence is admissible if it is of a type commonly relied upon by reasonably prudent persons in the conduct of their affairs, but may be excluded if immaterial or unduly repetitious or

prejudicial. The Hearing Panel or Hearing Officer may exclude material from the record only in response to a motion or objection by a Party.

Upon 14 business days' advance notice and subject to the objection by another Party, any Party may call and cross-examine as an adverse witness, any other Party, or any employee or agent thereof or Registered Entity that has been subject to an order to compel.

Upon motion, the Hearing Panel or Hearing Officer may take official notice of and the type of information any of the following:

- 1) Rules, regulations, administrative rulings and orders, and written policies of governmental bodies and Regional Entities, including WECC;
- 2) Municipal and other ordinances;
- 5) Generally recognized scientific or technical facts within the specialized knowledge of WECC;
- 4) Other facts not reasonably subject to dispute; and
- 6) All other matters of which the courts of the United States may take judicial notice.

Any document, and any item officially noticed that exists in document form, shall be introduced into the record in the form of an exhibit.

The Hearing Panel or (prior to issuance of an Initial Decision) the Hearing Officer may allow oral argument, and also may reopen the evidentiary record and hold additional hearings if warranted by any changes in fact or law since the hearing.

1.5.4 The Record

The record shall include the following:

- 1) The filing(s) that initiated the proceeding, responsive documents, and a list of all documents comprising the record;
- 2) Notices, rulings, orders, decisions and other issuances of the Hearing Officer and Hearing Panel;
- 3) All motions, briefs and other filings;
- 4) All prefiled testimony, exhibits, other evidence, information excluded from evidence, transcripts and matters officially noticed;
- 5) All Notices of *ex parte* communications and any notifications of recusal and motions for disqualification of any Adjudicatory Officer and any responses or replies thereto;
- 6) The Hearing Officer's Initial Decision, and exceptions thereto; and

- 7) The Hearing Panel's Final Decision and any Notice of Penalty therewith.

1.5.5 Briefs and Other Post-Hearing Pleadings

At the close of the evidentiary hearing, Parties may file initial briefs, proposed findings of fact and reply briefs. Absent good cause shown, post-hearing pleadings shall not seek to introduce additional evidence into the record after the hearing has ended.

1.6 DECISIONS

1.6.1 Initial Decisions

The Hearing Officer shall issue an Initial Decision that shall include (1) a statement of each finding and conclusion, and the reasons or basis therefore, for all material issues of fact, law or discretion presented on the record, and (2) appropriate proposed orders to dispose of the proceeding, including any Penalty, sanction, remedial action or Mitigation Plan required. Any proposal for a Penalty shall include a proposed Notice of Penalty. The Initial Decision shall note if the subject of the proceeding has been deemed to involve a Cybersecurity Incident or if any information in the proceeding was deemed to be Critical Energy Infrastructure Information protected pursuant to Paragraph 1.10. The Initial Decision shall normally be issued within thirty days following the submission of post-hearing briefs, or, if waived, following the conclusion of the hearing.

Any Party may file exceptions to the Initial Decision and replies consistent with any deadlines established in the proceeding.

1.6.2 Hearing Panel Final Decision

The Hearing Panel shall issue a Final Decision following the receipt of (1) the Initial Decision, any exceptions and replies thereto, and oral argument, if any, (where a Hearing Officer has been appointed) or (2) the briefs and reply briefs (where no Hearing Officer was appointed). The Hearing Panel shall strive, but shall not be required, to issue its Final Decision within thirty (30) days after the matter is ready for decision.

In cases where a Hearing Officer is appointed, the Final Decision may adopt, modify, amend or reject the initial opinion in its entirety or in part. The Final Decision shall include (1) a statement of each finding and conclusion, and the reasons or basis therefore, for all material issues of fact, law or discretion presented on the record, and (2) appropriate orders to dispose of the proceeding, including any Penalty, sanction, remedial action or Mitigation Plan required. If the Final Decision imposes a Penalty, it shall be entitled Final Order and Notice of Penalty. The Final Order shall note if the subject of the proceeding has been deemed to involve a Cybersecurity Incident or if any information in the proceeding was deemed to be critical energy infrastructure information protected pursuant to Paragraph 1.5.9.

When the Hearing Panel serves the Final Decision, it will inform the Parties of their appeal rights. The Clerk shall transmit the documents identified in Section 1.5.4, which shall constitute the record for purposes of 18 C.F.R. § 39.7(d)(5), to the ERO at the time it serves the ERO with the Final Decision.

1.6.3 Appeal

A Final Decision of the Hearing Panel may be appealed to NERC in accordance with NERC's Rules of Procedure, Section 410. The Clerk shall transmit the record of any docket to NERC that is the subject of an appealed Final Order.

1.6.4 Settlement

Settlement Agreements may be entered into at any time including prior to the issuance of a Notice of Proceeding or during an appeal at the ERO, until a Notice of Confirmed Violation, Notice of Penalty, Notice of Mitigation Plan or Remedial Action Directive, whichever is applicable, is filed with the appropriate regulatory authority. All Settlement Agreements entered into prior to the issuance of a Final Decision shall be subject to approval of the Hearing Panel. Any rejected Settlement Agreement shall not be admissible into evidence and the proceedings shall continue as if the Settlement Agreement had not been filed.

1.7 PARTIES AND APPEARANCES

1.7.1 Parties

The Parties shall include: the Registered Entity who is subject of the Notice of Alleged Violation, contested Mitigation Plan or contested Remedial Action Directive that is the basis for the proceeding, whichever is applicable; the Staff and any other person allowed or required by FERC to participate as an intervenor in a proceeding conducted pursuant to these Hearing Procedures.

1.7.2 Appearances

Parties shall file written appearances within seven (7) business days after service of the filing initiating the proceeding. A Party's written appearance shall identify the name(s) of each individual authorized to represent the Party in the proceeding exclusive of witnesses. An individual may appear on his or her own behalf. A corporation, association, partnership or governmental body may appear by an attorney or any *bona fide* officer or designee who has the authority to act on behalf of the Party.

A Party's written appearance shall state, with respect to each individual that the Party identifies for service, the individual's name, address, telephone number, and facsimile number and email address, if available, where service shall be made.

A Party may withdraw any individual from the Party's representation or otherwise change the identity of individuals authorized to represent the Party in a proceeding by filing a notice of a change in service list.

Any attorney appearing on behalf of a Party shall be licensed to practice and in good standing before the Supreme Court of the United States or the highest court of any State, territory of the United States or the District of Columbia.

1.7.3 Confidentiality

All participants in any proceeding before the Hearing Panel shall be take all actions necessary to be bound by confidentiality obligations consistent with NERC Rule of Procedure 1504.

1.8 RESPONSIBILITIES OF ADJUDICATORY OFFICERS

1.8.1 Hearing Panel

The Hearing Panel shall be selected from the Compliance Hearing Body, as provided in the WECC Compliance Hearing Body Charter, and the composition of the Hearing Panel shall assure that no two industry segments may control, and no single industry segment may veto, any decision by the Hearing Panel. The Hearing Panel is vested with all necessary the authority to preside over all matters relating to a proceeding, including the following:

1. To establish the scope of the proceeding, including segregation of issues into separate phases of the proceeding and consolidation of related proceedings;
2. Take such action as necessary to assure the confidentiality of the proceeding and documents produced in connection with the proceeding;
3. Establish and modify the schedule for the proceeding, and modify any deadline or required interval;
4. Supervise discovery and rule on any disputes relating thereto;
5. Preside over prehearing conferences, status hearings, oral arguments and evidentiary hearings, including administering oaths and affirmations, ruling on evidentiary matters, requiring the introduction of additional evidence;
6. Issue a Final Decision and rule upon all motions and all other requests for relief;
7. Take other actions necessary and appropriate for the adjudication of the proceeding.

All actions (including all rulings, orders and determinations) of the Hearing Panel shall require a quorum consisting of a majority of the persons assigned to the Hearing Panel, unless waived by the Parties in a particular circumstance, subject in all events to the requirement that no two industry segments may control, and no single industry segment may veto, Hearing Panel actions. All rulings, orders and determinations of the Hearing Panel shall require the vote of a majority of the persons constituting a quorum. Where necessary, one or more persons assigned to the Hearing Panel may participate by teleconference as long as a majority are present in person; provided that all persons assigned to the Hearing Panel may participate by teleconference with respect to a Remedial Action Directive hearing. All rulings, orders and determinations shall be recorded in a written ruling or in a transcript and shall be designed to promote the conduct of a full, fair and impartial proceeding and to effectuate the standards of discretion.

1.8.2 Hearing Officer

WECC may designate one or more Staff members, third-party contractors, or industry stakeholders to serve as Hearing Officers and may thereby preside over any aspect of the proceeding to the same extent as the Hearing Panel, except that the Hearing Officer will issue an

Initial Decision and the Final Decision or other order finally disposing of the proceeding or issues within the proceeding must be issued by the Hearing Panel.

1.8.3 Technical Advisor

The Hearing Officer and/or the Hearing Panel may designate one or more Staff members, third-party contractors, or industry stakeholders to serve as Technical Advisors to assist in any proceeding by providing technical advice.

1.8.4 Conflict of Interest

A person shall be disqualified from serving as an Adjudicatory Officer in any proceeding if (1) he or she has been involved in or consulted at any time in regard to any Staff investigation, initial determination of violation or Penalty, or assessment of a Registered Entity's proposed Mitigation Plan relating to the proceeding or (2) his or her participation would violate WECC's applicable conflict of interest policies. An Adjudicatory Officer shall recuse himself or herself from serving in proceeding if disqualified.

Any Adjudicatory Officer shall disclose to the Service List his or her identity, employment history and professional affiliations within two business days of assignment to the proceeding.

1.8.5 Ex Parte Communications

No Adjudicatory Officer assigned to a proceeding may communicate concerning any matter relating to the proceeding, directly or indirectly with any Person who is not an Adjudicatory Officer with respect to a proceeding, except after reasonable notice to all Parties and opportunity to participate.

Any Adjudicatory Officer who makes or receives an *ex parte* communication shall, within seven (7) business days, file and serve on the Parties a description of the date, time, place, substance of and a list of each person making or receiving the *ex parte* communication, and include any written *ex parte* communication.

1.8.6 Motion for Disqualification

Any Party may move to disqualify an Adjudicatory Officer on the basis of conflict of interest, or on the basis of a prohibited *ex parte* communication or other circumstances that could interfere with the impartial performance of his or her duties. The motion shall describe the underlying facts by affidavit and shall be filed within fifteen days after the Party learns of the facts believed to constitute the basis for disqualification or reasonably in advance of any hearing, whichever is earlier. The ruling on a motion to disqualify an Adjudicatory Officer shall be made by the Hearing Panel, provided that the ruling on a motion to disqualify a Hearing Panel member shall be made by the Hearing Panel without participation by the member subject to the motion. Any challenge to a disqualification ruling by a Hearing Officer is waived if no interlocutory appeal has been filed within five business days of the ruling. Any disqualified Adjudicatory Officer shall be replaced as soon as practicable.

1.9 REMEDIAL ACTION DIRECTIVES

1.9.1 Initiation of Remedial Action Directive Hearing

Staff may issue a Remedial Action Directive to a Registered Entity at any time, including during any proceeding related to an alleged violation of a Reliability Standard. Notice of the Remedial Action Directive shall not be effective until actual receipt by the Registered Entity, as provided in Section 7.0 of the Compliance Monitoring and Enforcement Program. WECC will notify NERC within two (2) business days after its Staff issues a Remedial Action Directive.

The Registered Entity may contest the Remedial Action Directive by filing a written notice with the Clerk of the WECC that states that the Registered Entity contests the Remedial Action Directive and that the Registered Entity requests a Remedial Action Directive hearing. The Registered Entity shall attach a copy of the Remedial Action Directive to its written notice. The Registered Entity must provide such notice within two (2) business days following actual receipt of the Remedial Action Directive. If the Registered Entity does not give written notice to WECC within the required time period, the Registered Entity shall be deemed to have waived its right to contest the Remedial Action Directive.

The Clerk shall assign a docket number, and issue a Notice of Hearing.

1.9.2 Remedial Action Directive Procedure

Proceedings to address Remedial Action Directives shall be conducted only under the expedited hearing process set forth in this Paragraph 1.9.2. All other provisions of the Hearing Procedures shall apply to the Remedial Action Directive hearing unless inconsistent with or inapplicable to the procedures set forth in this paragraph.

The Remedial Action Directive hearing will be conducted according to the following guidelines:

- a) The Hearing Panel or Hearing Officer will hold a prehearing conference within two (2) business days after receipt of the Registered Entity's request for a hearing.
- b) An evidentiary hearing will be conducted on the matter, in person or by teleconference, within seven (7) business days after the prehearing conference. The provisions in Section 1.4 concerning document production shall not apply.
- c) At the evidentiary hearing, Staff and the Registered Entity shall have the opportunity to present oral witness testimony and evidence, which shall be rendered under oath, and to conduct cross-examination.
- d) At the evidentiary hearing, the Parties shall have the opportunity to make opening and closing statements, but shall not file any briefs or draft opinions, and oral argument shall not be held.
- e) The Hearing Panel shall issue a summary written decision within ten (10) business days following the hearing, stating whether the Registered Entity shall (upon receipt of the decision) or shall not be required to comply with the Remedial Action Directive and identifying any modifications to the Remedial Action Directive that it finds appropriate. In the event a Hearing Officer has been appointed, the Initial Decision will be issued within a timeframe that permits review and comment by the Parties and issuance of a summary written decision within the ten-day deadline.

- f) Within thirty (30) days following issuance of its summary written decision, the Hearing Panel shall issue a full written decision. The written decision shall state the conclusions of the Hearing Panel with respect to the Remedial Action Directive, and shall explain the reasons for the Hearing Panel's conclusions.
- g) The Final Decision may be appealed to NERC pursuant to section 1.6.3.

1.10. PROTECTIVE ORDERS

- a) At any time during a proceeding, including in connection with document production under section 1.4, on the Hearing Officer's or the Hearing Panel's own motion or on the motion of any Party, an order may be entered to designate as proprietary and protect the confidential, proprietary or trade secret nature of any data, information or studies, or any other information the public release of which may cause a security risk or harm to a Party.
- b) The following types of information will be considered entitled to protection through a Protective Order: (i) confidential business and market information, including information that is proprietary, commercially valuable, or competitively sensitive; (ii) critical energy infrastructure information; (iii) information related to a Cybersecurity Incident; (iv) personnel information that identifies or could be used to identify a specific individual, or that reveals personnel, financial, medical or other personal information; (v) audit work papers; or (vi) investigative files that would disclose investigative techniques. Nothing in this Subparagraph shall require Staff to produce any documents it is entitled to withhold under Subparagraph 1.4.1(b)
- c) A Party submitting a motion for a protective order shall specify the proposed expiration date for the proprietary status of the data, information or studies, if any, and shall propose requirements or safeguards to be met for individuals participating in the proceeding to review the protected information.
- d) A document submitted and marked as proprietary, or a statement made at a hearing and identified as proprietary, shall be afforded proprietary treatment pending the timely submission of a motion to protect the confidential, proprietary or trade secret nature of that document or statement and a ruling on such a motion by the Hearing Officer or Hearing Panel.
- e) The protective order shall identify the data, information or studies that will be accorded proprietary treatment; the individuals participating in the proceeding, by category or otherwise, entitled to view the proprietary information; and the requirements, conditions or safeguards that must be met before an individual may view the information. The order shall also specify any required indications of confidentiality, such as colored paper or notation.
- f) A public redacted version of each document and transcript that contains information that is protected pursuant to this Paragraph must be filed with the proprietary version and must be served on each Party for distribution to those individuals participating in the proceeding who are not entitled to view the proprietary information.

- g) Should it be necessary to address proprietary information during a hearing, the Hearing Officer or Hearing Panel shall exclude from the hearing all individuals other than those entitled to access to the proprietary information in accordance with the protective order.

EXHIBIT E

Exhibit E — Funding

1. Scope of activities funded through the ERO funding mechanism

~~[Regional Entity]~~WECC shall include in its annual budget submission to NERC amounts for costs it will incur in performing its delegated functions and related activities as described in Sections 5, 6 and 7 of the Agreement. These activities shall include:

- Reliability ~~Standard~~Standards Development
- Compliance Monitoring and Enforcement
This category encompasses WECC's Compliance Monitoring and Enforcement Program, including activities under the WECC Reliability Management System
- Organization Registration and Certification
- Reliability Assessment and Performance Analysis (including necessary data gathering activities)
This category includes WECC's Transmission Expansion Planning Program, Loads and Resources Activities, and all necessary supporting activities
- Event Analysis and Reliability Improvement
- Training and Education
This category includes WECC's Training Programs
- Situation Awareness
This category includes WECC's Reliability Coordinator Functions, Western Interconnection Synchrophasor Program, WECC Interchange Tool, and all necessary supporting activities
- Infrastructure Security

2. Preparation of Annual Business Plan and Budget

(a) NERC and ~~[Regional Entity]~~WECC, in conjunction with the other Regional Entities, shall collaboratively develop an annual schedule for the development, submission, review and approval of ~~[Regional Entity's]~~WECC's business plan and budget.

The annual schedule for the preparation of business plans and budgets shall require

~~[Regional Entity]~~WECC (i) to submit to NERC draft(s) of ~~[Regional Entity]'s~~WECC's

proposed business plan and budget and other preliminary documents and information, and (ii) to submit a final proposed business plan and budget that has been approved by ~~[Regional Entity]WECC~~ Board of Trustees to NERC by July 1 or such other agreed date as provides sufficient time for NERC's review, approval and submission of ~~[Regional Entity]'sWECC's~~ business plan and budget to the Commission 130 days in advance of the beginning of each fiscal year. The ~~[Regional Entity]WECC~~ business plan and budget submission shall include supporting materials, including ~~[Regional Entity]'sWECC's~~ complete business plan and organization chart, explaining the proposed collection of all assessments, dues, fees and charges, ~~and~~ the proposed expenditure of the funds to be collected in sufficient detail to justify the requested budgeted expenditures and assessments. ~~[Regional Entity]'s WECC's~~ business plan and budget and proposed assessments shall provide for reasonable reserve mechanisms for unforeseen and extraordinary expenses and other contingencies, consistent with generally accepted accounting principles.

____ (b) NERC shall review and approve ~~[Regional Entity]'sWECC's~~ proposed business plan and budget and proposed assessments for performing the delegated functions and related activities described in Sections 5, 6 and 7 of this Agreement and listed above in Section 1 of this **Exhibit E**, or shall direct ~~[Regional Entity]WECC~~ to make such revisions as NERC deems appropriate prior to approval. NERC shall submit ~~[Regional Entity]'sWECC's~~ approved business plan and budget and proposed assessments to the Commission for approval as part of NERC's overall business plan and budget submission, in accordance with the ERO Regulations.

3. Allocation of Costs

Assessments to fund the costs of ~~[REGIONAL ENTITY]'sWECC's~~ delegated functions and related activities pursuant to the Agreement shall be allocated among all load-serving entities on the basis of Net Energy for Load, unless a different method(s) of allocating and calculating such assessments has been submitted to and approved by NERC and the Commission in accordance with Section 9(b) of the Agreement. ~~[Regional Entity]WECC~~

shall submit to NERC annually at the same time it submits its budget request a list of the load-serving entities or designees within its geographic boundaries that shall be responsible for paying ~~[Regional Entity's]~~WECC's assessment and the load-serving entities' proportionate Net Energy for Load, and such other data and information as is necessary to allocate and calculate the allocation of ~~[Regional Entity's]~~the assessment to the load-serving entities or designees under the method(s) of allocation and calculation that will be used.

~~[IF NERC WILL BILL AND COLLECT ASSESSMENTS DIRECTLY FROM LOAD-SERVING ENTITIES IN REGIONAL ENTITY'S REGION, USE THE FOLLOWING TEXT FOR SECTION 4(a):]~~

~~(a) NERC shall submit invoices to the load-serving entities or designees identified by [Regional Entity] covering the NERC and [Regional Entity] assessments approved for collection.~~

~~[IF THE REGIONAL ENTITY WILL ACT AS THE BILLING AND COLLECTION AGENT ON BEHALF OF NERC TO BILL AND COLLECT ASSESSMENTS FROM LOAD-SERVING ENTITIES IN REGIONAL ENTITY'S REGION, USE THE FOLLOWING TEXT FOR SECTION 4(a):]~~

~~4. Entities on the list of LSEs or Balancing Authorities will be responsible for collection and/or payment of charges through the mechanism described in either Option 1 or 2 below. Each Balancing Authority will inform WECC by June 1st of each year of its choice of Option 1 or 2, and will give WECC at least 90 days notice of its intention to change from one option to the other.~~

~~a. OPTION 1 -- The Balancing Authority will provide WECC a list of all LSEs located within its area, including each LSE's name, contact information, and Net Energy for Load. This information will be updated annually and provided to WECC no later than June 1st of each year. WECC will use this list to bill each LSE for all costs on an annual basis.~~

b. OPTION 2 -- WECC will bill the Balancing Authority for all costs on an annual basis. The Balancing Authority will be responsible for equitably allocating WECC costs among the LSEs in its area (if applicable) on the basis of Net Energy for Load, collecting the funds, and ensuring that WECC receives full payment on an annual basis.

4. Collection of Funding

(a) NERC and [Regional Entity]WECC agree that [Regional Entity]WECC shall act as the billing and collection agent on behalf of NERC to bill and collect [Regional Entity]'s WECC's assessments from load-serving entities and designees (or such other entities as agreed by NERC and [Regional Entity]). [Regional Entity]WECC). WECC agrees that it shall (i) issue all invoices to ~~load-serving entities and other entities~~each LSE or Balancing Authority (depending on the Balancing Authority's choice of Option 1 or 2 above) in a prompt and timely manner after receipt from NERC of the information needed to issue ~~the~~ invoices, but no later than November 15th each year; (ii) exercise commercially reasonable efforts to collect invoices that are not paid as of the due date(s); and (iii) transfer all funds collected to NERC in a timely manner, as follows: ~~Prior to the start of each calendar quarter, and once~~Once per week ~~thereafter~~ until all billings ~~for the quarter~~ are collected, [Regional Entity]WECC will electronically transfer to NERC, in immediately available funds, all payments received by [Regional Entity]WECC from load-serving entities or other entities for ~~the~~ payment of annual invoices. On the same day that [Regional Entity]WECC makes each electronic transfer of funds to NERC, [Regional Entity]WECC shall send an e-mail to the Chief Financial Officer or Controller of NERC detailing the collections being transmitted, including a listing of the load-serving entities or other entities from which payments were collected and the amount collected from each entity. ~~[Note: If NERC and Regional Entity have a different collection and payment arrangement, the preceding two sentences will be modified accordingly to describe it.] and the breakdown of the total payments collected among NERC statutory funding, WECC statutory funding and WIRAB statutory funding.~~

[Regional Entity]WECC agrees that it shall not in any way use its position as billing and collection agent for NERC to attempt to influence NERC's policies or decisions on matters relating to adoption of Reliability Standards (including Regional Reliability

Standards and Regional Variances), administration of the ~~compliance~~
~~monitoring~~Compliance Monitoring and ~~enforcement~~Enforcement program and other
compliance and enforcement matters, determination and imposition of penalties and
sanctions, budgeting matters including review and approval of ~~[Regional~~
~~Entity's]~~WECC's budgets and business plans, or any other NERC decisions, including by
issuing invoices, engaging in collection activities or transferring funds collected to NERC
in an untimely manner or other than in accordance with this Agreement. To the extent
WECC uses another entity as collection agent, it will incorporate these safeguards in the
arrangements with the collection agent.

Within three (3) business days following receipt of an electronic transfer of collected
assessments from WECC in accordance with Section 4(a) of this Exhibit E, NERC will
electronically transfer (i) to WECC, in immediately available funds, the portion of the
payment received from WECC constituting WECC statutory funding, and (ii) to WIRAB,
in immediately available funds, the portion of the payment received from WECC
constituting WIRAB statutory funding.

____ (b) NERC shall pursue any non-payments of assessment amounts and shall request
assistance from ERO Governmental Authorities as necessary to secure collection. To the
extent reasonably practicable, ~~[Regional Entity]~~WECC shall assist NERC in pursuing and
collecting any non-payments. Notwithstanding the foregoing, ~~[Regional Entity]~~WECC is
not responsible and does not assume any liability for recovering non-payments or
underpayments of assessment amounts. NERC shall retain sole responsibility for
recovering non-payments or underpayments of assessment amounts. NERC shall add the
amount of any non-payments by end-users or designees within ~~[REGIONAL~~
~~ENTITY]'s]~~WECC's region, that are reasonably determined to be uncollectible, to
NERC's assessments for a subsequent year with the amount of such non-payments to be
allocated to end-users within ~~[Regional Entity]~~'s]WECC's region.

~~(c) Upon approval by ERO Governmental Authorities of [Regional Entity]'s annual~~
~~assessment to fund the costs of its delegated functions and related activities, NERC shall~~

~~pay [Regional Entity's] annual assessment to Regional Entity in four equal quarterly payments on January 15, April 15, July 15 and October 15 of the budget year.~~

5. Application of Penalties

Except as otherwise approved by the Commission, all penalty monies received by ~~[Regional Entity], WECC~~, other than penalty monies received from an operational function or division or affiliated entity of ~~[Regional Entity], WECC~~, shall be applied as a general offset to ~~[Regional Entity]'s WECC's~~ budget requirements for U.S.-related activities under this Agreement for ~~the~~ subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity. Except as otherwise approved by the Commission, any penalty monies received by NERC from an operational function or division or affiliated entity of ~~[Regional Entity] WECC~~ shall be transmitted to or retained by NERC and shall be used by NERC as a general offset to NERC's budget for its activities as the ERO under the Act for the following year.

6. Budget and Funding for WECC's Non-Statutory Activities

In addition to its delegated functions and related activities, as specified in Sections 5, 6 and 7 of the Agreement and in Section 1 of this **Exhibit E** (such delegated functions and activities referred to in this Section 6 as "statutory activities"), ~~[Regional Entity] WECC~~ performs the following other functions and activities (such other functions and activities being referred to in this Section 6 as "non-statutory activities"): ~~[List and describe all non-statutory activities performed by Regional Entity, or state "None".]~~ Western Renewable Generation Information System ("WREGIS").

~~[Regional Entity] WECC~~ shall employ the following methods and procedures to (i) keep its funding mechanisms for its statutory activities separate from its funding mechanisms for its non-statutory activities, and (ii) record the costs it incurs in the performance of its non-statutory functions separately from the costs it incurs in the performance of its statutory functions: ~~[List and describe the methods and procedures Regional Entity employs to keep costs and funding of statutory activities separate from costs and funding of non-statutory activities, including at a minimum a description of how Regional Entity's~~

~~bank accounts and receivables/payables procedures are set up for both statutory and non-statutory functions, a description of how Regional Entity ensures each employee involved in both statutory and non-statutory functions keeps accurate time records reflecting his/her activities, and a description of how Regional Entity's general and administrative costs are allocated between statutory activities and non-statutory activities. If the necessary descriptions are lengthy they may be provided in a separate attachment labeled "Attachment E-1", and state here "See Attachment E-1." If Regional Entity has listed no non-statutory functions in the preceding paragraph, state here "Not applicable."}; WECC utilizes a fund accounting system with capabilities to segregate receipts and expenses based on function or activity. WECC has segregated non-statutory activities by assigning a separate fund code to those receipts and expenses. All expenditures or receipts that are entered into WECC's accounting system must include a fund code identifying whether the transaction is related to statutory or non-statutory activities. General and administrative costs are allocated to non-statutory activities based on an FTE ratio that is consistent with NERC's accounting methodology for allocation of overhead to statutory activities. For these reasons, time records are not necessary for WECC to properly allocate costs between statutory and non-statutory activities.~~

~~[Regional Entity]WECC shall provide its budget for such non-statutory activities to NERC at the same time that [Regional Entity]WECC submits its proposed annual business plan and budget for statutory activities to NERC pursuant to Section 9 of the Agreement.~~

~~[Regional Entity's]WECC's budget for non-statutory activities that is provided to NERC shall contain a detailed list of [Regional Entity's]WECC's non-statutory activities and a description of the funding sources for the non-statutory activities. [Regional Entity]WECC agrees that no costs (which shall include a reasonable allocation of [Regional Entity]'sWECC's general and administrative costs) of non-statutory activities are to be included in the calculation of [Regional Entity's]WECC's assessments, dues, fees, and other charges for its statutory activities.~~

7. Amended or Supplemental Business Plans and Budgets

During the course of the fiscal year, if ~~[Regional Entity]WECC~~ determines it does not or will not have sufficient funds to carry out its delegated functions and related activities,

~~[Regional Entity]~~WECC shall submit to NERC one or more proposed amended or supplemental business plans and budgets and requests for approval of supplemental assessments, reflecting costs, cost increases or funding shortfalls not provided for in ~~[Regional Entity]'s~~WECC's approved business plan and budget for the fiscal year. NERC shall review and approve the proposed amended or supplemental business plan and budget and proposed supplemental assessment, or shall direct ~~[Regional Entity]~~WECC to make such revisions as NERC deems appropriate prior to approval. NERC shall submit ~~[Regional Entity]'s~~WECC's approved amended or supplemental business plan and budget and proposed supplemental- assessment to the Commission for approval.

8. NERC Review of Regional Entity Financial Statements

NERC shall conduct reviews of the quarterly and annual financial statements submitted by ~~[Regional Entity]~~WECC pursuant to Section 9(h) and (i) of the Agreement. ~~[Regional Entity]~~WECC shall provide supporting documentation for the quarterly and annual audited financial statements as reasonably requested by NERC based on its reviews.

February 9, 2010

Mr. David Cook
Vice President and General Counsel
North American Electric Reliability Corporation
Princeton Forrestal Village
116-390 Village Boulevard
Princeton, NJ 08540-5721

Subject: Request for NERC Approval and Filing to Regulators of Revised Corporate Bylaws of
Midwest Reliability Organization

Dear David:

Please find attached to this letter the Amended and Restated Bylaws of the Midwest Reliability Organization, Inc. ("MRO") reflecting amendments to the bylaws approved by the Members of Midwest Reliability Organization on January 29, 2010. The clean and redlined versions of the bylaws are included in this narrative as Attachment B and C. The Members of MRO approved these amendments to address non-substantive changes to the bylaws as they existed before January 29, 2010. A detailed description of each revision, including the basis for change, is defined further in this document as Attachment A.

As a cross-border Regional Entity, MRO operates under delegated authority of regulators in both the United States and Canada. MRO therefore respectfully requests that the North American Electric Reliability Corporation ("NERC") approve these amendments to the MRO Bylaws and file the revised and restated bylaws with the appropriate regulatory authorities in both the U.S. and Canada for approval.

In the U.S., by filing with the Federal Energy Regulatory Commission ("FERC" or "Commission"), MRO seeks to satisfy the requirements of the Commission's regulations regarding changes to Regional Entity Rules as specified in the Commission's regulations, 18 C.F.R. §39.1 (2007), the bylaws of a Regional Entity such as MRO are Regional Entity Rules. As such, the Commission's regulations require that any changes or revisions to the MRO Bylaws must be approved by NERC, as the Electric Reliability Organization, and then submitted by NERC to the Commission for approval. See 18 C.F.R. § 39.10 (2007); see also North American Electric Reliability Council et al., 119 FERC ¶ 61,060 at P 333 (2007) ("April 19 Order") (describing MRO's Bylaws as "'rules,' under our regulations, which are subject to NERC approval and, if approved by NERC, Commission approval"). The Commission's regulations require that when NERC submits changes in Regional Entity Rules to the Commission, NERC must explain "the basis and purpose for the Rule or Rule change, together with a description of the proceedings conducted by the Regional Entity to develop the proposal." 18 C.F.R. § 39.10. To assist NERC in complying with this

regulation, and to aid in NERC's own internal assessment of the revisions, such information is contained herein.

In Canada, agreements exist between the governing bodies of the provinces of Manitoba and Saskatchewan, NERC, and MRO regarding the reliability of the bulk power system across the border. Specifically, those agreements are the Interim Agreement on Compliance Monitoring and Enforcement in Manitoba and the Memorandum of Understanding between Saskatchewan Power Corporation, NERC and MRO. Filing the amended and restated bylaws with each province maintains the spirit of cooperation between international parties and ensures that there is consistency between the MRO Bylaws and the above stated agreements.

I. The Basis and Purpose for the Amendments to the MRO Bylaws

The amendments made to the MRO Bylaws are non-substantive in nature and reflect changes that will allow the MRO Board and staff to perform MRO functions and business in a more efficient manner, and more directly address minor issues related to regulatory orders. Other minor changes were made to correct typographical errors in the MRO Bylaws, such as; document formatting, cross references, table of contents and page numbering. Each change is reflected in the redlined version of the bylaws included as Attachment B.

II. The Proceedings Conducted by MRO to Amend the Bylaws

MRO's board composition and voting protocols are designed to ensure governance by an appropriate balance of stakeholder interests, as per the April 19 Commission Order, 119 FERC ¶ 61,060 at P 331. The procedures for amending the bylaws reflect this balance as further described in Section 19.1 of the MRO Bylaws below.

Section 19.1 *"The power to adopt, amend or repeal these Bylaws is vested in the Members as set forth in Section 6.5 of these Bylaws; provided however, upon the passage of any federal reliability legislation, and/or the adoption of related requirements and procedures by NERC, its successor under such legislation or any regulatory agency with jurisdiction, the board of directors shall have authority upon a two-thirds (2/3) vote of its members to amend these Bylaws as necessary and appropriate to comply with such law and related requirements and to qualify the Corporation for delegations of authority from NERC or its successor as provided in such legislation".*

Section 6.5 of the MRO Bylaws specifically outlines the special voting requirements necessary to amend the bylaws of the corporation as stated below.

Section 6.5.1 *"In order to amend the Bylaws, except as provided in Article 20 with respect to the board of directors, two-thirds (2/3) of the Sector votes cast shall be required to approve the proposed amendment. The substance of the proposed amendment must be contained in the notice of the meeting at which the vote will be taken; provided that, the Members may modify a proposed bylaw amendment at the meeting. Two-thirds (2/3) of the Sector votes cast shall be required to approve a proposed modification of a budget approved by the board. Two-thirds*

(2/3) of the Sector votes cast shall be required to approve any proposal to terminate the Corporation. To the extent practicable, all Member votes may be held electronically under such terms and conditions as are approved by the Board”.

MRO staff followed the appropriate written procedures when proposing these amendments to the board and members by; providing the appropriate notice; fulfilling content requirements, ensuring sector quorums were met, and recording the ballot. This resulted in the ratification of the proposed amendments by the MRO Members on January 29, 2010.

III. Conclusion

MRO believes that these amendments do not affect its delegated authority under Section 39.8 of the Commission’s regulations in the U.S., or the existing agreements with Manitoba and Saskatchewan in Canada. MRO therefore respectfully requests that NERC consider and approve the foregoing amendments to the MRO Bylaws and subsequently submit these amendments to the appropriate regulatory authorities for approval as changes to the rules of a Regional Entity.

Sincerely,

A handwritten signature in black ink that reads "Daniel P. Skaar".

Daniel P. Skaar

cc: MRO Board of Directors

Attachment A

Bylaw Section	Revision	Basis for Change
Section 1.14 – MAPP	“MAPP” means the MAPP Reliability Council, pursuant to the MAPP Restated Agreement, as of November 11, 2001.	The definition of the Mid-Continent Area Power Pool (MAPP) is no longer necessary in the bylaws because of the formal separation of the organizations, therefore; the definition was deleted.
Section 1.18 Organizational Standards.	“Organizational Standards” means a standard, including adequacy requirements, outside the authority of NERC that has been duly approved by the board of directors of the Corporation. Organizational Standards do not include Reliability Standards approved by NERC. Such Organizational Standards may be filed with the appropriate regulatory authorities.	Eliminated the definition of Organizational Standards, as well as all references to Organizational Standards within the bylaw document. The MRO Board of Directors approved the removal of Organizational Standards on September 23 rd , 2009, per a recommendation from the MRO Standards Committee, as there has been no need identified for such standards.
Section 1.25 (now 1.23) Transmission System Operator	... Transmission System Operators include: (1) regional transmission organizations; (2) independent transmission providers; (3) independent system operators approved by FERC ; (4) and transmission-only companies.	Removed language requiring Transmission System Operators to be approved by the Federal Energy Regulatory Commission (“FERC”- U.S.).
Section 1.24 (NEW) Regional Planning Entities	“Regional Planning Entity” means an entity which is subject to Reliability Standards in the MRO Region and shall be eligible for MRO membership.	Added a definition to specifically include Regional Planning Entities in MRO membership.
Section 2.2 - Activities	In support and furtherance of its purpose, the Corporation’s responsibilities shall include, but not be limited to: (1) proposing Reliability Standards, including regional variances or regional differences <u>Reliability Standards</u> required to maintain and enhance electric service reliability, adequacy and security in the Corporate Region; (2) approving Organizational Standards (3) assessing compliance with and enforcing Reliability Standards and Organizational Standards; , to the extent authorized by applicable agreements and/or law governing a Member’s membership in the Corporation; (34) conducting investigations and data analysis on disturbances, system events, and related matters; (45) conducting long-term assessments of reliability within the	Eliminated the use of the term regional “differences” because that term is not recognized by the NERC Rules of Procedure, the Regional Delegation Agreements or regulatory rules and regulations. Also added to 2.2(3), “to the extent authorized by applicable agreements and/or law governing a Member’s membership in the Corporation” to the activity of assessing compliance with and enforcing Reliability Standards and Organizational Standards. This change is necessary to recognize the authority of Canadian regulators.

	Corporate region; and (56) other related activities.	
Section 5.6 - Obligation of Members	By applying for and becoming a Member of the Corporation, each Member acknowledges that it is authorized and agrees to comply with Organizational Standards, Reliability Standards, and other obligations of Members of the Corporation set forth in these Bylaws or duly adopted by the board of directors in order to achieve the purposes of the Corporation. Such obligations include but are not limited to requirements to provide data and information needed to perform the functions of the Corporation and the payment of dues and any authorized penalties, including penalties and other obligations resulting from violations of: (1) Reliability Standards assessed in accordance with NERC rules; and (2) Organizational Standards assessed in accordance with rules duly approved by the board of directors. All monies, plus any accumulated interest that the Corporation collects from the issuance of penalties resulting from violations of Organizational Standards shall be used by the Corporation to defer expenses or distributed in a fair and equitable manner to Members, as determined by the board of directors.	Removed references to Organizational Standards with the deletion of Section 1.18 (Organizational Standards).
Section 5.7 Withdrawal	... Such notice shall specify a date, not earlier than thirty (30) days from the date of notice, on which the withdrawal shall become effective; provided however, that any such withdrawing Member shall remain liable to the Corporation for any fees, dues, sanctions or obligations to the Corporation incurred while it was a Member, or which apply to violations of Organizational Standards that occurred prior to the effective date of withdrawal, as well as its share of any obligations of the Corporation for the current fiscal year. If notice is given after October 1 of the current calendar year, the Member will also be liable for any fees and dues included in the budget for the following fiscal year. The Member will not be responsible for compliance with Organizational Standards after the withdrawal date. Section 5.7 does not apply to any fees, dues, or obligations associated with the Corporation responsibilities under delegated authority from NERC or applicable regulatory authorities.	Clarified this Section to address that obligations under MRO's delegated authority are excluded from this section, and were therefore added. Also removed references to Organizational Standards.
Section 5.8 - Budget and Fees	The board of directors shall propose to NERC a budget for delegated functions exercised by the Corporation pursuant to a delegation agreement with NERC and pursuant to any agreements or laws relating to the Corporation's functions in Canada. For those functions outside the scope of the Corporation's delegated	Added clarifying language that states that all dues, fees and assessments will be consistent with the "regulations of applicable government authorities." This change is necessary to address a

	<p>functions, the board of directors may from time to time fix the amount of dues, assessments, or fees, if any, and determine the methods of collection, consistent with this Section, <u>the regulations of applicable government authorities, or with and</u> any resolution duly adopted by the Members under Section 6.5.2 of these Bylaws, <u>and with regulations from applicable government authorities.</u></p>	<p>regulatory (FERC) order to clarify that membership fees are subject to regulatory review. In addition, the language recognizes the authority of Canadian regulators and governing bodies.</p>
<p>Section 6.1 - Annual Meetings.</p>	<p>... At the annual meeting of Members: (1) each Sector shall elect the successor(s), if any, for any director(s) from their Sector whose term will expire before the next annual meeting of the Members, provided however, that any Sector may elect a successor director representing such Sector prior to such annual meeting, in accordance with the provisions of this Article 6, in which case the election of such succeeding director(s) shall be reported to the Corporation at such annual meeting; (2) the president and treasurer shall report on the activities and financial condition of the Corporation; (3) the Members shall review, and may modify, the budget of the Corporation for the ensuing year (if not modified, the budget as approved by the board of directors shall be deemed accepted); and (34) the Members shall consider and act upon such other matters as may be raised, consistent with the notice of the annual meeting. The failure to hold an annual meeting in accordance with these Bylaws shall not affect the validity of a corporate action.</p>	<p>Eliminated from the listed actions to be taken at Member meeting the requirement that the Members review the budget of the Corporation for the ensuing year. The budget is subject to Member review and comment before the board approves the budget.</p>
<p>Section 6.5.1 - Special Voting Requirements</p>	<p>The substance of the proposed amendment must be contained in the notice of the meeting at which the vote will be taken; provided that, the Members may modify a proposed bylaw amendment at the meeting. Two-thirds (2/3) of the Sector votes cast shall be required to approve a proposed modification of a budget approved by the board. Two-thirds (2/3) of the Sector votes cast shall be required to approve any proposal to terminate the Corporation. To the extent practicable, all Member votes may be held electronically under such terms and conditions as are approved by the Board.</p>	<p>Eliminated the requirements for a Member vote on a proposed budget modification. Given the existing due process for review and comment of the budget, including supplemental budget requests and the statutory nature of the budget, the requirement is no longer needed.</p>
<p>Section 7.1 Management of Corporation</p>	<p>...The duties of the board will include, but will not be limited to the following: (1) govern the Corporation and oversee all of its activities; (2) establish and oversee all organizational groups; (3) oversee accomplishment of all functions set forth in any delegation or other agreement with NERC or any governmental entity related to development,</p>	<p>Removal of references to Organization Standards with the deletion of Section 1.18 (Organizational Standards).</p>

	<p>monitoring and enforcement of Reliability Standards and related matters; (4) approve, revise and enforce Organizational Standards, Member data and information requirements and related confidentiality requirements; (5) establish compliance monitoring procedures and requirements, and penalties and sanctions for non-compliance for Organizational Standards; (6) impose penalties and sanctions for violation of Organizational Standards consistent with these Bylaws and the procedures approved by the board; (57) establish and approve an annual budget; (68) represent the Corporation in legal and regulatory proceedings; (78) hire the president. The board of directors shall select a chair and a vice-chair from among the members of the board. The board may establish board committees as appropriate.</p>	
<p>Section 7.3 Composition of the Board of Directors</p>	<p>... Members shall endeavor to select directors from among individuals holding senior management <u>or officer</u> positions in Member organizations, and with a view toward ensuring geographic representation of the Corporate Region on the board. No two directors may be employees of a single Member or employees of Members that are affiliates. To the extent the Members of a Sector do not select a director, that director position shall remain vacant until a director is selected by the Sector. A Sector may elect an alternate representative to participate in meetings of the board if the elected director of the Sector is not able to attend, provided however, that such representative shall not have any voting rights on the board and any participation by such representative in executive sessions of the board is at the board's discretion.</p>	<p>Amended Section 7.3 to emphasize that the Members should select directors from either officer or senior management positions. While in many companies these terms are synonymous, some organizations define senior management as a subset of officer positions thus unduly limiting the pool of qualified candidates. Eliminated the reference to alternates participating in board meetings, due to the inability of these alternates to vote for board action.</p>
<p>Section 7.8 - Quorum.</p>	<p>Two-thirds (2/3) A Majority of the directors currently holding office is a quorum for the transaction of business. In the absence of a quorum, a majority of the directors present may adjourn a meeting from time to time until a quorum is present.</p>	<p>Amended the quorum requirement for the Board of Directors from a two-thirds requirement to a simple majority of the directors in order to facilitate timely and efficient action. This change is consistent with other boards.</p>
<p>Section 8.1 Establishment of Organizational Groups.</p>	<p>...The board shall conduct a review of all organizational groups of the Corporation on an annual <u>periodic</u> basis to ensure that the business of the Corporation is conducted in an efficient, cost-effective manner and shall include a statement of its conclusions and resulting actions in the board's report to Members at the annual meeting.</p>	<p>The bylaws have been amended to allow for periodic rather than annual reviews of the efficiency and effectiveness of the organizational groups. Annual reviews are not always required, and additional flexibility will allow for review of these groups whenever necessary.</p>

<p>Article 16 - Transition</p>	<p>Except for those existing standards, criteria, rules, or guides that apply to the Generation Reserve Sharing Pool of the MAPP Restated Agreement, the Corporation will use the existing standards, criteria, rules or guides from each existing reliability council region for those Members that join the Corporation as in effect immediately prior to formation of the Corporation until such standards, criteria, rules or guides are adopted, superseded, or rejected by the Corporation. The Corporation will establish any necessary transition committees, subcommittees, working groups or task forces (including but not limited to a reliability committee) to administer the existing regional reliability standards, criteria, rules and guides until they are adopted, superseded, or rejected by the Corporation. The Corporation will employ its best efforts, within two years of its formation, to work toward a consistent set of Organizational and Reliability Standards (including operating reserves) for the entire Corporate Region, recognizing, however, that sub-regional differences may warrant variances for certain sub-regions.</p>	<p>Article 16 has been eliminated because the transition from legacy regional reliability councils has been completed.</p>
<p>Article 18.1 (formerly Article 19.1) Determinations of Violations Hearings and Dispute Resolution.</p>	<p><u>Hearings.</u> Except as otherwise provided in applicable agreements and/or law governing a Member's membership in the Corporation <u>The the board of directors Corporation</u> shall be responsible for making final determinations regarding whether (1) a Member has violated an Organizational Standard or Reliability Standard; (2) an entity subject to a Reliability Standard has violated a Reliability Standard in connection with its operation in the Corporate Region; and (3) assessment of sanctions within the Corporate region resulting from such violations, following an initial determination by Corporation staff in accordance with the NERC Rules of Procedure. Any Member or organization subject to a Reliability Standard or Organizational Standard, against whom a penalty or other sanction has been recommended, shall have an opportunity to be heard by the board prior to the board's determination.</p>	<p>The provisions of Article 18 have been revised to make clear that the hearing process, as set forth in the NERC Rules of Procedure and the Compliance Monitoring and Enforcement Program, will be used for disputes related to the violation of a Reliability Standard. The dispute resolution process will be used for disputes between and among MRO members, or between an MRO member or members and the MRO, related to issues associated with business matters or interpretation of the MRO bylaws.</p>
<p>Section 18.2.- Hearings and Dispute Resolution</p>	<p><u>Disputes.</u> Dispute resolution procedures will be established by the board of directors for disputes between Members, or between a Member and the Corporation for issues, arising under these Bylaws. <u>Determinations related to violations of Reliability Standards will be resolved in accordance with the NERC Rules of Procedure, except as otherwise provided in applicable agreements and/or law</u></p>	<p>In addition to the removal of Organizational Standards, revised to add "except as otherwise provided in applicable agreements and/or law governing a Member's membership in the Corporation".</p>

	<p><u>governing a Member's membership in the corporation.</u>, provided that: (1) determinations by the Corporation related to violations of Reliability Standards shall only be appealed directly to NERC; and (2) determinations of the Corporation related to violations of Organizational Standards shall be subject to dispute resolution only to the extent permitted by the rules of the Corporation regarding dispute resolution and provided that in any such dispute resolution proceeding the board of directors' determination of the meaning and scope of an Organizational Standard shall be final, subject to any right to appeal to any regulatory or other legal authority.</p>	
<p>Article 19 (formerly Article 20) Amendment of the Bylaws.</p>	<p>The power to adopt, amend or repeal these Bylaws is vested in the Members as set forth in Section 6.5 of these Bylaws; provided however, upon the passage of any federal reliability legislation, and/or the adoption of related requirements and procedures by NERC, its successor under such legislation or any regulatory agency with jurisdiction, the board or directors shall have authority upon a two-thirds (2/3) vote of its members to amend these Bylaws as necessary and appropriate to comply with such law and related requirements. and to qualify the Corporation for delegations of authority from NERC or its successor as provided in such legislation.</p>	<p>Article 19 has been amended to reflect the development of MRO under Section 215 of the Federal Power Act (U.S.) and other agreements in Manitoba and Saskatchewan.</p>

**BYLAWS
OF THE
MIDWEST RELIABILITY ORGANIZATION, INC
a Delaware nonprofit corporation
(the “Corporation”)**

**ARTICLE 1
DEFINITIONS**

Section 1.1 Affiliate. “Affiliate” means with respect to any entity, any other entity that, directly or indirectly, through one or more intermediaries, controls, or is controlled by, or is under common control with, such entity, as determined in the sole discretion of the board of directors of the Corporation. For this purpose, “control” may be presumed by the direct or indirect ownership of 50 percent or more of the outstanding voting capital stock or other equity interests having ordinary voting power. A member of, or owner of an interest in, a transmission company that FERC has found meets the independence requirements for a regional transmission organization shall not be deemed to be an affiliate of such transmission company.

Section 1.2 Bulk-Power System. “Bulk-Power System” means (1) facilities and control systems necessary for operating an interconnected electric energy transmission network (or any portion thereof); and (2) electric energy from generation facilities needed to maintain transmission system reliability. The term does not include facilities used in local distribution of electric energy. The term Bulk-Power System shall be interpreted consistently with any definition given by NERC.

Section 1.3 Bulk-Power System Users. “Bulk-Power System Users” means any entity that sells, purchases, or transmits electric power over the Bulk-Power System, or that owns, operates or maintains facilities or control systems that are part of the Bulk-Power System.

Section 1.4 Canadian Utilities. “Canadian Utilities” means any government-owned utility serving in Canada within the Corporate Region.

Section 1.5 Cooperative. “Cooperative” means an entity serving within the Corporate Region which generally has the following characteristics: (1) private independent electric utility; (2) incorporated under the laws of the states in which they operate; (3) established to provide electric service to its members; (4) owned by the consumers they serve; and (5) governed by a board of directors elected from the membership. This sector includes Generation and Transmission Cooperatives and Public Utility Districts.

Section 1.6 Corporate Region. “Corporate Region” means the geographic area boundaries of the Bulk-Power Systems as designated by each of the Members.

Section 1.7 FERC. “FERC” means the Federal Energy Regulatory Commission.

Section 1.8 Federal Power Marketing Agencies. “Federal Power Marketing Agencies” means agencies of the federal government created to market power within the Corporate Region.

Section 1.9 Generators and Power Marketers. “Generators and Power Marketers” means any entity that owns or operates more than 50 MW of generation in the Corporate Region, or is a power marketer doing business in the Corporate Region, and that does not qualify also to participate in the Investor-Owned Utility, Cooperative, Municipal Utility, Federal Power Marketing Agency or Canadian Utilities Sector.

Section 1.10 Good Utility Practice. “Good Utility Practice” means any of the practices, methods and acts engaged in or approved by a significant portion of the electric utility industry during the relevant time period, or any of the practices, methods and acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result at a reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice, method, or act to the exclusion of all others, but rather to be acceptable practices, methods, or acts generally accepted in the region.

Section 1.11 Industry Sector(s). “Industry Sector or Sector(s)” means a group of Bulk-Power System Users in the Corporate Region with substantially similar reliability interests, as determined by these Bylaws. The Industry Sectors shall include the following: (1) Transmission System Operators; (2) Generators and Power Marketers; (3) Investor Owned Utilities (4) Cooperatives; (5) Municipal Utilities (6) Federal Power Marketing Agencies; (7) Canadian Utilities; (8) Large End-Use Electricity Customers; and (9) Small End-Use Load Electricity Customers.

Section 1.12 Investor Owned Utility. “Investor Owned Utility” means any for-profit entity that owns and operates a distribution system and serves end-use load within the Corporate Region pursuant to an obligation to serve under state, federal or provincial law, including a default service obligation, or pursuant to a tariff by which the entity offers service to the general public.

Section 1.13 Large End-Use Electricity Customers. “Large End-Use Electricity Customers” means any entity in North America with: (1) at least one service delivery taken at 50 kV or higher (radial supply or facilities dedicated to serve customers) that is not purchased for resale; or (2) any single end-use customer with an average aggregated service load (not purchased for resale) of at least 50,000 MWh annually, excluding cogeneration or other back feed to the serving utility. This sector also includes organizations are represent the interest of such entities.

~~**Section 1.14 MAPP** “MAPP” means the MAPP Reliability Council, pursuant to the MAPP Restated Agreement, as of November 11, 2001.~~

~~Section 1.15~~**Section 1.14 Member.** “Member” means a member of the Corporation.

~~Section 1.16~~**Section 1.15 Municipal Utilities.** “Municipal Utilities” means any electric utility that is owned by a state or municipality, or group of municipalities, including a joint action agency, which serves within the Corporate Region.

~~Section 1.17~~**Section 1.16 NERC.** “NERC” means the North American Electric Reliability ~~Council~~Corporation or a successor entity.

~~Section 1.18 Organizational Standards.~~ “~~Organizational Standards~~” means a ~~standard, including adequacy requirements, outside the authority of NERC that has been duly approved by the board of directors of the Corporation. Organizational Standards do not include Reliability Standards approved by NERC. Such Organizational Standards may be filed with the appropriate regulatory authorities.~~

~~Section 1.19~~**Section 1.17 Person.** “Person” means any natural person, corporation, Cooperative, partnership, association, or other private or public entity.

~~Section 1.20~~**Section 1.18 Public Utility District.** “Public Utility District” means an entity that is a state political or governmental subdivision which owns electric generation, transmission and distribution facilities and that was created and organized under state statutes that are different than those that Municipal Utilities in the same state are created and organized under.

~~Section 1.21~~**Section 1.19 Regional Entity.** “Regional Entity” means an entity having ~~enforcement~~ authority pursuant to a delegation agreement with NERC and pursuant to any agreements or laws relating to the Corporation’s functions in Canada.

~~Section 1.22~~**Section 1.20 Regulatory Participant.** “Regulatory Participant” means any state or provincial regulatory agencies in the Corporate Region exercising authority over the rates, terms or conditions of electric service of an entity other than itself within the Corporate Region, or the planning, siting, construction or operation of electric facilities of an entity other than itself within the Corporate Region, as well as any representatives of FERC, regional advisory bodies that may be established by FERC, or representatives of any federal regulator or agency.

~~Section 1.23~~**Section 1.21 Reliability Standard.** “Reliability Standard” means a NERC reliability standard, duly in effect, under the rules, regulations and laws governing such standards, to provide for reliable operation of the Bulk-Power System.

~~Section 1.24~~**Section 1.22 Small End-Use Electricity Customers.** “Small End-Use Electricity Customers” means: (1) any person or entity within North America that takes service below 50 kV; or (2) any single end-use customer with an average aggregated service load (not purchased for resale) of less than 50,000 MWh annually, excluding cogeneration or other back feed to the serving utility. This sector also includes organizations (including state consumer advocates) that represent the interests of such entities.

Section 1.23 Transmission System Operator. “Transmission System Operator” means an entity that operates or controls operation of high voltage transmission facilities within the Corporate Region (more than 300 miles of transmission at 100 kV or greater) that

does not also own, operate or control generation within the Corporate Region, except to the limited extent permitted by FERC for independent transmission organizations with respect to ancillary service obligations. Transmission System Operators include: (1) regional transmission organizations; (2) independent transmission providers; (3) independent system operators ~~approved by FERC~~; (4) and transmission-only companies.

Section 1.24 Regional Planning Entity. “Regional Planning Entity” means an entity which is subject to Reliability Standards in the MRO Region and shall be eligible for MRO membership.

ARTICLE 2
PURPOSE

Section 2.1 Purpose. The Corporation will be a Regional Entity within the NERC structure for the purpose of preserving and enhancing electric service reliability, adequacy and security in the Corporate Region and other interconnected regions for the benefit of all end-users of electricity and all entities engaged in providing electric services in the Corporate Region, with due regard for safety, environmental protection and economy of service.

Section 2.2 Activities. In support and furtherance of its purpose, the Corporation’s responsibilities shall include, but not be limited to: ~~(1) proposing Reliability Standards, including regional variances or regional differences-Reliability Standards~~ required to maintain and enhance electric service reliability, adequacy and security in the Corporate Region; ~~(2) approving Organizational Standards;~~ ~~(23) assessing compliance with and enforcing Reliability Standards and Organizational Standards, to the extent authorized by applicable agreements and/or law governing a Member’s membership in the Corporation;~~ ~~(34) conducting investigations and data analysis on disturbances, system events, and related matters;~~ ~~(45) conducting long-term assessments of reliability within the Corporate region;~~ and ~~(56) other related activities.~~

Section 2.3 Not-for-Profit Corporation. The Corporation is operated as a Delaware non-stock, nonprofit corporation and is organized pursuant to the general corporation law of the State of Delaware.

ARTICLE 3
POWERS

Section 3.1 Powers. The Corporation shall have the power to engage in any lawful act or activity for which corporations may be organized under the general corporation law of the State of Delaware, subject to any limitations provided in applicable federal, provincial or state law or in the Corporation’s certificate of incorporation or these Bylaws.

ARTICLE 4
OFFICES

Section 4.1 Offices. The principal office of the Corporation shall be located initially within the Corporate Region, at such location as the board of directors may from time to time determine, giving consideration to the total cost to the Corporation and

convenience of travel for staff, Members and Regulatory Participants. Once established, the principal office may remain in its location, even if outside the Corporate Region.

ARTICLE 5
MEMBERS

Section 5.1 Classes of Members. The Corporation shall have one class of Members. Each Affiliate of a Member may separately be a Member.

Section 5.2 Qualifications of Members. A Member may be any entity eligible to be a member of an Industry Sector.

Section 5.3 Admission of Members. New Members may join the Corporation upon submittal of an application, in a form approved by the president, and payment of the fees as established by the Corporation. The Member shall designate the Sector to which it belongs. A Member may change its Sector designation once each calendar year, by providing notice to the president at least sixty (60) days prior to the beginning of such year. The president shall review a membership application and may request demonstration by the applicant that it qualifies for membership in a particular Sector. Any dispute with respect to a Member's qualifications for a particular Sector shall be resolved by the board of directors. The president shall have authority to approve an application for membership, subject to review by the board of directors.

Section 5.4 Voting Rights. Each Member in good standing shall be entitled to one vote in the Sector in which it is a Member, on matters submitted to a vote of Members. A Member delinquent in payment of its dues, fees or other obligations to the Corporation shall not be entitled to a vote.

Section 5.5 Transfer of Membership. A Member of the Corporation may not transfer its membership or a right arising from such membership except to any Person succeeding to all or substantially all of the assets of the Member. The president shall have authority to approve any such transfer, subject to review by the board of directors.

Section 5.6 Obligations of Members. By applying for and becoming a Member of the Corporation, each Member acknowledges that it is authorized and agrees to comply with ~~Organizational Standards~~, Reliability Standards, and other obligations of Members of the Corporation set forth in these Bylaws or duly adopted by the board of directors in order to achieve the purposes of the Corporation. Such obligations include but are not limited to requirements to provide data and information needed to perform the functions of the Corporation and the payment of dues and any authorized penalties, including penalties and other obligations resulting from violations of: ~~(1) Reliability Standards assessed in accordance with NERC rules; and (2) Organizational Standards assessed in accordance with rules duly approved by the board of directors. All monies, plus any accumulated interest that the Corporation collects from the issuance of penalties resulting from violations of Organizational Standards shall be used by the Corporation to defer expenses or distributed in a fair and equitable manner to Members, as determined by the board of directors.~~

Section 5.7 Withdrawal. A Member may withdraw from participation in the Corporation by providing written notice to the president of the Corporation of such withdrawal. Such notice shall specify a date, not earlier than thirty (30) days from the date of notice, on which the withdrawal shall become effective; provided however, that any such withdrawing Member shall remain liable to the Corporation for any fees, dues, sanctions or obligations to the Corporation incurred while it was a Member, ~~or which apply to violations of Organizational Standards that occurred prior to the effective date of withdrawal,~~ as well as its share of any obligations of the Corporation for the current fiscal year. If notice is given after October 1 of the current calendar year, the Member will also be liable for any fees and dues included in the budget for the following fiscal year. ~~The Member will not be responsible for compliance with Organizational Standards after the withdrawal date.~~ Section 5.7 does not apply to any fees, dues, or obligations associated with the Corporation responsibilities under delegated authority from NERC or applicable regulatory authorities.

Section 5.8 Budget and Fees. The board of directors shall propose to NERC a budget for delegated functions exercised by the Corporation pursuant to a delegation agreement with NERC and pursuant to any agreements or laws relating to the Corporation's functions in Canada. For those functions outside the scope of the Corporation's delegated functions, the board of directors may from time to time fix the amount of dues, assessments, or fees, if any, and determine the methods of collection, consistent with this Section, the regulations of applicable government authorities, or with and any resolutions duly adopted by the Members under Section 6.5.2 of these Bylaws ~~and with regulations from applicable government authorities.~~

ARTICLE 6 **MEETING OF MEMBERS**

Section 6.1 Annual Meeting of Members. The Members shall hold an annual meeting each calendar year. The annual meeting of the Members shall be held in December of each year, or at such other time specified by the board of directors, in order for Members to review the proposed budget and operations of the Corporation. All Members shall be entitled to at least thirty (30) days prior written notice of the annual meeting. At the annual meeting of Members: (1) each Sector shall elect the successor(s), if any, for any director(s) from their Sector whose term will expire before the next annual meeting of the Members, provided however, that any Sector may elect a successor director representing such Sector prior to such annual meeting, in accordance with the provisions of this Article 6, in which case the election of such succeeding director(s) shall be reported to the Corporation at such annual meeting; (2) the president and treasurer shall report on the activities and financial condition of the Corporation; ~~(3) the Members shall review, and may modify, the budget of the Corporation for the ensuing year (if not modified, the budget as approved by the board of directors shall be deemed accepted);~~ and ~~(34)~~ the Members shall consider and act upon such other matters as may be raised, consistent with the notice of the annual meeting. The failure to hold an annual meeting in accordance with these Bylaws shall not affect the validity of a corporate action.

Section 6.2 Special Meetings of Members.

6.2.1 Who May Call. Special meetings of the Members may be called by six (6) members of the board of directors, by the president or if at least 10 percent of the Members sign, date, and deliver to the president one or more written demands for a special meeting describing the purpose for which it is to be held.

6.2.2 Notice of Meeting. Within fifteen (15) days after receipt of a demand for a special meeting from Members, the president shall cause a special meeting to be called and held on notice no later than forty-five (45) days after receipt of the demand. If the president fails to cause a special meeting to be called and held as required by this section, a Member making the demand may call the meeting by giving notice under Section 6.3. In either event, notice of the meeting and the costs of the meeting shall be at the expense of the Corporation.

6.2.3 Time and Place of Special Meetings. Special meetings of Members shall be held at a location designated by the president or the board of directors. If a special meeting is demanded by the Members, the meeting must be held in a facility of appropriate size to accommodate the Membership and at a location within the Corporate Region.

6.2.4 Notice Requirements; Business Limited. The notice of a special meeting must contain a statement of the purposes of the meeting. The business transacted at a special meeting is limited to the purposes stated within the notice of the meeting. Business transacted at a special meeting that is not included in those stated purposes is voidable by or on behalf of the Corporation, unless 90 percent of the Members entitled to vote were present at such meeting or have waived notice of the meeting under Section 6.3.

Section 6.3 Notice Requirements.

6.3.1 To Whom Given. Notice of meetings of Members must be given to every Member as of the record date determined under Section 6.4. If the meeting is an adjourned meeting and the date, time and place of the meeting were announced at the time of the adjournment, notice is not required unless a new record date for the adjourned meeting is or must be fixed.

6.3.2 When Given; Contents. In all cases where a specific minimum notice period has not been fixed by law or these Bylaws, the notice must be given at least five (5) days before the date of a meeting and not more than sixty (60) days before the date of a meeting. The notice must contain the date, time and place of the meeting, and an agenda of the matters upon which action may be taken at the meeting. A matter may be added to the agenda of a meeting at the meeting upon the affirmative vote of three-quarters (3/4) of the Sector votes cast on a motion to amend the agenda.

6.3.3 Waiver of Notice; Objections. A Member may waive notice of a meeting of Members. A waiver of notice by a Member entitled to notice is effective whether given before, at, or after the meeting, and whether given in writing, or by attendance. Attendance by a Member at a meeting is a waiver of notice of that meeting, unless the Member objects at the beginning of the meeting to the transaction of business because the meeting is not lawfully called or convened, or objects before a vote on an item of

business because the item may not lawfully be considered at that meeting and does not participate in the consideration of the item at that meeting.

Section 6.4 Record Date; Determining Members Entitled to Notice and Vote.

The board of directors may fix a date not more than forty (40) days before the date of a meeting of Members as the date for the determination of the Members entitled to notice of and entitled to vote at the meeting. When a date is so fixed, only Members on that date are entitled to notice and to vote at a membership meeting unless the board of directors fixes a new date for determining the right to notice and to vote, which it must do if the meeting is adjourned to a date more than sixty (60) days after the record date for determining Members entitled to notice of the original meeting.

Section 6.5 Right to Vote; Act of Members. Voting of the Members shall be by Sector, with each Sector entitled to the same number of votes as it has directors on the board. If a quorum is present, except with respect to amendments of these Bylaws, modification of a budget approved by the board of directors or termination of the Corporation, the affirmative vote of the majority of the Sector votes present and entitled to vote, which must also be a majority of the required quorum, is the act of the Members. Within a Sector, each Member within the Sector shall have one vote. If a quorum is present with respect to the Sector, the affirmative vote of the majority of the Members within the Sector present and entitled to vote, which must also be a majority of the required quorum, is the act of the Sector. All of the Sector's votes shall be cast consistent with the act of the Sector unless the Sector adopts a fractional voting alternative as described in Section 6.5.3.

6.5.1 Special Voting Requirements. In order to amend the Bylaws, except as provided in Article 20 with respect to the board of directors, two-thirds (2/3) of the Sector votes cast shall be required to approve the proposed amendment. The substance of the proposed amendment must be contained in the notice of the meeting at which the vote will be taken; provided that, the Members may modify a proposed bylaw amendment at the meeting. ~~Two-thirds (2/3) of the Sector votes cast shall be required to approve a proposed modification of a budget approved by the board.~~ Two-thirds (2/3) of the Sector votes cast shall be required to approve any proposal to terminate the Corporation. To the extent practicable, all Member votes may be held electronically under such terms and conditions as are approved by the Board.

6.5.2 Change of Dues Structure. The Members may change the dues structure by resolution with an affirmative vote of two-thirds (2/3) of the Sector votes cast.

6.5.3 Fractional Voting Alternative. A Sector may adopt fractional voting. Member votes for and against are converted to percentages and multiplied by the applicable sector weight. Abstentions are not counted and do not impact the voting tabulation.

Section 6.6 Quorum. A quorum for a meeting of Members is a majority of the Sector votes entitled to vote at the meeting. A quorum for a meeting of a Sector is a majority of the Members of that Sector present or voting electronically on matters before the meeting. A quorum is necessary for the transaction of business at a meeting of Members. If a quorum

is not present, a meeting may be adjourned from time to time for that reason by the Sectors or Members then represented or present.

Section 6.7 Action by Written Ballot. An action that may be taken at a regular or special meeting of Members may be taken without a meeting if the Corporation mails or delivers a written ballot to every Member entitled to vote on the matter. Whenever possible, voting by Sectors for directors shall be by written ballot preceding the regular meeting of the Members.

Approval by written ballot is valid only when the number of votes cast by ballot equals or exceeds the quorum required to be present at a meeting authorizing the action, and the number of approvals equals or exceeds the number of votes that would be required to approve the matter at a meeting at which the total number of votes cast was the same as the number of votes cast by ballot.

Solicitations for votes by written ballot must: (1) indicate the number of responses needed to meet the quorum requirements; (2) state the percentage of approvals necessary to approve the matter; and (3) specify the time by which a ballot must be received by the Corporation in order to be counted. A written ballot may not be revoked.

Section 6.8 Action by Electronic Communication. Any vote of a Sector to elect a board member or for any other purpose may be taken by electronic means without a meeting or during a meeting. In addition, a conference among Members by a means of communication through which the participants may simultaneously hear each other during the conference is a meeting of the Members, if the same notice is given of the conference as would be required for a meeting and if the number of persons participating in the conference is a quorum. Participation in a meeting by this means is personal presence at the meeting. A Member may participate in a meeting of the Members by a means of communication through which the Member, other persons participating, and all persons physically present at the meeting may simultaneously communicate with each other during the meeting. Participation in a meeting by this means constitutes personal presence at the meeting.

Section 6.9 Member Representatives; Proxies.

6.9.1. Designation of Representative. Each year prior to the annual meeting of Members, each Member shall designate the individual authorized to vote on Corporation matters on behalf of the Member, in accordance with procedures approved by the board. A Member may change such designation at any time.

6.9.2 Authorization. The individual designated to vote by a Member may appoint a proxy to vote or otherwise act for the Member at any meeting or electronically by signing an appointment form either personally or by an attorney so designated by the Member.

6.9.3 Effective Period. An appointment of a proxy is effective when received by the secretary or other officer or agent authorized to tabulate votes. An appointment is valid for the next regular or specially scheduled meeting or electronic ballot. However, a proxy is not valid for more than sixty (60) days from its date of execution.

6.9.4 Revocation. An appointment of a proxy is revocable by the Member. Appointment of a proxy is revoked by the person appointing the proxy by signing and delivering to the secretary or other officer or agent authorized to tabulate proxy votes. This may be done either in a written statement that the appointment of the proxy is revoked or a subsequent appointment form.

Section 6.10 Reimbursement of Member Expenses. The Corporation will be under no obligation to reimburse Members for expenses associated with their attendance at regular or special Member meetings.

ARTICLE 7 BOARD OF DIRECTORS

Section 7.1 Management of Corporation. Consistent with these Bylaws, the business and affairs of the Corporation shall be managed by or under the direction of a board of directors. The duties of the board will include, but will not be limited to the following: (1) govern the Corporation and oversee all of its activities; (2) establish and oversee all organizational groups; (3) oversee accomplishment of all functions set forth in any delegation or other agreement with NERC or any governmental entity related to development, monitoring and enforcement of Reliability Standards and related matters; (4) approve, revise and enforce ~~Organizational Standards, Member data and information requirements and related confidentiality requirements; (5) establish compliance monitoring procedures and requirements, and penalties and sanctions for non-compliance for Organizational Standards; (6) impose penalties and sanctions for violation of Organizational Standards consistent with these Bylaws and the procedures approved by the board~~ (57) establish and approve an annual budget; (68) represent the Corporation in legal and regulatory proceedings; (78) hire the president. The board of directors shall select a chair and a vice-chair from among the members of the board. The board may establish board committees as appropriate.

Section 7.2 Voting. Each director shall have one vote with respect to decisions of the board.

Section 7.3 Composition of the Board of Directors. The board of directors shall consist of nineteen (19) board members elected by the Sectors as follows:

- (a). Three (3) directors from the Transmission System Operators Sector;
- (b). Two (2) directors from the Generators and Power Marketers Sector;
- (c). Five (5) directors from the Investor Owned Utilities Sector;
 - (1). Two (2) directors must be from utilities with less than 3,000 megawatts of end-use load.
 - (2). Three (3) directors must be from utilities with 3,000 megawatts or greater of end-use load.

- (d). Two (2) directors from the Cooperative Sector;
- (e). Two (2) directors from the Municipal Utilities Sector;
- (f). One (1) director from the Federal Power Marketing Agencies;
- (g). Two (2) directors from the Canadian Utilities Sector provided that both directors are not residents of the same Canadian province;
- (h). One (1) director from the Large End-Use Electricity Customers Sector, and
- (i). One (1) director from the Small End-Use Electricity Customers Sector.

Provided, however, that in choosing directors from a sector, there shall not be more directors from a particular Sector than there are actual Members of such Sector.

Members shall endeavor to select directors from among individuals holding senior management ~~or officer~~ positions in Member organizations, and with a view toward ensuring geographic representation of the Corporate Region on the board. No two directors may be employees of a single Member or employees of Members that are affiliates. To the extent the Members of a Sector do not select a director, that director position shall remain vacant until a director is selected by the Sector. ~~A Sector may elect an alternate representative to participate in meetings of the board if the elected director of the Sector is not able to attend, provided however, that such representative shall not have any voting rights on the board and any participation by such representative in executive sessions of the board is at the board's discretion.~~

Section 7.4 Terms of Directors. The directors will serve three-year, staggered terms. The terms of the initial directors will be selected by lot at the first meeting of the board of directors. Any director may be removed at any time by the affirmative vote of two-thirds (2/3) of the Members of the Sector selecting such director. A director may be removed by the board of directors for non-attendance of three consecutive board meetings.

Section 7.5 Reimbursement. Directors shall have the right to reimbursement by the Corporation of their actual reasonable travel expenses to board meetings or when specifically selected to represent the Corporation at a business meeting.

Section 7.6 Vacancies. If a director resigns, dies, changes corporate affiliation or is removed during the term of office for which elected, the directorship shall thereupon be vacant and shall be filled by the Members of the respective Sector, by written or electronic ballot in accordance with the procedures and requirements set forth above. The successor director elected by the Members of the Sector shall hold office for the unexpired term of the director replaced.

Section 7.7 Meetings; Notice. An annual meeting of the board of directors shall be held without notice immediately following the annual meeting of the Members to elect the chair and vice-chair for the next year. In addition, regular meetings may be held at such time

or times as fixed by the board of directors. Schedules of regular meetings of the board of directors shall be published by the secretary and provided to all Members. Special meetings of the board of directors may be called by the president or by three directors and shall be held at the principal office of the Corporation, or such other place within the Corporate Region as determined by the president after consultation with the board. Notice of the date, time, and place of a special meeting shall be given by the secretary not less than seven (7) days prior to the meeting by mail, telegram, or electronic communication to each director and Member. Except as necessary to discuss personnel issues, litigation or similar sensitive or confidential matters, all meetings of the board of directors shall be open to Members and other interested persons.

Section 7.8 Quorum. ~~A majority Two-thirds (2/3) of the directors currently holding office is a quorum for the transaction of business. In the absence of a quorum, a majority of the directors present may adjourn a meeting from time to time until a quorum is present.~~

Section 7.9 Board Action. The act of a majority of the directors present at a meeting at which a quorum is present shall be the act of the board of directors, unless the act of a greater number is required by law or these Bylaws.

Section 7.10 Action Without a Meeting. An action required or permitted to be taken at a board of directors meeting may be taken by written action, including electronic communication, signed by all of the directors of the Corporation. The written action is effective when signed by the required number of directors, unless a different effective time is provided in the written action.

Section 7.11 Action by Electronic Communication. A conference among directors by a means of communication through which the directors may simultaneously hear each other during the conference is a board meeting if the same notice is given of the conference as would be required for a meeting and if the number of directors participating in the conference is a quorum. Participation in a meeting by this means constitutes personal presence at the meeting. A director may participate in a board meeting by any means of communication through which the director, other directors participating, and all directors physically present at the meeting may simultaneously communicate with each other during the meeting.

ARTICLE 8
ORGANIZATIONAL GROUPS

Section 8.1 Establishment of Organizational Groups. The board of directors shall establish such organizational groups, consisting of committees, sub-committees, task forces and working groups of Members, as are necessary and appropriate to accomplish the purposes of the Corporation in an efficient and cost-effective manner. All organizational groups shall be subject to the direction and control of the board. The membership of organizational groups shall be determined based upon experience, expertise and geographic diversity and to the extent practicable shall include balanced representation of the Sectors.

The board of directors shall establish policies and procedures governing the creation of organizational groups, how they are populated, how voting and related matters are conducted and how they may be reorganized. The board shall conduct a review of all organizational groups of the Corporation on a ~~periodic~~annual basis to ensure that the business of the Corporation is conducted in an efficient, cost-effective manner and shall include a statement of its conclusions and resulting actions in the board's report to Members at the annual meeting.

Section 8.2 Reimbursement. Consistent with the annual budget of the Corporation, the Board may authorize reimbursement by the Corporation for members of organizational groups (other than committees of the whole) of reasonable travel, meals and lodging expenses for organizational group meetings or for representation of the Corporation at other business meetings as authorized by the board. The board of directors may authorize reimbursement for persons acting on behalf of the Corporation, as necessary in the interests of the Corporation.

ARTICLE 9 **OFFICERS**

Section 9.1 Officers. The officers of the Corporation shall include a president, a secretary, a treasurer and any other officers as may be elected or appointed in accordance with the provisions of this Article. The board of directors may elect or appoint any additional officers that it deems desirable, such other officers to have the authority and perform the duties prescribed by the board of directors. The same individual may hold any number of offices, except that of president.

Section 9.2 Election and Term of Office. The officers of the Corporation shall be elected by the board of directors. Each officer shall hold office at the pleasure of the board. New officers may be created and the positions filled at any meeting of the board of directors. Each elected officer shall hold office until his or her successor has been duly elected and qualified.

Section 9.3 Removal. Any officer elected by the board of directors may be removed by the affirmative vote of two-thirds (2/3) of the board of directors whenever in its judgment the best interests of the Corporation would be served thereby, but such removal shall be without prejudice to the contract rights, if any, of the officer so removed. Election or appointment of an officer or agent shall not of itself create contract rights.

Section 9.4 Vacancies. A vacancy in any office because of death, resignation, removal, disqualification, or otherwise, may be filled by the board of directors for the unexpired portion of the term.

Section 9.5 President. The president shall be, in the discretion of the board of directors, either an employee of or contractor to the Corporation and shall:

- (a). be the principal executive and operating officer of the Corporation;

(b). sign certificates of membership, and may sign any deeds, mortgages, deeds of trust, notes, bonds, contracts or other instruments authorized by the board of directors to be executed, except in cases in which the signing and execution thereof shall be expressly delegated by the board of directors or by these Bylaws to some other officer or agent of the Corporation; and

(c). perform all duties incident to the office of president, including hiring and directing staff, and such other duties as may be prescribed by the board of directors from time to time.

Section 9.6 Secretary. The secretary shall ensure that the following duties are carried out:

(a). the minutes of the meetings of the Members and of the board of directors are recorded;

(b). all required notices are duly given in accordance with these Bylaws and as required by law;

(c). a register of the current names and addresses of all Members is maintained;

(d). a complete copy of the articles of incorporation and Bylaws of the Corporation containing all amendments thereto are kept on file at all times, which copies shall always be open to the inspection of any Member; and

(e). generally perform all duties incident to the office of secretary and such other duties as may be prescribed by the board of directors from time to time.

Section 9.7 Treasurer. The treasurer shall be responsible for the following activities:

(a). maintain custody of all funds and securities of the Corporation;

(b). receipt of and the issuance of receipts for all monies due and payable to the Corporation and for deposit of all such monies in the name of the Corporation in such bank or banks or financial institutions as shall be selected by the board of directors; and

(c). generally perform all duties incident to the office of treasurer and such other duties as may be prescribed by the board of directors from time to time.

ARTICLE 10 **CERTIFICATES OF MEMBERSHIP**

Section 10.1 Certificates of Membership. The board of directors may provide for the issuance of certificates evidencing membership in the Corporation, which certificates shall be in such form as may be determined by the board.

ARTICLE 11
BOOKS AND RECORDS

Section 11.1 Books and Records; Financial Statements. The Corporation shall keep at its registered office correct and complete copies of its articles and Bylaws, accounting records, and minutes of meetings of Members, board of directors, and committees having any of the authority of the board of directors. A Member, or the agent or attorney of a Member, may inspect all books and records and voting agreements for any proper purpose at any reasonable time. Upon request, the Corporation shall give the Member a statement showing the financial result of all operations and transactions affecting income and surplus during its last annual accounting period and a balance sheet containing a summary of its assets and liabilities as of the closing date of the accounting period.

ARTICLE 12
FISCAL YEAR

Section 12.1 Fiscal Year. The fiscal year of the Corporation shall be the calendar year.

ARTICLE 13
TRANSFER OF ASSETS

Section 13.1 Member Approval Not Required. The Corporation, by affirmative vote of the board of directors, may sell, lease, transfer, or dispose of its property and assets in the usual and regular course of its activities and grant a security interest in all or substantially all of its property and assets in the usual and regular course of its activities, upon those terms and conditions and for those considerations, which may be money, securities, or other instruments for the payment of money or other property, as the board of directors considers expedient, in which case no Member approval is required.

Section 13.2 Member approval; when required. The Corporation may sell, lease, transfer, or dispose of all or substantially all of its property and assets, including its good will, not in the usual and regular course of its activities, upon those terms and conditions and for those considerations, which may be money, securities, or other instruments for the payment of money or other property, as the board of directors considers expedient only when approved at a regular or special meeting of the Members by the affirmative vote of two-thirds (2/3) of all the Members. Notice of the meeting must be given to the Members. The notice must state that a purpose of the meeting is to consider the sale, lease, transfer, or other disposition of all or substantially all of the property and assets of the Corporation.

ARTICLE 14
CONTRACTS, CHECKS, DEPOSITS, AND GIFTS

Section 14.1 Contracts. The board of directors may authorize any officer or officers or agent or agents of the Corporation, in addition to the officers so authorized by these Bylaws, to enter into any contract or execute and deliver any instrument in the name of and on behalf of the Corporation, and such authority may be general or may be confined to specific instances.

Section 14.2 Checks, Drafts, or Orders. All checks, drafts, or orders for the payment of money, notes, or other evidences of indebtedness issued in the name of the Corporation, shall be signed by such officer or officers or agent or agents of the Corporation, and in such manner as shall from time to time be determined by resolution of the board of directors.

Section 14.3 Deposits. All funds of the Corporation shall be deposited to the credit of the Corporation in such banks, trust companies, or other depositories as the board of directors may select.

Section 14.4 Gifts. The board of directors may accept on behalf of the Corporation any contribution, gift, bequest, or devise for any purpose of the Corporation.

ARTICLE 15
INSURANCE, LIABILITY, AND INDEMNIFICATION

Section 15.1 Insurance. The president is authorized to procure insurance to protect the Corporation against damages arising out of or related to any directive, order, procedure, action or requirement of the Corporation.

Section 15.2 Limitations on Liability. No director, officer, agent, employee or other representative of the Corporation, and no corporation or other business organization that employs a director of the Corporation, or any director, officer, agent or employee of such corporation or other business organization, shall be personally liable to the Corporation or any Member of the Corporation for any act or omission on the part of any such director, officer, agent, employee, or other representative of the Corporation, which was performed or omitted in good faith in his official capacity as a director, officer, agent, employee or other representative of the Corporation. However, this release of liability shall not operate to release such a director, officer, agent, employee or other representative of the Corporation from any personal liability resulting from willful acts or omissions knowingly or intentionally committed or omitted by him in breach of these Bylaws for improper personal benefit or in bad faith.

Section 15.3 Indemnification. It is the intent of the Corporation to indemnify its directors, officers, agents, employees, or other representatives to the maximum extent allowed by law consistent with these Bylaws. Each director, officer, agent, employee, or other representative of the Corporation shall be indemnified by the Corporation against all judgments, penalties, fines, settlements, and reasonable expenses, including legal fees, incurred by him as a result of, or in connection with, any threatened, pending or completed civil, criminal, administrative, or investigative proceedings to which he may be made a party by reason of his acting or having acted in his official capacity as a director, officer, agent, employee, or representative of the Corporation, or in any other capacity which he may hold at the request of the Corporation, as its representative in any other organization, subject to the following conditions:

(a). Such director, officer, agent, employee, or other representative must have conducted himself in good faith and, in the case of criminal proceedings, he must have

had no reasonable cause to believe that his conduct was unlawful. When acting in his official capacity, he must have reasonably believed that his conduct was in the best interests of the Corporation, and, when acting in any other capacity, he must have reasonably believed that his conduct was at least not opposed to the best interests of the Corporation.

(b). If the proceeding was brought by or on behalf of the Corporation, however, indemnification shall be made only with respect to reasonable expenses referenced above. No indemnification of any kind shall be made in any such proceeding in which the director, officer, agent, employee, or other representative shall have been adjudged liable to the Corporation.

(c). In no event, however, will indemnification be made with respect to any described proceeding which charges or alleges improper personal benefit to a director, officer, agent, employee, or other representative and where liability is imposed upon him on the basis of the receipt of such improper personal benefit.

(d). In order for any director, officer, agent, employee, or other representative to receive indemnification under this provision, he shall vigorously assert and pursue any and all defenses to those claims, charges, or proceedings covered hereby which are reasonable and legally available and shall fully cooperate with the Corporation or any attorneys involved in the defense of any such claim, charges, or proceedings on behalf of the Corporation.

(e). No indemnification shall be made in any specific instance until it has been determined by the Corporation that indemnification is permissible in that specific case, under the standards set forth herein and that any expenses claimed or to be incurred are reasonable. These two (2) determinations shall be made by a majority vote of at least a quorum of the board consisting solely of directors who were not parties to the proceeding for which indemnification or reimbursement of expenses is claimed. If such a quorum cannot be obtained, a majority of at least a quorum of the full board, including directors who are parties to said proceeding, shall designate a special legal counsel who shall make said determinations on behalf of the Corporation. In making any such determinations, the termination of any proceeding by judgment, order, settlement, conviction, or upon plea of nolo contendere, or its equivalent, shall not, in and of itself, be conclusive that the person did not meet the standards set forth herein.

(f). Any reasonable expenses, as shall be determined above, that have been incurred by a director, officer, agent, employee, or other representative who has been made a party to a proceeding as defined herein, may be paid or reimbursed in advance upon a majority vote of a quorum of the full board, including those who may be a party to the same proceeding. However, such director, officer, agent, employee, or other representative shall have provided the Corporation with (i) a written affirmation under oath that he, in good faith, believes that he has met the conditions for indemnification herein, and (ii) a written undertaking that he shall repay any amounts advanced, with interest accumulated at a reasonable rate, if it is ultimately determined that he has not met such conditions. In addition to the indemnification and reimbursement of expenses provided herein, the president shall purchase insurance that would protect the Corporation, its directors, officers, agents, employees, or other representatives against reasonably expected liabilities and expenses arising out of the performance of their duties for the Corporation.

TRANSITION

~~Except for those existing standards, criteria, rules, or guides that apply to the Generation Reserve Sharing Pool of the MAPP Restated Agreement, the Corporation will use the existing standards, criteria, rules or guides from each existing reliability council region for those Members that join the Corporation as in effect immediately prior to formation of the Corporation until such standards, criteria, rules or guides are adopted, superseded, or rejected by the Corporation. The Corporation will establish any necessary transition committees, subcommittees, working groups or task forces (including but not limited to a reliability committee) to administer the existing regional reliability standards, criteria, rules and guides until they are adopted, superseded, or rejected by the Corporation. The Corporation will employ its best efforts, within two years of its formation, to work toward a consistent set of Organizational and Reliability Standards (including operating reserves) for the entire Corporate Region, recognizing, however, that sub regional differences may warrant variances for certain sub regions.~~

Formatted: Indent: Left: 0.75"

ARTICLE 16 PARTICIPATION BY REGULATORY PARTICIPANTS

Section 16.1 All Regulatory Participants shall be entitled to and be provided with the same rights to notice of and participation in meetings or other activities of the Corporation as are provided to Members, but shall not have the right to vote.

ARTICLE 17 PARTICIPATION BY FEDERAL POWER MARKETING ADMINISTRATIONS

Section 17.1 The participation by the United States through Federal power marketing administrations (PMA) in the Corporation is subject in all respects to acts of Congress and to regulations of the Secretary of Energy established thereunder. This reservation includes, but is not limited to, the statutory limitations upon the authority of the Secretary of Energy to submit disputes arising hereunder to arbitration. In the event of a conflict between this Article 18 and any other Article of these Bylaws, this Article 18 shall have precedence with respect to the application of these Bylaws to the United States.

Section 17.2 Where activities provided for herein extend beyond the current fiscal year, continued expenditures by the United States are contingent upon Congress making the necessary appropriations required for the continued performance of the obligations of the PMA hereunder. In case such appropriations are not made, the Corporation and its Members hereby release the PMA from its contractual obligations under these Bylaws and from all liability due to the failure of Congress to make such appropriation.

Section 17.3 No member of or delegate to Congress shall be admitted to any share or part of, or to any benefit that may have arisen from, these Bylaws, but this restriction shall not be construed to extend to these Bylaws if made with a corporation or company for its general benefit.

Section 17.4 The Corporation and its Members warrant that no Person or selling agency has been employed or retained to solicit or secure participation by a PMA in the Corporation upon an agreement or understanding for a commission, percentage, brokerage or contingent fee, excepting *bona fide* employees or *bona fide* established commercial or selling agencies maintained by the Members for the purpose of securing business. For breach or violation of this warranty, a PMA shall have the right to annul its participation in the Corporation without liability or, in its discretion, to deduct from its dues or fees the full amount of such commission, percentage, brokerage, or contingent fee.

Section 17.5 For the purpose of this Section 18.5 the term “Contract” shall mean these Bylaws and the term “Contractor” shall mean the Corporation. During the performance of this Contract, the Contractor agrees to the following provisions.

187.5.1. Section 202 of the Executive Order No. 11246, 30 Fed. Reg. 12319 (1965), as amended by Executive Order No. 12086, 43 Fed. Reg. 46501 (1978), which provides, among other things, that the Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin, is incorporated by reference in the Contract.

178.5.2. The Contract, to the extent that it is of a character specified in Section 103 of the Contract Work Hours and Safety Standards Act, 40 U.S.C. § 329 (1986) (the “Act”), is subject to the provisions of the Act, 40 U.S.C. §§ 327-333 (1986), and to regulations promulgated by the Secretary of Labor pursuant to the Act.

178.5.3. The Contractor agrees not to employ any person undergoing sentence of imprisonment in performing the Contract except as provided by 18 U.S.C. § 4082(c)(2) and Executive Order 11755, 39 Fed. Reg. 779 (1973).

ARTICLE 18

HEARINGS DETERMINATION OF VIOLATIONS AND DISPUTE RESOLUTION

Section 18.1 Hearings. Except as otherwise provided in applicable agreements and/or law governing a Member's membership in the Corporation, ~~The the board of directors Corporation~~ shall be responsible for making final determinations regarding whether ~~(1) a Member has violated an Organizational Standard or a Reliability Standard; (2) an entity subject to a Reliability Standard has violated a Reliability Standard in connection with its operation in the Corporate Region; and (3) assessment of sanctions within the Corporate region resulting from such violations, following an initial determination by Corporation staff in accordance with the NERC Rules of Procedure. Any Member or entity organization subject to a Reliability Standard or Organizational Standard, against whom a penalty or other sanction has been recommended, shall have an opportunity to be heard by the board prior to the board's determination.~~

Formatted: Font: Bold, Underline

Section 18.2 Disputes. Dispute resolution procedures will be established by the board of directors for disputes between Members, or between a Member and the Corporation, for issues arising under these Bylaws. Determinations related to violations of Reliability Standards will be resolved in accordance with the NERC Rules of Procedure, except as

Formatted: Font: Bold, Underline

otherwise provided in applicable agreements and/or law governing a Member's membership in the corporation. provided that: (1) determinations by the Corporation related to violations of Reliability Standards shall only be appealed directly to NERC ; and (2) determinations of the Corporation related to violations of Organizational Standards shall be subject to dispute resolution only to the extent permitted by the rules of the Corporation regarding dispute resolution and provided that in any such dispute resolution proceeding the board of directors' determination of the meaning and scope of an Organizational Standard shall be final, subject to any right to appeal to any regulatory or other legal authority.

ARTICLE 19
AMENDMENT OF BYLAWS

Section 19.1 The power to adopt, amend or repeal these Bylaws is vested in the Members as set forth in Section 6.5 of these Bylaws; provided however, upon the passage of any federal reliability legislation, and/or the adoption of related requirements and procedures by NERC, ~~its successor under such legislation~~, or any regulatory agency with jurisdiction, the board or directors shall have authority upon a two-thirds (2/3) vote ~~of its members~~ to amend these Bylaws as necessary and appropriate to comply with such law and related requirements ~~and to qualify the Corporation for delegations of authority from NERC or its successor as provided in such legislation.~~

SECTION 100 — APPLICABILITY OF RULES OF PROCEDURE

NERC and NERC members shall comply with these rules of procedure. Each regional entity shall comply with these rules of procedure as applicable to functions delegated to the regional entity by NERC or as required by an appropriate governmental authority or as otherwise provided.

Each bulk power system owner, operator, and user shall comply with all rules of procedure of NERC that are made applicable to such entities by approval pursuant to applicable legislation or regulation, or pursuant to agreement.

Any entity that is unable to comply or that is not in compliance with a NERC rule of procedure shall immediately notify NERC in writing, stating the rule of concern and the reason for not being able to comply with the rule.

NERC shall evaluate each case and inform the entity of the results of the evaluation. If NERC determines that a rule has been violated, or cannot practically be complied with, NERC shall notify the applicable governmental authorities and take such other actions as NERC deems appropriate to address the situation.

NERC shall comply with each approved reliability standard that identifies NERC or the electric reliability organization as a responsible entity. Regional Entities shall comply with each approved reliability standard that identifies Regional Entities as responsible entities. A violation by NERC or a Regional Entity of such a reliability standard shall constitute a violation of these Rules of Procedure.

SECTION 200 — DEFINITIONS OF TERMS

201. General

For purposes of NERC rules of procedure, the terms defined in Section 202 shall have the meaning set forth therein. Other terms are defined within particular sections of the rules of procedure. Other terms used but not defined in the rules of procedure shall be defined in NERC's Bylaws, the NERC Glossary of Terms Used in Reliability Standards adopted in conjunction with NERC's Reliability Standards, or in accordance with their commonly understood and used technical meanings in the electric power industry, including applicable codes and standards.

202. Specific Definitions

“Board” means the Board of Trustees of NERC.

“Bulk power system” means facilities and control systems necessary for operating an interconnected electric energy supply and transmission network (or any portion thereof), and electric energy from generating facilities needed to maintain transmission system reliability. The term does not include facilities used in the local distribution of electric energy.

“Canadian” means one of the following: (a) a company or association incorporated or organized under the laws of Canada, or its designated representative(s) irrespective of nationality; (b) an agency of a federal, provincial, or local government in Canada, or its designated representative irrespective(s) of nationality; or (c) a self-representing individual who is a Canadian citizen residing in Canada.

“Confirmed violation” is one for which an entity has: 1) accepted the finding of the violation by a regional entity or NERC and will not seek an appeal, or 2) completed the hearing and appeals process within NERC, or 3) allowed the time for submitting an appeal to expire, or 4) admitted to the violation in a settlement agreement.

“Electric reliability organization” or “ERO” means the organization that is certified by the Commission under Section 39.3 of its regulations, the purpose of which is to establish and enforce Reliability Standards for the bulk power system in the United States. The organization may also have received recognition by applicable governmental authorities in Canada and Mexico to establish and enforce reliability standards for the bulk power systems of the respective countries.

“Entity variance” means an aspect of a reliability standard that applies only within a particular entity or a subset of entities within a limited portion of a regional entity, such as a variance that would apply to a regional transmission organization or particular market or to a subset of bulk power system owners, operators or users. An entity variance may not be inconsistent with or less stringent than the reliability standards as it would otherwise exist without the entity variance. An entity variance shall be approved only through the NERC standards development procedure and shall be made part of the NERC reliability standards.

“ERO governmental authority” is a government agency that has subject matter jurisdiction over the reliability of the bulk power system within its jurisdictional territory. In the United States, the ERO governmental authority is the Federal Energy Regulatory Commission. In Canada, the ERO governmental authority resides with applicable federal and provincial governments who may delegate duties and responsibilities to other entities. Use of the term is intended to be inclusive of all applicable authorities in the United States, Canada, and Mexico, and is not restricted to those listed here.

“Net Energy for Load” or “NEL” means net generation of an electric system plus energy received from others less energy delivered to others through interchange. It includes system losses but excludes energy required for the storage of energy at energy storage facilities.

“Reliable operation” means operating the elements of the bulk power system within equipment and electric system thermal, voltage, and stability limits so that instability, uncontrolled separation, or cascading failures of such system will not occur as a result of a sudden disturbance, including a cyber security incident, or unanticipated failure of system elements.

“Regional criteria” means reliability requirements developed by a regional entity that are necessary to implement, to augment, or to comply with reliability standards, but which are not reliability standards. Such regional criteria may be necessary to account for physical differences in the bulk power system but are not inconsistent with reliability standards nor do they result in lesser reliability. Such regional criteria are not enforceable pursuant to NERC-delegated authorities, but may be enforced through other available mechanisms. Regional criteria may include specific acceptable operating or planning parameters, guides, agreements, protocols or other documents.

“Regional reliability standard” means a type of reliability standards that is applicable only within a particular regional entity or group of regional entities. A regional reliability standard may augment, add detail to, or implement another reliability standard or cover matters not addressed by other reliability standards. Regional reliability standards, upon adoption by NERC and approval by the applicable ERO governmental authority(ies), shall be reliability standards and shall be enforced within the applicable regional entity or regional entities pursuant to delegated authorities.

“Reliability standard” means a requirement to provide for reliable operation of the bulk power system, including without limiting the foregoing, requirements for the operation of existing bulk power system facilities, including cyber security protection, and including the design of planned additions or modifications to such facilities to the extent necessary for reliable operation of the bulk power system, but the term does not include any requirement to enlarge bulk power system facilities or to construct new transmission capacity or generation capacity. A reliability standard shall not be effective in the United States until approved by the Federal Energy Regulatory Commission and shall not be effective in other jurisdictions until made or allowed to become effective by the applicable governmental authority.

“Variance” means an aspect or element of a reliability standard that applies only within a particular regional entity or group of regional entities, or to a particular entity or class of entities. A variance allows an alternative approach to meeting the same reliability objective as the reliability standard, and is typically necessitated by a physical difference. A variance is embodied within a reliability standard and as such, if adopted by NERC and approved by the ERO governmental authority, shall be enforced within the applicable regional entity or regional entities pursuant to delegated authority.

SECTION 300 — RELIABILITY STANDARDS DEVELOPMENT

301. General

NERC shall develop and maintain reliability standards that apply to bulk power system owners, operators, and users and that enable NERC and regional entities to measure the reliability performance of bulk power system owners, operators, and users; and to hold them accountable for reliable operation of the bulk power systems. The reliability standards shall be technically excellent, timely, just, reasonable, not unduly discriminatory or preferential, in the public interest, and consistent with other applicable standards of governmental authorities.

302. Essential Attributes for Technically Excellent Reliability Standards

1. **Applicability** — Each reliability standard shall clearly identify the functional classes of entities responsible for complying with the reliability standard, with any specific additions or exceptions noted. Such functional classes¹ include: reliability coordinators, balancing authorities, transmission operators, transmission owners, generator operators, generator owners, interchange authorities, transmission service providers, market operators, planning authorities, transmission planners, resource planners, load-serving entities, purchasing-selling entities, and distribution providers. Each reliability standard shall also identify the geographic applicability of the standard, such as the entire North American bulk power system, an interconnection, or within a regional entity area. A standard may also identify any limitations on the applicability of the standard based on electric facility characteristics.
2. **Reliability Objectives** — Each reliability standard shall have a clear statement of purpose that shall describe how the standard contributes to the reliability of the bulk power system. The following general objectives for the bulk power system provide a foundation for determining the specific objective(s) of each reliability standard:
 - 2.1 **Reliability Planning and Operating Performance** — Bulk power systems shall be planned and operated in a coordinated manner to perform reliably under normal and abnormal conditions.
 - 2.2 **Frequency and Voltage Performance** — The frequency and voltage of bulk power systems shall be controlled within defined limits through the balancing of real and reactive power supply and demand.
 - 2.3 **Reliability Information** — Information necessary for the planning and operation of reliable bulk power systems shall be made available to those entities responsible for planning and operating bulk power systems.

¹ These functional classes of entities are derived from NERC's Reliability Functional Model. When a standard identifies a class of entities to which it applies, that class must be defined in the Glossary of Terms Used in Reliability Standards.

- 2.4 **Emergency Preparation** — Plans for emergency operation and system restoration of bulk power systems shall be developed, coordinated, maintained, and implemented.
- 2.5 **Communications and Control** — Facilities for communication, monitoring, and control shall be provided, used, and maintained for the reliability of bulk power systems.
- 2.6 **Personnel** — Personnel responsible for planning and operating bulk power systems shall be trained and qualified, and shall have the responsibility and authority to implement actions.
- 2.7 **Wide-area View** — The reliability of the bulk power systems shall be assessed, monitored, and maintained on a wide-area basis.
- 2.8 **Security** — Bulk power systems shall be protected from malicious physical or cyber attacks.
3. **Performance Requirement or Outcome** — Each reliability standard shall state one or more performance requirements, which if achieved by the applicable entities, will provide for a reliable bulk power system, consistent with good utility practices and the public interest. Each requirement is not a “lowest common denominator” compromise, but instead achieves an objective that is the best approach for bulk power system reliability, taking account of the costs and benefits of implementing the proposal.
4. **Measurability** — Each performance requirement shall be stated so as to be objectively measurable by a third party with knowledge or expertise in the area addressed by that requirement. Each performance requirement shall have one or more associated measures used to objectively evaluate compliance with the requirement. If performance can be practically measured quantitatively, metrics shall be provided to determine satisfactory performance.
5. **Technical Basis in Engineering and Operations** — Each reliability standard shall be based upon sound engineering and operating judgment, analysis, or experience, as determined by expert practitioners in that particular field.
6. **Completeness** — Reliability standards shall be complete and self-contained. The standards shall not depend on external information to determine the required level of performance.
7. **Consequences for Noncompliance** — In combination with guidelines for penalties and sanctions, as well as other ERO and regional entity compliance documents, the consequences of violating a standard are clearly presented to the entities responsible for complying with the standards.
8. **Clear Language** — Each reliability standard shall be stated using clear and unambiguous language. Responsible entities, using reasonable judgment and in

keeping with good utility practices, are able to arrive at a consistent interpretation of the required performance.

9. **Practicality** — Each reliability standard shall establish requirements that can be practically implemented by the assigned responsible entities within the specified effective date and thereafter.
10. **Consistent Terminology** — To the extent possible, reliability standards shall use a set of standard terms and definitions that are approved through the NERC reliability standards development process.

303. Relationship between Reliability Standards and Competition

To ensure reliability standards are developed with due consideration of impacts on competition, to ensure standards are not unduly discriminatory or preferential, and recognizing that reliability is an essential requirement of a robust North American economy, each reliability standard shall meet all of these market-related objectives:

1. **Competition** — A reliability standard shall not give any market participant an unfair competitive advantage.
2. **Market Structures** — A reliability standard shall neither mandate nor prohibit any specific market structure.
3. **Market Solutions** — A reliability standard shall not preclude market solutions to achieving compliance with that standard.
4. **Commercially Sensitive Information** — A reliability standard shall not require the public disclosure of commercially sensitive information or other confidential information. All market participants shall have equal opportunity to access commercially non-sensitive information that is required for compliance with reliability standards.
5. **Adequacy** — NERC shall not set standards defining an adequate amount of, or requiring expansion of, bulk power system resources or delivery capability.

304. Essential Principles for the Development of Reliability Standards

NERC shall develop reliability standards in accordance with the NERC *Reliability Standards Development Procedure*, which is incorporated into these rules as **Appendix 3A**. Appeals in connection with the development of a reliability standard shall also be conducted in accordance with the NERC *Reliability Standards Development Procedure*. Any amendments or revisions to the *Reliability Standards Development Procedure* shall be consistent with the following essential principles:

1. **Openness** — Participation shall be open to all persons who are directly and materially affected by the reliability of the North American bulk power system. There shall be no undue financial barriers to participation. Participation shall not be conditional upon membership in NERC or any other organization, and shall

not be unreasonably restricted on the basis of technical qualifications or other such requirements.

2. **Transparency** — The process shall be transparent to the public.
3. **Consensus-building** — The process shall build and document consensus for each standard, both with regard to the need and justification for the standard and the content of the standard.
4. **Fair Balance of Interests** — The process shall fairly balance interests of all stakeholders and shall not be dominated by any single interest category.
5. **Due Process** — Development of standards shall provide reasonable notice and opportunity for any person with a direct and material interest to express views on a proposed standard and the basis for those views, and to have that position considered in the development of the standards.
6. **Timeliness** — Development of standards shall be timely and responsive to new and changing priorities for reliability of the bulk power system.

305. Registered Ballot Body

NERC reliability standards shall be approved by a registered ballot body prior to submittal to the board and then to ERO governmental authorities for their approval, where authorized by applicable legislation or agreement. This Section 305 sets forth the rules pertaining to the composition of, and eligibility to participate in, the registered ballot body.

1. **Eligibility to Vote on Standards** — Any person or entity may join the registered ballot body to vote on standards, whether or not such person or entity is a member of NERC.
2. **Inclusive Participation** — The segment qualification guidelines are inclusive; i.e., any entity with a legitimate interest in the reliability of the bulk power system that can meet any one of the eligibility criteria for a segment is entitled to belong to and vote in each segment for which it qualifies, subject to limitations defined in Sections 305.3 and 305.5.
3. **General Criteria for Registered Ballot Body Membership** — The general criteria for membership in the segments are:
 - 3.1 **Multiple Segments** — A corporation or other organization with integrated operations or with affiliates that qualifies to belong to more than one segment (e.g., transmission owners and load serving entities) may join once in each segment for which it qualifies, provided that each segment constitutes a separate membership and the organization is represented in each segment by a different representative. Affiliated entities are collectively limited to one membership in each segment for which they are qualified.

- 3.2 **Withdrawing from a Segment or Changing Segments** — After its initial registration in a segment, each registered participant may elect to withdraw from a segment or apply to change segments at any time.
- 3.3 **Review of Segment Criteria** — The board shall review the qualification guidelines and rules for joining segments at least every three years to ensure that the process continues to be fair, open, balanced, and inclusive. Public input will be solicited in the review of these guidelines.
4. **Proxies for Voting on Standards** — Any registered participant may designate an agent or proxy to vote on its behalf. There are no limits on how many proxies an agent may hold. However, for the proxy to be valid, NERC must have in its possession written documentation signed by the representative of the registered participant that the voting right by proxy has been transferred from the registered participant to the agent.
5. **Stakeholder Segments** — The specific criteria for membership in each registered ballot body segment are defined in the *Reliability Standards Development Procedure* in **Appendix 3A**.
6. **Review of Stakeholder Segment Entries**
NERC shall review all applications for joining the registered ballot body, and shall make a determination of whether the applicant's self-selection of a segment satisfies at least one of the guidelines to belong to that segment. The entity shall then become eligible to participate as a voting member of that segment. The Standards Committee shall resolve disputes regarding eligibility for membership in a segment, with the applicant having the right of appeal to the board.

306. Standards Committee

The Standards Committee shall provide oversight of the reliability standards development process to ensure stakeholder interests are fairly represented. The Standards Committee shall not under any circumstance change the substance of a draft or approved standard.

1. **Membership** — The Standards Committee is a representative committee comprising representatives of two members of each of the segments in the registered ballot body.
2. **Elections** — Standards Committee members are elected for staggered (one per segment per year) two-year terms by the respective stakeholder segments in accordance with the *Procedure for the Election of Members of the NERC Standards Committee*, which is incorporated into these rules as **Appendix 2**. Segments may use their own election procedure if such a procedure is ratified by two-thirds of the members of a segment and approved by the board.
3. **Canadian Representation**
 - 3.1 **Provision for Sufficient Canadian Representation** — If any regular election of Standards Committee members does not result in at least two

Canadian members on the Standards Committee, the Canadian nominees who were not elected but who received the next highest percentage of votes within their respective segment(s) will be designated as additional members of the Standards Committee, as needed to achieve a total of two Canadian members.

- 3.2 **Terms of Specially Designated Canadian Members** — Each specially designated Canadian member of the Standards Committee shall have a term ending with the next annual election.
- 3.3 **Segment Preference** — If any segment has an unfilled representative position on the Standards Committee following the annual election, the first preference is to assign each specially designated Canadian representative to a segment with an unfilled representative position for which his or her organization qualifies.
- 3.4 **Rights of Specially Designated Canadian Members** — Any specially designated Canadian members of the Standards Committee shall have the same rights and obligations as all other members of the Standards Committee.
4. **Open Meetings** — All meetings of the Standards Committee shall be open and publicly noticed on the NERC Web site.

307. Standards Process Manager

NERC shall assign a standards process manager to administer the development of reliability standards. The standards process manager shall be responsible for ensuring that the development and revision of standards are in accordance with the NERC *Reliability Standards Development Procedure*. The standards process manager shall work to achieve the highest degree of integrity and consistency of quality and completeness of the reliability standards. The standards process manager shall coordinate with any regional entities that develop regional reliability standards to ensure those standards are effectively integrated with the NERC reliability standards.

308. Steps in the Development of Reliability Standards

1. **Procedure** — NERC shall develop reliability standards through the process set forth in the NERC *Reliability Standards Development Procedure* (**Appendix 3A**). The procedure includes a provision for approval of urgent action standards that can be completed within 60 days and emergency actions that may be further expedited.
2. **Board Approval** — Reliability standards or revisions to reliability standards approved by the ballot pool in accordance with the *Reliability Standards Development Procedure* shall be submitted for approval by the board. No reliability standard or revision to a reliability standard shall be effective unless approved by the board.

3. **Governmental Approval** — After receiving board approval, a reliability standard or revision to a reliability standard shall be submitted to all applicable ERO governmental authorities in accordance with Section 309. No reliability standard or revision to a reliability standard shall be effective within a geographic area over which an ERO governmental authority has jurisdiction unless approved by such ERO governmental authority or is otherwise made effective pursuant to the laws applicable to such ERO governmental authority.

309. Filing of Reliability Standards for Approval by ERO Governmental Authorities

1. **Filing of Reliability Standards for Approval** — Where authorized by applicable legislation or agreement, NERC shall file with the applicable ERO governmental authorities each reliability standard, modification to a reliability standard, or withdrawal of a standard that is approved by the board. Each filing shall be in the format required by the ERO governmental authority and shall include: a concise statement of the basis and purpose of the standard; the text of the standard; the implementation plan for the reliability standard; a demonstration that the standard meets the essential attributes of reliability standards as stated in Section 302; the drafting team roster; the ballot pool and final ballot results; and a discussion of public comments received during the development of the reliability standard and the consideration of those comments.
2. **Remanded Reliability Standards and Directives to Develop Standards** — If an ERO governmental authority remands a reliability standard to NERC or directs NERC to develop a reliability standard, NERC shall within five (5) business days notify all other applicable ERO governmental authorities, and shall within thirty (30) calendar days report to all ERO governmental authorities a plan and timetable for modification or development of the reliability standard. Standards that are remanded or directed by an ERO governmental authority shall be modified or developed using the *Reliability Standards Development Procedure*. NERC shall, during the development of a modification for the remanded standard or directed standard, consult with other ERO governmental authorities to coordinate any impacts of the proposed standards in those other jurisdictions. The urgent approval action procedure may be applied if necessary to meet a timetable for action required by the ERO governmental authorities, respecting to the extent possible the provisions in the standards development process for reasonable notice and opportunity for public comment, due process, openness, and a balance of interest in developing reliability standards.
3. **Directives to Develop Standards under Extraordinary Circumstances** — An ERO governmental authority may, on its own initiative, determine that extraordinary circumstances exist requiring expedited development of a reliability standard. In such a case, the applicable agency may direct the development of a standard within a certain deadline. NERC staff shall prepare the standards authorization request and seek a stakeholder sponsor for the request. If NERC is unable to find a sponsor for the proposed standard, NERC will be designated as the requestor. The proposed standard will then proceed through the standards development process, using the urgent and emergency action procedures

described in the *Reliability Standards Development Procedure* as necessary to meet the specified deadline. The timeline will be developed to respect, to the extent possible, the provisions in the standards development process for reasonable notice and opportunity for public comment, due process, openness, and a balance of interests in developing reliability standards.

- 3.1 Consistent with all reliability standards developed under the urgent or emergency action process, each of the three possible follow-up actions as documented in the *Reliability Standards Development Procedure* are to be completed through the standards development process and are subject to approval by the ERO governmental authorities in the U.S. and Canada.

310. Reliability Standards Annual Work Plan

NERC shall develop and provide an annual work plan for development of reliability standards to the applicable ERO governmental authorities. NERC shall consider the comments and priorities of the ERO governmental authorities in developing and updating the work plan. Each annual work plan shall include a progress report comparing results achieved to the prior year's plan.

311. Regional Entity Standards Development Procedures

1. **NERC Approval of Regional Entity Reliability Standards Development Procedure** — To enable a regional entity to develop regional reliability standards that are to be recognized and made part of NERC reliability standards, a regional entity may request NERC to approve a regional entity reliability standards development procedure.
2. **Public Notice and Comment on Regional Reliability Standards Development Procedure** — Upon receipt of such a request, NERC shall publicly notice and request comment on the proposed regional standards development procedure, allowing a minimum of 45 days for comment. The regional entity shall have an opportunity to resolve any objections identified in the comments and may choose to withdraw the request, revise the procedure and request another posting for comment, or submit the procedure, along with its consideration of any objections received, for approval by NERC.
3. **Evaluation of Regional Reliability Standards Development Procedure** — NERC shall evaluate whether a regional reliability standards development procedure meets the criteria listed below and shall consider stakeholder comments, any unresolved stakeholder objections, and the consideration of comments provided by the regional entity, in making that determination. If NERC determines the regional reliability standards development procedure meets these requirements, the procedure shall be submitted to the board for approval. The board shall consider the recommended action, stakeholder comments, any unresolved stakeholder comments, and the regional entity consideration of comments in determining whether to approve the regional reliability standards development procedure.

- 3.1 **Evaluation Criteria** — The regional reliability standards development procedure shall be:
- 3.1.1 **Open** — The regional reliability standards development procedure shall provide that any person or entity who is directly and materially affected by the reliability of the bulk power systems within the regional entity shall be able to participate in the development and approval of reliability standards. There shall be no undue financial barriers to participation. Participation shall not be conditional upon membership in the regional entity, a regional entity or any organization, and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements.
 - 3.1.2 **Inclusive** — The regional reliability standards development procedure shall provide that any person with a direct and material interest has a right to participate by expressing an opinion and its basis, having that position considered, and appealing through an established appeals process if adversely affected.
 - 3.1.3 **Balanced** — The regional reliability standards development procedure shall have a balance of interests and shall not permit any two interest categories to control the vote on a matter or any single interest category to defeat a matter.
 - 3.1.4 **Due Process** — The regional reliability standards development procedure shall provide for reasonable notice and opportunity for public comment. At a minimum, the procedure shall include public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of interested stakeholders.
 - 3.1.5 **Transparent** — All actions material to the development of regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the regional entity's Web site.
 - 3.1.6 **Accreditation of Regional Standards Development Procedure** — A regional entity's reliability standards development procedure that is accredited by the American National Standards Institute or the Standards Council of Canada shall be deemed to meet the criteria listed in this Section 311.3.1, although such accreditation is not a prerequisite for approval by NERC.
 - 3.1.7 **Use of NERC Procedure** — A regional entity may adopt the *NERC Reliability Standards Development Procedure* as the regional reliability standards development procedure, in which

case the regional entity's procedure shall be deemed to meet the criteria listed in this Section 311.3.1.

4. **Revisions of Regional Reliability Standards Development Procedures** — Any revision to a regional reliability standards development procedure shall be subject to the same approval requirements set forth in Sections 311.1 through 311.3.
5. **Duration of Regional Reliability Standards Development Procedures** — The regional reliability standards development procedure shall remain in effect until such time as it is replaced with a new version approved by NERC or it is withdrawn by the regional entity. The regional entity may, at its discretion, withdraw its regional reliability standards development procedure at any time.

312. Regional Reliability Standards

1. **Basis for Regional Reliability Standards** — Regional entities may propose regional reliability standards that set more stringent reliability requirements than the NERC reliability standard or cover matters not covered by an existing NERC reliability standard. Such regional reliability standards shall in all cases be approved by NERC and made part of the NERC reliability standards and shall be enforceable in accordance with the delegation agreement between NERC and the regional entity or other instrument granting authority over enforcement to the regional entity. No entities other than NERC and the regional entity shall be permitted to develop regional reliability standards that are enforceable under statutory authority delegated to NERC and the regional entity.
2. **Regional Reliability Standards That are Directed by a NERC Reliability Standard** — Although it is the intent of NERC to promote uniform reliability standards across North America, in some cases it may not be feasible to achieve a reliability objective with a reliability standard that is uniformly applicable across North America. In such cases, NERC may direct regional entities to develop regional reliability standards necessary to implement a NERC reliability standard. Such regional reliability standards that are developed pursuant to a direction by NERC shall be made part of the NERC reliability standards.
3. **Procedure for Developing an Interconnection-wide Regional Standard** — A regional entity organized on an interconnection-wide basis may propose a regional reliability standard for approval as a NERC reliability standard to be made mandatory for all applicable bulk power system owners, operators, and users within that interconnection.
 - 3.1 **Presumption of Validity** — An interconnection-wide regional reliability standard that is determined by NERC to be just, reasonable, and not unduly discriminatory or preferential, and in the public interest, and consistent with such other applicable standards of governmental authorities, shall be adopted as a NERC reliability standard. NERC shall rebuttably presume that a regional reliability standard developed, in accordance with a regional reliability standards development process approved by NERC, by a regional entity organized on an interconnection-

wide basis, is just, reasonable, and not unduly discriminatory or preferential, and in the public interest, and consistent with such other applicable standards of governmental authorities.

- 3.2 **Notice and Comment Procedure for Interconnection-wide Regional Reliability Standard** — NERC shall publicly notice and request comment on the proposed interconnection-wide regional reliability standard, allowing a minimum of 45 days for comment. NERC may publicly notice and post for comment the proposed regional reliability standard concurrent with similar steps in the regional entity’s reliability standards development process. The regional entity shall have an opportunity to resolve any objections identified in the comments and may choose to comment on or withdraw the request, revise the proposed regional reliability standard and request another posting for comment, or submit the proposed regional reliability standard along with its consideration of any objections received, for approval by NERC.
- 3.3 **Approval of Interconnection-wide Regional Reliability Standard by NERC** — NERC shall evaluate and recommend whether a proposed interconnection-wide regional reliability standard has been developed in accordance with all applicable procedural requirements and whether the regional entity has considered and resolved stakeholder objections that could serve as a basis for rebutting the presumption of validity of the regional reliability standard. The regional entity, having been notified of the results of the evaluation and recommendation concerning NERC proposed regional reliability standard, shall have the option of presenting the proposed regional reliability standard to the board for approval as a NERC reliability standard. The board shall consider the regional entity’s request, NERC’s recommendation for action on the regional reliability standard, any unresolved stakeholder comments, and the regional entity’s consideration of comments, in determining whether to approve the regional reliability standard as a NERC reliability standard.
- 3.4 **ERO Governmental Authority Approval** — An interconnection-wide regional reliability standard that has been approved by the board shall be filed with the applicable ERO governmental authorities for approval, where authorized by applicable legislation or agreement, and shall become effective when approved by such ERO governmental authorities or on a date set by the ERO governmental authorities.
- 3.5 **Enforcement of Interconnection-wide Regional Reliability Standard** — An interconnection-wide regional reliability standard that has been approved by the board and by the applicable ERO governmental authorities or is otherwise made effective within Canada as mandatory within a particular region shall be applicable and enforced as a NERC reliability standard within the region.

4. **Procedure for Developing Non-Interconnection-Wide Regional Reliability Standards**

Regional entities that are not organized on an interconnection-wide basis may propose regional reliability standards to apply within their respective regions. Such standards may be developed through the NERC reliability standards development procedure, or alternatively, through a regional reliability standards development procedure that has been approved by NERC.

4.1 **No Presumption of Validity** — Regional reliability standards that are not proposed to be applied on an interconnection-wide basis are not presumed to be valid but may be demonstrated by the proponent to be valid.

4.2 **Notice and Comment Procedure for Non-Interconnection-wide Regional Reliability Standards** — NERC shall publicly notice and request comment on the proposed regional reliability standard, allowing a minimum of 45 days for comment. NERC may publicly notice and post for comment the proposed regional reliability standard concurrent with similar steps in the regional entity's reliability standards development process. The regional entity shall have an opportunity to comment on or resolve any objections identified in the comments and may choose to withdraw the request, revise the proposed regional reliability standard and request another posting for comment, or submit the proposed regional reliability standard along with its consideration of any objections received, for approval by NERC.

4.3 **NERC Approval of Non-Interconnection-wide Regional Reliability Standards** — NERC shall evaluate and recommend whether a proposed non-Interconnection-wide regional reliability standard has been developed in accordance with all applicable procedural requirements and whether the regional entity has considered and resolved stakeholder objections. The regional entity, having been notified of the results of the evaluation and recommendation concerning proposed regional reliability standard, shall have the option of presenting the proposed regional reliability standard to the board for approval as a NERC reliability standard. The board shall consider the regional entity's request, the recommendation for action on the regional reliability standard, any unresolved stakeholder comments, and the regional entity's consideration of comments, in determining whether to approve the regional reliability standard as a NERC reliability standard.

4.4 **NERC Governmental Authority Approval** — A non-Interconnection-wide regional reliability standard that has been approved by the board shall be filed with the applicable ERO governmental authorities for approval, where authorized by applicable legislation or agreement, and shall become effective when approved by such ERO governmental authorities or on a date set by the ERO governmental authorities.

- 4.5 **Enforcement of Non-Interconnection-wide Regional Reliability Standards** — A non-Interconnection-wide regional reliability standard that has been approved by the board and by the applicable ERO governmental authorities or is otherwise made effective within Canada as mandatory within a particular region shall be applicable and enforced as a NERC reliability standard within the region.

5. **Appeals**

A Regional Entity shall have the right to appeal NERC's decision not to approve a proposed regional reliability standard or variance to the Commission or other applicable governmental authority.

313. Other Regional Criteria, Guides, Procedures, Agreements, Etc.

1. **Regional Criteria** — Regional entities may develop regional criteria that are necessary to implement, to augment, or to comply with reliability standards, but which are not reliability standards. Regional criteria may also address issues not within the scope of reliability standards, such as resource adequacy. Regional criteria may include specific acceptable operating or planning parameters, guides, agreements, protocols or other documents used to enhance the reliability of the regional bulk power system. These documents typically provide benefits by promoting more consistent implementation of the NERC reliability standards within the region. These documents are not NERC reliability standards, regional reliability standards, or regional variances, and therefore are not enforceable under authority delegated by NERC pursuant to delegation agreements and do not require NERC approval.
2. **Catalog of Regional Reliability Criteria** — NERC shall maintain a current catalog of regional reliability criteria. Regional entities shall provide a catalog listing of regional reliability criteria to NERC and shall notify NERC of changes to the listing. Regional entities shall provide any listed document to NERC upon written request.

314. Conflicts with Statutes, Regulations, and Orders

Notice of Potential Conflict — If a bulk power system owner, operator, or user determines that a NERC or regional reliability standard may conflict with a function, rule, order, tariff, rate schedule, legislative requirement or agreement that has been accepted, approved, or ordered by a governmental authority affecting that entity, the entity shall expeditiously notify the governmental authority, NERC, and the relevant regional entity of the conflict.

1. **Determination of Conflict** — NERC, upon request of the governmental authority, may advise the governmental authority regarding the conflict and propose a resolution of the conflict, including revision of the reliability standard if appropriate.
2. **Regulatory Precedence** — Unless otherwise ordered by a governmental authority, the affected bulk power system owner, operator, or user shall continue

to follow the function, rule, order, tariff, rate schedule, legislative requirement, or agreement accepted, approved, or ordered by the governmental authority until the governmental authority finds that a conflict exists and orders a remedy and such remedy is affected.

315. Revisions to NERC Reliability Standards Development Procedure

Any person or entity may submit a written request to modify NERC *Reliability Standards Development Procedure*. Consideration of the request and development of the revision shall follow the process defined in the NERC *Reliability Standards Development Procedure*. Upon approval by the board, the revision shall be submitted to the ERO governmental authorities for approval. Changes shall become effective only upon approval by the ERO governmental authorities or on a date designated by the ERO governmental authorities or as otherwise applicable in a particular jurisdiction.

316. Accreditation

NERC shall seek continuing accreditation of the NERC reliability standards development process by the American National Standards Institute and the Standards Council of Canada.

317. Five-Year Review of Standards

NERC shall complete a review of each NERC reliability standard at least once every five years from the effective date of the standard or the latest revision to the standard, whichever is later. The review process shall be conducted in accordance with the NERC *Reliability Standards Development Procedure*. The standards process manager shall be responsible for administration of the five-year review of reliability standards. As a result of this review, the NERC reliability standard shall be reaffirmed, revised, or withdrawn. If the review indicates a need to revise or withdraw the standard, a request for revision or withdrawal shall be prepared, submitted and addressed in accordance with the NERC *Reliability Standards Development Procedure*.

318. Coordination with the North American Energy Standards Board

NERC shall, through a memorandum of understanding, maintain a close working relationship with the North American Energy Standards Board and ISO/RTO Council to ensure effective coordination of wholesale electric business practice standards and market protocols with the NERC reliability standards.

319. Archived Standards Information

NERC shall maintain a historical record of reliability standards information that is no longer maintained on-line. For example, standards that expired or were replaced may be removed from the on-line system. Archived information shall be retained indefinitely as practical, but in no case less than five years or one complete standards review cycle from the date on which the standard was no longer in effect. Archived records of reliability standards information shall be available electronically within 30 days following the receipt by the standards process manager of a written request.

320. Alternate Method for Adopting Violation Risk Factors

In the event the standards development process fails to produce violation risk factors for a particular standard in a timely manner, the Board of Trustees may adopt violation risk factors for that standard using the procedures set out in Section 1400 of these Rules of Procedure.

SECTION 400 — COMPLIANCE ENFORCEMENT

401. Scope of the NERC Compliance Enforcement Program

1. **Components of the NERC Compliance Enforcement Program** — NERC shall develop and implement a NERC Compliance Monitoring and Enforcement Program to promote the reliability of the bulk power system by enforcing compliance with approved reliability standards in those regions of North American in which NERC and/or a regional entity (pursuant to a delegation agreement with NERC that has been approved by the applicable ERO governmental authority) has been given enforcement authority. There are four distinct parts of the NERC Monitoring and Compliance Enforcement Program: (1) NERC's oversight of the regional entity compliance programs (Section 402), (2) the definition of the required regional entity compliance enforcement program attributes (Section 403), (3) NERC's monitoring of regional entity compliance with reliability standards (Section 404), and (4) the monitoring of compliance with reliability standards that are applicable to NERC (Sections 405–406).
2. **Who Must Comply** — Where required by applicable legislation, regulation, rule or agreement, all bulk power system owners, operators, and users, regional entities, and NERC, are required to comply with all approved NERC reliability standards at all times. Regional reliability standards and regional variances approved by NERC and the applicable ERO governmental authority shall be considered NERC reliability standards and shall apply to all bulk power system owners, operators, or users responsible for meeting those standards within the regional entity boundaries, whether or not the bulk power system owner, operator, or user is a member of the regional entity.
3. **Data Access** — All bulk power system owners, operators, and users shall provide to NERC and the applicable regional entity such information as is necessary to monitor compliance with the reliability standards. NERC and the applicable regional entity will define the data retention and reporting requirements in the reliability standards and compliance reporting procedures.
4. **Role of Regional Entities in the Compliance Enforcement Program** — Each regional entity that has been delegated authority through a delegation agreement or other legal instrument approved by the applicable ERO governmental authority shall, in accordance with the terms of the approved delegation agreement, administer a regional entity compliance enforcement program to meet the NERC Compliance Monitoring and Enforcement Program goals and the requirements in this Section 400.
5. **Program Continuity** — NERC will ensure continuity of compliance monitoring and enforcement within the geographic boundaries of a regional entity in the event that NERC does not have a delegation agreement, or the regional entity withdraws from the agreement or does not operate its compliance enforcement program in accordance with the delegation agreement or other applicable requirements.

- 5.1 Should NERC not have a delegation agreement with a regional entity covering a geographic area, or a regional entity withdraws from an existing delegation agreement or the delegation agreement is otherwise terminated, NERC will directly administer the Compliance Monitoring and Enforcement Program applicable to owners, operators and users of the bulk-power system within that geographic area.
 1. This monitoring and enforcement will be accomplished by NERC and compliance staff from another approved regional entity.
 2. If an existing delegation agreement with a regional entity is terminating, the regional entity shall promptly provide to NERC all relevant compliance information regarding registered entities, contacts, prior compliance information and actions, mitigation plans, and remedial actions for the period in which the regional entity was responsible for administering the Compliance Monitoring and Enforcement Program.
 3. NERC will levy and collect all penalties directly and will utilize any penalty monies collected to offset the expenses of administering the compliance monitoring and enforcement program for the geographic area.
- 5.2 Should a regional entity seek to withdraw from its delegation agreement, NERC will seek agreement from another regional entity to amend its delegation agreement with NERC to extend that regional entity's boundaries for compliance monitoring and enforcement. In the event no regional entity is willing to accept this responsibility, NERC will administer the Compliance Monitoring and Enforcement Program within the geographical boundaries of the regional entity seeking to withdraw from the delegation agreement, in accordance with Section 401.5.1.
6. **Actively Monitored Requirements** — NERC, with input from the regional entities, stakeholders, and regulators, shall annually select a subset of the NERC reliability standards and requirements to be actively monitored and audited in the NERC annual compliance program. Compliance is required with all NERC reliability standards whether or not they are included in the subset of reliability standards and requirements designated to be actively monitored and audited in the NERC annual compliance program.
7. **Penalties, Sanctions, and Remedial Actions** — NERC and regional entities will apply penalties, sanctions, and remedial actions that bear a reasonable relation to the seriousness of a violation and take into consideration timely remedial efforts as defined in the NERC *Sanction Guidelines*, which is incorporated into these rules as **Appendix 4B**.
8. **Multiple Enforcement Actions** – A registered entity shall not be subject to an enforcement action by NERC and a regional entity for the same violation.
9. **Records** — NERC shall maintain a record of each compliance submission, including self-reported, possible, alleged, and confirmed violations of approved

reliability standards; associated penalties, sanctions, remedial actions and settlements; and the status of mitigation actions.

10. **Confidential Information** — NERC will treat all possible and alleged violations of reliability standards and matters related to a compliance monitoring and enforcement program process, including the status of any compliance investigation or other compliance monitoring and enforcement process, as confidential in accordance with Section 1500.

The types of information that will be considered confidential and will not (subject to statutory and regulatory requirements) be disclosed in any public information reported by NERC are identified in Section 1500. Information that would jeopardize bulk power system reliability, including information relating to a Cyber Security Incident, will be identified and protected from public disclosure as critical energy infrastructure information in accordance with Section 1500.

The regional entity and NERC shall give bulk power system owners, operators, and users a reasonable opportunity to demonstrate that information concerning a violation is confidential before such report is disclosed to the public.

11. **Public Posting** — When the affected bulk power system owner, operator, or user either agrees with a possible or alleged violation(s) of a reliability standard(s) or a report of a compliance audit or compliance investigation, or the time for submitting an appeal is passed, or all appeals processes are complete, NERC shall, subject to the confidentiality requirements of these rules, publicly post each confirmed violation, penalty or sanction, and final compliance audit or compliance investigation report, on its Web site.

11.1 Each bulk power system owner, operator, or user may provide NERC with a statement to accompany the violation or report to be posted publicly. The statement must be on company letterhead and include a signature, as well as the name and title of the person submitting the information.

11.2 In accordance with Section 1500, information deemed by a bulk power system owner, operator, or user, regional entity, or NERC as critical energy infrastructure information (*NERC Security Guidelines for the Electricity Sector — Protecting Potentially Sensitive Information* may be used as a guide) or other confidential information shall be redacted in accordance with Section 1500 and not be released publicly.

11.3 Subject to redaction of critical energy infrastructure information or other confidential information, for each confirmed violation or settlement relating to a possible violation or an alleged violation, the public posting shall include the name of any relevant entity, the nature, time period, and circumstances of such possible, alleged or confirmed violation, any mitigation plan to be implemented by the entity in connection with the violation or settlement, and sufficient facts to assist owners, operators and

users of the bulk power system to evaluate whether they have engaged in or are engaging in similar activities.

12. **Violation Information Review** — NERC compliance monitoring and enforcement program staff shall periodically review and analyze all reports of possible, alleged and confirmed violations to identify trends and other pertinent reliability issues.

402. NERC Oversight of the Regional Entity Compliance Enforcement Programs

1. **NERC Monitoring Program** — NERC shall have a program to monitor the compliance enforcement program of each regional entity that has been delegated authority. The objective of this monitoring program shall be to ensure that the regional entity carries out its compliance enforcement program in accordance with these rules and the terms of the delegation agreement, and to ensure consistency and fairness of the regional entity's compliance enforcement program. Oversight and monitoring by NERC shall be accomplished through an annual compliance enforcement program review, program audits, and regular evaluations of regional entity compliance enforcement program performance as described below.
 - 1.1 **NERC Review of Regional Compliance Enforcement Program Annual Plans** — NERC shall require each regional entity to submit for review and approval an annual compliance enforcement program implementation plan. NERC shall review each regional entity's compliance enforcement program annual implementation plan and shall accept the plan if it meets NERC requirements and the requirements of the delegation agreement.
 - 1.2 **Regional Entity Program Evaluation** — NERC shall annually evaluate the goals, tools, and procedures of each regional entity compliance enforcement program to determine the effectiveness of each regional entity program, using criteria developed by the NERC Compliance and Certification Committee.
 - 1.3 **Regional Entity Program Audit** — At least once every five years, NERC shall conduct an audit to evaluate how each regional entity compliance enforcement program implements the NERC Compliance Monitoring and Enforcement Program. The evaluation shall be based on these rules of procedures, including Appendix 4C, the delegation agreement, directives in effect pursuant to the delegation agreement, approved regional entity annual compliance enforcement program annual implementation plans, required program attributes, and the NERC compliance program procedures. These evaluations shall be provided to the appropriate ERO governmental authorities to demonstrate the effectiveness of each regional entity. In addition, audits of cross-border regional entities shall cover applicable requirements imposed on the regional entity by statute, regulation, or order of, or agreement with, provincial governmental and/or regulatory authorities for which NERC has auditing responsibilities over the regional entity's compliance with such requirements within Canada or Mexico. Participation of a representative of an applicable ERO

governmental authority shall be subject to the limitations of sections 3.1.6 and 8.0 of Appendix 4C of these rules of procedure regarding disclosures of non-public compliance information related to other jurisdictions. NERC shall maintain an audit procedure containing the requirements, steps, and timelines to conduct an audit of each regional entity compliance enforcement program. The current procedure is contained in the NERC Audit of Regional Entity Compliance Programs, which is incorporated into these rules as **Appendix 4A**.

- 1.4 ERO governmental authorities will be allowed to participate as an observer in any audit conducted by NERC of a regional entity's compliance monitoring and enforcement program. A representative of the regional entity being audited will be allowed to participate in the audit as an observer.
2. **Consistency Among Regional Compliance Enforcement Programs** — To provide for a consistent compliance enforcement program for all bulk power system owners, operators, and users required to comply with approved reliability standards, NERC shall maintain a single, uniform Compliance Monitoring and Enforcement Program, which is incorporated into these rules of procedure as **Appendix 4C**. Any differences in regional entity program methods, including determination of violations and penalty assessment, shall be justified on a case-by-case basis and fully documented in each regional entity delegation agreement.
 - 2.1 NERC shall ensure that each of the regional entity compliance enforcement programs meets these Rules of Procedure, including **Appendix 4C**, and follows the terms of the delegation agreement and the approved regional entity compliance enforcement program annual plan.
 - 2.2 NERC shall maintain a single, uniform compliance monitoring and enforcement program in **Appendix 4C** containing the procedures to ensure the consistency and fairness of the processes used to determine regional entity compliance enforcement program findings of compliance and noncompliance, and the application of penalties and sanctions.
 - 2.3 NERC shall periodically conduct regional entity compliance manager forums. These forums shall use the results of regional entity compliance program audits and findings of NERC compliance staff to identify and refine regional entity compliance program differences into a set of best practices over time.
3. **Information Collection and Reporting** — NERC and the regional entities shall implement data management procedures that address data reporting requirements, data integrity, data retention, data security, and data confidentiality.
4. **Violation Disclosure** — NERC shall disclose all confirmed violations and maintain as confidential possible violations and alleged violations, according to the reporting and disclosure process in **Appendix 4C**.

5. **Authority to Determine Noncompliance, Levy Penalties and Sanctions, and Issue Remedial Action Directives** — NERC and regional entity compliance staff shall have the authority and responsibility to make initial determinations of compliance or noncompliance, and where authorized by the appropriate governmental authorities or where otherwise authorized, to determine penalties and sanctions for noncompliance with a reliability standard, and issue remedial action directives. Regional entity boards or a compliance panel reporting directly to the regional entity board will be vested with the authority for the overall regional entity compliance program and have the authority to impose penalties and sanctions on behalf of NERC, where authorized by applicable legislation or agreement. Remedial action directives may be issued by NERC or a regional entity that is aware of a bulk power system owner, operator, or user that is about to engage in an act or practice that would result in noncompliance with a reliability standard, where such directive is immediately necessary to protect the reliability of the bulk power system from an imminent threat. If, after receiving such a directive, the bulk power system owner, operator, or user does not take appropriate action to avert a violation of a reliability standard, NERC may petition the applicable ERO governmental authority to issue a compliance order.

6. **Due Process** — NERC shall establish and maintain a fair, independent, and nondiscriminatory appeals process. The appeals process is set forth in Sections 408-410. The process shall allow bulk power system owners, operators, and users to appeal the regional entity’s findings of noncompliance and to appeal penalties, sanctions, and remedial actions that are levied by the regional entity. Appeals beyond the NERC process will be heard by the applicable ERO governmental authority.

The appeals process will also allow for appeals to NERC of any findings of noncompliance issued by NERC to a regional entity for standards and requirements where the regional entity is monitored for compliance to a reliability standard. No monetary penalties will be levied in these matters; however sanctions, remedial actions, and directives to comply may be applied by NERC.

7. **Conflict Disclosure** — NERC shall disclose to the appropriate governmental authorities any potential conflicts between a market rule and the enforcement of a regional reliability standard.

8. **Confidentiality** — To maintain the integrity of the NERC Compliance Monitoring and Enforcement Program, NERC and regional entity staff, audit team members, and committee members shall maintain the confidentiality of information obtained and shared during compliance monitoring and enforcement processes including investigations, audits, spot checks, drafting of reports, appeals, and closed meetings.
 - 8.1 NERC and the regional entity shall have in place appropriate codes of conduct and confidentiality agreements for staff and other compliance enforcement program participants.

- 8.2 Individuals not bound by NERC or regional entity codes of conduct who serve on compliance-related committees or audit teams shall sign a NERC confidentiality agreement prior to participating on the committee or team.
 - 8.3 Information deemed by a bulk power system owner, operator, or user, regional entity, or NERC as critical energy infrastructure information shall not be distributed outside of a committee or team, nor released publicly. Other information subject to confidentiality is identified in Section 1500.
 - 8.4 In the event that a staff, committee, or audit team member violates any of the confidentiality rules set forth above, the staff, committee, or audit team member and any member organization with which the individual is associated may be subject to appropriate action by the regional entity or NERC, including prohibiting participation in future compliance enforcement activities.
9. **Auditor Training** — NERC shall develop and provide training in auditing skills to all people who participate in NERC and regional entity compliance enforcement audits. Training for NERC and regional entity personnel and others who serve as compliance audit team leaders shall be more comprehensive than training given to industry subject matter experts and regional entity members. Training for regional entity members may be delegated to the regional entity.

403. Required Attributes of Regional Entity Compliance Enforcement Programs

Each regional entity compliance enforcement program shall promote excellence in the enforcement of reliability standards. To accomplish this goal, each regional entity compliance enforcement program shall (i) conform to and comply with the NERC uniform Compliance Monitoring and Enforcement Program, **Appendix 4C** to these rules of procedure, except to the extent of any deviations that are stated in the regional entity's delegation agreement, and (ii) meet all of the attributes set forth in this Section 403.

Program Structure

1. **Independence** — Each regional entity's governance of its compliance enforcement program shall exhibit independence, meaning the compliance enforcement program shall be organized so that its compliance monitoring and enforcement activities are carried out separately from other activities of the regional entity. The program shall not be unduly influenced by the bulk power system owners, operators, and users being monitored or other regional entity activities that are required to meet the reliability standards. Regional entities must include rules providing that no two industry sectors may control any decision and no single segment may veto any matter related to compliance.
2. **Exercising Authority** — Each regional entity compliance enforcement program shall exercise the responsibility and authority in carrying out the delegated functions of the NERC Compliance Monitoring and Enforcement Program in accordance with delegation agreements and **Appendix 4C**. These functions include but are not limited to: data gathering, data reporting, compliance

investigations, compliance auditing activities, evaluating compliance and noncompliance, imposing penalties and sanctions, and approving and tracking mitigation actions.

3. **Delegation of Authority** — To maintain independence, fairness, and consistency in the NERC Compliance Monitoring and Enforcement Program, a regional entity shall not sub-delegate its compliance enforcement program duties to entities or persons other than the regional entity compliance enforcement program staff, unless (i) required by statute or regulation in the applicable jurisdiction, or (ii) by agreement with express approval of NERC and of FERC or other appropriate ERO governmental authority, to another regional entity.
4. **Hearings of Contested Findings or Sanctions** — The regional entity board or compliance panel reporting directly to the regional entity board (with appropriate recusal procedures) will be vested with the authority for conducting compliance hearings in which any bulk power system owner, operator, or user provided notice of an alleged violation may present facts and other information to contest a notice of alleged violation or any proposed penalty, sanction, any remedial action directive, or any mitigation plan component. Compliance hearings shall be conducted in accordance with the Hearing Process set forth in Attachment 2 to **Appendix 4C**. If a stakeholder body serves as the hearing body, no two industry sectors may control any decision and no single segment may veto any matter related to compliance after recusals.

Program Resources

5. **Regional Entity Compliance Staff** — Each regional entity shall have sufficient resources to meet delegated compliance monitoring and enforcement responsibilities, including the necessary professional staff to manage and implement the regional entity compliance monitoring and enforcement program.
6. **Regional Entity Compliance Staff Independence** — The regional entity compliance monitoring and enforcement program staff shall be capable of and required to make all determinations of compliance and noncompliance and determine penalties, sanctions, and remedial actions.
 - 6.1 Regional entity compliance enforcement program staff shall not have a conflict of interest, real or perceived, in the outcome of compliance monitoring and enforcement processes, reports, or sanctions. The regional entity shall have in effect a conflict of interest policy.
 - 6.2 Regional entity compliance monitoring and enforcement program staff shall have the authority and responsibility to carry out compliance monitoring and enforcement processes (with the input of industry subject matter experts), make determinations of compliance or noncompliance, and levy penalties and sanctions without interference or undue influence from regional entity members and their representative or other industry entities.
 - 6.3 Regional entity compliance monitoring and enforcement program staff may call upon independent technical subject matter experts who have no

conflict of interest in the outcome of the compliance monitoring and enforcement process to provide technical advice or recommendations in the determination of compliance or noncompliance.

- 6.4 Regional entity compliance monitoring and enforcement program staff shall abide by the confidentiality requirements contained in Section 1500 and **Appendix 4C** of these Rules of Procedure, the NERC delegation agreement and other confidentiality agreements required by the NERC Compliance Monitoring and Enforcement Program.
- 6.5 Contracting with independent consultants or others working for the regional entity compliance enforcement program shall be permitted provided the individual has not received compensation from a bulk power system owner, operator, or user being monitored for a period of at least the preceding six months and owns no financial interest in any bulk power system owner, operator, or user being monitored for compliance to the reliability standard, regardless of where the bulk power system owner, operator, or user operates. Any such individuals for the purpose of these rules shall be considered as augmenting regional entity compliance staff.

7. Use of Industry Subject Matter Experts and Regional Entity Members — Industry experts and regional entity members may be called upon to provide their technical expertise in compliance monitoring and enforcement program activities.

- 7.1 The regional entity shall have procedures defining the allowable involvement of industry subject matter experts and regional entity members. The procedures shall address applicable antitrust laws and conflicts of interest.
- 7.2 Industry subject matter experts and regional entity members shall have no conflict of interest or financial interests in the outcome of their activities.
- 7.3 Regional entity members and industry subject matter experts, as part of teams or regional entity committees, may provide input to the regional entity compliance staff so long as the authority and responsibility for (i) evaluating and determining compliance or noncompliance and (ii) levying penalties, sanctions, or remedial actions shall not be delegated to any person or entity other than the compliance staff of the regional entity. Industry subject matter experts, regional entity members, or regional entity committees shall not make determinations of noncompliance or levy penalties, sanctions, or remedial actions. Any committee involved shall be organized so that no two industry sectors may control any decision and no single segment may veto any matter related to compliance.
- 7.4 Industry subject matter experts and regional entity members shall sign a confidentiality agreement appropriate for the activity being performed.
- 7.5 All industry subject matter experts and regional entity members participating in compliance audits and compliance investigations shall

successfully complete auditor training provided by NERC or the regional entity prior to performing these activities

Program Design

8. **Regional Entity Compliance Enforcement Program Content** — All approved reliability standards shall be included in the regional entity compliance monitoring and enforcement program for all bulk power system owners, operators, and users within the defined boundaries of the regional entity. Compliance to approved regional entity reliability standards is applicable only within the footprint of the regional entity that submitted those particular regional entity reliability standards for approval. NERC will identify the minimum set of reliability standards and requirements to be actively monitored by the regional entity in a given year.
9. **Antitrust Provisions** — Each regional entity’s compliance monitoring and enforcement program shall be structured and administered to abide by U.S. antitrust law and Canadian competition law.
10. **Information Submittal** — All bulk power system owners, operators, and users within the regional entity responsible for complying with reliability standards shall submit timely and accurate information when requested by the regional entity or NERC. NERC and the regional entities shall preserve any mark of confidentiality on information submitted pursuant to Section 1502.1.
 - 10.1 Each regional entity has the authority to collect the necessary information to determine compliance and shall develop processes for gathering data from the bulk power system owners, operators, and users the regional entity monitors.
 - 10.2 The regional entity or NERC has the authority to request information from bulk power system owners, operators, and users pursuant to section 401.3 or this section 403.10 without invoking a specific compliance monitoring and enforcement process in **Appendix 4C**, for purposes of determining whether to pursue one such process in a particular case and/or validating in the enforcement phase of a matter the conclusions reached through the compliance monitoring and enforcement process(es).
 - 10.3 When required or requested, the regional entities shall report information to NERC promptly and in accordance with **Appendix 4C** and other NERC procedures.
 - 10.4 Regional entities shall notify NERC of all possible, alleged and confirmed violations of NERC reliability standards by entities over which the regional entity has compliance monitoring and enforcement authority , in accordance with **Appendix 4C**.
 - 10.5 A bulk power system owner, operator, or user found in noncompliance with a reliability standard shall submit a mitigation plan with a timeline

addressing how the noncompliance will be corrected. The regional entity compliance staff shall review and approve the mitigation plan in accordance with **Appendix 4C**.

- 10.6 An officer of a bulk power system owner, operator, or user shall certify as accurate all compliance data self-reported to the regional entity compliance monitoring and enforcement program.
- 10.7 Regional entities shall develop and implement procedures to verify the compliance information submitted by bulk power system owners, operators, and users.

11. Compliance Audits of Bulk Power System Owners, Operators, and Users — Each regional entity will maintain and implement a program of proactive compliance audits of bulk power system owners, operators, and users responsible for complying with reliability standards, in accordance with **Appendix 4C**. A compliance audit is a process in which a detailed review of the activities of a bulk power system owner, operator, or user is performed to determine if that bulk power system owner, operator, or user is complying with approved reliability standards.

- 11.1 For an entity registered as a balancing authority, reliability coordinator, or transmission operator, the compliance audit will be performed at least once every three years. For other bulk power system owners, operators, and users on the NERC Compliance Registry, compliance audits shall be performed on a schedule established by NERC.
- 11.2 Audits of balancing authorities, reliability coordinators, and transmission operators will include a component at the audited entity's site. For other bulk power system owners, operators, and users on the NERC Compliance Registry, the audit may be either an on-site audit or based on review of documents, as determined to be necessary and appropriate by NERC or regional entity compliance monitoring and enforcement program, staff.
- 11.3 Compliance audits must include a detailed review of the activities of the bulk power system owner, operator, or user to determine if the bulk power system owner, operator, or user is complying with all approved reliability standards identified for audit by NERC. The compliance audit shall include a review of supporting documentation and evidence used by the bulk power system owner, operator or user to demonstrate compliance for an appropriate period prior to the compliance audit.

12. **Confidentiality of Compliance Monitoring and Enforcement Processes** — All compliance monitoring and enforcement processes, and information obtained from such processes, are to be non-public and treated as confidential in accordance with Section 1500 and **Appendix 4C** of these rules of procedure, unless NERC, the regional entity or FERC or another applicable governmental authority with jurisdiction determines a need to conduct a compliance monitoring and enforcement program process on a public basis, provided, that NERC and the regional entities shall publish (i) schedules of compliance audits scheduled in each year, (ii) a public report of each compliance audit, and (iii) notices of penalty and settlement agreements. Advance authorization from the applicable ERO governmental authority is required to make public any compliance monitoring and enforcement process or any information relating to a compliance monitoring and enforcement process, or to permit interventions when determining whether to impose a penalty. This prohibition on making public any compliance monitoring and enforcement process does not prohibit NERC or a regional entity from publicly disclosing (i) the initiation of or results from an analysis of a significant system event under Section 807 or of off-normal events or system performance under Section 808, or (ii) information of general applicability and usefulness to owners, operators, and users of the bulk power system concerning reliability and compliance matters, so long as specific allegations or conclusions regarding possible or alleged violations of reliability standards are not included in such disclosures.
13. **Critical Energy Infrastructure Information** — Information that would jeopardize bulk power system reliability, including information relating to a Cyber Security Incident will be identified and protected from public disclosure as critical energy infrastructure information. In accordance with Section 1500, information deemed by a bulk power system owner, operator, or user, regional entity, or NERC as critical energy infrastructure information shall be redacted according to NERC procedures and shall not be released publicly.
14. **Penalties, Sanctions, and Remedial Actions** — Each regional entity will apply all penalties, sanctions, and remedial action directives in accordance with the approved *Sanction Guidelines*, **Appendix 4B** to these rules of procedure. Any changes to the *Sanction Guidelines* to be used by any regional entity must be approved by NERC and submitted to the appropriate ERO governmental body for approval. All confirmed violations, penalties, and sanctions will be provided to NERC for review and filing with applicable ERO governmental authorities as a notice of penalty, in accordance with **Appendix 4C**.
15. **Regional Hearing Process** — Each regional entity compliance enforcement program shall establish and maintain a fair, independent, and nondiscriminatory process for hearing contested violations and any penalties or sanctions levied, in conformance with Attachment 2 to **Appendix 4C** to these rules of procedure and any deviations therefrom that are set forth in the regional entity's delegation agreement.. The hearing process shall allow bulk power system owners, operators, and users to contest findings of compliance violations, any penalties

and sanctions that are proposed to be levied, proposed remedial action directives, and components of proposed mitigation plans. The regional entity hearing process shall be conducted before the regional entity board or a balanced committee established by and reporting to the regional entity board as the final adjudicator, provided, that Canadian provincial regulators may act as the final adjudicator in their respective jurisdictions. The regional entity hearing process shall (i) include provisions for recusal of any members of the hearing body with a potential conflict of interest, real or perceived, from all compliance matters considered by the hearing body for which the potential conflict of interest exists and (ii) provide that no two industry sectors may control any decision and no single segment may veto any matter brought before the hearing body after recusals.

Each regional entity will notify NERC of all hearings and NERC may observe any of the proceedings. Each regional entity will notify NERC of the outcome of all hearings.

If a bulk power system owner, operator, or user has completed the regional entity hearing process and desires to appeal the outcome of the hearing, the bulk power system owner, operator, or user shall appeal to NERC in accordance with Section 409 of these rules of procedure, except that a determination of violation or penalty that has been directly adjudicated by an ERO governmental authority shall be appealed with that ERO governmental authority.

16. **Annual Regional Entity Compliance Enforcement Program Implementation Plan** — Each regional entity shall annually develop and submit to NERC for approval a regional entity compliance enforcement implementation plan in accordance with **Appendix 4C** that identifies the reliability standards and requirements to be actively monitored (both those required by NERC and any additional reliability standards the regional entity proposes to monitor), and how each NERC and regional entity identified standard will be monitored, evaluated, reported, sanctioned, and appealed. These implementation plans will be submitted to NERC on the schedule established by NERC, generally on or about November 1 of the preceding year. In conjunction with the annual implementation plan, each regional entity must report to NERC regarding how it carried out its delegated compliance monitoring and enforcement authority in the previous year, the effectiveness of the program, and changes expected to correct any deficiencies identified. Each regional entity will provide its annual report on the schedule established by NERC, generally on or about February 15 of the following year.

404. NERC Monitoring of Compliance for Regional Entities or Bulk Power Owners, Operator, or Users

NERC shall monitor regional entity compliance with NERC reliability standards and, if no there is no delegation agreement in effect with a regional entity for the geographic area, shall monitor bulk power system owners, operators, and users for compliance with NERC reliability standards. Industry subject matter experts may be used as appropriate

in compliance investigations, compliance audits, and other compliance activities, subject to confidentiality, antitrust, and conflict of interest provisions.

1. **NERC Obligations** — NERC compliance monitoring and enforcement staff shall monitor the compliance of the regional entity with the reliability standards for which the regional entities are responsible, in accordance with **Appendix 4C**. NERC shall actively monitor in its annual Compliance Enforcement and Monitoring Program selected reliability standards that apply to the regional entities. NERC shall evaluate compliance and noncompliance with all of the reliability standards that apply to the regional entities and shall impose sanctions, penalties, or remedial action directives when there is a finding of noncompliance. NERC shall post all violations of reliability standards that apply to the regional entities as described in the reporting and disclosure process in **Appendix 4C**.

In addition, NERC will directly monitor bulk power system owners, operators, and users for compliance with NERC Reliability Standards in any geographic area for which there is not a delegation agreement in effect with a regional entity, in accordance with **Appendix 4C**. In such cases, NERC will serve as the Compliance Enforcement Authority described in **Appendix 4C**. Compliance matters contested by bulk power system owners, operators, and users in such an event will be heard by the NERC Compliance and Certification Committee.

2. **Compliance Audit of the Regional Entity** — NERC shall perform a compliance audit of each regional entity responsible for complying with reliability standards at least once every three years. NERC shall make an evaluation of compliance based on the information obtained through the audit. After due process is complete, the final audit report shall be made public in accordance with the reporting and disclosure process in **Appendix 4C**.
3. **Appeals Process** — Any regional entity or bulk-power system owner, operator or user found by NERC, as opposed to a regional entity, to be in noncompliance with a reliability standard may appeal the findings of noncompliance with reliability standards and any sanctions or remedial action directives that are issued by, or mitigation plan components imposed by, NERC, pursuant to the processes described in Sections 408 through 410.

405. Monitoring of Standards and Other Requirements Applicable to NERC

The NERC Compliance and Certification Committee shall establish and implement a process to monitor NERC's compliance with the reliability standards that apply to NERC. The process shall use independent monitors with no conflict of interest, real or perceived, in the outcomes of the process. All violations shall be made public according to the reporting and disclosure process in **Appendix 4C**. The Compliance and Certification Committee will also establish a procedure for monitoring NERC's compliance with its Rules of Procedure for the Standards Development, Compliance Enforcement, and Organization Registration and Certification Programs. Such procedures shall not be used to circumvent the appeals processes established for those programs.

406. Independent Audits of the NERC Compliance Monitoring and Enforcement Program

NERC shall provide for an independent audit of its compliance monitoring and enforcement program at least once every three years, or more frequently as determined by the board. The audit shall be conducted by independent expert auditors as selected by the board. The independent audit shall meet the following minimum requirements and any other requirements established by the NERC board.

1. **Effectiveness** — The audit shall evaluate the success and effectiveness of the NERC Compliance Monitoring and Enforcement Program in achieving its mission.
2. **Relationship** — The audit shall evaluate the relationship between NERC and the regional entity compliance enforcement programs and the effectiveness of the programs in ensuring reliability.
3. **Final Report Posting** — The final report shall be posted by NERC for public viewing in accordance with **Appendix 4C**.
4. **Response to Recommendations** — If the audit report includes recommendations to improve the NERC Compliance Monitoring and Enforcement Program, the administrators of the NERC Compliance Monitoring and Enforcement Program shall provide a written response and plan to the board within 30 days of the release of the final audit report.

407. Penalties, Sanctions, and Remedial Actions

1. **NERC Review of Regional Penalties and Sanctions** — NERC shall review all penalties, sanctions, and remedial actions imposed by each regional entity for violations of reliability standards to determine if the regional entity's determination is supported by a sufficient record compiled by the regional entity, is consistent with the *Sanction Guidelines* incorporated into these rules as **Appendix 4B** and with other directives, guidance and directions issued by NERC pursuant to the delegation agreement, and is consistent with penalties, sanctions and remedial actions imposed by the regional entity and by other regional entities for violations involving the same or similar facts and circumstances.
2. **Developing Penalties and Sanctions** — The regional entity compliance monitoring and enforcement program staff shall use the *Sanction Guidelines*, which are incorporated into these rules as **Appendix 4B**, to develop an appropriate penalty, sanction, or remedial action for a violation, and shall notify NERC of the penalty or sanction.
3. **Effective Date of Penalty** — Where authorized by applicable legislation or agreement, no penalty imposed for a violation of a reliability standard shall take effect until the thirty-first day after NERC files, with the applicable ERO governmental authority, a “notice of penalty” and the record of the proceedings in which the violation and penalty were determined, or such other date as ordered by the ERO applicable governmental authority.

408. Review of NERC Decisions

1. **Scope of Review** — A registered entity or a regional entity wishing to challenge a finding of noncompliance and the imposition of a penalty for a compliance measure directly administered by NERC, or a regional entity wishing to challenge a regional compliance program audit finding, may do so by filing a notice of the challenge with NERC's director of compliance no later than 21 days after issuance of the notice of finding of violation or audit finding. Appeals by registered entities of decisions of regional entity hearing bodies shall be pursuant to section 409 .
2. **Contents of Notice** — The notice of challenge shall include the full text of the decision that is being challenged, a concise statement of the error or errors contained in the decision, a clear statement of the relief being sought, and argument in sufficient detail to justify such relief.
3. **Response by NERC Compliance Monitoring and Enforcement Program** — Within 21 days after receiving a copy of the notice of challenge, the NERC Director of Compliance may file with the hearing body a response to the issues raised in the notice, with a copy to the regional entity.
4. **Hearing by Compliance and Certification Committee** — The NERC Compliance and Certification Committee shall provide representatives of the regional entity or registered entity, and the NERC Compliance Monitoring and Enforcement Program an opportunity to be heard and shall decide the matter based upon the filings and presentations made, with a written explanation of its decision.
5. **Appeal** — The regional entity, or registered entity may appeal the decision of the Compliance and Certification Committee by filing a notice of appeal with NERC's director of compliance no later than 21 days after issuance of the written decision by the Compliance and Certification Committee. The notice of appeal shall include the full text of the written decision of the Compliance and Certification Committee that is being appealed, a concise statement of the error or errors contained in the decision, a clear statement of the relief being sought, and argument in sufficient detail to justify such relief. No factual material shall be presented in the appeal that was not presented to the Compliance and Certification Committee.
6. **Response by NERC Compliance Monitoring and Enforcement Program** — Within 21 days after receiving a copy of the notice of appeal, the NERC Compliance Monitoring and Enforcement Program staff may file its response to the issues raised in the notice of appeal, with a copy to the entity filing the notice.
7. **Reply** — The entity filing the appeal may file a reply within 7 days.
8. **Decision** — The Compliance Committee of the NERC Board of Trustees shall decide the appeal, in writing, based upon the notice of appeal, the record, the

response, and any reply. At its discretion, the Compliance Committee may invite representatives of the regional entity or registered entity, and the NERC Compliance Monitoring and Enforcement Program to appear before the Committee. Decisions of the Compliance Committee shall be final, except for further appeal to the applicable ERO governmental authority.

9. **Impartiality** — No member of the Compliance and Certification Committee or the Board of Trustees Compliance Committee having an actual or perceived conflict of interest in the matter may participate in any aspect of the challenge or appeal except as a party or witness.
10. **Expenses** — Each party in the challenge and appeals processes shall pay its own expenses for each step in the process.
11. **Non-Public Proceedings** — All challenges and appeals shall be closed to the public to protect confidential information.

409. Appeals from Final Decisions of Regional Entities

1. **Time for Appeal** — An owner, operator or user of the bulk-power system wishing to appeal from a final decision of a regional entity that finds a violation of a reliability standard or imposes a penalty for violation of a reliability standard shall file its notice of appeal with NERC's director of compliance, with a copy to the regional entity, no later than 21 days after issuance of the final decision of the regional entity hearing body. The same appeal procedures will apply regardless of whether the matter first arose in a compliance investigation, compliance audit or self-report, other compliance monitoring and enforcement process, or in a reliability readiness evaluation.
2. **Contents** — The notice of appeal shall include the full text of the final decision of the regional entity hearing body that is being appealed, a concise statement of the error or errors contained in the final decision, a clear statement of the relief being sought, and argument in sufficient detail to justify such relief. No factual material shall be presented in the appeal that was not first presented during the compliance hearing before the regional entity hearing body.
3. **Response by Regional Entity** — Within 21 days after receiving a copy of the notice of appeal, the regional entity shall file the entire record of the matter with NERC's director of compliance, with a copy to the entity filing the notice, together with its response to the issues raised in the notice of appeal.
4. **Reply** — The entity filing the appeal may file a reply to the regional entity within 7 days.
5. **Decision** — The Compliance Committee of the NERC Board of Trustees shall decide the appeal, in writing, based upon the notice of appeal, the record of the matter from the regional entity, the response, and any reply filed with NERC. At its discretion, the Compliance Committee may invite representatives of the entity

making the appeal and the regional entity to appear before the Committee. Decisions of the Compliance Committee shall be final, except for further appeal to the applicable ERO governmental authority.

6. **Expenses** — Each party in the appeals process shall pay its own expenses for each step in the process.
7. **Non-Public Proceedings** — All appeals shall be closed to the public to protect confidential information.

410. Hold Harmless

A condition of invoking the challenge or appeals processes under Section 408 or 409 is that the entity requesting the challenge or appeal agrees that neither NERC (defined to include its members, Board of Trustees, committees, subcommittees, staff and industry subject matter experts), any person assisting in the challenge or appeals processes, nor any company employing a person assisting in the challenge or appeals processes, shall be liable, and they shall be held harmless against the consequences of or any action or inaction or of any agreement reached in resolution of the dispute or any failure to reach agreement as a result of the challenge or appeals proceeding. This “hold harmless” clause does not extend to matters constituting gross negligence, intentional misconduct, or a breach of confidentiality.

411. Requests for Technical Feasibility Exceptions to NERC Critical Infrastructure Protection Reliability Standards

A registered entity that is subject to a requirement of a NERC critical infrastructure protection reliability standard for which technical feasibility exceptions are permitted, may request a technical feasibility exception to the requirement, and the request will be reviewed, approved or disapproved, and if approved, implemented, in accordance with the NERC *Procedure for Requesting and Receiving Technical Feasibility Exceptions to NERC Critical Infrastructure Protection Standard*, Appendix 4D to these Rules of Procedure.

SECTION 500 — ORGANIZATION REGISTRATION AND CERTIFICATION

501. Scope of the Organization Registration and Certification Program

Enforcing compliance with the NERC reliability standards requires that the identity of those responsible for complying with the standards be known and that those with primary reliability responsibilities be reviewed and certified as meeting established minimum requirements for performing those tasks. NERC shall develop and maintain a compliance registry and certification program for the purpose of promoting compliance with reliability standards and enhancing the reliability of the bulk power system.

The purpose of the compliance registry will be to clearly identify those entities that are responsible for compliance with reliability standards. Organizations listed on the registry will be responsible for knowing the content of and for complying with the NERC reliability standards. Organizations listed in the registry are not, nor do they become, members of NERC or a regional entity by virtue of being listed in the compliance registry. Membership in NERC is governed by Article II of NERC's bylaws; membership in a regional entity is governed by that entity's bylaws or rules.

Organization registration and certification may be delegated to regional entities in accordance with the procedures in this Section 500, the NERC *Organization Registration and Certification Manual*, which is incorporated into these rules as **Appendix 5A**, and approved regional entity delegation agreements or other applicable agreements.

1. **Compliance Registry** — NERC shall establish and maintain a compliance registry of the bulk power system owners, operators, and users that are subject to approved reliability standards.
 - 1.1 The registry shall set forth the identity and functions performed for each organization responsible for meeting requirements of the reliability standards. Bulk power system owners, operators, and users (i) shall provide to NERC and the applicable regional entity such information as is necessary to complete the registration, and (ii) shall provide NERC and the applicable regional entity with timely updates to information concerning the registered entity's ownership, operations, contact information, and other information that may affect the registered entity's registration status or other information recorded in the compliance registry.
 - 1.2 NERC and regional entities assisting NERC in the development of the compliance registry shall determine which organizations should be placed in the registry based on the criteria provided in the NERC *Statement of Compliance Registry Criteria*, which is incorporated into these rules as **Appendix 5B**.

In addition, (a) A generation or transmission cooperative, a joint-action agency or another organization (a Joint Registration Organization or JRO) may be registered, in lieu of each of the JRO's members or related entities being registering individually, by the JRO accepting the reliability functions identified in Section 1.1 above, or (b) a JRO and its members or related entities may enter into a written agreement as to which of them will be responsible for one or more reliability standards applicable to a particular function and/or for one or more requirements within particular reliability standards applicable to a particular function and/or for one or more requirements within particular reliability standards, in either case in accordance with the provisions specified in Section 507 (each of (a) and (b), a "joint registration").

For purpose of this Section 501.1.2 and Section 507, a "related entity" is an entity whose operations in relation to the operation of the JRO make it feasible for the JRO to accept responsibility for reliability functions for which the related entity would otherwise be responsible. A non-exclusive list of examples of JROs and related entities includes (i) a balancing authority or a transmission provider as the JRO, and (ii) a load-serving entity or a distribution provider within the balancing authority's control area or receiving transmission services from the transmission provider, as the related entity.

- 1.3 NERC and the regional entities shall use the following procedure for establishing and maintaining the compliance registry:
 - 1.3.1 NERC shall notify each organization of its intent to place the organization on the compliance registry.
 - 1.3.2 Any organization receiving such a notice may challenge the decision to include it on the compliance registry by filing its written objection with NERC's director of compliance within 21 days stating the reasons it believes it should not be considered a bulk power system owner, operator, or user.
 - 1.3.3 The Compliance Committee of the Board of Trustees will promptly issue a written decision on the challenge, including the reasons for the decision.
 - 1.3.4 The decision of the Compliance Committee shall be final unless, within 21 days, the organization appeals the decision to the applicable governmental authority.
 - 1.3.5 At any time a person may recommend in writing, with supporting reasons, to the director of compliance that an organization be added to or removed from the compliance registry.

- 1.3.6 The compliance registry shall be dynamic and be revised as necessary to take account of changing circumstances. NERC will take such recommendations, and other applicable information, under advisement as it determines whether an entity should be on the compliance registry.
 - 1.3.7 Each entity identified in the registry shall notify NERC and its corresponding regional entity of any changes in ownership, corporate structure, or similar matters that affect the entity's responsibilities with respect to the reliability standards. Failure to notify will not relieve the entity from any responsibility to comply with the reliability standards or shield it from any penalties or sanctions associated with failing to comply with such standards.
- 1.4 For all geographical or electrical areas of the bulk power system, the registration process shall ensure that (1) no areas are lacking any entities to perform the duties and tasks identified in and required by the reliability standards to the fullest extent practical, and (2) there is no duplication of such coverage or of required oversight of such coverage.
- In particular the process shall:
- 1.4.1 Ensure that all areas are under the oversight of one and only one reliability coordinator.
 - 1.4.2 Ensure that all balancing authorities and transmission operator entities² are under the responsibility of one and only one reliability coordinator.
 - 1.4.3 Ensure that all transmission elements of the bulk power system are the responsibility and under the control of one and only one transmission planner, planning authority, and transmission operator.
 - 1.4.4 Ensure that all loads and generators are under the responsibility and control of one and only one balancing authority.
- 1.5 NERC shall maintain publicly available process documentation.
- 1.6 NERC shall maintain the compliance registry of organizations responsible for meeting the requirements of the reliability standards currently in effect on its Web site and shall update the compliance registry monthly.

² Some organizations perform the listed functions (e.g., balancing authority, transmission operator) over areas that transcend the footprints of more than one reliability coordinator. Such organizations will have multiple registrations, with each such registration corresponding to that portion of the organization's overall area that is within the footprint of a particular reliability coordinator.

2. **Entity Certification** — NERC shall provide for certification of all entities with primary reliability responsibilities requiring certification as established in the NERC reliability standards. The NERC program shall:
 - 2.1 Evaluate and certify the competency of entities performing reliability functions. The entities presently expected to be certified include reliability coordinators, transmission operators, and balancing authorities. Other entities may be added, as required, by approved reliability standards.
 - 2.2 Certify each entity's ability to meet the minimum requirements established by the NERC reliability standards for each function.
 - 2.3 Maintain process documentation.
 - 2.4 Maintain records of currently certified entities.
3. **Delegation and Oversight**
 - 3.1 NERC may delegate responsibilities for registration and certification to regional entities in accordance with requirements established by NERC. Delegation will be via the delegation agreement between NERC and the regional entity or other applicable agreement. The regional entity shall administer an organization registration and certification program in accordance with such delegation to meet NERC's program goals and requirements.
 - 3.2 NERC shall develop and maintain a plan to ensure the continuity of organization registration and certification within the geographic or electrical boundaries of a regional entity in the event that no entity is certified as a regional entity for that region, or the regional entity withdraws as a regional entity, or does not operate its organization registration and certification program in accordance with delegation agreements and other requirements.
 - 3.3 NERC shall develop and maintain a program to monitor and oversee each regional entity registration and certification program that is delegated authority through a delegation agreement or other applicable agreement.
 - 3.3.1 This program shall monitor whether the regional entity carries out its organization registration and certification responsibilities in accordance with NERC requirements, and whether there is consistency, fairness of administration, and comparability of outcomes within each regional entity's certification and registration program and among all of the programs.

3.3.2 Monitoring and oversight shall be accomplished through direct participation in certification audits and periodic reviews of program documents and records.

502. ERO Organization Registration and Certification Program Requirements

1. NERC shall have final authority in all matters constituting the organization registration and certification program.
 - 1.1 The roles and authority of regional entities in the program are delegated from NERC pursuant to the rules of procedure through regional delegation agreements or other applicable agreements.
 - 1.2 Processes for the program shall be owned by NERC; materials that each regional entity may use to participate in the program may be adapted by that organization subject to prior review and approval by NERC.
 - 1.3 Regional entities participating in the program shall perform their roles and responsibilities to meet NERC's requirements, as specified in the delegation agreement, the rules of procedure or NERC approved materials, including requirements for quality, thoroughness, timeliness, accuracy, efficiency, cost-effectiveness, and participation.
 - 1.4 Regional entity's decisions to grant or deny certifications shall be subject to NERC review and action, including modification or reversal.
 - 1.5 Regional entity's decisions with respect to the use of the transitional certification processes, as now provided for within the NERC *Organization Registration and Certification Manual (Appendix 5A)*, are subject to NERC review and action, including modification or reversal, should NERC deem such review or action warranted.
 - 1.6 Notwithstanding an entity's interest and right to object to the makeup of the certification team that will conduct the review of that entity, NERC, or the regional entity as authorized by NERC, will have final authority on the membership and member roles of that team.
 - 1.7 NERC, or the regional entity as authorized by NERC, shall make all assessments and decisions with respect to all aspects of the organization registration and certification program, including the completeness and accuracy of entities' applications.
2. To ensure consistency and fairness of the program, NERC shall develop procedures to be used by all regional entities in carrying out their organization registration and certification responsibilities, in accordance with the following criteria:

- 2.1 NERC and the regional entities shall have data management processes and procedures that provide for integrity and retention of data and information collected.
- 2.2 To maintain the integrity of the NERC Organization Registration and Certification Program, NERC, regional entities, certification audit team members, and committee members shall maintain the confidentiality of information provided by entities in order to become registered or certified.
 - 2.2.1 NERC and the regional entities shall have appropriate codes of conduct and confidentiality agreements for staff and other certification audit participants. Individuals not bound by ERO or approved regional entity codes of conduct and who serve on certification-related committees or audit teams shall sign an ERO confidentiality agreement prior to participating on the committee or team.
 - 2.2.2 Staff, committee, and audit team members shall maintain the confidentiality of any certification-related discussions or documents that are designated as confidential (see Section 1500 for types of confidential information). Staff, committee, and audit team members shall treat as confidential the individual comments expressed during audits and report-drafting sessions.
 - 2.2.3 Copies of notes, draft reports, and other interim documents developed or used during a certification audit shall be destroyed after the public posting of a final, uncontested report.
 - 2.2.4 Information deemed by an entity, a regional entity, or NERC as confidential or critical energy infrastructure information shall not be distributed outside of a committee or team, or released publicly.
 - 2.2.5 In the event that a staff, committee, or audit team member violates any of the confidentiality rules set forth above, the staff, committee, or audit team member and any member organization with which the individual is associated may be subject to immediate dismissal from the audit team and may be prohibited from future participation in compliance program activities by the regional entity or NERC.
 - 2.2.6 NERC shall develop and provide training in auditing skills to all individuals who participate in certification audits. Training for ERO and regional entity personnel, as well as audit team leaders, shall be more comprehensive than training given to industry subject matter experts and regional entity members. Training for regional entity members may be delegated to the regional entity.

- 2.3 An entity that is determined to be competent to perform a function after completing all certification requirements shall be deemed certified by NERC to perform that function.
 - 2.3.1 An entity deemed certified by NERC to perform a function shall be considered and may be referred to, for example, as a certified transmission operator, certified balancing authority, or certified reliability coordinator. Only entities that have received such certifications from NERC shall be so designated.
 - 2.3.2 NERC shall award certification to an entity only after it has demonstrated full competency to all certification requirements. An entity shall be awarded certification only for each function for which it has demonstrated full competency

503. Regional Entity Implementation of Organization Registration and Certification Program Requirements

- 1. **Delegation** — Recognizing the regional entity’s knowledge of and experience with their members, NERC may delegate responsibility for organization registration and certification to the regional entity through a delegation agreement or such responsibilities may be established through another applicable agreement.
- 2. **Registration** — The following organization registration activities shall be performed by the regional entity in accordance with the NERC *Organization Registration and Certification Procedures*, which are incorporated into the Rules of Procedure as **Appendix 5A**.
 - 2.1 Regional entities shall verify that all balancing authorities and transmission operators are under the responsibility of one and only one reliability coordinator.
 - 2.2 Regional entities shall verify that all transmission elements of the bulk power system operated within their geographic boundaries are under the authority and control of one and only one transmission planner, planning authority, transmission owner, and transmission operator.
 - 2.3 Regional entities shall verify that all loads and generation sources within their geographic boundaries are under the authority and control of one and only one balancing authority.
 - 2.4 Regional entities shall verify that no geographical or electrical areas of the bulk power system within their boundaries have duplication of coverage or are lacking an entity to perform required duties and tasks as identified in the reliability standards.

3. **Certification** — The following organization certification activities shall be performed by the regional entity in accordance with an approved ERO delegation agreement or another applicable agreement:
 - 3.1 Entities seeking certification to perform one of the functions requiring certification shall contact the regional entity for the region(s) in which they operate to apply for certification. NERC shall have oversight of the regional entity's certification activities and processes.
 - 3.2 Entities seeking certification and other affected operators shall provide all information and data requested by NERC or the regional entity to conduct the certification process, in accordance with 18 C.F.R. Section 39.2 in the United States.
 - 3.3 Regional entities shall contact entities directly and provide notice of the requirement to be certified by NERC and initiate the process to certify any entities that do not voluntarily contact the regional entity or NERC.
 - 3.4 Regional entities shall notify NERC of all certification applicants, including those not voluntarily seeking certification.
 - 3.5 The regional entity shall establish certification procedures to include audit processes, schedules and deadlines, expectations of the applicants and all entities participating in the audit and certification processes, and requirements for certification auditors.
 - 3.5.1 The regional entity certification procedures will include provisions for on-site visits to the applicant's facilities to review the data collected through questionnaires, interviewing the operations and management personnel, inspecting the facilities and equipment (and requesting a demonstration of all tools identified in the certification standard), reviewing all necessary documents and data (including all agreements, processes, and procedures identified in the certification standard), reviewing certification documents and projected system operator work schedules, and reviewing any additional documentation that is needed to support the completed questionnaire or inquiries arising during the site visit.
 - 3.5.2 All industry experts and regional members participating in certification audits shall successfully complete appropriate training provided by NERC or the regional entity prior to performing an audit.
 - 3.5.3 The regional entity certification procedures will provide for preparation of a written report by the audit team detailing any deficiencies that must be resolved prior to certification along with any other recommendations for consideration by the entity, the regional entity, or NERC.

- 3.5.4 The regional entity shall evaluate the competency of entities requiring certification to meet the minimum requirements established by the standards for each such function based on the requirements established by NERC.

504. Appeals

1. NERC shall maintain an appeals process to resolve any disputes related to registration or certification activities (*Organization Registration and Certification Manual — Appendix 5A*).
2. Each regional entity with delegated responsibilities for certification shall establish and maintain a fair, independent, and nondiscriminatory appeals process. The regional entity appeals process shall culminate with the regional board or a committee established by and reporting to the board as the final adjudicator, provided that where applicable, Canadian provincial governmental authorities may act as the final adjudicator in their jurisdictions. NERC shall be notified of all appeals and may observe any proceedings.

505. Program Maintenance

NERC shall maintain its program materials, including such manuals or other documents as it deems necessary, of the governing policies and procedures of the organization registration and certification program.

506. Independent Audit of NERC Organization Certification Program

1. NERC shall provide for an independent audit of its organization certification program at least once every three years, or more frequently, as determined by the board. The audit shall be conducted by independent expert auditors as selected by the board.
2. The audit shall evaluate the success and effectiveness of the NERC organization certification program in achieving its mission.
3. The final report shall be posted by NERC for public viewing.
4. If the audit report includes recommendations to improve the program, the administrators of the program shall provide a written response and plan to the board within 30 days of the final report.

507. Provisions Relating to Joint Registrations and Joint Registration Organizations

1. **Registration by a JRO.** In addition to registering as the entity responsible for all functions that a JRO performs itself, a JRO may register on behalf of one or more of its members or related entities for one or more functions as to which such members or related entities would otherwise be required to register, and thereby accept on behalf of such members or related entities all compliance responsibility, including reporting requirements, for all requirements of reliability standards applicable to the function or functions for which the JRO has registered on behalf of its members or related entities. Any entity seeking to register as a JRO for any or all requirements identified in the reliability standards that would otherwise be

the responsibility of one or more of its members or related entities shall provide to the applicable regional entity information, in the form requested by the regional entity, sufficient to identify whether the entity or its member(s) or related entities will be responsible for compliance with each provision of the reliability standards for the applicable functional responsibilities covered by the joint registration. The JRO must identify its primary compliance contact. The JRO primary compliance contact is responsible for providing all of the information and data, including submitting reports, as needed by the regional entity for performing assessments of compliance.

2. **Joint registration pursuant to written agreement.** Where a JRO and any of its members or related entities agree, in writing, upon a division of compliance responsibility among them for one or more reliability standard(s) applicable to a particular function, and/or for one or more requirements within particular reliability standard(s), both the JRO and such member(s) or related entit(ies) shall register as an organization responsible for that function. The JRO and its member(s) or related entit(ies) must have a written agreement that clearly specifies their respective responsibilities, which shall be submitted as part of the joint registration. Neither NERC nor the regional entity shall be parties to any such agreement between a JRO and its member or related entit(ies), nor shall NERC or the regional entity have responsibility for reviewing or approving any such agreement, other than to verify that the agreement provides for an allocation or assignment of responsibilities consistent with the joint registration.
3. NERC or the regional entity may request clarification of any list submitted to it that identifies the compliance responsibilities of the JRO and its member(s) or related entit(ies), and may request such additional information as NERC or the regional entity deems appropriate.
4. The regional entity shall notify NERC of each joint registration that the regional entity accepts. The regional entity's acceptance of a joint registration shall be a representation by the regional entity to NERC that the regional entity has concluded the joint registration will result in (1) no areas lacking any entities to perform the duties and tasks identified in and required by the reliability standards, and (2) no unnecessary duplication of such coverage of areas by entities to perform the duties and task identified in and required by the reliability standards or of required oversight of such coverage.
5. NERC shall maintain, and shall post on its web site, a Joint Registration Organization registry listing all joint registrations that have been accepted by NERC or by a regional entity and the reliability standards or requirements thereof for which each JRO and each of its members or related entities is responsible under the joint registration. The postings on NERC's web site shall clearly identify the compliance responsibilities of the JRO and of each of its member(s) or related entit(ies). Such postings are intended to enable reliability coordinators and other system operators to be fully aware of responsibilities and chains of command in order to respond quickly and decisively to system operation events.

6. Annually following submission of a joint registration, the JRO shall provide the regional entity with a list, in a form specified by the regional entity, that identifies the members or related entities and the functions for which the JRO has registered on behalf of such members or related entities and for which the JRO assumes compliance responsibility. Additionally, a JRO shall provide a revised list of compliance responsibilities to the regional entity each time the JRO accepts additional compliance responsibilities for a member or related entity or for a new member or related entity and each time that any compliance reliability reverts from the JRO to a member or related entity. The regional entity shall promptly notify NERC of each such revision.
7. In the event of a violation of a reliability standard or of a requirement of a reliability standard, the JRO or its member or related entity identified in the Joint Registration Organization registry as responsible for such reliability standard or requirement shall be identified in the notices of possible violation, alleged violation and confirmed violation and shall be assessed the sanction or penalty for the violation. In accordance with the NERC *Sanctions Guidelines*, for a violation that is attributable to a member or related entity that is registered under the joint registration, the penalty or sanction imposed for the violation will bear reasonable relation to the violation as incurred by that member or related entity and not the JRO. In the event a regional entity is not able to determine, based on the joint registration and the annual or other revised list submitted by the JRO, which entity is responsible for a particular reliability standard or requirement thereof that has been violated, the regional entity shall issue the notices of possible violation, alleged violation and confirmed violation to, and shall impose any sanction or penalty on, the JRO. NERC and the regional entity shall have no responsibility for any allocation or collection of penalties or sanctions between or among the JRO and its member(s) or related entit(ies).
8. **Individual member registration.** Nothing in this Section 507 shall preclude a member of a JRO, a related entity, or any other entity, from registering on its own behalf and undertaking full compliance responsibility, including reporting requirements, for the reliability standards applicable to the function(s) for which the member or other entity is registering. A JRO member or related entity that registers as responsible for any reliability standard or requirement of a reliability standards shall inform the JRO of its registration.

SECTION 600 — PERSONNEL CERTIFICATION

601. Scope of Personnel Certification

Maintaining the reliability of the bulk electric system through implementation of the reliability standards requires skilled, trained and qualified system operators. The System Operator Certification Program provides the mechanism to ensure system operators are provided the education and training necessary to obtain the essential knowledge and skills and are therefore qualified to operate the bulk electric system. NERC, as the ERO, will ensure skilled, trained, and qualified system operators through the System Operator Certification Program.

NERC shall develop and maintain a personnel certification program to evaluate individuals and to issue credentials to individuals who demonstrate the required level of competence. A current version of such a program is the *System Operator Certification Program Manual*, which is incorporated into these rules as **Appendix 6**.

602. Structure of ERO Personnel Certification Program

1. The NERC personnel certification program shall be international in scope.
2. The personnel certification program shall have a governing body that (1) is able to independently exercise decision-making for all matters pertaining to certification, (2) includes individuals from the discipline being certified and whose composition addresses the needs of the users of the program (e.g., employers, regulators, etc.), and (3) has representation for each specialty or level within a discipline.
3. NERC shall maintain a nominating process for membership in the governing body. Nominations shall be open to all interested parties and self-nominations shall be accepted. The NERC Board of Trustees shall appoint members to the governing body from among those nominated. The members of the governing body shall serve at the pleasure of the board.
4. The personnel certification program governing body shall have control over the matters related to the personnel certification and recertification programs listed below, without being subject to approval by any other body.
 - 4.1 Policies and procedures, including eligibility requirements and application processing.
 - 4.2 Requirements for personnel certification, maintaining certification, and recertification.
 - 4.3 Examination content, development, and administration.
 - 4.4 Examination cut score.
 - 4.5 Grievance and disciplinary processes.

- 4.6 Governing body and subgroup(s)' meeting rules including agenda, frequency, and related procedures.
 - 4.7 Subgroup(s) appointments and work assignments.
 - 4.8 Publications about personnel certification and recertification.
 - 4.9 Setting fees for application, and all other services provided as a part of the personnel certification and recertification activities.
 - 4.10 Program funding, spending, and budget authority. Financial matters related to the operation of the program shall be segregated from other NERC activities.
5. The personnel certification program shall utilize written procedures for the selection of members of the governing body that prohibit the governing body from selecting a majority of its successors.
 6. The personnel certification program shall be separate from the accreditation and education functions of NERC in related disciplines.
 7. No member of the personnel certification program governing body or staff member working with the personnel certification program governing body shall have or exercise any authority or responsibility for compliance matters related to reliability standards concerning personnel certification.

603. Candidate Testing Mechanisms

1. The personnel certification program shall utilize reliable testing mechanisms to evaluate individual competence in a manner that is objective, fair to all candidates, job-related, and based on the knowledge and skill needed to function in the discipline.
2. The personnel certification program shall implement a formal policy of periodic review of the testing mechanisms to ensure ongoing relevance of the mechanisms to knowledge and skill needed in the discipline.
3. The personnel certification program shall utilize policies and procedures to ensure that all test administration and development materials are secure and demonstrate that these policies and procedures are consistently implemented.
4. The personnel certification program shall establish pass/fail levels that protect the public with a method that is based on competence and generally accepted in the psychometric community as being fair and reasonable.
5. The personnel certification program shall conduct ongoing studies to substantiate the reliability and validity of the testing mechanisms.

6. The personnel certification program shall utilize policies and procedures that govern how long examination records are kept in their original format.
7. The personnel certification program shall demonstrate that different forms of the testing mechanisms assess equivalent content and that candidates are not penalized for taking forms of varying difficulty.

604. Public Information About the Personnel Certification Program

1. The personnel certification program shall provide for publishing and availability of general descriptive material on the procedures used in examination construction and validation; all eligibility requirements and determination; fees; and examination administration documents, including: reporting of results, recertification requirements, and disciplinary and grievance procedures.
2. The personnel certification program shall publish and make available a comprehensive summary or outline of the information, knowledge, or functions covered by the examination.
3. The personnel certification program shall publish and make available at least annually a summary of certification activities for the program, including at least the following information: number of examinations delivered, the number passed, the number failed, and the number certified.

605. Responsibilities to Applicants for Certification or Recertification

The personnel certification program:

1. Shall not discriminate among applicants as to age, gender, race, religion, national origin, disability, or marital status and shall include a statement of non-discrimination in announcements of the program.
2. Shall comply with all requirements of applicable federal and state/provincial laws with respect to all certification and recertification activities, and shall require compliance of all contractors and/or providers of services.
3. Shall make available to all applicants copies of formalized procedures for application for, and attainment of, personnel certification and recertification and shall uniformly follow and enforce such procedures for all applicants.
4. Shall implement a formal policy for the periodic review of eligibility criteria and application procedures to ensure that they are fair and equitable.
5. Shall provide competently proctored examination sites.
6. Shall uniformly report examination results to applicants in a timely manner.
7. Shall give applicants failing the examination information on general content areas of deficiency.

8. Shall implement policies and procedures providing due process for applicants questioning eligibility determination, examination results, and certification status, and shall publish this information. A current version of such a procedure is the *NERC System Operator Certification Dispute Resolution Process*, which is incorporated into these rules as part of **Appendix 6**.
9. Shall develop and maintain a program manual containing the processes and procedures for applicants for certification and recertification.

606. Responsibilities to the Public and to Employers of Certified Practitioners

The personnel certification program:

1. Shall demonstrate that the testing mechanisms adequately measure the knowledge and skill required for entry, maintenance, and/or advancement in the profession for each position to be certified.
2. Shall award certification and recertification only after the skill and knowledge of the individual have been evaluated and determined to be acceptable.
3. Shall periodically publish or maintain, in an electronic format, a current list of those persons certified in the programs and have policies and procedures that delineate what information about a credential holder may be made public and under what circumstances.
4. Shall have formal policies and procedures for discipline of a credential holder, including the revocation of the certificate, for conduct deemed harmful to the public or inappropriate to the discipline (e.g., incompetence, unethical behavior, physical or mental impairment affecting performance). These procedures shall incorporate due process. The current procedure is the *NERC Certified System Operator Credential Disciplinary Action Procedure*, which is incorporated into these rules as part of **Appendix 6**.
5. Shall demonstrate that any title or credential awarded accurately reflects or applies to the practitioner's daily occupational or professional duties and is not confusing to employers, consumers, regulators, related professions, and/or other interested parties.

SECTION 700 — RELIABILITY READINESS EVALUATION AND IMPROVEMENT AND FORMATION OF SECTOR FORUMS

701 Confidentiality Requirements for Readiness Evaluations and Evaluation Team Members

1. All information made available or created during the course of any reliability readiness evaluation including, but not limited to, data, documents, observations and notes, shall be maintained as confidential by all evaluation team members, in accordance with the requirements of Section 1500.
2. Evaluation team members are obligated to destroy all confidential evaluation notes following the posting of the final report of the reliability readiness evaluation.
3. NERC will retain reliability readiness evaluation-related documentation, notes, and materials for a period of time as defined by NERC.
4. These confidentiality requirements shall survive the termination of the NERC Reliability Readiness Evaluation and Improvement Program.

702. Formation of Sector Forum

1. NERC will form a sector forum at the request of any five members of NERC that share a common interest in the safety and reliability of the bulk power system. The members of sector forum may invite such others of the members of NERC to join the sector forum as the sector forum deems appropriate.
2. The request to form a sector forum must include a proposed charter for the sector forum. The board must approve the charter.
3. NERC will provide notification of the formation of a sector forum to its membership roster. Notices and agendas of meetings shall be posted on NERC's Web site.
4. A sector forum may make recommendations to any of the NERC committees and may submit a standards authorization request to the NERC *Reliability Standards Development Procedure*.

SECTION 800 — RELIABILITY ASSESSMENT AND PERFORMANCE ANALYSIS

801. Objectives of the Reliability Assessment and Performance Analysis Program

The objectives of the NERC reliability assessment and performance analysis program are to: (1) conduct, and report the results of, an independent assessment of the overall reliability and adequacy of the interconnected North American bulk power systems, both as existing and as planned; (2) analyze off-normal events on the bulk power system; (3) identify the root causes of events that may be precursors of potentially more serious events; (4) assess past reliability performance for lessons learned; (5) disseminate findings and lessons learned to the electric industry to improve reliability performance; and (6) develop reliability performance benchmarks. The final reliability assessment reports shall be approved by the board for publication to the electric industry and the general public.

802. Scope of the Reliability Assessment Program

1. The scope of the reliability assessment program shall include:
 - 1.1 Review, assess, and report on the overall electric generation and transmission reliability (adequacy and operating reliability) of the interconnected bulk power systems, both existing and as planned.
 - 1.2 Assess and report on the key issues, risks, and uncertainties that affect or have the potential to affect the reliability of existing and future electric supply and transmission.
 - 1.3 Review, analyze, and report on regional self-assessments of electric supply and bulk power transmission reliability, including reliability issues of specific regional concern.
 - 1.4 Identify, analyze, and project trends in electric customer demand, supply, and transmission and their impacts on bulk power system reliability.
 - 1.5 Investigate, assess, and report on the potential impacts of new and evolving electricity market practices, new or proposed regulatory procedures, and new or proposed legislation (e.g. environmental requirements) on the adequacy and operating reliability of the bulk power systems.
2. The reliability assessment program shall be performed in a manner consistent with the reliability standards of NERC including but not limited to those that specify reliability assessment requirements.

803. Reliability Assessment Reports

The number and type of periodic assessments that are to be conducted shall be at the discretion of NERC. The results of the reliability assessments shall be documented in three reports: the long-term and the annual seasonal (summer) and the annual seasonal (winter) assessment reports. NERC shall also conduct special reliability assessments from time to time as circumstances warrant. The reliability assessment reports shall be reviewed and approved for publication by the board. The three regular reports are described below.

1. **Long-Term Reliability Assessment Report** — The annual long-term report shall cover a ten-year planning horizon. The planning horizon of the long-term reliability assessment report shall be subject to change at the discretion of NERC. Detailed generation and transmission adequacy assessments shall be conducted for the first five years of the review period. For the second five years of the review period, the assessment shall focus on the identification, analysis, and projection of trends in peak demand, electric supply, and transmission adequacy, as well as other industry trends and developments that may impact future electric system reliability. Reliability issues of concern and their potential impacts shall be presented along with any mitigation plans or alternatives. The long-term reliability assessment reports will generally be published in the fall (September) of each year. NERC will also publish electricity supply and demand data associated with the long-term reliability assessment report.
2. **Summer Assessment Report** — The annual summer seasonal assessment report typically shall cover the four-month (June–September) summer period. It shall provide an overall perspective on the adequacy of the generation resources and the transmission systems necessary to meet projected summer peak demands. It shall also identify reliability issues of interest and regional and subregional areas of concern in meeting projected customer demands and may include possible mitigation alternatives. The report will generally be published in mid-May for the upcoming summer period.
3. **Winter Assessment Report** — The annual winter seasonal assessment report shall cover the three-month (December–February) winter period. The report shall provide an overall perspective on the adequacy of the generation resources and the transmission systems necessary to meet projected winter peak demands. Similar to the summer assessment, the winter assessment shall identify reliability issues of interest and regional and subregional areas of concern in meeting projected customer demands and may also include possible mitigation alternatives. The winter assessment report will generally be published in mid-November for the upcoming winter period.
4. **Special Reliability Assessment Reports** — In addition to the long-term and seasonal reliability assessment reports, NERC shall also conduct special reliability assessments on a regional, interregional, and interconnection basis as conditions warrant, or as requested by the board or applicable governmental authorities. The teams of reliability and technical experts also may initiate special assessments of

key reliability issues and their impacts on the reliability of a regions, subregions, or interconnection (or a portion thereof). Such special reliability assessments may include, among other things, operational reliability assessments, evaluations of emergency response preparedness, adequacy of fuel supply, hydro conditions, reliability impacts of new or proposed environmental rules and regulations, and reliability impacts of new or proposed legislation that affects or has the potential to affect the reliability of the interconnected bulk power systems in North America.

804. Reliability Assessment Data and Information Requirements

To carry out the reviews and assessments of the overall reliability of the interconnected bulk power systems, the regional entities and other entities shall provide sufficient data and other information requested by NERC in support of the annual long-term and seasonal assessments and any special reliability assessments.

Some of the data provided for these reviews and assessment may be considered confidential from a competitive marketing perspective, a critical energy infrastructure information perspective, or for other purposes. Such data shall be treated in accordance with the provisions of Section 1500 – Confidential Information.

While the major sources of data and information for this program are the regional entities, a team of reliability and technical experts is responsible for developing and formulating its own independent conclusions about the near-term and long-term reliability of the bulk power systems.

In connection with the reliability assessment reports, requests shall be submitted to each of the regional entities for required reliability assessment data and other information, and for each region’s self-assessment report. The timing of the requests will be governed by the schedule for the preparation of the assessment reports.

The regional self-assessments are to be conducted in compliance with NERC standards and the respective regional planning criteria. The team(s) of reliability and technical experts shall also conduct interviews with the regional entities as needed. The summary of the regional self-assessments that are to be included in the assessment reports shall follow the general outline identified in NERC’s request. This outline may change from time to time as key reliability issues change.

In general, the regional reliability self-assessments shall address, among other areas, the following topics: demand and net energy for load; assessment of projected resource adequacy; any transmission constraints that may impact bulk transmission adequacy and plans to alleviate those constraints; any unusual operating conditions that could impact reliability for the assessment period; fuel supply adequacy; the deliverability of generation (both internal and external) to load; and any other reliability issues in the region and their potential impacts on the reliability of the bulk power systems.

805. Reliability Assessment Process

Based on their expertise, the review of the collected data, the review of the regional self-assessment reports, and interviews with the regional entities, as appropriate, the teams of reliability and technical experts shall perform an independent review and assessment of the generation and transmission adequacy of each region's existing and planned bulk power system. The results of the review teams shall form the basis of NERC's long-term and seasonal reliability assessment reports. The review and assessment process is briefly summarized below.

1. **Resource Adequacy Assessment** — The teams shall evaluate the regional demand and resource capacity data for completeness in the context of the overall resource capacity needs of the region. The team shall independently evaluate the ability of the regional entity members to serve their obligations given the demand growth projections, the amount of existing and planned capacity, including committed and uncommitted capacity, contracted capacity, or capacity outside of the region. If the region relies on capacity from outside of the region to meet its resource objectives, the ability to deliver that capacity shall be factored into the assessment. The demand and resource capacity information shall be compared to the resource adequacy requirements of the regional entity for the year(s) or season(s) being assessed. The assessment shall determine if the resource information submitted represents a reasonable and attainable plan for the regional entity and its members. For cases of inadequate capacity or reserve margin, the regional entity will be requested to analyze and explain any resource capacity inadequacies and its plans to mitigate the reliability impact of the potential inadequacies. The analysis may be expanded to include surrounding areas. If the expanded analysis indicates further inadequacies, then an interregional problem may exist and will be explored with the applicable regions. The results of these analyses shall be described in the assessment report.
2. **Transmission Adequacy and Operating Reliability Assessment** — The teams shall evaluate transmission system information that relates to the adequacy and operating reliability of the regional transmission system. That information shall include: regional planning study reports, interregional planning study reports, and/or regional operational study reports. If additional information is required, another data request shall be sent to the regional entity. The assessment shall provide a judgment on the ability of the regional transmission system to operate reliably under the expected range of operating conditions over the assessment period as required by NERC reliability standards. If sub-areas of the regional system are especially critical to the reliable operation of the regional bulk transmission system, these facilities or sub-areas shall be reviewed and addressed in the assessment. Any areas of concern related to the adequacy or operating reliability of the system shall be identified and reported in the assessment.
3. **Seasonal Operating Reliability Assessment** — The team(s) shall evaluate the overall operating reliability of the regional bulk transmission systems. In areas with potential resource adequacy or system operating reliability problems, operational readiness of the affected regional entities for the upcoming season

shall be reviewed and analyzed. The assessment may consider unusual but possible operating scenarios and how the system is expected to perform. Operating reliability shall take into account a wide range of activities, all of which should reinforce the regional entity's ability to deal with the situations that might occur during the upcoming season. Typical activities in the assessment may include: facility modifications and additions, new or modified operating procedures, emergency procedures enhancement, and planning and operating studies. The teams shall report the overall seasonal operating reliability of the regional transmission systems in the annual summer and winter assessment reports.

4. **Reporting of Reliability Assessment Results** — The teams of reliability and technical experts shall provide an independent assessment of the reliability of the regional entities and the North American interconnected bulk power system for the period of the assessment. While the regional entities are relied upon to provide the information to perform such assessments, the review team is not required to accept the conclusions provided by the regional entities. Instead, the review team is expected, based on their expertise, to reach their own independent conclusions about the status of the adequacy of the generation and bulk power transmission systems of North America.

The review team also shall strive to achieve consensus in their assessments. The assessments that are made are based on the best information available at the time. However, since judgment is applied to this information, legitimate differences of opinion can develop. Despite these differences, the review team shall work to achieve consensus on their findings.

In addition to providing long-term and seasonal assessments in connection with the reliability assessment program, the review team of experts shall also be responsible for recommending new and revised reliability standards related to the reliability assessments and the reliability of the bulk power systems. These proposals for new or revised standards shall be entered into NERC's Standards Development Process.

Upon completion of the assessment, the team shall share the results with the regional entities. The regional entities shall be given the opportunity to review and comment on the conclusions in the assessment and to provide additional information as appropriate. The reliability assessments and their conclusions are the responsibility of NERC's technical review team and NERC.

The preparation and approval of NERC's reliability assessment reports shall follow a prescribed schedule including review, comment, and possible approval by appropriate NERC committees. The long-term and seasonal (summer and winter) reliability assessment reports shall be further reviewed for approval by the board for publication to the electric industry.

806. Scope of the Reliability Performance and Analysis Program

The components of the program will include analysis of large-scale outages, disturbances, and near misses to determine root causes and lessons learned; identification and continuous monitoring of performance indices to detect emerging trends and signs of a decline in reliability performance; and communications of performance results, trends, recommendations, and initiatives to those responsible to take actions; followed with confirmation of actions to correct any deficiencies identified. Within NERC, the reliability performance program will provide performance results to the standards development and compliance enforcement programs to make the necessary adjustments to preserve reliability based on a risk-based approach.

807. Analysis of Major Events

Responding to major blackouts and other system disturbances or emergencies can be divided into four phases: situational assessment and communications; situation tracking and communications; data collection, investigation, analysis, and reporting; and follow-up on recommendations.

- a. NERC's role following a blackout or other major bulk power system disturbance or emergency is to provide leadership, coordination, technical expertise, and assistance to the industry in responding to the event. Working closely with the regional entities and reliability coordinators, NERC will coordinate and facilitate efforts among industry participants, and with state, federal, and provincial governments in the United States and Canada to support the industry's response.
- b. When responding to any event where physical or cyber security is suspected as a cause or contributing factor to an event, NERC will immediately notify appropriate government agencies and coordinate its activities with them.
- c. Each user, owner, and operator of the bulk power system shall provide NERC and the applicable regional entities with such information as is necessary to enable NERC and the applicable regional entities to carry out their responsibilities under this section.
- d. During the conduct of some NERC analyses, assistance may be needed from government agencies. This assistance could include: authority to require data reporting from affected or involved parties; communications with other agencies of government; investigations related to possible criminal or terrorist involvement in the event; resources for initial data gathering immediately after the event; authority to call meetings of affected or involved parties; and technical and analytical resources for studies.
- e. NERC shall work with other participants to establish a clear delineation of roles, responsibilities, and coordination requirements among industry and government for the investigation and reporting of findings, conclusions, and recommendations related to major blackouts, disturbances, or other emergencies affecting the bulk power system with the objective of avoiding, to the extent possible, multiple investigations of the same event. If the event is confined to a single regional

entity, NERC representatives will participate as members of the regional entity analysis team.

- f. NERC and applicable entity(s) shall apply the NERC *Blackout and Disturbance Response Procedures*, which are incorporated into these rules as **Appendix 8**. These procedures provide a framework to guide NERC's response to events that may have multiregional, national, or international implications. Experienced industry leadership shall be applied to tailor the response to the specific circumstances of the event. In accordance with that procedure, the NERC president will determine whether the event warrants analysis at the NERC-level. A regional entity may request that NERC elevate any analysis to a NERC level.
- g. NERC will screen and analyze the findings and recommendations from the analysis, and those with generic applicability will be disseminated to the industry in accordance with section 810.

808. Analysis of Off-Normal Events, Potential System Vulnerabilities, and System Performance

- 1. NERC and regional entities shall analyze system and equipment performance events that do not rise to the level of a major blackout, disturbance, or system emergency, as described in section 807. NERC and regional entities shall also analyze potential vulnerabilities in the bulk power system brought to their attention by government agencies. The purpose of these analyses is to identify the root causes of events that may be precursors of potentially more serious events or that have the potential to cause more serious events, to assess past reliability performance for lessons learned, and to develop reliability performance benchmarks and trends.
- 2. NERC and regional entities will screen and analyze events and potential vulnerabilities for significance, and information from those with generic applicability will be disseminated to the industry in accordance with section 810.
- 3. Each user, owner, and operator, of the bulk power system shall provide NERC and the applicable regional entities with such information as is necessary to enable NERC and the applicable regional entities to carry out their responsibilities under this section.

809. Reliability Benchmarking

NERC shall identify and track key reliability indicators as a means of benchmarking reliability performance and measuring reliability improvements. This program will include assessing available metrics, developing guidelines for acceptable metrics, maintaining a performance metrics “dashboard” on the NERC Web site, and developing appropriate reliability performance benchmarks.

810. Information Exchange and Issuance of NERC Advisories, Recommendations and Essential Actions

1. Members of NERC and bulk power system owners, operators, and users shall provide NERC with detailed and timely operating experience information and data.
2. In the normal course of operations, NERC disseminates the results of its events analysis findings, lessons learned and other analysis and information gathering to the industry. These findings, lessons learned and other information will be used to guide the reliability assessment program.
3. When NERC determines it is necessary to place the industry or segments of the industry on formal notice of its findings, analyses, and recommendations, NERC will provide such notification in the form of specific operations or equipment Advisories, Recommendations or Essential Actions:
 - 3.1 Level 1 (Advisories) – purely informational, intended to advise certain segments of the owners, operators and users of the bulk power system of findings and lessons learned;
 - 3.2 Level 2 (Recommendations) – specific actions that NERC is recommending be considered on a particular topic by certain segments of owners, operators, and users of the bulk power system according to each entity’s facts and circumstances;
 - 3.3 Level 3 (Essential Actions) – specific actions that NERC has determined are essential for certain segments of owners, operators, or users of the bulk power system to take to ensure the reliability of the bulk power system. Such Essential Actions require NERC board approval before issuance.
4. The bulk power system owners, operators, and users to which Level 2 (Recommendations) and Level 3 (Essential Actions) notifications apply are to evaluate and take appropriate action on such issuances by NERC. Such bulk power system owners, operators, and users shall also provide reports of actions taken and timely updates on progress towards resolving the issues raised in the Recommendations and Essential Actions in accordance with the reporting date(s) specified by NERC.
5. NERC will advise the Commission and other applicable governmental authorities of its intent to issue all Level 1 Advisories, Level 2 Recommendations, and Level 3 Essential Actions at least five (5) business days prior to issuance, unless extraordinary circumstances exist that warrant issuance less than five (5) business days after such advice. NERC will file a report with the Commission and other applicable governmental authorities no later than thirty (30) days following the date by which NERC has requested the bulk power system owners, operators, and users to which a Level 2 Recommendation or Level 3 Essential Action issuance applies to provide reports of actions taken in response to the notification.

NERC's report to the Commission and other applicable governmental authorities will describe the actions taken by the relevant owners, operators, and users of the bulk power system and the success of such actions taken in correcting any vulnerability or deficiency that was the subject of the notification, with appropriate protection for confidential or critical infrastructure information.

811. Equipment Performance Data

Through its Generating Availability Data System (GADS), NERC shall collect operating information about the performance of electric generating equipment; provide assistance to those researching information on power plant outages stored in its database; and support equipment reliability as well as availability analyses and other decision-making processes developed by GADS subscribers. GADS data is also used in conducting assessments of generation resource adequacy.

SECTION 900 — TRAINING AND EDUCATION

901. Scope of the Training and Education Program

Maintaining the reliability of the bulk electric system through implementation of the Reliability Standards requires informed and trained personnel. The training and education program will provide the education and training necessary for bulk power system personnel and regulators to obtain the essential knowledge necessary to understand and operate the bulk electric system.

NERC shall develop and maintain training and education programs for the purpose of establishing training requirements, developing materials, and developing training activities. The target audience of the training and education programs shall be bulk power system operating personnel including system operations personnel, operations support personnel (engineering and information technology), supervisors and managers, training personnel, and other personnel directly responsible for complying with NERC reliability standards who, through their actions or inactions, may impact the real-time, or day-ahead reliability of the bulk power system.

NERC shall also develop and provide appropriate training and education for industry participants and regulators affected by new or changed reliability standards or compliance requirements.

To accomplish those objectives:

1. NERC shall periodically conduct job task analyses for targeted bulk power system personnel to ensure that the training program content is properly aligned to the job tasks performed by those personnel.
2. NERC shall develop and maintain personnel training program curriculum requirements based on valid job-task analysis.
3. NERC shall periodically conduct performance surveys to determine the effectiveness of the training program and identify areas for further training development and improvement.
4. NERC shall develop training and education materials and activities to assist bulk power system entities implementing new or revised reliability standard requirements or other NERC-related changes.
5. NERC shall develop and provide training to people who participate in NERC and regional entity evaluations, audits, and investigations for the compliance enforcement program, organization certification program, and the continuing education program.

902. Continuing Education Program

NERC shall develop and maintain a continuing education program to foster the improvement of training and to promote quality in the training programs used by and

implemented by bulk power system entities. The program shall approve or accredit those activities and entities meeting NERC continuing education requirements.

1. NERC shall develop and implement continuing education program requirements that promote excellence in training programs and advance improved performance for bulk system personnel identified in Section 901.
2. NERC shall develop and maintain a process to approve or accredit continuing education providers and activities seeking approval or accreditation and meeting NERC-approved continuing education requirements.
3. NERC shall perform periodic audits on continuing education providers and training activities to ensure that the approved or accredited providers and training activities satisfy NERC continuing education requirements.
4. NERC shall develop and maintain an appeals process for disputed application reviews, interpretations of guidelines and standards, probation or suspension of NERC-approved provider status, or continuing education hour disputes.

SECTION 1000 — SITUATION AWARENESS AND INFRASTRUCTURE SECURITY

1001. Situation Awareness

NERC shall through the use of reliability coordinators and available tools, monitor present conditions on the bulk power system and provide leadership coordination, technical expertise, and assistance to the industry in responding to events as necessary. To accomplish these goals, NERC will:

1. Maintain real-time situation awareness of conditions on the bulk power system;
2. Notify the industry of significant bulk power system events that have occurred in one area, and which have the potential to impact reliability in other areas;
3. Maintain and strengthen high-level communication, coordination, and cooperation with governments and government agencies regarding real-time conditions; and
4. Enable the reliable operation of interconnected bulk power systems by facilitating information exchange and coordination among reliability service organizations.

1002. Reliability Support Services

NERC will provide tools and other support services for the benefit of reliability coordinators and other system operators, including the Area Control Error (ACE) and Frequency Monitoring System, NERC Hotline, Real-time Flows, System Data Exchange (SDX), Reliability Coordinator Information System (RCIS), Transmission Services Information Network (TSIN), Interchange Distribution Calculator (IDC), Interregional Security Network (ISN), and Central Repository for Security Events (CRC). To accomplish this goal, NERC will:

1. Maintain the reliability and effectiveness of all mission-critical operating reliability support systems and services;
2. Continue to support maintenance of a transmission provider curtailment report on the CRC site in response to Federal Energy Regulatory Commission Order 605;
3. Investigate and analyze the use of high-speed real-time system measurements, including phasors, in predicting the behavior and performance of the Eastern Interconnection; and
4. Facilitate real-time voice and data exchange services among reliability coordinators (e.g., Hotline, Interregional Security Network, NERCnet, System Data Exchange, etc.).

1003. Infrastructure Security Program

NERC shall coordinate electric industry activities to promote critical infrastructure protection of the bulk power system in North America by taking a leadership role in critical infrastructure protection of the electricity sector so as to reduce vulnerability and

improve mitigation and protection of the electricity sector's critical infrastructure. To accomplish these goals, NERC shall perform the following functions.

1. Electric Sector Information Sharing and Analysis Center (ESISAC)
 - 1.1 NERC shall serve as the electricity sector's Sector Coordinator and operate its Information Sharing and Analysis Center to gather information and communicate security-related threats and incidents within the sector, with United States and Canadian government agencies, and with other critical infrastructure sectors.
 - 1.2 NERC shall improve the capability of the ESISAC to analyze security threats and incident information and provide situational assessments for the electricity sector and governments.
 - 1.3 NERC shall work closely with the United States Department of Homeland Security, Department of Energy, Natural Resources Canada, and Public Safety and Emergency Preparedness Canada.
 - 1.4 NERC shall strengthen and expand these functions and working relationships with the electricity sector, other critical infrastructure industries, governments, and government agencies throughout North America to ensure the protection of the infrastructure of the bulk power system.
 - 1.5 NERC shall fill the role of the Electricity Sector Coordinating Council and coordinate with the Government Coordinating Council.
 - 1.6 NERC shall coordinate with other critical infrastructure sectors through active participation with the other Sector Coordinating Councils, the other ISACs, and the National Infrastructure Advisory Committee.
 - 1.7 NERC shall encourage and participate in coordinated critical infrastructure protection exercises, including interdependencies with other critical infrastructure sectors.
2. Security Planning
 - 2.1 NERC shall take a risk management approach to critical infrastructure protection, considering probability and severity, and recognizing that mitigation and recovery can be practical alternatives to prevention.
 - 2.2 NERC shall keep abreast of the changing threat environment through collaboration with government agencies.
 - 2.3 NERC shall develop criteria to identify critical physical and cyber assets, assess security threats, identify risk assessment methodologies, and assess effectiveness of physical and cyber protection measures.

- 2.4 NERC shall enhance and maintain the bulk power system critical spare transformer program, encourage increased participation by asset owners, and continue to assess the need to expand this program to include other critical bulk power system equipment.
- 2.5 NERC shall support implementation of the Cyber Security Standards through education and outreach.
- 2.6 NERC shall review and improve existing Security Guidelines, develop new Security Guidelines to meet the needs of the electricity sector, and consider whether any guidelines should be developed into standards.
- 2.7 NERC shall conduct education and outreach initiatives to increase awareness and respond to the needs of the electricity sector.
- 2.8 NERC shall strengthen relationships with federal, state, and provincial government agencies on critical infrastructure protection matters.
- 2.9 NERC shall maintain and improve mechanisms for the sharing of sensitive or classified information with federal, state, and provincial government agencies on critical infrastructure protection matters; work with DOE and DHS to implement the National Infrastructure Protection Plan, as applicable to the electricity sector; and coordinate this work with PSEPC.
- 2.10 NERC shall improve methods to better assess the impact of a possible physical attack on the bulk power system and means to deter, mitigate, and respond following an attack.
- 2.11 NERC shall assess the results of vulnerability assessments and enhance the security of System Control and Data Acquisition (SCADA) and process control systems by developing methods to detect an emerging cyber attack and the means to mitigate impacts on the bulk power systems.
- 2.12 NERC shall work with the National SCADA Test Bed and the Process Control Systems Forum to accelerate the development of technology that will enhance the security, safety, and reliability of process control and SCADA systems.

SECTION 1100 — ANNUAL NERC BUSINESS PLANS AND BUDGETS

1101. Scope of Business Plans and Budgets

The board shall determine the content of the budgets to be submitted to the applicable ERO governmental authorities with consultation from the members of the Members Representatives Committee, regional entities, and others in accordance with the bylaws. The board shall identify any activities outside the scope of NERC's statutory reliability functions, if any, and the appropriate funding mechanisms for those activities.

1102. NERC Funding and Cost Allocation

1. In order that NERC's costs shall be fairly allocated among interconnections and among regional entities, the NERC funding mechanism for all statutory functions shall be based on net energy for load (NEL).
2. NERC's costs shall be allocated so that all load (or, in the case of costs for an interconnection or regional entity, all load within that interconnection or regional entity) bears an equitable share of such costs based on NEL.
3. Costs shall be equitably allocated between countries or regional entities thereof for which NERC has been designated or recognized as the electric reliability authority.
4. Costs incurred to accomplish the statutory functions for one interconnection, regional entity, or group of entities will be directly assigned to that interconnection, regional entity, or group of entities provided that such costs are allocated equitably to end-users based on net energy for load.

1103. NERC Budget Development

1. The NERC annual budget process shall be scheduled and conducted for each calendar year so as to allow a sufficient amount of time for NERC to receive member inputs, develop the budget, and receive board and, where authorized by applicable legislation or agreement, ERO governmental authority approval of the NERC budget for the following fiscal year, including timely submission of the proposed budget to FERC for approval in accordance with FERC regulations.
2. The NERC budget submittal to ERO governmental authorities shall include provisions for all ERO functions, all regional entity delegated functions as specified in delegation agreements and reasonable reserves and contingencies.
3. The NERC annual budget submittal to ERO governmental authorities shall include description and explanation of NERC's proposed ERO program activities for the year; budget component justification based on statutory or other authorities; explanation of how each budgeted activity lends itself to the accomplishment of the statutory or other authorities; sufficiency of resources

provided for in the budget to carry out the ERO program responsibilities; explanation of the calculations and budget estimates; identification and explanation of changes in budget components from the previous year's budget; information on staffing and organization charts; and such other information as is required by FERC and other ERO governmental authorities having authority to approve the proposed budget.

4. NERC shall develop, in consultation with the regional entities, a reasonable and consistent system of accounts, to allow a meaningful comparison of actual results at the NERC and regional entity level by the applicable ERO governmental authorities.

1104. Submittal of Regional Entity Budgets to NERC

1. Each regional entity shall submit its proposed annual budget for carrying out its delegated authority functions as well as all other activities and funding to NERC in accordance with a schedule developed by NERC and the regional entities, which shall provide for the regional entity to submit its final budget that has been approved by its board of directors or other governing body no later than July 1 of the prior year, in order to provide sufficient time for NERC's review and comment on the proposed budget and approval of the regional entity budget by the NERC Board of Trustees in time for the NERC and regional budgets to be submitted to FERC and other ERO governmental authorities for approval in accordance with their regulations. The regional entity's budget shall include supporting materials in accordance with the budget and reporting format developed by NERC and the regional entities, including the regional entity's complete business plan and organization chart, explaining the proposed collection of all dues, fees, and charges and the proposed expenditure of funds collected in sufficient detail to justify the requested funding collection and budget expenditures.
2. NERC shall review and approve each regional entity's budget for meeting the requirements of its delegated authority. Concurrent with approving the NERC budget, NERC shall review and approve, or reject, each regional entity budget for filing.

1105. Submittal of NERC and Regional Entity Budgets to Governmental Authorities for Approval

1. NERC shall file for approval by the applicable ERO governmental authorities at least 130 days in advance of the start of each fiscal year. The filing shall include: (1) the complete NERC and regional entity budgets including the business plans and organizational charts approved by the board, (2) NERC's annual funding requirement (including regional entity costs for delegated functions), and (3) the mechanism for assessing charges to recover that annual funding requirement, together with supporting materials in sufficient detail to support the requested funding requirement.

2. NERC shall seek approval from each governmental authority requiring such approval for the funding requirements necessary to perform ERO activities within their jurisdictions.

1106. NERC and Regional Entity Billing and Collections

1. NERC shall request the regional entities to identify all load-serving entities³ within each regional entity and the NEL assigned to each load-serving entity, and the regional entities shall supply the requested information. The assignment of a funding requirement to an entity shall not be the basis for determining that the entity must be registered in the compliance registry.
2. NERC shall accumulate the NEL by load-serving entities for each ERO governmental authority and submit the proportional share of NERC funding requirements to each ERO governmental authority for approval together with supporting materials in sufficient detail to support the requested funding requirement.
3. NEL reported by balancing authorities within a region shall be used to rationalize and validate amounts allocated for collection through regional entity processes.
4. The billing and collection processes shall provide:
 - 4.1 A clear validation of billing and application of payments.
 - 4.2 A minimum of data requests to those being billed.
 - 4.3 Adequate controls to ensure integrity in the billing determinants including identification of entities responsible for funding NERC's activities.
 - 4.4 Consistent billing and collection terms.
5. NERC will bill and collect all budget requirements approved by applicable ERO governmental authorities (including the funds required to support those functions assigned to the regional entities through the delegation agreements) directly from the load-serving entities or their designees or as directed by particular ERO governmental authorities, except where the regional entity is required to collect the budget requirements for NERC, in which case the regional entity will collect directly from the load-serving entities or as otherwise provided by agreement and submit funds to NERC. Alternatively, a load-serving entity may pay its allocated ERO costs through a regional entity managed collection mechanism.
6. NERC shall set a minimum threshold limit on the billing of small LSEs to minimize the administrative burden of collection.

³ A regional entity may allocate funding obligations using an alternative method approved by NERC and by FERC and other appropriate ERO governmental authorities, as provided for in the regional delegation agreement.

7. NERC shall pursue any non-payments and shall request assistance from applicable governmental authorities as necessary to secure collection.
8. In the case where a Regional Entity performs the collection for ERO, the Regional Entity will not be responsible for non-payment in the event that a user, owner or operator of the Bulk Power System does not pay its share of dues, fees and charges in a timely manner, provided that such a Regional Entity shall use reasonably diligent efforts to collect dues, fees, and other charges from all entities obligated to pay them. However, any revenues not paid shall be recovered from others within the same region to avoid cross-subsidization between regions.
9. Both NERC and the regional entities also may bill members or others for functions and services not within statutory requirements or otherwise authorized by the appropriate governmental authorities. Costs and revenues associated with these functions and services shall be separately identified and not commingled with billings associated with the funding of NERC or of the regional entities for delegated activities.

1107. Penalty Applications

1. Where NERC or a regional entity initiates a compliance monitoring and enforcement process that leads to imposition of a penalty, the entity that initiated the process shall receive any penalty monies imposed and collected as a result of that process, unless a different disposition of the penalty monies is provided for in the delegation agreement, or in a contract or a disposition of the violation that is approved by NERC and FERC.
2. All funds from financial penalties assessed in the United States received by the entity initiating the compliance monitoring and enforcement process shall be applied as a general offset to the entity's budget requirements for the subsequent fiscal year, if received by July 1, or for the second subsequent fiscal year, if received on or after July 1. Funds from financial penalties shall not be directly applied to any program maintained by the entity conducting the compliance monitoring and enforcement process. Funds from financial penalties assessed against a Canadian entity shall be applied as specified by legislation or agreement.
3. In the event that a compliance monitoring and enforcement process is conducted jointly by NERC and a regional entity, the regional entity shall receive the penalty monies and offset the entity's budget requirements for the subsequent fiscal year.
4. Exceptions or alternatives to the foregoing provisions will be allowed if approved by NERC and by FERC any other applicable ERO governmental authority.

1108. Special Assessments

On a demonstration of unforeseen and extraordinary circumstances requiring additional funds prior to the next funding cycle, NERC shall file with the applicable ERO governmental authorities, where authorized by applicable legislation or agreement, for authorization for an amended or supplemental budget for NERC or a regional entity and,

if necessary under the amended or supplemental budget, to collect a special or additional assessment for statutory functions of NERC or the regional entity. Such filing shall include supporting materials to justify the requested funding, including any departure from the approved funding formula or method.

SECTION 1200 — REGIONAL DELEGATION AGREEMENTS

1201. Pro Forma Regional Delegation Agreement

NERC shall develop and maintain a pro forma regional entity delegation agreement, which shall serve as the basis for negotiation of consistent agreements for the delegation of ERO functions to regional entities.

1202. Regional Entity Essential Requirements

NERC shall establish the essential requirements for an entity to become qualified and maintain good standing as a regional entity.

1203. Negotiation of Regional Delegation Agreements

NERC shall, for all areas of North America that have provided NERC with the appropriate authority, negotiate regional delegation agreements for the purpose of ensuring all areas of the North American bulk power systems are within a regional entity area. In the event NERC is unable to reach agreement with regional entities for all areas, NERC shall provide alternative means and resources for implementing NERC functions within those areas. No delegation agreement shall take effect until it has been approved by the appropriate ERO governmental authority.

1204. Conformance to Rules and Terms of Regional Delegation Agreements

NERC and each regional entity shall comply with all applicable ERO rules of procedure and the obligations stated in the regional delegation agreement.

1205. Sub-delegation

The regional entity shall not sub-delegate any responsibilities and authorities delegated to it by its regional delegation agreement with NERC except with the approval of NERC and FERC and other appropriate ERO governmental authorities. Responsibilities and authorities may only be sub-delegated to another regional entity. Regional entities may share resources with one another so long as such arrangements do not result in cross-subsidization or in any sub-delegation of authorities.

1206. Nonconformance to Rules or Terms of Regional Delegation Agreement

If a regional entity is unable to comply or is not in compliance with an ERO rule of procedure or the terms of the regional delegation agreement, the regional entity shall immediately notify NERC in writing, describing the area of nonconformance and the reason for not being able to conform to the rule. NERC shall evaluate each case and inform the affected regional entity of the results of the evaluation. If NERC determines that a rule or term of the regional delegation agreement has been violated by an entity or cannot practically be implemented by an entity, NERC shall notify the applicable ERO governmental authorities and take any actions necessary to address the situation.

1207. Regional Entity Audits

Approximately every five years and more frequently if necessary for cause, NERC shall audit each regional entity to verify that the regional entity continues to comply with NERC rules of procedure and the obligations of NERC delegation agreement. Audits of regional entities shall be conducted, to the extent practical, based on professional auditing standards recognized in the U.S., including Generally Accepted Auditing Standards, Generally Accepted Government Auditing Standards, and standards sanctioned by the Institute of Internal Auditors, and if applicable to the coverage of the audit, may be based on Canadian or other international standards. The audits required by this section 1207 shall not duplicate the audits of regional entity compliance monitoring and enforcement programs provided for in **Appendix 4A**, Audit of Regional Compliance Programs, to these rules of procedure.

1208. Process for Considering Registered Entity Requests to Transfer to Another Regional Entity

1. A registered entity that is registered in the region of one regional entity and believes its registration should be transferred to a different regional entity may submit a written request to both regional entities requesting that they process the proposed transfer in accordance with this section. The registered entity's written request shall set forth the reasons the registered entity believes justify the proposed transfer and shall describe any impacts of the proposed transfer on other bulk power system owners, operators, and users.
2. After receiving the registered entity's written request, the two regional entities shall consult with each other as to whether they agree or disagree that the requested transfer is appropriate. The regional entities may also consult with affected reliability coordinators, balancing authorities and transmission operators as appropriate. Each regional entity shall post the request on its web site for public comment period of 21 days. In evaluating the proposed transfer, the regional entities shall consider the location of the registered entity's bulk power system facilities in relation to the geographic and electrical boundaries of the respective regions; the impacts of the proposed transfer on other bulk power system owners, operators; and users, the impacts of the proposed transfer on the current and future staffing, resources, budgets and assessments to other load-serving entities of each regional entity, including the sufficiency of the proposed transferee regional entity's staffing and resources to perform compliance monitoring and enforcement activities with respect to the registered entity; the registered entity's compliance history with its current regional entity; and the manner in which pending compliance monitoring and enforcement matters concerning the registered entity would be transitioned from the current regional entity to the transferee regional entity; along with any other reasons for the proposed transfer stated by the registered entity and any other reasons either regional entity considers relevant. The regional entities may request that the registered entity provide additional data and information concerning the proposed transfer for the regional entities' use in their evaluation. The registered entity's

current regional entity shall notify the registered entity in writing as to whether (i) the two regional entities agree that the requested transfer is appropriate, (ii) the two regional entities agree that the requested transfer is not appropriate and should not be processed further, or (iii) the two regional entities disagree as to whether the proposed transfer is appropriate.

3. If the two regional entities agree that the requested transfer is appropriate, they shall submit a joint written request to NERC requesting that the proposed transfer be approved and that the delegation agreement between NERC and each of the regional entities be amended accordingly. The regional entities' joint written submission to NERC shall describe the reasons for the proposed transfer; the location of the registered entity's bulk power system facilities in relation to the geographic and electrical boundaries of the respective regions; the impacts of the proposed transfer on other bulk power system owners, operators, and users; the impacts of the proposed transfer on the current and future staffing, resources, budgets and assessments of each regional entity, including the sufficiency of the proposed transferee regional entity's staffing and resources to perform compliance monitoring and enforcement activities with respect to the registered entity; the registered entity's compliance history with its current registered entity; and the manner in which pending compliance monitoring and enforcement matters concerning the registered entity will be transitioned from the current regional entity to the transferee regional entity. The NERC Board of Trustees shall consider the proposed transfer based on the submissions of the regional entities and any other information the board considers relevant, and shall approve or disapprove the proposed transfer and the related delegation agreement amendments. The NERC board may request that the regional entities provide additional information, or obtain additional information from the registered entity, for the use of the NERC board in making its decision. If the NERC board approves the proposed transfer, NERC shall file the related delegation agreements with FERC for approval.
4. If the two regional entities do not agree with each other that the proposed transfer is appropriate, the regional entity supporting the proposed transfer shall, if requested by the registered entity, submit a written request to NERC to approve the transfer and the related delegation agreement amendments. The regional entity's written request shall include the information specified in section 1208.3. The regional entity that does not believe the proposed transfer is appropriate will be allowed to submit a written statement to NERC explaining why the regional entity believes the transfer is not appropriate and should not be approved. The NERC Board of Trustees shall consider the proposed transfer based on the submissions of the regional entities and any other information the board considers relevant, and shall approve or disapprove the proposed transfer and the related delegation agreement amendments. The NERC board may request that the regional entities provide additional information, or obtain additional information from the registered entity, for the use of the NERC board in making its decision.

If the NERC board approves the proposed transfer, NERC shall file the related delegation agreements with FERC for approval.

5. Prior to action by the NERC Board of Trustees on a proposed transfer of registration under Section 1208.3 or 1208.4, NERC shall post information concerning the proposed transfer, including the submissions from the regional entities, on its Web site for at least twenty-one (21) days for the purpose of receiving public comment.
6. If the NERC Board of Trustees disapproves a proposed transfer presented to it pursuant to either section 1208.3 or 1208.4, the regional entity or entities that believe the transfer is appropriate may, if requested to do so by the registered entity, file a petition with FERC pursuant to 18 C.F.R. section 39.8(f) and (g) requesting that FERC order amendments to the delegation agreements of the two registered entities to effectuate the proposed transfer.
7. No transfer of a registered entity from one regional entity to another regional entity shall be effective (i) unless approved by FERC, and (ii) any earlier than the first day of January of the second calendar year following approval by FERC, unless an earlier effective date is agreed to by both regional entities and NERC and approved by FERC.

SECTION 1300 — COMMITTEES

1301. Establishing Standing Committees

The board may from time to time create standing committees. In doing so, the board shall approve the charter of each committee and assign specific authority to each committee necessary to conduct business within that charter. Each standing committee shall work within its board-approved charter and shall be accountable to the board for performance of its board-assigned responsibilities. A NERC standing committee may not delegate its assigned work to a member forum, but, in its deliberations, may request the opinions of and consider the recommendations of a member forum.

1302. Committee Membership

Each committee shall have a defined membership composition that is explained in its charter. Committee membership may be unique to each committee, and can provide for balanced decision-making by providing for representatives from each sector or, where sector representation will not bring together the necessary diversity of opinions, technical knowledge and experience in a particular subject area, by bringing together a wide diversity of opinions from industry experts with outstanding technical knowledge and experience in a particular subject area. Committee membership shall also provide the opportunity for an equitable number of members from the United States and Canada, based approximately on proportionate net energy for load. All committees and other subgroups (except for those organized on other than a sector basis because sector representation will not bring together the necessary diversity of opinions, technical knowledge and experience in a particular subject area) must ensure that no two stakeholder sectors are able to control the vote on any matter, and no single sector is able to defeat a matter. With regard to committees and subgroups pertaining to development of, interpretation of, or compliance with standards, NERC shall provide a reasonable opportunity for membership from sectors desiring to participate. Committees and subgroups organized on other than a sector basis shall be reported to the NERC board and the Member Representatives Committee, along with the reasons for constituting the committee or subgroup in the manner chosen. In such cases and subject to reasonable restrictions necessary to accomplish the mission of such committee or subgroup, NERC shall provide a reasonable opportunity for additional participation, as members or official observers, for sectors not represented on the committee or subgroup.

1303. Procedures for Appointing Committee Members

Committee members shall be nominated and selected in a manner that is open, inclusive, and fair. Unless otherwise stated in these rules or approved by the board, all committee member appointments shall be approved by the board, and committee officers shall be appointed by the Chairman of the Board.

1304. Procedures for Conduct of Committee Business

1. Notice to the public of the dates, places, and times of meetings of all committees, and all nonconfidential material provided to committee members, shall be posted

on the Corporation's Web site at approximately the same time that notice is given to committee members. Meetings of all standing committees shall be open to the public, subject to reasonable limitations due to the availability and size of meeting facilities; provided that the meeting may be held in or adjourn to closed session to discuss matters of a confidential nature, including but not limited to personnel matters, compliance enforcement matters, litigation, or commercially sensitive or critical infrastructure information of any entity.

2. NERC shall maintain a set of procedures, approved by the board, to guide the conduct of business by standing committees.

1305. Committee Subgroups

Standing committees may appoint subgroups using the same principles as in Section 1302.

SECTION 1400 — AMENDMENTS TO THE NERC RULES OF PROCEDURE

1401. Proposals for Amendment or Repeal of Rules of Procedure

In accordance with the bylaws of NERC, requests to amend or repeal the rules of procedure may be submitted by (1) any ten members of NERC, which number shall include members from at least three membership segments, (2) the Member Representatives Committee, (3) a standing committee of NERC to whose function and purpose the rule pertains, or (4) an officer of the ERO.

1402. Approval of Amendment or Repeal of Rules of Procedure

Amendment to or repeal of rules of procedure shall be approved by the board after public notice and opportunity for comment in accordance with the bylaws of NERC. In approving changes to the rules of procedure, the board shall consider the inputs of the Member Representatives Committee, other ERO committees affected by the particular changes to the rules, and other stakeholders as appropriate. After board approval, the amendment or repeal shall be submitted to the ERO governmental authorities for approval, where authorized by legislation or agreement. No amendment to or repeal of the rules of procedure shall be effective until it has been approved by the applicable ERO governmental authorities.

1403. Alternative Procedure for Violation Risk Factors

In the event the standards development process fails to produce violation risk factors for a particular standard in a timely manner, the Board of Trustees may adopt violation risk factors for that standard after notice and opportunity for comment. In adopting violation risk factors, the board shall consider the inputs of the Member Representatives Committee and affected stakeholders.

SECTION 1500 — CONFIDENTIAL INFORMATION

1501. Definitions

1. **Confidential information** means (i) confidential business and market information; (ii) critical energy infrastructure information; (iii) personnel information that identifies or could be used to identify a specific individual, or reveals personnel, financial, medical, or other personal information; (iv) work papers, including any records produced for or created in the course of an evaluation or audit; (v) investigative files, including any records produced for or created in the course of an investigation; or (vi) cybersecurity incident information; provided, that public information developed or acquired by an entity shall be excluded from this definition.
2. **Confidential business and market information** means any information that pertains to the interests of any entity, that was developed or acquired by that entity, and that is proprietary or competitively sensitive.
3. **Critical energy infrastructure information** means specific engineering, vulnerability, or detailed design information about proposed or existing critical infrastructure that (i) relates details about the production, generation, transportation, transmission, or distribution of energy; (ii) could be useful to a person in planning an attack on critical infrastructure; and (iii) does not simply give the location of the critical infrastructure.
4. **Critical infrastructure** means existing and proposed systems and assets, whether physical or virtual, the incapacity or destruction of which would negatively affect security, economic security, public health or safety, or any combination of those matters.
5. **Cybersecurity incident information** means any information related to, describing, or which could be used to plan or cause a cybersecurity incident as defined in 18 C.F.R. § 39.1.

1502. Protection of Confidential Information

1. **Identification of Confidential Information** — An owner, operator, or user of the bulk power system and any other party (the “submitting entity”) shall mark as confidential any information that it submits to NERC or a regional entity (the “receiving entity”) that it reasonably believes contains confidential information as defined by these rules, indicating the category or categories defined in Section 1501 in which the information falls. If the information is subject to a prohibition on public disclosure in the Commission-approved rules of a regional transmission organization or independent system operator or a similar prohibition in applicable federal, state, or provincial laws, the submitting entity shall so indicate and provide supporting references and details.

2. **Confidentiality** — Except as provided herein, a receiving entity shall keep in confidence and not copy, disclose, or distribute any confidential information or any part thereof without the permission of the submitting entity, except as otherwise legally required.
3. **Information no longer Confidential** – If a submitting entity concludes that information for which it had sought confidential treatment no longer qualifies for that treatment, the submitting entity shall promptly so notify NERC or the relevant regional entity.

1503. Requests for Information

1. **Limitation** — A receiving entity shall make information available only to one with a demonstrated need for access to the information from the receiving entity.
2. **Form of Request** — A person with such a need may request access to information by using the following procedure:
 - 2.1 The request must be in writing and clearly marked “Request for Information.”
 - 2.2 The request must identify the individual or entity that will use the information, explain the requester’s need for access to the information, explain how the requester will use the information in furtherance of that need, and state whether the information is publicly available or available from another source or through another means. If the requester seeks access to information that is subject to a prohibition on public disclosure in the Commission-approved rules of a regional transmission organization or independent system operator or a similar prohibition in applicable federal, state, or provincial laws, the requester shall describe how it qualifies to receive such information.
 - 2.3 The request must stipulate that, if the requester does not seek public disclosure, the requester will maintain as confidential any information received for which a submitting party has made a claim of confidentiality in accordance with NERC’s rules. As a condition to gaining access to such information, a requester shall execute a non-disclosure agreement in a form approved by NERC’s board of trustees.
3. **Notice and Opportunity for Comment** — Prior to any decision to disclose information marked as confidential, the receiving entity shall provide written notice to the submitting entity and an opportunity for the submitting entity to either waive objection to disclosure or provide comments as to why the confidential information should not be disclosed. Failure to provide such comments or otherwise respond is not deemed waiver of the claim of confidentiality.

4. **Determination by ERO or Regional Entity** — Based on the information provided by the requester under Rule 1503.2, any comments provided by the submitting entity, and any other relevant available information, the chief executive officer or his or her designee of the receiving entity shall determine whether to disclose such information.
5. **Appeal** — A person whose request for information is denied in whole or part may appeal that determination to the President of NERC (or the President’s designee) within 30 days of the determination. Appeals filed pursuant to this Rule must be in writing, addressed to the President of NERC (or the President’s designee), and clearly marked “Appeal of Information Request Denial.”

NERC will provide written notice of such appeal to the submitting entity and an opportunity for the submitting entity to either waive objection to disclosure or provide comments as to why the confidential information should not be disclosed; provided that any such comments must be received within 30 days of the notice and any failure to provide such comments or otherwise respond is not deemed a waiver of the claim of confidentiality.

The President of NERC (or the President’s designee) will make a determination with respect to any appeal within 30 days. In unusual circumstances, this time limit may be extended by the President of NERC (or the President’s designee), who will send written notice to the requester setting forth the reasons for the extension and the date on which a determination on the appeal is expected.

6. **Disclosure of Information** — In the event the receiving entity, after following the procedures herein, determines to disclose information designated as confidential information, it shall provide the submitting entity no fewer than 21 days’ written notice prior to releasing the information in order to enable such submitting entity to (a) seek an appropriate protective order or other remedy, (b) consult with the receiving entity with respect to taking steps to resist or narrow the scope of such request or legal process, or (c) waive compliance, in whole or in part, with the terms of this Rule. Should a receiving entity be required to disclose confidential information, or should the submitting entity waive objection to disclosure, the receiving entity shall furnish only that portion of the confidential information which the receiving entity’s counsel advises is legally required.
7. **Posting of Determinations on Requests for Disclosure of Confidential Information** — Upon making its determination on a request for disclosure of confidential information, NERC or the regional entity, as applicable, shall (i) notify the requester that the request for disclosure is granted or denied, (ii) publicly post any determination to deny the request to disclose confidential information, including in such posting an explanation of the reasons for the denial (but without in such explanation disclosing the confidential information), and (iii) publicly post any determination that information claimed by the submitting entity to be confidential information is not confidential information (but without in such

posting disclosing any information that has been determined to be confidential information).

1504. Employees, Contractors and Agents

A receiving entity shall ensure that its officers, trustees, directors, employees, subcontractors and subcontractors' employees, and agents to whom confidential information is exposed are under obligations of confidentiality that are at least as restrictive as those contained herein.

1505. Provision of Information to FERC and Other Governmental Authorities

1. **Request** — A request from FERC for reliability information with respect to owners, operators, and users of the bulk power system within the United States is authorized by Section 215 of the Federal Power Act. Other applicable ERO governmental authorities may have similar authorizing legislation that grants a right of access to such information. Unless otherwise directed by FERC or its staff or the other ERO governmental authority requesting the information, upon receiving such a request, a receiving entity shall provide contemporaneous notice to the applicable submitting entity. In its response to such a request, a receiving entity shall preserve any mark of confidentiality and shall notify FERC or other appropriate governmental authorities that the submitting entity has marked the information as confidential.
2. **Continued Confidentiality** — Each receiving entity shall continue to treat as confidential all confidential information that it has submitted to NERC or to FERC or another appropriate ERO governmental authority, until such time as FERC or the other appropriate ERO governmental authority authorizes disclosure of such information.

1506. Permitted Disclosures

1. **Confirmed Violations** — Nothing in this Section 1500 shall prohibit the disclosure of a violation at the point when the matter is filed with an appropriate governmental authority as a notice of penalty, the “violator” admits to the violation, or the alleged violator and NERC or the regional entity reach a settlement regarding the violation.
2. **Compliance Information** — NERC and the regional entities are authorized to exchange confidential information related to evaluations, audits, and investigations in furtherance of the compliance and enforcement program, on condition they continue to maintain the confidentiality of such information.

1507. Remedies for Improper Disclosure

Any person engaged in NERC or regional entity activity under section 215 of the Federal Power Act or the equivalent laws of other appropriate governmental authorities who improperly discloses information determined to be confidential may lose access to confidential information on a temporary or permanent basis and may be subject to

adverse personnel action, including suspension or termination. Nothing in Section 1500 precludes an entity whose information was improperly disclosed from seeking a remedy in an appropriate court.

SECTION 1600 — REQUESTS FOR DATA OR INFORMATION

1601. Scope of a NERC or Regional Entity Request for Data or Information

Within the United States, NERC and regional entities may request data or information that is necessary to meet their obligations under Section 215 of the Federal Power Act, as authorized by Section 39.2(d) of the Commission’s regulations, 18 C.F.R. § 39.2(d). In other jurisdictions NERC and regional entities may request comparable data or information, using such authority as may exist pursuant to these rules and as may be granted by ERO governmental authorities in those other jurisdictions. The provisions of Section 1600 shall not apply to requirements contained in any Reliability Standard to provide data or information; the requirements in the Reliability Standards govern. The provisions of Section 1600 shall also not apply to data or information requested in connection with a compliance or enforcement action under Section 215 of the Federal Power Act, Section 400 of these Rules of Procedure, or any procedures adopted pursuant to those authorities, in which case the Rules of Procedure applicable to the production of data or information for compliance and enforcement actions shall apply.

1602. Procedure for Authorizing a NERC Request for Data or Information

1. NERC shall provide a proposed request for data or information or a proposed modification to a previously-authorized request, including the information specified in paragraph 1602.2.1 or 1602.2.2 as applicable, to the Commission’s Office of Electric Reliability at least twenty-one (21) days prior to initially posting the request or modification for public comment. Submission of the proposed request or modification to the Office of Electric Reliability is for the information of the Commission. NERC is not required to receive any approval from the Commission prior to posting the proposed request or modification for public comment in accordance with paragraph 1602.2 or issuing the request or modification to reporting entities following approval by the Board of Trustees.
2. NERC shall post a proposed request for data or information or a proposed modification to a previously authorized request for data or information for a forty-five (45) day public comment period.
 - 2.1. A proposed request for data or information shall contain, at a minimum, the following information: (i) a description of the data or information to be requested, how the data or information will be used, and how the availability of the data or information is necessary for NERC to meet its obligations under applicable laws and agreements; (ii) a description of how the data or information will be collected and validated; (iii) a description of the entities (by functional class and jurisdiction) that will be required to provide the data or information (“reporting entities”); (iv) the schedule or due date for the data or information; (v) a description of any restrictions on disseminating the data or information (e.g., “confidential,” “critical energy infrastructure information,” “aggregating”

or “identity masking”); and (vi) an estimate of the relative burden imposed on the reporting entities to accommodate the data or information request.

- 2.2. A proposed modification to a previously authorized request for data or information shall explain (i) the nature of the modifications; (ii) an estimate of the burden imposed on the reporting entities to accommodate the modified data or information request, and (iii) any other items from paragraph 1.1 that require updating as a result of the modifications.
3. After the close of the comment period, NERC shall make such revisions to the proposed request for data or information as are appropriate in light of the comments. NERC shall submit the proposed request for data or information, as revised, along with the comments received, NERC’s evaluation of the comments and recommendations, to the Board of Trustees.
4. In acting on the proposed request for data or information, the Board of Trustees may authorize NERC to issue it, modify it, or remand it for further consideration.
5. NERC may make minor changes to an authorized request for data or information without board approval. However, if a reporting entity objects to NERC in writing to such changes within 21 days of issuance of the modified request, such changes shall require board approval before they are implemented.
6. Authorization of a request for data or information shall be final unless, within thirty (30) days of the decision by the Board of Trustees, an affected party appeals the authorization under this Section 1600 to the ERO governmental authority.

1603. Owners, Operators, and Users to Comply

Owners, operators, and users of the bulk power system registered on the NERC Compliance Registry shall comply with authorized requests for data and information. In the event a reporting entity within the United States fails to comply with an authorized request for data or information under Section 1600, NERC may request the Commission to exercise its enforcement authority to require the reporting entity to comply with the request for data or information and for other appropriate enforcement action by the Commission. NERC will make any request for the Commission to enforce a request for data or information through a non-public submission to the Commission’s enforcement staff.

1604. Requests by Regional Entity for Data or Information

1. A regional entity may request that NERC seek authorization for a request for data or information to be applicable within the footprint of the regional entity, either as a freestanding request or as part of a proposed NERC request for data or information. Any such request must be consistent with this Section 1600.
2. A regional entity may also develop its own procedures for requesting data or information, but any such procedures must include at least the same procedural

elements as are included in this Section 1600. Any such regional entity procedures or changes to such procedures shall be submitted to NERC for approval. Upon approving such procedures or changes thereto, NERC shall file the proposed procedures or proposed changes for approval by the Commission and any other ERO governmental authorities applicable to the regional entity. The regional entity procedures or changes to such procedures shall not be effective in a jurisdiction until approved by, and in accordance with any revisions directed by, the Commission or other ERO governmental authority.

1605. Confidentiality

If the approved data or information request includes a statement under Section 1602.1.1(v) that the requested data or information will be held confidential or treated as critical energy infrastructure information, then the applicable provisions of Section 1500 will apply without further action by a submitting entity. A submitting entity may designate any other data or information as confidential pursuant to the provisions of Section 1500, and NERC or the regional entity shall treat that data or information in accordance with Section 1500. NERC or a regional entity may utilize additional protective procedures for handling particular requests for data or information as may be necessary under the circumstances.

1606. Expedited Procedures for Requesting Time-Sensitive Data or Information

1. In the event NERC or a regional entity must obtain data or information by a date or within a time period that does not permit adherence to the time periods specified in Section 1602, the procedures specified in Section 1606 may be used to obtain the data or information. Without limiting the circumstances in which the procedures in Section 1606 may be used, such circumstances include situations in which it is necessary to obtain the data or information (in order to evaluate a threat to the reliability or security of the bulk-power system, or to comply with a directive in an order issued by the Commission or by another ERO governmental authority) within a shorter time period than possible under Section 1602. The procedures specified in Section 1606 may only be used if authorized by the NERC Board of Trustees prior to activation of such procedures.
2. Prior to posting a proposed request for data or information, or a modification to a previously-authorized request, for public comment under Section 1606, NERC shall provide the proposed request or modification, including the information specified in paragraph 1602.2.1 or 1602.2.2 as applicable, to the Commission's Office of Electric Reliability. The submission to the Commission's Office of Electric Reliability shall also include an explanation of why it is necessary to use the expedited procedures of Section 1606 to obtain the data or information. The submission shall be made to the Commission's Office of Electric Reliability as far in advance, up to twenty-one (21) days, of the posting of the proposed request or modification for public comments as is reasonably possible under the circumstances, but in no event less than two (2) days in advance of the public posting of the proposed request or modification.

3. NERC shall post the proposed request for data or information or proposed modification to a previously-authorized request for data or information for a public comment period that is reasonable in duration given the circumstances, but in no event shorter than five (5) days. The proposed request for data or information or proposed modification to a previously-authorized request for data or information shall include the information specified in paragraph 1602.2.1 or 1602.2.2, as applicable, and shall also include an explanation of why it is necessary to use the expedited procedures of Section 1606 to obtain the data or information.
4. The provisions of paragraphs 1602.3, 1602.4, 1602.5 and 1602.6 shall be applicable to a request for data or information or modification to a previously-authorized request for data or information developed and issued pursuant to Section 1606, except that (a) if NERC makes minor changes to an authorized request for data or information without board approval, such changes shall require board approval if a reporting entity objects to NERC in writing to such changes within five (5) days of issuance of the modified request; and (b) authorization of the request for data or information shall be final unless an affected party appeals the authorization of the request by the Board of Trustees to the ERO governmental authority within five (5) days following the decision of the Board of Trustees authorizing the request, which decision shall be promptly posted on NERC's web site.

1507.	Remedies for Improper Disclosure.....	898783
SECTION 1600 — REQUESTS FOR DATA OR INFORMATION		918985
1601.	Scope of a NERC or Regional Entity Request for Data or Information	918985
1602.	Procedure for Authorizing a NERC Request for Data or Information.....	918985
1603.	Owners, Operators, and Users to Comply.....	929086
1604.	Requests by Regional Entity for Data or Information	929086
1605.	Confidentiality	939187
1606.	Expedited Procedures for Requesting Time-Sensitive Data or Information.....	939187

SECTION 100 — APPLICABILITY OF RULES OF PROCEDURE

NERC and NERC members shall comply with these rules of procedure. Each regional entity shall comply with these rules of procedure as applicable to functions delegated to the regional entity by NERC or as required by an appropriate governmental authority or as otherwise provided.

Each bulk power system owner, operator, and user shall comply with all rules of procedure of NERC that are made applicable to such entities by approval pursuant to applicable legislation or regulation, or pursuant to agreement.

Any entity that is unable to comply or that is not in compliance with a NERC rule of procedure shall immediately notify NERC in writing, stating the rule of concern and the reason for not being able to comply with the rule.

NERC shall evaluate each case and inform the entity of the results of the evaluation. If NERC determines that a rule has been violated, or cannot practically be complied with, NERC shall notify the applicable governmental authorities and take such other actions as NERC deems appropriate to address the situation.

NERC shall comply with each approved reliability standard that identifies NERC or the electric reliability organization as a responsible entity. Regional Entities shall comply with each approved reliability standard that identifies Regional Entities as responsible entities. A violation by NERC or a Regional Entity of such a reliability standard shall constitute a violation of these Rules of Procedure.

SECTION 200 — DEFINITIONS OF TERMS

201. General

For purposes of NERC rules of procedure, the terms defined in Section 202 shall have the meaning set forth therein. Other terms are defined within particular sections of the rules of procedure. Other terms used but not defined in the rules of procedure shall be defined in NERC's Bylaws, the NERC Glossary of Terms Used in Reliability Standards adopted in conjunction with NERC's Reliability Standards, or in accordance with their commonly understood and used technical meanings in the electric power industry, including applicable codes and standards.

202. Specific Definitions

“Board” means the Board of Trustees of NERC.

“Bulk power system” means facilities and control systems necessary for operating an interconnected electric energy supply and transmission network (or any portion thereof), and electric energy from generating facilities needed to maintain transmission system reliability. The term does not include facilities used in the local distribution of electric energy.

“Canadian” means one of the following: (a) a company or association incorporated or organized under the laws of Canada, or its designated representative(s) irrespective of nationality; (b) an agency of a federal, provincial, or local government in Canada, or its designated representative irrespective(s) of nationality; or (c) a self-representing individual who is a Canadian citizen residing in Canada.

“Confirmed violation” is one for which an entity has: 1) accepted the finding of the violation by a regional entity or NERC and will not seek an appeal, or 2) completed the [hearing and appeals process within NERC](#), or 3) allowed the time for submitting an appeal to ~~NERC to expire~~, or 4) [admitted to the violation in a settlement agreement](#).

“Electric reliability organization” or “ERO” means the organization that is certified by the Commission under Section 39.3 of its regulations, the purpose of which is to establish and enforce Reliability Standards for the bulk power system in the United States. The organization may also have received recognition by applicable governmental authorities in Canada and Mexico to establish and enforce reliability standards for the bulk power systems of the respective countries.

“Entity variance” means an aspect of a reliability standard that applies only within a particular entity or a subset of entities within a limited portion of a regional entity, such as a variance that would apply to a regional transmission organization or particular market or to a subset of bulk power system owners, operators or users. An entity variance may not be inconsistent with or less stringent than the reliability standards as it would otherwise exist without the entity variance. An entity variance shall be approved only through the NERC standards development procedure and shall be made part of the NERC reliability standards.

“ERO governmental authority” is a government agency that has subject matter jurisdiction over the reliability of the bulk power system within its jurisdictional territory. In the United States, the ERO governmental authority is the Federal Energy Regulatory Commission. In Canada, the ERO governmental authority resides with applicable federal and provincial governments who may delegate duties and responsibilities to other entities. Use of the term is intended to be inclusive of all applicable authorities in the United States, Canada, and Mexico, and is not restricted to those listed here.

“Net Energy for Load” or “NEL” means net generation of an electric system plus energy received from others less energy delivered to others through interchange. It includes system losses but excludes energy required for the storage of energy at energy storage facilities.

“Reliable operation” means operating the elements of the bulk power system within equipment and electric system thermal, voltage, and stability limits so that instability, uncontrolled separation, or cascading failures of such system will not occur as a result of a sudden disturbance, including a cyber security incident, or unanticipated failure of system elements.

“Regional criteria” means reliability requirements developed by a regional entity that are necessary to implement, to augment, or to comply with reliability standards, but which are not reliability standards. Such regional criteria may be necessary to account for physical differences in the bulk power system but are not inconsistent with reliability standards nor do they result in lesser reliability. Such regional criteria are not enforceable pursuant to NERC-delegated authorities, but may be enforced through other available mechanisms. Regional criteria may include specific acceptable operating or planning parameters, guides, agreements, protocols or other documents.

“Regional reliability standard” means a type of reliability standards that is applicable only within a particular regional entity or group of regional entities. A regional reliability standard may augment, add detail to, or implement another reliability standard or cover matters not addressed by other reliability standards. Regional reliability standards, upon adoption by NERC and approval by the applicable ERO governmental authority(ies), shall be reliability standards and shall be enforced within the applicable regional entity or regional entities pursuant to delegated authorities.

“Reliability standard” means a requirement to provide for reliable operation of the bulk power system, including without limiting the foregoing, requirements for the operation of existing bulk power system facilities, including cyber security protection, and including the design of planned additions or modifications to such facilities to the extent necessary for reliable operation of the bulk power system, but the term does not include any requirement to enlarge bulk power system facilities or to construct new transmission capacity or generation capacity. A reliability standard shall not be effective in the United States until approved by the Federal Energy Regulatory Commission and shall not be effective in other jurisdictions until made or allowed to become effective by the applicable governmental authority.

“Variance” means an aspect or element of a reliability standard that applies only within a particular regional entity or group of regional entities, or to a particular entity or class of entities. A variance allows an alternative approach to meeting the same reliability objective as the reliability standard, and is typically necessitated by a physical difference. A variance is embodied within a reliability standard and as such, if adopted by NERC and approved by the ERO governmental authority, shall be enforced within the applicable regional entity or regional entities pursuant to delegated authority.

SECTION 300 — RELIABILITY STANDARDS DEVELOPMENT

301. General

NERC shall develop and maintain reliability standards that apply to bulk power system owners, operators, and users and that enable NERC and regional entities to measure the reliability performance of bulk power system owners, operators, and users; and to hold them accountable for reliable operation of the bulk power systems. The reliability standards shall be technically excellent, timely, just, reasonable, not unduly discriminatory or preferential, in the public interest, and consistent with other applicable standards of governmental authorities.

302. Essential Attributes for Technically Excellent Reliability Standards

1. **Applicability** — Each reliability standard shall clearly identify the functional classes of entities responsible for complying with the reliability standard, with any specific additions or exceptions noted. Such functional classes¹ include: reliability coordinators, balancing authorities, transmission operators, transmission owners, generator operators, generator owners, interchange authorities, transmission service providers, market operators, planning authorities, transmission planners, resource planners, load-serving entities, purchasing-selling entities, and distribution providers. Each reliability standard shall also identify the geographic applicability of the standard, such as the entire North American bulk power system, an interconnection, or within a regional entity area. A standard may also identify any limitations on the applicability of the standard based on electric facility characteristics.
2. **Reliability Objectives** — Each reliability standard shall have a clear statement of purpose that shall describe how the standard contributes to the reliability of the bulk power system. The following general objectives for the bulk power system provide a foundation for determining the specific objective(s) of each reliability standard:
 - 2.1 **Reliability Planning and Operating Performance** — Bulk power systems shall be planned and operated in a coordinated manner to perform reliably under normal and abnormal conditions.
 - 2.2 **Frequency and Voltage Performance** — The frequency and voltage of bulk power systems shall be controlled within defined limits through the balancing of real and reactive power supply and demand.
 - 2.3 **Reliability Information** — Information necessary for the planning and operation of reliable bulk power systems shall be made available to those entities responsible for planning and operating bulk power systems.

¹ These functional classes of entities are derived from NERC's Reliability Functional Model. When a standard identifies a class of entities to which it applies, that class must be defined in the Glossary of Terms Used in Reliability Standards.

- 2.4 **Emergency Preparation** — Plans for emergency operation and system restoration of bulk power systems shall be developed, coordinated, maintained, and implemented.
- 2.5 **Communications and Control** — Facilities for communication, monitoring, and control shall be provided, used, and maintained for the reliability of bulk power systems.
- 2.6 **Personnel** — Personnel responsible for planning and operating bulk power systems shall be trained and qualified, and shall have the responsibility and authority to implement actions.
- 2.7 **Wide-area View** — The reliability of the bulk power systems shall be assessed, monitored, and maintained on a wide-area basis.
- 2.8 **Security** — Bulk power systems shall be protected from malicious physical or cyber attacks.
3. **Performance Requirement or Outcome** — Each reliability standard shall state one or more performance requirements, which if achieved by the applicable entities, will provide for a reliable bulk power system, consistent with good utility practices and the public interest. Each requirement is not a “lowest common denominator” compromise, but instead achieves an objective that is the best approach for bulk power system reliability, taking account of the costs and benefits of implementing the proposal.
4. **Measurability** — Each performance requirement shall be stated so as to be objectively measurable by a third party with knowledge or expertise in the area addressed by that requirement. Each performance requirement shall have one or more associated measures used to objectively evaluate compliance with the requirement. If performance can be practically measured quantitatively, metrics shall be provided to determine satisfactory performance.
5. **Technical Basis in Engineering and Operations** — Each reliability standard shall be based upon sound engineering and operating judgment, analysis, or experience, as determined by expert practitioners in that particular field.
6. **Completeness** — Reliability standards shall be complete and self-contained. The standards shall not depend on external information to determine the required level of performance.
7. **Consequences for Noncompliance** — In combination with guidelines for penalties and sanctions, as well as other ERO and regional entity compliance documents, the consequences of violating a standard are clearly presented to the entities responsible for complying with the standards.
8. **Clear Language** — Each reliability standard shall be stated using clear and unambiguous language. Responsible entities, using reasonable judgment and in

keeping with good utility practices, are able to arrive at a consistent interpretation of the required performance.

9. **Practicality** — Each reliability standard shall establish requirements that can be practically implemented by the assigned responsible entities within the specified effective date and thereafter.
10. **Consistent Terminology** — To the extent possible, reliability standards shall use a set of standard terms and definitions that are approved through the NERC reliability standards development process.

303. Relationship between Reliability Standards and Competition

To ensure reliability standards are developed with due consideration of impacts on competition, to ensure standards are not unduly discriminatory or preferential, and recognizing that reliability is an essential requirement of a robust North American economy, each reliability standard shall meet all of these market-related objectives:

1. **Competition** — A reliability standard shall not give any market participant an unfair competitive advantage.
2. **Market Structures** — A reliability standard shall neither mandate nor prohibit any specific market structure.
3. **Market Solutions** — A reliability standard shall not preclude market solutions to achieving compliance with that standard.
4. **Commercially Sensitive Information** — A reliability standard shall not require the public disclosure of commercially sensitive information or other confidential information. All market participants shall have equal opportunity to access commercially non-sensitive information that is required for compliance with reliability standards.
5. **Adequacy** — NERC shall not set standards defining an adequate amount of, or requiring expansion of, bulk power system resources or delivery capability.

304. Essential Principles for the Development of Reliability Standards

NERC shall develop reliability standards in accordance with the NERC *Reliability Standards Development Procedure*, which is incorporated into these rules as **Appendix 3A**. Appeals in connection with the development of a reliability standard shall also be conducted in accordance with the NERC *Reliability Standards Development Procedure*. Any amendments or revisions to the *Reliability Standards Development Procedure* shall be consistent with the following essential principles:

1. **Openness** — Participation shall be open to all persons who are directly and materially affected by the reliability of the North American bulk power system. There shall be no undue financial barriers to participation. Participation shall not be conditional upon membership in NERC or any other organization, and shall

not be unreasonably restricted on the basis of technical qualifications or other such requirements.

2. **Transparency** — The process shall be transparent to the public.
3. **Consensus-building** — The process shall build and document consensus for each standard, both with regard to the need and justification for the standard and the content of the standard.
4. **Fair Balance of Interests** — The process shall fairly balance interests of all stakeholders and shall not be dominated by any single interest category.
5. **Due Process** — Development of standards shall provide reasonable notice and opportunity for any person with a direct and material interest to express views on a proposed standard and the basis for those views, and to have that position considered in the development of the standards.
6. **Timeliness** — Development of standards shall be timely and responsive to new and changing priorities for reliability of the bulk power system.

305. Registered Ballot Body

NERC reliability standards shall be approved by a registered ballot body prior to submittal to the board and then to ERO governmental authorities for their approval, where authorized by applicable legislation or agreement. This Section 305 sets forth the rules pertaining to the composition of, and eligibility to participate in, the registered ballot body.

1. **Eligibility to Vote on Standards** — Any person or entity may join the registered ballot body to vote on standards, whether or not such person or entity is a member of NERC.
2. **Inclusive Participation** — The segment qualification guidelines are inclusive; i.e., any entity with a legitimate interest in the reliability of the bulk power system that can meet any one of the eligibility criteria for a segment is entitled to belong to and vote in each segment for which it qualifies, subject to limitations defined in Sections 305.3 and 305.5.
3. **General Criteria for Registered Ballot Body Membership** — The general criteria for membership in the segments are:
 - 3.1 **Multiple Segments** — A corporation or other organization with integrated operations or with affiliates that qualifies to belong to more than one segment (e.g., transmission owners and load serving entities) may join once in each segment for which it qualifies, provided that each segment constitutes a separate membership and the organization is represented in each segment by a different representative. Affiliated entities are collectively limited to one membership in each segment for which they are qualified.

- 3.2 **Withdrawing from a Segment or Changing Segments** — After its initial registration in a segment, each registered participant may elect to withdraw from a segment or apply to change segments at any time.
- 3.3 **Review of Segment Criteria** — The board shall review the qualification guidelines and rules for joining segments at least every three years to ensure that the process continues to be fair, open, balanced, and inclusive. Public input will be solicited in the review of these guidelines.
4. **Proxies for Voting on Standards** — Any registered participant may designate an agent or proxy to vote on its behalf. There are no limits on how many proxies an agent may hold. However, for the proxy to be valid, NERC must have in its possession written documentation signed by the representative of the registered participant that the voting right by proxy has been transferred from the registered participant to the agent.
5. **Stakeholder Segments** — The specific criteria for membership in each registered ballot body segment are defined in the *Reliability Standards Development Procedure* in **Appendix 3A**.
6. **Review of Stakeholder Segment Entries**
NERC shall review all applications for joining the registered ballot body, and shall make a determination of whether the applicant's self-selection of a segment satisfies at least one of the guidelines to belong to that segment. The entity shall then become eligible to participate as a voting member of that segment. The Standards Committee shall resolve disputes regarding eligibility for membership in a segment, with the applicant having the right of appeal to the board.

306. Standards Committee

The Standards Committee shall provide oversight of the reliability standards development process to ensure stakeholder interests are fairly represented. The Standards Committee shall not under any circumstance change the substance of a draft or approved standard.

1. **Membership** — The Standards Committee is a representative committee comprising representatives of two members of each of the segments in the registered ballot body.
2. **Elections** — Standards Committee members are elected for staggered (one per segment per year) two-year terms by the respective stakeholder segments in accordance with the *Procedure for the Election of Members of the NERC Standards Committee*, which is incorporated into these rules as **Appendix 2**. Segments may use their own election procedure if such a procedure is ratified by two-thirds of the members of a segment and approved by the board.
3. **Canadian Representation**
 - 3.1 **Provision for Sufficient Canadian Representation** — If any regular election of Standards Committee members does not result in at least two

Canadian members on the Standards Committee, the Canadian nominees who were not elected but who received the next highest percentage of votes within their respective segment(s) will be designated as additional members of the Standards Committee, as needed to achieve a total of two Canadian members.

- 3.2 **Terms of Specially Designated Canadian Members** — Each specially designated Canadian member of the Standards Committee shall have a term ending with the next annual election.
- 3.3 **Segment Preference** — If any segment has an unfilled representative position on the Standards Committee following the annual election, the first preference is to assign each specially designated Canadian representative to a segment with an unfilled representative position for which his or her organization qualifies.
- 3.4 **Rights of Specially Designated Canadian Members** — Any specially designated Canadian members of the Standards Committee shall have the same rights and obligations as all other members of the Standards Committee.
4. **Open Meetings** — All meetings of the Standards Committee shall be open and publicly noticed on the NERC Web site.

307. Standards Process Manager

NERC shall assign a standards process manager to administer the development of reliability standards. The standards process manager shall be responsible for ensuring that the development and revision of standards are in accordance with the NERC *Reliability Standards Development Procedure*. The standards process manager shall work to achieve the highest degree of integrity and consistency of quality and completeness of the reliability standards. The standards process manager shall coordinate with any regional entities that develop regional reliability standards to ensure those standards are effectively integrated with the NERC reliability standards.

308. Steps in the Development of Reliability Standards

1. **Procedure** — NERC shall develop reliability standards through the process set forth in the NERC *Reliability Standards Development Procedure* (**Appendix 3A**). The procedure includes a provision for approval of urgent action standards that can be completed within 60 days and emergency actions that may be further expedited.
2. **Board Approval** — Reliability standards or revisions to reliability standards approved by the ballot pool in accordance with the *Reliability Standards Development Procedure* shall be submitted for approval by the board. No reliability standard or revision to a reliability standard shall be effective unless approved by the board.

3. **Governmental Approval** — After receiving board approval, a reliability standard or revision to a reliability standard shall be submitted to all applicable ERO governmental authorities in accordance with Section 309. No reliability standard or revision to a reliability standard shall be effective within a geographic area over which an ERO governmental authority has jurisdiction unless approved by such ERO governmental authority or is otherwise made effective pursuant to the laws applicable to such ERO governmental authority.

309. Filing of Reliability Standards for Approval by ERO Governmental Authorities

1. **Filing of Reliability Standards for Approval** — Where authorized by applicable legislation or agreement, NERC shall file with the applicable ERO governmental authorities each reliability standard, modification to a reliability standard, or withdrawal of a standard that is approved by the board. Each filing shall be in the format required by the ERO governmental authority and shall include: a concise statement of the basis and purpose of the standard; the text of the standard; the implementation plan for the reliability standard; a demonstration that the standard meets the essential attributes of reliability standards as stated in Section 302; the drafting team roster; the ballot pool and final ballot results; and a discussion of public comments received during the development of the reliability standard and the consideration of those comments.
2. **Remanded Reliability Standards and Directives to Develop Standards** — If an ERO governmental authority remands a reliability standard to NERC or directs NERC to develop a reliability standard, NERC shall within five (5) business days notify all other applicable ERO governmental authorities, and shall within thirty (30) calendar days report to all ERO governmental authorities a plan and timetable for modification or development of the reliability standard. Standards that are remanded or directed by an ERO governmental authority shall be modified or developed using the *Reliability Standards Development Procedure*. NERC shall, during the development of a modification for the remanded standard or directed standard, consult with other ERO governmental authorities to coordinate any impacts of the proposed standards in those other jurisdictions. The urgent approval action procedure may be applied if necessary to meet a timetable for action required by the ERO governmental authorities, respecting to the extent possible the provisions in the standards development process for reasonable notice and opportunity for public comment, due process, openness, and a balance of interest in developing reliability standards.
3. **Directives to Develop Standards under Extraordinary Circumstances** — An ERO governmental authority may, on its own initiative, determine that extraordinary circumstances exist requiring expedited development of a reliability standard. In such a case, the applicable agency may direct the development of a standard within a certain deadline. NERC staff shall prepare the standards authorization request and seek a stakeholder sponsor for the request. If NERC is unable to find a sponsor for the proposed standard, NERC will be designated as the requestor. The proposed standard will then proceed through the standards development process, using the urgent and emergency action procedures

described in the *Reliability Standards Development Procedure* as necessary to meet the specified deadline. The timeline will be developed to respect, to the extent possible, the provisions in the standards development process for reasonable notice and opportunity for public comment, due process, openness, and a balance of interests in developing reliability standards.

- 3.1 Consistent with all reliability standards developed under the urgent or emergency action process, each of the three possible follow-up actions as documented in the *Reliability Standards Development Procedure* are to be completed through the standards development process and are subject to approval by the ERO governmental authorities in the U.S. and Canada.

310. Reliability Standards Annual Work Plan

NERC shall develop and provide an annual work plan for development of reliability standards to the applicable ERO governmental authorities. NERC shall consider the comments and priorities of the ERO governmental authorities in developing and updating the work plan. Each annual work plan shall include a progress report comparing results achieved to the prior year's plan.

311. Regional Entity Standards Development Procedures

1. **NERC Approval of Regional Entity Reliability Standards Development Procedure** — To enable a regional entity to develop regional reliability standards that are to be recognized and made part of NERC reliability standards, a regional entity may request NERC to approve a regional entity reliability standards development procedure.
2. **Public Notice and Comment on Regional Reliability Standards Development Procedure** — Upon receipt of such a request, NERC shall publicly notice and request comment on the proposed regional standards development procedure, allowing a minimum of 45 days for comment. The regional entity shall have an opportunity to resolve any objections identified in the comments and may choose to withdraw the request, revise the procedure and request another posting for comment, or submit the procedure, along with its consideration of any objections received, for approval by NERC.
3. **Evaluation of Regional Reliability Standards Development Procedure** — NERC shall evaluate whether a regional reliability standards development procedure meets the criteria listed below and shall consider stakeholder comments, any unresolved stakeholder objections, and the consideration of comments provided by the regional entity, in making that determination. If NERC determines the regional reliability standards development procedure meets these requirements, the procedure shall be submitted to the board for approval. The board shall consider the recommended action, stakeholder comments, any unresolved stakeholder comments, and the regional entity consideration of comments in determining whether to approve the regional reliability standards development procedure.

- 3.1 **Evaluation Criteria** — The regional reliability standards development procedure shall be:
- 3.1.1 **Open** — The regional reliability standards development procedure shall provide that any person or entity who is directly and materially affected by the reliability of the bulk power systems within the regional entity shall be able to participate in the development and approval of reliability standards. There shall be no undue financial barriers to participation. Participation shall not be conditional upon membership in the regional entity, a regional entity or any organization, and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements.
 - 3.1.2 **Inclusive** — The regional reliability standards development procedure shall provide that any person with a direct and material interest has a right to participate by expressing an opinion and its basis, having that position considered, and appealing through an established appeals process if adversely affected.
 - 3.1.3 **Balanced** — The regional reliability standards development procedure shall have a balance of interests and shall not permit any two interest categories to control the vote on a matter or any single interest category to defeat a matter.
 - 3.1.4 **Due Process** — The regional reliability standards development procedure shall provide for reasonable notice and opportunity for public comment. At a minimum, the procedure shall include public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of interested stakeholders.
 - 3.1.5 **Transparent** — All actions material to the development of regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the regional entity's Web site.
 - 3.1.6 **Accreditation of Regional Standards Development Procedure** — A regional entity's reliability standards development procedure that is accredited by the American National Standards Institute or the Standards Council of Canada shall be deemed to meet the criteria listed in this Section 311.3.1, although such accreditation is not a prerequisite for approval by NERC.
 - 3.1.7 **Use of NERC Procedure** — A regional entity may adopt the *NERC Reliability Standards Development Procedure* as the regional reliability standards development procedure, in which

case the regional entity's procedure shall be deemed to meet the criteria listed in this Section 311.3.1.

4. **Revisions of Regional Reliability Standards Development Procedures** — Any revision to a regional reliability standards development procedure shall be subject to the same approval requirements set forth in Sections 311.1 through 311.3.
5. **Duration of Regional Reliability Standards Development Procedures** — The regional reliability standards development procedure shall remain in effect until such time as it is replaced with a new version approved by NERC or it is withdrawn by the regional entity. The regional entity may, at its discretion, withdraw its regional reliability standards development procedure at any time.

312. Regional Reliability Standards

1. **Basis for Regional Reliability Standards** — Regional entities may propose regional reliability standards that set more stringent reliability requirements than the NERC reliability standard or cover matters not covered by an existing NERC reliability standard. Such regional reliability standards shall in all cases be approved by NERC and made part of the NERC reliability standards and shall be enforceable in accordance with the delegation agreement between NERC and the regional entity or other instrument granting authority over enforcement to the regional entity. No entities other than NERC and the regional entity shall be permitted to develop regional reliability standards that are enforceable under statutory authority delegated to NERC and the regional entity.
2. **Regional Reliability Standards That are Directed by a NERC Reliability Standard** — Although it is the intent of NERC to promote uniform reliability standards across North America, in some cases it may not be feasible to achieve a reliability objective with a reliability standard that is uniformly applicable across North America. In such cases, NERC may direct regional entities to develop regional reliability standards necessary to implement a NERC reliability standard. Such regional reliability standards that are developed pursuant to a direction by NERC shall be made part of the NERC reliability standards.
3. **Procedure for Developing an Interconnection-wide Regional Standard** — A regional entity organized on an interconnection-wide basis may propose a regional reliability standard for approval as a NERC reliability standard to be made mandatory for all applicable bulk power system owners, operators, and users within that interconnection.
 - 3.1 **Presumption of Validity** — An interconnection-wide regional reliability standard that is determined by NERC to be just, reasonable, and not unduly discriminatory or preferential, and in the public interest, and consistent with such other applicable standards of governmental authorities, shall be adopted as a NERC reliability standard. NERC shall rebuttably presume that a regional reliability standard developed, in accordance with a regional reliability standards development process approved by NERC, by a regional entity organized on an interconnection-

wide basis, is just, reasonable, and not unduly discriminatory or preferential, and in the public interest, and consistent with such other applicable standards of governmental authorities.

- 3.2 **Notice and Comment Procedure for Interconnection-wide Regional Reliability Standard** — NERC shall publicly notice and request comment on the proposed interconnection-wide regional reliability standard, allowing a minimum of 45 days for comment. NERC may publicly notice and post for comment the proposed regional reliability standard concurrent with similar steps in the regional entity’s reliability standards development process. The regional entity shall have an opportunity to resolve any objections identified in the comments and may choose to comment on or withdraw the request, revise the proposed regional reliability standard and request another posting for comment, or submit the proposed regional reliability standard along with its consideration of any objections received, for approval by NERC.
- 3.3 **Approval of Interconnection-wide Regional Reliability Standard by NERC** — NERC shall evaluate and recommend whether a proposed interconnection-wide regional reliability standard has been developed in accordance with all applicable procedural requirements and whether the regional entity has considered and resolved stakeholder objections that could serve as a basis for rebutting the presumption of validity of the regional reliability standard. The regional entity, having been notified of the results of the evaluation and recommendation concerning NERC proposed regional reliability standard, shall have the option of presenting the proposed regional reliability standard to the board for approval as a NERC reliability standard. The board shall consider the regional entity’s request, NERC’s recommendation for action on the regional reliability standard, any unresolved stakeholder comments, and the regional entity’s consideration of comments, in determining whether to approve the regional reliability standard as a NERC reliability standard.
- 3.4 **ERO Governmental Authority Approval** — An interconnection-wide regional reliability standard that has been approved by the board shall be filed with the applicable ERO governmental authorities for approval, where authorized by applicable legislation or agreement, and shall become effective when approved by such ERO governmental authorities or on a date set by the ERO governmental authorities.
- 3.5 **Enforcement of Interconnection-wide Regional Reliability Standard** — An interconnection-wide regional reliability standard that has been approved by the board and by the applicable ERO governmental authorities or is otherwise made effective within Canada as mandatory within a particular region shall be applicable and enforced as a NERC reliability standard within the region.

4. **Procedure for Developing Non-Interconnection-Wide Regional Reliability Standards**

Regional entities that are not organized on an interconnection-wide basis may propose regional reliability standards to apply within their respective regions. Such standards may be developed through the NERC reliability standards development procedure, or alternatively, through a regional reliability standards development procedure that has been approved by NERC.

4.1 **No Presumption of Validity** — Regional reliability standards that are not proposed to be applied on an interconnection-wide basis are not presumed to be valid but may be demonstrated by the proponent to be valid.

4.2 **Notice and Comment Procedure for Non-Interconnection-wide Regional Reliability Standards** — NERC shall publicly notice and request comment on the proposed regional reliability standard, allowing a minimum of 45 days for comment. NERC may publicly notice and post for comment the proposed regional reliability standard concurrent with similar steps in the regional entity's reliability standards development process. The regional entity shall have an opportunity to comment on or resolve any objections identified in the comments and may choose to withdraw the request, revise the proposed regional reliability standard and request another posting for comment, or submit the proposed regional reliability standard along with its consideration of any objections received, for approval by NERC.

4.3 **NERC Approval of Non-Interconnection-wide Regional Reliability Standards** — NERC shall evaluate and recommend whether a proposed non-Interconnection-wide regional reliability standard has been developed in accordance with all applicable procedural requirements and whether the regional entity has considered and resolved stakeholder objections. The regional entity, having been notified of the results of the evaluation and recommendation concerning proposed regional reliability standard, shall have the option of presenting the proposed regional reliability standard to the board for approval as a NERC reliability standard. The board shall consider the regional entity's request, the recommendation for action on the regional reliability standard, any unresolved stakeholder comments, and the regional entity's consideration of comments, in determining whether to approve the regional reliability standard as a NERC reliability standard.

4.4 **NERC Governmental Authority Approval** — A non-Interconnection-wide regional reliability standard that has been approved by the board shall be filed with the applicable ERO governmental authorities for approval, where authorized by applicable legislation or agreement, and shall become effective when approved by such ERO governmental authorities or on a date set by the ERO governmental authorities.

- 4.5 **Enforcement of Non-Interconnection-wide Regional Reliability Standards** — A non-Interconnection-wide regional reliability standard that has been approved by the board and by the applicable ERO governmental authorities or is otherwise made effective within Canada as mandatory within a particular region shall be applicable and enforced as a NERC reliability standard within the region.

5. **Appeals**

A Regional Entity shall have the right to appeal NERC's decision not to approve a proposed regional reliability standard or variance to the Commission or other applicable governmental authority.

313. Other Regional Criteria, Guides, Procedures, Agreements, Etc.

1. **Regional Criteria** — Regional entities may develop regional criteria that are necessary to implement, to augment, or to comply with reliability standards, but which are not reliability standards. Regional criteria may also address issues not within the scope of reliability standards, such as resource adequacy. Regional criteria may include specific acceptable operating or planning parameters, guides, agreements, protocols or other documents used to enhance the reliability of the regional bulk power system. These documents typically provide benefits by promoting more consistent implementation of the NERC reliability standards within the region. These documents are not NERC reliability standards, regional reliability standards, or regional variances, and therefore are not enforceable under authority delegated by NERC pursuant to delegation agreements and do not require NERC approval.
2. **Catalog of Regional Reliability Criteria** — NERC shall maintain a current catalog of regional reliability criteria. Regional entities shall provide a catalog listing of regional reliability criteria to NERC and shall notify NERC of changes to the listing. Regional entities shall provide any listed document to NERC upon written request.

314. Conflicts with Statutes, Regulations, and Orders

Notice of Potential Conflict — If a bulk power system owner, operator, or user determines that a NERC or regional reliability standard may conflict with a function, rule, order, tariff, rate schedule, legislative requirement or agreement that has been accepted, approved, or ordered by a governmental authority affecting that entity, the entity shall expeditiously notify the governmental authority, NERC, and the relevant regional entity of the conflict.

1. **Determination of Conflict** — NERC, upon request of the governmental authority, may advise the governmental authority regarding the conflict and propose a resolution of the conflict, including revision of the reliability standard if appropriate.
2. **Regulatory Precedence** — Unless otherwise ordered by a governmental authority, the affected bulk power system owner, operator, or user shall continue

to follow the function, rule, order, tariff, rate schedule, legislative requirement, or agreement accepted, approved, or ordered by the governmental authority until the governmental authority finds that a conflict exists and orders a remedy and such remedy is affected.

315. Revisions to NERC Reliability Standards Development Procedure

Any person or entity may submit a written request to modify NERC *Reliability Standards Development Procedure*. Consideration of the request and development of the revision shall follow the process defined in the NERC *Reliability Standards Development Procedure*. Upon approval by the board, the revision shall be submitted to the ERO governmental authorities for approval. Changes shall become effective only upon approval by the ERO governmental authorities or on a date designated by the ERO governmental authorities or as otherwise applicable in a particular jurisdiction.

316. Accreditation

NERC shall seek continuing accreditation of the NERC reliability standards development process by the American National Standards Institute and the Standards Council of Canada.

317. Five-Year Review of Standards

NERC shall complete a review of each NERC reliability standard at least once every five years from the effective date of the standard or the latest revision to the standard, whichever is later. The review process shall be conducted in accordance with the NERC *Reliability Standards Development Procedure*. The standards process manager shall be responsible for administration of the five-year review of reliability standards. As a result of this review, the NERC reliability standard shall be reaffirmed, revised, or withdrawn. If the review indicates a need to revise or withdraw the standard, a request for revision or withdrawal shall be prepared, submitted and addressed in accordance with the NERC *Reliability Standards Development Procedure*.

318. Coordination with the North American Energy Standards Board

NERC shall, through a memorandum of understanding, maintain a close working relationship with the North American Energy Standards Board and ISO/RTO Council to ensure effective coordination of wholesale electric business practice standards and market protocols with the NERC reliability standards.

319. Archived Standards Information

NERC shall maintain a historical record of reliability standards information that is no longer maintained on-line. For example, standards that expired or were replaced may be removed from the on-line system. Archived information shall be retained indefinitely as practical, but in no case less than five years or one complete standards review cycle from the date on which the standard was no longer in effect. Archived records of reliability standards information shall be available electronically within 30 days following the receipt by the standards process manager of a written request.

320. Alternate Method for Adopting Violation Risk Factors

In the event the standards development process fails to produce violation risk factors for a particular standard in a timely manner, the Board of Trustees may adopt violation risk factors for that standard using the procedures set out in Section 1400 of these Rules of Procedure.

SECTION 400 — COMPLIANCE ENFORCEMENT

401. Scope of the NERC Compliance Enforcement Program

1. **Components of the NERC Compliance Enforcement Program** — NERC shall develop and implement a NERC Compliance Monitoring and Enforcement Program to promote the reliability of the bulk power system by enforcing compliance with approved reliability standards in those regions of North American in which NERC and/or a regional entity (pursuant to a delegation agreement with NERC that has been approved by the applicable ERO governmental authority) has been given enforcement authority. There are four distinct parts of the NERC Monitoring and Compliance Enforcement Program: (1) NERC's oversight of the regional entity compliance programs (Section 402), (2) the definition of the required regional entity compliance enforcement program attributes (Section 403), (3) NERC's monitoring of regional entity compliance with reliability standards (Section 404), and (4) the monitoring of compliance with reliability standards that are applicable to NERC (Sections 405–406).
2. **Who Must Comply** — Where required by applicable legislation, regulation, rule or agreement, all bulk power system owners, operators, and users, regional entities, and NERC, are required to comply with all approved NERC reliability standards at all times. Regional reliability standards and regional variances approved by NERC and the applicable ERO governmental authority shall be considered NERC reliability standards and shall apply to all bulk power system owners, operators, or users responsible for meeting those standards within the regional entity boundaries, whether or not the bulk power system owner, operator, or user is a member of the regional entity.
3. **Data Access** — All bulk power system owners, operators, and users shall provide to NERC and the applicable regional entity such information as is necessary to monitor compliance with the reliability standards. NERC and the applicable regional entity will define the data retention and reporting requirements in the reliability standards and compliance reporting procedures.
4. **Role of Regional Entities in the Compliance Enforcement Program** — Each regional entity that has been delegated authority through a delegation agreement or other legal instrument approved by the applicable ERO governmental authority shall, in accordance with the terms of the approved delegation agreement, administer a regional entity compliance enforcement program to meet the NERC Compliance Monitoring and Enforcement Program goals and the requirements in this Section 400.
5. **Program Continuity** — NERC will ensure continuity of compliance monitoring and enforcement within the geographic boundaries of a regional entity in the event that NERC does not have a delegation agreement, or the regional entity withdraws from the agreement or does not operate its compliance enforcement program in accordance with the delegation agreement or other applicable requirements.

- 5.1 Should NERC not have a delegation agreement with a regional entity covering a geographic area, or a regional entity withdraws from an existing delegation agreement or the delegation agreement is otherwise terminated, NERC will directly administer the Compliance Monitoring and Enforcement Program applicable to owners, operators and users of the bulk-power system within that geographic area.
 1. This monitoring and enforcement will be accomplished by NERC and compliance staff from another approved regional entity.
 2. If an existing delegation agreement with a regional entity is terminating, the regional entity shall promptly provide to NERC all relevant compliance information regarding registered entities, contacts, prior compliance information and actions, mitigation plans, and remedial actions for the period in which the regional entity was responsible for administering the Compliance Monitoring and Enforcement Program.
 3. NERC will levy and collect all penalties directly and will utilize any penalty monies collected to offset the expenses of administering the compliance monitoring and enforcement program for the geographic area.
- 5.2 Should a regional entity seek to withdraw from its delegation agreement, NERC will seek agreement from another regional entity to amend its delegation agreement with NERC to extend that regional entity's boundaries for compliance monitoring and enforcement. In the event no regional entity is willing to accept this responsibility, NERC will administer the Compliance Monitoring and Enforcement Program within the geographical boundaries of the regional entity seeking to withdraw from the delegation agreement, in accordance with Section 401.5.1.
6. **Actively Monitored Requirements** — NERC, with input from the regional entities, stakeholders, and regulators, shall annually select a subset of the NERC reliability standards and requirements to be actively monitored and audited in the NERC annual compliance program. Compliance is required with all NERC reliability standards whether or not they are included in the subset of reliability standards and requirements designated to be actively monitored and audited in the NERC annual compliance program.
7. **Penalties, Sanctions, and Remedial Actions** — NERC and regional entities will apply penalties, sanctions, and remedial actions that bear a reasonable relation to the seriousness of a violation and take into consideration timely remedial efforts as defined in the NERC *Sanction Guidelines*, which is incorporated into these rules as **Appendix 4B**.
8. **Multiple Enforcement Actions** – A registered entity shall not be subject to an enforcement action by NERC and a regional entity for the same violation.
9. **Records** — NERC shall maintain a record of each compliance submission, including self-reported, possible, alleged, and confirmed, ~~and alleged~~ violations of

approved reliability standards; associated penalties, sanctions, remedial actions and settlements; and the status of mitigation actions.

10. Confidential Information — NERC will treat all possible and alleged violations of reliability standards and matters related to a compliance monitoring and enforcement program process, including the status of any compliance investigation or other compliance monitoring and enforcement process, as confidential in accordance with Section 1500.

The types of information that will be considered confidential and will not (subject to statutory and regulatory requirements) be disclosed in any public information reported by NERC are identified in Section 1500. Information that would jeopardize bulk power system reliability, including information relating to a Cyber Security Incident, will be identified and protected from public disclosure as critical energy infrastructure information in accordance with Section 1500.

The regional entity and NERC shall give bulk power system owners, operators, and users a reasonable opportunity to demonstrate that information concerning a violation is confidential before such report is disclosed to the public.

11. Public Posting — When the affected bulk power system owner, operator, or user either agrees with a possible or alleged violation(s) of a reliability standard(s) or a report of a compliance audit or compliance investigation, or the time for submitting an appeal is passed, or all appeals processes are complete, NERC shall, subject to the confidentiality requirements of these rules, publicly post each confirmed violation, penalty or sanction, and final compliance audit or compliance investigation report, on its Web site.

11.1 Each bulk power system owner, operator, or user may provide NERC with a statement to accompany the violation or report to be posted publicly. The statement must be on company letterhead and include a signature, as well as the name and title of the person submitting the information.

11.2 In accordance with Section 1500, information deemed by a bulk power system owner, operator, or user, regional entity, or NERC as critical energy infrastructure information (*NERC Security Guidelines for the Electricity Sector — Protecting Potentially Sensitive Information* may be used as a guide) or other confidential information shall be redacted in accordance with Section 1500 and not be released publicly.

11.3 Subject to redaction of critical energy infrastructure information or other confidential information, for each confirmed violation or settlement relating to a possible violation or an alleged violation, the public posting shall include the name of any relevant entity, the nature, time period, and circumstances of such possible, alleged or confirmed violation, any mitigation plan to be implemented by the entity in connection with the violation or settlement, and sufficient facts to assist owners, operators and

users of the bulk power system to evaluate whether they have engaged in or are engaging in similar activities.

12. **Violation Information Review** — NERC compliance monitoring and enforcement program staff shall periodically review and analyze all reports of possible, alleged and confirmed violations to identify trends and other pertinent reliability issues.

402. NERC Oversight of the Regional Entity Compliance Enforcement Programs

1. **NERC Monitoring Program** — NERC shall have a program to monitor the compliance enforcement program of each regional entity that has been delegated authority. The objective of this monitoring program shall be to ensure that the regional entity carries out its compliance enforcement program in accordance with these rules and the terms of the delegation agreement, and to ensure consistency and fairness of the regional entity's compliance enforcement program. Oversight and monitoring by NERC shall be accomplished through an annual compliance enforcement program review, program audits, and regular evaluations of regional entity compliance enforcement program performance as described below.

1.1 **NERC Review of Regional Compliance Enforcement Program Annual Plans** — NERC shall require each regional entity to submit for review and approval an annual compliance enforcement program implementation plan. NERC shall review each regional entity's compliance enforcement program annual implementation plan and shall accept the plan if it meets NERC requirements and the requirements of the delegation agreement.

1.2 **Regional Entity Program Evaluation** — NERC shall annually evaluate the goals, tools, and procedures of each regional entity compliance enforcement program to determine the effectiveness of each regional entity program, using criteria developed by the NERC Compliance and Certification Committee.

1.3 **Regional Entity Program Audit** — At least once every ~~three~~five years, NERC shall conduct an audit to evaluate how each regional entity compliance enforcement program implements the NERC Compliance Monitoring and Enforcement Program. The evaluation shall be based on these rules of procedures, including Appendix 4C, the delegation agreement, directives in effect pursuant to the delegation agreement, approved regional entity annual compliance enforcement program annual implementation plans, required program attributes, and the NERC compliance program procedures. These evaluations shall be provided to the appropriate ERO governmental authorities to demonstrate the effectiveness of each regional entity. In addition, audits of cross-border regional entities shall cover applicable requirements imposed on the regional entity by statute, regulation, or order of, or agreement with, provincial governmental and/or regulatory authorities for which NERC has auditing responsibilities over the regional entity's compliance with such requirements within Canada or Mexico. Participation of a

representative of an applicable ERO governmental authority shall be subject to the limitations of sections 3.1.6 and 8.0 of Appendix 4C of these rules of procedure regarding disclosures of non-public compliance information related to other jurisdictions.

~~1.3.1~~ NERC shall maintain an audit procedure containing the requirements, steps, and timelines to conduct an audit of each regional entity compliance enforcement program. The current procedure is contained in the NERC Audit of Regional Entity Compliance Programs, which is incorporated into these rules as **Appendix 4A**.

~~1.3.2~~ ~~NERC shall establish a program to audit bulk power system owners, operators, and users operating within a regional entity to verify the findings of previous compliance audits conducted by the regional entity to evaluate how well the regional entity compliance enforcement program is meeting its delegated authority and responsibilities.~~

1.4 ERO governmental authorities will be allowed to participate as an observer in any audit conducted by NERC of a regional entity's compliance monitoring and enforcement program. A representative of the regional entity being audited will be allowed to participate in the audit as an observer.

2. **Consistency Among Regional Compliance Enforcement Programs** — To provide for a consistent compliance enforcement program for all bulk power system owners, operators, and users required to comply with approved reliability standards, NERC shall maintain a single, uniform Compliance Monitoring and Enforcement Program, which is incorporated into these rules of procedure as Appendix 4C. Any Differences in regional entity program methods, including determination of violations and penalty assessment, shall be justified on a case-by-case basis and fully documented in each regional entity delegation agreement.

2.1 NERC shall ensure that each of the regional entity compliance enforcement programs meets these Rules of Procedure, including Appendix 4C, and follows the terms of the delegation agreement and the approved regional entity compliance enforcement program annual plan.

2.2 NERC shall ~~develop~~maintain a single, uniform compliance monitoring and enforcement program in Appendix 4C containing the procedures to ensure the consistency and fairness of the processes used to determine regional entity compliance enforcement program findings of compliance and noncompliance, and the application of penalties and sanctions.

2.3 NERC shall periodically conduct regional entity compliance manager forums. These forums shall use the results of regional entity compliance program audits and findings of NERC compliance staff to identify and refine regional entity compliance program differences into a set of best practices over time.

3. **Information Collection and Reporting** — NERC and the regional entities shall implement data management procedures that address data reporting requirements, data integrity, data retention, data security, and data confidentiality.
4. **Violation Disclosure** — NERC shall disclose all confirmed violations and maintain as confidential [possible violations and alleged violations](#), according to the reporting and disclosure process in [Appendix 4CSection 408](#).
5. **Authority to Determine Noncompliance, Levy Penalties and Sanctions, and Issue Remedial Action Directives** — NERC and regional entity compliance staff shall have the authority and responsibility to make initial determinations of compliance or noncompliance, and where authorized by the appropriate governmental authorities or where otherwise authorized, to determine penalties and sanctions for noncompliance with a reliability standard, and issue remedial action directives. Regional entity boards or a compliance panel reporting directly to the regional entity board will be vested with the authority for the overall regional entity compliance program and have the authority to impose penalties and sanctions on behalf of NERC, where authorized by applicable legislation or agreement. Remedial action directives may be issued by NERC or a regional entity that is aware of a bulk power system owner, operator, or user that is about to engage in an act or practice that would result in noncompliance [with a reliability standard, where such directive is immediately necessary to protect the reliability of the bulk power system from an imminent threat](#). If, after receiving such a directive, the bulk power system owner, operator, or user does not take appropriate action to avert a violation of a reliability standard, NERC may petition the applicable ERO governmental authority to issue a compliance order.
6. **Due Process** — NERC shall establish and maintain a fair, independent, and nondiscriminatory appeals process. The appeals process is set forth in Sections [409–411408-410](#). The process shall allow bulk power system owners, operators, and users to appeal the regional entity’s findings of noncompliance and to appeal penalties, sanctions, and remedial actions that are levied by the regional entity. Appeals beyond the NERC process will be heard by the applicable [ERO](#) governmental authority.

The appeals process will also allow for appeals to NERC of any findings of noncompliance issued by NERC to a regional entity for standards and requirements where the regional entity is monitored for compliance to a reliability standard. No monetary penalties will be levied in these matters; however sanctions, remedial actions, and directives to comply may be applied by NERC.
7. **Conflict Disclosure** — NERC shall disclose to the appropriate governmental authorities any potential conflicts between a market rule and the enforcement of a regional reliability standard.
8. **Confidentiality** — To maintain the integrity of the NERC Compliance Monitoring and Enforcement Program, NERC and regional entity staff, audit team

members, and committee members shall maintain the confidentiality of information obtained and shared during compliance monitoring and enforcement processes including investigations, audits, spot checks, drafting of reports, appeals, and closed meetings.

- 8.1 NERC and the regional entity shall have in place appropriate codes of conduct and confidentiality agreements for staff and other compliance enforcement program participants.
 - 8.2 Individuals not bound by NERC or regional entity codes of conduct who serve on compliance-related committees or audit teams shall sign a NERC confidentiality agreement prior to participating on the committee or team.
 - 8.3 Information deemed by a bulk power system owner, operator, or user, regional entity, or NERC as critical energy infrastructure information shall not be distributed outside of a committee or team, nor released publicly. Other information subject to confidentiality is identified in Section 1500.
 - 8.4 In the event that a staff, committee, or audit team member violates any of the confidentiality rules set forth above, the staff, committee, or audit team member and any member organization with which the individual is associated may be subject to appropriate action by the regional entity or NERC, including prohibiting participation in future compliance enforcement activities.
9. **Auditor Training** — NERC shall develop and provide training in auditing skills to all people who participate in NERC and regional entity compliance enforcement audits. Training for NERC and regional entity personnel and others who serve as compliance audit team leaders shall be more comprehensive than training given to industry subject matter experts; and regional entity members; and volunteers. Training for regional entity members ~~and volunteers~~ may be delegated to the regional entity.

403. Required Attributes of Regional Entity Compliance Enforcement Programs

Each regional entity compliance enforcement program shall promote excellence in the enforcement of reliability standards. To accomplish this goal, each regional entity compliance enforcement program shall (i) conform to and comply with the NERC uniform Compliance Monitoring and Enforcement Program, Appendix 4C to these rules of procedure, except to the extent of any deviations that are stated in the regional entity's delegation agreement, and (ii) at a minimum meet all of the following attributes set forth in this Section 403.

Program Structure

1. **Independence** — Each regional entity's governance of its compliance enforcement program shall exhibit independence, meaning the compliance enforcement program shall be organized so that its compliance monitoring and enforcement activities are carried out separately from other activities of the

regional entity. The program shall not be unduly influenced by the bulk power system owners, operators, and users being monitored or other regional entity activities that are required to meet the reliability standards. Regional entities must include rules providing that no two industry sectors may control any decision and no single segment may veto any matter related to compliance.

2. **Exercising Authority** — Each regional entity compliance enforcement program shall exercise the responsibility and authority in carrying out the delegated functions of the NERC Compliance Monitoring and Enforcement Program in accordance with delegation agreements and Appendix 4C. These functions include but are not limited to: data gathering, data reporting, compliance ~~violation~~ investigations, compliance auditing activities, evaluating compliance and noncompliance, imposing penalties and sanctions, and approving and tracking mitigation actions.
3. **Delegation of Authority** — To maintain independence, fairness, and consistency in the NERC Compliance Monitoring and Enforcement Program, a regional entity shall not sub-delegate its compliance enforcement program duties to entities or persons other than the regional entity compliance enforcement program staff, unless (i) required by statute or regulation in the applicable jurisdiction, or (ii) by agreement with express approval of NERC and of FERC or other appropriate ERO governmental authority, to another regional entity.
4. **Hearings of Contested Findings or Sanctions** — The regional entity board or compliance panel reporting directly to the regional entity board (with appropriate recusal procedures) will be vested with the authority for conducting compliance hearings in which any bulk power system owner, operator, or user provided notice of an alleged violation may present facts and other information to contest a notice of alleged violation or any proposed penalty, sanction, ~~or any~~ remedial action directive, or any mitigation plan component. Compliance hearings shall be conducted in accordance with the Hearing Process set forth in Attachment 2 to Appendix 4C ~~the NERC Compliance Monitoring and Enforcement Program document~~. If a stakeholder body serves as the hearing body, no two industry sectors may control any decision and no single segment may veto any matter related to compliance after recusals.

Program Resources

5. **Regional Entity Compliance Staff** — Each regional entity shall have sufficient resources to meet delegated compliance monitoring and enforcement responsibilities, including the necessary professional staff to manage and implement the regional entity compliance monitoring and enforcement program.
6. **Regional Entity Compliance Staff Independence** — The regional entity compliance monitoring and enforcement program staff shall be capable of and required to make all ~~initial~~ determinations of compliance and noncompliance and determine penalties, sanctions, and remedial actions.
 - 6.1 Regional entity compliance enforcement program staff shall not have a conflict of interest, real or perceived, in the outcome of compliance

- ~~monitoring and enforcement processes-violation investigations, compliance audits~~, reports, or sanctions. The regional entity shall have in effect a conflict of interest policy.
- 6.2 Regional entity compliance monitoring and enforcement program staff shall have the authority and responsibility to carry out compliance monitoring and enforcement processes~~investigate, audit~~ (with the input of industry subject matter experts ~~or regional members~~), make initial determinations of compliance or noncompliance, and levy penalties and sanctions without interference or undue influence from regional entity members and their representative or other industry entities.
- 6.3 Regional entity compliance monitoring and enforcement program staff may call upon independent technical subject matter experts who have no conflict of interest in the outcome of the compliance monitoring and enforcement process~~violation investigation or compliance audit~~ to provide technical advice or recommendations in the determination of compliance or noncompliance ~~in compliance audits, compliance violation investigations, or review of self-reported violations~~.
- 6.4 Regional entity compliance monitoring and enforcement program staff shall abide by the confidentiality requirements contained in Section 1500 and Appendix 4C of these Rules of Procedure, the NERC delegation agreement and other confidentiality agreements required by the NERC Compliance Monitoring and Enforcement Program.
- 6.5 Contracting with independent consultants or others working for the regional entity compliance enforcement program shall be permitted provided the individual has not received compensation from a bulk power system owner, operator, or user being monitored for a period of at least the preceding six months and owns no financial interest in any bulk power system owner, operator, or user being monitored for compliance to the reliability standard, regardless of where the bulk power system owner, operator, or user operates. Any such individuals for the purpose of these rules shall be considered as augmenting regional entity compliance staff.
- 7. Use of Industry Subject Matter Experts and Regional Entity Members** — Industry experts and regional entity members may be called upon to provide their technical expertise in compliance monitoring and enforcement program~~violation investigations, compliance audits, and other compliance~~ activities.
- 7.1 The regional entity shall have procedures defining the allowable involvement of industry subject matter experts and regional entity members. The procedures shall address applicable antitrust laws and conflicts of interest.
- 7.2 Industry subject matter experts and regional entity members shall have no conflict of interest or financial interests in the outcome of their activities.

- 7.3 Regional entity members and ~~volunteers~~ industry subject matter experts, as part of teams or regional entity committees, may provide input to the regional entity compliance staff so long as the authority and responsibility for (i) ~~initially~~ evaluating and determining compliance or noncompliance and (ii) levying penalties, sanctions, or remedial actions shall not be delegated to any person or entity other than the compliance staff of the regional entity. Industry subject matter experts, regional entity members, or regional entity committees shall not make ~~initial~~ determinations of noncompliance or levy penalties, sanctions, or remedial actions. Any committee involved shall be organized so that no two industry sectors may control any decision and no single segment may veto any matter related to compliance.
- 7.4 Industry subject matter experts and regional entity members shall sign a confidentiality agreement appropriate for the activity being performed.
- 7.5 All industry subject matter experts and regional entity members participating in compliance audits and compliance ~~violation~~ investigations shall successfully complete auditor training provided by NERC or the regional entity prior to performing these activities

Program Design

8. **Regional Entity Compliance Enforcement Program Content** — All approved reliability standards shall be included in the regional entity compliance monitoring and enforcement program for all bulk power system owners, operators, and users within the defined boundaries of the regional entity. Compliance to approved regional entity reliability standards is applicable only within the footprint of the regional entity that submitted those particular regional entity reliability standards for approval. NERC will identify the minimum set of reliability standards and requirements to be actively monitored by the regional entity in a given year.
9. **Antitrust Provisions** — Each regional entity's compliance monitoring and enforcement program shall be structured and administered to abide by U.S. antitrust law and Canadian competition law.
10. **Information Submittal** — All bulk power system owners, operators, and users within the regional entity responsible for complying with reliability standards shall submit timely and accurate information when requested by the regional entity or NERC, ~~in accordance with established procedures of NERC and the regional entity~~. NERC and the regional entities shall preserve any mark of confidentiality on information submitted pursuant to Section 1502.1.
- 10.1 Each regional entity has the authority to collect the necessary information to determine compliance and shall develop processes for gathering data from the bulk power system owners, operators, and users they regional entity monitors.

10.2 The regional entity or NERC has the authority to request information from bulk power system owners, operators, and users pursuant to section 401.3 or this section 403.10 without invoking a specific compliance monitoring and enforcement process in **Appendix 4C**, for purposes of determining whether to pursue one such process in a particular case and/or validating in the enforcement phase of a matter the conclusions reached through the compliance monitoring and enforcement process(es).

~~10.2~~10.3 When required or requested, the regional entities shall report information to NERC promptly and in accordance with **Appendix 4C** and other NERC procedures.

~~10.3~~10.4 Regional entities shall notify NERC of all possible, alleged and confirmed violations of NERC reliability standards by entities over which the regional entity has compliance monitoring and enforcement authority ~~authority or enforcement responsibilities, whether self-reported, alleged, or confirmed~~, in accordance with **Appendix 4C** ~~the Reporting and Disclosure Process in Section 408~~.

~~10.4~~10.5 A bulk power system owner, operator, or user found in noncompliance with a reliability standard shall submit a mitigation plan with a timeline addressing how the noncompliance will be corrected. The regional entity compliance staff shall review and approve the mitigation plan in accordance with Appendix 4C ~~with section 403.18~~. Regional entity compliance staff may issue remedial action directives to owners, operators and users of the bulk power system to comply with reliability standards, as needed to preserve the reliability of the bulk power system.

~~10.5~~10.6 An officer of a bulk power system owner, operator, or user shall certify as accurate all compliance data self-reported to the regional entity compliance monitoring and enforcement program.

~~10.6~~10.7 Regional entities shall develop and implement procedures to ~~spot-check and~~ verify the compliance information submitted by bulk power system owners, operators, and users.

11. **Compliance Audits of Bulk Power System Owners, Operators, and Users** — Each regional entity will maintain and implement a program of proactive compliance audits. ~~The regional entity shall audit each of~~ bulk power system owners, operators, ~~and/or~~ users responsible for complying with reliability standards, in accordance with Appendix 4C. A compliance audit is a process in which a detailed review of the activities of a bulk power system owner, operator, or user is performed to determine if that bulk power system owner, operator, or user is complying with approved reliability standards.

11.1 For ~~those bulk power system owners and operators with primary reliability responsibility (i.e., entities requiring organizational certification)~~ an entity

registered as a balancing authority, reliability coordinator, or transmission operator, the compliance audit will be performed at least once every three years. For other bulk power system owners, operators, and users on the NERC Compliance Registry, compliance audits shall be performed on a schedule established by NERC.

- 11.2 Audits of balancing authorities, reliability coordinators, and transmission operators~~bulk power system owners and operators with primary reliability responsibility~~ will include a component at~~be performed on~~ the audited entity's site. For other bulk power system owners, operators, and users on the NERC Compliance Registry, the audit may be either an on-site audit or based on review of documents, as determined to be necessary and appropriate by NERC or regional entity compliance monitoring and enforcement program, staff.
- 11.3 Compliance audits must include a detailed review of the activities of the bulk power system owner, operator, or user to determine if the bulk power system owner, operator, or user is complying with all approved reliability standards identified for audit by NERC. The compliance audit shall include a review of supporting documentation and evidence used by the bulk power system owner, operator or user to demonstrate for self-certification~~compliance reporting~~ for an appropriate reporting~~reporting~~ period prior to~~since~~ the last compliance audit.
- ~~11.4 NERC compliance staff may participate on any regional entity audit team, at any time at NERC's discretion. Additionally, any applicable ERO governmental authority may participate on an audit team as an observer in any regional entity audit within its jurisdiction, at the ERO governmental authority's discretion.~~

~~12. **Compliance Audit Results**—The regional entity shall make an evaluation of a bulk power system owner's, operator's, or user's compliance based on the information obtained from a compliance audit and previously reported compliance information. After due process is complete, this evaluation (excluding any critical energy infrastructure information or other confidential information) shall be made public. The regional entity shall send the report to NERC for public posting.~~

~~13. **Compliance Violation Investigations**—Compliance violation investigations are necessary to determine if a violation of reliability standards has occurred when certain system events occur, or when other owners, operators, or users of the bulk power system file complaints. NERC is ultimately responsible for how a regional entity conducts compliance violation investigations. Compliance violation investigations are initiated at the discretion of the regional entity compliance enforcement program staff, the senior executive officer of the regional entity, NERC compliance staff, or the NERC president. The regional entity shall respond to any complaints filed by one entity against another that allege a~~

~~violation of reliability standards by a bulk power system owner, operator, or user. The regional entity may ask NERC to assist with the compliance violation investigation. Situations that can trigger a compliance violation investigation include but are not limited to (i) significant problems arising on the system, (ii) chronic noncompliance violations, (iii) bulk power system owners, operators, and users not submitting data in a timely or accurate manner, (iv) spot checks to verify submitted data, (v) filing of a compliance complaint with the regional entity or NERC, or (vi) Nuclear Regulatory Commission defined incidents occurring on the transmission system.~~

~~1412.~~ **Confidentiality of Compliance ~~Audits and Compliance Violation~~**

~~**Investigations Monitoring and Enforcement Processes** — All compliance violation investigations compliance monitoring and enforcement processes, and information obtained from such processes, are to be non-public and treated as confidential in accordance with Section 1500 and Appendix 4C of these rules of procedure, unless NERC, the regional entity or FERC or another applicable governmental authority with jurisdiction determines a need to conduct a compliance monitoring and enforcement program process on a public basis investigation, provided, that NERC and the regional entities shall publish (i) schedules of compliance audits scheduled in each year, (ii) a public report of each compliance audit, and (iii) notices of penalty and settlement agreements. Advance authorization from the applicable ERO governmental authority is required to make public any compliance violation investigation, compliance audit, monitoring and enforcement process or any information relating to a compliance violation investigation or compliance audit, monitoring and enforcement process, or to permit interventions when determining whether to impose a penalty. This prohibition on making public any compliance violation investigation or compliance audit monitoring and enforcement process does not prohibit NERC or a regional entity from publicly disclosing (i) the initiation of or results from an analysis of a significant system event under Section 807 or of off-normal events or system performance under Section 808, or (ii) information of general applicability and usefulness to owners, operators, and users of the bulk power system concerning reliability and compliance matters, so long as specific allegations or conclusions regarding possible or alleged violations of reliability standards are not included in such disclosures.~~

~~15. **Report all Violations** — Each regional entity compliance enforcement program shall report to NERC all violations whether self reported, alleged, or discovered by the region through a compliance audit or compliance violation investigation of all approved reliability standards in accordance with the *Reporting and Disclosure Process* in Section 408. The regional entity will promptly notify NERC of any change in the status of a violation and provide updates at least monthly regarding the status of any compliance audits, compliance violation investigations, or hearings.~~

~~1613.~~ **Critical Energy Infrastructure Information** — Information that would jeopardize bulk power system reliability, including information relating to a

Cyber Security Incident will be identified and protected from public disclosure as critical energy infrastructure information. In accordance with Section 1500, information deemed by a bulk power system owner, operator, or user, regional entity, or NERC as critical energy infrastructure information shall be redacted according to NERC procedures and shall not be released publicly.

1714. Penalties, Sanctions, and Remedial Actions — Each regional entity will apply all penalties, sanctions, and remedial actions directives in accordance with the approved *ERO-Sanction Guidelines*, [Appendix 4B to these rules of procedure](#). Any changes to the *ERO-Sanction Guidelines* to be used by any regional entity must be approved by NERC and submitted to the appropriate ERO governmental body for approval. All confirmed violations, penalties, and sanctions will be provided to NERC for review and filing with applicable ERO governmental authorities as a notice of penalty, [in accordance with Appendix 4C](#).

~~18. **Mitigation of Violations** — Each regional entity compliance enforcement program will require that any bulk power system owner, operator, or user found to be in noncompliance with a reliability standard requirement shall submit a mitigation plan with a timeline addressing how the noncompliance will be corrected. The mitigation plan shall be reviewed and approved by the regional entity compliance staff and the regional entity's compliance panel or board as appropriate. The regional entity shall approve or reject the mitigation plan within thirty (30) days of receipt, unless the regional entity notifies the owner, operator or user and NERC within such thirty (30) day period or any extended review period that the regional entity's review period is being extended and states the length of the extended review period. If the regional entity does not notify the owner, operator or user within the initial or any extended review period that the proposed mitigation plan is accepted or rejected, the proposed mitigation plan shall be deemed accepted. If the regional entity accepts the mitigation plan, it shall notify the owner, operator or user and shall promptly submit the complete approved mitigation plan to NERC in accordance with NERC's form. NERC shall, within thirty (30) days of the receipt of the mitigation plan, approve or disapprove the mitigation plan, and in the case of disapproval provide a statement of reasons (which may include a list of changes to the mitigation plan that would make it acceptable to NERC), and shall notify the regional entity and the bulk power system owner, operator or user of NERC's approval or disapproval of the mitigation plan. NERC will submit to the Federal Energy Regulatory Commission, as non-public information, an approved mitigation plan relating to violations of reliability standards within seven (7) business days after NERC approves the mitigation plan. NERC shall subsequently publicly post the approved mitigation plan as part of the public posting of the related confirmed violation, penalty or sanction in accordance with section 408.6 or section 403.19, or as part of the public posting of a settlement in which the owner, operator or user of the bulk power system neither admits or denies that it violated a reliability standard.~~

~~19. **Settlement Processes**—The regional entity may enter into a settlement process with owners, operators and users of the bulk power system for alleged violations of a reliability standard and any associated financial penalty, sanction, or mitigation actions. NERC must be notified of all settlement proceedings and may participate in any settlement processes. Regional entities may consider all relevant facts in the settlement. Any settlement must ensure that the reliability of the bulk power system will not be compromised by the settlement and that a violation of reliability standards will not occur as a result of the settlement. All settlements must be reported to NERC, which will in turn report the settlement of an alleged violation to the Federal Energy Regulatory Commission or the applicable ERO governmental authority. NERC shall publicly post each violation (whether confirmed or not) that is settled, and the resulting penalty or sanction.~~

2015. **Regional Hearing Process** — Each regional entity compliance enforcement program shall establish and maintain a fair, independent, and nondiscriminatory process for hearing contested violations and any penalties or sanctions levied, in conformance with Attachment 2 to Appendix 4C to these rules of procedure and any deviations therefrom that are set forth in the regional entity’s delegation agreement, where authorized by applicable legislation or agreement. The hearing process shall allow bulk power system owners, operators, and users to contest ~~both~~ findings of compliance violations, ~~and~~ any penalties and sanctions that are proposed to be levied, proposed remedial action directives, and components of proposed mitigation plans. The regional entity hearing process shall be conducted before the regional entity board or a balanced committee established by and reporting to the regional entity board as the final adjudicator, provided, that ~~(i) in ERCOT, the Public Utility Commission of Texas may act as the final adjudicator, and (ii) Canadian provincial regulators may act as the final adjudicator in their respective jurisdictions.~~ The regional entity hearing process shall (i) include provisions for recusal of any members of the hearing body with a potential conflict of interest, real or perceived, from all compliance matters considered by the hearing body for which the potential conflict of interest exists and (ii) provide that no two industry sectors may control any decision and no single segment may veto any matter brought before the hearing body after recusals.

Each regional entity will notify NERC of all hearings and NERC may observe any of the proceedings. Each regional entity will notify NERC of the outcome of all hearings.

If a bulk power system owner, operator, or user has completed the regional entity hearing process and desires to appeal the outcome of the hearing, the bulk power system owner, operator, or user shall appeal to NERC in accordance with Section 409 of these rules of procedure, except that a determination of violation or penalty that has been directly adjudicated by an ERO governmental authority shall be appealed with that ERO governmental authority.

2116. **Annual Regional Entity Compliance Enforcement Program Implementation Plan** — Each regional entity shall annually develop and submit to NERC for

approval a regional entity compliance enforcement implementation plan [in accordance with Appendix 4C](#) that identifies the reliability standards and requirements to be actively monitored (both those required by NERC and any additional reliability standards the regional entity proposes to monitor), and how each NERC and regional entity identified standard will be monitored, evaluated, reported, sanctioned, and appealed. These implementation plans will be submitted to NERC on the schedule established by NERC, generally on or about November 1 of the preceding year.

~~21.1~~—In conjunction with the annual implementation plan, each regional entity ~~with delegated authority~~ must report to NERC regarding how it carried out its delegated [compliance monitoring and enforcement authority](#) in the previous year, the effectiveness of the program, and changes expected to correct any deficiencies identified. Each regional [entity](#) will provide its annual report on the schedule established by NERC, generally on or about February 15 of the following year.

404. NERC Monitoring of Compliance for Regional Entities or Bulk Power Owners, Operator, or Users

NERC shall monitor regional entity compliance with NERC reliability standards and, if no there is no delegation agreement in effect with a regional entity for the geographic area, shall monitor bulk power system owners, operators, and users for compliance with NERC reliability standards. Industry [subject matter](#) experts may be used as appropriate in compliance ~~violation~~ investigations, compliance audits, and other compliance activities, subject to confidentiality, antitrust, and conflict of interest provisions.

1. **NERC Obligations** — NERC compliance [monitoring and enforcement](#) staff shall monitor the compliance of the regional entity with the reliability standards for which the regional entities are responsible, [in accordance with Appendix 4C](#). NERC shall actively monitor in its annual Compliance Enforcement and Monitoring Program selected reliability standards that apply to the regional entities. NERC shall evaluate compliance and noncompliance with all of the reliability standards that apply to the regional entities and shall impose sanctions, penalties, or remedial action directives when there is a finding of noncompliance. NERC shall post all violations of reliability standards that apply to the regional entities as described in the reporting and disclosure process in [Appendix 4C](#) ~~Section 408~~.

In addition, NERC will directly monitor bulk power system owners, operators, and users for compliance with NERC Reliability Standards in any geographic area for which there is not a delegation agreement in effect with a regional entity, [in accordance with Appendix 4C](#). In such cases, NERC will serve as the Compliance [Enforcement Authority](#) ~~Monitor~~ described in [Appendix 4C](#) ~~the NERC Compliance Monitoring and Enforcement Program document~~. Compliance matters contested by bulk power system owners, operators, and users in such an event will be heard by the NERC Compliance and Certification Committee.

~~2. Mitigation Plans~~—An owner, operator or user of the bulk power system or a regional entity found by NERC to be in noncompliance with a reliability standard

~~shall submit to NERC for approval a mitigation plan with a timeline addressing how the noncompliance will be corrected.~~

~~3.2.~~ **Compliance Audit of the Regional Entity** — NERC shall perform a compliance audit of each regional entity responsible for complying with reliability standards at least once every three years. NERC shall make an evaluation of compliance based on the information obtained through the audit. After due process is complete, the final audit report shall be made public in accordance with the reporting and disclosure process in ~~Appendix 4C~~~~Section 408~~.

~~4.3.~~ **Appeals Process** — Any regional entity or bulk-power system owner, operator or user found by NERC, as opposed to a regional entity, to be in noncompliance with a reliability standard may appeal the findings of noncompliance with reliability standards and any sanctions, or remedial action directives that are issued by, ~~or mitigation plan components imposed by,~~ NERC, pursuant to the processes described in Sections ~~409~~~~408~~ through ~~411~~~~410~~.

405. Monitoring of Standards and Other Requirements Applicable to NERC

The NERC Compliance and Certification Committee shall establish and implement a process to monitor NERC's compliance with the reliability standards that apply to NERC. The process shall use independent monitors with no conflict of interest, real or perceived, in the outcomes of the process. All violations shall be made public according to the reporting and disclosure process in ~~Appendix 4C~~~~Section 408~~. The Compliance and Certification Committee will also establish a procedure for monitoring NERC's compliance with its Rules of Procedure for the Standards Development, Compliance Enforcement, and Organization Registration and Certification Programs. Such procedures shall not be used to circumvent the appeals processes established for those programs.

406. Independent Audits of the NERC Compliance Monitoring and Enforcement Program

NERC shall provide for an independent audit of its compliance monitoring and enforcement program at least once every three years, or more frequently as determined by the board. The audit shall be conducted by independent expert auditors as selected by the board. The independent audit shall meet the following minimum requirements and any other requirements established by the NERC board.

1. **Effectiveness** — The audit shall evaluate the success and effectiveness of the NERC Compliance Monitoring and Enforcement Program in achieving its mission.
2. **Relationship** — The audit shall evaluate the relationship between NERC and the regional entity compliance enforcement programs and the effectiveness of the programs in ensuring reliability.
3. **Final Report Posting** — The final report shall be posted by NERC for public viewing ~~in accordance with Appendix 4C~~~~according to the reporting and disclosure process in Section 408~~.

4. **Response to Recommendations** — If the audit report includes recommendations to improve the NERC Compliance Monitoring and Enforcement Program, the administrators of the NERC Compliance Monitoring and Enforcement Program shall provide a written response and plan to the board within 30 days of the release of the final audit report.

407. Penalties, Sanctions, and Remedial Actions

1. **NERC Review of Regional Penalties and Sanctions** — NERC shall review all penalties, sanctions, and remedial actions imposed by each regional entity for violations of reliability standards to determine if the regional entity's determination is supported by a sufficient record compiled by the regional entity, is consistent with the *Sanction Guidelines* incorporated into these rules as **Appendix 4B** and with other directives, guidance and directions issued by NERC pursuant to the delegation agreement, and is consistent with penalties, sanctions and remedial actions imposed by the regional entity and by other regional entities for consistency with similar violations involving the same or similar facts and circumstances and fairness in application.
2. **Developing Penalties and Sanctions** — The regional entity compliance monitoring and enforcement program staff shall use the *ERO-Sanction Guidelines*, which are incorporated into these rules as **Appendix 4B**, to develop an appropriate penalty, sanction, or remedial action for a violation, and shall notify NERC of the penalty or sanction.
- ~~3. **Hearing Processes** — The regional entity shall make available a regional entity hearing process for entities to contest a finding of noncompliance, penalty, sanction, or remedial actions in which the bulk power system owner, operator, or user will be afforded the opportunity to present facts to rebut such a finding, conforming to Attachment 2 of the NERC Compliance Monitoring and Enforcement document. The regional entity shall also make available the NERC appeals process for bulk power system owners, operators, and users seeking an opportunity to dispute a penalty, sanction, or remedial action. Appeals beyond NERC of a finding of noncompliance, penalty, sanction, or remedial action will be before the appropriate ERO governmental authority.~~
43. **Effective Date of Penalty** — Where authorized by applicable legislation or agreement, no penalty imposed for a violation of a reliability standard shall take effect until the thirty-first day after NERC files, with the applicable ERO governmental authority, a “notice of penalty” and the record of the proceedings in which the violation and penalty were determined, or such other date as ordered by the ERO applicable governmental authority.

~~408. **Reporting and Disclosure Process**~~

- ~~1. **Reporting Requirements** — Each regional entity shall report all known violations, self-reported, confirmed, and alleged, of all reliability standards to NERC in accordance with the requirements established in the NERC Compliance Monitoring and Enforcement Program procedures document. Probable violations from NERC readiness evaluations will be treated as alleged violations when~~

reported by the regional entity to NERC after review by regional entity staff. Each regional entity shall promptly report any change in the status of a violation and the disposition of each violation. Reports on the disposition of a violation will be provided at least quarterly or as otherwise required by NERC for reporting to ERO governmental authorities. NERC shall promptly notify the applicable ERO governmental authority of any self-reported, confirmed, or alleged violation of a reliability standard, any compliance violation investigation, any imposition of a penalty or sanction, or any remedial action directive.

1.1 Requirements of reliability standards for which noncompliance may cause bulk power system reliability to be diminished or at risk, will be identified by NERC and require reporting by the regional entity to NERC within 48 hours after the regional entity learns of the violation. Such reports shall include information regarding the nature and reliability impact of the alleged violations, the identity of the organizations involved, and the status and timetable of any compliance investigation. NERC will promptly report such violation to the applicable ERO governmental authority.

2. **Reporting Process**— NERC shall implement and maintain a reporting process and utilize appropriate tools to facilitate reporting of violations. The reporting process shall identify all of the information required to be included in a violation report. NERC will report the disposition of each violation or alleged violation to the applicable ERO governmental authority on a quarterly basis.

3. **Confidential Information**— NERC will treat all alleged violations and matters related to a compliance violation investigation, including the status of the compliance violation investigation, as confidential in accordance with Section 1500. Any entity seeking to protect information as confidential shall follow the procedures of Section 1500. This information may result from compliance violation investigations, compliance audits, and proceedings concerning an alleged violation or proposed penalty or sanction.

Information that would jeopardize bulk power system reliability, including information relating to a Cyber Security Incident will be identified and protected from public disclosure as critical energy infrastructure information in accordance with Section 1500.

3.1 The regional entity and NERC shall give bulk power system owners, operators, and users a reasonable opportunity to demonstrate that information concerning a violation is confidential before such report is disclosed to the public.

3.2 The types of information that will be considered confidential and will not (subject to statutory and regulatory requirements) be disclosed in any public information reported by NERC are identified in Section 1500.

3.14. **Reporting Updated Information**— Each regional entity and NERC shall report new information on each confirmed or alleged violation as it is received and processed.

- ~~5. **Violation Information Review**—NERC staff shall periodically review and analyze all reports of violations to identify trends, chronic violators, and other pertinent reliability issues.~~
- ~~6. **Public Posting**—When the affected bulk power system owner, operator, or user either agrees with the violation(s) or report, or the time for submitting an appeal is passed, or all appeals processes are complete, NERC shall publicly post each confirmed violation, penalty or sanction, and final compliance audit or compliance violation investigation report on its Web site.
 - ~~6.1—Each bulk power system owner, operator, or user may provide NERC with a statement to accompany the violation or report to be posted publicly. The statement must be on company letterhead and include a signature, as well as the name and title of the person submitting the information.~~
 - ~~6.2—In accordance with Section 1500, information deemed by a bulk power system owner, operator, or user, regional entity, or NERC as critical energy infrastructure information (*NERC Security Guidelines for the Electricity Sector—Protecting Potentially Sensitive Information* may be used as a guide) or other confidential information shall be redacted in accordance with Section 1500 and not be released publicly.~~
 - ~~6.3—Subject to redaction of critical energy infrastructure information or other confidential information, for each confirmed violation or settlement relating to an alleged violation, the public posting shall include the name of any relevant entity, the nature, time period, and circumstances of such violation or alleged violation, any mitigation plan to be implemented by the entity in connection with the confirmed violation or settlement, and sufficient facts to enable owners, operators and users of the bulk power system to evaluate whether they have engaged in or are engaging in similar activities.~~~~

409.408. Review of NERC Decisions

1. **Scope of Review** — A registered entity or a regional entity wishing to challenge a finding of noncompliance and the imposition of a penalty for a compliance measure directly administered by NERC, or a regional entity wishing to challenge a regional compliance program audit finding, may do so by filing a notice of the challenge with NERC’s director of compliance no later than 21 days after issuance of the notice of finding of violation or audit finding. Appeals by registered entities of decisions of regional entity hearing bodies shall be pursuant to section 409s 407.3 and 410.
2. **Contents of Notice** — The notice of challenge shall include the full text of the decision that is being challenged, a concise statement of the error or errors contained in the decision, a clear statement of the relief being sought, and argument in sufficient detail to justify such relief.

3. **Response by NERC Compliance Monitoring and Enforcement Program** — Within 21 days after receiving a copy of the notice of challenge, the NERC Director of Compliance may file with the hearing body a response to the issues raised in the notice, with a copy to the regional entity.
4. **Hearing by Compliance and Certification Committee** — The NERC Compliance and Certification Committee shall provide representatives of the regional entity or registered entity, and the NERC Compliance Monitoring and Enforcement Program an opportunity to be heard and shall decide the matter based upon the filings and presentations made, with a written explanation of its decision.
5. **Appeal** — The regional entity, or registered entity may appeal the decision of the Compliance and Certification Committee by filing a notice of appeal with NERC’s director of compliance no later than 21 days after issuance of the written decision by the Compliance and Certification Committee. The notice of appeal shall include the full text of the written decision of the Compliance and Certification Committee that is being appealed, a concise statement of the error or errors contained in the decision, a clear statement of the relief being sought, and argument in sufficient detail to justify such relief. No factual material shall be presented in the appeal that was not presented to the Compliance and Certification Committee.
6. **Response by NERC Compliance Monitoring and Enforcement Program** — Within 21 days after receiving a copy of the notice of appeal, the NERC Compliance Monitoring and Enforcement Program staff may file its response to the issues raised in the notice of appeal, with a copy to the entity filing the notice.
7. **Reply** — The entity filing the appeal may file a reply within 7 days.
8. **Decision** — The Compliance Committee of the NERC Board of Trustees shall decide the appeal, in writing, based upon the notice of appeal, the record, the response, and any reply. At its discretion, the Compliance Committee may invite representatives of the regional entity or registered entity, and the NERC Compliance Monitoring and Enforcement Program to appear before the Committee. Decisions of the Compliance Committee shall be final, except for further appeal to the applicable ERO governmental authority.
9. **Impartiality** — No member of the Compliance and Certification Committee or the Board of Trustees Compliance Committee having an actual or perceived conflict of interest in the matter may participate in any aspect of the challenge or appeal except as a party or witness.
10. **Expenses** — Each party in the challenge and appeals processes shall pay its own expenses for each step in the process.
11. **Non-Public Proceedings** — All challenges and appeals shall be closed to the public to protect confidential information.

410.409. Appeals from Final Decisions of Regional Entities

1. **Time for Appeal** — An owner, operator or user of the bulk-power system wishing to appeal from a final decision of a regional entity that finds a violation of a reliability standard or imposes a penalty for violation of a reliability standard shall file its notice of appeal with NERC’s director of compliance, with a copy to the regional entity, no later than 21 days after issuance of the final decision of the regional entity hearing body. The same appeal procedures will apply regardless of whether the matter first arose in a compliance ~~violation~~ investigation, compliance audit or self-report, [other compliance monitoring and enforcement process](#), or in a reliability readiness evaluation.
2. **Contents** — The notice of appeal shall include the full text of the final decision of the regional entity hearing body that is being appealed, a concise statement of the error or errors contained in the final decision, a clear statement of the relief being sought, and argument in sufficient detail to justify such relief. No factual material shall be presented in the appeal that was not first presented during the compliance hearing before the regional entity hearing body.
3. **Response by Regional Entity** — Within 21 days after receiving a copy of the notice of appeal, the regional entity shall file the entire record of the matter with NERC’s director of compliance, with a copy to the entity filing the notice, together with its response to the issues raised in the notice of appeal.
4. **Reply** — The entity filing the appeal may file a reply to the regional entity within 7 days.
5. **Decision** — The Compliance Committee of the NERC Board of Trustees shall decide the appeal, in writing, based upon the notice of appeal, the record of the matter from the regional entity, the response, and any reply filed with NERC. At its discretion, the Compliance Committee may invite representatives of the entity making the appeal and the regional entity to appear before the Committee. Decisions of the Compliance Committee shall be final, except for further appeal to the applicable ERO governmental authority.
6. **Expenses** — Each party in the appeals process shall pay its own expenses for each step in the process.
7. **Non-Public Proceedings** — All appeals shall be closed to the public to protect confidential information.

411.410. Hold Harmless

A condition of invoking the challenge or appeals processes under Section [408 or 409](#) ~~or 410~~ is that the entity requesting the challenge or appeal agrees that neither NERC (defined to include its members, Board of Trustees, committees, subcommittees, staff and industry [subject matter experts](#) ~~volunteers~~), any person assisting in the challenge or appeals processes, nor any company employing a person assisting in the challenge or appeals processes, shall be liable, and they shall be held harmless against the

consequences of or any action or inaction or of any agreement reached in resolution of the dispute or any failure to reach agreement as a result of the challenge or appeals proceeding. This “hold harmless” clause does not extend to matters constituting gross negligence, intentional misconduct, or a breach of confidentiality.

412.411. Requests for Technical Feasibility Exceptions to NERC Critical Infrastructure Protection Reliability Standards

A registered entity that is subject to a requirement of a NERC critical infrastructure protection reliability standard for which technical feasibility exceptions are permitted, may request a technical feasibility exception to the requirement, and the request will be reviewed, approved or disapproved, and if approved, implemented, in accordance with the NERC *Procedure for Requesting and Receiving Technical Feasibility Exceptions to NERC Critical Infrastructure Protection Standard*, Appendix 4D to these Rules of Procedure.

SECTION 500 — ORGANIZATION REGISTRATION AND CERTIFICATION

501. Scope of the Organization Registration and Certification Program

Enforcing compliance with the NERC reliability standards requires that the identity of those responsible for complying with the standards be known and that those with primary reliability responsibilities be reviewed and certified as meeting established minimum requirements for performing those tasks. NERC shall develop and maintain a compliance registry and certification program for the purpose of promoting compliance with reliability standards and enhancing the reliability of the bulk power system.

The purpose of the compliance registry will be to clearly identify those entities that are responsible for compliance with reliability standards. Organizations listed on the registry will be responsible for knowing the content of and for complying with the NERC reliability standards. Organizations listed in the registry are not, nor do they become, members of NERC or a regional entity by virtue of being listed in the compliance registry. Membership in NERC is governed by Article II of NERC's bylaws; membership in a regional entity is governed by that entity's bylaws or rules.

Organization registration and certification may be delegated to regional entities in accordance with the procedures in this Section 500, the NERC *Organization Registration and Certification Manual*, which is incorporated into these rules as **Appendix 5A**, and approved regional entity delegation agreements or other applicable agreements.

1. **Compliance Registry** — NERC shall establish and maintain a compliance registry of the bulk power system owners, operators, and users that are subject to approved reliability standards.
 - 1.1 The registry shall set forth the identity and functions performed for each organization responsible for meeting requirements of the reliability standards ~~including: reliability coordinators, balancing authorities, transmission operators, transmission owners, generator operators, generator owners, transmission service providers, planning authorities, transmission planners, resource planners, load serving entities, purchasing selling entities, and distribution providers~~. Bulk power system owners, operators, and users (i) shall provide to NERC and the applicable regional entity such information as is necessary to complete the registration, and (ii) shall provide NERC and the applicable regional entity with timely updates to information concerning the registered entity's ownership, operations, contact information, and other information that may affect the registered entity's registration status or other information recorded in the compliance registry.
 - 1.2 NERC and regional entities assisting NERC in the development of the compliance registry shall ~~consider the following factors in determining~~ which organizations should be placed in the registry based on the criteria

provided in the NERC *Statement of Compliance Registry Criteria*, which is incorporated into these rules as **Appendix 5B**.

~~1.2.1 Owners and operators of bulk power system facilities will generally be included in the registry;~~

~~1.2.2 As identified by regional entities, electrical generation resources, transmission lines, interconnections with neighboring systems, and associated equipment, generally operated at voltages of 100 kV or higher will be considered part of the bulk power system;~~

~~1.2.3 Radial transmission facilities serving only load with one transmission source, without more, will not be considered part of the bulk power system;~~

~~1.2.4 A customer that receives electric service at retail and does not otherwise directly receive, sell, purchase, or transmit power over the bulk power system or own, operate, maintain, or control facilities or systems that are part of the bulk power system will not in general be considered a user of the bulk power system;~~

~~1.2.5 An entity directly connected to the bulk power system selling, purchasing, or transmitting electric energy over the bulk power system will generally be considered a user of the bulk power system, unless the entity's actions or facilities have no material impact on the bulk power system;~~

~~1.2.6 Notwithstanding the other considerations in this Section 1.2, if the consequences of an entity's actions or inactions could have a material impact on the bulk power system, that entity may be considered a user of the bulk power system;~~

1.2.7 In addition, (a) A generation or transmission cooperative, a joint-action agency or another organization (a Joint Registration Organization or JRO) may be registered, in lieu of each of the JRO's members or related entities being registering individually, by the JRO accepting the reliability functions identified in Section 1.1 above, or (b) a JRO and its members or related entities may enter into a written agreement as to which of them will be responsible for one or more reliability standards applicable to a particular function and/or for one or more requirements within particular reliability standards applicable to a particular function and/or for one or more requirements within particular reliability standards, in either case in accordance with the provisions specified in Section 507 (each of (a) and (b), a "joint registration").

For purpose of this Section 501.1.2.7 and Section 507, a "related entity" is an entity whose operations in relation to the operation of the JRO make it feasible for the JRO to accept responsibility for

reliability functions for which the related entity would otherwise be responsible. A non-exclusive list of examples of JROs and related entities includes (i) a balancing authority or a transmission provider as the JRO, and (ii) a load-serving entity or a distribution provider within the balancing authority's control area or receiving transmission services from the transmission provider, as the related entity.

- 1.3 NERC and the regional entities shall use the following procedure for establishing and maintaining the compliance registry:
 - 1.3.1 NERC shall notify each organization of its intent to place the organization on the compliance registry.
 - 1.3.2 Any organization receiving such a notice may challenge the decision to include it on the compliance registry by filing its written objection with NERC's director of compliance within 21 days stating the reasons it believes it should not be considered a bulk power system owner, operator, or user.
 - 1.3.3 The Compliance Committee of the Board of Trustees will promptly issue a written decision on the challenge, including the reasons for the decision.
 - 1.3.4 The decision of the Compliance Committee shall be final unless, within 21 days, the organization appeals the decision to the applicable governmental authority.
 - 1.3.5 At any time a person may recommend in writing, with supporting reasons, to the director of compliance that an organization be added to or removed from the compliance registry.
 - 1.3.6 The compliance registry shall be dynamic and be revised as necessary to take account of changing circumstances. NERC will take such recommendations, and other applicable information, under advisement as it determines whether an entity should be on the compliance registry.
 - 1.3.7 Each entity identified in the registry shall notify NERC and its corresponding regional entity of any changes in ownership, corporate structure, or similar matters that affect the entity's responsibilities with respect to the reliability standards. Failure to notify will not relieve the entity from any responsibility to comply with the reliability standards or shield it from any penalties or sanctions associated with failing to comply with such standards.
- 1.4 For all geographical or electrical areas of the bulk power system, the registration process shall ensure that (1) no areas are lacking any entities

to perform the duties and tasks identified in and required by the reliability standards to the fullest extent practical, and (2) there is no duplication of such coverage or of required oversight of such coverage.

In particular the process shall:

- 1.4.1 Ensure that all areas are under the oversight of one and only one reliability coordinator.
- 1.4.2 Ensure that all balancing authorities and transmission operator entities² are under the responsibility of one and only one reliability coordinator.
- 1.4.3 Ensure that all transmission elements of the bulk power system are the responsibility and under the control of one and only one transmission planner, planning authority, and transmission operator.
- 1.4.4 Ensure that all loads and generators are under the responsibility and control of one and only one balancing authority.
- 1.5 NERC shall maintain publicly available process documentation.
- 1.6 NERC shall maintain the compliance registry of organizations responsible for meeting the requirements of the reliability standards currently in effect on its Web site and shall update the compliance registry monthly.
2. **Entity Certification** — NERC shall provide for certification of all entities with primary reliability responsibilities requiring certification as established in the NERC reliability standards. The NERC program shall:
 - 2.1 Evaluate and certify the competency of entities performing reliability functions. The entities presently expected to be certified include reliability coordinators, transmission operators, and balancing authorities. Other entities may be added, as required, by approved reliability standards.
 - 2.2 Certify each entity's ability to meet the minimum requirements established by the NERC reliability standards for each function.
 - 2.3 Maintain process documentation.

² Some organizations perform the listed functions (e.g., balancing authority, transmission operator) over areas that transcend the footprints of more than one reliability coordinator. Such organizations will have multiple registrations, with each such registration corresponding to that portion of the organization's overall area that is within the footprint of a particular reliability coordinator.

2.4 Maintain records of currently certified entities.

3. Delegation and Oversight

3.1 NERC may delegate ~~the~~ responsibilities ~~offor~~ registration and certification to regional entities in accordance with requirements established by NERC. Delegation will be via the delegation agreement between NERC and the regional entity or other applicable agreement. The regional entity shall administer an organization registration and certification program in accordance with such delegation to meet NERC's program goals and requirements.

3.2 NERC shall develop and maintain a plan to ensure the continuity of organization registration and certification within the geographic or electrical boundaries of a regional entity in the event that no entity is certified as a regional entity for that region, or the regional entity withdraws as a regional entity, or does not operate its organization registration and certification program in accordance with delegation agreements and other requirements.

3.3 NERC shall develop and maintain a program to monitor and oversee each regional entity registration and certification program that is delegated authority through a delegation agreement or other applicable agreement.

3.3.1 This program shall monitor whether the regional entity carries out its organization registration and certification responsibilities program in accordance with NERC requirements, and whether there is consistency, fairness of administration, and comparability of outcomes within each regional entity's certification and registration program and among all of the programs.

3.3.2 Monitoring and oversight shall be accomplished through direct participation in certification audits and periodic reviews of program documents and records.

502. ERO Organization Registration and Certification Program Requirements

1. NERC shall have final authority in all matters constituting the organization registration and certification program.

1.1 The roles and authority of regional entities in the program are delegated from NERC pursuant to the rules of procedure through regional delegation agreements or other applicable agreements.

- 1.2 Processes for the program shall be owned by NERC; materials that each regional entity may use to participate in the program may be adapted by that organization subject to prior review and approval by NERC.
 - 1.3 Regional entities participating in the program shall perform their roles and responsibilities to meet NERC's requirements, as specified in the [delegation agreement, the](#) rules of procedure or NERC approved materials, including requirements for quality, thoroughness, timeliness, accuracy, efficiency, cost-effectiveness, and participation.
 - 1.4 Regional entity's decisions to grant or deny certifications shall be subject to NERC review and action, including modification or reversal.
 - 1.5 Regional entity's decisions with respect to the use of the transitional certification processes, as now provided for within the NERC *Organization Registration and Certification Manual (Appendix 5A)*, are subject to NERC review and action, including modification or reversal, should NERC deem such review or action warranted.
 - 1.6 Notwithstanding an entity's interest and right to object to the makeup of the certification team that will conduct the review of that entity, NERC, or the regional entity as authorized by NERC, will have final authority on the membership and member roles of that team.
 - 1.7 NERC, or the regional entity as authorized by NERC, shall make all assessments and decisions with respect to all aspects of the organization registration and certification program, including the completeness and accuracy of entities' applications.
2. To ensure consistency and fairness of the program, NERC shall develop procedures to be used by all regional entities in carrying out their organization registration and certification [programsresponsibilities](#), in accordance with the following criteria:
 - 2.1 NERC and the regional entities shall have data management processes and procedures that provide for integrity and retention of data and information collected.
 - 2.2 To maintain the integrity of the NERC Organization Registration and Certification Program, NERC, regional entities, certification audit team members, and committee members shall maintain the confidentiality of information provided by entities in order to become registered or certified.
 - 2.2.1 NERC and the regional entities shall have appropriate codes of conduct and confidentiality agreements for staff and other certification audit participants. Individuals not bound by ERO or approved regional entity codes of conduct and who serve on certification-related committees or audit teams shall sign an ERO

- confidentiality agreement prior to participating on the committee or team.
- 2.2.2 Staff, committee, and audit team members shall maintain the confidentiality of any certification-related discussions or documents that are designated as confidential (see Section 1500 for types of confidential information). Staff, committee, and audit team members shall treat as confidential the individual comments expressed during audits and report-drafting sessions.
- 2.2.3 Copies of notes, draft reports, and other interim documents developed or used during a certification audit shall be destroyed after the public posting of a final, uncontested report.
- 2.2.4 Information deemed by an entity, a regional entity, or NERC as confidential or critical energy infrastructure information shall not be distributed outside of a committee or team, or released publicly.
- 2.2.5 In the event that a staff, committee, or audit team member violates any of the confidentiality rules set forth above, the staff, committee, or audit team member and any member organization with which the individual is associated may be subject to immediate dismissal from the audit team and may be prohibited from future participation in compliance program activities by the regional entity or NERC.
- 2.2.6 NERC shall develop and provide training in auditing skills to all individuals who participate in certification audits. Training for ERO and regional entity personnel, as well as audit team leaders, shall be more comprehensive than training given to industry ~~subject matter~~ experts, ~~and~~ regional entity members, ~~and~~ ~~volunteers~~. Training for regional entity members ~~and~~ ~~volunteers~~ may be delegated to the regional entity.
- 2.3 An entity that is determined to be competent to perform a function after completing all certification requirements shall be deemed certified by NERC to perform that function.
- 2.3.1 An entity deemed certified by NERC to perform a function shall be considered and may be referred to, for example, as a certified transmission operator, certified balancing authority, or certified reliability coordinator. Only entities that have received such certifications from NERC shall be so designated.
- 2.3.2 NERC shall award certification to an entity only after it has demonstrated full competency to all certification requirements. An entity shall be awarded certification only for each function for which it has demonstrated full competency

503. Regional Entity Implementation of Organization Registration and Certification Program Requirements

1. **Delegation** — Recognizing the regional entity’s knowledge of and experience with their members, NERC may delegate responsibility for organization registration and certification to the regional entity through a delegation agreement or such responsibilities may be established through another applicable agreement.
2. **Registration** — The following organization registration activities shall be performed by the regional entity in accordance with the NERC *Organization Registration and Certification Procedures*, which are incorporated into the Rules of Procedure as **Appendix 5A**.

~~2.1 Entities seeking registration shall contact the regional entity in which they operate to become registered and, if necessary, certified.~~

~~2.22.1~~ Regional entities shall verify that all balancing authorities and transmission operators are under the responsibility of one and only one reliability coordinator.

~~2.32.2~~ Regional entities shall verify that all transmission elements of the bulk power system operated within their geographic boundaries are under the authority and control of one and only one transmission planner, planning authority, transmission owner, and transmission operator.

~~2.42.3~~ Regional entities shall verify that all loads and generation sources within their geographic boundaries are under the authority and control of one and only one balancing authority.

~~2.52.4~~ Regional entities shall verify that no geographical or electrical areas of the bulk power system within their boundaries have duplication of coverage or are lacking an entity to perform required duties and tasks as identified in the reliability standards.

3. **Certification** — The following organization certification activities shall be performed by the regional entity in accordance with an approved ERO delegation agreement or another applicable agreement:
 - 3.1 Entities seeking certification to perform one of the functions requiring certification shall contact the regional entity for the region(s) in which they operate to apply for certification. NERC shall have oversight of the regional entity’s certification activities and processes.
 - 3.2 Entities seeking certification and other affected operators shall provide all information and data requested by NERC or the regional entity to conduct the certification process, in accordance with 18 C.F.R. Section 39.2 in the United States.

- 3.3 Regional entities shall contact entities directly and provide notice of the requirement to be certified by NERC and initiate the process to certify any entities that do not voluntarily contact the regional entity or NERC.
- 3.4 Regional entities shall notify NERC of all certification applicants, including those not voluntarily seeking certification.
- 3.5 The regional entity shall establish certification procedures to include audit processes, schedules and deadlines, expectations of the applicants and all entities participating in the audit and certification processes, and requirements for certification auditors.
 - 3.5.1 The regional entity certification procedures will include provisions for on-site visits to the applicant's facilities to review the data collected through questionnaires, interviewing the operations and management personnel, inspecting the facilities and equipment (and requesting a demonstration of all tools identified in the certification standard), reviewing all necessary documents and data (including all agreements, processes, and procedures identified in the certification standard), reviewing certification documents and projected system operator work schedules, and reviewing any additional documentation that is needed to support the completed questionnaire or inquiries arising during the site visit.
 - 3.5.2 All industry experts and regional members participating in certification audits shall successfully complete appropriate training provided by NERC or the regional entity prior to performing an audit.
 - 3.5.3 The regional entity certification procedures will provide for preparation of a written report by the audit team detailing any deficiencies that must be resolved prior to certification along with any other recommendations for consideration by the entity, the regional entity, or NERC.
 - 3.5.4 The regional entity shall evaluate the competency of entities requiring certification to meet the minimum requirements established by the standards for each such function based on the requirements established by NERC.

504. Appeals

- 1. NERC shall maintain an appeals process to resolve any disputes related to registration or certification activities (*Organization Registration and Certification Manual* — **Appendix 5A**).
- 2. Each regional entity with delegated responsibilities [for certification](#) shall establish and maintain a fair, independent, and nondiscriminatory appeals process. The

regional entity appeals process shall culminate with the regional board or a committee established by and reporting to the board as the final adjudicator, provided that: ~~(1) in ERCOT, the Public Utility Commission of Texas may act as the final adjudicator, and (2)~~ where applicable, Canadian provincial governmental authorities may act as the final adjudicator in their jurisdictions. NERC shall be notified of all appeals and may observe any proceedings.

505. Program Maintenance

NERC shall maintain its program materials, including such manuals or other documents as it deems necessary, of the governing policies and procedures of the organization registration and certification program.

506. Independent Audit of NERC Organization Certification Program

1. NERC shall provide for an independent audit of its organization certification program at least once every three years, or more frequently, as determined by the board. The audit shall be conducted by independent expert auditors as selected by the board.
2. The audit shall evaluate the success and effectiveness of the NERC organization certification program in achieving its mission.
3. The final report shall be posted by NERC for public viewing ~~according to the reporting and disclosure process in Section 408.~~
4. If the audit report includes recommendations to improve the program, the administrators of the program shall provide a written response and plan to the board within 30 days of the final report.

507. Provisions Relating to Joint Registrations and Joint Registration Organizations

1. **Registration by a JRO.** In addition to registering as the entity responsible for all functions that a JRO performs itself, a JRO may register on behalf of one or more of its members or related entities for one or more functions as to which such members or related entities would otherwise be required to register, and thereby accept on behalf of such members or related entities all compliance responsibility, including reporting requirements, for all requirements of reliability standards applicable to the function or functions for which the JRO has registered on behalf of its members or related entities. Any entity seeking to register as a JRO for any or all requirements identified in the reliability standards that would otherwise be the responsibility of one or more of its members or related entities shall provide to the applicable regional entity information, in the form requested by the regional entity, sufficient to identify whether the entity or its member(s) or related entities will be responsible for compliance with each provision of the reliability standards for the applicable functional responsibilities covered by the joint registration. The JRO must identify its primary compliance contact. The JRO primary compliance contact is responsible for providing all of the information and data, including submitting reports, as needed by the regional entity for performing assessments of compliance.

- 2. Joint registration pursuant to written agreement.** Where a JRO and any of its members or related entities agree, in writing, upon a division of compliance responsibility among them for one or more reliability standard(s) applicable to a particular function, and/or for one or more requirements within particular reliability standard(s), both the JRO and such member(s) or related entit(ies) shall register as an organization responsible for that function. The JRO and its member(s) or related entit(ies) must have a written agreement that clearly specifies their respective responsibilities, which shall be submitted as part of the joint registration. Neither NERC nor the regional entity shall be parties to any such agreement between a JRO and its member or related entit(ies), nor shall NERC or the regional entity have responsibility for reviewing or approving any such agreement, other than to verify that the agreement provides for an allocation or assignment of responsibilities consistent with the joint registration.
- 3.** NERC or the regional entity may request clarification of any list submitted to it that identifies the compliance responsibilities of the JRO and its member(s) or related entit(ies), and may request such additional information as NERC or the regional entity deems appropriate.
- 4.** The regional entity shall notify NERC of each joint registration that the regional entity accepts. The regional entity's acceptance of a joint registration shall be a representation by the regional entity to NERC that the regional entity has concluded the joint registration will result in (1) no areas lacking any entities to perform the duties and tasks identified in and required by the reliability standards, and (2) no unnecessary duplication of such coverage of areas by entities to perform the duties and task identified in and required by the reliability standards or of required oversight of such coverage.
- 5.** NERC shall maintain, and shall post on its web site, a Joint Registration Organization registry listing all joint registrations that have been accepted by NERC or by a regional entity and the reliability standards or requirements thereof for which each JRO and each of its members or related entities is responsible under the joint registration. The postings on NERC's web site shall clearly identify the compliance responsibilities of the JRO and of each of its member(s) or related entit(ies). Such postings are intended to enable reliability coordinators and other system operators to be fully aware of responsibilities and chains of command in order to respond quickly and decisively to system operation events.
- 6.** Annually following submission of a joint registration, the JRO shall provide the regional entity with a list, in a form specified by the regional entity, that identifies the members or related entities and the functions for which the JRO has registered on behalf of such members or related entities and for which the JRO assumes compliance responsibility. Additionally, a JRO shall provide a revised list of compliance responsibilities to the regional entity each time the JRO accepts additional compliance responsibilities for a member or related entity or for a new member or related entity and each time that any compliance reliability reverts

from the JRO to a member or related entity. The regional entity shall promptly notify NERC of each such revision.

7. In the event of a violation of a reliability standard or of a requirement of a reliability standard, the JRO or its member or related entity identified in the Joint Registration Organization registry as responsible for such reliability standard or requirement shall be identified in the notices of [possible violation](#), alleged violation [and confirmed violation](#) and shall be assessed the sanction or penalty for the violation. In accordance with the NERC *Sanctions Guidelines*, for a violation that is attributable to a member or related entity that is registered under the joint registration, the penalty or sanction imposed for the violation will bear reasonable relation to the violation as incurred by that member or related entity and not the JRO. In the event a regional entity is not able to determine, based on the joint registration and the annual or other revised list submitted by the JRO, which entity is responsible for a particular reliability standard or requirement thereof that has been violated, the regional entity shall issue the notices of [possible violation](#), alleged violation [and confirmed violation](#) to, and shall impose any sanction or penalty on, the JRO. NERC and the regional entity shall have no responsibility for any allocation or collection of penalties or sanctions between or among the JRO and its member(s) or related entity(ies).

8. **Individual member registration.** Nothing in this Section 507 shall preclude a member of a JRO, a related entity, or any other entity, from registering on its own behalf and undertaking full compliance responsibility, including reporting requirements, for the reliability standards applicable to the function(s) for which the member or other entity is registering. A JRO member or related entity that registers as responsible for any reliability standard or requirement of a reliability standards shall inform the JRO of its registration.

SECTION 600 — PERSONNEL CERTIFICATION

601. Scope of Personnel Certification

Maintaining the reliability of the bulk electric system through implementation of the reliability standards requires skilled, trained and qualified system operators. The System Operator Certification Program provides the mechanism to ensure system operators are provided the education and training necessary to obtain the essential knowledge and skills and are therefore qualified to operate the bulk electric system. NERC, as the ERO, will ensure skilled, trained, and qualified system operators through the System Operator Certification Program.

NERC shall develop and maintain a personnel certification program to evaluate individuals and to issue credentials to individuals who demonstrate the required level of competence. A current version of such a program is the *System Operator Certification Program Manual*, which is incorporated into these rules as **Appendix 6**.

602. Structure of ERO Personnel Certification Program

1. The NERC personnel certification program shall be international in scope.
2. The personnel certification program shall have a governing body that (1) is able to independently exercise decision-making for all matters pertaining to certification, (2) includes individuals from the discipline being certified and whose composition addresses the needs of the users of the program (e.g., employers, regulators, etc.), and (3) has representation for each specialty or level within a discipline.
3. NERC shall maintain a nominating process for membership in the governing body. Nominations shall be open to all interested parties and self-nominations shall be accepted. The NERC Board of Trustees shall appoint members to the governing body from among those nominated. The members of the governing body shall serve at the pleasure of the board.
4. The personnel certification program governing body shall have control over the matters related to the personnel certification and recertification programs listed below, without being subject to approval by any other body.
 - 4.1 Policies and procedures, including eligibility requirements and application processing.
 - 4.2 Requirements for personnel certification, maintaining certification, and recertification.
 - 4.3 Examination content, development, and administration.
 - 4.4 Examination cut score.
 - 4.5 Grievance and disciplinary processes.

- 4.6 Governing body and subgroup(s)' meeting rules including agenda, frequency, and related procedures.
 - 4.7 Subgroup(s) appointments and work assignments.
 - 4.8 Publications about personnel certification and recertification.
 - 4.9 Setting fees for application, and all other services provided as a part of the personnel certification and recertification activities.
 - 4.10 Program funding, spending, and budget authority. Financial matters related to the operation of the program shall be segregated from other NERC activities.
5. The personnel certification program shall utilize written procedures for the selection of members of the governing body that prohibit the governing body from selecting a majority of its successors.
 6. The personnel certification program shall be separate from the accreditation and education functions of NERC in related disciplines.
 7. No member of the personnel certification program governing body or staff member working with the personnel certification program governing body shall have or exercise any authority or responsibility for compliance matters related to reliability standards concerning personnel certification.

603. Candidate Testing Mechanisms

1. The personnel certification program shall utilize reliable testing mechanisms to evaluate individual competence in a manner that is objective, fair to all candidates, job-related, and based on the knowledge and skill needed to function in the discipline.
2. The personnel certification program shall implement a formal policy of periodic review of the testing mechanisms to ensure ongoing relevance of the mechanisms to knowledge and skill needed in the discipline.
3. The personnel certification program shall utilize policies and procedures to ensure that all test administration and development materials are secure and demonstrate that these policies and procedures are consistently implemented.
4. The personnel certification program shall establish pass/fail levels that protect the public with a method that is based on competence and generally accepted in the psychometric community as being fair and reasonable.
5. The personnel certification program shall conduct ongoing studies to substantiate the reliability and validity of the testing mechanisms.

6. The personnel certification program shall utilize policies and procedures that govern how long examination records are kept in their original format.
7. The personnel certification program shall demonstrate that different forms of the testing mechanisms assess equivalent content and that candidates are not penalized for taking forms of varying difficulty.

604. Public Information About the Personnel Certification Program

1. The personnel certification program shall provide for publishing and availability of general descriptive material on the procedures used in examination construction and validation; all eligibility requirements and determination; fees; and examination administration documents, including: reporting of results, recertification requirements, and disciplinary and grievance procedures.
2. The personnel certification program shall publish and make available a comprehensive summary or outline of the information, knowledge, or functions covered by the examination.
3. The personnel certification program shall publish and make available at least annually a summary of certification activities for the program, including at least the following information: number of examinations delivered, the number passed, the number failed, and the number certified.

605. Responsibilities to Applicants for Certification or Recertification

The personnel certification program:

1. Shall not discriminate among applicants as to age, gender, race, religion, national origin, disability, or marital status and shall include a statement of non-discrimination in announcements of the program.
2. Shall comply with all requirements of applicable federal and state/provincial laws with respect to all certification and recertification activities, and shall require compliance of all contractors and/or providers of services.
3. Shall make available to all applicants copies of formalized procedures for application for, and attainment of, personnel certification and recertification and shall uniformly follow and enforce such procedures for all applicants.
4. Shall implement a formal policy for the periodic review of eligibility criteria and application procedures to ensure that they are fair and equitable.
5. Shall provide competently proctored examination sites.
6. Shall uniformly report examination results to applicants in a timely manner.
7. Shall give applicants failing the examination information on general content areas of deficiency.

8. Shall implement policies and procedures providing due process for applicants questioning eligibility determination, examination results, and certification status, and shall publish this information. A current version of such a procedure is the *NERC System Operator Certification Dispute Resolution Process*, which is incorporated into these rules as part of **Appendix 6**.
9. Shall develop and maintain a program manual containing the processes and procedures for applicants for certification and recertification.

606. Responsibilities to the Public and to Employers of Certified Practitioners

The personnel certification program:

1. Shall demonstrate that the testing mechanisms adequately measure the knowledge and skill required for entry, maintenance, and/or advancement in the profession for each position to be certified.
2. Shall award certification and recertification only after the skill and knowledge of the individual have been evaluated and determined to be acceptable.
3. Shall periodically publish or maintain, in an electronic format, a current list of those persons certified in the programs and have policies and procedures that delineate what information about a credential holder may be made public and under what circumstances.
4. Shall have formal policies and procedures for discipline of a credential holder, including the revocation of the certificate, for conduct deemed harmful to the public or inappropriate to the discipline (e.g., incompetence, unethical behavior, physical or mental impairment affecting performance). These procedures shall incorporate due process. The current procedure is the *NERC Certified System Operator Credential Disciplinary Action Procedure*, which is incorporated into these rules as part of **Appendix 6**.
5. Shall demonstrate that any title or credential awarded accurately reflects or applies to the practitioner's daily occupational or professional duties and is not confusing to employers, consumers, regulators, related professions, and/or other interested parties.

SECTION 700 — RELIABILITY READINESS EVALUATION AND IMPROVEMENT AND FORMATION OF SECTOR FORUMS

701 Confidentiality Requirements for Readiness Evaluations and Evaluation Team Members

1. All information made available or created during the course of any reliability readiness evaluation including, but not limited to, data, documents, observations and notes, shall be maintained as confidential by all evaluation team members, in accordance with the requirements of Section 1500.
2. Evaluation team members are obligated to destroy all confidential evaluation notes following the posting of the final report of the reliability readiness evaluation.
3. NERC will retain reliability readiness evaluation-related documentation, notes, and materials for a period of time as defined by NERC.
4. These confidentiality requirements shall survive the termination of the NERC Reliability Readiness Evaluation and Improvement Program.

702. Formation of Sector Forum

1. NERC will form a sector forum at the request of any five members of NERC that share a common interest in the safety and reliability of the bulk power system. The members of sector forum may invite such others of the members of NERC to join the sector forum as the sector forum deems appropriate.
2. The request to form a sector forum must include a proposed charter for the sector forum. The board must approve the charter.
3. NERC will provide notification of the formation of a sector forum to its membership roster. Notices and agendas of meetings shall be posted on NERC's Web site.
4. A sector forum may make recommendations to any of the NERC committees and may submit a standards authorization request to the NERC *Reliability Standards Development Procedure*.

SECTION 800 — RELIABILITY ASSESSMENT AND PERFORMANCE ANALYSIS

801. Objectives of the Reliability Assessment and Performance Analysis Program

The objectives of the NERC reliability assessment and performance analysis program are to: (1) conduct, and report the results of, an independent assessment of the overall reliability and adequacy of the interconnected North American bulk power systems, both as existing and as planned; (2) analyze off-normal events on the bulk power system; (3) identify the root causes of events that may be precursors of potentially more serious events; (4) assess past reliability performance for lessons learned; (5) disseminate findings and lessons learned to the electric industry to improve reliability performance; and (6) develop reliability performance benchmarks. The final reliability assessment reports shall be approved by the board for publication to the electric industry and the general public.

802. Scope of the Reliability Assessment Program

1. The scope of the reliability assessment program shall include:
 - 1.1 Review, assess, and report on the overall electric generation and transmission reliability (adequacy and operating reliability) of the interconnected bulk power systems, both existing and as planned.
 - 1.2 Assess and report on the key issues, risks, and uncertainties that affect or have the potential to affect the reliability of existing and future electric supply and transmission.
 - 1.3 Review, analyze, and report on regional self-assessments of electric supply and bulk power transmission reliability, including reliability issues of specific regional concern.
 - 1.4 Identify, analyze, and project trends in electric customer demand, supply, and transmission and their impacts on bulk power system reliability.
 - 1.5 Investigate, assess, and report on the potential impacts of new and evolving electricity market practices, new or proposed regulatory procedures, and new or proposed legislation (e.g. environmental requirements) on the adequacy and operating reliability of the bulk power systems.
2. The reliability assessment program shall be performed in a manner consistent with the reliability standards of NERC including but not limited to those that specify reliability assessment requirements.

803. Reliability Assessment Reports

The number and type of periodic assessments that are to be conducted shall be at the discretion of NERC. The results of the reliability assessments shall be documented in three reports: the long-term and the annual seasonal (summer) and the annual seasonal (winter) assessment reports. NERC shall also conduct special reliability assessments from time to time as circumstances warrant. The reliability assessment reports shall be reviewed and approved for publication by the board. The three regular reports are described below.

1. **Long-Term Reliability Assessment Report** — The annual long-term report shall cover a ten-year planning horizon. The planning horizon of the long-term reliability assessment report shall be subject to change at the discretion of NERC. Detailed generation and transmission adequacy assessments shall be conducted for the first five years of the review period. For the second five years of the review period, the assessment shall focus on the identification, analysis, and projection of trends in peak demand, electric supply, and transmission adequacy, as well as other industry trends and developments that may impact future electric system reliability. Reliability issues of concern and their potential impacts shall be presented along with any mitigation plans or alternatives. The long-term reliability assessment reports will generally be published in the fall (September) of each year. NERC will also publish electricity supply and demand data associated with the long-term reliability assessment report.
2. **Summer Assessment Report** — The annual summer seasonal assessment report typically shall cover the four-month (June–September) summer period. It shall provide an overall perspective on the adequacy of the generation resources and the transmission systems necessary to meet projected summer peak demands. It shall also identify reliability issues of interest and regional and subregional areas of concern in meeting projected customer demands and may include possible mitigation alternatives. The report will generally be published in mid-May for the upcoming summer period.
3. **Winter Assessment Report** — The annual winter seasonal assessment report shall cover the three-month (December–February) winter period. The report shall provide an overall perspective on the adequacy of the generation resources and the transmission systems necessary to meet projected winter peak demands. Similar to the summer assessment, the winter assessment shall identify reliability issues of interest and regional and subregional areas of concern in meeting projected customer demands and may also include possible mitigation alternatives. The winter assessment report will generally be published in mid-November for the upcoming winter period.
4. **Special Reliability Assessment Reports** — In addition to the long-term and seasonal reliability assessment reports, NERC shall also conduct special reliability assessments on a regional, interregional, and interconnection basis as conditions warrant, or as requested by the board or applicable governmental authorities. The teams of reliability and technical experts also may initiate special assessments of

key reliability issues and their impacts on the reliability of a regions, subregions, or interconnection (or a portion thereof). Such special reliability assessments may include, among other things, operational reliability assessments, evaluations of emergency response preparedness, adequacy of fuel supply, hydro conditions, reliability impacts of new or proposed environmental rules and regulations, and reliability impacts of new or proposed legislation that affects or has the potential to affect the reliability of the interconnected bulk power systems in North America.

804. Reliability Assessment Data and Information Requirements

To carry out the reviews and assessments of the overall reliability of the interconnected bulk power systems, the regional entities and other entities shall provide sufficient data and other information requested by NERC in support of the annual long-term and seasonal assessments and any special reliability assessments.

Some of the data provided for these reviews and assessment may be considered confidential from a competitive marketing perspective, a critical energy infrastructure information perspective, or for other purposes. Such data shall be treated in accordance with the provisions of Section 1500 – Confidential Information.

While the major sources of data and information for this program are the regional entities, a team of reliability and technical experts is responsible for developing and formulating its own independent conclusions about the near-term and long-term reliability of the bulk power systems.

In connection with the reliability assessment reports, requests shall be submitted to each of the regional entities for required reliability assessment data and other information, and for each region's self-assessment report. The timing of the requests will be governed by the schedule for the preparation of the assessment reports.

The regional self-assessments are to be conducted in compliance with NERC standards and the respective regional planning criteria. The team(s) of reliability and technical experts shall also conduct interviews with the regional entities as needed. The summary of the regional self-assessments that are to be included in the assessment reports shall follow the general outline identified in NERC's request. This outline may change from time to time as key reliability issues change.

In general, the regional reliability self-assessments shall address, among other areas, the following topics: demand and net energy for load; assessment of projected resource adequacy; any transmission constraints that may impact bulk transmission adequacy and plans to alleviate those constraints; any unusual operating conditions that could impact reliability for the assessment period; fuel supply adequacy; the deliverability of generation (both internal and external) to load; and any other reliability issues in the region and their potential impacts on the reliability of the bulk power systems.

805. Reliability Assessment Process

Based on their expertise, the review of the collected data, the review of the regional self-assessment reports, and interviews with the regional entities, as appropriate, the teams of reliability and technical experts shall perform an independent review and assessment of the generation and transmission adequacy of each region's existing and planned bulk power system. The results of the review teams shall form the basis of NERC's long-term and seasonal reliability assessment reports. The review and assessment process is briefly summarized below.

1. **Resource Adequacy Assessment** — The teams shall evaluate the regional demand and resource capacity data for completeness in the context of the overall resource capacity needs of the region. The team shall independently evaluate the ability of the regional entity members to serve their obligations given the demand growth projections, the amount of existing and planned capacity, including committed and uncommitted capacity, contracted capacity, or capacity outside of the region. If the region relies on capacity from outside of the region to meet its resource objectives, the ability to deliver that capacity shall be factored into the assessment. The demand and resource capacity information shall be compared to the resource adequacy requirements of the regional entity for the year(s) or season(s) being assessed. The assessment shall determine if the resource information submitted represents a reasonable and attainable plan for the regional entity and its members. For cases of inadequate capacity or reserve margin, the regional entity will be requested to analyze and explain any resource capacity inadequacies and its plans to mitigate the reliability impact of the potential inadequacies. The analysis may be expanded to include surrounding areas. If the expanded analysis indicates further inadequacies, then an interregional problem may exist and will be explored with the applicable regions. The results of these analyses shall be described in the assessment report.
2. **Transmission Adequacy and Operating Reliability Assessment** — The teams shall evaluate transmission system information that relates to the adequacy and operating reliability of the regional transmission system. That information shall include: regional planning study reports, interregional planning study reports, and/or regional operational study reports. If additional information is required, another data request shall be sent to the regional entity. The assessment shall provide a judgment on the ability of the regional transmission system to operate reliably under the expected range of operating conditions over the assessment period as required by NERC reliability standards. If sub-areas of the regional system are especially critical to the reliable operation of the regional bulk transmission system, these facilities or sub-areas shall be reviewed and addressed in the assessment. Any areas of concern related to the adequacy or operating reliability of the system shall be identified and reported in the assessment.
3. **Seasonal Operating Reliability Assessment** — The team(s) shall evaluate the overall operating reliability of the regional bulk transmission systems. In areas with potential resource adequacy or system operating reliability problems, operational readiness of the affected regional entities for the upcoming season

shall be reviewed and analyzed. The assessment may consider unusual but possible operating scenarios and how the system is expected to perform. Operating reliability shall take into account a wide range of activities, all of which should reinforce the regional entity's ability to deal with the situations that might occur during the upcoming season. Typical activities in the assessment may include: facility modifications and additions, new or modified operating procedures, emergency procedures enhancement, and planning and operating studies. The teams shall report the overall seasonal operating reliability of the regional transmission systems in the annual summer and winter assessment reports.

4. **Reporting of Reliability Assessment Results** — The teams of reliability and technical experts shall provide an independent assessment of the reliability of the regional entities and the North American interconnected bulk power system for the period of the assessment. While the regional entities are relied upon to provide the information to perform such assessments, the review team is not required to accept the conclusions provided by the regional entities. Instead, the review team is expected, based on their expertise, to reach their own independent conclusions about the status of the adequacy of the generation and bulk power transmission systems of North America.

The review team also shall strive to achieve consensus in their assessments. The assessments that are made are based on the best information available at the time. However, since judgment is applied to this information, legitimate differences of opinion can develop. Despite these differences, the review team shall work to achieve consensus on their findings.

In addition to providing long-term and seasonal assessments in connection with the reliability assessment program, the review team of experts shall also be responsible for recommending new and revised reliability standards related to the reliability assessments and the reliability of the bulk power systems. These proposals for new or revised standards shall be entered into NERC's Standards Development Process.

Upon completion of the assessment, the team shall share the results with the regional entities. The regional entities shall be given the opportunity to review and comment on the conclusions in the assessment and to provide additional information as appropriate. The reliability assessments and their conclusions are the responsibility of NERC's technical review team and NERC.

The preparation and approval of NERC's reliability assessment reports shall follow a prescribed schedule including review, comment, and possible approval by appropriate NERC committees. The long-term and seasonal (summer and winter) reliability assessment reports shall be further reviewed for approval by the board for publication to the electric industry.

806. Scope of the Reliability Performance and Analysis Program

The components of the program will include analysis of large-scale outages, disturbances, and near misses to determine root causes and lessons learned; identification and continuous monitoring of performance indices to detect emerging trends and signs of a decline in reliability performance; and communications of performance results, trends, recommendations, and initiatives to those responsible to take actions; followed with confirmation of actions to correct any deficiencies identified. Within NERC, the reliability performance program will provide performance results to the standards development and compliance enforcement programs to make the necessary adjustments to preserve reliability based on a risk-based approach.

807. Analysis of Major Events

Responding to major blackouts and other system disturbances or emergencies can be divided into four phases: situational assessment and communications; situation tracking and communications; data collection, investigation, analysis, and reporting; and follow-up on recommendations.

- a. NERC's role following a blackout or other major bulk power system disturbance or emergency is to provide leadership, coordination, technical expertise, and assistance to the industry in responding to the event. Working closely with the regional entities and reliability coordinators, NERC will coordinate and facilitate efforts among industry participants, and with state, federal, and provincial governments in the United States and Canada to support the industry's response.
- b. When responding to any event where physical or cyber security is suspected as a cause or contributing factor to an event, NERC will immediately notify appropriate government agencies and coordinate its activities with them.

c. Each user, owner, and operator of the bulk power system shall provide NERC and the applicable regional entities with such information as is necessary to enable NERC and the applicable regional entities to carry out their responsibilities under this section.

e.d. During the conduct of some NERC analyses, assistance may be needed from government agencies. This assistance could include: authority to require data reporting from affected or involved parties; communications with other agencies of government; investigations related to possible criminal or terrorist involvement in the event; resources for initial data gathering immediately after the event; authority to call meetings of affected or involved parties; and technical and analytical resources for studies.

d.e. NERC shall work with other participants to establish a clear delineation of roles, responsibilities, and coordination requirements among industry and government for the investigation and reporting of findings, conclusions, and recommendations related to major blackouts, disturbances, or other emergencies affecting the bulk power system with the objective of avoiding, to the extent possible, multiple investigations of the same event. If the event is confined to a single regional

entity, NERC representatives will participate as members of the regional entity analysis team.

e.f. NERC and applicable entity(s) shall apply the NERC *Blackout and Disturbance Response Procedures*, which are incorporated into these rules as **Appendix 8**. These procedures provide a framework to guide NERC's response to events that may have multiregional, national, or international implications. Experienced industry leadership shall be applied to tailor the response to the specific circumstances of the event. In accordance with that procedure, the NERC president will determine whether the event warrants analysis at the NERC-level. A regional entity may request that NERC elevate any analysis to a NERC level.

f.g. NERC will screen and analyze the findings and recommendations from the analysis, and those with generic applicability will be disseminated to the industry in accordance with section 810.

808. Analysis of Off-Normal Events, Potential System Vulnerabilities, and System Performance

1. NERC and regional entities shall analyze system and equipment performance events that do not rise to the level of a major blackout, disturbance, or system emergency, as described in section 807. NERC and regional entities shall also analyze potential vulnerabilities in the bulk power system brought to theirs attention by government agencies. The purpose of these analyses is to identify the root causes of events that may be precursors of potentially more serious events or that have the potential to cause more serious events, to assess past reliability performance for lessons learned, and to develop reliability performance benchmarks and trends.
2. NERC and regional entities will screen and analyze events and potential vulnerabilities for significance, and information from those with generic applicability will be disseminated to the industry in accordance with section 810.
3. Each user, owner, and operator, of the bulk power system shall provide NERC and the applicable regional entities with such information as is necessary to enable NERC and the applicable regional entities to carry out their responsibilities under this section.

809. Reliability Benchmarking

NERC shall identify and track key reliability indicators as a means of benchmarking reliability performance and measuring reliability improvements. This program will include assessing available metrics, developing guidelines for acceptable metrics, maintaining a performance metrics "dashboard" on the NERC Web site, and developing appropriate reliability performance benchmarks.

810. Information Exchange and Issuance of NERC Advisories, Recommendations and Essential Actions

1. Members of NERC and bulk power system owners, operators, and users shall provide NERC with detailed and timely operating experience information and data.
2. In the normal course of operations, NERC disseminates the results of its events analysis findings, lessons learned and other analysis and information gathering to the industry. These findings, lessons learned and other information will be used to guide the reliability assessment program.
3. When NERC determines it is necessary to place the industry or segments of the industry on formal notice of its findings, analyses, and recommendations, NERC will provide such notification in the form of specific operations or equipment Advisories, Recommendations or Essential Actions:
 - 3.1 Level 1 (Advisories) – purely informational, intended to advise certain segments of the owners, operators and users of the bulk power system of findings and lessons learned;
 - 3.2 Level 2 (Recommendations) – specific actions that NERC is recommending be considered on a particular topic by certain segments of owners, operators, and users of the bulk power system according to each entity’s facts and circumstances;
 - 3.3 Level 3 (Essential Actions) – specific actions that NERC has determined are essential for certain segments of owners, operators, or users of the bulk power system to take to ensure the reliability of the bulk power system. Such Essential Actions require NERC board approval before issuance.
4. The bulk power system owners, operators, and users to which Level 2 (Recommendations) and Level 3 (Essential Actions) notifications apply are to evaluate and take appropriate action on such issuances by NERC. Such bulk power system owners, operators, and users shall also provide reports of actions taken and timely updates on progress towards resolving the issues raised in the Recommendations and Essential Actions in accordance with the reporting date(s) specified by NERC.
5. NERC will advise the Commission and other applicable governmental authorities of its intent to issue all Level 1 Advisories, Level 2 Recommendations, and Level 3 Essential Actions at least five (5) business days prior to issuance, unless extraordinary circumstances exist that warrant issuance less than five (5) business days after such advice. NERC will file a report with the Commission and other applicable governmental authorities no later than thirty (30) days following the date by which NERC has requested the bulk power system owners, operators, and users to which a Level 2 Recommendation or Level 3 Essential Action issuance applies to provide reports of actions taken in response to the notification. NERC’s report to the Commission and other applicable governmental authorities will describe the actions taken by the relevant owners, operators, and users of the

bulk power system and the success of such actions taken in correcting any vulnerability or deficiency that was the subject of the notification, with appropriate protection for confidential or critical infrastructure information.

811. Equipment Performance Data

Through its Generating Availability Data System (GADS), NERC shall collect operating information about the performance of electric generating equipment; provide assistance to those researching information on power plant outages stored in its database; and support equipment reliability as well as availability analyses and other decision-making processes developed by GADS subscribers. GADS data is also used in conducting assessments of generation resource adequacy.

SECTION 900 — TRAINING AND EDUCATION

901. Scope of the Training and Education Program

Maintaining the reliability of the bulk electric system through implementation of the Reliability Standards requires informed and trained personnel. The training and education program will provide the education and training necessary for bulk power system personnel and regulators to obtain the essential knowledge necessary to understand and operate the bulk electric system.

NERC shall develop and maintain training and education programs for the purpose of establishing training requirements, developing materials, and developing training activities. The target audience of the training and education programs shall be bulk power system operating personnel including system operations personnel, operations support personnel (engineering and information technology), supervisors and managers, training personnel, and other personnel directly responsible for complying with NERC reliability standards who, through their actions or inactions, may impact the real-time, or day-ahead reliability of the bulk power system.

NERC shall also develop and provide appropriate training and education for industry participants and regulators affected by new or changed reliability standards or compliance requirements.

To accomplish those objectives:

1. NERC shall periodically conduct job task analyses for targeted bulk power system personnel to ensure that the training program content is properly aligned to the job tasks performed by those personnel.
2. NERC shall develop and maintain personnel training program curriculum requirements based on valid job-task analysis.
3. NERC shall periodically conduct performance surveys to determine the effectiveness of the training program and identify areas for further training development and improvement.
4. NERC shall develop training and education materials and activities to assist bulk power system entities implementing new or revised reliability standard requirements or other NERC-related changes.
5. NERC shall develop and provide training to people who participate in NERC and regional entity evaluations, audits, and investigations for the compliance enforcement program, organization certification program, and the continuing education program.

902. Continuing Education Program

NERC shall develop and maintain a continuing education program to foster the improvement of training and to promote quality in the training programs used by and

implemented by bulk power system entities. The program shall approve or accredit those activities and entities meeting NERC continuing education requirements.

1. NERC shall develop and implement continuing education program requirements that promote excellence in training programs and advance improved performance for bulk system personnel identified in Section 901.
2. NERC shall develop and maintain a process to approve or accredit continuing education providers and activities seeking approval or accreditation and meeting NERC-approved continuing education requirements.
3. NERC shall perform periodic audits on continuing education providers and training activities to ensure that the approved or accredited providers and training activities satisfy NERC continuing education requirements.
4. NERC shall develop and maintain an appeals process for disputed application reviews, interpretations of guidelines and standards, probation or suspension of NERC-approved provider status, or continuing education hour disputes.

SECTION 1000 — SITUATION AWARENESS AND INFRASTRUCTURE SECURITY

1001. Situation Awareness

NERC shall through the use of reliability coordinators and available tools, monitor present conditions on the bulk power system and provide leadership coordination, technical expertise, and assistance to the industry in responding to events as necessary. To accomplish these goals, NERC will:

1. Maintain real-time situation awareness of conditions on the bulk power system;
2. Notify the industry of significant bulk power system events that have occurred in one area, and which have the potential to impact reliability in other areas;
3. Maintain and strengthen high-level communication, coordination, and cooperation with governments and government agencies regarding real-time conditions; and
4. Enable the reliable operation of interconnected bulk power systems by facilitating information exchange and coordination among reliability service organizations.

1002. Reliability Support Services

NERC will provide tools and other support services for the benefit of reliability coordinators and other system operators, including the Area Control Error (ACE) and Frequency Monitoring System, NERC Hotline, Real-time Flows, System Data Exchange (SDX), Reliability Coordinator Information System (RCIS), Transmission Services Information Network (TSIN), Interchange Distribution Calculator (IDC), Interregional Security Network (ISN), and Central Repository for Security Events (CRC). To accomplish this goal, NERC will:

1. Maintain the reliability and effectiveness of all mission-critical operating reliability support systems and services;
2. Continue to support maintenance of a transmission provider curtailment report on the CRC site in response to Federal Energy Regulatory Commission Order 605;
3. Investigate and analyze the use of high-speed real-time system measurements, including phasors, in predicting the behavior and performance of the Eastern Interconnection; and
4. Facilitate real-time voice and data exchange services among reliability coordinators (e.g., Hotline, Interregional Security Network, NERCnet, System Data Exchange, etc.).

1003. Infrastructure Security Program

NERC shall coordinate electric industry activities to promote critical infrastructure protection of the bulk power system in North America by taking a leadership role in critical infrastructure protection of the electricity sector so as to reduce vulnerability and

improve mitigation and protection of the electricity sector's critical infrastructure. To accomplish these goals, NERC shall perform the following functions.

1. Electric Sector Information Sharing and Analysis Center (ESISAC)
 - 1.1 NERC shall serve as the electricity sector's Sector Coordinator and operate its Information Sharing and Analysis Center to gather information and communicate security-related threats and incidents within the sector, with United States and Canadian government agencies, and with other critical infrastructure sectors.
 - 1.2 NERC shall improve the capability of the ESISAC to analyze security threats and incident information and provide situational assessments for the electricity sector and governments.
 - 1.3 NERC shall work closely with the United States Department of Homeland Security, Department of Energy, Natural Resources Canada, and Public Safety and Emergency Preparedness Canada.
 - 1.4 NERC shall strengthen and expand these functions and working relationships with the electricity sector, other critical infrastructure industries, governments, and government agencies throughout North America to ensure the protection of the infrastructure of the bulk power system.
 - 1.5 NERC shall fill the role of the Electricity Sector Coordinating Council and coordinate with the Government Coordinating Council.
 - 1.6 NERC shall coordinate with other critical infrastructure sectors through active participation with the other Sector Coordinating Councils, the other ISACs, and the National Infrastructure Advisory Committee.
 - 1.7 NERC shall encourage and participate in coordinated critical infrastructure protection exercises, including interdependencies with other critical infrastructure sectors.
2. Security Planning
 - 2.1 NERC shall take a risk management approach to critical infrastructure protection, considering probability and severity, and recognizing that mitigation and recovery can be practical alternatives to prevention.
 - 2.2 NERC shall keep abreast of the changing threat environment through collaboration with government agencies.
 - 2.3 NERC shall develop criteria to identify critical physical and cyber assets, assess security threats, identify risk assessment methodologies, and assess effectiveness of physical and cyber protection measures.

- 2.4 NERC shall enhance and maintain the bulk power system critical spare transformer program, encourage increased participation by asset owners, and continue to assess the need to expand this program to include other critical bulk power system equipment.
- 2.5 NERC shall support implementation of the Cyber Security ~~Standard~~Standards through education and outreach.
- 2.6 NERC shall review and improve existing Security Guidelines, develop new Security Guidelines to meet the needs of the electricity sector, and consider whether any guidelines should be developed into standards.
- 2.7 NERC shall conduct education and outreach initiatives to increase awareness and respond to the needs of the electricity sector.
- 2.8 NERC shall strengthen relationships with federal, state, and provincial government agencies on critical infrastructure protection matters.
- 2.9 NERC shall maintain and improve mechanisms for the sharing of sensitive or classified information with federal, state, and provincial government agencies on critical infrastructure protection matters; work with DOE and DHS to implement the National Infrastructure Protection Plan, as applicable to the electricity sector; and coordinate this work with PSEPC.
- 2.10 NERC shall improve methods to better assess the impact of a possible physical attack on the bulk power system and means to deter, mitigate, and respond following an attack.
- 2.11 NERC shall assess the results of vulnerability assessments and enhance the security of System Control and Data Acquisition (SCADA) and process control systems by developing methods to detect an emerging cyber attack and the means to mitigate impacts on the bulk power systems.
- 2.12 NERC shall work with the National SCADA Test Bed and the Process Control Systems Forum to accelerate the development of technology that will enhance the security, safety, and reliability of process control and SCADA systems.

SECTION 1100 — ANNUAL NERC BUSINESS PLANS AND BUDGETS

1101. Scope of Business Plans and Budgets

The board shall determine the content of the budgets to be submitted to the applicable ERO governmental authorities with consultation from the members of the Members Representatives Committee, regional entities, and others in accordance with the bylaws. The board shall identify any activities outside the scope of NERC's statutory reliability functions, if any, and the appropriate funding mechanisms for those activities.

1102. NERC Funding and Cost Allocation

1. In order that NERC's costs shall be fairly allocated among interconnections and among regional entities, the NERC funding mechanism for all statutory functions shall be based on net energy for load (NEL).
2. NERC's costs shall be allocated so that all load (or, in the case of costs for an interconnection or regional entity, all load within that interconnection or regional entity) bears an equitable share of such costs based on NEL.
3. Costs shall be equitably allocated between countries or regional entities thereof for which NERC has been designated or recognized as the electric reliability authority.
4. Costs incurred to accomplish the statutory functions for one interconnection, regional entity, or group of entities will be directly assigned to that interconnection, regional entity, or group of entities provided that such costs are allocated equitably to end-users based on net energy for load.

1103. NERC Budget Development

1. The NERC annual budget process ~~shall be scheduled and conducted~~~~shall be initiated in March of for~~ each calendar year ~~so as to thereby~~ allowing a sufficient amount of time for NERC to receive member inputs, develop the budget, and receive board and, where authorized by applicable legislation or agreement, ERO governmental authority approval of the NERC budget for the following fiscal year, including timely submission of the proposed budget to FERC for approval in accordance with FERC regulations.
2. The NERC budget submittal to ERO governmental authorities shall include provisions for all ERO functions, all regional entity delegated functions as specified in delegation agreements and reasonable reserves and contingencies.
3. The NERC annual budget submittal to ERO governmental authorities shall include description and explanation of NERC's proposed ERO program activities for the year; the following information: (1) budget component justification based on statutory or other authorities; (2) explanation of how each the budgeted activity

lends itself to the accomplishment of the statutory or other authorities; sufficiency of resources provided for in the budget to carry out the ERO program responsibilities; explanation of the (3) methods of calculations and budget estimates; identification and explanation of changes in budget components from the previous year's budget; information on staffing and organization charts; and such other information as is required by FERC and other ERO governmental authorities having authority to approve the proposed budget (4) who prioritizes competing needs; (5) how the budget meets the objectives of affordability, sustainability, and efficiency and effectiveness of expenditures; (6) implementation to meet international standards; (7) transparency; and (8) accountability and execution in accordance with operating plan, performance measures, and shifting priorities.

4. NERC shall develop, in consultation with the regional entities, a reasonable and consistent system of accounts, to allow a meaningful comparison of actual results at the NERC and regional entity level by the applicable ERO governmental authorities.

1104. Submittal of Regional Entity Budgets to NERC

1. Each regional entity shall submit its proposed annual budget for carrying out its delegated authority functions as well as all other activities and funding to NERC in accordance with a schedule developed by NERC and the regional entities, which shall provide for the regional entity to submit its final budget that has been approved by its board of directors or other governing body no later than June 4July 1 of the prior year, in order to provide sufficient time for NERC's review and comment on the proposed budget and approval of the regional entity budget by the NERC Board of Trustees in time for the NERC and regional budgets to be submitted to FERC and other ERO governmental authorities for approval in accordance with their regulations. The regional entity's budget shall include, together with supporting materials in accordance with the budget and reporting format developed by NERC and the regional entities, including the regional entity's complete business plan and organization chart, explaining the proposed collection of all dues, fees, and charges and the proposed expenditure of funds collected in sufficient detail to justify the requested funding collection and budget expenditures.
2. NERC shall review and approve each regional entity's budget for meeting the requirements of its delegated authority. Concurrent with approving the NERC budget, NERC shall review and approve, or reject, each regional entity budget for filing.

~~3. NERC shall also have the right to review from time to time, in reasonable intervals but no less frequently than every three years, the financial books and records of each regional entity having delegated authority in order to ensure that the documentation fairly represents in all material respects appropriate funding of delegated functions.~~

1105. Submittal of NERC and Regional Entity Budgets to Governmental Authorities for Approval

1. NERC shall file for approval by the applicable ERO governmental authorities at least 130 days in advance of the start of each fiscal year. The filing shall include: (1) the complete NERC and regional entity budgets including the business plans and organizational charts approved by the board, (2) NERC's annual funding requirement (including regional entity costs for delegated functions), ~~(3) the previous year's audited financial statements~~, and (4) the mechanism for assessing charges to recover that annual funding requirement, together with supporting materials in sufficient detail to support the requested funding requirement.
2. NERC shall seek approval from each governmental authority requiring such approval for the funding requirements necessary to perform ERO activities within their jurisdictions.

1106. NERC and Regional Entity Billing and Collections

1. NERC shall request the regional entities to identify all load-serving entities³ within each regional entity and the NEL assigned to each load-serving entity, and the regional entities shall supply the requested information. The assignment of a funding requirement to an entity shall not be the basis for determining that the entity must be registered in the compliance registry.
2. NERC shall accumulate the NEL by load-serving entities for each ERO governmental authority and submit the proportional share of NERC funding requirements to each ERO governmental authority for approval together with supporting materials in sufficient detail to support the requested funding requirement.
3. NEL reported by balancing authorities within a region shall be used to rationalize and validate amounts allocated for collection through regional entity processes.
4. The billing and collection processes shall provide:
 - 4.1 A clear validation of billing and application of payments.
 - 4.2 A minimum of data requests to those being billed.
 - 4.3 Adequate controls to ensure integrity in the billing determinants including identification of entities responsible for funding NERC's activities.
 - 4.4 Consistent billing and collection terms.
5. NERC will bill and collect all budget requirements approved by applicable ERO governmental authorities (including the funds required to support those functions

³ A regional entity ~~shall~~ may allocate funding obligations using an ~~NERC approved~~ alternative method approved by NERC and by FERC and other appropriate ERO governmental authorities, as ~~stated~~ provided for in the regional delegation agreement.

assigned to the regional entities through the delegation agreements) directly from the load-serving entities or their designees or as directed by particular ERO governmental authorities, except where the regional entity is required to collect the budget requirements for NERC, in which case the regional entity will collect directly from the load-serving entities or as otherwise provided by agreement and submit funds to NERC. Alternatively, a load-serving entity may pay its allocated ERO costs through a regional entity managed collection mechanism.

6. NERC shall set a minimum threshold limit on the billing of small LSEs to minimize the administrative burden of collection.
7. NERC shall pursue any non-payments and shall request assistance from applicable governmental authorities as necessary to secure collection.
8. In the case where a Regional Entity performs the collection for ERO, the Regional Entity will not be responsible for non-payment in the event that a user, owner or operator of the Bulk Power System does not pay its share of dues, fees and charges in a timely manner, provided that such a Regional Entity shall use reasonably diligent efforts to collect dues, fees, and other charges from all entities obligated to pay them. However, any revenues not paid shall be recovered from others within the same region to avoid cross-subsidization between regions.
9. Both NERC and the regional entities also may bill members or others for functions and services not within statutory requirements or otherwise authorized by the appropriate governmental authorities. Costs and revenues associated with these functions and services shall be separately identified and not commingled with billings associated with the funding of NERC or of the regional entities for delegated activities.

1107. Penalty Applications

1. Where NERC or a regional entity initiates an investigationa compliance monitoring and enforcement process that leads to imposition of a penalty, the entity that initiated the processinvestigation shall receive any penalty monies imposed and collected as a result of that processinvestigation, unless a different disposition of the penalty monies is provided for in the delegation agreement, or in a contract or a disposition of the violation that is approved by NERC and FERC.
2. All funds from financial penalties assessed in the United States received by the entity initiating the compliance monitoring and enforcement processinvestigation shall be applied as a general offset to the entity's budget requirements for the subsequent fiscal year, if received by July 1, or for the second subsequent fiscal year, if received on or after July 1. Funds from financial penalties shall not be directly applied to any program maintained by the investigating-entity conducting the compliance monitoring and enforcement process. Funds from financial penalties assessed against a Canadian entity shall be applied as specified by legislation or agreement.

3. In the event that a ~~n investigation is performed~~ compliance monitoring and enforcement process is conducted jointly by NERC and a regional entity, the regional entity shall receive the penalty monies and offset the entity's budget requirements for the subsequent fiscal year.
4. Exceptions or alternatives to the ~~foregoing provisions~~ policy due to statutory or regulatory restrictions will be ~~considered on a case by case basis~~ allowed if approved by NERC and by FERC any other applicable ERO governmental authority.

1108. Special Assessments

On a demonstration of unforeseen and extraordinary circumstances requiring additional funds prior to the next funding cycle, NERC shall file with the applicable ERO governmental authorities, where authorized by applicable legislation or agreement, for authorization for an amended or supplemental budget for NERC or a regional entity and, if necessary under the amended or supplemental budget, to collect a special or additional assessment for statutory functions of NERC or the regional entity. Such filing shall include supporting materials to justify the requested funding, including any departure from the approved funding formula or method.

SECTION 1200 — REGIONAL DELEGATION AGREEMENTS

1201. Pro Forma Regional Delegation Agreement

NERC shall develop and maintain a pro forma regional entity delegation agreement, which shall serve as the basis for negotiation of consistent agreements for the delegation of ERO functions to regional entities.

1202. Regional Entity Essential Requirements

NERC shall establish the essential requirements for an entity to become qualified and maintain good standing as a regional entity.

1203. Negotiation of Regional Delegation Agreements

NERC shall, for all areas of North America that have provided NERC with the appropriate authority, negotiate regional delegation agreements for the purpose of ensuring all areas of the North American bulk power systems are within a regional entity area. In the event NERC is unable to reach agreement with regional entities for all areas, NERC shall provide alternative means and resources for implementing NERC functions within those areas. No delegation agreement shall take effect until it has been approved by the appropriate ERO governmental authority.

1204. Conformance to Rules and Terms of Regional Delegation Agreements

NERC and each regional entity shall comply with all applicable ERO rules of procedure and the obligations stated in the regional delegation agreement.

1205. Sub-delegation

The regional entity shall not sub-delegate any responsibilities and authorities delegated to it by its regional delegation agreement with NERC except with the approval of NERC and FERC and other appropriate ERO governmental authorities. Responsibilities and authorities may only be sub-delegated to another regional entity. Regional entities may share resources with one another so long as such arrangements do not result in cross-subsidization or in any sub-delegation of authorities.

1206. Nonconformance to Rules or Terms of Regional Delegation Agreement

If a regional entity is unable to comply or is not in compliance with an ERO rule of procedure or the terms of the regional delegation agreement, the regional entity shall immediately notify NERC in writing, describing the area of nonconformance and the reason for not being able to conform to the rule. NERC shall evaluate each case and inform the affected regional entity of the results of the evaluation. If NERC determines that a rule or term of the regional delegation agreement has been violated by an entity or cannot practically be implemented by an entity, NERC shall notify the applicable ERO governmental authorities and take any actions necessary to address the situation.

1207. Regional Entity Audits

Approximately every ~~three~~five years and more frequently if necessary for cause, NERC shall audit each regional entity to verify that the regional entity continues to comply with NERC rules of procedure and the obligations of NERC delegation agreement. Audits of regional entities shall be conducted, to the extent practical, based on professional auditing standards recognized in the U.S., including Generally Accepted Auditing Standards, Generally Accepted Government Auditing Standards, and standards sanctioned by the Institute of Internal Auditors, and if applicable to the coverage of the audit, may be based on Canadian or other international standards. The audits required by this section 1207 shall not duplicate the audits of regional entity compliance monitoring and enforcement programs provided for in **Appendix 4A, Audit of Regional Compliance Programs, to these rules of procedure.**

1208. Process for Considering Registered Entity Requests to Transfer to Another Regional Entity

1. A registered entity that is registered in the region of one regional entity and believes its registration should be transferred to a different regional entity may submit a written request to both regional entities requesting that they process the proposed transfer in accordance with this section. The registered entity's written request shall set forth the reasons the registered entity believes justify the proposed transfer and shall describe any impacts of the proposed transfer on other bulk power system owners, operators, and users.
2. After receiving the registered entity's written request, the two regional entities shall consult with each other as to whether they agree or disagree that the requested transfer is appropriate. The regional entities may also consult with affected reliability coordinators, balancing authorities and transmission operators as appropriate. Each regional entity shall post the request on its web site for public comment period of 21 days. In evaluating the proposed transfer, the regional entities shall consider the location of the registered entity's bulk power system facilities in relation to the geographic and electrical boundaries of the respective regions; the impacts of the proposed transfer on other bulk power system owners, operators; and users, the impacts of the proposed transfer on the current and future staffing, resources, budgets and assessments to other load-serving entities of each regional entity, including the sufficiency of the proposed transferee regional entity's staffing and resources to perform compliance monitoring and enforcement activities with respect to the registered entity; the registered entity's compliance history with its current regional entity; and the manner in which pending compliance monitoring and enforcement matters concerning the registered entity would be transitioned from the current regional entity to the transferee regional entity; along with any other reasons for the proposed transfer stated by the registered entity and any other reasons either regional entity considers relevant. The regional entities may request that the registered entity provide additional data and information concerning the proposed transfer for the regional entities' use in their evaluation. The registered entity's current regional entity shall notify the registered entity in writing as to whether (i) the two regional entities agree that the requested transfer is appropriate, (ii) the

two regional entities agree that the requested transfer is not appropriate and should not be processed further, or (iii) the two regional entities disagree as to whether the proposed transfer is appropriate.

3. If the two regional entities agree that the requested transfer is appropriate, they shall submit a joint written request to NERC requesting that the proposed transfer be approved and that the delegation agreement between NERC and each of the regional entities be amended accordingly. The regional entities' joint written submission to NERC shall describe the reasons for the proposed transfer; the location of the registered entity's bulk power system facilities in relation to the geographic and electrical boundaries of the respective regions; the impacts of the proposed transfer on other bulk power system owners, operators, and users; the impacts of the proposed transfer on the current and future staffing, resources, budgets and assessments of each regional entity, including the sufficiency of the proposed transferee regional entity's staffing and resources to perform compliance monitoring and enforcement activities with respect to the registered entity; the registered entity's compliance history with its current registered entity; and the manner in which pending compliance monitoring and enforcement matters concerning the registered entity will be transitioned from the current regional entity to the transferee regional entity. The NERC Board of Trustees shall consider the proposed transfer based on the submissions of the regional entities and any other information the board considers relevant, and shall approve or disapprove the proposed transfer and the related delegation agreement amendments. The NERC board may request that the regional entities provide additional information, or obtain additional information from the registered entity, for the use of the NERC board in making its decision. If the NERC board approves the proposed transfer, NERC shall file the related delegation agreements with FERC for approval.

4. If the two regional entities do not agree with each other that the proposed transfer is appropriate, the regional entity supporting the proposed transfer shall, if requested by the registered entity, submit a written request to NERC to approve the transfer and the related delegation agreement amendments. The regional entity's written request shall include the information specified in section 1208.3. The regional entity that does not believe the proposed transfer is appropriate will be allowed to submit a written statement to NERC explaining why the regional entity believes the transfer is not appropriate and should not be approved. The NERC Board of Trustees shall consider the proposed transfer based on the submissions of the regional entities and any other information the board considers relevant, and shall approve or disapprove the proposed transfer and the related delegation agreement amendments. The NERC board may request that the regional entities provide additional information, or obtain additional information from the registered entity, for the use of the NERC board in making its decision. If the NERC board approves the proposed transfer, NERC shall file the related delegation agreements with FERC for approval.

5. Prior to action by the NERC Board of Trustees on a proposed transfer of registration under Section 1208.3 or 1208.4, NERC shall post information concerning the proposed transfer, including the submissions from the regional entities, on its Web site for at least twenty-one (21) days for the purpose of receiving public comment.
6. If the NERC Board of Trustees disapproves a proposed transfer presented to it pursuant to either section 1208.3 or 1208.4, the regional entity or entities that believe the transfer is appropriate may, if requested to do so by the registered entity, file a petition with FERC pursuant to 18 C.F.R. section 39.8(f) and (g) requesting that FERC order amendments to the delegation agreements of the two registered entities to effectuate the proposed transfer.
7. No transfer of a registered entity from one regional entity to another regional entity shall be effective (i) unless approved by FERC, and (ii) any earlier than the first day of January of the second calendar year following approval by FERC, unless an earlier effective date is agreed to by both regional entities and NERC and approved by FERC.

SECTION 1300 — COMMITTEES

1301. Establishing Standing Committees

The board may from time to time create standing committees. In doing so, the board shall approve the charter of each committee and assign specific authority to each committee necessary to conduct business within that charter. Each standing committee shall work within its board-approved charter and shall be accountable to the board for performance of its board-assigned responsibilities. A NERC standing committee may not delegate its assigned work to a member forum, but, in its deliberations, may request the opinions of and consider the recommendations of a member forum.

1302. Committee Membership

Each committee shall have a defined membership composition that is explained in its charter. Committee membership may be unique to each committee, and can provide for balanced decision-making by providing for representatives from each sector or, where sector representation will not bring together the necessary diversity of opinions, technical knowledge and experience in a particular subject area, by bringing together a wide diversity of opinions from industry experts with outstanding technical knowledge and experience in a particular subject area. Committee membership shall also provide the opportunity for an equitable number of members from the United States and Canada, based approximately on proportionate net energy for load. All committees and other subgroups (except for those organized on other than a sector basis because sector representation will not bring together the necessary diversity of opinions, technical knowledge and experience in a particular subject area) must ensure that no two stakeholder sectors are able to control the vote on any matter, and no single sector is able to defeat a matter. With regard to committees and subgroups pertaining to development of, interpretation of, or compliance with standards, NERC shall provide a reasonable opportunity for membership from sectors desiring to participate. Committees and subgroups organized on other than a sector basis shall be reported to the NERC board and the Member Representatives Committee, along with the reasons for constituting the committee or subgroup in the manner chosen. In such cases and subject to reasonable restrictions necessary to accomplish the mission of such committee or subgroup, NERC shall provide a reasonable opportunity for additional participation, as members or official observers, for sectors not represented on the committee or subgroup.

1303. Procedures for Appointing Committee Members

Committee members shall be nominated and selected in a manner that is open, inclusive, and fair. Unless otherwise stated in these rules or approved by the board, all committee member appointments shall be approved by the board, and committee officers shall be appointed by the Chairman of the Board.

1304. Procedures for Conduct of Committee Business

1. Notice to the public of the dates, places, and times of meetings of all committees, and all nonconfidential material provided to committee members, shall be posted

on the Corporation's Web site at approximately the same time that notice is given to committee members. Meetings of all standing committees shall be open to the public, subject to reasonable limitations due to the availability and size of meeting facilities; provided that the meeting may be held in or adjourn to closed session to discuss matters of a confidential nature, including but not limited to personnel matters, compliance enforcement matters, litigation, or commercially sensitive or critical infrastructure information of any entity.

2. NERC shall maintain a set of procedures, approved by the board, to guide the conduct of business by standing committees.

1305. Committee Subgroups

Standing committees may appoint subgroups using the same principles as in Section 1302.

SECTION 1400 — AMENDMENTS TO THE NERC RULES OF PROCEDURE

1401. Proposals for Amendment or Repeal of Rules of Procedure

In accordance with the bylaws of NERC, requests to amend or repeal the rules of procedure may be submitted by (1) any ten members of NERC, which number shall include members from at least three membership segments, (2) the Member Representatives Committee, (3) a standing committee of NERC to whose function and purpose the rule pertains, or (4) an officer of the ERO.

1402. Approval of Amendment or Repeal of Rules of Procedure

Amendment to or repeal of rules of procedure shall be approved by the board after public notice and opportunity for comment in accordance with the bylaws of NERC. In approving changes to the rules of procedure, the board shall consider the inputs of the Member Representatives Committee, other ERO committees affected by the particular changes to the rules, and other stakeholders as appropriate. After board approval, the amendment or repeal shall be submitted to the ERO governmental authorities for approval, where authorized by legislation or agreement. No amendment to or repeal of the rules of procedure shall be effective until it has been approved by the applicable ERO governmental authorities.

1403. Alternative Procedure for Violation Risk Factors

In the event the standards development process fails to produce violation risk factors for a particular standard in a timely manner, the Board of Trustees may adopt violation risk factors for that standard after notice and opportunity for comment. In adopting violation risk factors, the board shall consider the inputs of the Member Representatives Committee and affected stakeholders.

SECTION 1500 — CONFIDENTIAL INFORMATION

1501. Definitions

1. **Confidential information** means (i) confidential business and market information; (ii) critical energy infrastructure information; (iii) personnel information that identifies or could be used to identify a specific individual, or reveals personnel, financial, medical, or other personal information; (iv) work papers, including any records produced for or created in the course of an evaluation or audit; (v) investigative files, including any records produced for or created in the course of an investigation; or (vi) cybersecurity incident information; provided, that public information developed or acquired by an entity shall be excluded from this definition.
2. **Confidential business and market information** means any information that pertains to the interests of any entity, that was developed or acquired by that entity, and that is proprietary or competitively sensitive.
3. **Critical energy infrastructure information** means specific engineering, vulnerability, or detailed design information about proposed or existing critical infrastructure that (i) relates details about the production, generation, transportation, transmission, or distribution of energy; (ii) could be useful to a person in planning an attack on critical infrastructure; and (iii) does not simply give the location of the critical infrastructure.
4. **Critical infrastructure** means existing and proposed systems and assets, whether physical or virtual, the incapacity or destruction of which would negatively affect security, economic security, public health or safety, or any combination of those matters.
5. **Cybersecurity incident information** means any information related to, describing, or which could be used to plan or cause a cybersecurity incident as defined in 18 C.F.R. § 39.1.

1502. Protection of Confidential Information

1. **Identification of Confidential Information** — An owner, operator, or user of the bulk power system and any other party (the “submitting entity”) shall mark as confidential any information that it submits to NERC or a regional entity (the “receiving entity”) that it reasonably believes contains confidential information as defined by these rules, indicating the category or categories defined in Section 1501 in which the information falls. If the information is subject to a prohibition on public disclosure in the Commission-approved rules of a regional transmission organization or independent system operator or a similar prohibition in applicable federal, state, or provincial laws, the submitting entity shall so indicate and provide supporting references and details.

2. **Confidentiality** — Except as provided herein, a receiving entity shall keep in confidence and not copy, disclose, or distribute any confidential information or any part thereof without the permission of the submitting entity, except as otherwise legally required.
3. **Information no longer Confidential** – If a submitting entity concludes that information for which it had sought confidential treatment no longer qualifies for that treatment, the submitting entity shall promptly so notify NERC or the relevant regional entity.

1503. Requests for Information

1. **Limitation** — A receiving entity shall make information available only to one with a demonstrated need for access to the information from the receiving entity.
2. **Form of Request** — A person with such a need may request access to information by using the following procedure:
 - 2.1 The request must be in writing and clearly marked “Request for Information.”
 - 2.2 The request must identify the individual or entity that will use the information, explain the requester’s need for access to the information, explain how the requester will use the information in furtherance of that need, and state whether the information is publicly available or available from another source or through another means. If the requester seeks access to information that is subject to a prohibition on public disclosure in the Commission-approved rules of a regional transmission organization or independent system operator or a similar prohibition in applicable federal, state, or provincial laws, the requester shall describe how it qualifies to receive such information.
 - 2.3 The request must stipulate that, if the requester does not seek public disclosure, the requester will maintain as confidential any information received for which a submitting party has made a claim of confidentiality in accordance with NERC’s rules. As a condition to gaining access to such information, a requester shall execute a non-disclosure agreement in a form approved by NERC’s board of trustees.
3. **Notice and Opportunity for Comment** — Prior to any decision to disclose information marked as confidential, the receiving entity shall provide written notice to the submitting entity and an opportunity for the submitting entity to either waive objection to disclosure or provide comments as to why the confidential information should not be disclosed. Failure to provide such comments or otherwise respond is not deemed waiver of the claim of confidentiality.

4. **Determination by ERO or Regional Entity** — Based on the information provided by the requester under Rule 1503.2, any comments provided by the submitting entity, and any other relevant available information, the chief executive officer or his or her designee of the receiving entity shall determine whether to disclose such information.
5. **Appeal** — A person whose request for information is denied in whole or part may appeal that determination to the President of NERC (or the President’s designee) within 30 days of the determination. Appeals filed pursuant to this Rule must be in writing, addressed to the President of NERC (or the President’s designee), and clearly marked “Appeal of Information Request Denial.”

NERC will provide written notice of such appeal to the submitting entity and an opportunity for the submitting entity to either waive objection to disclosure or provide comments as to why the confidential information should not be disclosed; provided that any such comments must be received within 30 days of the notice and any failure to provide such comments or otherwise respond is not deemed a waiver of the claim of confidentiality.

The President of NERC (or the President’s designee) will make a determination with respect to any appeal within 30 days. In unusual circumstances, this time limit may be extended by the President of NERC (or the President’s designee), who will send written notice to the requester setting forth the reasons for the extension and the date on which a determination on the appeal is expected.

6. **Disclosure of Information** — In the event the receiving entity, after following the procedures herein, determines to disclose information designated as confidential information, it shall provide the submitting entity no fewer than 21 days’ written notice prior to releasing the information in order to enable such submitting entity to (a) seek an appropriate protective order or other remedy, (b) consult with the receiving entity with respect to taking steps to resist or narrow the scope of such request or legal process, or (c) waive compliance, in whole or in part, with the terms of this Rule. Should a receiving entity be required to disclose confidential information, or should the submitting entity waive objection to disclosure, the receiving entity shall furnish only that portion of the confidential information which the receiving entity’s counsel advises is legally required.
7. **Posting of Determinations on Requests for Disclosure of Confidential Information** — Upon making its determination on a request for disclosure of confidential information, NERC or the regional entity, as applicable, shall (i) notify the requester that the request for disclosure is granted or denied, (ii) publicly post any determination to deny the request to disclose confidential information, including in such posting an explanation of the reasons for the denial (but without in such explanation disclosing the confidential information), and (iii) publicly post any determination that information claimed by the submitting entity to be confidential information is not confidential information (but without in such

posting disclosing any information that has been determined to be confidential information).

1504. Employees, Contractors and Agents

A receiving entity shall ensure that its officers, trustees, directors, employees, subcontractors and subcontractors' employees, and agents to whom confidential information is exposed are under obligations of confidentiality that are at least as restrictive as those contained herein.

1505. Provision of Information to FERC and Other Governmental Authorities

1. **Request** — A request from FERC for reliability information with respect to owners, operators, and users of the bulk power system within the United States is authorized by Section 215 of the Federal Power Act. Other applicable ERO governmental authorities may have similar authorizing legislation that grants a right of access to such information. Unless otherwise directed by FERC or its staff or the other ERO governmental authority requesting the information, upon receiving such a request, a receiving entity shall provide contemporaneous notice to the applicable submitting entity. In its response to such a request, a receiving entity shall preserve any mark of confidentiality and shall notify FERC or other appropriate governmental authorities that the submitting entity has marked the information as confidential.
2. **Continued Confidentiality** — Each receiving entity shall continue to treat as confidential all confidential information that it has submitted to NERC or to FERC or another appropriate ERO governmental authority, until such time as FERC or the other appropriate ERO governmental authority authorizes disclosure of such information.

1506. Permitted Disclosures

1. **Confirmed Violations** — Nothing in this Section 1500 shall prohibit the disclosure of a violation at the point when the matter is filed with an appropriate governmental authority as a notice of penalty, the “violator” admits to the violation, or the alleged violator and NERC or the regional entity reach a settlement regarding the violation.
2. **Compliance Information** — NERC and the regional entities are authorized to exchange confidential information related to evaluations, audits, and investigations in furtherance of the compliance and enforcement program, on condition they continue to maintain the confidentiality of such information.

1507. Remedies for Improper Disclosure

Any person engaged in NERC or regional entity activity under section 215 of the Federal Power Act or the equivalent laws of other appropriate governmental authorities who improperly discloses information determined to be confidential may lose access to confidential information on a temporary or permanent basis and may be subject to

adverse personnel action, including suspension or termination. Nothing in Section 1500 precludes an entity whose information was improperly disclosed from seeking a remedy in an appropriate court.

SECTION 1600 — REQUESTS FOR DATA OR INFORMATION

1601. Scope of a NERC or Regional Entity Request for Data or Information

Within the United States, NERC and regional entities may request data or information that is necessary to meet their obligations under Section 215 of the Federal Power Act, as authorized by Section 39.2(d) of the Commission’s regulations, 18 C.F.R. § 39.2(d). In other jurisdictions NERC and regional entities may request comparable data or information, using such authority as may exist pursuant to these rules and as may be granted by ERO governmental authorities in those other jurisdictions. The provisions of Section 1600 shall not apply to requirements contained in any Reliability Standard to provide data or information; the requirements in the Reliability Standards govern. The provisions of Section 1600 shall also not apply to data or information requested in connection with a compliance or enforcement action under Section 215 of the Federal Power Act, Section 400 of these Rules of Procedure, or any procedures adopted pursuant to those authorities, in which case the Rules of Procedure applicable to the production of data or information for compliance and enforcement actions shall apply.

1602. Procedure for Authorizing a NERC Request for Data or Information

1. NERC shall provide a proposed request for data or information or a proposed modification to a previously-authorized request, including the information specified in paragraph 1602.2.1 or 1602.2.2 as applicable, to the Commission’s Office of Electric Reliability at least twenty-one (21) days prior to initially posting the request or modification for public comment. Submission of the proposed request or modification to the Office of Electric Reliability is for the information of the Commission. NERC is not required to receive any approval from the Commission prior to posting the proposed request or modification for public comment in accordance with paragraph 1602.2 or issuing the request or modification to reporting entities following approval by the Board of Trustees.
2. NERC shall post a proposed request for data or information or a proposed modification to a previously authorized request for data or information for a forty-five (45) day public comment period.
 - 2.1. A proposed request for data or information shall contain, at a minimum, the following information: (i) a description of the data or information to be requested, how the data or information will be used, and how the availability of the data or information is necessary for NERC to meet its obligations under applicable laws and agreements; (ii) a description of how the data or information will be collected and validated; (iii) a description of the entities (by functional class and jurisdiction) that will be required to provide the data or information (“reporting entities”); (iv) the schedule or due date for the data or information; (v) a description of any restrictions on disseminating the data or information (e.g., “confidential,” “critical energy infrastructure information,” “aggregating”

or “identity masking”); and (vi) an estimate of the relative burden imposed on the reporting entities to accommodate the data or information request.

- 2.2. A proposed modification to a previously authorized request for data or information shall explain (i) the nature of the modifications; (ii) an estimate of the burden imposed on the reporting entities to accommodate the modified data or information request, and (iii) any other items from paragraph 1.1 that require updating as a result of the modifications.
3. After the close of the comment period, NERC shall make such revisions to the proposed request for data or information as are appropriate in light of the comments. NERC shall submit the proposed request for data or information, as revised, along with the comments received, NERC’s evaluation of the comments and recommendations, to the Board of Trustees.
4. In acting on the proposed request for data or information, the Board of Trustees may authorize NERC to issue it, modify it, or remand it for further consideration.
5. NERC may make minor changes to an authorized request for data or information without board approval. However, if a reporting entity objects to NERC in writing to such changes within 21 days of issuance of the modified request, such changes shall require board approval before they are implemented.
6. Authorization of a request for data or information shall be final unless, within thirty (30) days of the decision by the Board of Trustees, an affected party appeals the authorization under this Section 1600 to the ERO governmental authority.

1603. Owners, Operators, and Users to Comply

Owners, operators, and users of the bulk power system registered on the NERC Compliance Registry shall comply with authorized requests for data and information. In the event a reporting entity within the United States fails to comply with an authorized request for data or information under Section 1600, NERC may request the Commission to exercise its enforcement authority to require the reporting entity to comply with the request for data or information and for other appropriate enforcement action by the Commission. NERC will make any request for the Commission to enforce a request for data or information through a non-public submission to the Commission’s enforcement staff.

1604. Requests by Regional Entity for Data or Information

1. A regional entity may request that NERC seek authorization for a request for data or information to be applicable within the footprint of the regional entity, either as a freestanding request or as part of a proposed NERC request for data or information. Any such request must be consistent with this Section 1600.
2. A regional entity may also develop its own procedures for requesting data or information, but any such procedures must include at least the same procedural

elements as are included in this Section 1600. Any such regional entity procedures or changes to such procedures shall be submitted to NERC for approval. Upon approving such procedures or changes thereto, NERC shall file the proposed procedures or proposed changes for approval by the Commission and any other ERO governmental authorities applicable to the regional entity. The regional entity procedures or changes to such procedures shall not be effective in a jurisdiction until approved by, and in accordance with any revisions directed by, the Commission or other ERO governmental authority.

1605. Confidentiality

If the approved data or information request includes a statement under Section 1602.1.1(v) that the requested data or information will be held confidential or treated as critical energy infrastructure information, then the applicable provisions of Section 1500 will apply without further action by a submitting entity. A submitting entity may designate any other data or information as confidential pursuant to the provisions of Section 1500, and NERC or the regional entity shall treat that data or information in accordance with Section 1500. NERC or a regional entity may utilize additional protective procedures for handling particular requests for data or information as may be necessary under the circumstances.

1606. Expedited Procedures for Requesting Time-Sensitive Data or Information

1. In the event NERC or a regional entity must obtain data or information by a date or within a time period that does not permit adherence to the time periods specified in Section 1602, the procedures specified in Section 1606 may be used to obtain the data or information. Without limiting the circumstances in which the procedures in Section 1606 may be used, such circumstances include situations in which it is necessary to obtain the data or information (in order to evaluate a threat to the reliability or security of the bulk-power system, or to comply with a directive in an order issued by the Commission or by another ERO governmental authority) within a shorter time period than possible under Section 1602. The procedures specified in Section 1606 may only be used if authorized by the NERC Board of Trustees prior to activation of such procedures.
2. Prior to posting a proposed request for data or information, or a modification to a previously-authorized request, for public comment under Section 1606, NERC shall provide the proposed request or modification, including the information specified in paragraph 1602.2.1 or 1602.2.2 as applicable, to the Commission's Office of Electric Reliability. The submission to the Commission's Office of Electric Reliability shall also include an explanation of why it is necessary to use the expedited procedures of Section 1606 to obtain the data or information. The submission shall be made to the Commission's Office of Electric Reliability as far in advance, up to twenty-one (21) days, of the posting of the proposed request or modification for public comments as is reasonably possible under the circumstances, but in no event less than two (2) days in advance of the public posting of the proposed request or modification.

3. NERC shall post the proposed request for data or information or proposed modification to a previously-authorized request for data or information for a public comment period that is reasonable in duration given the circumstances, but in no event shorter than five (5) days. The proposed request for data or information or proposed modification to a previously-authorized request for data or information shall include the information specified in paragraph 1602.2.1 or 1602.2.2, as applicable, and shall also include an explanation of why it is necessary to use the expedited procedures of Section 1606 to obtain the data or information.
4. The provisions of paragraphs 1602.3, 1602.4, 1602.5 and 1602.6 shall be applicable to a request for data or information or modification to a previously-authorized request for data or information developed and issued pursuant to Section 1606, except that (a) if NERC makes minor changes to an authorized request for data or information without board approval, such changes shall require board approval if a reporting entity objects to NERC in writing to such changes within five (5) days of issuance of the modified request; and (b) authorization of the request for data or information shall be final unless an affected party appeals the authorization of the request by the Board of Trustees to the ERO governmental authority within five (5) days following the decision of the Board of Trustees authorizing the request, which decision shall be promptly posted on NERC's web site.

AUDIT OF REGIONAL ENTITY COMPLIANCE PROGRAMS

CLEAN VERSION

NERC

NORTH AMERICAN ELECTRIC
RELIABILITY CORPORATION

Proposed Revised Version

Appendix 4A

Audit of Regional Entity Compliance Programs

Effective [DATE]

Overview, Objective, and Scope

The NERC regional entity audit program was established to assess the regional entity's implementation of the NERC Compliance Monitoring and Enforcement Program (CMEP) and determine whether the program, as implemented by the regional entity, effectively meets the requirements under the CMEP, the NERC Rules of Procedure (ROP), and the corresponding annual implementation plan. Each year, NERC establishes which standard requirements will be placed into the CMEP through its annual implementation plan. The scope of the regional entity audits includes the CMEP, related sections of the ROP, the annual implementation plan as approved by NERC, and additional directives provided by NERC for implementing the CMEP and related ROP sections.

Scheduling

Each regional entity compliance program shall be audited at least once every five years. The schedule for the regional entity audit program is approved by NERC staff.

Audit Team

- A member of NERC staff will be designated as the Audit Team Lead (ATL) for the regional entity audits. In this role, the ATL maintains oversight of the auditing process, coordinates and facilitates the audit process steps with the applicable ERO governmental authorities, the Compliance and Certification Committee (CCC), and the audited regional entity.
- NERC staff will conduct the audit, in whole or in part.
- NERC may use external, independent auditors to conduct the audit, in whole or in part.
- A representative from the CCC may participate as an observer, at the discretion of the CCC.
- Representatives from applicable ERO governmental authorities may participate as observers.

Participation by a representative of an applicable ERO governmental authority shall be subject to the limitations of section 3.1.6 and 8.0 of Appendix 4C of the NERC Rules of Procedure regarding disclosure of non-public compliance information related to other jurisdictions.

In addition, compliance staff from other regional entities may participate as observers, with the mutual consent of NERC and of the compliance manager of the regional entity being audited.

Planning or Pre-Audit

The NERC ATL shall send a Notification of Intent to Audit letter to the CEO of the regional entity to be audited at least sixty (60) days prior to the on-site audit. The letter will contain the scope of the audit and key audit dates. Also, within the same sixty (60) day time period, the NERC ATL shall send to the audited regional entity: (i) pre-audit questionnaire(s), and (ii) request(s) for information. The audited regional entity returns a complete questionnaire to

NERC, along with the requested reports and other documentation, thirty (30) days prior to the on-site audit.

The regional entity may request a planning conference with NERC to review audit scope, logistics, and other pertinent coordination matters to effectuate an efficient audit process.

On-Site Audit and Fieldwork

Detailed questions related to the completed questionnaire(s) and requests for information are evaluated along with a random sampling of applicable evidence. The evidentiary review of documentation from the regional entity is used to determine whether the regional entity's program is effective and meeting the requirements described above. NERC shall evaluate the controls, physical security tools, staff training and internal procedures to meet the requirements of the regional entity audit program scope.

Reporting

Upon completion of the on-site fieldwork, the audit team shall provide the regional entity with an exit briefing which shall include any preliminary findings and/or results from the examination. Within thirty (30) business days of the last day of on-site fieldwork, NERC shall provide the regional entity with a draft report which shall include a review of the scope, methodology, and evaluation of internal controls. The regional entity has thirty (30) business days to respond to the draft audit report and may request a conference with NERC to address any concerns with the draft report. Throughout this entire process, the information provided, discussions held, and the draft report will be kept confidential.

NERC will issue a final report to the regional entity forty-five (45) business days after the receipt of the regional entity's comments to the draft report. The audited regional entity is provided an opportunity to respond to the audit conclusions. The final report, along with the regional entity's response, are posted on the NERC Web site after NERC presents the final report to the NERC Board of Trustees Compliance Committee.

If there are exceptions to the identified audit scope, the regional entity shall develop a corrective action plan to resolve the exceptions noted by the audit and provide quarterly updates to NERC on the status of the corrective actions until completed.

Proposed Revised Version

Appendix 4A

Audit of Regional Entity Compliance Programs

Effective ~~January 18, 2007~~[\[DATE\]](#)

Overview, Objective, and Scope

The NERC regional entity audit process for auditing regional entity compliance programs was established to assess how the regional entity's compliance programs implementation of the NERC Compliance Monitoring and Enforcement Program (CMEP) and determine their effectiveness whether the program, as implemented by the regional entity, effectively meets the requirements under the CMEP, the NERC Rules of Procedure (ROP), and the corresponding annual implementation plan. Each year, NERC establishes which standard requirements will be placed into the CMEP compliance enforcement program through its annual implementation plan. The regional entities are expected to measure compliance to these requirements and, if desired, additional requirements. The scope of the regional entity audits includes the CMEP, related sections of the ROP, the annual implementation plan as approved by NERC, and additional directives provided by NERC for implementing the CMEP and related ROP sections.

Scheduling

Each regional entity compliance program shall be audited at least once every threefive years. The schedule for the regional entity complianceaudit program audits is approved by NERC staff and the Compliance and Certification Committee.

Audit Team

- A member of NERC staff will be designated as the Audit Team Lead (ATL) for the regional entity audits. In this role, the ATL maintains oversight of the auditing process, coordinates and facilitates the audit process steps with the applicable ERO governmental authorities, the Compliance and Certification Committee (CCC), and the audited regional entity.
- NERC staff will conduct the audit, in whole or in part.
- NERC may use external, independent auditors to conduct the audit, in whole or in part.
- A representative from the CCC may participate as an observer, at the discretion of the CCC.
- Representatives from applicable ERO governmental authorities may participate as observers.

Participation by a representative of an applicable ERO governmental authority shall be subject to the limitations of section 3.1.6 and 8.0 of Appendix 4C of the NERC Rules of Procedure regarding disclosure of non-public compliance information related to other jurisdictions.

In addition, compliance staff from other regional entities may participate as observers, with the mutual consent of NERC and of the compliance manager of the regional entity being audited. The audit team consists of at least one representative from each of the following:

- NERC staff,
- Compliance and Certification Committee (one of whom shall serve as team leader), and
- Regional entity compliance manager from another regional entity.

~~Audit team members shall not be from the regional entity being audited.~~

Planning or Pre-Audit

~~The NERC ATL shall send a Notification of Intent to Audit letter to the CEO of the regional entity to be audited at least sixty (60) days prior to the on-site audit. The letter will contain the scope of the audit and key audit dates. Also, within the same sixty (60) day time period, the NERC ATL shall send to the audited regional entity: (i) pre-audit questionnaire(s), and (ii) request(s) for information. The audited regional entity returns a complete questionnaire to NERC, along with the requested reports and other documentation, thirty (30) days prior to the on-site audit.~~

~~The regional entity may request a planning conference with NERC to review audit scope, logistics, and other pertinent coordination matters to effectuate an efficient audit process. In preparation for an audit, NERC staff develops a questionnaire that outlines the primary discussion areas to be covered during the on-site audit. The questionnaire includes a list of requested documents, some of which will be provided prior to the meeting and others to be provided and reviewed during the meeting. The questionnaire is sent to the regional entity being audited 60 calendar days in advance of the audit for completion.~~

~~Within 30 calendar days prior to the on-site audit, regional entity staff returns a completed questionnaire to NERC, along with the requested reports and documentation. NERC staff sends all of this to each of the team members 10 calendar days prior to the audit.~~

~~Audit team members make their own hotel and airline reservations for the audit. The on-site audit is typically scheduled for one and one-half calendar days.~~

On-Site Audit and Fieldwork

~~During the on-site audit, detailed questions related to the completed questionnaire(s) and requests for information are evaluated along with a random sampling of applicable evidence. The evidentiary review of documentation from the regional entity is used to determine whether the regional entity's program is effective and meeting the requirements described above. are discussed by all the participants. The team tours the facilities and meets with the regional entity staff involved in implementing the compliance enforcement program. To determine the effectiveness of the regional entity's program, NERC shall evaluate the controls, physical security goals, tools, staff training and internal procedures to meet the requirements of the of each regional entity's audit program scope compliance enforcement program. The audit team debriefs the regional entity staff at the end of the audit with initial findings and preliminary recommendations.~~

Preparation and Posting of the Audit Reporting

~~Upon completion of the on-site fieldwork, the audit team shall provide the regional entity with an exit briefing which shall include any preliminary findings and/or results from the examination. Within thirty (30) business days of the last day of on-site fieldwork, NERC shall provide the regional entity with a drafts a report which shall include a review of the scope, methodology, and evaluation of internal controls, documenting the findings and recommendations of the audit and submits it to the regional entity within 30 calendar days after~~

~~the on-site audit. The regional entity is provided with a draft of the report to verify that it accurately reflects the discussions at the on-site audit.~~

The regional entity has thirty (30) business calendar days to respond to the draft audit analyze each recommendation and finding and report and may request a conference with NERC to address any concerns with the draft report. Throughout this entire process, the information provided, discussions held, and the draft report will be kept confidential ~~on those it has implemented or plans to implement. If there are recommendations that the regional entity does not plan to implement, its rationale for reaching that conclusion will be provided.~~

NERC will issue a final report to the regional entity forty-five (45) business calendar days after the receipt of the regional entity's comments to the draft report is issued. The audited regional entity is provided an opportunity to respond to the audit conclusions. ~~If the regional entity disputes a finding or recommendation it shall refer to the NERC Rules of Procedure, Sections 409-411 within 15 days of receiving the final report from NERC.~~

~~Throughout this entire process, the information provided, discussions held, and the draft report will be kept confidential.~~ The final report, along with the regional entity's response ~~to the recommendations~~, are posted on the NERC Web site 15 days after NERC presents the final report to the NERC Board of Trustees Compliance Committee ~~the final report is sent to the region or when due process is complete, whichever is greater.~~

If there are exceptions to the identified audit scope, the regional entity shall develop a corrective action plan to resolve the exceptions noted by the audit and provide quarterly updates to NERC on the status of the corrective actions until completed.

Appendix A: Base Penalty Amount Table.....19

1. Preamble and Overview

The North American Electric Reliability Corporation, as the electric reliability organization (ERO), and regional entities to whom NERC has delegated authority (hereinafter referred to collectively as “regional entities” or individually as a “regional entity”) shall determine and may levy monetary penalties and non-monetary sanctions and remedial actions against owners, operators, and users of the bulk power system for violations of the requirements of NERC Reliability Standards (“reliability standards”) approved by the Federal Energy Regulatory Commission (FERC) and applicable authorities in Canada and/or Mexico. This document sets out the processes and principles to be followed, and factors that will be considered when determining penalties, sanctions, or remedial actions for violations. Collectively these processes, principles and factors are NERC’s penalties, sanctions, and remedial action guidelines.

NERC and the regional entities will exclusively follow the directives, principles and processes in these Sanction Guidelines when determining penalties, sanctions, or remedial action for a violation. However, adjustment factors are also provided to afford NERC or the regional entity the flexibility needed to accommodate the facts surrounding each violation. In this manner, rigid prescription of specific penalty formulae can be avoided at the same time that appropriate limitations on the degree of discretion and flexibility available to address each violation on its merits is maintained. The outcome will be remedies that are commensurate and fair compared to the reliability impact of the violation and to remedies levied for similar violations, yet appropriately reflective of any unique facts and circumstances regarding the specific violation and violator.

The adjustment factors established in this document are generally consistent with those listed in the FERC Policy Statement on Enforcement issued on October 20, 2005. However, discussion of the factors presented in this document is not exhaustive as other facets of these factors, or other additional factors not discussed herein, may also be considered to determine a given penalty, sanction, or remedial action, as NERC or the regional entity deems appropriate under the circumstances.

Regional entities shall follow these guidelines to determine penalties, sanctions, or remedial actions. NERC shall oversee the regional entities’ application of the guidelines to ensure that acceptable levels of consistency are achieved. NERC’s oversight will also ensure comparable outcomes; i.e. that there is acceptable similarity in the degree and type of sanction for violations constituting comparable levels of threat to reliability of the bulk power system. In order to facilitate this oversight, regional entities’ reporting to NERC of penalties and sanctions they have determined will be thorough and in sufficient detail that NERC can understand and reasonably replicate the outcomes reached; NERC may develop reporting requirements or a standard reporting form for use by the regional entities for this purpose, as NERC deems necessary or appropriate.

As experience is gained by NERC and the regional entities through the use and application of these guidelines, NERC will review the guidelines and may modify them as NERC deems appropriate or necessary. Authority delegated by NERC to the regional entities with respect to penalties, sanctions, or remedial actions does not include the authority to modify these guidelines.

Any revision to this document or to the principles and factors identified or addressed within it must first be approved by the NERC board, then by FERC, appropriate authorities in Canada or appropriate authorities in Mexico prior to becoming effective and applicable within the United States or these authorities’ respective jurisdictions.

2. Document Scope and Exclusions

This document identifies and discusses the processes and principles to be followed, and factors that will be considered to determine penalties, sanctions, or remedial actions for violations of the reliability standards.

This document notes but does not otherwise address the progression of actions and steps that NERC or the regional entity will follow to process a violation from its initial incoming status upon discovery as a possible violation, through to its possible final determination as a confirmed violation. This is set out in the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure.

This document notes but does not otherwise address how a possible violation or alleged violation is reviewed in order to confirm or dismiss it. NERC's process and requirements for this review are set out in the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure. Regional entities will undertake such reviews using the processes and requirements set out in the NERC Compliance Monitoring and Enforcement Program.

This document notes but does not otherwise address the processes and procedural steps by which a confirmed violation can be appealed, or by which a penalty, sanction, or remedial action determined and levied for a violation can be appealed. These procedures are set out in the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure, and applicable regional entity program documents.

The NERC Compliance Monitoring and Enforcement Program provides for the possibility of settlements within NERC or regional entity compliance enforcement programs. This document makes reference to settlements to but does not address them further.

3. Basic Principles

The following paragraphs identify and discuss the basic principles underpinning why and how NERC and the regional entities will determine penalties, sanctions, and remedial actions for violations of the requirements of the reliability standards.

The principles are unique and complimentary; the order in which they are presented does not set or indicate order of precedence.

3.1 Necessary Element of NERC Compliance Program

Primary objectives of NERC as the ERO include the promotion and enforcement of compliance with the reliability standards by owners, operators, and users of the bulk power system; standards made mandatory by duly-authorized legislative bodies in the U.S and Canada, and designed to maintain and promote the reliability of the two countries' shared power grids. Consistent with these objectives, NERC and the regional entities will monitor and act to verify compliance with standards' requirements; however, beyond monitoring and acting only to verify compliance, NERC and the regional entities will also hold bulk power system owners, operators, and users — or their delegates — accountable for confirmed compliance violations. This accountability will include determination and the possible levying of penalties, sanctions, or remedial actions.

Penalties, sanctions, and remedial actions are valid and necessary mechanisms to NERC and the regional entities for the enforcement and promotion of compliance to the reliability standards, in part because they can:

- a. promote compliance behavior;
- b. provide deterrence to future incidents, actions or situations of noncompliance by the violator or others;
- c. implement actions that will promptly correct behavior;
- d. disgorge benefits that may or may have accrued to a violator as a consequence of violating;
- e. visit upon a violator some portion of any damage their violation may or may have visited upon others.

Accordingly, the determination and potential levying of appropriate penalties, sanctions, or remedial actions by NERC or the regional entity upon those responsible for violations shall be a required step within the NERC and regional entity compliance enforcement programs.

3.2 Settlement of Compliance Violations

NERC and the regional entities shall maintain the reliability of the bulk power system by enforcing compliance with NERC and regional entity reliability standards. NERC and regional entity compliance enforcements programs will lay out how NERC and the regional entities will do this. In particular and by necessity, elements of these programs regarding the confirmation of violations, the determination and levying of penalties, sanctions, or remedial actions, and appeals are rigid and legalistic in form and nature in order to respect the basic tenets of due process and natural justice inherent within United States and Canadian justice systems, respectively, upon which they are being based. However, absolute adherence to the compliance programs, to the exclusion of other options, may not be the most appropriate, efficient or desirable means by which to achieve the end goal in all circumstances, to all entities party to a violation.

As set out in the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure, violations of the reliability standards may be dealt with through settlements reached between NERC, regional entity and the entity or entities to whom a possible, alleged, or confirmed violation is attributed to by NERC or the regional entity. Any provisions made within a settlement regarding penalties, sanctions, or remedial actions can supersede any corresponding penalties, sanctions that would otherwise be determined pursuant to these guidelines.

3.3 Settlement Request

Any entity found in or being investigated for a violation may request settlement negotiations at any time, including prior to issuance of a notice of alleged violation; however, NERC or the regional entity may decline to enter into or continue settlement negotiations after the possible violation or alleged violation becomes a confirmed violation.

3.4 Settlement Effect on Continuation of Determination of Penalties, Sanctions, or Remedial Actions

Until a settlement is finalized or parties to that settlement agree otherwise, NERC or the regional entity may continue activities and actions towards the determination and levying of a penalty, sanction, or remedial action that would otherwise be applicable pursuant to these guidelines, or that will be applicable if the settlement is not finalized.

3.5 Timing of Determination of Penalty, Sanction or Remedial Action

All possible violations and alleged violations will be reviewed by NERC or the regional entity with the outcome that either the violation will be confirmed or the violation will be dismissed.

The penalty, sanction, or other remedial action for a violation will be determined when the violation becomes a confirmed violation or is resolved as part of a settlement agreement.

At any time during confirmation review, hearing, or appeals NERC or the regional entity may determine that remedial action is warranted by the subject entity of the review, hearing, or appeals. NERC or the regional entity may direct that such remedial actions be undertaken by the subject entity at any time, including prior to confirmation of a violation, and without regulatory approval.

3.6 Determining Party

The determination of penalty, sanction or other remedial action for a violation will generally be undertaken by the same entity determining the violation to be a confirmed violation, but subject to review by NERC if the determination is made by a regional entity.

3.7 No Influence of Penalty, Sanction or Remedial Action upon Violation Confirmation Process

The penalty, sanction, or remedial action determined for a violation will not influence the outcome of the regional entity' or NERC's confirmation review of the violation. In particular, if the determination of penalty, sanction, or remedial action for a probable violation is being undertaken by the same entity undertaking the confirmation review, the entity will insure that there is sufficient separation, in such terms as time, process, personnel or the like, to preclude that the penalty, sanction, or remedial action determined influences the outcome of the confirmation review.

3.8 Reasonable Relationship to Violation

Penalties, sanctions, and remedial actions levied or applied for the violation of a reliability standard shall bear a reasonable relation to the seriousness of the violation while also reflecting consideration of the factors that these guidelines direct to take into account. In the United States, the legislation establishing mandatory enforceable reliability standards and the ERO requires that "Any penalty imposed ... shall; (A) bear a reasonable relation to the seriousness of the violation; and (B) take into consideration the efforts of the user, owner, or operator to remedy the violation in a timely manner¹.

3.9 Use and Facets of Factors to Determine Penalties

Penalties levied for a given violation will be based on all facts and other information relevant to the incident or situation. To that end, these guidelines include factors which NERC and the regional entities will consider while determining the penalty or sanction to be levied.

¹ H.R.6, Energy Policy Act of 2005, Section 215, Paragraph e, subparagraph 6.

NERC considers, and these guidelines direct, that the presence of some factors within a violation aggravates the seriousness of that violation and should cause an increase or expansion of the penalty to be levied. Conversely, the presence of some other factors mitigates that seriousness and should cause a decrease or reduction of the penalty to be levied. Also, some factors may mitigate or aggravate, and should have commensurate impact. NERC considers, and these guidelines direct, that the absence of an aggravating or mitigating factor will have no impact, as opposed to a mitigating or aggravating impact, respectively, to a penalty.

This document presents many of the relevant facets of the factors included in these guidelines. However, additional facets of these factors, or additional factors not discussed herein, may also be considered to determine a given penalty, sanction, or remedial action, as NERC or the regional entity deems appropriate under the circumstances. Where additional factors or facets are used they will be identified and their use will be justified. The effect of using these factors or facets on the penalty, sanction, or remedial action determined will also be fully and clearly disclosed.

3.10 Multiple Violations

A violation is a failure or inadequacy to meet a requirement of a reliability standard by a party responsible to comply with that requirement.

The failure or inadequacy of a violator to comply may involve more than one standard or several requirements of a single standard; as such, multiple individual violations may be in play when penalties, sanctions, or remedial actions for an incident or situation of noncompliance are being determined.

Strictly speaking, NERC or the regional entity can determine and levy a separate penalty or sanction, or direct remedial action, upon a violator for each individual violation. However, in instances of multiple violations related to a single act or common incidence of noncompliance, NERC or the regional entity will generally determine and issue a single aggregate penalty, sanction, or remedial action directive bearing reasonable relationship to the aggregate of the related violations. The penalty, sanction, or remedial action will not be that determined individually for the least serious of the violations; it will generally be at least as large or expansive as what would be called for individually for the most serious of the violations.

Some entities may be registered as being responsible for more than one function (e.g., transmission owner, transmission operator, balancing authority, generation operator), and a single requirement in some reliability standards may apply to the responsible entity for several functions. Where several functions are performed by the same entity, a violation will be assessed against the entity, not against each function.

3.11 Relation of the Penalty to the Seriousness of the Violation and Violator's Ability to Pay

As discussed in Section 3.8, above, penalties levied for the violation of a reliability standard shall bear a reasonable relation to the seriousness of the violation. The seriousness of a given violation by a given violator shall be assessed by review of the applicability of the Violation Risk Factors² associated with the violation to the characteristics of the violator's operation or power system. Size is a characteristic of a violator's operation or system. The size of the violator can be considered in the assessment but shall not be the only characteristic considered. Where size is considered in such a review the facts relating to the violation in question will be reviewed such that the "actual" size of the violator is properly discerned and appropriately considered; the following are provided as illustrative examples:

- If the violator belongs to a generation and transmission cooperative or joint-action agency, size will be attributed to the particular violator, rather than to that generation and transmission cooperative or joint-action agency.

² See Section 4 Part 4.11 for a discussion of these factors

- If the violator constitutes part of a corporate family the size of the violator will be attributed to that violator alone, in the absence of any facts indicating involvement of the whole corporation or corporate affiliates of the violator.
- If the violator is an entity established solely as a shell to register as subject to one or more Reliability Standards the size of the entity will be disregarded in favor of consideration of the size of parent entity or any affiliates that NERC or the regional entity deems involved and constituting the “actual” size of the violator.

At the request of the violator, NERC or the regional entity may review the penalty in light of the violator’s financial ability to pay the penalty. Financial ability shall include both the financial strength of the entity as well as its structure (e.g., for-profit versus non-profit). Where penalties are reduced or eliminated NERC or the regional entity shall consider non-monetary sanctions or remedial action as alternatives or substitutes to the penalty, pursuant to Sections 3.17, 3.18 and 3.19, below, of this document.

The above actions will: (i) promote that violators are penalized or sanctioned commensurate with the risk or effect that their specific violation of the reliability standards had or is having to the reliability of the bulk power system while also; (ii) mitigating overly burdensome penalties to less consequential or financially-limited entities concurrent with; (iii) promoting that no penalty is inconsequential to the violator to whom it is assessed. This will promote that penalties levied for violations of reliability standards bear a reasonable relation to the seriousness of the violation while also addressing violators’ ability to pay the penalties they are assessed.

3.12 Violation Time Horizon

Reliability standards involving longer and broader time horizons, such as long-term planning activities, may have a lesser immediate impact and pose less immediate risk to the reliability of the bulk power system than standards addressing shorter and narrower timeframes, such as entities’ conduct in real time. Similarly, standards involving longer and broader time horizons typically will provide a longer time period over which to discover and remedy a violation when compared to standards addressing more immediate activities such as next-day planning, same-day operations or real-time operations. Using a time horizon element in the determination of penalties for violations provides for recognition of the “more immediate” nature — and hence higher risk — of the threat of some violations as opposed to the lesser-risk “future threat if not corrected” nature of other violations.

Penalties levied for the violation of a reliability standard shall consider the time horizon of the standard violated; violations of standards involving more immediate or real-time activities will generally incur larger penalties than violations of standards with longer or broader horizons.

Time horizons inherent in reliability standard requirements are not reflected in their assigned Violation Risk Factors or Violation Severity Levels³. Accordingly, the time horizon element of a violation will be considered when determining the Base Penalty Amount⁴ for the violation.

The time horizon considered and its impact on the selection of the Base Penalty Amount for the violation will be decided upon by NERC or the regional entity based upon judgment and the facts of the violation. The rationale for the time horizon used and its impact on the setting of the Base Penalty Amount will be documented by NERC or the regional entity and provided within the Notice of Penalty issued for the violation.

3.13 Extenuating Circumstances

In unique extenuating circumstances, such as significant natural disasters, penalties may be significantly reduced or eliminated.

³ See Section 4 Part 4.11 for a discussion of these factors.

⁴ See Section 4 Part 4.2

3.14 Concealment or Intentional Violation

Penalties levied for the violation of a reliability standard shall always take into consideration any attempt by a violator to conceal the violation from NERC or the regional entity, or any intentional violation incurred for purposes other than a demonstrably good faith effort to avoid a significant and greater threat to the immediate reliability of the bulk power system.

3.15 Economic Choice to Violate

Owners, operators, and users of the bulk power system may be presented with situations or circumstances where compliance with the reliability standards preclude or reduce an economic gain that could be realized by violating the standards. Penalties shall be sufficient to assure that entities responsible for complying with reliability standards do not find it attractive to make economic choices that cause or unduly risk violations to reliability standards, or risk or cause incidents resulting from violations of the reliability standards. Penalties levied to violators who have made such a choice shall reflect this aspect of the violation.

3.16 No Influence by Outcome of Economic Choice to Violate

Economic choices to violate are generally made for the violator's own potential gain, but making such a choice does not always result in all potential gains being realized or may result in damage or loss. However, irrespective of the outcome to the entity making an economic choice to violate, such decisions risk others' reliability, commonly without either their knowledge or consent. Penalties levied to violators making an economic choice to violate shall reflect only that the choice was made at all; the lack of or reduced magnitude of any actual benefit received, or any damage suffered, by the violator as a consequence of making this choice will have no influence on the determination of the penalty to be levied.

3.17 Non-Monetary Sanctions or Remedial Actions

Enforcement actions taken by NERC or a regional entity are not limited to monetary penalties; at the discretion of NERC or the regional entity, sanctions or remedial actions may also be applied and can include limitations on activities, functions, operations, or other appropriate sanctions, including the establishment of a reliability watch list composed of major violators.

3.18 Non-Exclusiveness of Monetary Penalties or Non-Monetary Sanctions

A non-monetary sanction may be imposed either in lieu of or in addition to a monetary penalty imposed for the same confirmed violation, and vice versa. Imposition of a monetary penalty or non-monetary sanction for a violation does not preclude the imposition of the other as long as, in combination, the aggregate penalty continues to bear a reasonable relation to the seriousness of the violation.

3.19 Monetization of the Value of Sanctions

A significant element of NERC's oversight of penalties, sanctions, and remedial action determined and levied by regional entities is ensuring acceptable similarity in the degree and type of sanction for violations constituting comparable levels of threat to the reliability of the bulk power system. It is also a requirement and a commitment of NERC and its designees that penalties, sanctions, or remedial actions levied or applied for the violation of a reliability standard bear reasonable relation to the seriousness of the violation. Specifically with respect to penalties and sanctions, it is intuitive that it will be easier, more objective, and more transparent to monitor and test for acceptable similarity if (monetary) penalties or monetized values of sanctions determined for violations are used as the primary basis of comparison, versus comparisons made on the basis of other (non-monetized) considerations. Similarly, there will be strong intuitiveness and transparency, particularly to those interested but not strongly familiar with the power industry, that the seriousness of a violation has been reasonably addressed if the consequences for it to the violator are determined and can be expressed clearly and quantifiably in monetary terms.

Penalties determined and levied by NERC or regional entities will by definition be valued in monetary terms: U.S or Canadian dollars. It will be the preference of NERC that (non-monetary) sanctions imposed either in lieu of or in addition to a penalty include disclosure of the monetary value that the sanctions represent to the violator. It is intuitive that defensible monetary values for those sanctions will be most easily determined if the penalty for the violation pursuant to these guidelines is first determined and then the sanctions to be levied are introduced and justified as appropriate alternatives to that penalty or additions to a lesser penalty. However, sanctions may be determined directly (e.g. without first determining a penalty amount) and monetized using other methods.

NERC does not have a preference between penalties and sanctions for violations. The preference expressed here will support ensuring comparability of outcomes regarding application of these guidelines and the promotion of reasonable relationship between the seriousness of a violation and the sanctions, or penalties and sanctions, levied for it.

3.20 Maximum Limitations on Penalties

Penalties are direct, monetary judgments levied against a violator by NERC or the regional entity for the violation of requirements of the reliability standards. In contrast, sanctions will impose limitations or restrictions of some kind that may result in economic or other impacts to the violator, and remedial actions are directives by NERC or a regional entity to the violator regarding the correction of conditions, practices or any other relevant action or activity underlying the noncompliance(s) involved.

In the United States, the Federal Power Act allows for the imposition of civil penalties of up to \$1,000,000 per day per violation. NERC and the regional entities draw their authority to levy penalties from the Federal Power Act; accordingly this figure is and can be understood as the maximum monetary penalty that NERC or regional entities are authorized to levy. However, as this legislation also requires that “[a]ny penalty imposed ... shall; (A) bear a reasonable relation to the seriousness of the violation; and (B) take into consideration the efforts of the user, owner, or operator to remedy the violation in a timely manner⁵” ***entities required to comply with the reliability standards must also understand that NERC and the regional entities will be obligated to assess penalties amounts up to and including the maximum amount for violations where warranted pursuant to these guidelines.***

In Canadian jurisdictions the maximum monetary penalty potentially assessable for a reliability standard violation is significantly less than the amount allowed in the United States under the Federal Power Act. Also, legislation presently governing some Canadian jurisdictions does not accommodate the levying of such a penalty under some circumstances, may not accommodate the levying of such a penalty for all violations, or does not accommodate the levying of any monetary penalties.

When a penalty may be levied, or proposed to regulatory authorities with jurisdiction to be levied, the following steps will be followed:

- a. NERC or the regional entity will initially disregard the penalty limitations of the regulatory authorities with jurisdiction, and determine what the penalties or sanctions would be pursuant to these sanction guidelines only.
- b. NERC or the regional entity will review the maximum penalty allowed by the regulatory authorities with jurisdiction.
- c. NERC or the regional entity will set the actual penalty to be levied, or proposed to the regulatory authorities with jurisdiction to be levied, as the lesser of that determined pursuant to these guidelines and the maximum penalty or sanction allowed by the regulatory authorities.

⁵ H.R.6, Energy Policy Act of 2005, Section 215, Paragraph e, subparagraph 6.

- d. If the lesser penalty is the maximum penalty allowed by the regulatory authorities, the notice of penalty or similar document issued by NERC or the regional entity regarding the violation will also list the penalty that was determined pursuant to these guidelines.

Adhering to the above steps will insure that the result of the determination of any penalty for any violation will produce output that can be directly compared (i.e. without influence of local authorities' penalty limitations or restrictions) with the penalty determined for any other violation, assisting efforts of NERC and others to ensure that these guidelines are uniformly applied and that there is an acceptable level of consistency in the application of these sanction guidelines across North America. Regulatory authorities with jurisdiction may also find such information useful for their determination of the appropriateness of any penalty or sanction proposed to them to be levied. Similarly, policy and legislative bodies may find such information of value to the review or development of arrangements addressing such matters.

3.21 Frequency and Duration of Violations

Section 316A of the Federal Power Act [16 U.S.C. § 825o-1(b)], as amended by the Energy Policy Act of 2005, provides that “any person who violates any provision of Part II of this title or any provision of any rule or order thereunder shall be subject to a civil penalty of not more than \$1,000,000 for each day that such violation continues.”

FERC Order No. 672 interprets this statement as setting a cap on the monetary penalties that the Commission, NERC and regional entities can impose under FPA section 215. FERC has referred to this statutory provision as imposing a maximum \$1,000,000 “per day, per violation” penalty and has directed that the ERO must ensure that in the U.S. such a penalty amount (\$1,000,000), in such a manner (“per day, per violation”), can be imposed for a violation of the Reliability Standards should the conduct at issue so warrant.

Some Reliability Standards may not support the assessment of penalties on a “per day, per violation” basis, but instead should have penalties calculated based on an alternative penalty frequency or duration. Where NERC or the regional entity deems that a monetary penalty is warranted, or where NERC or the regional entity is monetizing (Section 3.19) the value of a non-monetary sanction, for the violation of such a standard NERC or the regional entity shall determine the penalty or monetized amount consistent with the following:

Multiple Instances of Violation on One Day

The nature of some Reliability Standards includes the possibility that an entity could violate the same requirement two or more times on the same day. In this instance NERC or the regional entity is not limited to penalizing the violator a maximum of \$1,000,000 per day. As NERC or the regional entity deems appropriate NERC or the regional entity may deem that there have been multiple violations that occurred on the same day, each of which is subject to the maximum potential penalty of \$1,000,000 per violation, per day. Also, NERC or the regional entity is not constrained to assessing the same penalty amount for each of the multiple violations, irrespective of their proximity in time.

Cumulative Over Time

Certain requirements of the Reliability Standards are measured not on the basis of discrete acts, but of cumulative acts over time. Reliability Standards that fall into this category are generally those involving measurements based on averages over a given period. Where a violation of such a standard has occurred the element of averaging performance over a period of time introduces the difficulty to NERC or the regional entity of reasonably identifying (i) what date the violation should be deemed to have occurred and (ii) its duration.

If a Reliability Standard requirement measured by an average over time can only be violated once per applicable period, then there is risk that a disproportionately mild penalty might be levied in a

situation where the violation was serious and the effects on the Bulk-Power System severe. In the future, each Reliability Standard requirement that is based on an average over time will specify the minimum period in which a violation could occur and how to determine when a violation arises, which may be other than once per applicable period⁶. In the interim until relevant Reliability Standards are so modified, any ambiguity on this point will be construed conservatively, meaning that where an entity has not complied with such a standard NERC or the regional entity will generally consider that only one violation occurred per measurement period. However, notwithstanding this general principle of one violation per measurement period, if an average must be measured by a span of time greater than a month, each month of that span shall constitute at a minimum one violation.

Periodically Monitored Discrete Violation

Some Reliability Standards may involve discrete events which are only monitored periodically or which are reported by exception. If a requirement of such a standard states that a discrete event constitutes a violation, then (i) a violation arises when that event occurs and (ii) that violation continues until remedied; furthermore, (iii) the violation is deemed to have occurred at the point that the entity entered into noncompliance with the standard regardless of the monitoring period for the activity or its date of discovery or reporting. For example, if a task required by a Reliability Standard requirement has not been done by the required date, it is irrelevant that monitoring for compliance for the requirement occurs only on a yearly or other periodic basis; NERC or the regional entity will deem a violation to have occurred on the first day of noncompliance and each day thereafter until compliance is effectuated. Similarly, if a discrete event occurs and is not remedied on the date of occurrence, then NERC or the regional entity will deem a violation to have occurred on the day of the first instance of the noncompliance and each day, or portion thereof thereafter until compliance is effectuated.

Non-compliance with a standard of this type will subject the violator to the potential maximum monetary penalty of \$1,000,000 per violation per day in violation.

NERC or the regional entity is not constrained to assessing the same penalty amount for each day that the entity was in violation of the Reliability Standard requirement in question.

⁶ Para. 41; FERC Order on Clarification and Rehearing [Docket No. RR06-1-006]

4. Determination of Monetary Penalties

The following describes the steps that NERC or the regional entity will follow to determine the monetary penalty for a violation⁷. The determination of non-monetary sanctions is discussed in Section 5 of this document; Section 6 discusses remedial action.

- Step 1. The Base Penalty Amount for the violation will be set as discussed in Sections 4.1 and 4.2, below.
- Step 2. The Base Penalty Amount set in Step 1 will be reviewed pursuant to Section 4.3, below. This will result in the Adjusted Penalty Amount.
- Step 3. The Adjusted Penalty Amount determined in Step 2 may be reviewed in light of the violator's financial ability to pay the penalty. Also, where applicable NERC or the regional entity will reconfirm that the penalty set will disgorge unjust profits or economic benefits associated with an economic choice to violate⁸. At the conclusion of this review the Final Penalty Amount will be set.

Unless NERC or the regional entity deems alternative frequency or duration is warranted penalties shall be assessed on a per violation per day basis. Where NERC or the regional entity deems that alternative penalty frequency or duration is warranted the Notice of Penalty associated with the violation will clearly identify this and provide the rationale for it. Where NERC or the regional entity deems that alternative penalty frequency or duration is warranted, penalties shall be determined in accordance with section 3.21 of the Sanction Guidelines.

4.1 Initial Value Range of the Base Penalty Amount

NERC or the regional entity will determine an initial value range for the Base Penalty Amount by considering two factors regarding the violation: the Violation Risk Factor (VRF) of the requirement violated and the Violation Severity Level (VSL) assessed for the violation. Using the Base Penalty Amount Table provided in Appendix A NERC or the regional entity will look up the initial value range for the Base Penalty Amount by finding the intersection of the violation's VRF and VSL on the table⁹.

4.1.1 Violation Risk Factor

Each requirement set out within NERC's reliability standards has been assigned a Violation Risk Factor (VRF) through the NERC reliability standards development process. The factors have been defined and approved through the standards development process and are assigned to requirements to provide clear, concise and comparative association between the violation of a requirement and the expected or potential impact of the violation to the reliability of the bulk power system. One of three defined levels of risk is assigned to each standards requirement: Lower Risk Factor, or; Medium Risk Factor, or; High Risk Factor. Definitions of the factors can be found in appropriate standards development process documentation.

4.1.2 Violation Severity Level

Violation severity levels (VSLs) are defined measurements of the degree to which a violator violated a requirement of a reliability standard. Whereas violation risk factors are determined pre-violation and indicate the relative potential impacts that violations of each standard could pose to the reliability of the bulk power system, the violation severity level is assessed post-

⁷ The text in this section discusses the determination of a single penalty for an individual violation; however, the process laid out is also applicable to determining the individual penalties, or a single aggregate penalty, for multiple violations that are associated with each other as discussed in Section 3 Part 3.1 of this document.

⁸ Reference: Section 3 Parts 3.15 and 3.16.

⁹ As discussed in Section 3 Part 3.1 of this document where there is more than one violation in play, but the violations are sufficiently associated, NERC or the regional entity may set a single initial value range that is appropriate in light of the individual VRF/VSL combinations of the violations.

violation and is an indicator of how severely the violator actually violated the standard(s) requirement(s) in question.

These guidelines utilize the violation severity levels that have been established¹⁰ by NERC for requirements of the reliability standards. Up to four levels can be defined for each requirement; the levels have been designated as: Lower, Moderate, High, and Severe.

4.2 Setting of the Base Penalty Amount

NERC or the regional entity will set the Base Penalty Amount for the violation. The Base Penalty Amount set for the violation may be set at the highest figure of the initial value range determined pursuant to Section 4.1, above. However, NERC or the regional entity may set the Base Penalty Amount at or below the lowest figure of the initial value range in light of two specific circumstances regarding the violation and the violator, specifically:

- a. The applicability of the Violation Risk Factor of the violation to the specific circumstances¹¹ of violator.
- b. Whether this is an inconsequential first violation by the violator of the reliability standard(s) in question.

As noted in Section 3.12 NERC or the regional entity will consider the time horizon involved with the violation when setting the Base Penalty Amount for the violation. As also noted in Section 3.12 this consideration will be documented for inclusion in the Notice of Penalty issued for the violation.

The penalty amount resulting from the this review will be the Base Penalty Amount that is used as the basis for further adjustment pursuant to the factors discussed in the next section (4.3) of this document.

4.2.1 Applicability of the Violation Risk Factor

Violation Risk Factors are assigned to standards' requirements as indicators of the expected risk or harm to the bulk power system posed by the violation of a requirement by a typical or median entity that is required to comply. NERC or the regional entity may consider the specific circumstances of the violator to determine if the violation of the requirement in question actually produced the degree of risk or harm anticipated by the Violation Risk Factor. If that expected risk or harm was not or would not have been produced, NERC or the regional entity may set the Base Penalty Amount to a value it (i) deems appropriate and (ii) is within the initial value range set above pursuant to Section 4.1.

4.2.2 First Violation

If the actual or foreseen impact of the violation is judged to be inconsequential by NERC or the regional entity and the violation is the first incidence of violation of the requirement in question by the violator, NERC or the regional entity may at its discretion: (i) set the Base Penalty Amount to a value it deems appropriate within the initial value range set above pursuant to Section 4.1, or (ii) excuse the penalty for the violation (i.e. set the Base Penalty Amount to 0\$).

This relief will generally not be afforded to the violator if NERC or the regional entity determines that the violator has a poor compliance record; e.g. the circumstances discussed in Section 4.3.1 have been an aggravating factor in one or more previous penalties assessed to the violator.

¹⁰ Assignment of these levels will be complete and filed with the Commission by March 1, 2008 in accordance with FERC Order on Compliance Filing dated June 7, 2007 [Docket No. RR06-1-007] .

¹¹ The circumstances of the violator will include but not be limited to, as appropriate: the violator's aggregate and net load; interconnections characteristics such as voltage class and transfer ratings;

This relief will not be available for consideration in instances where the violator has concealed or attempted to conceal the violation, failed or refused to comply with compliance directives from NERC or the regional entity, or intentionally violated for purposes other than a demonstrably good faith effort to avoid a significant and greater threat to the immediate reliability of the bulk power system.

4.3 Application of Adjustment Factors

Adjustment factors provide the opportunity to NERC or the regional entity to adjust the base penalty to reflect the specific facts and circumstances material to each violation and violator.

These guidelines recognize and require that, as a minimum, NERC or the regional entity consider the following:

- a. Repetitive violations and the violator's compliance history
- b. Failure of the violator to comply with compliance directives
- c. Self-disclosure and voluntary corrective action by the violator
- d. Degree and quality of cooperation by the violator in the violation investigation and in any remedial action directed for the violation
- e. The presence and quality of the violator's compliance program quality
- f. Any attempt by the violator to conceal the violation
- g. Intentional violations
- h. Extenuating circumstances

Two documents issued by United States regulatory agencies will be instructive to NERC and the regional entities when they are determining penalties for violations of the reliability standards: the FERC's Policy Statement on Enforcement issued on October 20, 2005 under Docket No. PL06-00, and; U.S Securities and Exchange Commission (SEC) Release No. 44969 under the Securities and Exchange Act of 1934, issued on October 23 2001, also concurrently issued by the SEC as Release No. 1470 under Accounting and Auditing Enforcement.

NERC or the regional may also consider other additional factors it deems appropriate under the circumstances as long as their use is clearly identified and adequately justified. The effect of using these factors will also be fully and clearly disclosed.

4.3.1 Repetitive Violations and Compliance History

A bulleted point under Paragraph 20 of the FERC Policy Statement on Enforcement highlights repeat offenses by a violator. If a violator has had repetitive infractions of the same or a closely-related reliability standard requirement, particularly within a time frame defined within the standard(s) or deemed appropriate by NERC or the regional entity in the absence of the standard(s) defining the time frame, NERC or the regional entity shall consider some increase to the penalty.

The term "violation reset time period" of a standards requirement may be defined or implied within a given standard to describe the period of time generally required for a violator to continue operations without incidence of further violation(s) of the Reliability Standards, particularly of the initial or a similar standard violated, in order to avoid or minimize consideration of the violator's previous violation history for sanctioning purposes in the event of a subsequent violation(s). NERC and the Regional Entities shall exercise appropriate judgment and discretion in this regard as warranted, particularly where no reset time period is specifically set within the standard violated. Repeat violations within violation reset time periods are aggravating factors in the determination of sanctioning. Accordingly, a violation history of no violations will produce no mitigation of the penalty otherwise determined; a

violation history of infrequent minor violations of lesser risk requirements assessed lower violation severity levels may result in small or no increase; a history of more frequent violations or previous violations of higher risk requirements assessed more severe violation severity levels will generally incur commensurately larger increases.

4.3.2 Failure to Comply with Compliance Directives

If the violator has violated reliability standard requirements notwithstanding having received related compliance directives, such as for remedial action from NERC or the regional entity, NERC or the regional entity shall consider some increase to the penalty.

4.3.3 Self-Disclosure and Voluntary Corrective Action

NERC or the regional entity shall consider whether a violator self-disclosed the violation prior to detection or intervention by NERC or the regional entity, and any action undertaken by the violator to correct the situation. NERC or the regional entity will be instructed in their consideration of these factors by the text of Paragraphs 24 and 25 of the FERC Policy Statement on Enforcement. As they deem warranted, NERC or the regional entity may reduce the violator's penalty consistent with the cited sections of the FERC policy.

4.3.4 Degree and Quality of Cooperation in Violation Investigation and Remedial Action

NERC or the regional entity shall consider the degree and quality of the violator's cooperation with NERC or the regional entity in the investigation of the violation and any remedial action arising from it. NERC or the regional entity will be instructed in making their determination on this by the text of Paragraphs 26 and 27 of the FERC Policy Statement on Enforcement. NERC or the regional entity may adjust the violator's penalty as they deem warranted commensurate with the cited sections of the FERC policy statement. This may result in an increase, a decrease or no change to the penalty.

4.3.5 Presence and Quality of Compliance Program

NERC or the regional entity shall consider the presence and quality of the violator's compliance program. NERC or the regional entity will be instructed in making their determination on this factor by the text of Paragraphs 22 and 23 of the FERC Policy Statement on Enforcement. As they deem warranted, NERC or the regional entity may reduce the violator's penalty consistent with the cited sections of the FERC policy. Consistent with the FERC policy NERC or the regional entity may not increase a violator's penalty specifically on the grounds that the violator has no program or a poor quality program.

4.3.6 Violation Concealment

Two bulleted points under Paragraph 20 of the FERC Policy Statement on Enforcement highlight misrepresentation of material facts and resistance or impediment to inquiry of a violation. When determining a penalty NERC or the regional entity shall consider any concealment or attempt to conceal the violation, or information needed to investigate the violation, on the part of the violator. If the violator concealed or attempted to conceal, some significant increase to the penalty shall be considered; doubling of the penalty otherwise determined is suggested. Conduct of this nature on more than one occasion regarding one violation, or with respect to more than one violation, should incur an even larger increase to the penalty otherwise determined.

4.3.7 Intentional Violation

Another bulleted point under Paragraph 20 of the FERC Policy Statement on Enforcement highlights offenses as willful action by a violator. When determining a penalty NERC or the regional entity shall consider if the violator intentionally violated without just cause; i.e., for purposes other than a demonstrably good faith effort to avoid a significant and greater threat to the immediate reliability of the bulk power system. If the violator engaged in such conduct,

some significant increase to the penalty shall be considered; doubling of the penalty otherwise determined is suggested. If conduct of this nature has been detected on more than one occasion, NERC or the regional entity should assess an even larger increase to the penalty otherwise determined.

NERC or the regional entity will consider violations attributable to an economic choice to violate as intentional violations. Consistent with the FERC Policy Statement on Enforcement any penalty issued involving conduct of this manner shall as a minimum disgorge any profits or economic benefits acquired as a consequence of the behavior, whenever and to the extent that they can be determined or reasonably estimated.

4.3.8 Extenuating Circumstances

NERC or the regional entity will consider if there are extenuating circumstances regarding the violation that justify reduction or elimination of the penalty otherwise determined.

Consideration of adjusting a penalty for this factor would be inconsistent with NERC or the regional entity increasing a penalty after consideration of any other factor included in this section of these guidelines, such as intentional violation without justifiable cause or concealment or attempt to conceal.

4.4 Setting of the Final Penalty Amount

The Adjusted Penalty Amount determined in Step 2 may be reviewed in light of the violator's financial ability to pay the penalty. Also, if the violation was an economic choice, NERC or the regional entity will reconfirm that the penalty set will disgorge any unjust profits or economic benefits. At the conclusion of this review the Final Penalty Amount will be set.

4.4.1 Violator's Financial Ability to Pay¹²

At the written request of the violator NERC or the regional entity will review the penalty determined in Step 2 in light of relevant, verifiable information that the violator provides regarding their financial ability to pay. At the conclusion of this review NERC or the regional entity may:

1. Reduce the penalty payable to an amount that NERC or the regional entity, as applicable, deems the violator has the financial ability to pay, or;
2. Excuse the penalty amount payable, or;
3. Sustain the penalty amount determined in Step 2.

Where the penalty amount has been reduced or excused, NERC or the regional entity shall consider the assessment of appropriate non-monetary sanction(s) as a substitute or an alternative for the penalty amount that has been excused or by which the penalty has been reduced.

4.4.2 Reconfirmation of Disgorgement of Unjust Profit or Gain

Notwithstanding the application of any other consideration or factor applicable to the determination of a just and reasonable penalty for the violation, if the violation in question involved an economic choice to violate NERC or the regional entity shall reconfirm that the penalty set meets the requirements set forth in Parts 3.15 and 3.16 of Section 3 of this document.

¹² NERC anticipates that this will be the primary vehicle for addressing the ability to pay of "not-for-profit" and other similar organizations.

5. Determination of Non-Monetary Sanctions

The imposition of sanctions is not bounded to monetary penalties. Non-Monetary sanctions applied must be applied with the objective of promoting reliability and compliance with the reliability standards. Non-monetary sanctions may include, but not be limited to, the following:

- a. Limitations on activities, functions, or operations
- b. Placing an entity on a reliability watch list composed of major violators

6. Remedial Action

6.1 Definition and Anticipated Use

Remedial actions are directives that may be issued to a bulk power system owner, operator, or user to resolve an alleged violation of a reliability standard by addressing conditions, practices, or any other relevant action or activity that is immediately necessary to terminate or correct to protect the reliability of the bulk power system from an imminent threat. A remedial action directive will be issued when NERC or the regional entity identifies an alleged violation of a reliability standard that must be corrected immediately to protect the reliability of the bulk power system from the imminent threat that NERC or the regional entity has identified.

NERC or the regional entity will generally employ remedial action directives where they deem it necessary to clearly specify minimum corrective actions that the subject of the remedial action directive must take; additionally or alternatively a remedial action directive may clearly specify timelines within which the subject must take specified actions, complete specified tasks, or achieve specified outcomes. Also, to the extent NERC or the regional entity is authorized to do so, a remedial action directive may communicate penalties, sanctions, or further remedial actions that may be imposed should the specific remedial action directive not be complied with by those to whom it has been issued. As a rule of thumb, remedial action directives will be of use to NERC or the regional entity whenever any significant combination of specificity, clarity, or time is of the essence to address a threat to the reliability of the bulk power system brought on by lack of or inadequate compliance to the reliability standards.

6.2 Compliance Requirements

In the United States, the Commission has concluded that owners, operators, or users of the bulk power system must comply with remedial action directives issued to them by NERC or a regional entity. Noncompliance with a remedial action directive may result in a substantially increased penalty or sanction.

Remedial action directives issued by NERC or the regional entity will include a deadline by which time the owner, operator, or user must complete requirements set out in the order, and by which time the entity must demonstrate compliance to the remedial action directive to NERC or the regional entity that issued it. Failure or refusal to meet the requirements or deadlines set out in a remedial action directive may itself result in further remedial action directives or significantly increased penalties or sanctions by NERC or the regional entity.

6.3 No Obligation to Issue

NERC or the regional entity may, but is not obligated, to issue remedial action directives. Lack of being issued a remedial action directive does not relieve a bulk power system owner, operator, or user from any responsibilities they otherwise have to comply or maintain compliance with requirements of the reliability standards. Remedial action directives will be used by NERC or the regional entities only as they deem warranted, when they deem warranted.

6.4 Scope of Application

The scope of remedial action directives issued by NERC or the regional entity will be limited to conditions, practices, or any other relevant actions or activities resulting in noncompliance, or that NERC or the regional entity considers at significant risk of becoming noncompliant, to requirements of the reliability standards, and that present an imminent threat to the reliability of the bulk power system. However, beyond merely directing compliance or improved compliance with standards' requirements, where NERC or the regional entity is authorized to do so, the directive may also stipulate how compliance or the improvement to compliance is to be achieved.

6.5 Availability

In the United States, the Commission has interpreted the Federal Power Act to authorize the NERC or the regional entity can issue a remedial action directive prior to completion of the confirmation review of a probable violation, or prior to the determination of a penalty or sanction for that violation. The Commission also concluded it is not necessary for NERC or the regional entity to acquire the Commission's or other regulators' approval prior to issuing remedial action directives. Accordingly, NERC or the regional entity may issue remedial action directives to entities in the United States whenever they deem it necessary or otherwise warranted to do so. Also, NERC or the regional entity may issue remedial action directives to entities in the United States regarding a violation that is immediately necessary to terminate or correct to protect the reliability of the bulk power system from an imminent threat, irrespective of whether that violation is ultimately verified or dismissed by NERC or the regional entity's investigation of the violation.

6.6 No Impact on Confirmation of Violation, or Penalties or Sanctions

Remedial action directives issued regarding a violation, in particular any costs incurred by the violator to comply with any such directive, will not be considered when reviewing whether the aggregate of any penalties and sanctions levied for that violation bear a reasonable relation to the seriousness of the violation. Also, any remedial action directives issued with respect to a violation will not influence the outcome of the confirmation review of that violation nor the determination of penalties or sanctions for that violation; ordering a violator to correct what needs correcting anyway is no grounds for dispelling a violation nor reducing or eliminating a penalty or sanction that would otherwise be determined appropriate for the violator for that violation.

6.7 Types of Remedial Actions

NERC or the regional entities may issue remedial action directives to correct compliance with NERC or regional reliability standards and reduce or eliminate imminent threats to the reliability of the bulk power system. Examples of remedial actions include:

- a. Specifying operating or planning criteria, limits, or limitations
- b. Requiring specific system studies
- c. Defining operating practices or guidelines
- d. Requiring confirmation of data, practices, or procedures through inspection testing or other methods
- e. Requiring specific training for personnel
- f. Requiring development of specific operating plans

Appendix A: Base Penalty Amount Table

The following lists the Base Penalty amounts corresponding to combinations of violation risk factor and violation severity factor.

Violation Risk Factor	Violation Severity Level							
	Lower		Moderate		High		Severe	
	Range Limits		Range Limits		Range Limits		Range Limits	
	Low	High	Low	High	Low	High	Low	High
Lower	\$1,000	\$3,000	\$2,000	\$7,500	\$3,000	\$15,000	\$5,000	\$25,000
Medium	\$2,000	\$30,000	\$4,000	\$100,000	\$6,000	\$200,000	\$10,000	\$335,000
High	\$4,000	\$125,000	\$8,000	\$300,000	\$12,000	\$625,000	\$20,000	\$1,000,000

NOTE: This table describes the amount of penalty that could be applied for each day that a violation continues, subject to the considerations of Section 3.21 regarding frequency and duration of violations.

1. Preamble and Overview

The North American Electric Reliability Corporation, as the electric reliability organization (ERO), and regional entities to whom NERC has delegated authority (hereinafter referred to collectively as “regional entities” or individually as a “regional entity”) shall determine and may levy monetary penalties and non-monetary sanctions and remedial actions against owners, operators, and users of the bulk power system for violations of the requirements of NERC Reliability Standards (“reliability standards”) approved by the Federal Energy Regulatory Commission (FERC) and applicable authorities in Canada and/or Mexico. This document sets out the processes and principles to be followed, and factors that will be considered when determining penalties, sanctions, or remedial actions for violations. Collectively these processes, principles and factors are NERC’s penalties, sanctions, and remedial action guidelines.

NERC and the regional entities will exclusively follow the directives, principles and processes in these Sanction Guidelines when determining penalties, sanctions, or remedial action for a violation. However, adjustment factors are also provided to afford NERC or the regional entity the flexibility needed to accommodate the facts surrounding each violation. In this manner, rigid prescription of specific penalty formulae can be avoided at the same time that appropriate limitations on the degree of discretion and flexibility available to address each violation on its merits is maintained. The outcome will be remedies that are commensurate and fair compared to the reliability impact of the violation and to remedies levied for similar violations, yet appropriately reflective of any unique facts and circumstances regarding the specific violation and violator.

The adjustment factors established in this document are generally consistent with those listed in the FERC Policy Statement on Enforcement issued on October 20, 2005. However, discussion of the factors presented in this document is not exhaustive as other facets of these factors, or other additional factors not discussed herein, may also be considered to determine a given penalty, sanction, or remedial action, as NERC or the regional entity deems appropriate under the circumstances.

Regional entities shall follow these guidelines to determine penalties, sanctions, or remedial actions. NERC shall oversee the regional entities’ application of the guidelines to ensure that acceptable levels of consistency are achieved. NERC’s oversight will also ensure comparable outcomes; i.e. that there is acceptable similarity in the degree and type of sanction for violations constituting comparable levels of threat to reliability of the bulk power system. In order to facilitate this oversight, regional entities’ reporting to NERC of penalties and sanctions they have determined will be thorough and in sufficient detail that NERC can understand and reasonably replicate the outcomes reached; NERC may develop reporting requirements or a standard reporting form for use by the regional entities for this purpose, as NERC deems necessary or appropriate.

As experience is gained by NERC and the regional entities through the use and application of these guidelines, NERC will review the guidelines and may modify them as NERC deems appropriate or necessary. Authority delegated by NERC to the regional entities with respect to penalties, sanctions, or remedial actions does not include the authority to modify these guidelines.

Any revision to this document or to the principles and factors identified or addressed within it must first be approved by the NERC board, then by FERC, appropriate authorities in Canada or appropriate authorities in Mexico prior to becoming effective and applicable within the United States or these authorities’ respective jurisdictions.

2. Document Scope and Exclusions

This document identifies and discusses the processes and principles to be followed, and factors that will be considered to determine penalties, sanctions, or remedial actions for violations of the reliability standards.

This document notes but does not otherwise address the progression of actions and steps that NERC or the regional entity will follow to process a violation from its initial incoming status upon discovery as a ~~possible~~probable violation, through to its possible final determination as a ~~post-appeal~~-confirmed violation. This is set out in [the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC's Rules of Procedure](#) ~~Section 400 and applicable regional entity program documents~~.

This document notes but does not otherwise address how ~~an~~ possible violation or alleged violation is reviewed in order to confirm or ~~dispel~~dismiss it. NERC's process and requirements for this review are set out in the NERC [Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure](#) ~~Section 400~~. Regional entities will undertake such reviews ~~either~~ using the processes and requirements set out in the [NERC Compliance Monitoring and Enforcement Program Rules of Procedure](#) ~~or using their own documented process that has been reviewed and approved by NERC as meeting the requirements for such a process~~.

This document notes but does not otherwise address the processes and procedural steps by which a confirmed violation can be appealed, or by which a penalty, sanction, or remedial action determined and levied for a violation can be appealed. These procedures are set out in [the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC's Rules of Procedure](#), ~~Section 400~~ and applicable regional entity program documents.

[The NERC Compliance Monitoring and Enforcement Program](#) ~~Section 403 paragraph 18 of NERC's Rules of Procedure~~ provides for the possibility of settlements within NERC or regional entity compliance enforcement programs. This document makes reference to settlements to but does not address them further.

3. Basic Principles

The following paragraphs identify and discuss the basic principles underpinning why and how NERC and the regional entities will determine penalties, sanctions, and remedial actions for violations of the requirements of the reliability standards.

The principles are unique and complimentary; the order in which they are presented does not set or indicate order of precedence.

3.1 Necessary Element of NERC Compliance Program

Primary objectives of NERC as the ERO include the promotion and enforcement of compliance with the reliability standards by owners, operators, and users of the bulk power system; standards made mandatory by duly-authorized legislative bodies in the U.S and Canada, and designed to maintain and promote the reliability of the two countries' shared power grids. Consistent with these objectives, NERC and the regional entities will monitor and act to verify compliance with standards' requirements; however, beyond monitoring and acting only to verify compliance, NERC and the regional entities will also hold bulk power system owners, operators, and users — or their delegates — accountable for confirmed compliance violations. This accountability will include determination and the possible levying of penalties, sanctions, or remedial actions.

Penalties, sanctions, and remedial actions are valid and necessary mechanisms to NERC and the regional entities for the enforcement and promotion of compliance to the reliability standards, in part because they can:

- a. promote compliance behavior;
- b. provide deterrence to future incidents, actions or situations of noncompliance by the violator or others;
- c. implement actions that will promptly correct behavior;
- d. disgorge benefits that may or may have accrued to a violator as a consequence of violating;
- e. visit upon a violator some portion of any damage their violation may or may have visited upon others.

Accordingly, the determination and potential levying of appropriate penalties, sanctions, or remedial actions by NERC or the regional entity upon those responsible for violations shall be a required step within the NERC and regional entity compliance enforcement programs.

3.2 Settlement of Compliance Violations

NERC and the regional entities shall maintain the reliability of the bulk power system by enforcing compliance with NERC and regional entity reliability standards. NERC and regional entity compliance enforcements programs will lay out how NERC and the regional entities will do this. In particular and by necessity, elements of these programs regarding the confirmation of violations, the determination and levying of penalties, sanctions, or remedial actions, and appeals are rigid and legalistic in form and nature in order to respect the basic tenets of due process and natural justice inherent within United States and Canadian justice systems, respectively, upon which they are being based. However, absolute adherence to the compliance programs, to the exclusion of other options, may not be the most appropriate, efficient or desirable means by which to achieve the end goal in all circumstances, to all entities party to a violation.

As set out in the NERC [Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure-Section 403-19](#), violations of the reliability standards may be dealt with through settlements reached between NERC, regional entity and the entity or entities to whom a [potential possible](#), alleged, or confirmed violation is attributed to by NERC or the regional entity. Any provisions made within a settlement regarding penalties, sanctions, or remedial actions can supersede

any corresponding penalties, sanctions that would otherwise be determined pursuant to these guidelines.

3.3 Settlement Request

~~At any point in the determination and levying of a penalty, sanction, or remedial action pursuant to these guidelines, a~~Any entity found in or being investigated for a violation may request ~~a settlement negotiations at any time, including prior to issuance of a notice of alleged violation;~~~~at no point within the processes and procedures, etc., described by these guidelines is the option of settlement not available.~~ however, NERC or the regional entity may decline to enter into or continue settlement negotiations after the possible violation or alleged violation becomes a confirmed violation.

3.4 Settlement Effect on Continuation of Determination of Penalties, Sanctions, or Remedial Actions

Until a settlement is finalized or parties to that settlement agree otherwise, NERC or the regional entity may continue activities and actions towards the determination and levying of a penalty, sanction, or remedial action that would otherwise be applicable pursuant to these guidelines, or that will be applicable if the settlement is not finalized.

3.5 Timing of Determination of Penalty, Sanction or Remedial Action

All possible violations and alleged violations will be reviewed by NERC or the regional entity with the outcome that either the violation will be confirmed or the violation will be ~~dismissed~~repealed.

The penalty, sanction, or other remedial action for a violation will be determined when ~~thean alleged violation becomes a confirmed violation or is resolved as part of a settlement agreement is affirmed.~~

At any time during confirmation review, hearing, or appeals NERC or the regional entity may determine that remedial action is warranted by the subject entity of the review, hearing, or appeals. NERC or the regional entity may direct that such remedial actions be undertaken by the subject entity at any time, including prior to confirmation of a violation, and without regulatory approval.

3.6 Determining Party

The determination of penalty, sanction or other remedial action for a violation will generally be undertaken by the same entity determining the violation to be a confirmed violation, but subject to review by NERC if the determination is made by a regional entity~~undertaking the confirmation review of that violation.~~

3.7 No Influence of Penalty, Sanction or Remedial Action upon Violation Confirmation Process

The penalty, sanction, or remedial action determined for a violation will not influence the outcome of the regional entity' or NERC's confirmation review of the violation. In particular, if the determination of penalty, sanction, or remedial action for a probable violation is being undertaken by the same entity undertaking the confirmation review, the entity will insure that there is sufficient separation, in such terms as time, process, personnel or the like, to preclude that the penalty, sanction, or remedial action determined influences the outcome of the confirmation review.

3.8 Reasonable Relationship to Violation

Penalties, sanctions, and remedial actions levied or applied for the violation of a reliability standard shall bear a reasonable relation to the seriousness of the violation while also reflecting consideration of the factors that these guidelines direct to take into account. In the United States, the legislation establishing mandatory enforceable reliability standards and the ERO requires that "Any penalty imposed ... shall; (A) bear a reasonable relation to the seriousness of the violation; and (B) take into consideration the efforts of the user, owner, or operator to remedy the violation in a timely manner¹.

¹ H.R.6, Energy Policy Act of 2005, Section 215, Paragraph e, subparagraph 6.

3.9 Use and Facets of Factors to Determine Penalties

Penalties levied for a given violation will be based on all facts and other information relevant to the incident or situation. To that end, these guidelines include factors which NERC and the regional entities will consider while determining the penalty or sanction to be levied.

NERC considers, and these guidelines direct, that the presence of some factors within a violation aggravates the seriousness of that violation and should cause an increase or expansion of the penalty to be levied. Conversely, the presence of some other factors mitigates that seriousness and should cause a decrease or reduction of the penalty to be levied. Also, some factors may mitigate or aggravate, and should have commensurate impact. NERC considers, and these guidelines direct, that the absence of an aggravating or mitigating factor will have no impact, as opposed to a mitigating or aggravating impact, respectively, to a penalty.

This document presents many of the relevant facets of the factors included in these guidelines. However, additional facets of these factors, or additional factors not discussed herein, may also be considered to determine a given penalty, sanction, or remedial action, as NERC or the regional entity deems appropriate under the circumstances. Where additional factors or facets are used they will be identified and their use will be justified. The effect of using these factors or facets on the penalty, sanction, or remedial action determined will also be fully and clearly disclosed.

3.10 Multiple Violations

A violation is a failure or inadequacy to meet a requirement of a reliability standard by a party responsible to comply with that requirement.

The failure or inadequacy of a violator to comply may involve more than one standard or several requirements of a single standard; as such, multiple individual violations may be in play when penalties, sanctions, or remedial actions for an incident or situation of noncompliance are being determined.

Strictly speaking, NERC or the regional entity can determine and levy a separate penalty or sanction, or direct remedial action, upon a violator for each individual violation. However, in instances of multiple violations related to a single act or common incidence of noncompliance, NERC or the regional entity will generally determine and issue a single aggregate penalty, sanction, or remedial action directive bearing reasonable relationship to the aggregate of the related violations. The penalty, sanction, or remedial action will not be that determined individually for the least serious of the violations; it will generally be at least as large or expansive as what would be called for individually for the most serious of the violations.

Some entities may be registered as being responsible for more than one function (e.g., transmission owner, transmission operator, balancing authority, generation operator), and a single requirement in some reliability standards may apply to the responsible entity for several functions. Where several functions are performed by the same entity, a violation will be assessed against the entity, not against each function.

3.11 Relation of the Penalty to the Seriousness of the Violation and Violator's Ability to Pay

As discussed in Section 3.8, above, penalties levied for the violation of a reliability standard shall bear a reasonable relation to the seriousness of the violation. The seriousness of a given violation by a given violator shall be assessed by review of the applicability of the Violation Risk Factors² associated with the violation to the characteristics of the violator's operation or power system. Size is a characteristic of a violator's operation or system. The size of the violator can be considered in the assessment but shall not be the only characteristic considered. Where size is considered in such a

² See Section 4 Part 4.11 for a discussion of these factors

review the facts relating to the violation in question will be reviewed such that the “actual” size of the violator is properly discerned and appropriately considered; the following are provided as illustrative examples:

- If the violator belongs to a generation and transmission cooperative or joint-action agency, size will be attributed to the particular violator, rather than to that generation and transmission cooperative or joint-action agency.
- If the violator constitutes part of a corporate family the size of the violator will be attributed to that violator alone, in the absence of any facts indicating involvement of the whole corporation or corporate affiliates of the violator.
- If the violator is an entity established solely as a shell to register as subject to one or more Reliability Standards the size of the entity will be disregarded in favor of consideration of the size of parent entity or any affiliates that NERC or the regional entity deems involved and constituting the “actual” size of the violator.

At the request of the violator, NERC or the regional entity may review the penalty in light of the violator’s financial ability to pay the penalty. Financial ability shall include both the financial strength of the entity as well as its structure (e.g., for-profit versus non-profit). Where penalties are reduced or eliminated NERC or the regional entity shall consider non-monetary sanctions or remedial action as alternatives or substitutes to the penalty, pursuant to Sections 3.17, 3.18 and 3.19, below, of this document.

The above actions will: (i) promote that violators are penalized or sanctioned commensurate with the risk or effect that their specific violation of the reliability standards had or is having to the reliability of the bulk power system while also; (ii) mitigating overly burdensome penalties to less consequential or financially-limited entities concurrent with; (iii) promoting that no penalty is inconsequential to the violator to whom it is assessed. This will promote that penalties levied for violations of reliability standards bear a reasonable relation to the seriousness of the violation while also addressing violators’ ability to pay the penalties they are assessed.

3.12 Violation Time Horizon

Reliability standards involving longer and broader time horizons, such as long-term planning activities, may have a lesser immediate impact and pose less immediate risk to the reliability of the bulk power system than standards addressing shorter and narrower timeframes, such as entities’ conduct in real time. Similarly, standards involving longer and broader time horizons typically will provide a longer time period over which to discover and remedy a violation when compared to standards addressing more immediate activities such as next-day planning, same-day operations or real-time operations. Using a time horizon element in the determination of penalties for violations provides for recognition of the “more immediate” nature — and hence higher risk — of the threat of some violations as opposed to the lesser-risk “future threat if not corrected” nature of other violations.

Penalties levied for the violation of a reliability standard shall consider the time horizon of the standard violated; violations of standards involving more immediate or real-time activities will generally incur larger penalties than violations of standards with longer or broader horizons.

Time horizons inherent in reliability standard requirements are not reflected in their assigned Violation Risk Factors or Violation Severity Levels³. Accordingly, the time horizon element of a violation will be considered when determining the Base Penalty Amount⁴ for the violation.

The time horizon considered and its impact on the selection of the Base Penalty Amount for the violation will be decided upon by NERC or the regional entity based upon judgment and the facts of the violation. The rationale for the time horizon used and its impact on the setting of the Base Penalty

³ See Section 4 Part 4.11 for a discussion of these factors.

⁴ See Section 4 Part 4.2

Amount will be documented by NERC or the regional entity and provided within the Notice of Penalty issued for the violation.

3.13 Extenuating Circumstances

In unique extenuating circumstances, such as significant natural disasters, penalties may be significantly reduced or eliminated.

3.14 Concealment or Intentional Violation

Penalties levied for the violation of a reliability standard shall always take into consideration any attempt by a violator to conceal the violation from NERC or the regional entity, or any intentional violation incurred for purposes other than a demonstrably good faith effort to avoid a significant and greater threat to the immediate reliability of the bulk power system.

3.15 Economic Choice to Violate

Owners, operators, and users of the bulk power system may be presented with situations or circumstances where compliance with the reliability standards preclude or reduce an economic gain that could be realized by violating the standards. Penalties shall be sufficient to assure that entities responsible for complying with reliability standards do not find it attractive to make economic choices that cause or unduly risk violations to reliability standards, or risk or cause incidents resulting from violations of the reliability standards. Penalties levied to violators who have made such a choice shall reflect this aspect of the violation.

3.16 No Influence by Outcome of Economic Choice to Violate

Economic choices to violate are generally made for the violator's own potential gain, but making such a choice does not always result in all potential gains being realized or may result in damage or loss. However, irrespective of the outcome to the entity making an economic choice to violate, such decisions risk others' reliability, commonly without either their knowledge or consent. Penalties levied to violators making an economic choice to violate shall reflect only that the choice was made at all; the lack of or reduced magnitude of any actual benefit received, or any damage suffered, by the violator as a consequence of making this choice will have no influence on the determination of the penalty to be levied.

3.17 Non-Monetary Sanctions or Remedial Actions

Enforcement actions taken by NERC or a regional entity are not limited to monetary penalties; at the discretion of NERC or the regional entity, sanctions or remedial actions may also be applied and can include limitations on activities, functions, operations, or other appropriate sanctions, including the establishment of a reliability watch list composed of major violators.

3.18 Non-Exclusiveness of Monetary Penalties or Non-Monetary Sanctions

A non-monetary sanction may be imposed either in lieu of or in addition to a monetary penalty imposed for the same confirmed violation, and vice versa. Imposition of a monetary penalty or non-monetary sanction for a violation does not preclude the imposition of the other as long as, in combination, the aggregate penalty continues to bear a reasonable relation to the seriousness of the violation.

3.19 Monetization of the Value of Sanctions

A significant element of NERC's oversight of penalties, sanctions, and remedial action determined and levied by regional entities is ensuring acceptable similarity in the degree and type of sanction for violations constituting comparable levels of threat to the reliability of the bulk power system. It is also a requirement and a commitment of NERC and its designees that penalties, sanctions, or remedial actions levied or applied for the violation of a reliability standard bear reasonable relation to the seriousness of the violation. Specifically with respect to penalties and sanctions, it is intuitive that it will be easier, more objective, and more transparent to monitor and test for acceptable similarity if (monetary) penalties or monetized values of sanctions determined for violations are used as the

primary basis of comparison, versus comparisons made on the basis of other (non-monetized) considerations. Similarly, there will be strong intuitiveness and transparency, particularly to those interested but not strongly familiar with the power industry, that the seriousness of a violation has been reasonably addressed if the consequences for it to the violator are determined and can be expressed clearly and quantifiably in monetary terms.

Penalties determined and levied by NERC or regional entities will by definition be valued in monetary terms: U.S or Canadian dollars. It will be the preference of NERC that (non-monetary) sanctions imposed either in lieu of or in addition to a penalty include disclosure of the monetary value that the sanctions represent to the violator. It is intuitive that defensible monetary values for those sanctions will be most easily determined if the penalty for the violation pursuant to these guidelines is first determined and then the sanctions to be levied are introduced and justified as appropriate alternatives to that penalty or additions to a lesser penalty. However, sanctions may be determined directly (e.g. without first determining a penalty amount) and monetized using other methods.

NERC does not have a preference between penalties and sanctions for violations. The preference expressed here will support ensuring comparability of outcomes regarding application of these guidelines and the promotion of reasonable relationship between the seriousness of a violation and the sanctions, or penalties and sanctions, levied for it.

3.20 Maximum Limitations on Penalties

Penalties are direct, monetary judgments levied against a violator by NERC or the regional entity for the violation of requirements of the reliability standards. In contrast, sanctions will impose limitations or restrictions of some kind that may result in economic or other impacts to the violator, and remedial actions are directives by NERC or a regional entity to the violator regarding the correction of conditions, practices or any other relevant action or activity underlying the noncompliance(s) involved.

In the United States, the Federal Power Act allows for the imposition of civil penalties of up to \$1,000,000 per day per violation. NERC and the regional entities draw their authority to levy penalties from the Federal Power Act; accordingly this figure is and can be understood as the maximum monetary penalty that NERC or regional entities are authorized to levy. However, as this legislation also requires that “[a]ny penalty imposed ... shall; (A) bear a reasonable relation to the seriousness of the violation; and (B) take into consideration the efforts of the user, owner, or operator to remedy the violation in a timely manner⁵” ***entities required to comply with the reliability standards must also understand that NERC and the regional entities will be obligated to assess penalties amounts up to and including the maximum amount for violations where warranted pursuant to these guidelines.***

In Canadian jurisdictions the maximum monetary penalty potentially assessable for a reliability standard violation is significantly less than the amount allowed in the United States under the Federal Power Act. Also, legislation presently governing some Canadian jurisdictions does not accommodate the levying of such a penalty under some circumstances, may not accommodate the levying of such a penalty for all violations, or does not accommodate the levying of any monetary penalties.

When a penalty may be levied, or proposed to regulatory authorities with jurisdiction to be levied, the following steps will be followed:

- a. NERC or the regional entity will initially disregard the penalty limitations of the regulatory authorities with jurisdiction, and determine what the penalties or sanctions would be pursuant to these sanction guidelines only.
- b. NERC or the regional entity will review the maximum penalty allowed by the regulatory authorities with jurisdiction.

⁵ H.R.6, Energy Policy Act of 2005, Section 215, Paragraph e, subparagraph 6.

- c. NERC or the regional entity will set the actual penalty to be levied, or proposed to the regulatory authorities with jurisdiction to be levied, as the lesser of that determined pursuant to these guidelines and the maximum penalty or sanction allowed by the regulatory authorities.
- d. If the lesser penalty is the maximum penalty allowed by the regulatory authorities, the notice of penalty or similar document issued by NERC or the regional entity regarding the violation will also list the penalty that was determined pursuant to these guidelines.

Adhering to the above steps will insure that the result of the determination of any penalty for any violation will produce output that can be directly compared (i.e. without influence of local authorities' penalty limitations or restrictions) with the penalty determined for any other violation, assisting efforts of NERC and others to ensure that these guidelines are uniformly applied and that there is an acceptable level of consistency in the application of these sanction guidelines across North America. Regulatory authorities with jurisdiction may also find such information useful for their determination of the appropriateness of any penalty or sanction proposed to them to be levied. Similarly, policy and legislative bodies may find such information of value to the review or development of arrangements addressing such matters.

3.21 Frequency and Duration of Violations

Section 316A of the Federal Power Act [16 U.S.C. § 825o-1(b)], as amended by the Energy Policy Act of 2005, provides that “any person who violates any provision of Part II of this title or any provision of any rule or order thereunder shall be subject to a civil penalty of not more than \$1,000,000 for each day that such violation continues.”

FERC Order No. 672 interprets this statement as setting a cap on the monetary penalties that the Commission, NERC and regional entities can impose under FPA section 215. FERC has referred to this statutory provision as imposing a maximum \$1,000,000 “per day, per violation” penalty and has directed that the ERO must ensure that in the U.S. such a penalty amount (\$1,000,000), in such a manner (“per day, per violation”), can be imposed for a violation of the Reliability Standards should the conduct at issue so warrant.

Some Reliability Standards may not support the assessment of penalties on a “per day, per violation” basis, but instead should have penalties calculated based on an alternative penalty frequency or duration. Where NERC or the regional entity deems that a monetary penalty is warranted, or where NERC or the regional entity is monetizing (Section 3.19) the value of a non-monetary sanction, for the violation of such a standard NERC or the regional entity shall determine the penalty or monetized amount consistent with the following:

Multiple Instances of Violation on One Day

The nature of some Reliability Standards includes the possibility that an entity could violate the same requirement two or more times on the same day. In this instance NERC or the regional entity is not limited to penalizing the violator a maximum of \$1,000,000 per day. As NERC or the regional entity deems appropriate NERC or the regional entity may deem that there have been multiple violations that occurred on the same day, each of which is subject to the maximum potential penalty of \$1,000,000 per violation, per day. Also, NERC or the regional entity is not constrained to assessing the same penalty amount for each of the multiple violations, irrespective of their proximity in time.

Cumulative Over Time

Certain requirements of the Reliability Standards are measured not on the basis of discrete acts, but of cumulative acts over time. Reliability Standards that fall into this category are generally those involving measurements based on averages over a given period. Where a violation of such a standard has occurred the element of averaging performance over a period of time introduces the difficulty to

NERC or the regional entity of reasonably identifying (i) what date the violation should be deemed to have occurred and (ii) its duration.

If a Reliability Standard requirement measured by an average over time can only be violated once per applicable period, then there is risk that a disproportionately mild penalty might be levied in a situation where the violation was serious and the effects on the Bulk-Power System severe. In the future, each Reliability Standard requirement that is based on an average over time will specify the minimum period in which a violation could occur and how to determine when a violation arises, which may be other than once per applicable period⁶. In the interim until relevant Reliability Standards are so modified, any ambiguity on this point will be construed conservatively, meaning that where an entity has not complied with such a standard NERC or the regional entity will generally consider that only one violation occurred per measurement period. However, notwithstanding this general principle of one violation per measurement period, if an average must be measured by a span of time greater than a month, each month of that span shall constitute at a minimum one violation.

Periodically Monitored Discrete Violation

Some Reliability Standards may involve discrete events which are only monitored periodically or which are reported by exception. If a requirement of such a standard states that a discrete event constitutes a violation, then (i) a violation arises when that event occurs and (ii) that violation continues until remedied; furthermore, (iii) the violation is deemed to have occurred at the point that the entity entered into noncompliance with the standard regardless of the monitoring period for the activity or its date of discovery or reporting. For example, if a task required by a Reliability Standard requirement has not been done by the required date, it is irrelevant that monitoring for compliance for the requirement occurs only on a yearly or other periodic basis; NERC or the regional entity will deem a violation to have occurred on the first day of noncompliance and each day thereafter until compliance is effectuated. Similarly, if a discrete event occurs and is not remedied on the date of occurrence, then NERC or the regional entity will deem a violation to have occurred on the day of the first instance of the noncompliance and each day, or portion thereof thereafter until compliance is effectuated.

Non-compliance with a standard of this type will subject the violator to the potential maximum monetary penalty of \$1,000,000 per violation per day in violation.

NERC or the regional entity is not constrained to assessing the same penalty amount for each day that the entity was in violation of the Reliability Standard requirement in question.

⁶ Para. 41; FERC Order on Clarification and Rehearing [Docket No. RR06-1-006]

4. Determination of Monetary Penalties

The following describes the steps that NERC or the regional entity will follow to determine the monetary penalty for a violation⁷. The determination of non-monetary sanctions is discussed in Section 5 of this document; Section 6 discusses remedial action.

- Step 1. The Base Penalty Amount for the violation will be set as discussed in Sections 4.1 and 4.2, below.
- Step 2. The Base Penalty Amount set in Step 1 will be reviewed pursuant to Section 4.3, below. This will result in the Adjusted Penalty Amount.
- Step 3. The Adjusted Penalty Amount determined in Step 2 may be reviewed in light of the violator's financial ability to pay the penalty. Also, where applicable NERC or the regional entity will reconfirm that the penalty set will disgorge unjust profits or economic benefits associated with an economic choice to violate⁸. At the conclusion of this review the Final Penalty Amount will be set.

Unless NERC or the regional entity deems alternative frequency or duration is warranted penalties shall be assessed on a per violation per day basis. Where NERC or the regional entity deems that alternative penalty frequency or duration is warranted the Notice of Penalty associated with the violation will clearly identify this and provide the rationale for it. Where NERC or the regional entity deems that alternative penalty frequency or duration is warranted, penalties shall be determined in accordance with section 3.21 of the Sanction Guidelines.

4.1 Initial Value Range of the Base Penalty Amount

NERC or the regional entity will determine an initial value range for the Base Penalty Amount by considering two factors regarding the violation: the Violation Risk Factor (VRF) of the requirement violated and the Violation Severity Level (VSL) assessed for the violation. Using the Base Penalty Amount Table provided in Appendix A NERC or the regional entity will look up the initial value range for the Base Penalty Amount by finding the intersection of the violation's VRF and VSL on the table⁹.

4.1.1 Violation Risk Factor

Each requirement set out within NERC's reliability standards has been assigned a Violation Risk Factor (VRF) through the NERC reliability standards development process. The factors have been defined and approved through the standards development process and are assigned to requirements to provide clear, concise and comparative association between the violation of a requirement and the expected or potential impact of the violation to the reliability of the bulk power system. One of three defined levels of risk is assigned to each standards requirement: Lower Risk Factor, or; Medium Risk Factor, or; High Risk Factor. Definitions of the factors can be found in appropriate standards development process documentation.

4.1.2 Violation Severity Level

Violation severity levels (VSLs) are defined measurements of the degree to which a violator violated a requirement of a reliability standard. Whereas violation risk factors are determined pre-violation and indicate the relative potential impacts that violations of each standard could pose to the reliability of the bulk power system, the violation severity level is assessed post-

⁷ The text in this section discusses the determination of a single penalty for an individual violation; however, the process laid out is also applicable to determining the individual penalties, or a single aggregate penalty, for multiple violations that are associated with each other as discussed in Section 3 Part 3.1 of this document.

⁸ Reference: Section 3 Parts 3.15 and 3.16.

⁹ As discussed in Section 3 Part 3.1 of this document where there is more than one violation in play, but the violations are sufficiently associated, NERC or the regional entity may set a single initial value range that is appropriate in light of the individual VRF/VSL combinations of the violations.

violation and is an indicator of how severely the violator actually violated the standard(s) requirement(s) in question.

These guidelines utilize the violation severity levels that have been established¹⁰ by NERC for requirements of the reliability standards. Up to four levels can be defined for each requirement; the levels have been designated as: Lower, Moderate, High, and Severe.

4.2 Setting of the Base Penalty Amount

NERC or the regional entity will set the Base Penalty Amount for the violation. The Base Penalty Amount set for the violation may be set at the highest figure of the initial value range determined pursuant to Section 4.1, above. However, NERC or the regional entity may set the Base Penalty Amount at or below the lowest figure of the initial value range in light of two specific circumstances regarding the violation and the violator, specifically:

- a. The applicability of the Violation Risk Factor of the violation to the specific circumstances¹¹ of violator.
- b. Whether this is an inconsequential first violation by the violator of the reliability standard(s) in question.

As noted in Section 3.12 NERC or the regional entity will consider the time horizon involved with the violation when setting the Base Penalty Amount for the violation. As also noted in Section 3.12 this consideration will be documented for inclusion in the Notice of Penalty issued for the violation.

The penalty amount resulting from the this review will be the Base Penalty Amount that is used as the basis for further adjustment pursuant to the factors discussed in the next section (4.3) of this document.

4.2.1 Applicability of the Violation Risk Factor

Violation Risk Factors are assigned to standards' requirements as indicators of the expected risk or harm to the bulk power system posed by the violation of a requirement by a typical or median entity that is required to comply. NERC or the regional entity may consider the specific circumstances of the violator to determine if the violation of the requirement in question actually produced the degree of risk or harm anticipated by the Violation Risk Factor. If that expected risk or harm was not or would not have been produced, NERC or the regional entity may set the Base Penalty Amount to a value it (i) deems appropriate and (ii) is within the initial value range set above pursuant to Section 4.1.

4.2.2 First Violation

If the actual or foreseen impact of the violation is judged to be inconsequential by NERC or the regional entity and the violation is the first incidence of violation of the requirement in question by the violator, NERC or the regional entity may at its discretion: (i) set the Base Penalty Amount to a value it deems appropriate within the initial value range set above pursuant to Section 4.1, or (ii) excuse the penalty for the violation (i.e. set the Base Penalty Amount to 0\$).

This relief will generally not be afforded to the violator if NERC or the regional entity determines that the violator has a poor compliance record; e.g. the circumstances discussed in Section 4.3.1 have been an aggravating factor in one or more previous penalties assessed to the violator.

¹⁰ Assignment of these levels will be complete and filed with the Commission by March 1, 2008 in accordance with FERC Order on Compliance Filing dated June 7, 2007 [Docket No. RR06-1-007] .

¹¹ The circumstances of the violator will include but not be limited to, as appropriate: the violator's aggregate and net load; interconnections characteristics such as voltage class and transfer ratings;

This relief will not be available for consideration in instances where the violator has concealed or attempted to conceal the violation, failed or refused to comply with compliance directives from NERC or the regional entity, or intentionally violated for purposes other than a demonstrably good faith effort to avoid a significant and greater threat to the immediate reliability of the bulk power system.

4.3 Application of Adjustment Factors

Adjustment factors provide the opportunity to NERC or the regional entity to adjust the base penalty to reflect the specific facts and circumstances material to each violation and violator.

These guidelines recognize and require that, as a minimum, NERC or the regional entity consider the following:

- a. Repetitive violations and the violator's compliance history
- b. Failure of the violator to comply with compliance directives
- c. Self-disclosure and voluntary corrective action by the violator
- d. Degree and quality of cooperation by the violator in the violation investigation and in any remedial action directed for the violation
- e. The presence and quality of the violator's compliance program quality
- f. Any attempt by the violator to conceal the violation
- g. Intentional violations
- h. Extenuating circumstances

Two documents issued by United States regulatory agencies will be instructive to NERC and the regional entities when they are determining penalties for violations of the reliability standards: the FERC's Policy Statement on Enforcement issued on October 20, 2005 under Docket No. PL06-00, and; U.S Securities and Exchange Commission (SEC) Release No. 44969 under the Securities and Exchange Act of 1934, issued on October 23 2001, also concurrently issued by the SEC as Release No. 1470 under Accounting and Auditing Enforcement.

NERC or the regional may also consider other additional factors it deems appropriate under the circumstances as long as their use is clearly identified and adequately justified. The effect of using these factors will also be fully and clearly disclosed.

4.3.1 Repetitive Violations and Compliance History

A bulleted point under Paragraph 20 of the FERC Policy Statement on Enforcement highlights repeat offenses by a violator. If a violator has had repetitive infractions of the same or a closely-related reliability standard requirement, particularly within a time frame defined within the standard(s) or deemed appropriate by NERC or the regional entity in the absence of the standard(s) defining the time frame, NERC or the regional entity shall consider some increase to the penalty.

The term "violation reset time period" of a standards requirement may be defined or implied within a given standard to describe the period of time generally required for a violator to continue operations without incidence of further violation(s) of the Reliability Standards, particularly of the initial or a similar standard violated, in order to avoid or minimize consideration of the violator's previous violation history for sanctioning purposes in the event of a subsequent violation(s). NERC and the Regional Entities shall exercise appropriate judgment and discretion in this regard as warranted, particularly where no reset time period is specifically set within the standard violated. Repeat violations within violation reset time periods are aggravating factors in the determination of sanctioning. Accordingly, a violation history of no violations will produce no mitigation of the penalty otherwise determined; a

violation history of infrequent minor violations of lesser risk requirements assessed lower violation severity levels may result in small or no increase; a history of more frequent violations or previous violations of higher risk requirements assessed more severe violation severity levels will generally incur commensurately larger increases.

4.3.2 Failure to Comply with Compliance Directives

If the violator has violated reliability standard requirements notwithstanding having received related compliance directives, such as for remedial action from NERC or the regional entity, NERC or the regional entity shall consider some increase to the penalty.

4.3.3 Self-Disclosure and Voluntary Corrective Action

NERC or the regional entity shall consider whether a violator self-disclosed the violation prior to detection or intervention by NERC or the regional entity, and any action undertaken by the violator to correct the situation. NERC or the regional entity will be instructed in their consideration of these factors by the text of Paragraphs 24 and 25 of the FERC Policy Statement on Enforcement. As they deem warranted, NERC or the regional entity may reduce the violator's penalty consistent with the cited sections of the FERC policy.

4.3.4 Degree and Quality of Cooperation in Violation Investigation and Remedial Action

NERC or the regional entity shall consider the degree and quality of the violator's cooperation with NERC or the regional entity in the investigation of the violation and any remedial action arising from it. NERC or the regional entity will be instructed in making their determination on this by the text of Paragraphs 26 and 27 of the FERC Policy Statement on Enforcement. NERC or the regional entity may adjust the violator's penalty as they deem warranted commensurate with the cited sections of the FERC policy statement. This may result in an increase, a decrease or no change to the penalty.

4.3.5 Presence and Quality of Compliance Program

NERC or the regional entity shall consider the presence and quality of the violator's compliance program. NERC or the regional entity will be instructed in making their determination on this factor by the text of Paragraphs 22 and 23 of the FERC Policy Statement on Enforcement. As they deem warranted, NERC or the regional entity may reduce the violator's penalty consistent with the cited sections of the FERC policy. Consistent with the FERC policy NERC or the regional entity may not increase a violator's penalty specifically on the grounds that the violator has no program or a poor quality program.

4.3.6 Violation Concealment

Two bulleted points under Paragraph 20 of the FERC Policy Statement on Enforcement highlight misrepresentation of material facts and resistance or impediment to inquiry of a violation. When determining a penalty NERC or the regional entity shall consider any concealment or attempt to conceal the violation, or information needed to investigate the violation, on the part of the violator. If the violator concealed or attempted to conceal, some significant increase to the penalty shall be considered; doubling of the penalty otherwise determined is suggested. Conduct of this nature on more than one occasion regarding one violation, or with respect to more than one violation, should incur an even larger increase to the penalty otherwise determined.

4.3.7 Intentional Violation

Another bulleted point under Paragraph 20 of the FERC Policy Statement on Enforcement highlights offenses as willful action by a violator. When determining a penalty NERC or the regional entity shall consider if the violator intentionally violated without just cause; i.e., for purposes other than a demonstrably good faith effort to avoid a significant and greater threat to the immediate reliability of the bulk power system. If the violator engaged in such conduct,

some significant increase to the penalty shall be considered; doubling of the penalty otherwise determined is suggested. If conduct of this nature has been detected on more than one occasion, NERC or the regional entity should assess an even larger increase to the penalty otherwise determined.

NERC or the regional entity will consider violations attributable to an economic choice to violate as intentional violations. Consistent with the FERC Policy Statement on Enforcement any penalty issued involving conduct of this manner shall as a minimum disgorge any profits or economic benefits acquired as a consequence of the behavior, whenever and to the extent that they can be determined or reasonably estimated.

4.3.8 Extenuating Circumstances

NERC or the regional entity will consider if there are extenuating circumstances regarding the violation that justify reduction or elimination of the penalty otherwise determined.

Consideration of adjusting a penalty for this factor would be inconsistent with NERC or the regional entity increasing a penalty after consideration of any other factor included in this section of these guidelines, such as intentional violation without justifiable cause or concealment or attempt to conceal.

4.4 Setting of the Final Penalty Amount

The Adjusted Penalty Amount determined in Step 2 may be reviewed in light of the violator's financial ability to pay the penalty. Also, if the violation was an economic choice, NERC or the regional entity will reconfirm that the penalty set will disgorge any unjust profits or economic benefits. At the conclusion of this review the Final Penalty Amount will be set.

4.4.1 Violator's Financial Ability to Pay¹²

At the written request of the violator NERC or the regional entity will review the penalty determined in Step 2 in light of relevant, verifiable information that the violator provides regarding their financial ability to pay. At the conclusion of this review NERC or the regional entity may:

1. Reduce the penalty payable to an amount that NERC or the regional entity, as applicable, deems the violator has the financial ability to pay, or;
2. Excuse the penalty amount payable, or;
3. Sustain the penalty amount determined in Step 2.

Where the penalty amount has been reduced or excused, NERC or the regional entity shall consider the assessment of appropriate non-monetary sanction(s) as a substitute or an alternative for the penalty amount that has been excused or by which the penalty has been reduced.

4.4.2 Reconfirmation of Disgorgement of Unjust Profit or Gain

Notwithstanding the application of any other consideration or factor applicable to the determination of a just and reasonable penalty for the violation, if the violation in question involved an economic choice to violate NERC or the regional entity shall reconfirm that the penalty set meets the requirements set forth in Parts 3.15 and 3.16 of Section 3 of this document.

¹² NERC anticipates that this will be the primary vehicle for addressing the ability to pay of "not-for-profit" and other similar organizations.

5. Determination of Non-Monetary Sanctions

The imposition of sanctions is not bounded to monetary penalties. Non-Monetary sanctions applied must be applied with the objective of promoting reliability and compliance with the reliability standards. Non-monetary sanctions may include, but not be limited to, the following:

- a. Limitations on activities, functions, or operations
- b. Placing an entity on a reliability watch list composed of major violators

6. Remedial Action

6.1 Definition and Anticipated Use

Remedial actions are directives that may be issued to a bulk power system owner, operator, or user to resolve an alleged violation of a reliability standard by addressing conditions, practices, or any other relevant action or activity that is immediately necessary to terminate or correct to protect the reliability of the bulk power system from an imminent threat. A remedial action directive will be issued when NERC or the regional entity identifies an alleged violation of a reliability standard that must be corrected immediately to ~~promptly reduce~~ protect the reliability of the bulk power system from the imminent ~~the reliability~~ threat that NERC or the regional entity has identified ~~poses to the reliability of the bulk power system~~.

NERC or the regional entity will generally employ remedial action directives where they deem it necessary to clearly specify minimum corrective actions that the subject of the remedial action directive must take; additionally or alternatively a remedial action directive may clearly specify timelines within which the subject must take specified actions, complete specified tasks, or achieve specified outcomes. Also, to the extent NERC or the regional entity is authorized to do so, a remedial action directive may communicate penalties, sanctions, or further remedial actions that may be imposed should the specific remedial action directive not be complied with by those to whom it has been issued. As a rule of thumb, remedial action directives will be of use to NERC or the regional entity whenever any significant combination of specificity, clarity, or time is of the essence to address a threat to the reliability of the bulk power system brought on by lack of or inadequate compliance to the reliability standards.

6.2 Compliance Requirements

In the United States, the Commission has concluded that owners, operators, or users of the bulk power system must comply with remedial action directives issued to them by NERC or a regional entity. Noncompliance with a remedial action directive may result in a substantially increased penalty or sanction.

Remedial action directives issued by NERC or the regional entity will include a deadline by which time the owner, operator, or user must complete requirements set out in the order, and by which time the entity must demonstrate compliance to the remedial action directive to NERC or the regional entity that issued it. Failure or refusal to meet the requirements or deadlines set out in a remedial action directive may itself result in further remedial action directives or significantly increased penalties or sanctions by NERC or the regional entity.

6.3 No Obligation to Issue

NERC or the regional entity may, but is not obligated, to issue remedial action directives. Lack of being issued a remedial action directive does not relieve a bulk power system owner, operator, or user from any responsibilities they otherwise have to comply or maintain compliance with requirements of the reliability standards. Remedial action directives will be used by NERC or the regional entities only as they deem warranted, when they deem warranted.

6.4 Scope of Application

The scope of remedial action directives issued by NERC or the regional entity will be limited to conditions, practices, or any other relevant actions or activities resulting in noncompliance, or that NERC or the regional entity considers at significant risk of becoming noncompliant, to requirements of the reliability standards, and that present an imminent threat to the reliability of the bulk power system. However, beyond merely directing compliance or improved compliance with standards' requirements, where NERC or the regional entity is authorized to do so, the directive may also stipulate how compliance or the improvement to compliance is to be achieved.

6.5 Availability

In the United States, the Commission has interpreted the Federal Power Act to authorize the NERC or the regional entity can issue a remedial action directive prior to completion of the confirmation review of a probable violation, or prior to the determination of a penalty or sanction for that violation. The Commission also concluded it is not necessary for NERC or the regional entity to acquire the Commission's or other regulators' approval prior to issuing remedial action directives. Accordingly, NERC or the regional entity may issue remedial action directives to entities in the United States whenever they deem it necessary or otherwise warranted to do so. Also, NERC or the regional entity may issue remedial action directives to entities in the United States regarding a violation [that is immediately necessary to terminate or correct to protect the reliability of the bulk power system from an imminent threat](#), irrespective of whether that violation is ultimately verified or ~~dispelled~~[dismissed](#) by NERC or the regional entity's investigation of the violation.

6.6 No Impact on Confirmation of Violation, or Penalties or Sanctions

Remedial action directives issued regarding a violation, in particular any costs incurred by the violator to comply with any such directive, will not be considered when reviewing whether the aggregate of any penalties and sanctions levied for that violation bear a reasonable relation to the seriousness of the violation. Also, any remedial action directives issued with respect to a violation will not influence the outcome of the confirmation review of that violation nor the determination of penalties or sanctions for that violation; ordering a violator to correct what needs correcting anyway is no grounds for dispelling a violation nor reducing or eliminating a penalty or sanction that would otherwise be determined appropriate for the violator for that violation.

6.7 Types of Remedial Actions

NERC or the regional entities may issue remedial action directives to correct compliance with NERC or regional reliability standards and reduce or eliminate [imminent](#) threats to the reliability of the bulk power system. Examples of remedial actions include:

- a. Specifying operating or planning criteria, limits, or limitations
- b. Requiring specific system studies
- c. Defining operating practices or guidelines
- d. Requiring confirmation of data, practices, or procedures through inspection testing or other methods
- e. Requiring specific training for personnel
- f. Requiring development of specific operating plans

Appendix A: Base Penalty Amount Table

The following lists the Base Penalty amounts corresponding to combinations of violation risk factor and violation severity factor.

Violation Risk Factor	Violation Severity Level							
	Lower		Moderate		High		Severe	
	Range Limits		Range Limits		Range Limits		Range Limits	
	Low	High	Low	High	Low	High	Low	High
Lower	\$1,000	\$3,000	\$2,000	\$7,500	\$3,000	\$15,000	\$5,000	\$25,000
Medium	\$2,000	\$30,000	\$4,000	\$100,000	\$6,000	\$200,000	\$10,000	\$335,000
High	\$4,000	\$125,000	\$8,000	\$300,000	\$12,000	\$625,000	\$20,000	\$1,000,000

NOTE: This table describes the amount of penalty that could be applied for each day that a violation continues, subject to the considerations of Section 3.21 regarding frequency and duration of violations.

Compliance Monitoring and Enforcement Program

COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

1.0 INTRODUCTION

This Compliance Monitoring and Enforcement Program (“Compliance Program”) is the program to be used by the North American Electric Reliability Corporation (“NERC”) and the Regional Entities to monitor, assess, and enforce compliance with Reliability Standards within the United States. Compliance monitoring and enforcement programs also will be implemented in Canada consistent with Canadian laws and agreements.

1.1 Definitions

Capitalized terms used in this Compliance Program shall have the meanings set forth in Section 200 of the NERC Rules of Procedure or as set forth below:

- 1.1.1 Alleged Violation:** A Possible Violation for which the Compliance Enforcement Authority has determined, based on an assessment of the facts and circumstances surrounding the Possible Violation, that evidence exists to indicate a Registered Entity has violated a Reliability Standard.
- 1.1.2 Annual Audit Plan:** A plan developed annually by the Compliance Enforcement Authority that includes the Reliability Standards and Registered Entities to be audited, the schedule of Compliance Audits, and Compliance Audit Participant requirements for the calendar year.
- 1.1.3 Applicable Governmental Authority:** The Federal Energy Regulatory Commission (“FERC”) within the United States and the appropriate governmental authority with subject matter jurisdiction over reliability in Canada and Mexico.
- 1.1.4 Complaint:** An allegation that a Registered Entity violated a Reliability Standard.
- 1.1.5 Compliance Audit:** A systematic, objective review and examination of records and activities to determine whether a Registered Entity meets the requirements of applicable Reliability Standards.
- 1.1.6 Compliance Audit Participants:** Registered Entities scheduled to be audited and the audit team members.
- 1.1.7 Compliance Enforcement Authority:** NERC or the Regional Entity in their respective roles of monitoring and enforcing compliance with the NERC Reliability Standards.
- 1.1.8 Compliance Investigation:** A comprehensive investigation, which may include an on-site visit with interviews of the appropriate personnel, to determine if a violation of a Reliability Standard has occurred.

Compliance Monitoring and Enforcement Program

- 1.1.9** Confirmed Violation: An Alleged Violation for which an entity has: (1) accepted the finding of the violation by a Regional Entity or NERC and will not seek an appeal, or (2) completed the hearing and appeals process within NERC, or (3) allowed the time for requesting a hearing or submitting an appeal to expire, or (4) admitted to the violation in a settlement agreement.
- 1.1.10** End Date: The last date of the period to be covered in a Compliance Audit.
- 1.1.11** Exception Reporting: Information provided to the Compliance Enforcement Authority by a Registered Entity indicating that a violation of a Reliability Standard has occurred (e.g., a system operating limit has been exceeded) or enabling the Compliance Enforcement Authority to ascertain the Registered Entity's compliance.
- 1.1.12** Mitigation Plan: An action plan, required when a Registered Entity violates a Reliability Standard as determined by any means including Compliance Enforcement Authority decision, settlement agreement, or otherwise, that is developed by the Registered Entity to (1) correct a violation of a Reliability Standard and (2) prevent re-occurrence of the violation.
- 1.1.13** NERC Compliance Registry: A list, maintained by NERC pursuant to Section 500 of the NERC Rules of Procedure and Appendix 5B, the NERC *Statement of Compliance Registry Criteria*, of the owners, operators and users of the Bulk Power System, and the entities registered as their designees, that perform one or more functions in support of reliability of the Bulk Power System and are required to comply with one or more requirements of Reliability Standards.
- 1.1.14** NERC Compliance Monitoring and Enforcement Program Implementation Plan or NERC Implementation Plan: The annual NERC Compliance Monitoring and Enforcement Program Implementation Plan that specifies the Reliability Standards that are subject to reporting by Registered Entities to the Compliance Enforcement Authority in order to verify compliance and identifies the appropriate monitoring procedures and reporting schedules for each such Reliability Standard.
- 1.1.15** Notice of Alleged Violation: A notice issued by the Compliance Enforcement Authority to a Registered Entity pursuant to Section 5.3.
- 1.1.16** Notice of Completion of Enforcement Action: A notice issued by the Compliance Enforcement Authority to a Registered Entity, pursuant to Section 5.10, stating that an enforcement action is closed.

Compliance Monitoring and Enforcement Program

- 1.1.17** Notice of Confirmed Violation: A notice issued by the Compliance Enforcement Authority to a Registered Entity confirming the violation of one or more Reliability Standards, as a result of (1) the Registered Entity accepting a Notice of Alleged Violation and the proposed penalty or sanction, or (2) the finding of a violation through a hearing and appeal, or (3) the expiration of the period for requesting a hearing or an appeal, or (4) the Registered Entity admitting the violation as part of an executed settlement agreement.
- 1.1.18** Notice of Penalty: A notice prepared by NERC and filed with FERC, following approval by NERC of a Notice of Confirmed Violation or a settlement agreement, stating the penalty or sanction imposed or agreed to for the Confirmed Violation or as part of the settlement.
- 1.1.19** Notice of Possible Violation: A notice issued by the Compliance Enforcement Authority to a Registered Entity that (1) states a Possible Violation has been identified, (2) provides a brief description of the Possible Violation, including the Reliability Standard requirement(s) and the date(s) involved, and (3) instructs the Registered Entity to retain and preserve all data and records relating to the Possible Violation.
- 1.1.20** Periodic Data Submittals: Modeling, studies, analyses, documents, procedures, methodologies, operating data, process information or other information to demonstrate compliance with Reliability Standards and provided by Registered Entities to the Compliance Enforcement Authority on a time frame required by a Reliability Standard or an ad hoc basis.
- 1.1.21** Possible Violation: The identification, by the Compliance Enforcement Authority, using one of the Compliance Monitoring and Enforcement Processes in Section 3.0, of a possible failure by a Registered Entity to comply with a Reliability Standard that is applicable to the Registered Entity.
- 1.1.22** Preliminary Screen: An initial evaluation of evidence indicating potential noncompliance with a Reliability Standard has occurred or is occurring, conducted by the Compliance Enforcement Authority for the purpose of determining whether a Possible Violation exists, and consisting of an evaluation of whether (1) the entity allegedly involved in the potential noncompliance is registered, and (2) the Reliability Standard requirement to which the evidence of potential noncompliance relates is applicable to the entity and is enforceable.
- 1.1.23** Regional Implementation Plan: An annual plan, submitted by November 1 of each year to NERC for approval that, in accordance with NERC Rule of Procedure Section 401.6 and the NERC Compliance Monitoring and Enforcement Program Implementation Plan, identifies (1) all Reliability Standards identified by NERC to be actively

Compliance Monitoring and Enforcement Program

monitored during each year, (2) other Reliability Standards proposed for active monitoring by the Regional Entity, (3) the methods to be used by the Regional Entity for reporting, monitoring, evaluation, and assessment of performance criteria with each Reliability Standard, and (4) the Regional Entity's Annual Audit Plan.

1.1.24 Registered Entity: An owner, operator, or user of the Bulk Power System, or the entity registered as its designee for the purpose of compliance, that is included in the NERC Compliance Registry.

1.1.25 Remedial Action Directive: An action (other than a penalty or sanction) required by a Compliance Enforcement Authority that (1) is to bring a Registered Entity into compliance with a Reliability Standard or to avoid a Reliability Standard violation, and (2) is immediately necessary to protect the reliability of the Bulk Power System from an imminent threat.

1.1.26 Required Date: The date given a Registered Entity in a notice from the Compliance Enforcement Authority by which some action by the Registered Entity is required.

1.1.27 Self-Certification: Attestation by a Registered Entity of compliance or non-compliance with a Reliability Standard for which Self-Certification is required by the Compliance Enforcement Authority and that is included for monitoring in the Regional Implementation Plan.

1.1.28 Self-Reporting: A report by a Registered Entity stating (1) that the Registered Entity believes it has violated a Reliability Standard, and (2) the actions that have been taken or will be taken to resolve the violation.

1.1.29 Spot Checking: A process in which the Compliance Enforcement Authority requests a Registered Entity to provide information (1) to support the Registered Entity's Self-Certification, Self-Reporting, or Periodic Data Submittal and to assess whether the Registered Entity complies with Reliability Standards, or (2) as a random check, or (3) in response to events, as described in the Reliability Standards or based on operating problems or system events.

2.0 IDENTIFICATION OF ORGANIZATIONS RESPONSIBLE FOR COMPLYING WITH RELIABILITY STANDARDS

NERC shall register the organizations responsible for complying with Reliability Standards, in accordance with Section 500 of the NERC Rules of Procedure and Appendix 5B, *Statement of Compliance Registry Criteria*. Organizations are responsible to register and to comply with Reliability Standards if they are owners, operators, and users of the Bulk Power System, perform a function listed in the functional types identified in Section II of Appendix 5B, and are material to the reliable operation of the Bulk Power System as defined by the criteria and notes in

Compliance Monitoring and Enforcement Program

Appendix 5B. Regional Entities shall (i) develop and provide to NERC information to assist NERC to register organizations responsible for complying with Reliability Standards, and (ii) in the event of a registration appeal to NERC or an Applicable Governmental Authority, provide information requested by NERC concerning how the Registered Entity meets the registration criteria or is otherwise material to the reliability of the Bulk Power System.

NERC shall notify organizations of their inclusion on the NERC Compliance Registry and shall maintain the NERC Compliance Registry on its web site. NERC shall inform each Registered Entity at the time of registration of the Reliability Standards that are applicable to reliability functions for which the Registered Entity is registered. Each Registered Entity shall inform NERC or the applicable Regional Entity promptly of changes to the Registered Entity's registration information. NERC will provide FERC and Applicable Governmental Authorities monthly updates to the NERC Compliance Registry.

NERC and each Regional Entity will designate a contact person(s) and require each Registered Entity to designate a contact person(s) responsible for sending and receiving all necessary information and communications concerning compliance matters. NERC and the applicable Regional Entity will designate where Registered Entities are to send information, data, Mitigation Plans, or any other compliance-related correspondence.

NERC shall maintain on its website a current listing of Reliability Standards that are applicable to all Registered Entities.

As provided for herein, during the course of compliance monitoring and enforcement activities relating to U.S. entities, NERC may obtain information that it will provide to FERC and, if the information pertains to a Registered Entity or to a portion of the Bulk Power System over which another Applicable Governmental Authority has jurisdiction, to such other Applicable Governmental Authority. However, NERC will not provide non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to Applicable Governmental Authorities other than FERC without first obtaining permission from FERC for such disclosures and subject to such limitations as FERC may place on such disclosures. Similarly, during the course of compliance monitoring and enforcement activities relating to non-U.S. entities, NERC may obtain information that it will provide to the Applicable Governmental Authorities, including FERC, that have jurisdiction over the Registered Entity or the portion of the Bulk Power System to which the information pertains, but subject to any limitations placed on the disclosure of non-public, non-U.S. compliance information by the Applicable Governmental Authority with jurisdiction or by other law of the applicable jurisdiction. In any notice to, and request for permission to disclose compliance information from, FERC or another Applicable Governmental Authority pursuant to any provision of this Compliance Program, NERC will identify each Applicable Governmental Authority to which it proposes to disclose the information and the specific procedures that will be used for protecting from public disclosure any non-public compliance information that will be transferred to the other Applicable Governmental Authority or Authorities. The provisions of this paragraph do not apply to the provision by NERC to an Applicable Governmental Authority of information that is not directly related to a specific Registered Entity's compliance with a requirement of a Reliability Standard.

Compliance Monitoring and Enforcement Program

3.0 COMPLIANCE MONITORING AND ENFORCEMENT PROCESSES

The Compliance Enforcement Authority will monitor, assess, and enforce compliance with Reliability Standards using the compliance monitoring processes described in this Section 3.0 to collect information in order to make assessments of compliance. These processes are described in Sections 3.1 through 3.8 below.

Enforcement actions taken by the Compliance Enforcement Authority through the Compliance Program may include the imposition of remedial actions, sanctions, and penalties, where applicable, which shall be based on the schedule of penalties and sanctions approved for implementation by FERC and other Applicable Governmental Authorities. The imposition and acceptance of sanctions and penalties shall not be considered an acceptable alternative to any Registered Entity's continuing obligation to comply with the Reliability Standards. Registered Entities found in violation of a Reliability Standard will be required to mitigate the violation regardless of any enforcement actions taken.

The Compliance Program requires timely data from Registered Entities to effectively monitor compliance with Reliability Standards. If data, information or other reports to determine compliance requested from a Registered Entity are not received by the Required Date, the Compliance Enforcement Authority may execute the steps described in **Attachment 1, Process for Non-submittal of Requested Data**.

Parties engaged in the process described in this section should consult with each other on the data and information that would be appropriate for effectively addressing this section's process requirements. If a party believes that a request for data or information is unreasonable, the party may request a written determination from the NERC compliance program officer.

Any report or other submission of information by a Registered Entity required by the Compliance Program shall be signed by an officer, employee, attorney or other authorized representative of the Registered Entity. Electronic signatures are permitted in accordance with processes established by NERC and the Regional Entity. NERC or the Compliance Enforcement Authority may require the signer to provide a statement of the basis of his or her authority to sign on behalf of the Registered Entity.

3.1 Compliance Audits

All Registered Entities are subject to audit for compliance with all Reliability Standards applicable to the functions for which the Registered Entity is registered. Compliance Audits are conducted on the Registered Entity's site to the extent required by NERC Rule of Procedure 403.11.2. Compliance Audit processes for Compliance Audits conducted in the United States shall be based on professional auditing standards recognized in the U.S., including Generally Accepted Auditing Standards, Generally Accepted Government Auditing Standards and standards sanctioned by the Institute of Internal Auditors. Compliance Audit processes for Compliance Audits conducted outside the U.S. may be based on Canadian or other international standards. All Compliance Audits shall be conducted in accordance with audit guides established for the Reliability Standards included in the Compliance Audit, consistent with accepted auditing guidelines as approved by NERC. The audit guides will be posted on NERC's website.

Compliance Monitoring and Enforcement Program

3.1.1 Compliance Audit Process Steps

The process steps for a Compliance Audit are as follows:¹

- The Compliance Enforcement Authority distributes the Annual Audit Plan (developed in coordination with NERC) to the Compliance Audit Participants and NERC. The Compliance Enforcement Authority provides additional information to the Compliance Audit Participants, including audit materials, coordinating agendas and changes to the audit schedule as required. Prior to the Compliance Audit, the Compliance Enforcement Authority informs the Registered Entity of the Reliability Standards to be evaluated. NERC or the Regional Entity provides the audit schedules to FERC and to any other Applicable Governmental Authority based upon the agreements in place with the other Applicable Governmental Authority.
- At least two (2) months prior to commencement of a regularly scheduled Compliance Audit, the Compliance Enforcement Authority notifies the Registered Entity of the Compliance Audit, identifies the audit team members and their recent employment history, and requests data, including a completed NERC pre-audit questionnaire. If the audit team members change from the time of the original notification, the Compliance Enforcement Authority will promptly notify the Registered Entity of the change and will allow time for the Registered Entity to object to the new audit team member(s) (see Section 3.1.5).
- The Registered Entity provides to the Compliance Enforcement Authority the required information in the format specified in the request.
- The audit team reviews the submitted information for conformance with the requirements of the Reliability Standards prior to performing the Compliance Audit. The audit team follows NERC audit guidelines in the implementation of the Compliance Audit. This shall include conducting an exit briefing with the Registered Entity, providing for a review of the audit report with the Registered Entity before it is finalized, and issuing an audit report, including an assessment of compliance with the Reliability Standards, to the Compliance Enforcement Authority.
- The Compliance Enforcement Authority reviews the report developed by the audit team and completes a Preliminary Screen for any Possible Violations of Reliability Standards, based on the potential noncompliances with Reliability Standards (if any) identified in the report.
- If the Compliance Enforcement Authority concludes that there is a Possible Violation of a Reliability Standard, it shall send the Registered Entity a Notice of Possible Violation.
- The Compliance Enforcement Authority provides the final audit report to the Registered Entity and to NERC.

¹This process normally completes within sixty (60) days of the completion of the on-site Compliance Audit work at the Registered Entity's site.

Compliance Monitoring and Enforcement Program

3.1.2 Compliance Enforcement Authority Annual Audit Plan and Schedule

The Compliance Enforcement Authority shall develop an Annual Audit Plan. The Annual Audit Plan of Regional Entities will be included in the Regional Implementation Plans submitted to NERC for review and approval (see Section 4.2). NERC or the Regional Entity provides the Annual Audit Plans to FERC and to any other Applicable Governmental Authority consistent with the agreements in place with the Applicable Governmental Authority.

Prior to January 1 of the year covered by the Annual Audit Plan, the Compliance Enforcement Authority shall notify Registered Entities subject to Compliance Audits during the upcoming year, of the audit schedules, methods, and data requirements for the audit. The Compliance Enforcement Authority will give due consideration to any schedule changes requested by Registered Entities to avoid unnecessary burdens.

Revisions and additions to a Regional Entity Annual Audit Plan shall be approved by NERC and the Registered Entity shall be notified in a timely manner (normally 60 days in advance) of changes or revisions to scheduled audit dates.

3.1.3 Frequency of Compliance Audits

The Compliance Enforcement Authority will perform comprehensive Compliance Audits as required by the NERC Rules of Procedure based on criteria established by NERC. Additionally, an unscheduled Compliance Audit of any Registered Entity (i) may be initiated at any time by the Compliance Enforcement Authority if reasonably determined to be necessary to ensure the Registered Entity's compliance with Reliability Standards, and (ii) shall be initiated by the Compliance Enforcement Authority or by NERC if directed by FERC. Prior to or on the same date it notifies the Registered Entity that an unscheduled Compliance Audit is being initiated, the Compliance Enforcement Authority shall notify NERC and FERC that an unscheduled Compliance Audit is being initiated. The Registered Entity shall receive at least ten (10) business days advance notice that an unscheduled Compliance Audit is being initiated, which notice shall include identification of the members of the Compliance Audit team. The Registered Entity shall make any objections to the composition of the Compliance Audit team, which shall be based on failure to meet the criteria specified in Section 3.1.5.2, at least five (5) business days prior to the start of on-site audit work for the unscheduled Compliance Audit.

3.1.4 Scope of Compliance Audits

3.1.4.1 Reliability Standards

A Compliance Audit shall include those Reliability Standards applicable to the Registered Entity that are identified in the NERC Implementation Plan for the current year, and may include other Reliability Standards applicable to the Registered Entity that are identified in the Regional Entity's Regional Implementation Plan for the current year. The Compliance Audit may include any other Reliability Standards that are applicable to the Registered Entity.

Compliance Monitoring and Enforcement Program

3.1.4.2 Period Covered

The Registered Entity's data and information should show compliance with the Reliability Standards that are the subject of the Compliance Audit for the period beginning with the day after the prior audit by the Compliance Enforcement Authority ended (or the later of June 18, 2007 or the Registered Entity's date of registration if the Registered Entity has not previously been subject to a Compliance Audit), and ending with the End Date for the Compliance Audit. However, if another Compliance Monitoring and Enforcement process has been conducted with respect to the Registered Entity subsequent to the date that would otherwise be the start of the period, the period covered by the Compliance Audit may, in the Regional Entity's discretion, begin with the completion of that Compliance Monitoring and Enforcement process for those Reliability Standards requirements that were the subject of the Compliance Monitoring and Enforcement process. The End Date will be stated in the Compliance Enforcement Authority's notification of the Compliance Audit issued to the Registered Entity pursuant to Section 3.1.1. The Registered Entity will be expected to demonstrate compliance for the entire period described above. However, if a Reliability Standard specifies a document retention period that does not cover the entire period described above, the Registered Entity will not be found in noncompliance solely on the basis of the lack of specific information that has rightfully not been retained based on the retention period specified in the Reliability Standard. However, in such cases, the Compliance Enforcement Authority will require the Registered Entity to demonstrate compliance through other means.

3.1.4.3 Mitigation Plans

The Compliance Audit will include a review of any Mitigation Plans which the Registered Entity has not yet completed, for the purpose of determining whether the Registered Entity is making adequate progress towards completion of the Mitigation Plan.

3.1.5 Conduct of Compliance Audits

3.1.5.1 Composition of Compliance Audit Teams

The audit team shall be comprised of staff from the Compliance Enforcement Authority and such other persons as are included in the audit team pursuant to Section 3.1.5.3, and may include contractors and industry subject matter experts as determined by the Compliance Enforcement Authority to be appropriate to comprise a sufficient audit team. The audit team leader shall be a staff member from the Compliance Enforcement Authority and is responsible for the conduct of the Compliance Audit and preparation of the audit report.

3.1.5.2 Requirements for Compliance Audit Team Members

Each audit team member must:

- Be free of conflicts of interests. For example, employees or contractors of the Registered Entity being audited shall not be allowed to participate as auditors in the Compliance Audit of the Registered Entity.
- Comply with the NERC Antitrust Compliance Guidelines and shall have either signed appropriate confidentiality agreements or acknowledgments that the confidentiality agreement signed by the Compliance Enforcement Authority is applicable.

Compliance Monitoring and Enforcement Program

- Successfully complete all NERC or NERC-approved Regional Entity auditor training applicable to the Compliance Audit.
- Provide copies of executed confidentiality agreements or acknowledgements to be provided to the Registered Entity prior to the audit.

3.1.5.3 Compliance Audit Observers or Other Participants

In any Regional Entity Compliance Audit of a Registered Entity: (i) NERC Staff (which may include contractors to NERC) may participate either as observers or as audit team members; (ii) members of the Regional Entity's Compliance staff, in addition to the audit team, may participate as observers; (iii) with the permission of the Regional Entity, compliance staff members of other Regional Entities may participate either as observers or as audit team members; (iv) representatives of FERC and of other Applicable Governmental Authorities may participate either as observers or as audit team members so long as the Registered Entity is subject to the Applicable Governmental Authority's reliability jurisdiction; and (v) at the request of the Registered Entity, the Regional Entity may allow representatives of other Registered Entities to attend the audit for educational purposes.

The Compliance Audit team leader or other staff of the Regional Entity conducting the Compliance Audit will communicate in advance with any observers or other attendees to ensure there are no undue disruptions to the audit, such as space limitations, no conflicts of interest, and no other considerations that in the judgment of the Compliance Audit team leader may be detrimental to the conduct and quality of the audit. If the Compliance Audit team leader identifies any such issues, he/she shall work with the proposed observers or attendees to facilitate observation in a less disruptive manner; or, alternatively, the Regional Entity Compliance staff will work with the proposed observers or attendees to schedule their participation in, observation of, or attendance at a different Compliance Audit in which such issues are not presented.

3.1.5.4 Registered Entity Objections to Compliance Audit Team

A Registered Entity subject to a Compliance Audit may object to any member of the audit team on grounds of a conflict of interest or the existence of other circumstances that could interfere with the team member's impartial performance of his or her duties. Any such objections must be provided in writing to the Compliance Enforcement Authority no later than fifteen (15) days prior to the start of on-site audit work. This fifteen (15) day requirement shall not apply (i) where an audit team member has been appointed less than twenty (20) days prior to the start of on-site audit work, in which case the Registered Entity must provide any objections to the Compliance Enforcement Authority within five (5) business days after receiving notice of the appointment of the Compliance Audit team member; and (ii) in the case of an unscheduled Compliance Audit pursuant to Section 3.1.3, in which case the Registered Entity must provide any objections to the Compliance Enforcement Authority at least five (5) business days prior to the start of on-site audit work for the unscheduled Compliance Audit. The Compliance Enforcement Authority will make a final determination on whether the member will participate in the Compliance Audit of the Registered Entity. Nothing in this paragraph shall be read to limit the participation of NERC or FERC staff in the Compliance Audit.

Compliance Monitoring and Enforcement Program

3.1.6 Compliance Audit Reports

The audit team shall develop a draft audit report that shall include a description of the objective, scope, and methodology of the Compliance Audit; identify any evidence of possible noncompliance with Reliability Standards by the Registered Entity found by the audit team; identify any Mitigation Plans or Remedial Action Directives which have been completed or pending in the year of the Compliance Audit; and identify the nature of any confidential information redacted. A separate document may be prepared that contains recommendations of the audit team. Any recommendations contained in that document will be considered non-binding. The draft report will be provided to the Registered Entity for comment.

The audit team will consider corrections based on comments of the Registered Entity and provide the final audit report to the Compliance Enforcement Authority who will review the report and assess compliance with the Reliability Standards and provide the Registered Entity with a copy of the final report. Regional Entities will provide the final report to NERC, which will in turn provide the report to FERC if the report pertains to a Registered Entity or to a portion of the Bulk Power System over which FERC has jurisdiction and/or to another Applicable Governmental Authority if the report pertains to a Registered Entity or to a portion of the Bulk Power System over which the other Applicable Governmental Authority has jurisdiction. Provided, that NERC will not disclose non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to Applicable Governmental Authorities other than FERC without first obtaining permission from FERC for such disclosure and subject to such limitations as FERC may place on such disclosure; and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission for such disclosure from the Applicable Governmental Authority with jurisdiction over the Registered Entity or the portion of the Bulk Power System to which such non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction. The Registered Entity shall receive the final audit report at least five (5) business days prior to the release of the report to the public. Work papers and other documentation associated with the audit shall be maintained by the Compliance Enforcement Authority in accordance with NERC requirements.

In the event the audit report identifies any Possible Violations of one or more Reliability Standards, the final audit report, or pertinent part thereof identifying the Possible Violations, shall not be released to the public by NERC or the Compliance Enforcement Authority until (i) the Possible Violation is dismissed prior to becoming a Confirmed Violation, or (ii) NERC submits a Notice of Penalty to FERC or other Applicable Governmental Authority, or (iii) the Registered Entity admits to a violation or enters into a settlement agreement with the Compliance Enforcement Authority pursuant to Section 5.6.

Information deemed by a Compliance Enforcement Authority or the Registered Entity as critical energy infrastructure information or confidential information (as defined in Section 1501 of the NERC Rules of Procedure) shall be redacted from any public reports.

3.2 Self-Certification

The Compliance Enforcement Authority may require Registered Entities to self-certify their compliance with Reliability Standards.

Compliance Monitoring and Enforcement Program

If a Self-Certification accurately identifies a violation of a Reliability Standard, an identification of the same violation in a subsequent Compliance Audit or Spot Check will not subject the Registered Entity to an escalated penalty as a result of the Compliance Audit process unless the severity of the violation is found to be greater than reported by the Registered Entity in the Self-Certification.

3.2.1 Self-Certification Process Steps

The process steps for the Self-Certification process are as follows:²

- The Compliance Enforcement Authority posts and updates the reporting schedule and informs Registered Entities. The Compliance Enforcement Authority ensures that the appropriate Reliability Standards, compliance procedures, and required submittal forms for the Reliability Standards being evaluated are maintained and available electronically.
- The Compliance Enforcement Authority requests the Registered Entity to make a Self-Certification within the advance notice period specified by the Reliability Standard. If the Reliability Standard does not specify the advance notice period, this request will be issued in a timely manner (normally thirty (30) days advance notice).
- The Registered Entity provides the required information to the Compliance Enforcement Authority.
- The Compliance Enforcement Authority reviews information to determine compliance with the Reliability Standards and may request additional data and/or information if necessary.
- The Compliance Enforcement Authority completes the assessment of the Registered Entity for compliance with the Reliability Standard (and with the Registered Entity's Mitigation Plan, if applicable). If the Compliance Enforcement Authority concludes, after completing a Preliminary Screen(s), that there is a Possible Violation of a Reliability Standard, it shall send the Registered Entity a Notice of Possible Violation.

3.3 Spot Checking

Spot Checking will be conducted by the Compliance Enforcement Authority. Spot Checking may be initiated by the Compliance Enforcement Authority at any time to verify or confirm Self-Certifications, Self Reporting, and Periodic Data Submittals. Spot Checking may also be random or may be initiated in response to events, as described in the Reliability Standards, or to operating problems, or system events. The Compliance Enforcement Authority then reviews the information submitted to verify the Registered Entity's compliance with the Reliability Standard. Compliance auditors may be assigned to the Spot Checking process by the Compliance Enforcement Authority as necessary.

²If no Possible Violations are found, this process normally completes within sixty (60) days of the Compliance Enforcement Authority's receipt of data.

Compliance Monitoring and Enforcement Program

3.3.1 Spot Checking Process Steps

The process steps for Spot Checking are as follows:³

- The Compliance Enforcement Authority notifies the Registered Entity that Spot Checking will be performed and the reason for the Spot Checking within the advance notice period specified by the Reliability Standard. If the Reliability Standard does not specify an advance notice period, any information submittal request made by the Compliance Enforcement Authority will allow at least twenty (20) days for the Registered Entity to submit the information or make it available for review.
- The Compliance Enforcement Authority, during the advance notice period, notifies the Registered Entity of the names and employment histories of the persons who will be conducting the Spot Checking. The Registered Entity may object to inclusion of any individual on the Spot Checking team in accordance with Section 3.1.5.4. Any such objections must be submitted by the later of (i) five (5) business days before the information being requested by the Compliance Enforcement Authority is submitted and (ii) five (5) business days after the Registered Entity is notified of the persons on the Spot Checking team. Nothing in this step shall be read to limit the participation of NERC or FERC staff on the Spot Checking team.
- The Spot Checking may require submission of data, documentation, or possibly an on-site review.
- The Registered Entity provides the required information to the Compliance Enforcement Authority in the format specified in the request.
- The Compliance Enforcement Authority reviews the information to determine compliance with the Reliability Standards and may request additional data and/or information if necessary for a complete assessment of compliance.
- The Compliance Enforcement Authority reviews its draft assessment of the Registered Entity's compliance with the Reliability Standards and provides an opportunity for the Registered Entity to comment on the draft assessment.
- The Compliance Enforcement Authority completes and documents the assessment of the Registered Entity for compliance with the Reliability Standard and provides a report to the Registered Entity indicating the results of the Spot Checking.
- If the Compliance Enforcement Authority concludes, after completing a Preliminary Screen(s), that there is a Possible Violation of a Reliability Standard, it shall send the Registered Entity a Notice of Possible Violation.

³If no Possible Violations are found, this process normally completes within ninety (90) days of the Compliance Enforcement Authority's receipt of data.

Compliance Monitoring and Enforcement Program

3.4 Compliance Investigations

A Compliance Investigation may be initiated at any time by the Compliance Enforcement Authority or NERC in response to a system disturbance, Complaint, or possible violation of a Reliability Standard identified by any other means.

Compliance Investigations will generally be led by the Regional Entity's staff. NERC reserves the right to assume the leadership of a Compliance Investigation.⁴ The Regional Entity shall not be entitled to appeal NERC's decision to lead a Compliance Investigation.

Compliance Investigations are confidential, unless FERC directs that a Compliance Investigation should be public or that certain information obtained in the Compliance Investigation should be publicly disclosed. Confirmed Violations resulting from a Compliance Investigation will be made public.

FERC or another Applicable Governmental Authority may initiate an investigation at any time in response to a system disturbance, Complaint, or possible violation of a Reliability Standard identified by any other means, or for any other purpose authorized by law. Investigations initiated by FERC or another Applicable Governmental Authority shall be governed by and conducted pursuant to the statutory authority and rules of the Applicable Governmental Authority and not the procedures set forth herein. If an Applicable Governmental Authority other than FERC initiates an investigation of a U.S.-related matter, NERC shall provide notice to FERC of the investigation prior to disclosure of any non-public U.S.-related compliance information regarding the matter to be investigated to the other Applicable Governmental Authority. NERC's notice to FERC shall identify the other Applicable Governmental Authority, shall describe the nature of the proposed disclosures to the other Applicable Governmental Authority, and shall state the procedures NERC will utilize in connection with the Compliance Investigation to ensure compliance with the requirements of 18 C.F.R. §39.7(b)(4) concerning nondisclosure of violations and Alleged Violations. If FERC initiates an investigation of a non-U.S.-related matter, NERC shall provide notice of the investigation to the Applicable Governmental Authority having jurisdiction over the Registered Entity or the portion of the Bulk Power System that is the subject of the investigation prior to disclosure to FERC of any non-public non-U.S.-related compliance information regarding the matter to be investigated. NERC's notice to the other Applicable Governmental Authority shall describe the nature of the proposed disclosures to FERC and shall state the procedures NERC will utilize in connection with the investigation to ensure compliance with regulations of the other Applicable Governmental Authority or other law of the applicable jurisdiction concerning disclosure of non-public compliance information.

⁴Examples of situations in which NERC may decide to lead a Compliance Investigation include: (i) to assure consistency in investigative processes, (ii) to coordinate Compliance Investigations into matters that may cross Regional Entity boundaries, (iii) where the potential noncompliance is related to the Regional Entity or one of its affiliates, divisions, committees or subordinate structures, or (iv) where the Regional Entity determines it cannot conduct the Compliance Investigation.

Compliance Monitoring and Enforcement Program

3.4.1 Compliance Investigation Process Steps

The process steps for a Compliance Investigation are as follows:⁵

- The Compliance Enforcement Authority is notified or becomes aware of circumstances indicating a Reliability Standard may have been or is being violated and determines whether a Compliance Investigation is warranted. Within two (2) business days of the decision to initiate a Compliance Investigation, the Compliance Enforcement Authority: (i) notifies the Registered Entity of the initiation and initial scope of the Compliance Investigation, the requirements to preserve all records and information relevant to the Compliance Investigation and, where appropriate, the reasons for the Compliance Investigation, and (ii) notifies NERC of the initiation of and the reasons for the Compliance Investigation. While the Compliance Enforcement Authority may, at its discretion, notify the Registered Entity of the reasons for its Compliance Investigation, the Compliance Investigation, as it unfolds, need not be limited to this scope.
- NERC assigns a NERC staff member to the Compliance Investigation and to serve as a single point of contact for communications with NERC. Within two (2) business days after NERC is notified of the decision to initiate a Compliance Investigation, NERC will notify each Applicable Governmental Authority having jurisdiction over a Registered Entity or a portion of the Bulk Power System to which the Compliance Investigation relates. Provided, that NERC will not disclose non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to an Applicable Governmental Authority other than FERC without first obtaining permission from FERC for such disclosure and subject to any limitations placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or portion of the Bulk Power System to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction.
- The Compliance Enforcement Authority requests data or documentation and provides a list of individuals on the Compliance Investigation team and their recent employment history. The Registered Entity may object to any individual on the Compliance Investigation team in accordance with Section 3.1.5.4; however, the Registered Entity may not object to participation by NERC, by FERC staff or by staff of another Applicable Governmental Authority on the Compliance Investigation team. If the Reliability Standard does not specify the advance notice period, a request is normally issued with no less than twenty (20) days advance notice.
- Within ten (10) business days of receiving the notification of a Compliance Investigation, a Registered Entity subject to a Compliance Investigation may object to any member of the Compliance Investigation team on grounds of a conflict of interest or the existence of other circumstances that could interfere with the team member's impartial performance

⁵If no Possible Violation(s) are found, this process normally completes within sixty (60) days following the decision to initiate a Compliance Investigation.

Compliance Monitoring and Enforcement Program

of his or her duties. Such objections must be provided in writing to the Compliance Enforcement Authority within such ten (10) business day period. The Compliance Enforcement Authority will make a final determination as to whether the individual will participate in the Compliance Investigation of the Registered Entity.

- The Registered Entity provides the required information to the Compliance Enforcement Authority in the format as specified in the request.
- If necessary, the Compliance Investigation may include an on-site visit with interviews of the appropriate personnel and review of data.
- In conducting the Compliance Investigation, the Compliance Enforcement Authority may require the Registered Entity to (i) provide a verification under oath by an officer, employee, attorney or other authorized representative of the Registered Entity attesting to the accuracy, completeness and truth of the Registered Entity's responses to the Compliance Enforcement Authority's requests for information; and (ii) produce one or more officers, employees or other authorized representatives of the Registered Entity who are familiar with the matter(s) that are the subject of the Compliance Investigation, to be interviewed or to provide testimony under oath concerning such matters. The Compliance Enforcement Authority shall determine in each case (i) whether representatives of the Registered Entity shall be allowed to be present when an interview is taking place or testimony is being taken, and (ii) whether, and by what method, the interview or testimony shall be recorded; provided, that counsel for the person being interviewed or giving testimony may be present when the interview is being conducted or testimony is being taken (regardless of whether such counsel also represents the Registered Entity).
- The Compliance Enforcement Authority reviews information to determine compliance with the Reliability Standards. The Compliance Enforcement Authority may request additional data and/or information if necessary for a complete assessment or to demonstrate compliance.
- The Compliance Enforcement Authority completes the assessment of compliance with the Reliability Standard and/or approval of the applicable Mitigation Plan, writes and distributes the report, and notifies the Registered Entity.
- If the Compliance Enforcement Authority concludes, at any time during the Compliance Investigation, and after completing a Preliminary Screen(s), that there is a Possible Violation of a Reliability Standard, it shall send the Registered Entity a Notice of Possible Violation.
- If the Compliance Enforcement Authority determines that no violation occurred, it shall send the Registered Entity and NERC a notice that the Compliance Investigation has been completed. NERC will in turn notify FERC and, if the Compliance Investigation pertained to a Registered Entity or to a portion of the Bulk Power System over which another Applicable Governmental Authority has jurisdiction, will also notify such other Applicable Governmental Authority. Provided, however, that NERC will not disclose non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to Applicable Governmental Authorities other than FERC without first obtaining permission

Compliance Monitoring and Enforcement Program

from FERC for such disclosure and subject to any limitations placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or portion of the Bulk Power System to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction.

3.5 Self-Reporting

Self-Reporting is encouraged at the time a Registered Entity becomes aware (i) of a violation of a Reliability Standard, or (ii) a change in the violation severity level of a previously reported violation. Self-Reporting of a violation of a Reliability Standard is encouraged regardless of whether the Reliability Standard requires reporting on a pre-defined schedule in the Compliance Program and the violation is determined outside the pre-defined reporting schedule.

3.5.1 Self-Reporting Process Steps

The process steps for Self-Reporting are as follows:⁶

- The Compliance Enforcement Authority posts the Self-Reporting submittal forms and ensures they are maintained and available on its Web site.
- The Registered Entity provides the Self-Reporting information to the Compliance Enforcement Authority.
- The Compliance Enforcement Authority reviews the information to determine compliance with the Reliability Standards and may request the Registered Entity to provide clarification or additional data and/or information.
- The Compliance Enforcement Authority completes the assessment of the Registered Entity for compliance with the Reliability Standards and any Mitigation Plan, if applicable, and notifies the Registered Entity.
- If the Compliance Enforcement Authority concludes, after conducting a Preliminary Screen(s), that there is a Possible Violation of a Reliability Standard, it shall send the Registered Entity a Notice of Possible Violation.

3.6 Periodic Data Submittals

The Compliance Enforcement Authority requires Periodic Data Submittals in accordance with the schedule stated in the applicable Reliability Standard, established by the Compliance Enforcement Authority, or on an as-needed basis. Requests for data submittals will be issued by the Compliance Enforcement Authority to Registered Entities with at least the minimum advance notice period specified by the applicable Reliability Standard. If the Reliability Standard does

⁶This process normally completes within sixty (60) days following the Compliance Enforcement Authority's receipt of data.

Compliance Monitoring and Enforcement Program

not specify an advance notice period, the request will normally be issued with no less than twenty (20) days advance notice.

3.6.1 Periodic Data Submittals Process Steps

The process steps for Periodic Data Submittal are as follows:⁷

- The Compliance Enforcement Authority posts the current data reporting schedule on its web site and keeps Registered Entities informed of changes and/or updates. The Compliance Enforcement Authority ensures that the appropriate Reliability Standard compliance procedures and the required submittal forms for the Reliability Standards being evaluated are maintained and available via its web site.
- The Compliance Enforcement Authority makes a request for a Periodic Data Submittal.
- The Registered Entity provides the required information to the Compliance Enforcement Authority in the format as specified in the request.
- The Compliance Enforcement Authority reviews the data submittal to determine compliance with the Reliability Standards and may request additional data and/or information for a complete assessment or to demonstrate compliance.
- If the Compliance Enforcement Authority's assessment of the Registered Entity's compliance indicates there may be a Possible Violation, the Compliance Enforcement Authority provides an opportunity for the Registered Entity to comment on the assessment before it is finalized.
- If the Compliance Enforcement Authority concludes, after conducting a Preliminary Screen(s), that there is a Possible Violation of a Reliability Standard, it shall send the Registered Entity a Notice of Possible Violation.

3.7 Exception Reporting

Some Reliability Standards require reporting of exceptions to compliance with the Reliability Standard as a form of compliance monitoring. The Compliance Enforcement Authority shall require Registered Entities to provide reports identifying any exceptions to the extent required by any Reliability Standard.

The Compliance Enforcement Authority shall also require Registered Entities to confirm the number of exceptions that have occurred in a given time period identified by NERC, even if the number of exceptions is zero.

3.8 Complaints

Either NERC or Regional Entities may receive Complaints alleging violations of a Reliability Standard. A Regional Entity will conduct a review of each Complaint it receives to determine if

⁷If no Possible Violation(s) are found, this process generally completes within ten (10) business days of the Compliance Enforcement Authority's receipt of data.

Compliance Monitoring and Enforcement Program

the Complaint provides sufficient basis for initiating another Compliance Monitoring and Enforcement process, except that NERC will review any Complaint (1) that is related to a Regional Entity or its affiliates, divisions, committees or subordinate structures, (2) where the Regional Entity determines it cannot conduct the review, or (3) if the complainant wishes to remain anonymous or specifically requests NERC to conduct the review of the Complaint.

If the Complaint is submitted to NERC, NERC will forward the information to the Regional Entity, as appropriate.

All anonymous Complaints will be reviewed and any resulting Compliance Monitoring and Enforcement processes conducted by NERC will be conducted in accordance with Section 3.8.2 to prevent disclosure of the identity of the complainant.

The Compliance Enforcement Authority conducting the review will determine if the Complaint may be closed as a result of the initial review and assessment of the Complaint to determine if it provides sufficient basis for initiating another Compliance Monitoring and Enforcement process. The Regional Entity will report the results of its review of the Complaint to NERC. If, as a result of the initial review of the Complaint, the Compliance Enforcement Authority determines that initiating another Compliance Monitoring and Enforcement process is warranted, that Compliance Monitoring and Enforcement process will be conducted in accordance with the applicable provisions of Section 3.0.

3.8.1 Complaint Process Steps

The detailed process steps for the Complaint process are as follows:⁸

- The complainant notifies NERC or a Regional Entity using the NERC compliance hotline, submitting a NERC Complaint reporting form, or by other means. A link to the Complaint reporting form will be posted on the NERC and Regional Entity Web sites. The Complaint should include sufficient information to enable NERC or the Regional Entity to make an assessment of whether the initiation of another Compliance Monitoring and Enforcement process is warranted. NERC or the Regional Entity may not act on a Complaint if the Complaint is incomplete and does not include sufficient information.
- If the Compliance Enforcement Authority determines that initiation of another Compliance Monitoring and Enforcement process is warranted, it initiates the Compliance Monitoring and Enforcement process in accordance with the applicable provisions of Section 3.0; otherwise it takes no further action. The Compliance Enforcement Authority notifies the complainant, the Registered Entity, and NERC of the initiation of the Compliance Monitoring and Enforcement process. If the Compliance Enforcement Authority determines that initiation of another Compliance Monitoring and Enforcement process is not warranted, it will notify the complainant, NERC, and the Registered Entity that no further action will be taken.

⁸If no Possible Violations are found, this process normally completes within sixty (60) days following receipt of the Complaint.

Compliance Monitoring and Enforcement Program

- The Compliance Enforcement Authority fully documents the Complaint and the Complaint review, whether another Compliance Monitoring and Enforcement process is initiated or not.

3.8.2 Anonymous Complainant Notification Procedure

An anonymous complainant who believes, or has information indicating, there has been a violation of a Reliability Standard, can report the information and request that the complainant's identity not be disclosed.⁹ All Complaints lodged by a person or entity requesting that the complainant's identity not be disclosed shall be investigated by NERC following the procedural steps described in Section 3.8.1. Anonymous Complaints received by a Regional Entity will either be directed to NERC or the Regional Entity will collect and forward the information to NERC, at the Regional Entity's discretion. Neither NERC nor the Regional Entity shall disclose the identity of any person or entity reporting information indicating violations of Reliability Standards to NERC or to a Regional Entity that requests that his/her/its identity not be revealed. The identity of the complainant will only be known by NERC and in the case where a Regional Entity collects the information, by NERC and the Regional Entity. If the Compliance Enforcement Authority determines that initiation of another Compliance Monitoring and Enforcement process is not warranted, it will notify the complainant, NERC, and the Registered Entity that no further action will be taken.

4.0 ANNUAL IMPLEMENTATION PLANS

4.1 NERC Compliance Monitoring and Enforcement Program Implementation Plan

NERC will maintain and update the NERC Implementation Plan, to be carried out by Compliance Enforcement Authorities in the performance of their responsibilities and duties in implementing the NERC Compliance Monitoring and Enforcement Program. The NERC Implementation Plan will be provided to the Regional Entities by October 1 of each year and will specify the Reliability Standards requiring reporting by Registered Entities to the Compliance Enforcement Authority to provide verification of compliance through one of the monitoring methods described in this Compliance Plan document. The NERC Implementation Plan will be posted on the NERC web site.

4.2 Regional Entity Implementation Plan

By November 1 of each year, Regional Entities will submit a Regional Implementation Plan for the following calendar year to NERC for approval. The Regional Implementation Plan and the Regional Entity's other relevant Compliance Program documents shall be posted on the Regional Entity's Web site.

⁹NERC has established a Compliance Hotline that may be used for the submission of Complaints by persons or entities that do not want his/her/its identity disclosed (see www.nerc.com for additional information).

Compliance Monitoring and Enforcement Program

5.0 ENFORCEMENT ACTIONS

The Compliance Enforcement Authority shall determine (i) whether there have been violations of Reliability Standards by Registered Entities within the Compliance Enforcement Authority's area of responsibility, and (ii) if so, the appropriate remedial actions, and penalties and sanctions, as prescribed in the NERC *Sanction Guidelines* (Appendix 4B to the NERC Rules of Procedure). NERC will work to achieve consistency in the application of the *Sanction Guidelines* by Regional Entities by direct oversight and review of penalties and sanctions, and each Regional Entity shall provide to NERC such information as is requested by NERC concerning any penalty, sanction, or remedial actions imposed by the Regional Entity.

Parties engaged in the process described in this section should consult with each other on the data and information that would be appropriate for effectively addressing this section's process requirements. If a party believes that a request for data or information is unreasonable, the party may request a written determination from the NERC director of enforcement.

The following enforcement process is undertaken by the Compliance Enforcement Authority following identification, through one of the Compliance Monitoring and Enforcement processes set forth in Section 3.0, of evidence of noncompliance with a Reliability Standard by a Registered Entity.

5.1 Preliminary Screen

If the Compliance Enforcement Authority identifies or obtains evidence of potential noncompliance with a Reliability Standard, the Compliance Enforcement Authority shall perform a Preliminary Screen to determine whether there is a Possible Violation. A Preliminary Screen shall be limited to determining whether:

- (i) the entity allegedly involved in the potential noncompliance is a Registered Entity; and
- (ii) the Reliability Standard requirement to which the evidence of potential noncompliance relates is applicable to the entity, and is enforceable.

The Compliance Enforcement Authority shall maintain records of all Preliminary Screens.

If a Preliminary Screen results in an affirmative determination with respect to the above criteria, a Possible Violation exists. The Compliance Enforcement Authority shall issue a Notice of Possible Violation to the Registered Entity. The Notice of Possible Violation shall:

- (i) state that a Possible Violation by the Registered Entity has been identified;
- (ii) provide a brief description of the Possible Violation, including the Reliability Standard requirement(s) and date(s) involved; and
- (iii) instruct the Registered Entity to retain and preserve all data and records relating to the Possible Violation.

Upon issuing a Notice of Possible Violation, the Compliance Enforcement Authority enters the Possible Violation into the NERC compliance reporting and tracking system. NERC reports the Possible Violation to the NERC Board of Trustees Compliance Committee and submits a Notice of Possible Violation, on a confidential basis, to FERC.

Compliance Monitoring and Enforcement Program

5.2 Assessment of Possible Violation

After issuing a Notice of Possible Violation, the Compliance Enforcement Authority shall conduct an assessment of the facts and circumstances surrounding the Possible Violation to determine whether evidence exists to indicate the Registered Entity has violated the Reliability Standard requirement(s) identified in the Notice of Possible Violation, or whether the Possible Violation should be dismissed. The Compliance Enforcement Authority may consider any additional information to demonstrate that the Possible Violation should be dismissed or modified.

5.3 Notification to Registered Entity of Alleged Violation

If the Compliance Enforcement Authority determines, based on an assessment of the facts and circumstances surrounding a Possible Violation, that evidence exists to indicate a Registered Entity has violated a Reliability Standard, and the Compliance Enforcement Authority and the Registered Entity have not entered into settlement negotiations pursuant to Section 5.6, the Compliance Enforcement Authority shall issue a Notice of Alleged Violation (signed by an officer or designee of the Compliance Enforcement Authority) to the Registered Entity (CEO or equivalent and compliance contact) and shall enter the Alleged Violation into the NERC compliance reporting and tracking system. The Notice of Alleged Violation shall state, at a minimum:

- (i) the Reliability Standard and requirement(s) thereof the Registered Entity has allegedly violated,
- (ii) the date and time the Alleged Violation occurred (or is occurring),
- (iii) the facts the Compliance Enforcement Authority believes demonstrate or constitute the Alleged Violation,
- (iv) the proposed penalty or sanction, if any, determined by the Compliance Enforcement Authority to be applicable to the Alleged Violation in accordance with the NERC *Sanction Guidelines*, including an explanation of the basis on which the particular penalty or sanction was determined to be applicable,
- (v) notice that the Registered Entity shall, within thirty (30) days, elect one of the following options or the Compliance Enforcement Authority will deem the Registered Entity to have accepted the determination of violation and proposed penalty or sanction:
 - 1. agree with the Alleged Violation and proposed penalty or sanction, and agree to submit and implement a Mitigation Plan to correct the violation and its underlying causes, and may provide a response in accordance with Section 5.4, or
 - 2. agree with the Alleged Violation and agree to submit and implement a Mitigation Plan to eliminate the violation and its underlying causes, but contest the proposed penalty or sanction, and may provide a response in accordance with Section 5.4, or

Compliance Monitoring and Enforcement Program

3. contest both the Alleged Violation and proposed penalty or sanction,
 - (vi) notice that the Registered Entity may elect to submit a Mitigation Plan while contesting the Alleged Violation and/or the proposed penalty or sanction, and that submission of a Mitigation Plan will not waive the Registered Entity's right to contest the Alleged Violation and/or the proposed penalty or sanction;
 - (vii) notice that if the Registered Entity elects to contest the Alleged Violation and/or the proposed penalty or sanction, the Registered Entity may elect to have a hearing conducted pursuant to either (i) the short-form procedure in Section 1.3.2, or (ii) the full hearing procedure, in **Attachment 2, Hearing Procedures**, and
 - (viii) required procedures to submit the Registered Entity's Mitigation Plan.

NERC shall forward a copy of the Notice of Alleged Violation to FERC and, if the Alleged Violation pertains to a Registered Entity or to a portion of the Bulk Power System over which another Applicable Governmental Authority has jurisdiction, to such other Applicable Governmental Authority, within two (2) business days of receipt from the Compliance Enforcement Authority, provided, that NERC will not disclose non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to Applicable Governmental Authorities other than FERC without first obtaining permission from FERC for such disclosure and subject to any limitations placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or portion of the Bulk Power System to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction.

Upon acceptance by the Registered Entity of the Alleged Violation and proposed penalty or sanction, the Notice of Confirmed Violation or other enforcement action will then be processed and issued to the Registered Entity.

5.4 Registered Entity Response

If the Registered Entity does not contest or does not respond to the Notice of Alleged Violation within thirty (30) days, it shall be deemed to have accepted the Compliance Enforcement Authority's determination of violation and penalty or sanction, in which case the Compliance Enforcement Authority shall issue a Notice of Confirmed Violation to the Registered Entity and shall enter the Confirmed Violation into the NERC compliance reporting and tracking system. At the time of issuing the Notice of Confirmed Violation to the Registered Entity, the Regional Entity shall also provide notice to the Registered Entity that it may provide a written explanatory statement to accompany the Notice of Confirmed Violation. The Registered Entity's statement must include the name, title, and signature of an officer, employee, attorney or other authorized representative of the Registered Entity.

If the Registered Entity contests the Alleged Violation or the proposed penalty or sanction, the Registered Entity shall submit to the Compliance Enforcement Authority a response explaining its position, signed by an officer, employee, attorney or other authorized representative together with any supporting information and documents. The Compliance Enforcement Authority shall

Compliance Monitoring and Enforcement Program

schedule a conference with the Registered Entity within ten (10) business days after receipt of the response. If the Compliance Enforcement Authority and the Registered Entity are unable to resolve all issues within forty (40) days after the Registered Entity's response, the Registered Entity may request a hearing. The Compliance Enforcement Authority and the Registered Entity may agree in writing to extend the forty (40) day period. If no hearing request is made prior to the end of the forty (40) day period, the violation will become a Confirmed Violation, in which case the Compliance Enforcement Authority shall issue a Notice of Confirmed Violation to the Registered Entity and to NERC..

If a hearing is requested the Compliance Enforcement Authority shall initiate the hearing process by convening a hearing body and issuing a written notice of hearing to the Registered Entity and the hearing body and identifying the Compliance Enforcement Authority's designated hearing representative.¹⁰

5.5 Hearing Process for Compliance Hearings

The Compliance Enforcement Authority hearing process is set forth in **Attachment 2**.

5.6 Settlement Process

The Registered Entity can request settlement negotiations at any time, including prior to the issuance of a Notice of Alleged Violation; however, the Compliance Enforcement Authority may decline to engage in or continue settlement negotiations after a Possible Violation or Alleged Violation becomes a Confirmed Violation in accordance with Section 5.4. NERC shall be notified of all settlement negotiations and may participate in any settlement negotiations. All settlement negotiations will be confidential until such time as the settlement is approved by NERC. For all settlement discussions, the Compliance Enforcement Authority shall require the Registered Entity to designate an individual(s) authorized to negotiate on its behalf.

The Compliance Enforcement Authority may consider all relevant facts in settlement negotiations. A settlement agreement must ensure that the reliability of the Bulk Power System will not be compromised by the settlement and that a violation of a Reliability Standard will not occur as a result of the settlement. All settlement agreements must provide, if the settlement is approved, for waiver of the Registered Entity's right to further hearings and appeal.

The Compliance Enforcement Authority will issue a letter setting forth the final settlement terms including all penalties, sanctions and mitigation requirements provided for in the final settlement.

The Regional Entity shall report the terms of all settlements of compliance matters to NERC. NERC will review the settlement for the purpose of evaluating its consistency with other settlements entered into for similar violations or under other, similar circumstances. The Registered Entity may submit an explanatory statement, conforming to the requirements of Section 5.4, to be included in the settlement agreement and which shall be subject to consent of the Compliance Enforcement Authority as part of the settlement agreement. The settlement

¹⁰If the dispute involves a proposed Mitigation Plan, which has not been accepted by the Compliance Enforcement Authority, the Registered Entity may file a request for hearing with the Compliance Enforcement Authority.

Compliance Monitoring and Enforcement Program

agreement may state that the Registered Entity (i) admits the Alleged Violation, or (ii) does not contest the Alleged Violation, or (iii) neither admits nor denies the Alleged Violation, but may not state that the Registered Entity denies the Alleged Violation. Based on this review, NERC will either approve the settlement or reject the settlement and notify the Regional Entity and the Registered Entity of any changes to the settlement that would result in approval. If NERC rejects the settlement, the Regional Entity will attempt to negotiate a revised settlement agreement with the Registered Entity including any changes to the settlement specified by NERC.

NERC will report the approved settlement of the violation to FERC and, if the settlement relates to a Registered Entity or to a portion of the Bulk Power System over which another Applicable Governmental Authority has jurisdiction, to such other Applicable Governmental Authority, provided, that NERC will not disclose non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to Applicable Governmental Authorities other than FERC without first obtaining permission from FERC for such disclosure and subject to any limitations placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or portion of the Bulk Power System to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction. NERC will also publicly post the violation settled (regardless of whether the settlement includes or does not include an admission of a violation) and the resulting penalty or sanction provided for in the settlement. This posting shall include a copy of the settlement or a description of the terms of the settlement, and a copy of any Mitigation Plan that is agreed to as part of the settlement. The Compliance Enforcement Authority will issue a letter setting forth the final settlement terms including all penalties, sanctions and mitigation requirements provided for in the final settlement. Postings of Notices of Confirmed Violations are addressed in Section 8.0.

5.7 NERC Appeal Process

The Registered Entity may appeal the hearing body's decision to NERC, as provided for in NERC Rules of Procedure, Section 409.¹¹

On appeal, NERC shall either affirm the Regional Entity decision or remand to the Regional Entity with reasons for its remand, which may include a direction to the Regional Entity to revise the decision. If NERC affirms the Regional Entity decision, the Regional Entity shall issue a Notice of Confirmed Violation to the Registered Entity. If NERC directs the Regional Entity to revise its decision, the Registered Entity that was the subject of the decision or the Compliance Staff of the Regional Entity whose interests are adversely affected by the directed revision may reopen the proceeding on any issue whose resolution is affected by NERC's directive, irrespective of whether the issue was previously litigated, settled or unopposed.

¹¹This process generally completes within ninety (90) days of NERC's receipt of request for appeal.

Compliance Monitoring and Enforcement Program

5.8 Approval of a Notice of Confirmed Violation

A Notice of Confirmed Violation issued to a Registered Entity pursuant to Sections 5.4 or 5.7 shall include a detailed record of the enforcement action, including the facts and circumstances analyzed and the information on which the Compliance Enforcement Authority relied in proposing a penalty or sanction.

After receiving a Notice of Confirmed Violation through the NERC compliance reporting and tracking system, NERC shall review the Notice of Confirmed Violation and utilize the information therein to prepare a Notice of Penalty. NERC shall advise the Regional Entity of any additional detail or further development of the factual findings that NERC deems necessary before the Notice of Penalty can be issued.

NERC may direct the Regional Entity to revise a penalty determination, in which case the Registered Entity subject to the penalty, or the Compliance Staff of the Regional Entity, may reopen the proceedings on any issue on which the penalty was based, irrespective of whether the issue was previously litigated, settled or unopposed.

5.9 Notice of Penalty

If (i) the Registered Entity does not dispute the Notice of Alleged Violation and the proposed penalty or sanction, or (ii) a decision has been entered finding a violation and all appeals have been concluded, or (iii) a settlement agreement has been reached addressing the Possible Violation or Alleged Violation(s), NERC shall prepare a draft Notice of Penalty and provide a copy to the Regional Entity. The Regional Entity shall inform the Registered Entity that a Notice of Penalty is pending public filing. NERC will file the Notice of Penalty with FERC and any other Applicable Governmental Authority, as provided in the next paragraph, no sooner than five (5) business days after NERC approves the Notice of Confirmed Violation or settlement agreement.

NERC shall file the Notice of Penalty with FERC and, if the Possible Violation or Alleged Violation pertains to a Registered Entity or to a portion of the Bulk Power System over which another Applicable Governmental Authority has jurisdiction, to such other Applicable Governmental Authority; provided, that NERC will not disclose any non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to Applicable Governmental Authorities other than FERC without first obtaining permission from FERC for such disclosure and subject to any limitations placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or portion of the Bulk Power System to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction. NERC will include with the Notice of Penalty any statement provided by the Registered Entity as set forth in Sections 5.4 or 5.7.

The penalty or sanction will be effective upon expiration of the thirty (30) day period following filing with FERC of the Notice of Penalty (or such longer period as ordered by FERC) or, if FERC decides to review the penalty or sanction, upon final determination by FERC.

Compliance Monitoring and Enforcement Program

5.10 Closure of Enforcement Action

Following FERC approval of, or expiration of the period for action by FERC on, a Notice of Penalty filed by NERC, the Compliance Enforcement Authority shall issue a payment due notice and invoice to the Registered Entity. The payment due notice and invoice shall state the payment due date which shall be thirty (30) days from the date of the payment due notice and invoice. Upon payment of all monetary penalties by the Registered Entity, the Compliance Enforcement Authority shall issue a notice confirming payment to the Registered Entity, and provide a copy of the notice confirming payment to NERC. Following the completion by the Registered Entity of all requirements set forth in the Notice of Penalty and any settlement agreement, the Compliance Enforcement Authority shall issue the Registered Entity a Notice of Completion of Enforcement Action.

If the Compliance Enforcement Authority dismisses or disposes of a Possible Violation or Alleged Violation that does not become a Confirmed Violation, the Compliance Enforcement Authority shall issue a Notice of Completion of Enforcement Action to the Registered Entity.

A copy of the Notice of Completion of Enforcement Action shall also be provided to NERC by the Compliance Enforcement Authority.

The Notice of Completion of Enforcement Action shall include a release of any data retention directives that were previously issued to the Registered Entity in connection with the matter. Upon issuance of a Notice of Completion of Enforcement Action, tracking of the violation is completed, and the enforcement action shall be closed.

6.0 MITIGATION OF VIOLATIONS OF RELIABILITY STANDARDS

Parties engaged in the process described in this section should consult with each other on the data and information that would be appropriate for effectively addressing this section's process requirements. If a party believes that a request for data or information is unreasonable, the party may request a written determination from the NERC director of enforcement.

6.1 Requirement for Submission of Mitigation Plans

A Registered Entity found to be in violation of a Reliability Standard shall file with the Compliance Enforcement Authority (i) a proposed Mitigation Plan to correct the violation, or (ii) a description of how the violation has been mitigated, and any requests for extensions of Mitigation Plans or a report of completed mitigation. A Registered Entity may also submit a proposed Mitigation Plan at any other time, including with a Self-Report, or, without admitting it has committed a violation, in response to a Notice of Possible Violation or Notice of Alleged Violation.

6.2 Contents of Mitigation Plans

A Mitigation Plan shall include the following information:

- The Registered Entity's point of contact for the Mitigation Plan, who shall be a person (i) responsible for filing the Mitigation Plan, (ii) technically knowledgeable regarding the Mitigation Plan, and (iii) authorized and competent to respond to questions regarding the status of the Mitigation Plan. This person may be the Registered Entity's point of contact described in Section 2.0.

Compliance Monitoring and Enforcement Program

- The Possible, Alleged or Confirmed Violation(s) of Reliability Standard(s) the Mitigation Plan will correct.
- The cause of the Possible, Alleged or Confirmed Violation(s).
- The Registered Entity's action plan to correct the Possible, Alleged or Confirmed Violation(s).
- The Registered Entity's action plan to correct the cause of the Possible, Alleged or Confirmed Violation.
- The Registered Entity's action plan to prevent recurrence of the Possible, Alleged or Confirmed Violation(s).
- The anticipated impact of the Mitigation Plan on the Bulk Power System reliability and an action plan to mitigate any increased risk to the reliability of the Bulk Power System while the Mitigation Plan is being implemented.
- A timetable for completion of the Mitigation Plan including the completion date by which the Mitigation Plan will be fully implemented and the Possible, Alleged or Confirmed Violation(s) corrected.
- Implementation milestones no more than three (3) months apart for Mitigation Plans with expected completion dates more than three (3) months from the date of submission. Additional violations could be determined for not completing work associated with accepted milestones.
- Any other information deemed necessary or appropriate

The Mitigation Plan shall be signed by an officer, employee, attorney or other authorized representative of the Registered Entity, which if applicable, shall be the person that signed the Self-Certification or Self Reporting submittals.

6.3 Timetable for Completion of Mitigation Plans

The Mitigation Plan shall be completed in time to have a reasonable potential to correct all of the violation(s) prior to the next applicable compliance reporting/assessment period after occurrence of the violation for which the Mitigation Plan is submitted. In all cases the Mitigation Plan should be completed without delay, and should encompass actions necessary to prevent a recurring violation of the Reliability Standard requirements underlying the Possible, Alleged or Confirmed Violation(s). The Compliance Enforcement Authority will expect full compliance with the Reliability Standard to which the Mitigation Plan is applicable at the next report or assessment of the Registered Entity. At the Compliance Enforcement Authority's discretion, the completion deadline may be extended for good cause including: (i) short assessment periods (i.e., event driven or monthly assessments), and (ii) construction requirements in the Mitigation Plan that extend beyond the next assessment period or other extenuating circumstances. If the Mitigation Plan extends beyond the next applicable reporting/assessment period, sanctions for any violation of the applicable Reliability Standard(s) occurring during the implementation

Compliance Monitoring and Enforcement Program

period will be held in abeyance and will be waived if the Mitigation Plan is satisfactorily completed.

Any violations assessed during the period of time the accepted Mitigation Plan is being implemented will be recorded by the Compliance Enforcement Authority with associated sanctions or penalties. Regional Entities will report any findings of violations recorded during this time period to NERC with the notation that the Registered Entity is working under an accepted Mitigation Plan with an extended completion date with penalties and sanctions held in abeyance until completion of the Mitigation Plan. Upon completion of the accepted Mitigation Plan in accordance with Section 6.6, the Compliance Enforcement Authority will notify the Registered Entity that any findings of violations of the applicable Reliability Standard during the period that the accepted Mitigation Plan was being implemented have been waived and no penalties or sanctions will apply. Regional Entities will also notify NERC of any such waivers of violations of Reliability Standards.

A request for an extension of any milestone or the completion date of the accepted Mitigation Plan by a Registered Entity must be received by the Compliance Enforcement Authority at least five (5) business days before the original milestone or completion date. The Compliance Enforcement Authority may accept a request for an extension or modification of a Mitigation Plan if the Compliance Enforcement Authority determines the request is justified, and shall notify NERC of the extension or modification within five (5) business days.

If a Mitigation Plan submitted by a Registered Entity is rejected by the Regional Entity acting as Compliance Enforcement Authority or the hearing body in accordance with Section 6.5, the Registered Entity shall be subject to any findings of violation of the applicable Reliability Standards during the period the Mitigation Plan was under consideration and to imposition of any penalties or sanctions imposed for such violations.

6.4 Submission of Mitigation Plans

A Mitigation Plan may be submitted at any time but shall have been submitted by the Registered Entity within thirty (30) days after being served the Notice of Alleged Violation, if the Registered Entity does not contest the Alleged Violation and penalty or sanction. If the Registered Entity disputes the Notice of Alleged Violation or the penalty or sanction, the Registered Entity shall submit its Mitigation Plan within ten (10) business days following issuance of the written decision of the hearing body, unless the Registered Entity elects to appeal the hearing body's determination to NERC. The Registered Entity may choose to submit a Mitigation Plan while it contests an Alleged Violation or penalty or sanction or in response to a Notice of Possible Violation; such submission shall not be deemed an admission of a violation or the appropriateness of a penalty or sanction. If the Registered Entity has not yet submitted a Mitigation Plan, or the Registered Entity submits a Mitigation Plan but it is rejected by the Regional Entity acting as Compliance Enforcement Authority or the hearing body in accordance with Section 6.5, any subsequent violations of the Reliability Standard identified by the Compliance Enforcement Authority before the hearing body renders its decision will not be held in abeyance and will be considered as repeat violations of the Reliability Standard.

Compliance Monitoring and Enforcement Program

6.5 Review and Acceptance or Rejection of Proposed Mitigation Plans

Unless the time period is extended by the Compliance Enforcement Authority, it will complete its review of the Mitigation Plan, and will issue a written statement accepting or rejecting the Mitigation Plan, within thirty (30) days of receipt; otherwise the Mitigation Plan will be deemed accepted. In order to extend the initial or an extended period for review of the Mitigation Plan, the Compliance Enforcement Authority shall, within the initial or extended review period, notify the Registered Entity (and NERC if NERC is not the Compliance Enforcement Authority) that the review period is being extended and identify the date by which the Compliance Enforcement Authority will complete its review of the Mitigation Plan. The Compliance Enforcement Authority's extension notice shall also state that if the Compliance Enforcement Authority has not issued a notice by the end of the extended review period either stating that the Compliance Enforcement Authority accepts or rejects the proposed Mitigation Plan or further extending the Compliance Enforcement Authority's period for review of the Mitigation Plan, the Mitigation Plan will be deemed accepted.

If the Compliance Enforcement Authority rejects a Mitigation Plan, the Compliance Enforcement Authority will provide the Registered Entity with a written statement describing the reasons for the rejection, and will require the Registered Entity to submit a revised Mitigation Plan by the Required Date. The Compliance Enforcement Authority will notify the Registered Entity within ten (10) business days after receipt of a revised Mitigation Plan whether the Compliance Enforcement Authority will accept or reject the revised Mitigation Plan and provide a written statement describing the reasons for rejection and the Required Date for the second revised Mitigation Plan. If the second review results in rejection of the Mitigation Plan, the Registered Entity may request a hearing in accordance with the Hearing Procedures, by submitting to the Compliance Enforcement Authority a written request for hearing including an explanation of why the Mitigation Plan should be accepted. After the hearing is completed, the Compliance Enforcement Authority will issue a written statement accepting a Mitigation Plan it deems as appropriate.

Within five (5) business days after a Regional Entity accepts a Mitigation Plan, the Regional Entity (i) will notify NERC and the Registered Entity of the acceptance of the Mitigation Plan and (ii) will provide the accepted Mitigation Plan to NERC. NERC will review the accepted Mitigation Plan and, within thirty (30) days following its receipt of the Mitigation Plan from the Regional Entity, will notify the Regional Entity and the Registered Entity, on a contemporaneous basis, as to whether the Mitigation Plan is approved or disapproved by NERC. If NERC disapproves a Mitigation Plan that was accepted by the Regional Entity, NERC shall state its reasons for the rejection, and may state the changes to the Mitigation Plan that would result in approval by NERC. The Registered Entity shall not be subject to findings of violations of the specific requirements of Reliability Standards that are the subject of the Mitigation Plan or to imposition of penalties or sanctions for such violations with respect to the period of time the Mitigation Plan was under consideration by NERC and for a reasonable period following NERC's disapproval of the Mitigation Plan, so long as the Registered Entity promptly submits a modified Mitigation Plan that addresses the concerns identified by NERC.

If a Registered Entity submits a Mitigation Plan prior to issuance of a Notice of Confirmed Violation or entry into a settlement, such as with a Self-Report or in response to a Notice of Possible Violation, the Regional Entity may provisionally accept the proposed Mitigation Plan. If the Regional Entity subsequently determines, upon completing its assessment of the Possible

Compliance Monitoring and Enforcement Program

Violation, that the facts and circumstances are different than those on which the accepted Mitigation Plan was based, the Regional Entity may, by notice to the Registered Entity and to NERC, require the Registered Entity to submit a revised Mitigation Plan that fully addresses the facts and circumstances of the violation. The Regional Entity's notice shall state the additional or different facts and circumstances that need to be addressed in the revised Mitigation Plan. The Registered Entity shall submit a revised Mitigation Plan in response to the notice within thirty (30) days following the date of the notice, unless the Regional Entity specifies or allows a longer time period. The Registered Entity's revised Mitigation Plan shall be subject to review and acceptance or rejection by the Regional Entity and by NERC in accordance with this Section 6.5. If the Regional Entity issues a Notice of Confirmed Violation or enters into a settlement with the Registered Entity and does not identify a need to request modifications to the provisionally-accepted Mitigation Plan based on additional or different facts and circumstances, the Regional Entity shall issue a notice to the Registered Entity, with a copy to NERC, stating that the "provisional" nature of the acceptance is terminated and the acceptance is final. The Regional Entity shall issue such notice within five (5) business days of issuance of the Notice of Confirmed Violation or entry into the settlement.

NERC will submit to FERC, as non-public information, an approved Mitigation Plan relating to violations of Reliability Standards within seven (7) business days after NERC approves the Mitigation Plan. NERC shall publicly post the approved Mitigation Plan as part of the public posting of the related Notice of Penalty in accordance with Section 8.0 or settlement in accordance with Section 5.6.

6.6 Completion/Confirmation of Implementation of Mitigation Plans

The Registered Entity shall provide updates at least quarterly to the Compliance Enforcement Authority on the progress of the Mitigation Plan. The Compliance Enforcement Authority will track the Mitigation Plan to completion and may conduct on-site visits and review status during audits to monitor Mitigation Plan implementation.

Upon completion of the Mitigation Plan, the Registered Entity shall provide to the Compliance Enforcement Authority certification, signed by an officer, employee, attorney or other authorized representative of the Registered Entity, that all required actions described in the Mitigation Plan have been completed and shall include data or information sufficient for the Compliance Enforcement Authority to verify completion. The Compliance Enforcement Authority shall request such data or information and conduct follow-up assessments, on-site or other Spot Checking, or Compliance Audits as it deems necessary to verify that all required actions in the Mitigation Plan have been completed and the Registered Entity is in compliance with the subject Reliability Standard requirement(s).

In the event all required actions in the Mitigation Plan are not completed within the applicable deadline including any extensions of the original deadline granted under Section 6.3, any violation(s) of a Reliability Standard subject to the Mitigation Plan that occurred during the originally scheduled time period for completion will be enforced immediately and a new Mitigation Plan must be submitted for acceptance by the Compliance Enforcement Authority. In addition, the Compliance Enforcement Authority may conduct a Compliance Audit of, or issue a Remedial Action Directive to, the Registered Entity.

Compliance Monitoring and Enforcement Program

Regional Entities will provide to NERC the quarterly status reports and such other information as NERC requests, and will notify NERC when each Mitigation Plan is verified to have been completed.

6.7 Recordkeeping

The Compliance Enforcement Authority will maintain a record containing the following information for each Mitigation Plan:

- Name of Registered Entity.
- The date of the violation.
- Monitoring method by which the violation was detected, i.e., Self-Certification, Self-Reporting, Compliance Audit, Compliance Investigation, Complaint, etc.
- Date(s) of Notice of Possible Violation and Notice of Alleged Violation (if applicable).
- Expected and actual completion date of the Mitigation Plan and major milestones.
- Expected and actual completion date for each required action.
- Accepted changes to milestones, completion dates, or scope of Mitigation Plan.
- Registered Entity's completion notice and data submitted as evidence of completion.

7.0 REMEDIAL ACTION DIRECTIVES

The Compliance Enforcement Authority may issue a Remedial Action Directive when such action is immediately necessary to protect the reliability of the Bulk Power System from an imminent threat. A Remedial Action Directive may include, but is not limited to, any of the following: specifying operating or planning criteria, limits, or limitations; requiring specific system studies; defining operating practices or guidelines; requiring confirmation of data, practices, or procedures through inspection testing or other methods; requiring specific training for personnel; requiring development of specific operating plans; directing a Registered Entity to develop and comply with a plan to remediate a violation; imposing increased auditing or additional training requirements; and requiring a Registered Entity to cease an activity that may constitute a violation of a Reliability Standard.

A Remedial Action Directive may be issued to a Registered Entity at any time, including during any procedures relating to a Possible Violation or an Alleged Violation of a Reliability Standard. The Compliance Enforcement Authority will specify if a Remedial Action Directive obviates the need for a Mitigation Plan.

Prior to issuing a Remedial Action Directive, the Regional Entity shall consult the Reliability Coordinator for the Registered Entity, if applicable, to ensure that the Remedial Action Directive is not in conflict with directives issued by the Reliability Coordinator.

Compliance Monitoring and Enforcement Program

Any Remedial Action Directive must be provided in a notice to the Registered Entity and shall include: (i) a list of the Possible Violation(s) or Alleged Violation(s) of Reliability Standards that are the basis for issuance of the Remedial Action Directive; (ii) a discussion of the factual basis for the Remedial Action Directive; (iii) a deadline for compliance and (iv) notice to the Registered Entity that failure to comply with the directive by the Required Date may result in further Remedial Action Directives or significantly increased sanctions. The Compliance Enforcement Authority will cause the notice of the Remedial Action Directive to be delivered to the Registered Entity by (i) electronic means to the Registered Entity's designated contact person and (ii) by a recognized express courier service that provides tracking and verification of delivery to the recipient. The date of delivery as specified by the express courier service's verification of delivery shall be the date of actual receipt of the Remedial Action Directive. The Compliance Enforcement Authority will monitor implementation of Remedial Action Directives as necessary to verify compliance.

The Regional Entity will notify NERC within two (2) business days after issuing a Remedial Action Directive.

Once the Compliance Enforcement Authority has given the Registered Entity notice of the Remedial Action Directive, the Registered Entity may contest the Remedial Action Directive by giving written notice to the Compliance Enforcement Authority within two (2) business days following the date of actual receipt of notice of the Remedial Action Directive. Due to the urgency of resolving any objections to a Remedial Action Directive, the hearing shall be conducted under the expedited hearing process set forth in Section 1.9 of **Attachment 2, Hearing Procedures**. Notice to contest the Remedial Action Directive and participation in the hearing process set forth in Section 1.9 of **Attachment 2, Hearing Procedures** shall constitute the Registered Entity's right to appeal the Remedial Action Directive. The Registered Entity may elect not to implement the Remedial Action Directive until the hearing process is completed, or may proceed with implementing the Remedial Action Directive even if it is contesting the Remedial Action Directive.

8.0 REPORTING AND DISCLOSURE

Regional Entities shall prepare and submit to NERC all required reports, containing current information concerning (1) Registered Entity compliance with Reliability Standards, (2) all Possible Violations, Alleged Violations and Confirmed Violations of Reliability Standards by Registered Entities, (3) the status of Possible Violations and Alleged Violations, (4) sanctions and penalties, (5) Remedial Action Directives imposed, and (6) Mitigation Plan(s) accepted including dates for all required actions and for completion.

Regional Entities shall report all Possible Violations, Alleged Violations and Confirmed Violations to NERC by promptly entering the Possible Violation, Alleged Violation or Confirmed Violation into the NERC compliance reporting and tracking system. NERC shall notify FERC and, where the report pertains to a Registered Entity or to a portion of the Bulk Power System over which another Applicable Governmental Authority has jurisdiction, shall also notify such other Applicable Governmental Authority, within two (2) business days of receiving a report of a Possible Violation, Alleged Violation or Confirmed Violation from the Regional Entity; provided, that NERC will not disclose any non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to an Applicable Governmental Authority

Compliance Monitoring and Enforcement Program

other than FERC without first obtaining permission from FERC for such disclosure and subject to any limitations placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or portion of the Bulk Power System to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction. Such reports shall include information regarding the nature of the Possible Violation, Alleged Violation or Confirmed Violation, the name of the Registered Entity involved, the status of any ongoing review and assessment of the Possible Violation, Alleged Violation, or Confirmed Violation, the name of a Regional Entity staff person knowledgeable about the information to serve as a point of contact, as required by 18 C.F.R. §39.7(b), and, in the case of an Alleged Violation or Confirmed Violation, its potential impact on the reliability of the Bulk Power System.

Regional Entities shall report to NERC, through the NERC compliance reporting and tracking system, the status of Possible Violations and Alleged Violations, regardless of significance, that have not yet resulted in a Notice of Confirmed Violation or have not completed the hearing process, or for which mitigation activities (including activities being carried out pursuant to a settlement agreement) have not been completed. Regional Entities will ensure the information is current when these reports are provided.

Regional Entities shall report a Confirmed Violation to NERC at the same time the Notice of Confirmed Violation is issued to the Registered Entity. NERC will publicly post on its Web site each Notice of Penalty, with the identify of the violator, together with any statement submitted by the Registered Entity, when NERC files the Notice of Penalty with FERC.

NERC will provide reports quarterly to FERC and, where a report contains information pertaining to a Registered Entity or to a portion of the Bulk Power System over which another Applicable Governmental Authority has jurisdiction, to such other Applicable Governmental Authority, on the status of all Possible, Alleged and Confirmed Violations for which mitigation activities have not been completed; provided, that NERC will not disclose any non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to an Applicable Governmental Authority other than FERC without first obtaining permission from FERC for such disclosure and subject to any limitations placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or portion of the Bulk Power System to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction.

9.0 DATA RETENTION AND CONFIDENTIALITY

9.1 Records Management

The Compliance Enforcement Authority records management policy shall provide for a routine and orderly process for the retention and disposal of electronic and paper records related to the Compliance Program, ensure verification of compliance with appropriate business, regulatory,

Compliance Monitoring and Enforcement Program

and legal requirements and at a minimum conform to the data retention requirements of the Reliability Standards. The policy shall allow for the maintenance of records as required to implement the Compliance Program.

9.2 Retention Requirements

The Compliance Enforcement Authority records management policy will require that information and data generated or received pursuant to Compliance Program activities, including Compliance Audits, Self-Certifications, Spot Checking, Compliance Investigations, Self-Reporting, Periodic Data Submittals, Exception Reporting, and Complaints, as well as a hearing process, will be retained for the longer of (i) five (5) years or (ii) any retention period specified in a Reliability Standard or by FERC or another Applicable Governmental Authority. The obligation to retain information and data commences upon the initiation of the Compliance Program activity that produces the data or information. If the information or data is material to the resolution of a controversy, the retention period for such data shall not commence until after the controversy is resolved.

Upon request from NERC, Regional Entities will provide to NERC copies of such information and data. NERC will retain the information and data in order to maintain a record of activity under the Compliance Program. In providing the information and data to NERC, the Regional Entity shall preserve any mark of confidentiality.

9.3 Confidentiality and Critical Energy Infrastructure Information

9.3.1 Definitions

Information or data generated or received pursuant to Compliance Program activities, including a hearing process, shall be treated in a confidential manner pursuant to the provisions of Section 1500 of the NERC Rules of Procedure. The terms “confidential information,” “confidential business and market information,” “critical energy infrastructure information,” and “critical infrastructure” shall have the meanings stated in Section 1501 of the NERC Rules of Procedure.

9.3.2 Protection of Confidential Information

The Compliance Enforcement Authority personnel (including any contractors, consultants and industry subject matter experts) and committee members, and participants in Compliance Program activities shall be informed of, and agree to comply with, Section 1500 of the NERC Rules of Procedure concerning confidential information.

9.3.3 Critical Energy Infrastructure Information

The Compliance Enforcement Authority will keep confidential all critical energy infrastructure information in accordance with Section 1500 of the NERC Rules of Procedures. Information deemed to be critical energy infrastructure information shall be redacted, in accordance with Section 1500 of the NERC Rules of Procedure, and shall not be released publicly.

Compliance Monitoring and Enforcement Program

ATTACHMENT 1

PROCESS FOR NON-SUBMITTAL OF REQUESTED DATA

If data, information, or other reports (including Mitigation Plans) requested from a Registered Entity are not received by the Required Date, the Compliance Enforcement Authority may sequentially execute the following steps for each Reliability Standard for which the Compliance Enforcement Authority has requested data, information, or other reports. The Compliance Enforcement Authority however will afford the Registered Entity reasonable opportunity to resolve a difficulty submitting data due to time or format issues.

Step 1: The Compliance Enforcement Authority will issue a follow-up notification to the Registered Entity's designated contact.

Step 2: The Compliance Enforcement Authority will issue a follow-up notification to the Registered Entity's vice president or equivalent responsible for compliance (with a copy to NERC and the Registered Entity's designated contact).

Step 3: The Compliance Enforcement Authority will issue a follow-up notification to the Registered Entity's chief executive officer or equivalent (with a copy to NERC, the Registered Entity's vice president or equivalent responsible for compliance and the Registered Entity's designated contact).

A full Compliance Audit may be scheduled at this step.

Step 4: Thirty (30) days after the Required Date, a Reliability Standard violation may be applied at the Severe Violation Severity Level.

Step 4 does not apply to Compliance Audits and Mitigation Plan tracking requests.

ATTACHMENT 2 - HEARING PROCEDURES

1.1 Applicability, Definitions and Interpretation

1.1.1 Procedure Governed

The provisions set forth in this **Attachment 2** (“Hearing Procedures”) shall apply to and govern practice and procedure before the Compliance Enforcement Authority in hearings in the United States conducted into (i) whether Registered Entities within the Compliance Enforcement Authority’s area of responsibility have violated Reliability Standards, and (ii) if so, to determine the appropriate Mitigation Plans as well as any remedial actions, penalties or sanctions in accordance with the NERC *Sanction Guidelines* and other applicable penalty guidelines approved by FERC pursuant to 18 C.F.R. Section 39.7(g)(2). Any hearing conducted pursuant to these Hearing Procedures shall be conducted before a [HEARING BODY] established by the Compliance Enforcement Authority. The composition of the [HEARING BODY], after any recusals or disqualifications, shall be such that no two industry segments may control, and no single industry segment may veto, any decision by the [HEARING BODY] on any matter brought before it for decision.

The standard of proof in any proceeding under these Hearing Procedures shall be by a preponderance of the evidence. The burden of persuasion on the merits of the proceedings shall rest upon the Compliance Staff alleging noncompliance with a Reliability Standard, proposing a penalty, opposing a Registered Entity’s Mitigation Plan, or requiring compliance with a Remedial Action Directive.

1.1.2 Deviation

To the extent permitted by law, any provision in these Hearing Procedures may be waived, suspended or modified by the Hearing Officer, as defined in Paragraph 1.1.5, or the [HEARING BODY], for good cause shown, either upon the Hearing Officer’s or the [HEARING BODY]’s own motion or upon the motion of any Participant.

1.1.3 Standards for Discretion

The Compliance Enforcement Authority’s discretion under these Hearing Procedures shall be exercised to accomplish the following goals:

- a) Integrity of the Fact-Finding Process - The principal goal of the hearing process is to assemble a complete factual record to serve as a basis for a correct and legally sustainable ruling, decision or order.
- b) Fairness - Persons appearing in Compliance Enforcement Authority proceedings should be treated fairly. To this end, Participants should be given fair notice and opportunity to present explanations, factual information, documentation and legal argument. Action shall be taken as necessary to eliminate any disadvantage or prejudice to a Participant that would otherwise result from another Participant’s failure to act diligently and in good faith.
- c) Independence - The hearing process should be tailored to protect against undue influence from any Person, Participant or interest group.

- d) **Balanced Decision-Making** - Decisions should be based solely on the facts and arguments of record in a proceeding and by individuals who satisfy the Compliance Enforcement Authority's conflict of interest policy.
- e) **Impartiality** - Persons appearing before the [HEARING BODY] should not be subject to discriminatory or preferential treatment. Registered Entities should be treated consistently unless a reasonable basis is shown in any particular proceeding to depart from prior rulings, decisions or orders.
- f) **Expedition** - Proceedings shall be brought to a conclusion as swiftly as is possible in keeping with the other goals of the hearing process.

1.1.4 Interpretation

- a) These Hearing Procedures shall be interpreted in such a manner as will aid in effectuating the Standards for Discretion set forth in Paragraph 1.1.3, and so as to require that all practices in connection with the hearings shall be just and reasonable.
- b) Unless the context otherwise requires, the singular of a term used herein shall include the plural and the plural of a term shall include the singular.
- c) To the extent that the text of a rule is inconsistent with its caption, the text of the rule shall control.

1.1.5 Definitions

Unless otherwise defined, as used in these Hearing Procedures (i) definitions in Section 1.1 of the NERC Compliance Monitoring and Enforcement Program shall apply, and (ii) the following terms shall have the following meanings:

“Clerk,” as designated by the Compliance Enforcement Authority.

“Compliance Enforcement Authority’s area of responsibility” means the Compliance Enforcement Authority’s corporate region. If a Regional Entity is the Compliance Enforcement Authority, the Compliance Enforcement Authority’s area of responsibility is shown in Exhibit A to the delegation agreement between the Regional Entity and NERC.

“Critical Energy Infrastructure Information” means specific engineering, vulnerability, or detailed design information about proposed or existing critical infrastructure that: (i) relates details about the production, generation, transportation, transmission, or distribution of energy; (ii) could be useful to a person in planning an attack on critical infrastructure; and (iii) does not simply give the location of the critical infrastructure.

“Critical infrastructure” means existing and proposed systems and assets, whether physical or virtual, the incapacity or destruction of which would negatively affect security, economic security, public health or safety, or any combination of those matters.

“Cybersecurity Incident” means a malicious act or suspicious event that disrupts, or was an attempt to disrupt, the operation of those programmable electronic devices and

communications networks including hardware, software and data that are essential to the Reliable Operation of the Bulk-Power System.

“Director of Compliance” means the Director of Compliance of the Compliance Enforcement Authority, who is responsible for the management and supervision of Compliance Staff.

“Document” means, in addition to the commonly understood meaning of the term as information written or printed on paper, any electronically stored information, including writings, drawings, graphs, charts, photographs, sound recordings, images and other data or data compilations stored in any medium from which information can be obtained, and shall be translated by the producing party into reasonably usable form.

“ERO” means the Electric Reliability Organization, currently the North American Electric Reliability Corporation, or any successor organization, certified by FERC pursuant to 18 C.F.R. Section 39.3.

“FERC” means the Federal Energy Regulatory Commission.

“Hearing Officer” means an individual employed or contracted by the Compliance Enforcement Authority and designated by the Compliance Enforcement Authority to preside over hearings conducted pursuant to these Hearing Procedures.

“Participant” means a Respondent and any other Person who is allowed or required by FERC to participate as an intervenor in a proceeding conducted pursuant to these Hearing Procedures, and as used herein shall include the members of the Compliance Staff of the Compliance Enforcement Authority that participate in a proceeding.

“Penalty” as used herein includes all penalties and sanctions, including but not limited to a monetary or non-monetary penalty; a limitation on an activity, function, operation or other appropriate sanction; or the addition of the Registered Entity to a reliability watch list composed of major violators. Penalties must be within the range set forth in the NERC *Sanction Guidelines* approved by FERC pursuant to 18 C.F.R. Section 39.7(g)(2), and shall bear a reasonable relation to the seriousness of a Registered Entity’s violation and take into consideration any timely efforts made by the Registered Entity to remedy the violation.

“Person” means any individual, partnership, corporation, limited liability company, governmental body, association, joint stock company, public trust, organized group of persons, whether incorporated or not, or any other legal entity.

“Respondent” means the Registered Entity who is the subject of the Notice of Alleged Violation, contested Mitigation Plan or contested Remedial Action Directive that is the basis for the proceeding, whichever is applicable.

“Staff” or “Compliance Staff” means individuals employed or contracted by the Compliance Enforcement Authority who have the authority to make initial determinations of compliance or violation with Reliability Standards by Registered Entities and associated Penalties and Mitigation Plans.

“Technical Advisor” means any Staff member, third-party contractor, or industry stakeholder who satisfies the Compliance Enforcement Authority’s conflict of interest policy and is selected to assist in a proceeding by providing technical advice to the Hearing Officer and/or the [HEARING BODY].

1.2 General Provisions including Filing, Service, Transcription and Participation

1.2.1 Contents of Filings

All filings made with [HEARING BODY] must contain:

- a) A caption that sets forth the title of the proceeding and the designated docket number or, if the filing initiates a proceeding, a space for the docket number;
- b) A heading that describes the filing and the Participant on whose behalf the filing is made;
- c) The full name, address, telephone number and email address of the Participant or the representative of the Participant making the filing;
- d) A plain and concise statement of any facts upon which the filing is based, which facts shall be supported by citations to the record of the hearing, if available, or other documents; and
- e) The specific relief sought, which may be in the alternative, and the authority that provides for or otherwise allows the relief sought.

1.2.2 Form of Filings

- a) All filings shall be typewritten, printed, reproduced or prepared using a computer or other word or data processing equipment on white paper 8½ inches by 11 inches with inside text margins of not less than one inch. Page numbers shall be centered and have a bottom margin of not less than ½ inch. Line numbers, if any, shall have a left-hand margin of not less than ½ inch. The impression shall be on one side of the paper only and shall be double spaced; footnotes may be single spaced and quotations may be single spaced and indented.
- b) All pleadings shall be composed in either Arial or Times New Roman font, black type on white background. The text of pleadings or documents shall be at least 12-point. Footnotes shall be at least 10-point. Other material not in the body of the text, such as schedules, attachments and exhibits, shall be at least 8-point.
- c) Reproductions may be by any process provided that all copies are clear and permanently legible.
- d) Testimony prepared for the purpose of being entered into evidence shall include line numbers on the left-hand side of each page of text. Line numbers shall be continuous.
- e) Filings may include schedules, attachments or exhibits of a numerical or documentary nature which shall, whenever practical, conform to these requirements; however, any log,

graph, map, drawing, chart or other such document will be accepted on paper larger than prescribed in subparagraph (a) if it cannot be provided legibly on letter size paper.

1.2.3 Submission of Documents

a) Where to File

Filings shall be made with the Clerk of the Compliance Enforcement Authority located at its principal office. The office will be open from [*Compliance Enforcement Authority business hours*] local time each day except Saturday, Sunday, legal holidays and any other day declared by the Compliance Enforcement Authority.

b) When to File

Filings shall be made within the time limits set forth in these Hearing Procedures or as otherwise directed by the Hearing Officer or the [HEARING BODY]. Filings will be considered made when they are date stamped received by the Clerk. To be timely, filings must be received no later than [*Compliance Enforcement Authority close of business*] local time on the date specified.

c) How to File

Filings may be made by personal delivery, mailing documents that are properly addressed with first class postage prepaid, or depositing properly addressed documents with a private express courier service with charges prepaid or payment arrangements made. Alternatively, filing by electronic means will be acceptable upon implementation of a suitable and secure system by the Compliance Enforcement Authority.

d) Number of Copies to File

One original and five exact copies of any document shall be filed. The Clerk will provide each member of the [HEARING BODY] with a copy of each filing.

e) Signature

The original of every filing shall be signed by the Participant on whose behalf the filing is made, either by an attorney of the Participant or, by the individual if the Participant is an individual, by an officer of the Participant if the Participant is not an individual, or if the Participant is Staff, by a designee authorized to act on behalf of Staff. The signature on a filing constitutes a certificate that the signer has read the filing and knows its contents, and that the contents are true to the best of the signer's knowledge and belief.

f) Verification

The facts alleged in a filing need not be verified unless required by these Hearing Procedures, the Hearing Officer or the [HEARING BODY]. If verification is required, it must be under oath by a person having knowledge of the matters set forth in the filing. If any verification is made by an individual other than the signer, a statement must be included in or attached to the verification explaining why a person other than the signer is providing verification.

g) Certificate of Service

Filings shall be accompanied by a certificate of service stating the name of the individuals served, the Participants whose interests the served individuals represent, the date on which service is made, the method of service and the addresses to which service is made. The certificate shall be executed by the individual who caused the service to be made.

1.2.4 Service

a) Service List

For each proceeding, the Clerk shall prepare and maintain a list showing the name, address, telephone number, and facsimile number and email address, if available, of each individual designated for service. The Hearing Officer, Director of Compliance and the Registered Entity's designated agent for service [as registered with the Compliance Enforcement Authority] shall automatically be included on the service list. Participants shall identify all other individuals whom they would like to designate for service in a particular proceeding in their appearances or other filings. Participants may change the individuals designated for service in any proceeding by filing a notice of change in service list in the proceeding. Participants are required to update their service lists to ensure accurate service throughout the course of the proceeding. Copies of the service list may be obtained from the Clerk.

b) By Participants

Any Participant filing a document in a proceeding must serve a copy of the document on each individual whose name is on the service list for the proceeding. Unless otherwise provided, service may be made by personal delivery, email, deposit in the United States mail properly addressed with first class postage prepaid, registered mail properly addressed with postage prepaid or deposit with a private express courier service properly addressed with charges prepaid or payment arrangements made.

c) By the Clerk

The Clerk shall serve all issuances of the Hearing Officer and [HEARING BODY] upon the members of the [HEARING BODY] and each individual whose name is on the service list for the proceeding. Service may be made by personal delivery, email, deposit in the United States mail properly addressed with first class postage prepaid, registered mail properly addressed with postage prepaid or deposit with a private express courier service properly addressed with charges prepaid or payment arrangements made. The Clerk shall transmit a copy of the record of a proceeding to the ERO at the time it serves the ERO with either (1) a Notice of Penalty, or (2) a [HEARING BODY] final order that includes a Notice of Penalty.

d) Effective Date of Service

Service by personal delivery or email is effective immediately. Service by mail or registered mail is effective upon mailing; service by a private express courier service is effective upon delivery to the private express courier service. Unless otherwise provided, whenever a Participant has the right or is required to do some act within a prescribed period after the service

of a document upon the Participant, four (4) days shall be added to the prescribed period when the document is served upon the Participant by mail or registered mail.

1.2.5 Computation of Time

The time in which any action is required to be done shall be computed by excluding the day of the act or event from which the time period begins to run, and by including the last day of the time period, unless the last day is a Saturday, Sunday, legal holiday or any other day upon which the office of the Compliance Enforcement Authority is closed, in which event it also shall be excluded and the date upon which the action is required shall be the first succeeding day that is not a Saturday, Sunday, legal holiday, or day upon which the office of the Compliance Enforcement Authority is closed.

1.2.6 Extensions of Time

Except as otherwise provided by law, the time by which a Participant is required or allowed to act may be extended by the Hearing Officer or [HEARING BODY] for good cause upon a motion made before the expiration of the period prescribed. If any motion for extension of time is made after the expiration of the period prescribed, the Hearing Officer or [HEARING BODY] may permit performance of the act if the movant shows circumstances sufficient to justify the failure to act in a timely manner.

1.2.7 Amendments

Amendments to any documents filed in a proceeding may be allowed by the Hearing Officer or the [HEARING BODY] upon motion made at any time on such terms and conditions as are deemed to be just and reasonable.

1.2.8 Transcripts

A full and complete record of all hearings, including any oral argument, shall be transcribed verbatim by a certified court reporter, except that the Hearing Officer may allow off-the-record discussion of any matter provided the Hearing Officer states the ruling on any such matter, and the Participants state their positions or agreement in relation thereto, on the record. Unless otherwise prescribed by the Hearing Officer, a Participant may file and serve suggested corrections to any portion of the transcript within thirty-five (35) days from the date on which the relevant portion of the transcript was taken, and any responses shall be filed within ten (10) days after service of the suggested corrections. The Hearing Officer shall determine what changes, if any, shall be made, and shall only allow changes that conform the transcript to the truth and ensure the accuracy of the record.

The Compliance Enforcement Authority will pay for transcription services, for a copy of the transcript for the record and for a copy of the transcript for Staff. Any other Participant shall pay for its own copy of the transcript if it chooses to obtain one and, should any Participant seek to obtain a copy of the transcript on an expedited basis, it shall pay for the expedited transcription services.

1.2.9 Rulings, Notices, Orders and Other Issuances

Any action taken by the Hearing Officer or the [HEARING BODY] shall be recorded in a ruling, notice, order or other applicable issuance, or stated on the record for recordation in the transcript, and is effective upon the date of issuance unless otherwise specified by the Hearing Officer or the [HEARING BODY]. All notices of hearings shall set forth the date, time and place of hearing.

1.2.10 Location of Hearings and Conferences

All hearings and oral arguments shall be held at the principal office of the Compliance Enforcement Authority unless the Hearing Officer or [HEARING BODY] designates a different location.

1.2.11 Participant Participation

Participants may appear at any hearing via teleconference subject to the approval of the Hearing Officer and, in the event of oral argument, the [HEARING BODY], except that witnesses shall personally appear at the evidentiary hearing if required by Paragraph 1.6.6. Staff may participate and be represented by counsel in hearings, and shall have the rights and duties of any Participant.

1.2.12 Interventions Are Not Permitted

The Respondent(s) and Staff shall be Participants to the proceeding. Unless otherwise authorized by FERC, no other Persons shall be permitted to intervene or otherwise become a Participant to the proceeding.

1.2.13 Proceedings Closed to the Public

No hearing, oral argument or meeting of the [HEARING BODY] shall be open to the public, and no notice, ruling, order or any other issuance of the Hearing Officer or [HEARING BODY], or any transcript, made in any proceeding shall be publicly released unless the ERO (within the U.S., in accordance with the authorization previously granted by FERC to release information about a non-public proceeding) or FERC (in the case of U.S.-related information) or another Applicable Governmental Authority (in the case of non-U.S.-related information) determine that public release is appropriate. Only the members of the [HEARING BODY], the Participants, the Hearing Officer and the Technical Advisors, if any, shall be allowed to participate in or obtain information relating to a proceeding.

1.2.14 Docketing System

The Clerk shall maintain a system for docketing proceedings. A docketed proceeding shall be created upon the issuance of a Notice of Alleged Violation. Unless NERC provides a different docketing system that will be used uniformly by the Compliance Enforcement Authorities, docket numbers shall be assigned sequentially beginning with a two digit number that relates to the last two digits of the year in which the docket is initiated, followed by a dash (“-”), followed by the letters “[RE]”, followed by a dash (“-”), followed by a four digit number that will be “0001” on January 1 of each calendar year and ascend sequentially until December 31 of the same calendar year.

1.2.15 Hold Harmless

A condition of a Participant invoking these Hearing Procedures and participating in a hearing is that the Participant agrees that the Compliance Enforcement Authority, including without limitation its members, board of directors or trustees, compliance committee, any other committees or subcommittees, Staff, contracted employees, [HEARING BODY] members, Hearing Officers and Technical Advisors, shall not be liable, and shall be held harmless against the consequences of, or any action or inaction arising out of, the hearing process, or of any agreement reached in resolution of a dispute or any failure to reach agreement as a result of a proceeding. This “hold harmless” provision does not extend to matters constituting gross negligence, intentional misconduct or breach of confidentiality.

1.3 Initiation of the Hearing Process

1.3.1 Registered Entity’s Option to Request a Hearing

Except when contesting a Remedial Action Directive pursuant to section 1.9 of these Hearing Procedures, a Registered Entity may file a statement with the Compliance Enforcement Authority requesting a hearing if either:

- a) The Registered Entity files a response to a Notice of Alleged Violation that contests either the Alleged Violation, the proposed Penalty, or both; or
- b) The Compliance Staff submits to the Registered Entity a statement rejecting the Registered Entity’s proposed revised Mitigation Plan submitted after Compliance Staff rejected the Registered Entity’s initial proposed Mitigation Plan.

A Registered Entity must file its hearing request within forty (40) days after (i) the Registered Entity files its response to the Notice of Alleged Violation; or (ii) the Compliance Staff submits to the Registered Entity its statement identifying a disagreement with the Registered Entity’s proposed Mitigation Plan, whichever is applicable. If the Registered Entity does not file a hearing request within the time period set forth in this Paragraph, then the Registered Entity will be deemed to have agreed and waived any objection to the proposed Penalty, the Alleged Violation or the Compliance Staff’s rejection of the revised Mitigation Plan, whichever is applicable.

Either a Notice of Alleged Violation issued to a Registered Entity or a Staff statement setting forth its rejection of a Registered Entity’s proposed revised Mitigation Plan shall clearly state that the Registered Entity has the option to contest the Alleged Violation, proposed Penalty, or both, or the Compliance Staff’s rejection of the proposed revised Mitigation Plan, using either the shortened hearing procedure pursuant to Paragraph 1.3.2 or the full hearing procedure described in Sections 1.4 to 1.7. If the Registered Entity files a hearing request within the requisite time period, it shall state within its hearing request whether it requests the shortened hearing procedure pursuant to Paragraph 1.3.2 or the full hearing procedure described in Sections 1.4 to 1.7. If the Registered Entity (or any Respondent if there are more than one Respondent) requests the full hearing procedure, the full hearing procedure shall apply. If the Registered Entity (or all Respondents if there are more than one Respondent) requests the shortened hearing procedure, Compliance Staff and any other Participant shall submit a filing within five (5) days of the Registered Entity’s hearing request that states whether Staff or such other Participant

agrees to use the shortened hearing procedure. If Staff or another Participant makes a filing requesting the full hearing procedure, then the full hearing procedure shall apply; otherwise the shortened hearing procedure requested by the Registered Entity or Entities shall be used. Once either the full or shortened hearing procedure has been selected, the Participants shall not be allowed to revert to the non-selected hearing procedure unless the Participants mutually agree.

A Registered Entity shall attach to a request for hearing whichever of the following are applicable:

- a) The Registered Entity's Self-Reporting of a violation;
- b) The Notice of Alleged Violation and the Registered Entity's response thereto; and/or
- c) The Registered Entity's proposed revised Mitigation Plan and the Compliance Staff's statement rejecting the proposed revised Mitigation Plan.

1.3.2 Shortened Hearing Procedure

The shortened hearing procedure shall be as set forth in this Paragraph. The rules applicable to the full hearing procedure shall apply to the shortened hearing procedure unless the context of such a rule is inconsistent with the procedure set forth in this Paragraph or otherwise renders it inapplicable to the shortened hearing procedure. The rules concerning ex parte communications in Paragraph 1.4.7 are hereby expressly made applicable to the shortened hearing procedure under this Paragraph.

The [HEARING BODY] may utilize a Hearing Officer to preside over the shortened hearing procedure in accordance with Paragraph 1.4.2. But, no evidentiary hearing will be held in the shortened hearing procedure and the Participants will not present witness testimony or file briefs, except that briefs on exceptions and briefs in reply to exceptions may be allowed pursuant to Subparagraph (g). Instead, the following events shall take place within the following periods:

- a) The prehearing conference shall be held within seven (7) days after the date on which the notice of hearing is issued. In addition to any other matters set forth in Paragraph 1.5.2 that may apply, the prehearing conference will be used to develop a schedule for the preparation and submission of comments in accordance with Subparagraphs (c) through (e).
- b) Within five (5) days after the date on which the notice of hearing is issued, Staff shall make documents available to the Registered Entity for inspection and copying pursuant to Paragraph 1.5.7.
- c) Within twenty-one (21) days after the prehearing conference, the Staff shall file:
 - 1) initial comments stating Staff's position on all issues and the rationale in support of its position, including all factual and legal argument;
 - 2) all documents that Staff seeks to introduce in support of its position that have not already been submitted in the proceeding; and

- 3) a verification attesting to the truthfulness of the facts alleged in the filing.
- d) Within fourteen (14) days of Staff's initial comment filing pursuant to Subparagraph (c), the Registered Entity shall file:
 - 1) responsive comments stating the Registered Entity's position on all issues and the rationale in support of its position, including all factual and legal argument, which comment also may respond to Staff's initial comments;
 - 2) all documents that the Registered Entity seeks to introduce in support of its position that have not already been submitted in the proceeding; and
 - 3) a verification attesting to the truthfulness of the facts alleged in the filing.
- e) Within seven (7) days after the Registered Entity's responsive comment filing pursuant to Subparagraph (d), Staff shall file reply comments that shall be limited in scope to responding to the Registered Entity's responsive comments and be supported by a verification attesting to the truthfulness of the facts alleged in the filing. Staff shall not submit any additional documents in support of its position as part of this filing except upon motion and good cause shown. If Staff is allowed to file additional documents in support of its position based upon such a motion, the Registered Entity shall have the right to file additional documents in support of its position that are responsive to the additional documents that Staff is allowed to file provided that any additional Registered Entity filing also shall be verified.
- f) The Hearing Officer shall issue an initial opinion within twenty-one (21) days after the Staff's reply comments filing or any additional filing by the Registered Entity pursuant to Subparagraph (e).
- g) If either Participant requests, the Hearing Officer shall allow each Participant to file, within seven (7) days after the Hearing Officer's initial opinion, exceptions to the Hearing Officer's initial opinion in a brief designated "brief on exceptions" in accordance with Paragraph 1.7.5 and within seven (7) days thereafter, a reply brief designated "Brief in Reply to Exceptions."
- h) The [HEARING BODY] shall strive, but is not required, to issue a final order within ninety (90) days of the notice of hearing.

The Hearing Officer or [HEARING BODY] may modify any time period set forth within this Paragraph as warranted by the circumstances but it will be the objective of the [HEARING BODY] to issue the final order within ninety (90) days of the notice of hearing.

1.4 General Hearing Procedure

1.4.1 Notice of Hearing

Within seven (7) days of a Registered Entity requesting a hearing pursuant to Paragraph 1.3, the Clerk shall issue a notice of hearing in the docket. The notice of hearing shall identify the Hearing Officer, if designated at that time, and the date, time, and place for the prehearing

conference, which should occur no later than fourteen (14) days after the notice of hearing is issued.

1.4.2 Hearing Officer

The Compliance Enforcement Authority may utilize a Hearing Officer to preside over each hearing conducted pursuant to these Hearing Procedures, provided that the Hearing Officer's actions shall be subject to the authority of the [HEARING BODY] as set forth in Paragraph 1.4.3. Members of the [HEARING BODY] may attend any aspect of the hearing.

The [HEARING BODY] may delegate to the Hearing Officer authority over the conduct of the hearing, including administering the hearing from the prehearing conference through the issuance of the initial opinion and any administrative hearing functions thereafter, and the responsibility for submission of the matter to the [HEARING BODY] for final decision through the presentation to the [HEARING BODY] of an initial opinion. The Hearing Officer shall have those duties and powers necessary to those ends, consistent with and as further enumerated in these Hearing Procedures, including the following:

- 1) To administer oaths and affirmations;
- 2) To schedule and otherwise regulate the course of the hearing, including the ability to call to recess, reconvene, postpone or adjourn a hearing;
- 3) Consistent with any timing or deadline requirements imposed by these Hearing Procedures or by applicable law, to separate any issue or group of issues from other issues in a proceeding and treat such issue(s) as a separate phase of the proceeding;
- 4) Consistent with any timing or deadline requirements imposed by these Hearing Procedures or by applicable law, to modify any time period, if such modification is in the interest of justice and will result in no undue prejudice to any other Participant;
- 5) To supervise and issue orders concerning discovery;
- 6) To conduct prehearing conferences, status hearings and evidentiary hearings;
- 7) To rule upon all objections, motions and other requests that do not result in the final determination of the proceeding;
- 8) To rule on and receive evidence;
- 9) To call upon a Participant to produce further evidence that is material and relevant to any issue;
- 10) To issue protective orders pursuant to Paragraph 1.5.10;
- 11) To issue initial opinions; and

- 12) To ensure that hearings are conducted in a full, fair and impartial manner, that order is maintained and that unnecessary delay is avoided in the disposition of the proceedings.

If the [HEARING BODY] uses a Hearing Officer to preside over a hearing, the [HEARING BODY] shall disclose the identity, employment history and professional affiliations of the Hearing Officer within two (2) days of the Hearing Officer's assignment to the proceeding, and Participants to the hearing may raise objections to the Hearing Officer's participation in accordance with Paragraph 1.4.5.

1.4.3 [HEARING BODY]

The [HEARING BODY] is vested with the authority to issue a final order resolving the issue(s) in all cases. To that end:

- 1) The [HEARING BODY] shall receive all filings in a hearing, including but not limited to all issuances of the Hearing Officer, all motions and responses thereto, and all written comments, testimony and evidence. The Hearing Body shall not receive documents made available by Staff for inspection and copying by the Respondent, or other responses to discovery between the Participants, unless such documents are placed into the record pursuant to Paragraph 1.6.7.
- 2) The [HEARING BODY] or any individual member thereof may, but is not required to, attend any prehearing conference, status hearing or evidentiary hearing, and/or to submit questions to the Hearing Officer to submit to a Participant or any witness at any such hearing.
- 3) The [HEARING BODY] shall have the same authority as the Hearing Officer, as set forth in these Hearing Procedures, to require the Participants or any individual Participant to: (i) address a specific issue in testimony, evidence or briefs; (ii) present oral argument on an issue; (iii) file pre-evidentiary hearing memorandums; or (iv) produce further evidence that is material and relevant to any issue. To this end, the [HEARING BODY] shall be entitled to issue questions or requests for information to any Participant or any witness at any time until the issuance of a final order.
- 4) To the extent that the [HEARING BODY] disagrees with any issuance or ruling of the Hearing Officer, it may, on its own motion or upon petition for interlocutory review meeting the requirements of Paragraph 1.4.4, reverse or modify the issuance or ruling in whole or in part, or take any other action as may be appropriate.
- 5) The [HEARING BODY] shall resolve the issue(s) in every hearing through the issuance of a final order. In issuing a final order, the [HEARING BODY] shall consider the Hearing Officer's initial opinion but shall have the authority to reject, modify or approve the initial opinion in whole or in part.

1.4.4 Interlocutory Review

A Participant shall be allowed to seek interlocutory review by the [HEARING BODY] of any ruling of the Hearing Officer where the ruling for which interlocutory review is sought presents an extraordinary circumstance which makes prompt review necessary to prevent prejudice to a Participant's ability to present its position in the proceeding. Failure to seek such review shall not operate as a waiver of any objection to such ruling. Unless good cause is shown or unless otherwise ordered by the Hearing Officer or the [HEARING BODY], the Participant seeking review shall file a petition for interlocutory review within fourteen (14) days after the date of the action that is the subject of the petition. The petition shall contain, in a separately identified section, a demonstration that the ruling for which interlocutory review is sought presents an extraordinary circumstance which makes prompt review necessary to prevent prejudice to the Participant's ability to present its position in the proceeding. The petition shall be filed with any offer of proof and supported by affidavit if based on facts that do not appear of record. Responses to petitions for interlocutory review shall be filed within seven (7) days after service of the petition. No replies to responses are allowed.

The Hearing Officer shall file a report to the [HEARING BODY] within fourteen (14) days from the filing of the petition. The Hearing Officer's report shall set forth the relevant facts and other background information relating to the ruling on which interlocutory review is sought, the basis for the Hearing Officer's ruling, a summary of the Participants' arguments on the petition for interlocutory review, and the recommendation of the Hearing Officer for the disposition of the petition by the [HEARING BODY].

On review of a Hearing Officer's ruling, the [HEARING BODY] may affirm or reverse the ruling in whole or in part, and may take any other just and reasonable action with respect to the ruling, such as declining to act on an interlocutory basis. The [HEARING BODY] may reject the petition for interlocutory review on the grounds that the ruling for which review is sought does not present an extraordinary circumstance which makes prompt review necessary to prevent prejudice to a Participant's ability to present its position in the proceeding, without considering or ruling on the substance of the petitioner's arguments. Issuance of a ruling on a petition for interlocutory review shall require (i) a quorum (as defined in Paragraph 1.7.8) of the [HEARING BODY], and (ii) majority vote of the members of the [HEARING BODY] voting on the final order (which number of members voting shall not be less than a quorum). Petitions to rehear or reconsider the [HEARING BODY'S] action taken on interlocutory review shall not be allowed. Filing and disposition of a petition for interlocutory review of a ruling of the Hearing Officer shall not suspend or otherwise delay a hearing or any other scheduled dates in the proceeding except as authorized by the Hearing Officer or the [HEARING BODY] based on a finding of exceptional circumstances.

A non-Participant that has been ordered by the Hearing Officer pursuant to paragraph 1.5.8 to produce or provide documents, information or testimony, and has failed to obtain the relief sought from the Hearing Officer through filing objections to or a motion to quash the order, shall also be entitled to seek interlocutory review by the [HEARING BODY] of the Hearing Officer's order, with respect to (i) whether the non-Participant is within the class of Persons subject to such orders pursuant to paragraph 1.5.8, and (ii) the reasonableness of the Hearing Officer's order to produce or provide document, information or testimony.

1.4.5 Disqualification

A Hearing Officer, Technical Advisor or member of the [HEARING BODY] shall recuse himself or herself from a proceeding if participation would violate the Compliance Enforcement Authority's applicable conflict of interest policy.

Any Participant may file a motion to disqualify or for recusal of a Hearing Officer, Technical Advisor or member of the [HEARING BODY] from a proceeding on grounds of a conflict of interest, an ex parte communication prohibited by section 1.4.7, or the existence of other circumstances that could interfere with the impartial performance of his or her duties. The Participant shall set forth and support its alleged grounds for disqualification by affidavit. A motion for disqualification shall be filed within fifteen (15) days after the later of: (1) the time when the Participant learns of the facts believed to constitute the basis for disqualification; or (2) the time when the Participant is notified of the assignment of the Hearing Officer or Technical Advisor.

The Hearing Officer shall issue a proposed ruling for the [HEARING BODY]'s consideration upon the filing of a motion for disqualification unless the Hearing Officer is the subject of the motion. The [HEARING BODY], without the participation of any member who is the subject of the motion, shall issue a final ruling on the motion. If the Hearing Officer is recused or disqualified, the [HEARING BODY] will appoint a replacement Hearing Officer. To ensure fairness to the Participants and expedite completion of the proceeding when a replacement Hearing Officer is appointed after a hearing has commenced, the replacement Hearing Officer may recall any witness or may certify familiarity with any part or all of the record.

If a quorum (as defined in Paragraph 1.7.8) of the [HEARING BODY] does not remain after any recusals and rulings on motions for disqualification, then the Compliance Enforcement Authority shall appoint a new member(s) to the [HEARING BODY] to create a quorum, which new member(s) shall serve on the [HEARING BODY] through the conclusion of the proceeding but not thereafter. The Compliance Enforcement Authority shall only appoint the number of new members as are necessary to create a quorum. Any new member of the [HEARING BODY] shall be subject to the provisions applicable herein to all [HEARING BODY] members.

1.4.6 Technical Advisor

The Hearing Officer and/or the [HEARING BODY] may elect to use one or more Technical Advisors to assist in any proceeding. Such an election may be made at any time during the course of a proceeding. Any Staff member who serves as a Technical Advisor shall not have been involved in or consulted at any time in regard to any Compliance Staff investigation, determination of a Possible Violation, Alleged Violation or Penalty, or assessment of a Registered Entity's proposed Mitigation Plan that resulted in the proceeding in which technical advice would be rendered, and shall not be a member of Staff participating in the proceeding on which such technical advice would be rendered.

If the Hearing Officer or [HEARING BODY] uses a Technical Advisor to assist in any hearing, the Hearing Officer or [HEARING BODY] shall disclose the identity, employment history and professional affiliations of the Technical Advisor within two (2) days of the Technical Advisor's assignment to the proceeding, and Participants to the hearing may raise objections to the Technical Advisor's participation in accordance with Paragraph 1.4.5.

1.4.7 No Ex Parte Communications

- a) Once a Registered Entity requests a hearing pursuant to Paragraph 1.3:
 - 1) neither the [HEARING BODY], the Hearing Officer, nor the Technical Advisor(s), if any, may communicate either directly or indirectly with any Person concerning any issue in the proceeding outside of the hearing process; except that
 - 2) the [HEARING BODY], the Hearing Officer, and the Technical Advisor(s), if any, may communicate outside of the hearing process either directly or indirectly with a Participant or a Participant's representative:
 - A) in writing if the writing is simultaneously provided to all Participants; or
 - B) orally if a representative for every Participant is present in person or by telephone;
 - C) subject to the requirement that the substance of any ruling on any issue discussed shall be memorialized on the record or by the issuance of a notice or ruling, and that any Participant objecting to the ruling shall have the opportunity to state its objection on the record.
- b) The proscription in Subparagraph (a)(1) does not prohibit members of the Compliance Staff from communicating with the Registered Entity, and representatives, agents or employees thereof on any topic, provided that any member of the Compliance Staff involved in any such communication relating to the subject matter of the proceeding may not be, and may not subsequently serve as, a Technical Advisor.
- c) The proscription in Subparagraph (a)(1) also does not prohibit communications between members of the [HEARING BODY], the Hearing Officer and any Technical Advisor.
- d) Any member of the [HEARING BODY], the Hearing Officer or any Technical Advisor who receives or who makes or knowingly causes to be made a communication prohibited by this Paragraph shall, within seven (7) days of the communication, file and serve on the Participants in the proceeding a notice of ex parte communication setting forth the date, time and place of communication, a summary of the substance and nature of the communication and all responses thereto, and a list of each Person who made or received the communication and, if the communication or any response thereto was in writing, a copy of the written communication shall be attached.

1.4.8 Appearances

Participants shall file written appearances within seven (7) days after the notice of hearing is issued. A Participant's written appearance shall identify the name(s) of each individual authorized to represent the Participant in the proceeding exclusive of witnesses. An individual may appear on his or her own behalf. A corporation, limited liability company, association, partnership or governmental body may appear by any bona fide officer or designee who has the authority to act on behalf of the Participant. A Participant also may appear by an attorney.

A Participant's written appearance shall state, with respect to each individual that the Participant identifies for service, the individual's name, address, telephone number, and facsimile number and email address, if available, where service shall be made.

A Participant may withdraw any individual from the Participant's representation or otherwise change the identity of individuals authorized to represent the Participant in a proceeding by filing a notice of a change in service list.

Any attorney appearing on behalf of a Participant shall be licensed to practice and in good standing before the Supreme Court of the United States or the highest court of any State, territory of the United States or the District of Columbia.

Individuals representing Participants in any hearing also shall enter their appearances at the beginning of the hearing by stating their names, addresses, telephone numbers and email addresses orally on the record.

1.4.9 Failure to Appear or Exercise Diligence

The failure of any Participant to appear during any hearing without good cause and without notification may be grounds for dismissal or deciding against the interests of such Participant.

1.4.10 Consolidation of Proceedings

In the event that more than one Registered Entity receives a Notice of Alleged Violation for the same event or transaction, and each Registered Entity selects the full hearing procedure described in Sections 1.4 to 1.7, the Hearing Body on its own motion may exercise its discretion to examine the actions of all Registered Entities in a single proceeding as long as an initial opinion has not been rendered by the Hearing Officer pursuant to Section 1.7.4 in any proceeding to be consolidated.

A Participant may file a motion pursuant to Paragraph 1.5.5 to consolidate into a single proceeding Allegations of Violations of different Reliability Standards against a single Respondent, and related contests of Penalties or Mitigation Plans, arising out of the same event or transaction. Such consolidation may be allowed in the discretion of the Hearing Officer or [HEARING BODY], as applicable.

1.5 Prehearing Procedure

1.5.1 [Intentionally left blank]

1.5.2 Prehearing Conference

The purpose of the prehearing conference shall be to:

- 1) Preliminarily identify the issues;
- 2) Discuss a schedule for any discovery to be conducted and address any discovery issues that are raised at that time;

- 3) Explore the possibility of obtaining admissions of fact and of the genuineness of documents that would avoid unnecessary proof;
- 4) Develop a schedule for the preparation and submission of evidence and witness testimony in advance of the evidentiary hearing;
- 5) Schedule a date(s) for the evidentiary hearing; and
- 6) Address such other matters as may aid in the simplification of the evidence and disposition of the proceeding.

1.5.3 Summary Disposition

A Hearing Officer, on the Hearing Officer's own motion or on the motion of a Participant, may issue an initial opinion granting, in whole or in part, summary disposition if it appears that there are no issues of material fact. If the Hearing Officer is considering summary disposition in the absence of a Participant motion, the Hearing Officer shall request the Participants to identify in writing any issues of material fact and to comment on the proposed disposition. Factual information in the Participants' comments shall be supported by affidavit. Following review of the Participants' comments, if it still appears to the Hearing Officer that there are no genuine issues of material fact, the Hearing Officer may proceed without an evidentiary hearing. The Hearing Officer shall, however, allow the Participants the opportunity to file briefs. When the Hearing Officer issues an initial opinion granting a motion for summary disposition in whole or in part, the ruling shall set forth the rationale for the grant. An initial opinion of the Hearing Officer granting summary disposition shall be confirmed, rejected or modified in a final order issued by the [HEARING BODY].

1.5.4 Status Hearings

Any Participant may request, and the Hearing Officer may call, a status hearing at any time subsequent to the prehearing conference to address issues that have arisen between the Participants. Such issues may include, but are not limited to, discovery disputes and scheduling matters. The Hearing Officer shall direct the Clerk to issue a notice of status hearing that sets forth the date, time and place for the hearing, and identifies the matters to be addressed at the hearing.

1.5.5 Motions

Unless otherwise provided, a Participant may file a motion at any time requesting any relief as may be appropriate. Unless a Hearing Officer allows a motion to be made orally on the record, motions shall be filed in writing. Motions based on facts that do not appear of record shall be supported by affidavit. Unless otherwise specified by the Hearing Officer, responses to motions shall be filed within fourteen (14) days after service of the motion, and replies to responses shall be filed within seven (7) days after service of the responses; however, a Hearing Officer may deny dilatory, repetitive, or frivolous motions without awaiting a response. Unless otherwise ordered by a Hearing Officer, the filing of a motion does not stay the proceeding or extend any scheduled dates in the proceeding.

1.5.6 Experts

A Participant may employ an expert(s) to testify or consult in a proceeding. Any expert utilized in either capacity shall sign an agreement evidencing the expert's understanding and acknowledgement of the non-public nature of the proceeding and that unauthorized public disclosure of information obtained in connection with the expert's participation in the proceeding is prohibited. The Participant employing the expert shall propose the agreement for approval via a motion, and its approval shall be subject, in addition to consideration of any objections by other Participants, to ensuring that appropriate safeguards are maintained to protect the confidentiality of the proceeding and the information disclosed therein.

1.5.7 Inspection and Copying of Documents in Possession of Staff

(a) Documents to be Available for Inspection and Copying

(1) Within five (5) days after issuance of the notice of hearing, Staff shall make available for inspection and copying by the Respondent, all Documents prepared or obtained by Staff through or in connection with any compliance monitoring process(es) that led to the institution of proceedings. Such Documents shall include but are not limited to:

(A) requests for information to the Respondent;

(B) every written request, including e-mail, directed to persons not employed by the Compliance Enforcement Authority to provide information or Documents or to be interviewed;

(C) the Documents provided in response to any such requests described in (A) and (B) above;

(D) all transcripts of testimony recorded during the Staff investigation and all exhibits to the transcript;

(E) all other Documents obtained from the Respondent; and

(F) all other Documents obtained from persons not employed by the Compliance Enforcement Authority.

The sole bases pursuant to which Staff shall be authorized to withhold Documents from inspection and copying shall be the bases set forth in Paragraph 1.5.7(b); provided, however, that the Documents made available for inspection and copying need not include (i) exact copies of Documents the Respondent previously provided to Staff, and (ii) any Documents provided to the Respondent with or as part of the Notice of Alleged Violation, Notice of Penalty, assessment of proposed Mitigation Plan or Remedial Action Directive.

(2) Where there are Participants in a proceeding in addition to a single Respondent and Compliance Staff, the Hearing Officer or [HEARING BODY] shall oversee the Staff's designation of Documents to be produced to such other Participants and the development, execution and enforcement of any protective order deemed necessary.

(3) Staff shall promptly inform the Hearing Officer and each other Respondent if, after the issuance of a notice of hearing, requests for information are issued by Staff related to the same compliance monitoring process(es) that led to the institution of the proceeding. If Staff receives Documents pursuant to a request for information after Documents have been made available to a Respondent for inspection and copying as set forth in Subparagraph (a), the additional Documents shall be made available to the Respondent not later than fourteen (14) days after Staff receives such Documents. If a date for the evidentiary hearing has been scheduled, Staff shall make the additional Documents available to the Respondent not less than ten (10) days before the hearing. If Staff receives such Documents ten or fewer days before the hearing is scheduled to begin or after the hearing begins, Staff shall make the additional Documents available immediately to the Respondent.

(4) Nothing in subparagraph (a)(1) shall limit the discretion of the Compliance Enforcement Authority to make any other Document available to the Respondent or the authority of the Hearing Officer to order the production of any other Documents or information by any Participant.

(b) Documents That May Be Withheld by Staff

(1) Staff may withhold a Document from inspection and copying by the Respondent if:

(A) the Document is privileged to Staff or constitutes attorney work product of Staff's counsel (in applying this provision, the attorney-client privilege shall be recognized as absolute and any demand for production of attorney work product shall be granted only after a showing of substantial need by the Respondent);

(B) the Document is an examination or inspection report, an internal memorandum, or other note or writing prepared by a Staff member that shall not be offered in evidence;

(C) the Document would disclose (i) an examination, investigatory or enforcement technique or guideline of the Compliance Enforcement Authority, a federal, state, or foreign regulatory authority, or a self-regulatory organization; (ii) the identity of a source, including a federal, state, or foreign regulatory authority or a self-regulatory organization, that furnished information or was furnished information on a confidential basis regarding an investigation, an examination, an enforcement proceeding, or any other type of civil or criminal enforcement action; or (iii) an examination, an investigation, an enforcement proceeding, or any other type of civil or criminal enforcement action under consideration by, or initiated by, the Compliance Enforcement Authority, a federal, state, or foreign regulatory authority, or a self-regulatory organization; or

(D) the Hearing Officer grants leave to withhold a Document or category of Documents as not relevant to the subject matter of the proceeding, or for other good cause shown.

Provided, that where a Document contains information of the type listed in Subparagraphs (A), (B), (C) or (D) that is capable of being redacted, Staff shall make the document available for inspection and copying by Respondent in redacted form.

(2) Nothing in Subparagraph (b)(1)(B), (C) or (D) authorizes Staff to withhold a Document, or a part thereof, that contains exculpatory evidence. Nothing in Subparagraph (b)(1) requires Staff to withhold a Document from disclosure.

(c) Withheld Document List

At the time it is required to make Documents available for inspection and copying, Staff shall also provide to the Hearing Officer, the Respondent and any other Participant to which Documents are being made available, a list of Documents withheld by Staff pursuant to Subparagraph (b)(1). Upon review, the Hearing Officer may order Staff to make any Document withheld available to the Respondent(s) for inspection and copying.

(d) Timing of Inspection and Copying

Except as set forth in this Paragraph, the Hearing Officer shall determine the schedule of production of Documents for inspection and copying, provided that the Hearing Officer may modify any time period for production set forth in this Paragraph as warranted by the circumstances.

(e) Place and Time of Inspection and Copying

Documents subject to inspection and copying pursuant to this Paragraph shall be made available to the Respondent for inspection and copying at the Compliance Enforcement Authority office where the Documents are ordinarily maintained, or at such other office as the Hearing Officer, in his or her discretion, shall designate, or as the Participants otherwise agree. A Respondent shall be given access to the Documents at the Compliance Enforcement Authority's offices during normal business hours. A Respondent shall not be given custody of the Documents or be permitted to remove the Documents from the Compliance Enforcement Authority's offices.

(f) Copying Costs

A Respondent may obtain a photocopy of all Documents made available for inspection. A Respondent shall be responsible for the cost of photocopying. Unless otherwise ordered by the Hearing Officer, charges for copies made at the request of a Respondent shall be at a rate to be established by the Compliance Enforcement Authority.

(g) Failure to Make Documents Available — Harmless Error

In the event that a Document required to be made available to a Respondent pursuant to this Paragraph is not made available by Staff, no rehearing or amended decision of a proceeding already heard or decided shall be required where the failure to make the Document available was harmless error. Should a dispute arise as to whether a rehearing or amended decision is required due to the failure of Staff to produce a Document, the burden shall be on Staff to show that such failure was harmless error. The Hearing Officer, or, upon review, the [HEARING BODY] shall determine whether the failure to make the Document available was harmless error.

1.5.8 Other Discovery Procedures

In addition to the production of Documents by Staff for inspection and copying by Respondent pursuant to Paragraph 1.5.7, the Participants shall be entitled to utilize all other discovery methods provided for in Rules 402 through 409 of the FERC Rules of Practice and Procedure, 18 C.F.R. §385.402 through 385.409, including data requests, written interrogatories and requests for production of Documents or things, depositions by oral examination, requests for inspection of Documents and other property, requests for admissions, and requests for issuance of orders to one or more Registered Entities to produce Documents for inspection and copying or at the hearing or to provide testimony by an authorized representative in deposition or at the hearing. Unless otherwise directed by the Hearing Officer or [HEARING BODY] upon motion by a Participant or by the Hearing Officer, or by the [HEARING BODY] on its own motion, such discovery, and the resolution of any disputes concerning such discovery, shall be conducted in accordance with the provisions of Rules 402 through 410 and 510(e) of the FERC Rules of Practice and Procedure, 18 C.F.R. §385.402 through 385.410 and 385.510(e), which are hereby incorporated by reference into these Hearing Procedures, subject to the following limitations and modifications to such Rules:

- (a) The provisions of Subparagraphs (d), (e) and (f) of Paragraph 1.5.7 shall apply to any such discovery.
- (b) Rule 403(b)(2) (18 C.F.R. §385.403(b)(2)) and Rule 410(d)(2) (18 C.F.R. §385.410(b)(2)) shall not be applicable.
- (c) The Hearing Officer and the [HEARING BODY] have the authority to issue orders to compel the appearance by or production of Documents or information by, only a Person that (i) is a Participant or (ii) is a Registered Entity (including an authorized representative thereof) that is not a Participant. The Hearing Officer and the [HEARING BODY] do not have authority to require a United States marshal or deputy marshal to serve an order to produce or provide Documents, information or testimony.
- (d) References to “subpoena” in Rules 404, 409, 410 and 510(e) shall be deemed to be to an order to a non-Participant Registered Entity to produce or provide Documents, information or testimony.
- (e) References to the “Commission” in Rules 402 through 410 and 510(e) shall be to FERC except as follows: (i) the references in Rules 402(a), 404(b)(1) and 405(b), the second reference in Rule 410(d), and the references in Rule 510(e)(1) and (2) shall be deemed to be to the [HEARING BODY], (ii) the reference in Rule 385.406(b)(4) to “Commission trial staff” shall be deemed to be to Compliance Staff, and (iii) the reference in Rule 510(e)(3) shall be deemed to be to the Hearing Officer or [HEARING BODY].
- (f) Unless otherwise ordered by the Hearing Officer or [HEARING BODY], a data request, set of interrogatories, request for production of Documents or things, request for inspection of Documents or other property, request for admissions, or order to produce or provide Documents, information or testimony, shall not

specify a due date or response date that is fewer than 21 days from the date of service of the request or date of the order.

- (g) A list of withheld Documents, if any, shall be provided by any Participant required to produce Documents, at the time the documents are required to be produced, to the Hearing Officer and to each Participant entitled to receive production of the Documents. Upon review, the Hearing Officer may order the Participant to make any Document withheld available to any other Participant or Participants for inspection and copying.
- (h) In the event a Document or information required to be produced or provided by a Participant pursuant to discovery is not produced or provided by the Participant, no rehearing or amended decision of a proceeding already heard or decided shall be required where the failure to produce or provide the Document or information was harmless error. Should a dispute arise as to whether a rehearing or amended decision is required due to the failure of a Participant to produce or provide a Document or information, the burden shall be on the Participant that failed to produce or provide the Document or information to show that such failure was harmless error. The Hearing Officer or, upon review, the [HEARING BODY] shall determine whether the failure to make the Document available was harmless error.
- (i) Unless otherwise ordered by the Hearing Officer or [HEARING BODY], all such discovery shall be requested, scheduled and conducted so as to be completed within six (6) months following the date of the initial prehearing conference held pursuant to Paragraphs 1.4.1 and 1.5.2.
- (j) Notwithstanding (f) and (i), however, if the shortened hearing procedure in Paragraph 1.3.2 is used in a proceeding, the Hearing Officer, on his or her own motion or on motion of a Participant, shall establish a schedule for discovery, including response periods for responding to discovery requests, that are consistent with the expedited nature of the proceeding contemplated by the shortened hearing procedure.

The Hearing Officer's ruling on all motions relating to disputes concerning such discovery shall consider the following objectives: (i) full disclosure of all relevant Documents and information; (ii) the exercise of due diligence in the conduct of discovery by a Participant; and (iii) disallowing use of discovery as a means to delay the proceeding or to harass or burden any other Participant.

1.5.9 Pre-Evidentiary Hearing Submission of Testimony and Evidence

Unless the Hearing Officer orders otherwise and with the exception of (i) any adverse Participant examination pursuant to Paragraph 1.6.16 and (ii) the testimony and Documents of a non-Participant provided pursuant to an order to produce or provide Documents, information or testimony, all witness testimony in a hearing must be prepared in written form, may have exhibits, schedules and attachments thereto, and shall be filed in advance of the evidentiary hearing pursuant to a schedule determined by the Hearing Officer, as it may be amended. Where

a Participant intends to use a Document or other demonstrative evidence that has not been filed as part of written testimony in the conduct of cross-examination (other than Documents that are to be produced by a non-Participant at the hearing pursuant to an order to produce Documents), the Participant intending to use such Document or demonstrative evidence shall provide it to the other Participants and the Hearing Officer at least three (3) business days prior to the date at which the witness will be cross-examined at the evidentiary hearing.

Compliance Staff shall file the Documents it intends to offer into evidence as its direct case, including the written testimony of its witnesses along with exhibits, schedules and attachments thereto, first. The Registered Entity shall file the Documents it intends to offer into evidence as its direct case, which also may be responsive to Staff's direct case, including the written testimony of its witnesses along with exhibits, schedules and attachments thereto, second. Staff shall file as its rebuttal case the Documents it intends to offer into evidence in response to the Registered Entity's direct case, including the written testimony of its witnesses along with exhibits, schedules and attachments thereto, third.

If appropriate due to the number and/or complexity of the issues, the Hearing Officer may allow for the Registered Entity to submit a rebuttal case that responds to Staff's rebuttal case, in which event the Hearing Officer shall also allow Staff to submit a surrebuttal case that responds to the Registered Entity's rebuttal case.

Each round of evidence shall be limited in scope to responding to the preceding round of evidence, except that the Registered Entity's direct case may exceed the scope of Staff's direct case if necessary for the Registered Entity to set forth its direct case fully.

The Participants shall file the Documents they intend to offer into evidence in accordance with the Hearing Officer's schedule, as it may be amended. Such filings of written testimony and other evidence in advance of the evidentiary hearing shall not entitle the Documents to be admitted into the evidentiary record. The Participants must offer their witnesses' testimony and other proposed evidence for admission into the evidentiary record during the evidentiary hearing.

Any Participant who fails, without good cause shown, to comply with the Hearing Officer's schedule for the filing of written testimony and other evidence in advance of the evidentiary hearing may be limited in the presentation of its evidence during the evidentiary hearing or have its participation in the evidentiary hearing otherwise restricted by the Hearing Officer to avoid undue prejudice and delay.

1.5.10 Protective Orders

- a) All proceedings conducted pursuant to these Hearing Procedures, and any written testimony, exhibits, other evidence, transcripts, comments, briefs, rulings and other issuances, shall be non-public and shall be held in confidence by all Participants, except as the ERO (within the U.S., in accordance with the authorization previously granted by FERC to release information about a non-public proceeding) or FERC (in the case of U.S.-related information) or another Applicable Governmental Authority (in the case of non-U.S.-related information) authorizes or directs public disclosure of any portion of the record. In addition to this general proscription, at any time during a proceeding, the Hearing Officer, on his or her own motion or on the motion of any Participant or of any non-Participant ordered to produce Documents, information or testimony, may enter a

protective order to designate as proprietary and protect the confidential, proprietary or trade secret nature of any data, information or studies, or any other information the public release of which may cause a security risk or harm to a Participant.

- b) The following types of information will be considered entitled to protection through a protective order: (i) confidential business and market information, including information that is proprietary, commercially valuable, or competitively sensitive; (ii) Critical Energy Infrastructure Information; (iii) information related to a Cybersecurity Incident; (iv) personnel information that identifies or could be used to identify a specific individual, or that reveals personnel, financial, medical or other personal information; (v) audit work papers; (vi) investigative files or Documents that would disclose investigative techniques of Staff, any Compliance Enforcement Authority, the ERO or any federal, state or foreign regulatory authority. Nothing in this Subparagraph 1.5.10(b) shall require Staff to produce any Documents it is entitled to withhold under Subparagraph 1.5.7(b).
- c) A motion for a protective order shall specify the proposed expiration date for the proprietary status of the data, Documents or information, if any, and shall propose requirements or safeguards to be met for individuals participating in the proceeding to review the protected information while maintaining its proprietary status.
- d) A Document submitted and marked as proprietary, or a statement made at a hearing and identified as proprietary, shall be afforded proprietary treatment pending the timely submission of a motion to protect the confidential, proprietary or trade secret nature of that Document or statement and a ruling on such a motion by the Hearing Officer.
- e) The protective order shall identify the data, Documents or information that will be accorded proprietary treatment; the individuals participating in the proceeding, by category or otherwise, entitled to view the proprietary information; and the requirements, conditions or safeguards that must be met before an individual may view the information.
- f) A public redacted version of each Document and transcript that contains information that is protected pursuant to this Paragraph must be filed with the proprietary version and must be served on each Participant for distribution to those individuals participating in the proceeding who are not entitled to view the proprietary information.
- g) Should it be necessary to address proprietary information during a hearing, the Hearing Officer shall, while the information is being addressed, close the hearing to all individuals other than those entitled to view the proprietary information in accordance with the protective order.

1.5.11 Pre-Evidentiary Hearing Memorandum

The Hearing Officer or the [HEARING BODY] may request, as needed on a case by case basis due to the number or complexity of the issue(s), the submission of memoranda prior to the evidentiary hearing that outline each Participant's position on the issue(s) in dispute, the key facts and arguments, and the applicable Reliability Standard, rules, orders or other authority. The purpose of such memoranda will be to aid the Hearing Officer and [HEARING BODY] in preparation for the evidentiary hearing. A Participant will not be deemed to have waived any

issue, fact or argument that is not set forth in a pre-evidentiary hearing memorandum. The Hearing Officer may establish page limitations on such submissions.

1.6 Evidentiary Hearing Procedure

1.6.1 Evidentiary Hearings

The purpose of the evidentiary hearing shall be to admit the Participants' evidence into the record, and for each Participant to have the opportunity to cross-examine the other Participant's witnesses. A schedule for briefs, unless waived by the Participants, shall be set at the conclusion of the evidentiary hearing. The evidentiary hearing also may be used to address any other issue pending between the Participants.

1.6.2 Order of Receiving Evidence

In all proceedings Compliance Staff shall open and close.

1.6.3 Opening and Closing Statements

Opening and closing statements will not be made during the evidentiary hearing as a matter of course except that such statements may be allowed when requested by a Participant, and shall be required when requested by the Hearing Officer or the [HEARING BODY]. Any Participant's request for such statements, or a Hearing Officer or [HEARING BODY] notice requiring such statements, shall be made at least ten (10) days in advance of the start of the evidentiary hearing.

1.6.4 Right of Participant to Present Evidence

Subject to compliance with the requirements of these Hearing Procedures concerning the timing of submission of written testimony and other evidence, a Participant has the right to present such evidence, to make such objections and arguments, and to conduct such cross-examination as may be necessary to assure the true and full disclosure of the facts.

1.6.5 Exhibits

All material offered in evidence, except oral testimony allowed by the Hearing Officer or the testimony of a non-Participant pursuant to an order to produce or provide Documents, information or testimony, shall be offered in the form of an exhibit. Each exhibit must be marked for identification. A Participant must provide the court reporter with two (2) copies of every exhibit that the Participant offers into evidence, and will provide copies of any exhibit not served in advance of the evidentiary hearing to the Participants and the Hearing Officer.

1.6.6 Witness Attendance at Evidentiary Hearing

Each witness shall attend the evidentiary hearing in person unless a Participant has been informed in advance of the evidentiary hearing that all other Participants waive cross-examination of the witness and neither the Hearing Officer nor the members of the [HEARING BODY] have any questions for the witness, in which event the witness does need not be present at the evidentiary hearing. All testimony offered at the evidentiary hearing is to be under oath or affirmation. If a witness is not required to attend the evidentiary hearing, then the Participant on whose behalf the witness prepared testimony shall submit an affidavit of the witness attesting to

the veracity of the witness' testimony, and the Participant shall be allowed to introduce the witness' testimony, and the exhibits, schedules and attachments thereto, into the evidentiary record based on such affidavit.

1.6.7 Admission of Evidence

Compliance Staff shall offer its exhibits into evidence first and the Registered Entity second, unless the Participants agree otherwise.

Except for witnesses who are not required to attend the evidentiary hearing, the Participants shall call each witness in turn. Following the witness' swearing in, the witness shall attest to the veracity of his or her written testimony. The witness may identify any language and/or figures in his or her written testimony or exhibits that the witness would like to change or correct. Subject to objection, such changes or corrections may be allowed at the Hearing Officer's discretion for the purpose of obtaining a full, accurate and complete record without imposing undue delay or prejudice on any Participant. The Participant whose witness has made changes or written corrections to written testimony and exhibits shall file corrected copies with the Clerk and provide corrected copies to the Hearing Officer and other Participant.

Once a witness has attested to the veracity of his or her testimony, the Participant on whose behalf the witness is testifying shall move for admission of the witness' testimony, including all exhibits, schedules and attachments thereto, into evidence. Other Participants may object to the introduction of the witness' testimony, or any part thereof, as set forth in Paragraph 1.6.11. Subject to the Hearing Officer's ruling on the objection, the witness' testimony shall be admitted into evidence. The witness shall then be turned over for cross-examination by other Participants, and for any questions by the Hearing Officer or any member of the [HEARING BODY], in accordance with Paragraph 1.6.14, and then for redirect examination in accordance with Paragraph 1.6.15. Witnesses shall be cross-examined on all previously-served testimony (direct, rebuttal or surrebuttal) when they first take the witness stand.

Except (i) in exceptional cases and upon a showing of good cause and (ii) witnesses testifying pursuant to an order to produce or provide Documents, information or testimony issued to a non-Participant, no witness shall be allowed to testify during the evidentiary hearing unless a Participant has served the witness' written testimony in advance of the evidentiary hearing in accordance with the schedule established by the Hearing Officer. Due to the undue prejudice such surprise witness testimony would impose on other Participants, it is the Compliance Enforcement Authority's policy to discourage witness testimony at an evidentiary hearing when a Participant has not served the witness' written testimony in advance of the evidentiary hearing. If such testimony is allowed, sufficient procedural steps shall be taken by the Hearing Officer to provide the other Participants with a fair opportunity for response and cross-examination.

1.6.8 Evidence that is Part of a Book, Paper or Document

When relevant and material matter offered in evidence is embraced in a book, paper or Document containing other matter that is not material or relevant, the Participant offering the same must plainly designate the matter offered as evidence, and segregate and exclude the material not offered to the extent practicable. If the material not offered is in such volume as would unnecessarily encumber the record, such book, papers or Document will not be received in evidence but may be marked for identification and, if properly authenticated, the relevant or

material matter may be read into the record, or, if the Hearing Officer so directs, a separate copy of such matter in proper form shall be offered as an exhibit. All other Participants shall be afforded an opportunity to examine the book, paper or Document and to offer in evidence in like manner other portions thereof if found to be material and relevant.

1.6.9 Stipulations

The Participants may stipulate to any relevant fact or the authenticity of any relevant Document. Stipulations may be made in writing or entered orally in the record. Notwithstanding stipulation, the Hearing Officer may require evidence of the facts stipulated in order to provide a complete evidentiary record on which to base the final order.

1.6.10 Official Notice

Where relevant and material to the subject matter of the proceeding, the Hearing Officer may, upon request of a Participant, take official notice of any of the following:

- 1) Rules, regulations, administrative rulings and orders, written policies of governmental bodies, and rulings and orders of other Compliance Enforcement Authorities.
- 2) The orders, transcripts, exhibits, pleadings or any other matter contained in the record of other docketed proceedings of the Compliance Enforcement Authority.
- 3) State, provincial and federal statutes and municipal and local ordinances.
- 4) The decisions of state, provincial and federal courts.
- 5) Generally recognized scientific or technical facts within the specialized knowledge of the Compliance Enforcement Authority.
- 6) All other matters of which the courts of the United States may take judicial notice.

All requests to take official notice shall be submitted in advance of the evidentiary hearing in accordance with a schedule established by the Hearing Officer. Before ruling on a request to take official notice, the Hearing Officer shall afford the other Participant opportunity to object or to show the contrary to the matter for which official notice is requested. An accurate copy of any item officially noticed shall be introduced into the record in the form of an exhibit presented by the Participant requesting official notice unless waived by the Participants and approved by the Hearing Officer. Any information officially noticed and not presented as an exhibit shall be set forth in a statement on the record.

1.6.11 Admissibility of Evidence

Any evidence offered, including that included in a book, paper or Document pursuant to Paragraph 1.6.8, shall be subject to appropriate and timely objections. Any Participant objecting to the admission or exclusion of evidence must state the grounds for objection.

The admission of evidence shall not be limited by the generally recognized rules of evidence as applied in the courts of the United States or of the states, although the Hearing Officer may take

such rules of evidence into consideration in ruling on the admissibility of evidence. The Hearing Officer will exercise discretion in the admission of evidence based upon arguments advanced by the Participants, and shall admit evidence if it is of a type commonly relied upon by reasonably prudent persons in the conduct of their affairs. The Hearing Officer may only exclude material from the record in response to a motion or objection by a Participant.

Formal exception to a ruling on admissibility of evidence need not be taken to be preserved.

1.6.12 Offer of Proof

Any Participant who has had evidence excluded may make an offer of proof on the record. The offer of proof may consist of a statement made on the record of the substance of the evidence that the Participant claims would have been adduced, or any written or documentary exhibit that the Participant sought to introduce. Any such exhibit shall be retained as part of the record.

1.6.13 Reservation of Evidentiary Ruling

The Hearing Officer shall rule upon any objection to the admissibility of evidence at the time the objection is made; provided that the Hearing Officer has discretion to reserve such a ruling or to require the Participants to file written arguments in relation thereto. If the Hearing Officer reserves the ruling, appropriate steps shall be taken during the evidentiary hearing to ensure a full, complete and accurate record in relation to the objected to evidence in the event the objection to the evidence's admissibility is overruled.

1.6.14 Cross-Examination

Each witness shall be tendered for cross-examination subsequent to the admission of the witness' testimony into the evidentiary record. Each Participant shall have the right to cross-examine each witness of any other Participants. A Participant may waive cross-examination of any witness. The Hearing Officer and any member of the [HEARING BODY] may ask the witness questions following the conclusion of the witness' cross-examination by the other Participant, and prior to the witness' redirect examination pursuant to Paragraph 1.6.15. If a member of the [HEARING BODY] seeks to ask a witness questions, the member shall do so by submitting the question in writing to the Hearing Officer, and the Hearing Officer shall ask the question of the witness.

1.6.15 Redirect Examination

A Participant shall be entitled to conduct redirect examination of each of the Participant's witnesses who are subject to cross-examination or questions of the Hearing Officer or a member of the [HEARING BODY]. Any redirect examination shall be limited in scope to the witness' cross-examination and questions of the Hearing Officer and members of the [HEARING BODY]. If a member of the Hearing Body seeks to ask a witness questions, the member shall do so by submitting the question in written form to the Hearing Officer, and the Hearing Officer shall ask the question of the witness.

1.6.16 Examination of Adverse Participant

Any Participant may call any adverse Participant, or any employee or agent thereof, during the evidentiary hearing to provide oral testimony on the Participant's behalf, and may conduct such

oral examination as though the witness were under cross-examination. If a Participant intends to call an adverse Participant for examination, it shall give notice to the Hearing Officer and all other Participants setting forth the grounds for such examination at least fourteen (14) days in advance of the evidentiary hearing, and the Participant who, or whose employee or agent, is sought to be called shall file any objection at least seven (7) days in advance of the evidentiary hearing. Any Participant may conduct oral examination of a witness testifying pursuant to an order to produce or provide Documents, information or testimony issued to a non-Participant, as though the witness were under cross-examination.

1.6.17 Close of the Evidentiary Record

The Hearing Officer shall designate the time at which the evidentiary record will be closed, which will typically be at the conclusion of the evidentiary hearing. Evidence may not be added to the evidentiary record after it is closed, provided that the Hearing Officer may reopen the evidentiary record for good cause shown by any Participant.

1.7 Post- Evidentiary Hearing Procedure

1.7.1 Briefs

- a) At the close of the evidentiary hearing, Participants may file initial and reply briefs.
- b) Briefs shall be concise, and, if in excess of twenty (20) pages, excluding appendices, shall contain a table of contents. Statements of fact should be supported by record citations.
- c) The Hearing Officer will prescribe the time for filing briefs, giving due regard to the nature of the proceeding, the extent of the record, the number and complexity of the issues, and the objective of expedition.
- d) Unless the Hearing Officer prescribes otherwise, all Participants shall file initial and reply briefs simultaneously.
- e) Participants' reply briefs shall be limited in scope to responding to arguments and issues raised in other Participants' initial briefs.
- f) The Hearing Officer may, with the agreement of the Participants, allow oral closing statements to be made on the record in lieu of briefs.
- g) The Hearing Officer may establish reasonable page limitations applicable to briefs.

1.7.2 Other Pleadings

Post-hearing pleadings other than briefs are permitted, but, absent good cause shown, such pleadings may not seek to introduce additional evidence into the record.

1.7.3 Draft Initial Opinions

The Hearing Officer may permit or require Participants to file draft initial opinions that set forth the Participants' proposed findings of fact and conclusions.

1.7.4 Hearing Officer's Initial Opinion

Except as otherwise ordered by the [HEARING BODY], at the conclusion of the evidentiary hearing, and following the submission of initial and reply briefs and draft orders, if any, the Hearing Officer shall prepare an initial opinion for the [HEARING BODY]'s review and consideration. The initial opinion shall include a statement of each finding and conclusion, and the reasons or basis therefore, for all material issues of fact, law or discretion presented on the record. The initial opinion also shall contain the appropriate orders to dispose of the proceeding, including any Penalty, Mitigation Plan or Remedial Action Directive that the Hearing Officer proposes the [HEARING BODY] require. If the initial opinion proposes a Penalty, the initial opinion shall include a proposed Notice of Penalty. The initial opinion shall note if the subject of the proceeding has been deemed to involve a Cybersecurity Incident, if any information in the proceeding was deemed to be Critical Energy Infrastructure Information, or if any information in the proceeding is the subject of a protective order pursuant to Paragraph 1.5.10.

1.7.5 Exceptions

- a) Within twenty-one (21) days after service of the initial opinion, or such other time as is fixed by the Hearing Officer, any Participant may file exceptions to the initial opinion in a brief designated "brief on exceptions" and, within fourteen (14) days after the time for filing briefs on exceptions or such other time as is set by the Hearing Officer, any Participant may file as a reply, a "brief in reply to exceptions."
- b) Exceptions and replies thereto with respect to statements, findings of fact or conclusion in the initial opinion must be specific and must be stated and numbered separately in the brief. With regard to each, the Participant must specify each error asserted, and include a concise discussion of any policy considerations applicable and any other arguments in support of the Participant's position. Suggested replacement language for all statements to which exception is taken must be provided. Exceptions and arguments may be filed (1) together in one brief; or (2) in two separate documents, one designated as the brief containing arguments, and the other designed "Exceptions," containing the suggested replacement language.
- c) Arguments in briefs on exceptions and replies thereto shall be concise and, if in excess of twenty (20) pages, shall contain a table of contents.
- d) Participants shall not raise arguments in their briefs in reply to exceptions that are not responsive to any argument raised in any other Participant's brief on exceptions.
- e) Statements of fact should be supported by citation to the record.
- f) The Hearing Officer may establish reasonable page limitations applicable to arguments included in briefs on exception and briefs in reply to exceptions. Such page limitations shall not apply to a Participant's proposed replacement language.
- g) Unless good cause is shown, if a Participant does not file a brief on exceptions, or if a Participant filed a brief on exceptions that does not object to a part of the initial opinion, the Participant shall be deemed to have waived any objection to the initial opinion in its entirety, or to the part of the initial opinion to which the Participant did not object,

whichever applies. This provision shall not prohibit the Participant, in its brief in reply to exceptions, from responding to another Participant's exceptions to such part of the initial opinion or from proposing alternative replacement language to the replacement language proposed by the other Participant for such part of the initial opinion.

1.7.6 Oral Argument

The [HEARING BODY] may elect to hear oral argument. If oral argument is held without briefs having been filed, Participants will be given the opportunity to present argument on all issues. If oral argument is held where briefs have been filed, argument may be limited to issues identified by the [HEARING BODY]. The [HEARING BODY] will direct the Clerk to issue a notice of oral argument that identifies the date, time, place and issues for the argument.

The presentation of written materials or visual aids is permitted at oral argument. To the extent such materials or aids contain factual information, they shall be supported by the record, and shall contain accurate record citations. Such materials or aids may not contain new calculations or quantitative analyses not presented in the record, unless they are based on underlying data contained in the record. Copies of all written materials or visual aids to be presented at oral argument shall be served on all Participants not less than 48 hours prior to the time and date of oral argument.

1.7.7 Additional Hearings

After the evidentiary record has been closed but before issuance of an initial opinion, the Hearing Officer may reopen the evidentiary record and hold additional hearings. Such action may be taken on the Hearing Officer's or the [HEARING BODY]'s own motion if there is reason to believe that reopening is warranted by any changes in conditions, or by the need to compile a complete evidentiary record on which to base the final order. Any Participant may file a motion to reopen the record, which shall contain the reasons for reopening, including material changes in conditions or the identification of additional evidence that should be included in the record, and a brief statement of proposed additional evidence and an explanation why such evidence was not previously adduced.

1.7.8 [HEARING BODY] Final Order

Following the receipt of the initial opinion, any exceptions and replies thereto, and oral argument, if any, the [HEARING BODY] shall issue its final order. Issuance of a final order shall require (i) a quorum of the [HEARING BODY], which shall be (after any recusals, disqualifications and appointments of replacement members) at least fifty (50) percent of the number of members normally assigned to the [HEARING BODY], and (ii) majority vote of the members of the [HEARING BODY] voting on the final order (which number of members voting shall not be less than a quorum). The [HEARING BODY] shall strive, but shall not be required, to issue its final order within thirty (30) days following the last to occur of the initial opinion, exceptions or replies thereto, or oral argument. The final order may adopt, modify, amend or reject the initial opinion in its entirety or in part. The final order shall include a statement of each finding and conclusion, and the reasons or basis therefore, for all material issues of fact, law or discretion presented on the record. The [HEARING BODY] will base its determinations in the final order on the record. The final order also shall contain the appropriate orders to dispose of the proceeding, including any Penalty, sanction, Remedial Action Directive or Mitigation Plan

required. If the final order imposes a Penalty, it shall be entitled “Final Order and Notice of Penalty”. The final order shall note if the subject of the proceeding has been deemed to involve a Cybersecurity Incident, if any information in the proceeding was deemed to be Critical Energy Infrastructure Information, or if any information in the proceeding is the subject of a protective order issued pursuant to Paragraph 1.5.10. The [HEARING BODY] shall direct the Clerk to serve the final order on the Participants. The service of the final order shall include a notice informing the Participants of their appeal rights to the ERO or to FERC, as applicable.

1.7.9 The Record

The Clerk shall maintain the record for all dockets. The record shall include any of the following, including all attachments thereto and documents filed therewith, that exist in any docket:

- 1) Notice of Alleged Violation and Registered Entity’s response thereto;
- 2) Registered Entity’s proposed Mitigation Plan and Staff’s statement identifying its disagreement(s) therewith;
- 3) Remedial Action Directives and the Registered Entity’s notice contesting the Remedial Action Directive;
- 4) Registered Entity’s request for a hearing;
- 5) Participant filings, motions, and responses;
- 6) Notices, rulings, orders and other issuances of the Hearing Officer and [HEARING BODY];
- 7) Transcripts;
- 8) Evidence received;
- 9) Written comments submitted in lieu of written testimony;
- 10) Matters officially noticed;
- 11) Offers of proof, objections and rulings thereon, and any written or documentary evidence excluded from the evidentiary record;
- 12) Briefs, pre-evidentiary hearing memorandums, and draft opinions;
- 13) Post-hearing pleadings other than briefs;
- 14) The Hearing Officer’s initial opinion;
- 15) Exceptions to the Hearing Officer’s initial opinion, and any replies thereto;
- 16) The [HEARING BODY]’s final order, any Notice of Penalty issued therewith, and the Clerk’s notice transmitting the final order to the Participants;

- 17) All notices of ex parte communications; and
- 18) Any notifications of recusal and motions for disqualification of a member of the [HEARING BODY] or Hearing Officer of Technical Advisor and any responses or replies thereto.

1.7.10 Appeal

A Final Order of the [HEARING BODY] may be appealed to NERC in accordance with NERC's Rules of Procedure, Section 409. The Clerk shall transmit to NERC the record of any docket that is the subject of an appealed final order.

1.8 Settlement

Settlements may be entered into at any time pursuant to Section 5.6 of the NERC Compliance Monitoring and Enforcement Program and the Compliance Enforcement Authority's settlement procedures, provided, that the Compliance Enforcement Authority may decline to engage in or continue settlement negotiations after a Possible Violation or Alleged Violation becomes a Confirmed Violation.

1.9 Remedial Action Directives

1.9.1 Initiation of Remedial Action Directive Hearing

Staff] may issue a Remedial Action Directive to a Registered Entity at any time, including during any proceeding related to an Alleged Violation of a Reliability Standard. The Remedial Action Directive shall be delivered to the Registered Entity in accordance with Section 7.0 of the NERC Compliance Monitoring and Enforcement Program. The Compliance Enforcement Authority will notify NERC within two (2) days after its Staff issues a Remedial Action Directive.

The Registered Entity may contest the Remedial Action Directive by filing a written notice with the Clerk of the Compliance Enforcement Authority that states that the Registered Entity contests the Remedial Action Directive and that the Registered Entity requests a Remedial Action Directive hearing. The Registered Entity shall attach a copy of the Remedial Action Directive to its written notice. The Registered Entity must provide such notice within two (2) business days following the date of actual receipt (as defined in Section 7.0 of the NERC Compliance Monitoring and Enforcement Program) of the Remedial Action Directive. If the Registered Entity does not give written notice to the Compliance Enforcement Authority within the required time period, the Registered Entity shall be deemed to have waived its right to contest the Remedial Action Directive.

The Clerk shall assign a docket number, and issue a notice of hearing that sets forth the date, time and place at which the hearing will convene pursuant to Paragraph 1.4.1.

1.9.2 Remedial Action Directive Hearing Procedure

Hearings to address Remedial Action Directives shall be conducted only under the expedited hearing process set forth in this Paragraph 1.9.2. The full hearing procedures described in Sections 1.4 to 1.7 are applicable to the Remedial Action Directive hearing unless the context

of a provision is inconsistent with or otherwise renders it inapplicable to the procedures set forth in this Paragraph.

The Remedial Action Directive hearing may be presided over by a Hearing Officer and will be conducted according to the following guidelines:

- a) The Hearing Officer or the [HEARING BODY] will hold a prehearing conference within two (2) business days after receipt of the Registered Entity's request for a hearing.
- b) An evidentiary hearing will be conducted on the matter, in person or by teleconference, within seven (7) business days after the prehearing conference.
- c) At the evidentiary hearing, Staff shall present oral witness testimony and evidence to show why the Remedial Action Directive should be complied with, and the Registered Entity shall present oral witness testimony and evidence to show why the Remedial Action Directive is not necessary or should be modified. All witness testimony shall be rendered under oath.
- d) At the evidentiary hearing, the Participants shall have the opportunity to make opening statements. In addition, the Participants shall have the opportunity to make closing arguments, and Staff shall have the opportunity to make a rebuttal to the Registered Entity's closing argument.
- e) The Participants may file initial briefs and reply briefs, and/or draft opinions, on an expedited schedule set by the Hearing Officer or the [HEARING BODY]. Oral argument shall not be held.
- f) The [HEARING BODY] shall issue a summary written decision within ten (10) days following the hearing, stating whether the Registered Entity shall or shall not be required to comply with the Remedial Action Directive and identifying any modifications to the Remedial Action Directive that it finds appropriate.

Within thirty (30) days following issuance of its summary written decision, the [HEARING BODY] shall issue a full written decision. The written decision shall state the conclusions of the [HEARING BODY] with respect to the Remedial Action Directive, and shall explain the reasons for the [HEARING BODY]'s conclusions.

PROCEDURE**

Compliance Monitoring and Enforcement Program

COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

1.0 INTRODUCTION

This Compliance Monitoring and Enforcement Program (“Compliance Program”) is the program to be used by the North American Electric Reliability Corporation (“NERC”) and the Regional Entities to monitor, assess, and enforce compliance with Reliability Standards within the United States. ~~This is accomplished through compliance monitoring and rigorous proactive Compliance Audits.~~ Compliance monitoring and enforcement programs also will be implemented in Canada consistent with Canadian laws and agreements.

1.1 Definitions

Capitalized terms used in this Compliance Program shall have the meanings set forth in Section 200 of the NERC Rules of Procedure or as set forth below:

- 1.1.1 Alleged Violation: A ~~potential violation~~Possible Violation for which the Compliance Enforcement Authority has determined, based on an assessment of the facts and circumstances surrounding the Possible Violation, that evidence exists to indicate a Registered Entity has violated a Reliability Standard.
- 1.1.2 Annual Audit Plan: A plan developed annually by the Compliance Enforcement Authority that includes the Reliability Standards and Registered Entities to be audited, the schedule of Compliance Audits, and Compliance Audit Participant requirements for the calendar year.
- 1.1.3 Applicable Governmental Authority: The Federal Energy Regulatory Commission (“FERC”) within the United States and the appropriate governmental authority with subject matter jurisdiction over reliability in Canada and Mexico.
- 1.1.4 Complaint: An allegation that a Registered Entity violated a Reliability Standard.
- 1.1.5 Compliance Audit: A systematic, objective review and examination of records and activities to determine whether a Registered Entity meets the requirements of applicable Reliability Standards.
- 1.1.6 Compliance Audit Participants: Registered Entities scheduled to be audited and the audit team members.
- 1.1.7 Compliance Enforcement Authority: NERC or the Regional Entity in their respective roles of monitoring and enforcing compliance with the NERC Reliability Standards.
- 1.1.8 Compliance ~~Violation~~-Investigation: A comprehensive investigation, which may include an on-site visit with interviews of the appropriate personnel, to determine if a violation of a Reliability Standard has occurred.

Compliance Monitoring and Enforcement Program

~~1.1.9~~ 1.1.9 Confirmed Violation: An Alleged Violation for which an entity has: (1) accepted the finding of the violation by a Regional Entity or NERC and will not seek an appeal, or (2) completed the hearing and appeals process within NERC, or (3) allowed the time for requesting a hearing or submitting an appeal to NERC to expire, or (4) admitted to the violation in a settlement agreement.

1.1.10 End Date: The last date of the period to be covered in a Compliance Audit.

~~1.1.10~~ 1.1.11 Exception Reporting: Information provided to the Compliance Enforcement Authority by a Registered Entity indicating that a violation of a Reliability Standard has occurred (e.g., a system operating limit has been exceeded) or enabling the Compliance Enforcement Authority to ascertain the Registered Entity's compliance. ~~Some Reliability Standards require Exception Reporting.~~

1.1.12 ~~1.1.11~~ Mitigation Plan: An action plan ~~developed by a Registered Entity to (i) correct a violation of a Reliability Standard and (ii) prevent re-occurrence of the violation. A Mitigation Plan is~~ required when a Registered Entity violates a Reliability Standard as determined by any means including Compliance Enforcement Authority decision, ~~Settlement Agreement, or otherwise~~ settlement agreement, or otherwise, that is developed by the Registered Entity to (1) correct a violation of a Reliability Standard and (2) prevent re-occurrence of the violation.

~~1.1.12~~ ~~NERC Compliance Registry: A compilation of the Regional Compliance Registries from each Regional Entity plus the entities for which NERC serves as the Compliance Enforcement Authority.~~

1.1.13 NERC Compliance Registry: A list, maintained by NERC pursuant to Section 500 of the NERC Rules of Procedure and Appendix 5B, the NERC Statement of Compliance Registry Criteria, of the owners, operators and users of the Bulk Power System, and the entities registered as their designees, that perform one or more functions in support of reliability of the Bulk Power System and are required to comply with one or more requirements of Reliability Standards.

1.1.14 ~~1.1.13~~ NERC Compliance Monitoring and Enforcement Program Implementation Plan or NERC Implementation Plan: The annual NERC Compliance Monitoring and Enforcement Program Implementation Plan that specifies the Reliability Standards that are subject to reporting by Registered Entities to the Compliance Enforcement Authority in order to verify compliance and identifies the appropriate monitoring procedures and reporting schedules for each such Reliability Standard.

Compliance Monitoring and Enforcement Program

- 1.1.15 Notice of Alleged Violation: A notice issued by the Compliance Enforcement Authority to a Registered Entity pursuant to Section 5.3.
- 1.1.16 Notice of Completion of Enforcement Action: A notice issued by the Compliance Enforcement Authority to a Registered Entity, pursuant to Section 5.10, stating that an enforcement action is closed.
- 1.1.17 Notice of Confirmed Violation: A notice issued by the Compliance Enforcement Authority to a Registered Entity confirming the violation of one or more Reliability Standards, as a result of (1) the Registered Entity accepting a Notice of Alleged Violation and the proposed penalty or sanction, or (2) the finding of a violation through a hearing and appeal, or (3) the expiration of the period for requesting a hearing or an appeal, or (4) the Registered Entity admitting the violation as part of an executed settlement agreement.
- 1.1.18 Notice of Penalty: A notice prepared by NERC and filed with FERC, following approval by NERC of a Notice of Confirmed Violation or a settlement agreement, stating the penalty or sanction imposed or agreed to for the Confirmed Violation or as part of the settlement.
- 1.1.19 Notice of Possible Violation: A notice issued by the Compliance Enforcement Authority to a Registered Entity that (1) states a Possible Violation has been identified, (2) provides a brief description of the Possible Violation, including the Reliability Standard requirement(s) and the date(s) involved, and (3) instructs the Registered Entity to retain and preserve all data and records relating to the Possible Violation.
- 1.1.20 ~~1.1.14~~ Periodic Data Submittals: Modeling, studies, analyses, documents, procedures, methodologies, operating data, process information or other information to demonstrate compliance with Reliability Standards and provided by Registered Entities to the Compliance Enforcement Authority on a time frame required by a Reliability Standard or an ad hoc basis.
- ~~1.1.15~~ ~~Regional Compliance Registry: A list, pursuant to Section 500 of the NERC Rules of Procedure and the NERC Statement of Compliance Registry Criteria of the owners, operators or users of the bulk power system or the entities registered as their designees for the purpose of compliance within a Regional Entity's geographic footprint that perform one or more functions in support of reliability of the bulk power system. The Registry is used to determine the Reliability Standards applicable to the Registered Entity.~~
- 1.1.21 Possible Violation: The identification, by the Compliance Enforcement Authority, using one of the Compliance Monitoring and Enforcement Processes in Section 3.0, of a possible failure by a

Compliance Monitoring and Enforcement Program

Registered Entity to comply with a Reliability Standard that is applicable to the Registered Entity.

1.1.22 Preliminary Screen: An initial evaluation of evidence indicating potential noncompliance with a Reliability Standard has occurred or is occurring, conducted by the Compliance Enforcement Authority for the purpose of determining whether a Possible Violation exists, and consisting of an evaluation of whether (1) the entity allegedly involved in the potential noncompliance is registered, and (2) the Reliability Standard requirement to which the evidence of potential noncompliance relates is applicable to the entity and is enforceable.

1.1.23 ~~1.1.16~~ Regional Implementation Plan: An annual plan, submitted by November 1 of each year to NERC for approval that, in accordance with NERC Rule of Procedure Section 401.6 and the NERC Compliance Monitoring and Enforcement Program Implementation Plan, identifies (1) all Reliability Standards identified by NERC to be actively monitored during each year, (2) other Reliability Standards proposed for active monitoring by the Regional Entity, (3) the methods to be used by the Regional Entity for reporting, monitoring, evaluation, and assessment of performance criteria with each Reliability Standard, and (4) the Regional Entity's Annual Audit Plan.

1.1.24 ~~1.1.17~~ Registered Entity: An owner, operator, or user of the ~~bulk power system~~ Bulk Power System, or the ~~entities~~ entity registered as ~~their designees~~ its designee for the purpose of compliance, that is included in the NERC ~~and Regional~~ Compliance Registry.

1.1.25 ~~1.1.18~~ Remedial Action Directive: An action (other than a penalty or sanction) required by a Compliance Enforcement Authority that (1) is to bring a Registered Entity into compliance with a Reliability Standard or to avoid a Reliability Standard violation, and (2) is immediately necessary to protect the reliability of the ~~bulk power system~~ Bulk Power System from an imminent threat.

1.1.26 ~~1.1.19~~ Required Date: The date given a Registered Entity in a notice from the Compliance Enforcement Authority by which some action by the Registered Entity is required. ~~—Such date shall provide the Registered Entity a reasonable period of time in which to take the required action, given the circumstances and the action required.~~

1.1.27 ~~1.1.20~~ Self-Certification: Attestation by a Registered Entity of compliance or non-compliance with a Reliability ~~Standards~~ Standard for which Self-Certification is required by the Compliance Enforcement Authority and that ~~are~~ is included for monitoring in the Regional Implementation Plan.

1.1.28 ~~1.1.21~~ Self-Reporting: A report by a Registered Entity ~~of a violation~~ of stating (1) that the Registered Entity believes it has violated a

Compliance Monitoring and Enforcement Program

Reliability Standard, ~~based on its own assessment, in order to provide prompt reports of any Reliability Standard violation~~ and (2) the actions that ~~were~~have been taken or will be taken to resolve the violation.

1.1.29 ~~1.1.22~~ Spot Checking: A process in which the Compliance Enforcement Authority requests a Registered Entity to provide information (1) to support the Registered Entity's Self-Certification, Self-Reporting, or Periodic Data Submittal and to assess whether the Registered Entity complies with Reliability Standards. ~~Spot Checking may also be, or (2) as a random check, or initiated (3) in response to events, as described in the Reliability Standards; or by based on operating problems or system events. Spot Checking may require an on-site review to complete.~~

2.0 IDENTIFICATION OF ORGANIZATIONS RESPONSIBLE FOR COMPLYING WITH RELIABILITY STANDARDS

~~The Compliance Enforcement Authority~~NERC shall register the organizations responsible for complying with Reliability Standards, in accordance with Section 500 of the NERC Rules of Procedure. ~~The Compliance Enforcement Authority shall identify the and Appendix 5B, Statement of Compliance Registry Criteria. Organizations are responsible to register and to comply with Reliability Standards if they are owners, operators, and users of the bulk power system that meet the definition of Registered Entities within the Compliance Enforcement Authority's area of responsibility~~Bulk Power System, perform a function listed in the functional types identified in Section II of Appendix 5B, and are material to the reliable operation of the Bulk Power System as defined by the criteria and notes in Appendix 5B. Regional Entities shall (i) develop and provide to NERC information to assist NERC to register organizations responsible for complying with Reliability Standards, and (ii) in the event of a registration appeal to NERC or an Applicable Governmental Authority, provide information requested by NERC concerning how the Registered Entity meets the registration criteria or is otherwise material to the reliability of the Bulk Power System.

NERC shall notify organizations of their inclusion on the NERC Compliance Registry and shall maintain the NERC Compliance Registry on its web site. NERC shall inform each Registered Entity at the time of registration of the Reliability Standards that are applicable to reliability functions for which the Registered Entity is registered. Each Registered Entity shall inform the Compliance Enforcement Authority~~NERC or the applicable Regional Entity~~ promptly of changes to ~~its~~the Registered Entity's registration information. ~~The Compliance Enforcement Authority shall inform each Registered Entity at the time of registration of the Reliability Standards that are applicable to the Registered Entity. The Compliance Enforcement Authority shall maintain on its website a current listing of Reliability Standards that are applicable to all Registered Entities.~~NERC will provide FERC and Applicable Governmental Authorities monthly updates to the NERC Compliance Registry.

~~The Compliance Enforcement Authority~~NERC and each Regional Entity will designate a contact person(s) and require each Registered Entity to designate a contact person(s) responsible for sending and receiving all necessary information and communications concerning compliance matters. ~~The Compliance Enforcement Authority~~ NERC and the applicable Regional Entity

Compliance Monitoring and Enforcement Program

will designate where Registered Entities are to send information, data, Mitigation Plans, or any other compliance-related correspondence.

~~Each Regional Entity shall develop, maintain, and provide to NERC a Regional Compliance Registry with updates as changes occur to the registry. NERC shall maintain the NERC Compliance Registry on its web site. NERC will provide FERC and Applicable Governmental Authorities monthly updates to the NERC Compliance Registry.~~

NERC shall maintain on its website a current listing of Reliability Standards that are applicable to all Registered Entities.

As provided for herein, during the course of compliance monitoring and enforcement activities relating to U.S. entities, NERC may obtain information that it will provide to FERC and, if the information pertains to a Registered Entity or to a portion of the ~~bulk power system~~Bulk Power System over which another Applicable Governmental Authority has jurisdiction, to such other Applicable Governmental Authority. However, NERC will not provide non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to Applicable Governmental Authorities other than FERC without first obtaining permission from FERC for such disclosures and subject to such limitations as FERC may place on such disclosures. Similarly, during the course of compliance monitoring and enforcement activities relating to non-U.S. entities, NERC may obtain information that it will provide to the Applicable Governmental Authorities, including FERC, that have jurisdiction over the Registered Entity or the portion of the ~~bulk power system~~Bulk Power System to which the information pertains, but subject to any limitations placed on the disclosure of non-public, non-U.S. compliance information by the Applicable Governmental Authority with jurisdiction or by other law of the applicable jurisdiction. In any notice to, and request for permission to disclose compliance information from, FERC or another Applicable Governmental Authority pursuant to any provision of this Compliance Program, NERC will identify each Applicable Governmental Authority to which it proposes to disclose the information and the specific procedures that will be used for protecting from public disclosure any non-public compliance information that will be transferred to the other Applicable Governmental Authority or Authorities. The provisions of this paragraph do not apply to the provision by NERC to an Applicable Governmental Authority of information that is not directly related to a specific Registered Entity's compliance with a requirement of a Reliability Standard.

3.0 COMPLIANCE MONITORING AND ENFORCEMENT PROCESSES

The Compliance Enforcement Authority will monitor, assess, and enforce compliance with Reliability Standards using ~~eight (8)~~the compliance monitoring processes described in this Section 3.0 to collect information in order to make assessments of compliance: ~~(1) Compliance Audits, (2) Self-Certifications, (3) Spot-Checking, (4) Compliance Violation Investigations, (5) Self-Reporting, (6) Periodic Data Submittals, (7) Exception Reporting, and (8) Complaints.~~ These processes are described in Sections 3.1 through 3.8 below.

Compliance Monitoring and Enforcement Program

Enforcement actions taken by the Compliance Enforcement Authority through the Compliance Program may include the imposition of remedial actions, sanctions, and penalties, where applicable, which shall be based on the schedule of penalties and sanctions approved for implementation by FERC and other Applicable Governmental Authorities. The imposition and acceptance of sanctions and penalties shall not be considered an acceptable alternative to any Registered Entity's continuing obligation to comply with the Reliability Standards. Registered Entities found in violation of a Reliability Standard will be required to mitigate the violation regardless of any enforcement actions taken.

The Compliance Program requires timely data from Registered Entities to effectively monitor compliance with Reliability Standards. If data, information or other reports to determine compliance requested from a Registered Entity are not received by the Required Date, the Compliance Enforcement Authority may execute the steps described in **Attachment 1, Process for Non-submittal of Requested Data**.

Parties engaged in the process described in this section should consult with each other on the data and information that would be appropriate for effectively addressing this section's process requirements. If a party believes that a request for data or information is unreasonable, the party may request a written determination from the NERC compliance program officer.

Any report or other submission of information by a Registered Entity required by the Compliance Program shall be signed by an officer, employee, attorney or other authorized representative of the Registered Entity. Electronic signatures are permitted in accordance with processes established by NERC and the Regional Entity. NERC or the Compliance Enforcement Authority may require the signer to provide a statement of the basis of his or her authority to sign on behalf of the Registered Entity.

~~Figure 3.0 NERC Compliance Program Process depicts the overall process steps for the Compliance Program and each of the subsequent process diagrams are either inputs to the overall process or represent an expansion of a single process (e.g., hearing process) shown on this diagram.~~

~~1.1~~

3.1 Compliance Audits

All Registered Entities are subject to audit for compliance with all Reliability Standards applicable to the functions for which the Registered Entity is registered. Compliance Audits are conducted on the Registered Entity's site to the extent required by NERC Rule of Procedure 403.11.2. Compliance Audit processes for Compliance Audits conducted in the United States shall be based on professional auditing standards recognized in the U.S., including Generally Accepted Auditing Standards, Generally Accepted Government Auditing Standards and standards sanctioned by the Institute of Internal Auditors. Compliance Audit processes for Compliance Audits conducted outside the U.S. may be based on Canadian or other international standards. All Compliance Audits shall be conducted in accordance with audit guides established for the Reliability Standards included in the Compliance Audit, consistent with accepted auditing guidelines as approved by NERC. The audit guides will be posted on NERC's website.

Compliance Monitoring and Enforcement Program

3.1.1 Compliance Audit Process Steps

The process steps for a Compliance Audit are as follows ~~and as shown on Figure 3.1:~~¹

- The Compliance Enforcement Authority distributes the Annual Audit Plan (developed in coordination with NERC) to the Compliance Audit Participants and NERC. The Compliance Enforcement Authority provides additional information to the Compliance Audit Participants, including audit materials, coordinating agendas and changes to the audit schedule as required. Prior to the Compliance Audit, the Compliance Enforcement Authority informs the Registered Entity of the Reliability Standards to be evaluated. NERC or the Regional Entity provides the audit schedules to FERC and to any other Applicable Governmental Authority based upon the agreements in place with the other Applicable Governmental Authority.
- At least two (2) months prior to commencement of a regularly scheduled Compliance Audit, the Compliance Enforcement Authority notifies the Registered Entity of the Compliance Audit, identifies the audit team members and their recent employment history, and requests data, including a completed NERC pre-audit questionnaire. If the audit team members change from the time of the original notification, the Compliance Enforcement Authority will promptly notify the Registered Entity of the change and will allow time for the Registered Entity to object to the new audit team member(s) (see Section 3.1.5).
- The Registered Entity provides to the Compliance Enforcement Authority the required information in the format specified in the request.
- The audit team reviews the submitted information for conformance with the requirements of the Reliability Standards prior to performing the Compliance Audit. The audit team follows NERC audit guidelines in the implementation of the Compliance Audit. This shall include conducting an exit briefing with the Registered Entity, providing for a review of the audit report with the Registered Entity before it is finalized, and issuing an audit report, including an assessment of compliance with the Reliability Standards, to the Compliance Enforcement Authority.
- The Compliance Enforcement Authority reviews the report developed by the audit team and completes ~~an assessment of a~~ Preliminary Screen for any ~~Alleged~~ Possible Violations ~~with the of~~ Reliability Standards, based on the potential noncompliances with Reliability Standards (if any) identified in the report.
- ~~• The Compliance Enforcement Authority provides the final audit report to the Registered Entity and to NERC.~~
- If the Compliance Enforcement Authority concludes that ~~a reasonable basis exists for believing a violation~~ there is a Possible Violation of a Reliability Standard ~~has occurred~~, it shall send the Registered Entity a ~~notice containing the information set forth in Section~~

¹This process normally completes within sixty (60) days of the completion of the on-site Compliance Audit work at the Registered Entity's site.

Compliance Monitoring and Enforcement Program

~~5.1 and the process moves to step 3 (Notice of Alleged Violation) of the Compliance Program Process shown in Figure 3.0. [Notice of Possible Violation.](#)~~

- ~~• [Regional Entities will notify NERC of any Alleged Violations as required by Section 8.0. The Compliance Enforcement Authority provides the final audit report to the Registered Entity and to NERC.](#)~~

~~Figure 3.1—Compliance Audit Process~~

3.1.2 Compliance Enforcement Authority Annual Audit Plan and Schedule

The Compliance Enforcement Authority shall develop an Annual Audit Plan. The Annual Audit Plan of Regional Entities will be included in the Regional Implementation Plans submitted to NERC for review and approval (see Section 4.2). NERC or the Regional Entity provides the Annual Audit Plans to FERC and to any other Applicable Governmental Authority consistent with the agreements in place with the Applicable Governmental Authority.

Prior to January 1 of the year covered by the Annual Audit Plan, the Compliance Enforcement Authority shall notify Registered Entities subject to Compliance Audits during the upcoming year, of the audit schedules, methods, and data requirements for the audit. The Compliance Enforcement Authority will give due consideration to any schedule changes requested by Registered Entities to avoid unnecessary burdens.

Revisions and additions to a Regional Entity Annual Audit Plan shall be approved by NERC and the Registered Entity shall be notified in a timely manner (normally 60 days in advance) of changes or revisions to scheduled audit dates.

3.1.3 Frequency of Compliance Audits

The Compliance Enforcement Authority will perform comprehensive Compliance Audits as required by the NERC Rules of Procedure based on criteria established by NERC. Additionally, an unscheduled Compliance Audit of any Registered Entity (i) may be initiated at any time by the Compliance Enforcement Authority if reasonably determined to be necessary to ensure the Registered ~~Entities~~[Entity's](#) compliance with Reliability Standards, and (ii) shall be initiated by the Compliance Enforcement Authority or by NERC if directed by FERC. Prior to or on the same date it notifies the Registered Entity that an unscheduled Compliance Audit is being initiated, the Compliance Enforcement Authority shall notify NERC and FERC that an unscheduled Compliance Audit is being initiated. The Registered Entity shall receive at least ten (10) business days advance notice that an unscheduled Compliance Audit is being initiated, which notice shall include identification of the members of the Compliance Audit team. The Registered Entity shall make any objections to the composition of the Compliance Audit team, which shall be based on failure to meet the criteria specified in Section ~~3.1.5~~[3.1.5.2](#), at least five (5) business days prior to the start of on-site audit work for the unscheduled Compliance Audit.

3.1.4 Scope of Compliance Audits

[3.1.4.1 Reliability Standards](#)

Compliance Monitoring and Enforcement Program

A Compliance Audit ~~will~~shall include ~~all~~those Reliability Standards applicable to the Registered Entity ~~monitored~~that are identified in the NERC Implementation ~~Plans~~in Plan for the current ~~and three previous years~~year, and may include other Reliability Standards applicable to the Registered Entity. ~~If a Reliability Standard does not require retention of data for the full period of the Compliance Audit, the Compliance Audit will be applicable to the data retention period specified in the Reliability Standard~~ that are identified in the Regional Entity's Regional Implementation Plan for the current year. The Compliance Audit may include any other Reliability Standards that are applicable to the Registered Entity.

3.1.4.2 Period Covered

The Registered Entity's data and information should show compliance with the Reliability Standards that are the subject of the Compliance Audit for the period beginning with the day after the prior audit by the Compliance Enforcement Authority ended (or the later of June 18, 2007 or the Registered Entity's date of registration if the Registered Entity has not previously been subject to a Compliance Audit), and ending with the End Date for the Compliance Audit. However, if another Compliance Monitoring and Enforcement process has been conducted with respect to the Registered Entity subsequent to the date that would otherwise be the start of the period, the period covered by the Compliance Audit may, in the Regional Entity's discretion, begin with the completion of that Compliance Monitoring and Enforcement process for those Reliability Standards requirements that were the subject of the Compliance Monitoring and Enforcement process. The End Date will be stated in the Compliance Enforcement Authority's notification of the Compliance Audit issued to the Registered Entity pursuant to Section 3.1.1. The Registered Entity will be expected to demonstrate compliance for the entire period described above. However, if a Reliability Standard specifies a document retention period that does not cover the entire period described above, the Registered Entity will not be found in noncompliance solely on the basis of the lack of specific information that has rightfully not been retained based on the retention period specified in the Reliability Standard. However, in such cases, the Compliance Enforcement Authority will require the Registered Entity to demonstrate compliance through other means.

3.1.4.3 Mitigation Plans

The Compliance Audit will include a review of any Mitigation Plans which the Registered Entity has not yet completed, for the purpose of determining whether the Registered Entity is making adequate progress towards completion of the Mitigation Plan.

3.1.5 Conduct of Compliance Audits

3.1.5.1 Composition of Compliance Audit Teams

The audit team shall be comprised of staff ~~personnel~~and such other persons as are included in the audit team pursuant to Section 3.1.5.3, and may include contractors and industry ~~volunteers~~subject matter experts as determined by the Compliance Enforcement Authority to be appropriate to comprise a sufficient audit team. The audit team leader shall be a staff member from the Compliance Enforcement Authority and is responsible for the conduct of the Compliance Audit and preparation of the audit report. ~~At their discretion, NERC Compliance Staff may participate on any Regional Entity Compliance Audit~~

Compliance Monitoring and Enforcement Program

~~team either as an observer or as an audit team member as determined by the Regional Entity. Additionally, FERC and other regulatory bodies with regulatory authority for the Registered Entity may participate on the audit team for any Compliance Audit of a Registered Entity.~~

3.1.5.2 Requirements for Compliance Audit Team Members

Each audit team member must:

- Be free of conflicts of interests. For example, employees or contractors of the Registered Entity being audited shall not be allowed to participate as auditors in the Compliance Audit of the Registered Entity.
- Comply with the NERC Antitrust Compliance Guidelines and shall have either signed appropriate confidentiality agreements or acknowledgments that the confidentiality agreement signed by the Compliance Enforcement Authority is applicable.
- Successfully complete all NERC or NERC-approved Regional Entity auditor training applicable to the Compliance Audit. ~~As a transitional matter, for Compliance Audits conducted prior to January 1, 2008, at least a majority of audit team members must have successfully completed such training.~~
- ~~Prior to the Compliance Audit,~~ Provide copies of executed confidentiality agreements or acknowledgments ~~will~~to be provided to the Registered Entity prior to the audit.

3.1.5.3 Compliance Audit Observers or Other Participants

In any Regional Entity Compliance Audit of a Registered Entity: (i) NERC Staff (which may include contractors to NERC) may participate either as observers or as audit team members; (ii) members of the Regional Entity's Compliance staff, in addition to the audit team, may participate as observers; (iii) with the permission of the Regional Entity, compliance staff members of other Regional Entities may participate either as observers or as audit team members; (iv) representatives of FERC and of other Applicable Governmental Authorities may participate either as observers or as audit team members so long as the Registered Entity is subject to the Applicable Governmental Authority's reliability jurisdiction; and (v) at the request of the Registered Entity, the Regional Entity may allow representatives of other Registered Entities to attend the audit for educational purposes.

The Compliance Audit team leader or other staff of the Regional Entity conducting the Compliance Audit will communicate in advance with any observers or other attendees to ensure there are no undue disruptions to the audit, such as space limitations, no conflicts of interest, and no other considerations that in the judgment of the Compliance Audit team leader may be detrimental to the conduct and quality of the audit. If the Compliance Audit team leader identifies any such issues, he/she shall work with the proposed observers or attendees to facilitate observation in a less disruptive manner; or, alternatively, the Regional Entity Compliance staff will work with the proposed observers or attendees to schedule their participation in, observation of, or attendance at a different Compliance Audit in which such issues are not presented.

3.1.5.4 Registered Entity Objections to Compliance Audit Team

Compliance Monitoring and Enforcement Program

A Registered Entity subject to a Compliance Audit may object to any member of the audit team on grounds of a conflict of interest or the existence of other circumstances that could interfere with the team member's impartial performance of his or her duties. ~~Such~~Any such objections must be provided in writing to the Compliance Enforcement Authority no later than fifteen (15) days prior to the start of on-site audit work. This fifteen (15) day requirement shall not apply (i) where an audit team member has been appointed less than twenty (20) days prior to the start of on-site audit work, in which case the Registered Entity must provide any objections to the Compliance Enforcement Authority within five (5) business days after receiving notice of the appointment of the Compliance Audit team member; and (ii) in the case of an unscheduled Compliance Audit pursuant to Section 3.1.3, in which case the Registered Entity must provide any objections to the Compliance Enforcement Authority at least five (5) business days prior to the start of ~~start of~~ on-site audit work for the unscheduled Compliance Audit. The Compliance Enforcement Authority will make a final determination on whether the member will participate in the Compliance Audit of the Registered Entity. Nothing in this paragraph shall be read to limit the participation of NERC or FERC staff in the Compliance Audit.

3.1.6 Compliance Audit Reports

The audit team shall develop a draft audit report that shall include a description of the objective, scope, and methodology of the Compliance Audit; identify any ~~Alleged Violations of evidence of possible noncompliance with~~ Reliability Standards by the Registered Entity found by the audit team; identify any Mitigation Plans or Remedial Action Directives; which have been completed or pending in the year of the Compliance Audit; and identify the nature of any confidential information redacted. A separate document may be prepared that contains recommendations of the audit team. Any recommendations contained in that document will be considered non-binding. The draft report will be provided to the Registered Entity for comment.

The audit team will consider corrections based on comments of the Registered Entity and provide the final audit report to the Compliance Enforcement Authority who will review the report and assess compliance with the Reliability Standards and provide the Registered Entity with a copy of the final report. Regional Entities will provide the final report to NERC, which will in turn provide the report to FERC if the report pertains to a Registered Entity or to a portion of the ~~bulk power system~~ Bulk Power System over which FERC has jurisdiction and/or to another Applicable Governmental Authority if the report pertains to a Registered Entity or to a portion of the ~~bulk power system~~ Bulk Power System over which the other Applicable Governmental Authority has jurisdiction. Provided, that NERC will not disclose non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to Applicable Governmental Authorities other than FERC without first obtaining permission from FERC for such disclosure and subject to such limitations as FERC may place on such disclosure; and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission for such disclosure from the Applicable Governmental Authority with jurisdiction over the Registered Entity or the portion of the ~~bulk power system~~ Bulk Power System to which such non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction. The Registered Entity shall receive the final audit report at least five (5) business days prior to the release of the report to the public. Work papers and

Compliance Monitoring and Enforcement Program

other documentation associated with the audit shall be maintained by the Compliance Enforcement Authority in accordance with NERC requirements.

In the event the audit report identifies ~~Alleged~~any Possible Violations of one or more Reliability Standards, the final audit report, or pertinent part thereof identifying the ~~Alleged Violation(s) and any proposed penalty or sanction(s)~~Possible Violations, shall not be released to the public by NERC or the Compliance Enforcement Authority until (i) the Possible Violation is dismissed prior to becoming a Confirmed Violation, or (ii) NERC submits a ~~notice~~Notice of ~~penalty to FERC, or~~ (ii) ~~such Alleged Violation(s) have been admitted by~~Penalty to FERC or other Applicable Governmental Authority, or (iii) the Registered Entity ~~or resolved by~~admits to a violation or enters into a settlement agreement with the Compliance Enforcement Authority pursuant to ~~the provisions of~~ Section ~~5.0.5.6.~~

Information deemed by a Compliance Enforcement Authority or the Registered Entity as critical energy infrastructure information or confidential information (as defined in Section 1501 of the NERC Rules of Procedure) shall be redacted from any public reports.

3.2 Self-Certification

The Compliance Enforcement Authority may require Registered Entities to self-certify their compliance with Reliability Standards.

If a Self-Certification accurately identifies a violation of a Reliability Standard, an identification of the same violation in a subsequent Compliance Audit or Spot Check will not subject the Registered Entity to an escalated penalty as a result of the Compliance Audit process unless the severity of the violation is found to be greater than reported by the Registered Entity in the Self-Certification.

3.2.1 Self-Certification Process Steps

The process steps for the Self-Certification process are as follows ~~and as shown in Figure 3.2.1:~~²

- The Compliance Enforcement Authority posts and updates the reporting schedule and informs Registered Entities. The Compliance Enforcement Authority ensures that the appropriate Reliability Standards, compliance procedures, and required submittal forms for the Reliability Standards being evaluated are maintained and available electronically.
- The Compliance Enforcement Authority requests the Registered Entity to make a Self-Certification within the advance notice period specified by the Reliability Standard. If the Reliability Standard does not specify the advance notice period, this request will be issued in a timely manner (normally thirty (30) days advance notice).
- The Registered Entity provides the required information to the Compliance Enforcement Authority.

²If no ~~non-compliances~~Possible Violations are found, this process normally completes within sixty (60) days of the Compliance Enforcement Authority's receipt of data.

Compliance Monitoring and Enforcement Program

- The Compliance Enforcement Authority reviews information to determine compliance with the Reliability Standards and may request additional data and/or information if necessary.
- The Compliance Enforcement Authority completes the assessment of the Registered Entity for compliance with the Reliability Standard (and with the Registered Entity's Mitigation Plan, if applicable). If the Compliance Enforcement Authority concludes ~~that a reasonable basis exists for believing a violation, after completing a Preliminary Screen(s), that there is a Possible Violation~~ of a Reliability Standard ~~has occurred~~, it shall send the Registered Entity a ~~notice containing the information set forth in Section 5.1 and the process moves to step 3 (Notice of Alleged Violation) of the Compliance Program Process shown in Figure 3.0~~ Notice of Possible Violation.
- ~~Regional Entities will notify NERC of any Alleged Violations as required by Section 8.0.~~

Figure 3.2.1—Self Certification Process

3.3 Spot Checking

Spot Checking will be conducted by the Compliance Enforcement Authority. Spot Checking may be initiated by the Compliance Enforcement Authority at any time to verify or confirm Self-Certifications, Self Reporting, and Periodic Data Submittals. Spot Checking may also be random or may be initiated in response to events, as described in the Reliability Standards, or by to operating problems, or system events. The Compliance Enforcement Authority then reviews the information submitted to verify the Registered Entity's compliance with the Reliability Standard. Compliance auditors may be assigned to the Spot Checking process by the Compliance Enforcement Authority as necessary.

3.3.1 Spot Checking Process Steps

The process steps for Spot Checking are as follows ~~and as shown in Figure 3.3.1:~~³

- The Compliance Enforcement Authority notifies the Registered Entity that Spot Checking will be performed and the reason for the ~~spot check~~ Spot Checking within the advance notice period specified by the Reliability Standard. If the Reliability Standard does not specify ~~the~~ an advance notice period, any information submittal request made by the Compliance Enforcement Authority will allow at least twenty (20) days for the Registered Entity to submit the information ~~to be submitted~~ or make it available for review.
- The Compliance Enforcement Authority, during the advance notice period, notifies the Registered Entity of the names and employment histories of the persons who will be

³If no ~~alleged violations~~ Possible Violations are found, this process normally completes within ninety (90) days of the Compliance Enforcement Authority's receipt of data.

Compliance Monitoring and Enforcement Program

conducting the Spot Checking. The Registered Entity may object to inclusion of any individual on the Spot Checking team in accordance with Section ~~3.1.5.3.1.5.4~~. Any such objections must be submitted by the later of (i) five (5) business days before the information being requested by the Compliance Enforcement Authority is submitted and (ii) five (5) business days after the Registered Entity is notified of the persons on the Spot Checking team. Nothing in this step shall be read to limit the participation of NERC or FERC staff on the Spot Checking ~~Team~~team.

- The ~~spot-check~~Spot Checking may require submission of data, documentation, or possibly an on-site review.
- The Registered Entity provides the required information to the Compliance Enforcement Authority in the format specified in the request.
- The Compliance Enforcement Authority reviews the information to determine compliance with the Reliability Standards and may request ~~the~~ additional data and/or information if necessary for a complete assessment of compliance.
- The Compliance Enforcement Authority reviews its draft assessment of the Registered Entity's compliance with the Registered Entity and provides an opportunity for the Registered Entity to comment on the draft assessment.
- The Compliance Enforcement Authority completes and documents the assessment of the Registered Entity for compliance with the Reliability Standard and provides a report to the Registered Entity indicating the results of the ~~spot-check~~Spot Checking.
- If the Compliance Enforcement Authority concludes ~~that a reasonable basis exists for believing a violation, after completing a Preliminary Screen(s), that there is a Possible Violation~~ of a Reliability Standard ~~has occurred~~, it shall send the Registered Entity a ~~notice containing the information set forth in Section 5.1 and the process moves to step 3 (Notice of Alleged Violation) of the Compliance Program Process shown in Figure 3.0~~Notice of Possible Violation.
- ~~Regional Entities will notify NERC of any Alleged Violations as required by Section 8.0.~~

Figure 3.3.1 Spot Checking Process

~~1.1~~

3.4 Compliance ~~Violation~~ Investigations

A Compliance ~~Violation~~ Investigation may be initiated at any time by the Compliance Enforcement Authority or NERC in response to a system disturbance, Complaint, or possible violation of a Reliability Standard identified by any other means.

Compliance ~~Violation~~ Investigation and Enforcement Program

Compliance ~~Violation~~ Investigations will generally be led by the Regional Entity's staff. NERC reserves the right to assume the leadership of a Compliance ~~Violation~~ Investigation.⁴ The Regional Entity shall not be entitled to appeal NERC's decision to lead a Compliance ~~Violation~~ Investigation.

Compliance ~~Violation~~ Investigations are confidential, unless FERC directs that a Compliance ~~Violation~~ Investigation should be public or that certain information obtained in the Compliance ~~Violation~~ Investigation should be publicly disclosed. Confirmed Violations resulting from a Compliance ~~Violation~~ Investigation will be made public.

FERC or another Applicable Governmental Authority may initiate an investigation at any time in response to a system disturbance, Complaint, or possible violation of a Reliability Standard identified by any other means, or for any other purpose authorized by law. Investigations initiated by FERC or another Applicable Governmental Authority shall be governed by and conducted pursuant to the statutory authority and rules of the Applicable Governmental Authority and not the procedures set forth herein. If an Applicable Governmental Authority other than FERC initiates an investigation of a U.S.-related matter, NERC shall provide notice to FERC of the investigation prior to disclosure of any non-public U.S.-related compliance information regarding the matter to be investigated to the other Applicable Governmental Authority. NERC's notice to FERC shall identify the other Applicable Governmental Authority, shall describe the nature of the proposed disclosures to the other Applicable Governmental Authority, and shall state the procedures NERC will utilize in connection with the Compliance ~~Violation~~ Investigation to ensure compliance with the requirements of 18 C.F.R. §39.7(b)(4) concerning nondisclosure of violations and Alleged Violations. If FERC initiates an investigation of a non-U.S.-related matter, NERC shall provide notice of the investigation to the Applicable Governmental Authority having jurisdiction over the Registered Entity or the portion of the ~~bulk power system~~ Bulk Power System that is the subject of the investigation prior to disclosure to FERC of any non-public non-U.S.-related compliance information regarding the matter to be investigated. NERC's notice to the other Applicable Governmental Authority shall describe the nature of the proposed disclosures to FERC and shall state the procedures NERC will utilize in connection with the investigation to ensure compliance with regulations of the other Applicable Governmental Authority or other law of the applicable jurisdiction concerning disclosure of non-public compliance information.

3.4.1 Compliance ~~Violation~~ Investigation Process Steps

⁴Examples of situations in which NERC may decide to lead a Compliance ~~Violation~~ Investigation include: (i) to assure consistency in investigative processes, (ii) to coordinate Compliance ~~Violation~~ Investigations into matters that may cross Regional Entity boundaries, (iii) where the ~~possible violation~~ potential noncompliance is related to the Regional Entity or one of its affiliates, divisions, committees or subordinate structures, or (iv) where the Regional Entity determines it cannot conduct the Compliance ~~Violation~~ Investigation.

Compliance Monitoring and Enforcement Program

The process steps for a Compliance ~~Violation~~ Investigation are as follows ~~and as shown in Figure 3.4.1:~~⁵

- The Compliance Enforcement Authority is notified or becomes aware of circumstances indicating a ~~possible violation of a~~ Reliability Standard may have been or is being violated and determines whether a Compliance ~~Violation~~ Investigation is warranted. Within two (2) business days of the decision to initiate a Compliance ~~Violation~~ Investigation, the Compliance Enforcement Authority: (i) notifies the Registered Entity of the initiation and initial scope of the Compliance ~~Violation~~ Investigation, the requirements to preserve all records and information relevant to the Compliance ~~Violation~~ Investigation and, where appropriate, the reasons for the Compliance ~~Violation~~ Investigation, and (ii) notifies NERC of the initiation of and the reasons for the Compliance ~~Violation~~ Investigation. While the Compliance Enforcement Authority may, at its discretion, notify the Registered Entity of the reasons for its Compliance ~~Violation~~ Investigation, the Compliance ~~Violation~~ Investigation, as it unfolds, need not be limited to this scope.
- NERC assigns a NERC staff member to the Compliance ~~Violation~~ Investigation and to serve as a single point of contact for communications with NERC. Within two (2) business days after NERC is notified of the decision to initiate a Compliance ~~Violation~~ Investigation, NERC will notify each Applicable Governmental Authority having jurisdiction over a Registered Entity or a portion of the ~~bulk power system~~ Bulk Power System to which the Compliance ~~Violation~~ Investigation relates. Provided, that NERC will not disclose non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to an Applicable Governmental Authority other than FERC without first obtaining permission from FERC for such disclosure and subject to any limitations placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or portion of the ~~bulk power system~~ Bulk Power System to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction.
- The Compliance Enforcement Authority requests data or documentation and provides a list of individuals on the Compliance ~~Violation~~ Investigation team and their recent employment history. The Registered Entity may object to any individual on the Compliance ~~Violation~~ Investigation team in accordance with Section ~~3.1.53.1.5.4~~; however, the Registered Entity may not object to participation by NERC, by FERC staff or by staff of another Applicable Governmental Authority on the Compliance ~~Violation~~ Investigation team. If the Reliability Standard does not specify the advance notice period, a request is normally issued with no less than twenty (20) days advance notice.
- Within ten (10) business days of receiving the notification of a Compliance ~~Violation~~ Investigation, a Registered Entity subject to a Compliance ~~Violation~~ Investigation may

⁵If no ~~alleged violation~~ Possible Violation(s) are found, this process normally completes within sixty (60) days following the decision to initiate a Compliance ~~Violation~~ Investigation.

Compliance Monitoring and Enforcement Program

object to any member of the Compliance ~~Violation~~ Investigation team on grounds of a conflict of interest or the existence of other circumstances that could interfere with the team member's impartial performance of his or her duties. Such objections must be provided in writing to the Compliance Enforcement Authority within such ten (10) business day period. The Compliance Enforcement Authority will make a final determination as to whether the individual will participate in the Compliance ~~Violation~~ Investigation of the Registered Entity.

- ~~• If necessary, the Compliance ~~Violation~~ Investigation may include an on-site visit with interviews of the appropriate personnel and review of data.~~
- The Registered Entity provides the required information to the Compliance Enforcement Authority in the format as specified in the request.
- If necessary, the Compliance Investigation may include an on-site visit with interviews of the appropriate personnel and review of data.
- In conducting the Compliance Investigation, the Compliance Enforcement Authority may require the Registered Entity to (i) provide a verification under oath by an officer, employee, attorney or other authorized representative of the Registered Entity attesting to the accuracy, completeness and truth of the Registered Entity's responses to the Compliance Enforcement Authority's requests for information; and (ii) produce one or more officers, employees or other authorized representatives of the Registered Entity who are familiar with the matter(s) that are the subject of the Compliance Investigation, to be interviewed or to provide testimony under oath concerning such matters. The Compliance Enforcement Authority shall determine in each case (i) whether representatives of the Registered Entity shall be allowed to be present when an interview is taking place or testimony is being taken, and (ii) whether, and by what method, the interview or testimony shall be recorded; provided, that counsel for the person being interviewed or giving testimony may be present when the interview is being conducted or testimony is being taken (regardless of whether such counsel also represents the Registered Entity).
- The Compliance Enforcement Authority reviews information to determine compliance with the Reliability Standards. The Compliance Enforcement Authority may request additional data and/or information if necessary for a complete assessment or to demonstrate compliance.
- ~~• The Compliance Enforcement Authority may require the Registered Entity (i) to provide a verification under oath by an officer, employee, attorney or other authorized representative of the Registered Entity attesting to the accuracy, completeness and truth of the Registered Entity's responses to the Compliance Enforcement Authority's requests for documents and information; and (ii) to produce one or more officers, employees or other authorized representatives of the Registered Entity who are familiar with the subject matter of the Compliance Violation Investigation to provide testimony under oath concerning the matters under investigation.~~

Compliance Monitoring and Enforcement Program

- The Compliance Enforcement Authority completes the assessment of compliance with the Reliability Standard and/or approval of the applicable Mitigation Plan, writes and distributes the report, and notifies the Registered Entity.
- If the Compliance Enforcement Authority concludes ~~that a reasonable basis exists for believing a violation, at any time during the Compliance Investigation, and after completing a Preliminary Screen(s), that there is a Possible Violation~~ of a Reliability Standard ~~has occurred~~, it shall send the Registered Entity a ~~notice containing the information set forth in Section 5.1 and the process moves to step 3 (Notice of Alleged Violation) of the Compliance Program Process shown in Figure 3.0~~Notice of Possible Violation.
- ~~Regional Entities will notify NERC of any Alleged Violations as required by Section 8.0.~~
- If the Compliance Enforcement Authority determines that no violation occurred, it shall send the Registered Entity and NERC a notice that the Compliance ~~Violation~~ Investigation has been completed. NERC will in turn notify FERC and, if the Compliance ~~Violation~~ Investigation pertained to a Registered Entity or to a portion of the ~~bulk power system~~Bulk Power System over which another Applicable Governmental Authority has jurisdiction, will also notify such other Applicable Governmental Authority. Provided, however, that NERC will not disclose non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to Applicable Governmental Authorities other than FERC without first obtaining permission from FERC for such disclosure and subject to any limitations placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or portion of the ~~bulk power system~~Bulk Power System to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction.

~~Figure 3.4.1—Compliance Violation Investigation Process~~

~~1.1~~

3.5 Self-Reporting

Self-Reporting is encouraged at the time a Registered Entity becomes aware (i) of a violation of a Reliability Standard, or (ii) a change in the violation severity level of a previously reported violation. Self-Reporting of a violation of a Reliability Standard is encouraged regardless of whether the Reliability Standard requires reporting on a pre-defined schedule in the Compliance Program and the violation is determined outside the pre-defined reporting schedule.

3.5.1 Self-Reporting Process Steps

The process steps for Self-Reporting are as follows ~~and as shown in Figure 3.5.1~~.⁶

⁶This process normally completes within sixty (60) days following the Compliance Enforcement Authority's receipt of data.

Compliance Monitoring and Enforcement Program

- The Compliance Enforcement Authority posts the Self-Reporting submittal forms and ensures they are maintained and available on its Web site.
- The Registered Entity provides the Self-Reporting information to the Compliance Enforcement Authority.
- The Compliance Enforcement Authority reviews the information to determine compliance with the Reliability Standards and may request the Registered Entity to provide clarification or additional data and/or information.
- The Compliance Enforcement Authority completes the assessment of the Registered Entity for compliance with the Reliability Standards and any Mitigation Plan, if applicable, and notifies the Registered Entity.
- If the Compliance Enforcement Authority concludes ~~that a reasonable basis exists for believing a violation, after conducting a Preliminary Screen(s), that there is a Possible Violation~~ of a Reliability Standard ~~has occurred~~, it shall send the Registered Entity a ~~notice containing the information set forth in Section 5.1 and the process moves to step 3, Notice of Alleged Violation, of the Compliance Program Process shown in Figure 3.0.~~ Notice of Possible Violation.
- ~~Regional Entities notify NERC of any Alleged Violations as required by Section 8.0.~~

~~Figure 3.5.1—Self Reporting Process~~

~~1.1~~

3.6 Periodic Data Submittals

The Compliance Enforcement Authority requires Periodic Data Submittals in accordance with the schedule stated in the applicable Reliability Standard, established by the Compliance Enforcement Authority, or on an as-needed basis. Requests for data submittals will be issued by the Compliance Enforcement Authority to Registered Entities with at least the minimum advance notice period specified by the applicable Reliability Standard. If the Reliability Standard does not specify an advance notice period, the request will normally be issued with no less than twenty (20) days advance notice.

3.6.1 Periodic Data Submittals Process Steps

The process steps for Periodic Data Submittal are as follows ~~and as shown in Figure 3.6.1:~~⁷

- The Compliance Enforcement Authority posts the current data reporting schedule on its web site and keeps Registered Entities informed of changes and/or updates. The Compliance Enforcement Authority ensures that the appropriate Reliability Standard compliance procedures and the required submittal forms for the Reliability Standards being evaluated are maintained and available via its web site.

⁷If no ~~violation~~ Possible Violation(s) are found, this process generally completes within ten (10) business days of the Compliance Enforcement Authority's receipt of data.

Compliance Monitoring and Enforcement Program

- The Compliance Enforcement Authority makes a request for a Periodic Data Submittal.
- The Registered Entity provides the required information to the Compliance Enforcement Authority in the format as specified in the request.
- The Compliance Enforcement Authority reviews the data submittal to determine compliance with the Reliability Standards and may request additional data and/or information for a complete assessment or to demonstrate compliance.
- ~~The~~If the Compliance Enforcement Authority ~~reviews its draft's~~ assessment of the Registered Entity's compliance ~~with the Registered Entity and~~indicates there may be a Possible Violation, the Compliance Enforcement Authority provides an opportunity for the Registered Entity to comment on the assessment before it is finalized.
- ~~• The Compliance Enforcement Authority completes the assessment of the Registered Entity for compliance with the Reliability Standard and notifies the Registered Entity.~~
- If the Compliance Enforcement Authority concludes ~~that a reasonable basis exists for believing a violation, after conducting a Preliminary Screen(s), that there is a Possible Violation~~ of a Reliability Standard ~~has occurred~~, it shall send the Registered Entity a ~~notice containing the information set forth in Section 5.1 and the process moves to step 3 (Notice of Alleged~~Notice of Possible Violation) ~~of the Compliance Program Process shown in Figure 3.0.~~
- ~~• Regional Entities notify NERC of any Alleged Violations as required by Section 8.0.~~

~~Figure 3.6.1—Data Submittal Process~~

~~1.1~~

3.7 Exception Reporting

Some Reliability Standards require reporting of exceptions to compliance with the Reliability Standard as a form of compliance monitoring. The Compliance Enforcement Authority shall require Registered Entities to provide reports identifying any exceptions to the extent required by any Reliability Standard.

The Compliance Enforcement Authority shall also require Registered Entities to confirm the number of exceptions that have occurred in a given time period identified by NERC, even if the number of exceptions is zero.

3.8 Complaints

Either NERC or Regional Entities may receive Complaints alleging violations of a Reliability Standard. A Regional Entity will conduct a review of each Complaint it receives to determine if the Complaint provides sufficient basis for ~~a~~ initiating another Compliance ~~Violation Investigation~~Monitoring and Enforcement process, except that NERC will review any Complaint (1) that is related to a Regional Entity or its affiliates, divisions, committees or subordinate structures, (2) where the Regional Entity determines it cannot conduct the review, or (3) if the

Compliance Monitoring and Enforcement Program

complainant wishes to remain anonymous or specifically requests NERC to conduct the review of the Complaint.

If the Complaint is submitted to NERC, NERC will forward the information to the Regional Entity, as appropriate.

All anonymous Complaints will be reviewed and any resulting Compliance ~~Violation Investigations~~Monitoring and Enforcement processes conducted by NERC will be conducted in accordance with Section 3.8.2 to prevent disclosure of the identity of the complainant.

The Compliance Enforcement Authority conducting the review will determine if the Complaint may be closed as a result of the initial review and assessment of the Complaint to determine if it provides sufficient basis for ~~a~~initiating another Compliance ~~Violation Investigation~~Monitoring and Enforcement process. The Regional Entity will report the results of its review of the Complaint to NERC. If, as a result of the initial review of the Complaint, the Compliance Enforcement Authority determines that ~~a~~initiating another Compliance ~~Violation Investigation~~Monitoring and Enforcement process is warranted, ~~at that~~ Compliance ~~Violation Investigation~~Monitoring and Enforcement process will be conducted in accordance with the applicable provisions of Section ~~3.4.3.0~~.

3.8.1 Complaint Process Steps

The detailed process steps for the Complaint process are as follows ~~and as shown in Figure 3.8.1~~.⁸

- The complainant notifies NERC or a Regional Entity using the NERC compliance hotline, submitting a NERC Complaint reporting form, or by other means. A link to the Complaint reporting form will be posted on the NERC and Regional Entity Web sites. The Complaint should include sufficient information to enable NERC or the Regional Entity to make an assessment of whether the initiation of ~~a~~another Compliance ~~Violation Investigation~~Monitoring and Enforcement process is warranted. NERC or the Regional Entity may not act on a Complaint if the Complaint is incomplete and does not include sufficient information.
- If the Compliance Enforcement Authority determines that ~~a~~initiation of another Compliance ~~Violation Investigation~~Monitoring and Enforcement process is warranted, it initiates the Compliance ~~Violation Investigation~~Monitoring and Enforcement process in accordance with the applicable provisions of Section ~~3.4.3.0~~; otherwise it takes no further action. The Compliance Enforcement Authority notifies the complainant, the Registered Entity, and NERC of the initiation of the Compliance ~~Violation Investigation~~Monitoring and Enforcement process. If the Compliance Enforcement Authority determines that ~~a~~initiation of another Compliance ~~Violation Investigation~~Monitoring and Enforcement process is not warranted, it will notify the complainant, NERC, and the Registered Entity that no further action will be taken.

⁸If no ~~violations~~Possible Violations are found, this process normally completes within sixty (60) days following receipt of the Complaint.

Compliance Monitoring and Enforcement Program

- The Compliance Enforcement Authority fully documents the Complaint and the Complaint review, whether ~~a~~another Compliance ~~Violation Investigation~~Monitoring and Enforcement process is initiated or not.

~~Figure 3.8.1—Complaint Process~~

~~1.1.1—~~

3.8.2 Anonymous Complainant Notification Procedure

An anonymous complainant who believes, or has information indicating, there has been a violation of a Reliability Standard, can report the ~~possible violation~~information and request that the complainant's identity not be disclosed.⁹ All Complaints lodged by a person or entity requesting that the complainant's identity not be disclosed shall be investigated by NERC following the procedural steps described in Section 3.8.1. Anonymous Complaints received by a Regional Entity will either be directed to NERC or the Regional Entity will collect and forward the information to NERC, at the Regional Entity's discretion. Neither NERC nor the Regional Entity shall disclose the identity of any person or entity reporting ~~possible~~information indicating violations of Reliability Standards to NERC or to a Regional Entity that requests that his/her/its identity not be revealed. The identity of the complainant will only be known by NERC and in the case where a Regional Entity collects the information, by NERC and the Regional Entity. If the Compliance Enforcement Authority determines that ~~a~~initiation of another Compliance ~~Violation Investigation~~Monitoring and Enforcement process is not warranted, it will notify the complainant, NERC, and the Registered Entity that no further action will be taken.

4.0 ANNUAL IMPLEMENTATION PLANS

4.1 NERC Compliance Monitoring and Enforcement Program Implementation Plan

NERC will maintain and update the NERC Implementation Plan, to be carried out by Compliance Enforcement Authorities in the performance of their responsibilities and duties in implementing the NERC Compliance Monitoring and Enforcement Program. The NERC Implementation Plan will be provided to the Regional Entities by October 1 of each year and will specify the Reliability Standards requiring reporting by Registered Entities to the Compliance Enforcement Authority to provide verification of compliance through one of the monitoring methods described in this Compliance Plan document. The NERC Implementation Plan will be posted on the NERC web site.

4.2 Regional Entity Implementation Plan

By November 1 of each year, Regional Entities will submit a Regional Implementation Plan for the following calendar year to NERC for approval. The Regional Implementation Plan and the Regional Entity's other relevant Compliance Program documents shall be posted on the Regional Entity's Web site.

⁹NERC has established a Compliance Hotline that may be used for the submission of Complaints by persons or entities that do not want his/her/its identity disclosed (see www.nerc.com for additional information).

Compliance Monitoring and Enforcement Program

5.0 ENFORCEMENT ACTIONS

The Compliance Enforcement Authority shall determine (i) whether there have been violations of Reliability Standards by Registered Entities within the Compliance Enforcement Authority's area of responsibility, and (ii) if so, the appropriate remedial actions, and penalties and sanctions, as prescribed in the NERC *Sanction Guidelines* (Appendix 4B to the NERC Rules of Procedure). NERC will work to achieve consistency in the application of the *Sanction Guidelines* by Regional Entities by direct oversight and review of penalties and sanctions, and each Regional Entity shall provide to NERC such information as is requested by NERC concerning any penalty, sanction, or remedial actions imposed by the Regional Entity.

Parties engaged in the process described in this section should consult with each other on the data and information that would be appropriate for effectively addressing this section's process requirements. If a party believes that a request for data or information is unreasonable, the party may request a written determination from the NERC director of enforcement compliance program officer.

The following enforcement process is undertaken by the Compliance Enforcement Authority following identification, through one of the Compliance Monitoring and Enforcement processes set forth in Section 3.0, of evidence of noncompliance with a Reliability Standard by a Registered Entity.

5.1 Preliminary Screen

If the Compliance Enforcement Authority identifies or obtains evidence of potential noncompliance with a Reliability Standard, the Compliance Enforcement Authority shall perform a Preliminary Screen to determine whether there is a Possible Violation. A Preliminary Screen shall be limited to determining whether:

- (i) the entity allegedly involved in the potential noncompliance is a Registered Entity; and
- (ii) the Reliability Standard requirement to which the evidence of potential noncompliance relates is applicable to the entity, and is enforceable.

The Compliance Enforcement Authority shall maintain records of all Preliminary Screens.

If a Preliminary Screen results in an affirmative determination with respect to the above criteria, a Possible Violation exists. The Compliance Enforcement Authority shall issue a Notice of Possible Violation to the Registered Entity. The Notice of Possible Violation shall:

- (i) state that a Possible Violation by the Registered Entity has been identified;
- (ii) provide a brief description of the Possible Violation, including the Reliability Standard requirement(s) and date(s) involved; and
- (iii) instruct the Registered Entity to retain and preserve all data and records relating to the Possible Violation.

Compliance Monitoring and Enforcement Program

Upon issuing a Notice of Possible Violation, the Compliance Enforcement Authority enters the Possible Violation into the NERC compliance reporting and tracking system. NERC reports the Possible Violation to the NERC Board of Trustees Compliance Committee and submits a Notice of Possible Violation, on a confidential basis, to FERC.

5.2 Assessment of Possible Violation

After issuing a Notice of Possible Violation, the Compliance Enforcement Authority shall conduct an assessment of the facts and circumstances surrounding the Possible Violation to determine whether evidence exists to indicate the Registered Entity has violated the Reliability Standard requirement(s) identified in the Notice of Possible Violation, or whether the Possible Violation should be dismissed. The Compliance Enforcement Authority may consider any additional information to demonstrate that the Possible Violation should be dismissed or modified.

5.3 ~~5.1~~ Notification to Registered Entity of Alleged Violation

If the Compliance Enforcement Authority ~~alleges that~~determines, based on an assessment of the facts and circumstances surrounding a Possible Violation, that evidence exists to indicate a Registered Entity has violated a Reliability Standard, and the Compliance Enforcement Authority and the Registered Entity have not entered into settlement negotiations pursuant to Section 5.6, the Compliance Enforcement Authority shall ~~provide written notice~~issue a Notice of Alleged Violation ~~and sanction~~ (signed by an officer or designee of the Compliance Enforcement Authority) to the Registered Entity (CEO or equivalent and compliance contact) and ~~NERC. The Compliance Enforcement Authority may also issue an initial notice of Alleged Violation, without specifying the proposed penalty or sanction, to the Registered Entity. The notice of Alleged Violation and sanction shall contain~~shall enter the Alleged Violation into the NERC compliance reporting and tracking system. The Notice of Alleged Violation shall state, at a minimum:

- (i) the Reliability Standard and requirement(s) thereof the Registered Entity has allegedly violated,
- (ii) the date and time the Alleged Violation occurred (or is occurring),
- (iii) the facts the Compliance Enforcement Authority believes demonstrate or constitute the Alleged Violation,
- (iv) the proposed penalty or sanction, if any, determined by the Compliance Enforcement Authority to be applicable to the Alleged Violation in accordance with the NERC *Sanction Guidelines*, including an explanation of the basis on which the particular penalty or sanction was determined to be applicable,
- (v) notice that the Registered Entity shall, within thirty (30) days, elect one of the following options or the Compliance Enforcement Authority will deem the Registered Entity to have accepted the determination of violation and proposed penalty or sanction:
 1. agree with the Alleged Violation and proposed penalty or sanction, and agree to submit and implement a Mitigation Plan to correct the violation and its

Compliance Monitoring and Enforcement Program

underlying causes, and may provide a response in accordance with Section ~~5.2, 5.4~~, or

2. agree ~~to~~with the Alleged Violation and agree to submit and implement a Mitigation Plan to eliminate the violation and its underlying causes, but contest the proposed penalty or sanction, and may provide a response in accordance with Section ~~5.2, 5.4~~, or
3. contest both the Alleged Violation and proposed penalty or sanction,
 - (vi) notice that the Registered Entity may elect to submit a Mitigation Plan while contesting the Alleged Violation and/or the proposed penalty or sanction, and that submission of a Mitigation Plan will not waive the Registered Entity's right to contest the Alleged Violation and/or the proposed penalty or sanction;
 - (vii) notice that if the Registered Entity elects to contest the Alleged Violation and/or the proposed penalty or sanction, the Registered Entity may elect to have a hearing conducted pursuant to either (i) the short-form procedure in Section 1.3.2, or (ii) the full hearing procedure, in **Attachment 2, Hearing Procedures**, and
 - (viii) required procedures to submit the Registered Entity's Mitigation Plan.

NERC shall forward a copy of the ~~notice~~Notice of Alleged Violation to FERC and, if the Alleged Violation pertains to a Registered Entity or to a portion of the ~~bulk-power system~~Bulk Power System over which another Applicable Governmental Authority has jurisdiction, to such other Applicable Governmental Authority, within two (2) business days of receipt from the Compliance Enforcement Authority, provided, that NERC will not disclose non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to Applicable Governmental Authorities other than FERC without first obtaining permission from FERC for such disclosure and subject to any limitations placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or portion of the ~~bulk-power system~~Bulk Power System to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction.

Upon acceptance by the Registered Entity of the Alleged Violation and proposed penalty or sanction, the ~~notice of the penalty or sanction~~Notice of Confirmed Violation or other enforcement action will then be processed and issued to the Registered Entity.

5.4 ~~5.2~~ Registered Entity Response

If the Registered Entity does not contest or does not respond to the ~~notice~~Notice of Alleged Violation within thirty (30) days, it shall be deemed to have accepted the Compliance Enforcement Authority's determination of violation and penalty or sanction ~~(if applicable)~~, in which case the Compliance Enforcement Authority shall issue a Notice of Confirmed Violation to the Registered Entity and ~~NERC a final report of Confirmed Violation. A~~ shall enter the Confirmed Violation into the NERC compliance reporting and tracking system. At the time of

Compliance Monitoring and Enforcement Program

issuing the Notice of Confirmed Violation to the Registered Entity, the Regional Entity shall also provide notice to the Registered Entity that it may provide a written explanatory statement to accompany the ~~final report~~ Notice of Confirmed Violation. The Registered Entity's statement must include the name, title, and signature of an officer, employee, attorney or other authorized representative of the Registered Entity.

If the Registered Entity contests the Alleged Violation or the proposed penalty or sanction, the Registered Entity shall submit to the Compliance Enforcement Authority a response explaining its position, signed by an officer, employee, attorney or other authorized representative together with any supporting information and documents. The Compliance Enforcement Authority shall schedule a conference with the Registered Entity within ten (10) business days after receipt of the response. If the Compliance Enforcement Authority and the Registered Entity are unable to resolve all issues within forty (40) days after the Registered Entity's response, the Registered Entity may request a hearing. The Compliance Enforcement Authority and the Registered Entity may agree in writing to extend the forty (40) day period. If no hearing request is made prior to the end of the forty (40) day period, the violation will be become a Confirmed Violation ~~when filed by NERC with FERC or other Applicable Governmental Authority,~~ in which case the Compliance Enforcement Authority shall issue a Notice of Confirmed Violation to the Registered Entity and to NERC.

If a hearing is requested the Compliance Enforcement Authority shall initiate the hearing process by convening a hearing body and issuing a written notice of hearing to the Registered Entity and the hearing body and identifying the Compliance Enforcement Authority's designated hearing representative.¹⁰

5.5 ~~5.3~~ Hearing Process for Compliance Hearings

The Compliance Enforcement Authority hearing process is set forth in **Attachment 2**.

5.6 ~~5.4~~ Settlement Process

~~Settlement~~ The Registered Entity can request settlement negotiations ~~may occur~~ at any time, including prior to the issuance of a ~~notice of Alleged Violation and sanction until a notice of penalty is filed with FERC or another Applicable Governmental Authority~~ Notice of Alleged Violation; however, the Compliance Enforcement Authority may decline to engage in or continue settlement negotiations after a Possible Violation or Alleged Violation becomes a Confirmed Violation in accordance with Section 5.4. NERC shall be notified of all settlement negotiations and may participate in any settlement negotiations. All settlement negotiations will be confidential until such time as the settlement is approved by NERC. For all settlement discussions, the Compliance Enforcement Authority shall require the Registered Entity to designate an individual(s) authorized to negotiate on its behalf.

The Compliance Enforcement Authority may consider all relevant facts in settlement negotiations. A settlement agreement must ensure that the reliability of the Bulk Power System

¹⁰If the dispute involves a proposed Mitigation Plan, which has not been accepted by the Compliance Enforcement Authority, the Registered Entity may file a request for hearing with the Compliance Enforcement Authority.

Compliance Monitoring and Enforcement Program

will not be compromised by the settlement and that a violation of a Reliability Standard will not occur as a result of the settlement. All settlement agreements must ~~conform to the requirements of NERC Rule of Procedure 403.19 and, if approved, must provide~~provide, if the settlement is approved, for waiver of the Registered Entity's right to further hearings and appeal.

The Compliance Enforcement Authority will issue a letter setting forth the final settlement terms including all penalties, sanctions and mitigation requirements provided for in the final settlement.

The Regional Entity shall report the terms of all settlements of compliance matters to NERC. NERC will review the settlement for the purpose of evaluating its consistency with other settlements entered into for similar violations or under other, similar circumstances. The Registered Entity may submit an explanatory statement, conforming to the requirements of Section 5.4, to be included in the settlement agreement and which shall be subject to consent of the Compliance Enforcement Authority as part of the settlement agreement. The settlement agreement may state that the Registered Entity (i) admits the Alleged Violation, or (ii) does not contest the Alleged Violation, or (iii) neither admits nor denies the Alleged Violation, but may not state that the Registered Entity denies the Alleged Violation. Based on this review, NERC will either approve the settlement or reject the settlement and notify the Regional Entity and the Registered Entity of any changes to the settlement that would result in approval. If NERC rejects the settlement, the Regional Entity will attempt to negotiate a revised settlement agreement with the Registered Entity including any changes to the settlement specified by NERC.

NERC will report the approved settlement of the violation to FERC and, if the settlement relates to a Registered Entity or to a portion of the ~~bulk power system~~Bulk Power System over which another Applicable Governmental Authority has jurisdiction, to such other Applicable Governmental Authority, provided, that NERC will not disclose non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to Applicable Governmental Authorities other than FERC without first obtaining permission from FERC for such disclosure and subject to any limitations placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or portion of the ~~bulk power system~~Bulk Power System to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction. NERC will also publicly post the violation settled (regardless of whether the settlement includes or does not include an admission of a violation) and the resulting penalty or sanction provided for in the settlement. This posting shall include a copy of the settlement or a description of the terms of the settlement, and a copy of any Mitigation Plan that is agreed to as part of the settlement. The Compliance Enforcement Authority will issue a letter setting forth the final settlement terms including all penalties, sanctions and mitigation requirements provided for in the final settlement. Postings of Notices of Confirmed Violations are addressed in Section 8.0.

5.7 ~~5.5~~ NERC Appeal Process

Compliance Monitoring and Enforcement Program

The Registered Entity may appeal the hearing body's decision to NERC, as provided for in NERC Rules of Procedure, ~~Sections 407.3 and 410. The steps for the NERC appeals process are as shown in Figure 5.5: Section 409.~~¹¹

On appeal, NERC shall either affirm the Regional Entity decision or remand to the Regional Entity with reasons for its remand, which may include a direction to the Regional Entity to revise the decision. If NERC affirms the Regional Entity decision, the Regional Entity shall issue a Notice of Confirmed Violation to the Registered Entity. If NERC directs the Regional Entity to revise its decision, the Registered Entity that was the subject of the decision or the Compliance Staff of the Regional Entity whose interests are adversely affected by the directed revision may reopen the proceeding on any issue whose resolution is affected by NERC's directive, irrespective of whether the issue was previously litigated, settled or unopposed.

Figure 5.5—NERC Appeal Process

5.8 Approval of a Notice of Confirmed Violation

A Notice of Confirmed Violation issued to a Registered Entity pursuant to Sections 5.4 or 5.7 shall include a detailed record of the enforcement action, including the facts and circumstances analyzed and the information on which the Compliance Enforcement Authority relied in proposing a penalty or sanction.

~~5.6—Notice of Penalty~~After receiving a Notice of Confirmed Violation through the NERC compliance reporting and tracking system, NERC shall review the Notice of Confirmed Violation and utilize the information therein to prepare a Notice of Penalty. NERC shall advise the Regional Entity of any additional detail or further development of the factual findings that NERC deems necessary before the Notice of Penalty can be issued.

NERC may direct the Regional Entity to revise a penalty determination, in which case the Registered Entity subject to the penalty, or the Compliance Staff of the Regional Entity, may reopen the proceedings on any issue on which the penalty was based, irrespective of whether the issue was previously litigated, settled or unopposed.

5.9 Notice of Penalty

If (i) the Registered Entity does not dispute the ~~notice~~Notice of Alleged Violation and the proposed penalty ~~and/or~~ sanction, or (ii) a decision has been entered finding a violation and all appeals have been concluded, ~~NERC shall file a notice of penalty~~ or (iii) a settlement agreement has been reached addressing the Possible Violation or Alleged Violation(s), NERC shall prepare a draft Notice of Penalty and provide a copy to the Regional Entity. The Regional Entity shall inform the Registered Entity that a Notice of Penalty is pending public filing. NERC will file the Notice of Penalty with FERC and any other Applicable Governmental Authority, as provided in

¹¹This process generally completes within ninety (90) days of NERC's receipt of request for appeal.

Compliance Monitoring and Enforcement Program

the next paragraph, no sooner than five (5) business days after NERC approves the Notice of Confirmed Violation or settlement agreement.

NERC shall file the Notice of Penalty with FERC and, if the Possible Violation or Alleged Violation pertains to a Registered Entity or to a portion of the ~~bulk-power system~~Bulk Power System over which another Applicable Governmental Authority has jurisdiction, to such other Applicable Governmental Authority; provided, that NERC will not disclose any non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to Applicable Governmental Authorities other than FERC without first obtaining permission from FERC for such disclosure and subject to any limitations placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or portion of the ~~bulk-power system~~Bulk Power System to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction. NERC will include with the ~~notice~~Notice of ~~penalty~~Penalty any statement provided by the Registered Entity as set forth in ~~Section 8.0. NERC may direct the Regional Entity to revise a penalty determination, in which case the Registered Entity subject to the penalty, or the Compliance Staff of the Regional Entity, may reopen the proceedings on any issue on which the penalty was based, irrespective of whether the issue was previously litigated, settled or unopposed.~~Sections 5.4 or 5.7.

The penalty or sanction will be effective upon expiration of the thirty (30) day period following filing with FERC of the ~~notice of penalty~~Notice of Penalty (or such longer period as ordered by FERC) or, if FERC decides to review the penalty or sanction, upon final determination by FERC.

5.10 Closure of Enforcement Action

Following FERC approval of, or expiration of the period for action by FERC on, a Notice of Penalty filed by NERC, the Compliance Enforcement Authority shall issue a payment due notice and invoice to the Registered Entity. The payment due notice and invoice shall state the payment due date which shall be thirty (30) days from the date of the payment due notice and invoice. Upon payment of all monetary penalties by the Registered Entity, the Compliance Enforcement Authority shall issue a notice confirming payment to the Registered Entity, and provide a copy of the notice confirming payment to NERC. Following the completion by the Registered Entity of all requirements set forth in the Notice of Penalty and any settlement agreement, the Compliance Enforcement Authority shall issue the Registered Entity a Notice of Completion of Enforcement Action.

If the Compliance Enforcement Authority dismisses or disposes of a Possible Violation or Alleged Violation that does not become a Confirmed Violation, the Compliance Enforcement Authority shall issue a Notice of Completion of Enforcement Action to the Registered Entity.

A copy of the Notice of Completion of Enforcement Action shall also be provided to NERC by the Compliance Enforcement Authority.

The Notice of Completion of Enforcement Action shall include a release of any data retention directives that were previously issued to the Registered Entity in connection with the matter. Upon issuance of a Notice of Completion of Enforcement Action, tracking of the violation is completed, and the enforcement action shall be closed.

Compliance Monitoring and Enforcement Program

6.0 MITIGATION OF VIOLATIONS OF RELIABILITY STANDARDS

Parties engaged in the process described in this section should consult with each other on the data and information that would be appropriate for effectively addressing this section's process requirements. If a party believes that a request for data or information is unreasonable, the party may request a written determination from the NERC ~~director of enforcement~~compliance program officer.

6.1 Requirement for Submission of Mitigation Plans

A Registered Entity found to be in violation of a Reliability Standard shall file with the Compliance Enforcement Authority (i) a proposed Mitigation Plan to correct the violation, or (ii) a description of how the violation has been mitigated, and any requests for extensions of Mitigation Plans or a report of completed mitigation. A Registered Entity may also submit a proposed Mitigation Plan at any other time, including with a Self-Report, or, without admitting it has committed a violation, in response to a Notice of Possible Violation or Notice of Alleged Violation.

~~Figure 6.1 shows the process steps for Mitigation Plans.~~

~~Figure 6.1—Mitigation Plan Process~~

~~1.1~~

6.2 Contents of Mitigation Plans

A Mitigation Plan shall include the following information:

- The Registered Entity's point of contact for the Mitigation Plan, who shall be a person (i) responsible for filing the Mitigation Plan, (ii) technically knowledgeable regarding the Mitigation Plan, and (iii) authorized and competent to respond to questions regarding the status of the Mitigation Plan. This person may be the Registered Entity's point of contact described in Section 2.0.
- The Possible, Alleged or Confirmed Violation(s) of Reliability Standard(s) the Mitigation Plan will correct.
- The cause of the Possible, Alleged or Confirmed Violation(s).
- The Registered Entity's action plan to correct the Possible, Alleged or Confirmed Violation(s).
- The Registered Entity's action plan to correct the cause of the Possible, Alleged or Confirmed Violation.
- The Registered Entity's action plan to prevent recurrence of the Possible, Alleged or Confirmed Violation(s).
- The anticipated impact of the Mitigation Plan on the ~~bulk power system~~Bulk Power System reliability and an action plan to mitigate any increased risk to the reliability of the

Compliance Monitoring and Enforcement Program

~~bulk power system~~Bulk Power System while the Mitigation Plan is being implemented.

- A timetable for completion of the Mitigation Plan including the completion date by which the Mitigation Plan will be fully implemented and the Possible, Alleged or Confirmed Violation(s) corrected.
- Implementation milestones no more than three (3) months apart for Mitigation Plans with expected completion dates more than three (3) months from the date of submission. Additional violations could be determined for not completing work associated with accepted milestones.
- Any other information deemed necessary or appropriate

The Mitigation Plan shall be signed by an officer, employee, attorney or other authorized representative of the Registered Entity, which if applicable, shall be the person that signed the Self-Certification or Self Reporting submittals.

6.3 Timetable for Completion of Mitigation Plans

The Mitigation Plan shall be completed in time to have a reasonable potential to correct all of the violation(s) prior to the next applicable compliance reporting/assessment period after occurrence of the violation for which the Mitigation Plan is submitted. In all cases the Mitigation Plan should be completed without delay, and should encompass actions necessary to prevent a recurring violation of the Reliability Standard requirements underlying the Possible, Alleged or Confirmed Violation(s). The Compliance Enforcement Authority will expect full compliance with the Reliability Standard to which the Mitigation Plan is applicable at the next report or assessment of the Registered Entity. At the Compliance Enforcement Authority's discretion, the completion deadline may be extended for good cause including: (i) short assessment periods (i.e., event driven or monthly assessments), and (ii) construction requirements in the Mitigation Plan that extend beyond the next assessment period or other extenuating circumstances. If the Mitigation Plan extends beyond the next applicable reporting/assessment period, sanctions for any violation of the applicable Reliability Standard(s) occurring during the implementation period will be held in abeyance and will be waived if the Mitigation Plan is satisfactorily completed.

Any violations assessed during the period of time the accepted Mitigation Plan is being implemented will be recorded by the Compliance Enforcement Authority with associated sanctions or penalties. Regional Entities will report any findings of violations recorded during this time period to NERC with the notation that the Registered Entity is working under an accepted Mitigation Plan with an extended completion date with penalties and sanctions held in abeyance until completion of the Mitigation Plan. Upon completion of the accepted Mitigation Plan in accordance with Section 6.6, the Compliance Enforcement Authority will notify the Registered Entity that any findings of violations of the applicable Reliability Standard during the period that the accepted Mitigation Plan was being implemented have been waived and no penalties or sanctions will apply. Regional Entities will also notify NERC of any such waivers of violations of Reliability Standards.

A request for an extension of any milestone or the completion date of the accepted Mitigation Plan by a Registered Entity must be received by the Compliance Enforcement Authority at least

Compliance Monitoring and Enforcement Program

five (5) business days before the original milestone or completion date. The Compliance Enforcement Authority may accept a request for an extension or modification of a Mitigation Plan if the Compliance Enforcement Authority determines the request is justified, and shall notify NERC of the extension or modification within five (5) business days.

If a Mitigation Plan submitted by a Registered Entity is rejected by the Regional Entity acting as Compliance Enforcement Authority or the hearing body in accordance with Section 6.5, the Registered Entity shall be subject to any findings of violation of the applicable Reliability Standards during the period the Mitigation Plan was under consideration and to imposition of any penalties or sanctions imposed for such violations.

6.4 Submission of Mitigation Plans

A Mitigation Plan may be submitted at any time but shall have been submitted by the Registered Entity within thirty (30) days after being served the ~~notice~~Notice of Alleged Violation ~~and penalty or sanction~~, if the Registered Entity does not contest the ~~violation~~Alleged Violation and penalty or sanction. If the Registered Entity disputes the ~~notice~~Notice of Alleged Violation or ~~the~~ penalty or sanction, the Registered Entity shall submit its Mitigation Plan within ten (10) business days following issuance of the written decision of the hearing body, unless the Registered Entity elects to appeal the hearing body's determination to NERC. The Registered Entity may choose to submit a Mitigation Plan while it contests an Alleged Violation or penalty or sanction or in response to a Notice of Possible Violation; such submission shall not be deemed an admission of a violation or the appropriateness of a penalty or sanction. If the Registered Entity has not yet submitted a Mitigation Plan, or the Registered Entity submits a Mitigation Plan but it is rejected by the Regional Entity acting as Compliance Enforcement Authority or the hearing body in accordance with Section 6.5, any subsequent violations of the Reliability Standard identified by the Compliance Enforcement Authority before the hearing body renders its decision will not be held in abeyance and will be considered as repeat violations of the Reliability Standard.

6.5 Review and Acceptance or Rejection of Proposed Mitigation Plans

Unless the time period is extended by the Compliance Enforcement Authority, it will complete its review of the Mitigation Plan, and will issue a written statement accepting or rejecting the Mitigation Plan, within thirty (30) days of receipt; otherwise the Mitigation Plan will be deemed accepted. In order to extend the initial or an extended period for review of the Mitigation Plan, the Compliance Enforcement Authority shall, within the initial or extended review period, notify the Registered Entity (and NERC if NERC is not the Compliance Enforcement Authority) that the review period is being extended and identify the date by which the Compliance Enforcement Authority will complete its review of the Mitigation Plan. The Compliance Enforcement Authority's extension notice shall also state that if the Compliance Enforcement Authority has not issued a notice by the end of the extended review period either stating that the Compliance Enforcement Authority accepts or rejects the proposed Mitigation Plan or further extending the Compliance Enforcement Authority's period for review of the Mitigation Plan, the Mitigation Plan will be deemed accepted.

If the Compliance Enforcement Authority rejects a Mitigation Plan, the Compliance Enforcement Authority will provide the Registered Entity with a written statement describing the

Compliance Monitoring and Enforcement Program

reasons for the rejection, and will require the Registered Entity to submit a revised Mitigation Plan by the Required Date. The Compliance Enforcement Authority will notify the Registered Entity within ten (10) business days after receipt of a revised Mitigation Plan whether the Compliance Enforcement Authority will accept or reject the revised Mitigation Plan and provide a written statement describing the reasons for rejection and the Required Date for the second revised Mitigation Plan. If the second review results in rejection of the Mitigation Plan, the Registered Entity may request a hearing in accordance with the Hearing Procedures, by submitting to the Compliance Enforcement Authority a written request for hearing including an explanation of why the Mitigation Plan should be accepted. After the hearing is completed, the Compliance Enforcement Authority will issue a written statement accepting a Mitigation Plan it deems as appropriate.

Within five (5) business days after a Regional Entity accepts a Mitigation Plan, the Regional Entity (i) will notify NERC and the Registered Entity of the acceptance of the Mitigation Plan and (ii) will provide the accepted Mitigation Plan to NERC. NERC will review the accepted Mitigation Plan and, within thirty (30) days following its receipt of the Mitigation Plan from the Regional Entity, will notify the Regional Entity and the Registered Entity, on a contemporaneous basis, as to whether the Mitigation Plan is approved or disapproved by NERC. If NERC disapproves a Mitigation Plan that was accepted by the Regional Entity, NERC shall state its reasons for the rejection, and may state the changes to the Mitigation Plan that would result in approval by NERC. The Registered Entity shall not be subject to findings of violations of the specific requirements of Reliability Standards that are the subject of the Mitigation Plan or to imposition of penalties or sanctions for such violations with respect to the period of time the Mitigation Plan was under consideration by NERC and for a reasonable period following NERC's disapproval of the Mitigation Plan, so long as the Registered Entity promptly submits a modified Mitigation Plan that addresses the concerns identified by NERC.

If a Registered Entity submits a Mitigation Plan prior to issuance of a Notice of Confirmed Violation or entry into a settlement, such as with a Self-Report or in response to a Notice of Possible Violation, the Regional Entity may provisionally accept the proposed Mitigation Plan. If the Regional Entity subsequently determines, upon completing its assessment of the Possible Violation, that the facts and circumstances are different than those on which the accepted Mitigation Plan was based, the Regional Entity may, by notice to the Registered Entity and to NERC, require the Registered Entity to submit a revised Mitigation Plan that fully addresses the facts and circumstances of the violation. The Regional Entity's notice shall state the additional or different facts and circumstances that need to be addressed in the revised Mitigation Plan. The Registered Entity shall submit a revised Mitigation Plan in response to the notice within thirty (30) days following the date of the notice, unless the Regional Entity specifies or allows a longer time period. The Registered Entity's revised Mitigation Plan shall be subject to review and acceptance or rejection by the Regional Entity and by NERC in accordance with this Section 6.5. If the Regional Entity issues a Notice of Confirmed Violation or enters into a settlement with the Registered Entity and does not identify a need to request modifications to the provisionally-accepted Mitigation Plan based on additional or different facts and circumstances, the Regional Entity shall issue a notice to the Registered Entity, with a copy to NERC, stating that the "provisional" nature of the acceptance is terminated and the acceptance is final. The Regional Entity shall issue such notice within five (5) business days of issuance of the Notice of Confirmed Violation or entry into the settlement.

Compliance Monitoring and Enforcement Program

NERC will submit to FERC, as non-public information, an approved Mitigation Plan relating to violations of Reliability Standards within seven (7) business days after NERC approves the Mitigation Plan. NERC shall publicly post the approved Mitigation Plan as part of the public posting of the ~~report of the~~ related ~~Confirmed Violation~~ [Notice of Penalty](#) in accordance with Section 8.0 or ~~as part of the public posting of a settlement in which the Registered Entity neither admits or denies that it violated a Reliability Standard~~ [settlement](#) in accordance with Section ~~5.4.5.6.~~

6.6 Completion/Confirmation of Implementation of Mitigation Plans

The Registered Entity shall provide updates at least quarterly to the Compliance Enforcement Authority on the progress of the Mitigation Plan. The Compliance Enforcement Authority will track the Mitigation Plan to completion and may conduct on-site visits and review status during audits to monitor Mitigation Plan implementation.

Upon completion of the Mitigation Plan, the Registered Entity shall provide to the Compliance Enforcement Authority certification, signed by an officer, employee, attorney or other authorized representative of the Registered Entity, that all required actions described in the Mitigation Plan have been completed and shall include data or information sufficient for the Compliance Enforcement Authority to verify completion. The Compliance Enforcement Authority shall request such data or information and conduct follow-up assessments, on-site or other Spot Checking, or Compliance Audits as it deems necessary to verify that all required actions in the Mitigation Plan have been completed and the Registered Entity is in compliance with the subject Reliability Standard [requirement\(s\)](#).

In the event all required actions in the Mitigation Plan are not completed within the applicable deadline including any extensions of the original deadline granted under Section 6.3, any violation(s) of a Reliability Standard subject to the Mitigation Plan that occurred during the originally scheduled time period for completion will be enforced immediately and a new Mitigation Plan must be submitted for acceptance by the Compliance Enforcement Authority. In addition, the Compliance Enforcement Authority may conduct a Compliance Audit of, or issue a Remedial Action Directive to, the Registered Entity.

Regional Entities will provide to NERC the quarterly status reports and such other information as NERC requests, and will notify NERC when each Mitigation Plan is verified to have been completed.

6.7 Recordkeeping

The Compliance Enforcement Authority will maintain a record containing the following information for each Mitigation Plan:

- Name of Registered Entity.
- The date of the violation.
- Monitoring method by which the violation was detected, i.e., Self-Certification, Self-Reporting, Compliance Audit, Compliance ~~Violation~~ Investigation, Complaint, etc.

Compliance Monitoring and Enforcement Program

- ~~Date of notification of violation and sanction.~~ (s) of Notice of Possible Violation and Notice of Alleged Violation (if applicable).
- Expected and actual completion date of the Mitigation Plan and major milestones.
- Expected and actual completion date for each required action.
- Accepted changes to milestones, completion dates, or scope of Mitigation Plan.
- Registered Entity's completion notice and data submitted as evidence of completion.

7.0 REMEDIAL ACTION DIRECTIVES

The Compliance Enforcement Authority may issue a Remedial Action Directive when such action is immediately necessary to protect the reliability of the ~~bulk power system~~ Bulk Power System from an imminent threat. A Remedial Action Directive may include, but is not limited to, any of the following: specifying operating or planning criteria, limits, or limitations; requiring specific system studies; defining operating practices or guidelines; requiring confirmation of data, practices, or procedures through inspection testing or other methods; requiring specific training for personnel; requiring development of specific operating plans; directing a Registered Entity to develop and comply with a plan to remediate a violation; imposing increased auditing or additional training requirements; and requiring a Registered Entity to cease an activity that may constitute a violation of a Reliability Standard.

A Remedial Action Directive may be issued to a Registered Entity at any time, including during any procedures relating to a Possible Violation or an Alleged Violation of a Reliability Standard. The Compliance Enforcement Authority will specify if a Remedial Action Directive obviates the need for a Mitigation Plan.

Prior to issuing a Remedial Action Directive, the Regional Entity shall consult the Reliability Coordinator for the Registered Entity, if applicable, to ensure that the Remedial Action Directive is not in conflict with directives issued by the Reliability Coordinator.

Any Remedial Action Directive must be provided in a notice to the Registered Entity and shall include: (i) a list of the ~~violations or possible violations~~ Possible Violation(s) or Alleged Violation(s) of Reliability Standards that are the basis for issuance of the Remedial Action Directive; (ii) a discussion of the factual basis for the Remedial Action Directive; (iii) a deadline for compliance and (iv) notice to the Registered Entity that failure to comply with the directive by the Required Date may result in further Remedial Action Directives or significantly increased sanctions. The Compliance Enforcement Authority will cause the notice of the Remedial Action Directive to be delivered to the Registered Entity by (i) electronic means to the Registered Entity's designated contact person and (ii) by a recognized express courier service that provides tracking and verification of delivery to the recipient. The date of delivery as specified by the express courier service's verification of delivery shall be the date of actual receipt of the Remedial Action Directive. The Compliance Enforcement Authority will monitor implementation of Remedial Action Directives as necessary to verify compliance.

Compliance Monitoring and Enforcement Program

The Regional Entity will notify NERC within two (2) business days after issuing a Remedial Action Directive.

Once the Compliance Enforcement Authority has given the Registered Entity notice of the Remedial Action Directive, the Registered Entity may contest the Remedial Action Directive by giving written notice to the Compliance Enforcement Authority within two (2) business days following the date of actual receipt of notice of the Remedial Action Directive. Due to the urgency of resolving any objections to a Remedial Action Directive, the hearing shall be conducted under the expedited hearing process set forth in Section 1.9 of **Attachment 2, Hearing Procedures**. Notice to contest the Remedial Action Directive and participation in the hearing process set forth in Section 1.9 of **Attachment 2, Hearing Procedures** shall constitute the Registered Entity's right to appeal the Remedial Action Directive. The Registered Entity may elect not to implement the Remedial Action Directive until the hearing process is completed, or may proceed with implementing the Remedial Action Directive even if it is contesting the Remedial Action Directive. ~~Figure 7.0 shows the process steps for a Remedial Action Directive.~~

~~Figure 7.0—Remedial Action Process 1.0~~

8.0 REPORTING AND DISCLOSURE

Regional Entities shall prepare and submit to NERC all required reports ~~(including those required by NERC Rules of Procedure, Sections 403.15, 403.17 and 403.19)~~, containing current information concerning (1) Registered Entity compliance with Reliability Standards, (2) all Possible Violations, Alleged Violations and Confirmed Violations of Reliability Standards by Registered Entities, (3) the status of Possible Violations and Alleged Violations, (4) sanctions and penalties, (5) Remedial Action Directives imposed, and (6) Mitigation Plan(s) accepted including dates for all required actions and for completion.

Regional Entities shall report all Possible Violations, Alleged Violations and Confirmed Violations to NERC, ~~on a confidential basis, any allegations or evidence of violations of Reliability Standards regardless of significance, whether verified or still under investigation, that are received or obtained by the Regional Entity through any means within five (5) business days, unless the violation indicated or alleged has resulted in or has the potential to result in, a reduced level of reliability to the bulk power system (as provided in Section 408 of the NERC Rules of Procedure), in which cases the Regional Entity shall notify NERC within forty eight (48) hours by promptly entering the Possible Violation, Alleged Violation or Confirmed Violation into the NERC compliance reporting and tracking system.~~ NERC shall notify FERC and, where the report pertains to a Registered Entity or to a portion of the ~~bulk power system~~ Bulk Power System over which another Applicable Governmental Authority has jurisdiction, shall also notify such other Applicable Governmental Authority, within two (2) business days of receiving ~~such~~ a report of a Possible Violation, Alleged Violation or Confirmed Violation from the Regional Entity; provided, that NERC will not disclose any non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to an Applicable Governmental Authority other than FERC without first obtaining permission from FERC for such disclosure and subject to any limitations

Compliance Monitoring and Enforcement Program

placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or portion of the ~~bulk power system~~ Bulk Power System to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction. Such reports shall include information regarding the nature of the ~~violation indicated or alleged and its potential impact on the reliability of the bulk power system~~ Possible Violation, Alleged Violation or Confirmed Violation, the name of the Registered Entity involved, the status ~~and timetable of any compliance violation assessment, and of any ongoing review and assessment of the~~ Possible Violation, Alleged Violation, or Confirmed Violation, the name of a Regional Entity staff person knowledgeable about the information to serve as a point of contact, as required by ~~Section 408 of the NERC Rules of Procedure and~~ 18 C.F.R. §39.7(b), and, in the case of an Alleged Violation or Confirmed Violation, its potential impact on the reliability of the Bulk Power System.

Regional Entities shall report to NERC ~~at least quarterly, through the NERC compliance reporting and tracking system,~~ the status of ~~violations of Reliability Standards~~ Possible Violations and Alleged Violations, regardless of significance, that have not yet resulted in a ~~final determination of violation~~ Notice of Confirmed Violation or have not completed the hearing process, or for which mitigation activities (including activities being carried out pursuant to a settlement agreement) have not been completed. Regional Entities will ensure the information is current when these reports are provided.

Regional Entities shall report ~~to NERC all Confirmed Violations of Reliability Standards by Registered Entities including all penalties, sanctions, Mitigation Plans and schedules, and settlements, within ten (10) business days of each determination. At the same time, Regional Entities will provide the report to the affected Registered Entity, accompanied by a notice that the Registered Entity may provide a statement to NERC to accompany the report when posted by NERC. The Registered Entity's statement must include the name, title, and signature of an officer, employee, attorney or other authorized representative of the Registered Entity. NERC will publicly post each report of a Confirmed Violation~~ a Confirmed Violation to NERC at the same time the Notice of Confirmed Violation is issued to the Registered Entity. NERC will publicly post on its Web site each Notice of Penalty, with the identify of the violator, together with any statement submitted by the Registered Entity, no sooner than five (5) business days after the report is provided by the Regional Entity to NERC and the Registered Entity. when NERC files the Notice of Penalty with FERC.

NERC will provide reports quarterly to FERC and, where a report contains information pertaining to a Registered Entity or to a portion of the ~~bulk power system~~ Bulk Power System over which another Applicable Governmental Authority has jurisdiction, to such other Applicable Governmental Authority, on the status of all Possible, Alleged and Confirmed Violations for which mitigation activities have not been completed; provided, that NERC will not disclose any non-public U.S. compliance information that is subject to 18 C.F.R. §39.7(b)(4) to an Applicable Governmental Authority other than FERC without first obtaining permission from FERC for such disclosure and subject to any limitations placed by FERC on such disclosure, and NERC will not disclose non-public non-U.S. compliance information to an Applicable Governmental Authority (including FERC) without first obtaining permission from the Applicable Governmental Authority that has jurisdiction over the Registered Entity or

Compliance Monitoring and Enforcement Program

portion of the ~~bulk power system~~[Bulk Power System](#) to which the non-public information pertains and subject to any limitations placed on such disclosure by such Applicable Governmental Authority or by other law of the applicable jurisdiction. ~~NERC will publish public reports quarterly on its Web site of all Confirmed Violations of Reliability Standards during the quarter just completed, with the identity of the violator.~~

9.0 DATA RETENTION AND CONFIDENTIALITY

9.1 Records Management

The Compliance Enforcement Authority records management policy shall provide for a routine and orderly process for the retention and disposal of electronic and paper records related to the Compliance Program, ensure verification of compliance with appropriate business, regulatory, and legal requirements and at a minimum conform to the data retention requirements of the Reliability Standards. The policy shall allow for the maintenance of records as required to implement the Compliance Program.

9.2 Retention Requirements

The Compliance Enforcement Authority records management policy will require that information and data generated or received pursuant to Compliance Program activities, including Compliance Audits, Self-Certifications, Spot Checking, Compliance ~~Violation~~ Investigations, Self-Reporting, Periodic Data Submittals, Exception Reporting, and Complaints, as well as a hearing process, will be retained for the longer of (i) five (5) years or (ii) any retention period specified in a Reliability Standard or by FERC or another Applicable Governmental Authority. The obligation to retain information and data commences upon the initiation of the Compliance Program activity that produces the data or information. If the information or data is material to the resolution of a controversy, the retention period for such data shall not commence until after the controversy is resolved.

Upon request from NERC, Regional Entities will provide to NERC copies of such information and data. NERC will retain the information and data in order to maintain a record of activity under the Compliance Program. In providing the information and data to NERC, the Regional Entity shall preserve any mark of confidentiality.

9.3 Confidentiality and Critical Energy Infrastructure Information

9.3.1 Definitions

Information or data generated or received pursuant to Compliance Program activities, including a hearing process, shall be treated in a confidential manner pursuant to the provisions of Section 1500 of the NERC Rules of Procedure. The terms “confidential information,” “confidential business and market information,” “critical energy infrastructure information,” and “critical infrastructure” shall have the meanings stated in Section 1501 of the NERC Rules of Procedure.

9.3.2 Protection of Confidential Information

The Compliance Enforcement Authority personnel (including any contractors, consultants and industry ~~volunteers~~[subject matter experts](#)) and committee members, and participants in

Compliance Monitoring and Enforcement Program

Compliance Program activities shall be informed of, and agree to comply with, Section 1500 of the NERC Rules of Procedure concerning confidential information.

9.3.3 Critical Energy Infrastructure Information

The Compliance Enforcement Authority will keep confidential all critical energy infrastructure information in accordance with Section 1500 of the NERC Rules of Procedures. Information deemed to be critical energy infrastructure information shall be redacted, [in accordance with Section 1500 of the NERC Rules of Procedure](#), and shall not be released publicly.

Compliance Monitoring and Enforcement Program

ATTACHMENT 1

PROCESS FOR NON-SUBMITTAL OF REQUESTED DATA

If data, information, or other reports (including Mitigation Plans) requested from a Registered Entity are not received by the Required Date, the Compliance Enforcement Authority may sequentially execute the following steps for each Reliability Standard for which the Compliance Enforcement Authority has requested data, information, or other reports. The Compliance Enforcement Authority however will afford the Registered Entity reasonable opportunity to resolve a difficulty submitting data due to time or format issues.

Step 1: The Compliance Enforcement Authority will issue a follow-up notification to the Registered Entity's designated contact.

Step 2: The Compliance Enforcement Authority will issue a follow-up notification to the Registered Entity's vice president or equivalent responsible for compliance (with a copy to NERC and the Registered Entity's designated contact).

Step 3: The Compliance Enforcement Authority will issue a follow-up notification to the Registered Entity's chief executive officer or equivalent (with a copy to NERC, the Registered Entity's vice president or equivalent responsible for compliance and the Registered Entity's designated contact).

A full Compliance Audit may be scheduled at this step.

Step 4: Thirty (30) days after the Required Date, a Reliability Standard violation may be applied at the Severe Violation Severity Level.

Step 4 does not apply to Compliance Audits and Mitigation Plan tracking requests.

ATTACHMENT 2 - HEARING PROCEDURES

1.1 Applicability, Definitions and Interpretation

1.1.1 Procedure Governed

The provisions set forth in this **Attachment 2** (“Hearing Procedures”) shall apply to and govern practice and procedure before the Compliance Enforcement Authority in hearings in the United States conducted into (i) whether Registered Entities within the Compliance Enforcement Authority’s area of responsibility have violated Reliability Standards, and (ii) if so, to determine the appropriate Mitigation Plans as well as any remedial actions, penalties or sanctions in accordance with the NERC ~~ERO~~ *Sanction Guidelines* and other applicable penalty guidelines approved by FERC pursuant to 18 C.F.R. Section 39.7(g)(2). Any hearing conducted pursuant to these Hearing Procedures shall be conducted before a [HEARING BODY] established by the Compliance Enforcement Authority. The composition of the [HEARING BODY], after any recusals or disqualifications, shall be such that no two industry segments may control, and no single industry segment may veto, any decision by the [HEARING BODY] on any matter brought before it for decision.

The standard of proof in any proceeding under these Hearing Procedures shall be by a preponderance of the evidence. The burden of persuasion on the merits of the proceedings shall rest upon the Compliance Staff alleging noncompliance with a Reliability Standard, proposing a penalty, opposing a Registered Entity’s Mitigation Plan, or requiring compliance with a Remedial Action Directive.

1.1.2 Deviation

To the extent permitted by law, any provision in these Hearing Procedures may be waived, suspended or modified by the Hearing Officer, as defined in Paragraph 1.1.5, or the [HEARING BODY], for good cause shown, either upon the Hearing Officer’s or the [HEARING BODY]’s own motion or upon the motion of any Participant.

1.1.3 Standards for Discretion

The Compliance Enforcement Authority’s discretion under these Hearing Procedures shall be exercised to accomplish the following goals:

- a) Integrity of the Fact-Finding Process - The principal goal of the hearing process is to assemble a complete factual record to serve as a basis for a correct and legally sustainable ruling, decision or order.
- b) Fairness - Persons appearing in Compliance Enforcement Authority proceedings should be treated fairly. To this end, Participants should be given fair notice and opportunity to present explanations, factual information, documentation and legal argument. Action shall be taken as necessary to eliminate any disadvantage or prejudice to a Participant that would otherwise result from another Participant’s failure to act diligently and in good faith.
- c) Independence - The hearing process should be tailored to protect against undue influence from any Person, Participant or interest group.

- d) **Balanced Decision-Making** - Decisions should be based solely on the facts and arguments of record in a proceeding and by individuals who satisfy the Compliance Enforcement Authority's conflict of interest policy.
- e) **Impartiality** - Persons appearing before the [HEARING BODY] should not be subject to discriminatory or preferential treatment. Registered Entities should be treated consistently unless a reasonable basis is shown in any particular proceeding to depart from prior rulings, decisions or orders.
- f) **Expedition** - Proceedings shall be brought to a conclusion as swiftly as is possible in keeping with the other goals of the hearing process.

1.1.4 Interpretation

- a) These Hearing Procedures shall be interpreted in such a manner as will aid in effectuating the Standards for Discretion set forth in Paragraph 1.1.3, and so as to require that all practices in connection with the hearings shall be just and reasonable.
- b) Unless the context otherwise requires, the singular of a term used herein shall include the plural and the plural of a term shall include the singular.
- c) To the extent that the text of a rule is inconsistent with its caption, the text of the rule shall control.

1.1.5 Definitions

Unless otherwise defined, as used in these Hearing Procedures (i) definitions in Section 1.1 of the NERC Compliance Monitoring and Enforcement Program shall apply, and (ii) the following terms shall have the following meanings:

~~“Bulk Power System,” for the purposes of these Hearing Procedures, has the identical meaning as the definition of “Bulk Electric System” under the NERC Glossary.~~

“Clerk,” as designated by the Compliance Enforcement Authority.

“Compliance Enforcement Authority’s area of responsibility” means the Compliance Enforcement Authority’s corporate region. If a Regional Entity is the Compliance Enforcement Authority, the Compliance Enforcement Authority’s area of responsibility is shown in Exhibit A to the delegation agreement between the Regional Entity and NERC.

“Critical Energy Infrastructure Information” means specific engineering, vulnerability, or detailed design information about proposed or existing critical infrastructure that: (i) relates details about the production, generation, transportation, transmission, or distribution of energy; (ii) could be useful to a person in planning an attack on critical infrastructure; and (iii) does not simply give the location of the critical infrastructure.

“Critical infrastructure” means existing and proposed systems and assets, whether physical or virtual, the incapacity or destruction of which would negatively affect security, economic security, public health or safety, or any combination of those matters.

“Cybersecurity Incident” means a malicious act or suspicious event that disrupts, or was an attempt to disrupt, the operation of those programmable electronic devices and communications networks including hardware, software and data that are essential to the Reliable Operation of the Bulk-Power System.

“Director of Compliance” means the Director of Compliance of the Compliance Enforcement Authority, who is responsible for the management and supervision of Compliance Staff.

“Document” means, in addition to the commonly understood meaning of the term as information written or printed on paper, any electronically stored information, including writings, drawings, graphs, charts, photographs, sound recordings, images and other data or data compilations stored in any medium from which information can be obtained, and shall be translated by the producing party into reasonably usable form.

“ERO” means the Electric Reliability Organization, currently the North American Electric Reliability Corporation, or any successor organization, certified by FERC pursuant to 18 C.F.R. Section 39.3.

“FERC” means the Federal Energy Regulatory Commission.

“Hearing Officer” means an individual employed or contracted by the Compliance Enforcement Authority and designated by the Compliance Enforcement Authority to preside over hearings conducted pursuant to these Hearing Procedures.

“Participant” means a Respondent and any other Person who is allowed or required by FERC to participate as an intervenor in a proceeding conducted pursuant to these Hearing Procedures, and as used herein shall include the members of the Compliance Staff of the Compliance Enforcement Authority that participate in a proceeding.

“Penalty” as used herein includes all penalties and sanctions, including but not limited to a monetary or non-monetary penalty; a limitation on an activity, function, operation or other appropriate sanction; or the addition of the Registered Entity to a reliability watch list composed of major violators. Penalties must be within the range set forth in the NERC ~~ERO~~ *Sanction Guidelines* approved by FERC pursuant to 18 C.F.R. Section 39.7(g)(2), and shall bear a reasonable relation to the seriousness of a Registered Entity’s violation and take into consideration any timely efforts made by the Registered Entity to remedy the violation.

“Person” means any individual, partnership, corporation, limited liability company, governmental body, association, joint stock company, public trust, organized group of persons, whether incorporated or not, or any other legal entity.

~~“Reliable Operation” has the meaning set forth in Section 215 of the Federal Power Act.~~

~~“Reliability Standards” means standards approved by FERC pursuant to Section 215 of the Federal Power Act and 18 C.F.R. Section 39.5, as such standards are authorized and in effect from time to time.~~

“Respondent” means the Registered Entity who is the subject of the Notice of Alleged Violation, contested Mitigation Plan or contested Remedial Action Directive that is the basis for the proceeding, whichever is applicable.

“Staff” or “Compliance Staff” means individuals employed or contracted by the Compliance Enforcement Authority who have the authority to make initial determinations of compliance or violation with Reliability Standards by Registered Entities and associated Penalties and Mitigation Plans.

“Technical Advisor” means any Staff member, third-party contractor, or industry stakeholder who satisfies the Compliance Enforcement Authority’s conflict of interest policy and is selected to assist in a proceeding by providing technical advice to the Hearing Officer and/or the [HEARING BODY].

1.2 General Provisions including Filing, Service, Transcription and Participation

1.2.1 Contents of Filings

All filings made with [HEARING BODY] must contain:

- a) A caption that sets forth the title of the proceeding and the designated docket number or, if the filing initiates a proceeding, a space for the docket number;
- b) A heading that describes the filing and the Participant on whose behalf the filing is made;
- c) The full name, address, telephone number and email address of the Participant or the representative of the Participant making the filing;
- d) A plain and concise statement of any facts upon which the filing is based, which facts shall be supported by citations to the record of the hearing, if available, or other documents; and
- e) The specific relief sought, which may be in the alternative, and the authority that provides for or otherwise allows the relief sought.

1.2.2 Form of Filings

- a) All filings shall be typewritten, printed, reproduced or prepared using a computer or other word or data processing equipment on white paper 8½ inches by 11 inches with inside text margins of not less than one inch. Page numbers shall be centered and have a bottom margin of not less than ½ inch. Line numbers, if any, shall have a left-hand margin of not less than ½ inch. The impression shall be on one side of the paper only and shall be double spaced; footnotes may be single spaced and quotations may be single spaced and indented.
- b) All pleadings shall be composed in either Arial or Times New Roman font, black type on white background. The text of pleadings or documents shall be at least 12-point. Footnotes shall be at least 10-point. Other material not in the body of the text, such as schedules, attachments and exhibits, shall be at least 8-point.

- c) Reproductions may be by any process provided that all copies are clear and permanently legible.
- d) Testimony prepared for the purpose of being entered into evidence shall include line numbers on the left-hand side of each page of text. Line numbers shall be continuous.
- e) Filings may include schedules, attachments or exhibits of a numerical or documentary nature which shall, whenever practical, conform to these requirements; however, any log, graph, map, drawing, chart or other such document will be accepted on paper larger than prescribed in subparagraph (a) if it cannot be provided legibly on letter size paper.

1.2.3 Submission of Documents

a) Where to File

Filings shall be made with the Clerk of the Compliance Enforcement Authority located at its principal office. The office will be open from [*Compliance Enforcement Authority business hours*] local time each day except Saturday, Sunday, legal holidays and any other day declared by the Compliance Enforcement Authority.

b) When to File

Filings shall be made within the time limits set forth in these Hearing Procedures or as otherwise directed by the Hearing Officer or the [HEARING BODY]. Filings will be considered made when they are date stamped received by the Clerk. To be timely, filings must be received no later than [*Compliance Enforcement Authority close of business*] local time on the date specified.

c) How to File

Filings may be made by personal delivery, mailing documents that are properly addressed with first class postage prepaid, or depositing properly addressed documents with a private express courier service with charges prepaid or payment arrangements made. Alternatively, filing by electronic means will be acceptable upon implementation of a suitable and secure system by the Compliance Enforcement Authority.

d) Number of Copies to File

One original and five exact copies of any document shall be filed. The Clerk will provide each member of the [HEARING BODY] with a copy of each filing.

e) Signature

The original of every filing shall be signed by the Participant on whose behalf the filing is made, either by an attorney of the Participant or, by the individual if the Participant is an individual, by an ~~Officer~~officer of the Participant if the Participant is not an individual, or if the Participant is Staff, by a designee authorized to act on behalf of Staff. The signature on a filing constitutes a certificate that the signer has read the filing and knows its contents, and that the contents are true to the best of the signer's knowledge and belief.

f) Verification

The facts alleged in a filing need not be verified unless required by these Hearing Procedures, the Hearing Officer or the [HEARING BODY]. If verification is required, it must be under oath by a person having knowledge of the matters set forth in the filing. If any verification is made by an individual other than the signer, a statement must be included in or attached to the verification explaining why a person other than the signer is providing verification.

g) Certificate of Service

Filings shall be accompanied by a certificate of service stating the name of the individuals served, the Participants whose interests the served individuals represent, the date on which service is made, the method of service and the addresses to which service is made. The certificate shall be executed by the individual who caused the service to be made.

1.2.4 Service

a) Service List

For each proceeding, the Clerk shall prepare and maintain a list showing the name, address, telephone number, and facsimile number and email address, if available, of each individual designated for service. The Hearing Officer, Director of Compliance and the Registered Entity's designated agent for service [as registered with the Compliance Enforcement Authority] shall automatically be included on the service list. Participants shall identify all other individuals whom they would like to designate for service in a particular proceeding in their appearances or other filings. Participants may change the individuals designated for service in any proceeding by filing a notice of change in service list in the proceeding. Participants are required to update their service lists to ensure accurate service throughout the course of the proceeding. Copies of the service list may be obtained from the Clerk.

b) By Participants

Any Participant filing a document in a proceeding must serve a copy of the document on each individual whose name is on the service list for the proceeding. Unless otherwise provided, service may be made by personal delivery, email, deposit in the United States mail properly addressed with first class postage prepaid, registered mail properly addressed with postage prepaid or deposit with a private express courier service properly addressed with charges prepaid or payment arrangements made.

c) By the Clerk

The Clerk shall serve all issuances of the Hearing Officer and [HEARING BODY] upon the members of the [HEARING BODY] and each individual whose name is on the service list for the proceeding. Service may be made by personal delivery, email, deposit in the United States mail properly addressed with first class postage prepaid, registered mail properly addressed with postage prepaid or deposit with a private express courier service properly addressed with charges prepaid or payment arrangements made. The Clerk shall transmit a copy of the record of a proceeding to the ERO at the time it serves the ERO with either (1) a ~~notice~~[Notice](#) of

~~penalty~~Penalty, or (2) a [HEARING BODY] final order that includes a ~~notice~~Notice of ~~penalty~~Penalty.

d) Effective Date of Service

Service by personal delivery or email is effective immediately. Service by mail or registered mail is effective upon mailing; service by a private express courier service is effective upon delivery to the private express courier service. Unless otherwise provided, whenever a Participant has the right or is required to do some act within a prescribed period after the service of a document upon the Participant, four (4) days shall be added to the prescribed period when the document is served upon the Participant by mail or registered mail.

1.2.5 Computation of Time

The time in which any action is required to be done shall be computed by excluding the day of the act or event from which the time period begins to run, and by including the last day of the time period, unless the last day is a Saturday, Sunday, legal holiday or any other day upon which the office of the Compliance Enforcement Authority is closed, in which event it also shall be excluded and the date upon which the action is required shall be the first succeeding day that is not a Saturday, Sunday, legal holiday, or day upon which the office of the Compliance Enforcement Authority is closed.

1.2.6 Extensions of Time

Except as otherwise provided by law, the time by which a Participant is required or allowed to act may be extended by the Hearing Officer or [HEARING BODY] for good cause upon a motion made before the expiration of the period prescribed. If any motion for extension of time is made after the expiration of the period prescribed, the Hearing Officer or [HEARING BODY] may permit performance of the act if the movant shows circumstances sufficient to justify the failure to act in a timely manner.

1.2.7 Amendments

Amendments to any documents filed in a proceeding may be allowed by the Hearing Officer or the [HEARING BODY] upon motion made at any time on such terms and conditions as are deemed to be just and reasonable.

1.2.8 Transcripts

A full and complete record of all hearings, including any oral argument, shall be transcribed verbatim by a certified court reporter, except that the Hearing Officer may allow off-the-record discussion of any matter provided the Hearing Officer states the ruling on any such matter, and the Participants state their positions or agreement in relation thereto, on the record. Unless otherwise prescribed by the Hearing Officer, a Participant may file and serve suggested corrections to any portion of the transcript within thirty-five (35) days from the date on which the relevant portion of the transcript was taken, and any responses shall be filed within ten (10) days after service of the suggested corrections. The Hearing Officer shall determine what changes, if any, shall be made, and shall only allow changes that conform the transcript to the truth and ensure the accuracy of the record.

The Compliance Enforcement Authority will pay for transcription services, for a copy of the transcript for the record and for a copy of the transcript for Staff. Any other Participant shall pay for its own copy of the transcript if it chooses to obtain one and, should any Participant seek to obtain a copy of the transcript on an expedited basis, it shall pay for the expedited transcription services.

1.2.9 Rulings, Notices, Orders and Other Issuances

Any action taken by the Hearing Officer or the [HEARING BODY] shall be recorded in a ruling, notice, order or other applicable issuance, or stated on the record for recordation in the transcript, and is effective upon the date of issuance unless otherwise specified by the Hearing Officer or the [HEARING BODY]. All notices of hearings shall set forth the date, time and place of hearing.

1.2.10 Location of Hearings and Conferences

All hearings and oral arguments shall be held at the principal office of the Compliance Enforcement Authority unless the Hearing Officer or [HEARING BODY] designates a different location.

1.2.11 Participant Participation

Participants may appear at any hearing via teleconference subject to the approval of the Hearing Officer and, in the event of oral argument, the [HEARING BODY], except that witnesses shall personally appear at the evidentiary hearing if required by Paragraph 1.6.6. Staff may participate and be represented by counsel in hearings, and shall have the rights and duties of any Participant.

1.2.12 Interventions Are Not Permitted

The Respondent(s) and Staff shall be Participants to the proceeding. Unless otherwise authorized by FERC, no other Persons shall be permitted to intervene or otherwise become a Participant to the proceeding.

1.2.13 Proceedings Closed to the Public

No hearing, oral argument or meeting of the [HEARING BODY] shall be open to the public, and no notice, ruling, order or any other issuance of the Hearing Officer or [HEARING BODY], or any transcript, made in any proceeding shall be publicly released unless the ERO (within the U.S., in accordance with the authorization previously granted by FERC to release information about a non-public proceeding) or FERC (in the case of U.S.-related information) or another Applicable Governmental Authority (in the case of non-U.S.-related information) determine that public release is appropriate. Only the members of the [HEARING BODY], the Participants, the Hearing Officer and the Technical Advisors, if any, shall be allowed to participate in or obtain information relating to a proceeding.

1.2.14 Docketing System

The Clerk shall maintain a system for docketing proceedings. A docketed proceeding shall be created upon the issuance of a ~~notice~~Notice of Alleged Violation. Unless NERC provides a different docketing system that will be used uniformly by the Compliance Enforcement Authorities, docket numbers shall be assigned sequentially beginning with a two digit number that relates to the last two digits of the year in which the docket is initiated, followed by a dash (“-”), followed by the letters “[RE]”, followed by a dash (“-”), followed by a four digit number that will be “0001” on January 1 of each calendar year and ascend sequentially until December 31 of the same calendar year.

1.2.15 Hold Harmless

A condition of a Participant invoking these Hearing Procedures and participating in a hearing is that the Participant agrees that the Compliance Enforcement Authority, including without limitation its members, board of directors or trustees, compliance committee, any other committees or subcommittees, Staff, contracted employees, [HEARING BODY] members, Hearing Officers and Technical Advisors, shall not be liable, and shall be held harmless against the consequences of, or any action or inaction arising out of, the hearing process, or of any agreement reached in resolution of a dispute or any failure to reach agreement as a result of a proceeding. This “hold harmless” provision does not extend to matters constituting gross negligence, intentional misconduct or breach of confidentiality.

1.3 Initiation of the Hearing Process

1.3.1 Registered Entity’s Option to Request a Hearing

Except when contesting a Remedial Action Directive pursuant to section 1.9 of these Hearing Procedures, a Registered Entity may file a statement with the Compliance Enforcement Authority requesting a hearing if either:

- a) The Registered Entity files a response to a ~~notice~~Notice of Alleged Violation that contests either the ~~alleged violation~~Alleged Violation, the proposed Penalty, or both; or
- b) The Compliance Staff submits to the Registered Entity a statement rejecting the Registered Entity’s proposed revised Mitigation Plan submitted after Compliance Staff rejected the Registered Entity’s initial proposed Mitigation Plan.

A Registered Entity must file its hearing request within forty (40) days after (i) the Registered Entity files its response to the ~~notice~~Notice of Alleged Violation; or (ii) the Compliance Staff submits to the Registered Entity its statement identifying a disagreement with the Registered Entity’s proposed Mitigation Plan, whichever is applicable. If the Registered Entity does not file a hearing request within the time period set forth in this Paragraph, then the Registered Entity will be deemed to have agreed and waived any objection to the proposed Penalty, the Alleged Violation or the Compliance Staff’s rejection of the revised Mitigation Plan, whichever is applicable.

Either a ~~notice~~Notice of Alleged Violation issued to a Registered Entity or a Staff statement setting forth its rejection of a Registered Entity’s proposed revised Mitigation Plan shall clearly state that the Registered Entity has the option to contest the Alleged Violation, proposed Penalty,

or both, or the Compliance Staff's rejection of the proposed revised Mitigation Plan, using either the shortened hearing procedure pursuant to Paragraph 1.3.2 or the full hearing procedure described in Sections 1.4 to 1.7. If the Registered Entity files a hearing request within the requisite time period, it shall state within its hearing request whether it requests the shortened hearing procedure pursuant to Paragraph 1.3.2 or the full hearing procedure described in Sections 1.4 to 1.7. If the Registered Entity (or any Respondent if there are more than one Respondent) requests the full hearing procedure, the full hearing procedure shall apply. If the Registered Entity (or all Respondents if there are more than one Respondent) requests the shortened hearing procedure, Compliance Staff and any other Participant shall submit a filing within five (5) days of the Registered Entity's hearing request that states whether Staff or such other Participant agrees to use the shortened hearing procedure. If Staff or another Participant makes a filing requesting the full hearing procedure, then the full hearing procedure shall apply; otherwise the shortened hearing procedure requested by the Registered Entity or Entities shall be used. Once either the full or shortened hearing procedure has been selected, the Participants shall not be allowed to revert to the non-selected hearing procedure unless the Participants mutually agree.

A Registered Entity shall attach to a request for hearing whichever of the following are applicable:

- a) The Registered Entity's Self-Reporting of a violation;
- b) The ~~notice~~Notice of Alleged Violation and the Registered Entity's response thereto; and/or
- c) The Registered Entity's proposed revised Mitigation Plan and the Compliance Staff's statement rejecting the proposed revised Mitigation Plan.

1.3.2 Shortened Hearing Procedure

The shortened hearing procedure shall be as set forth in this Paragraph. The rules applicable to the full hearing procedure shall apply to the shortened hearing procedure unless the context of such a rule is inconsistent with the procedure set forth in this Paragraph or otherwise renders it inapplicable to the shortened hearing procedure. The rules concerning ex parte communications in Paragraph 1.4.7 are hereby expressly made applicable to the shortened hearing procedure under this Paragraph.

The [HEARING BODY] may utilize a Hearing Officer to preside over the shortened hearing procedure in accordance with Paragraph 1.4.2. But, no evidentiary hearing will be held in the shortened hearing procedure and the Participants will not present witness testimony or file briefs, except that briefs on exceptions and briefs in reply to exceptions may be allowed pursuant to Subparagraph (g). Instead, the following events shall take place within the following periods:

- a) The ~~Prehearing Conference~~prehearing conference shall be held within seven (7) days after the date on which the notice of hearing is issued. In addition to any other matters set forth in Paragraph 1.5.2 that may apply, the prehearing conference will be used to develop a schedule for the preparation and submission of comments in accordance with Subparagraphs (c) through (e).

- b) Within five (5) days after the date on which the notice of hearing is issued, Staff shall make documents available to the Registered Entity for inspection and copying pursuant to Paragraph 1.5.7.
- c) Within twenty-one (21) days after the prehearing conference, the Staff shall file:
 - 1) initial comments stating Staff's position on all issues and the rationale in support of its position, including all factual and legal argument;
 - 2) all documents that Staff seeks to introduce in support of its position that have not already been submitted in the proceeding; and
 - 3) a verification attesting to the truthfulness of the facts alleged in the filing.
- d) Within fourteen (14) days of Staff's initial comment filing pursuant to Subparagraph (c), the Registered Entity shall file:
 - 1) responsive comments stating the Registered Entity's position on all issues and the rationale in support of its position, including all factual and legal argument, which comment also may respond to Staff's initial comments;
 - 2) all documents that the Registered Entity seeks to introduce in support of its position that have not already been submitted in the proceeding; and
 - 3) a verification attesting to the truthfulness of the facts alleged in the filing.
- e) Within seven (7) days after the Registered Entity's responsive comment filing pursuant to Subparagraph (d), Staff shall file reply comments that shall be limited in scope to responding to the Registered Entity's responsive comments and be supported by a verification attesting to the truthfulness of the facts alleged in the filing. Staff shall not submit any additional documents in support of its position as part of this filing except upon motion and good cause shown. If Staff is allowed to file additional documents in support of its position based upon such a motion, the Registered Entity shall have the right to file additional documents in support of its position that are responsive to the additional documents that Staff is allowed to file provided that any additional Registered Entity filing also shall be verified.
- f) The Hearing Officer shall issue an initial opinion within twenty-one (21) days after the Staff's reply comments filing or any additional filing by the Registered Entity pursuant to Subparagraph (e).
- g) If either Participant requests, the Hearing Officer shall allow each Participant to file, within seven (7) days after the Hearing Officer's initial opinion, exceptions to the Hearing Officer's initial opinion in a brief designated "brief on exceptions" in accordance with Paragraph 1.7.5 and within seven (7) days thereafter, a reply brief designated "Brief in Reply to Exceptions."
- h) The [HEARING BODY] shall strive, but is not required, to issue a final order within ninety (90) days of the notice of hearing.

The Hearing Officer or [HEARING BODY] may modify any time period set forth within this Paragraph as warranted by the circumstances but it will be the objective of the [HEARING BODY] to issue the final order within ninety (90) days of the notice of hearing.

1.4 General Hearing Procedure

1.4.1 Notice of Hearing

Within seven (7) days of a Registered Entity requesting a hearing pursuant to Paragraph 1.3, the Clerk shall issue a notice of hearing in the docket. The notice of hearing shall identify the Hearing Officer, if designated at that time, and the date, time, and place for the prehearing conference, which should occur no later than fourteen (14) days after the notice of hearing is issued.

1.4.2 Hearing Officer

The Compliance Enforcement Authority may utilize a Hearing Officer to preside over each hearing conducted pursuant to these Hearing Procedures, provided that the Hearing Officer's actions shall be subject to the authority of the [HEARING BODY] as set forth in Paragraph 1.4.3. Members of the [HEARING BODY] may attend any aspect of the hearing.

The [HEARING BODY] may delegate to the Hearing Officer authority over the conduct of the hearing, including administering the hearing from the prehearing conference through the issuance of the initial opinion and any administrative hearing functions thereafter, and the responsibility for submission of the matter to the [HEARING BODY] for final decision through the presentation to the [HEARING BODY] of an initial opinion. The Hearing Officer shall have those duties and powers necessary to those ends, consistent with and as further enumerated in these Hearing Procedures, including the following:

- 1) To administer oaths and affirmations;
- 2) To schedule and otherwise regulate the course of the hearing, including the ability to call to recess, reconvene, postpone or adjourn a hearing;
- 3) Consistent with any timing or deadline requirements imposed by these Hearing Procedures or by applicable law, to separate any issue or group of issues from other issues in a proceeding and treat such issue(s) as a separate phase of the proceeding;
- 4) Consistent with any timing or deadline requirements imposed by these Hearing Procedures or by applicable law, to modify any time period, if such modification is in the interest of justice and will result in no undue prejudice to any other Participant;
- 5) To supervise and issue orders concerning discovery;
- 6) To conduct prehearing conferences, status hearings and evidentiary hearings;
- 7) To rule upon all objections, motions and other requests that do not result in the final determination of the proceeding;

- 8) To rule on and receive evidence;
- 9) To call upon a Participant to produce further evidence that is material and relevant to any issue;
- 10) To issue protective orders pursuant to Paragraph 1.5.10;
- 11) To issue initial opinions; and
- 12) To ensure that hearings are conducted in a full, fair and impartial manner, that order is maintained and that unnecessary delay is avoided in the disposition of the proceedings.

If the [HEARING BODY] uses a Hearing Officer to preside over a hearing, the [HEARING BODY] shall disclose the identity, employment history and professional affiliations of the Hearing Officer within two (2) days of the Hearing Officer's assignment to the proceeding, and Participants to the hearing may raise objections to the Hearing Officer's participation in accordance with Paragraph 1.4.5.

1.4.3 [HEARING BODY]

The [HEARING BODY] is vested with the authority to issue a final order resolving the issue(s) in all cases. To that end:

- 1) The [HEARING BODY] shall receive all filings in a hearing, including but not limited to all issuances of the Hearing Officer, all motions and responses thereto, and all written comments, testimony and evidence. The Hearing Body shall not receive documents made available by Staff for inspection and copying by the Respondent, or other responses to discovery between the Participants, unless such documents are placed into the record pursuant to Paragraph 1.6.7.
- 2) The [HEARING BODY] or any individual member thereof may, but is not required to, attend any prehearing conference, status hearing or evidentiary hearing, and/or to submit questions to the Hearing Officer to submit to a Participant or any witness at any such hearing.
- 3) The [HEARING BODY] shall have the same authority as the Hearing Officer, as set forth in these Hearing Procedures, to require the Participants or any individual Participant to: (i) address a specific issue in testimony, evidence or briefs; (ii) present oral argument on an issue; (iii) file pre-evidentiary hearing memorandums; or (iv) produce further evidence that is material and relevant to any issue. To this end, the [HEARING BODY] shall be entitled to issue questions or requests for information to any Participant or any witness at any time until the issuance of a final order.
- 4) To the extent that the [HEARING BODY] disagrees with any issuance or ruling of the Hearing Officer, it may, on its own motion or upon petition for interlocutory review meeting the requirements of Paragraph 1.4.4, reverse or modify the issuance or ruling in whole or in part, or take any other action as may be appropriate.

- 5) The [HEARING BODY] shall resolve the issue(s) in every hearing through the issuance of a final order. In issuing a final order, the [HEARING BODY] shall consider the Hearing Officer's initial opinion but shall have the authority to reject, modify or approve the initial opinion in whole or in part.

1.4.4 Interlocutory Review

A Participant shall be allowed to seek interlocutory review by the [HEARING BODY] of any ruling of the Hearing Officer where the ruling for which interlocutory review is sought presents an extraordinary circumstance which makes prompt review necessary to prevent prejudice to a Participant's ability to present its position in the proceeding. Failure to seek such review shall not operate as a waiver of any objection to such ruling. Unless good cause is shown or unless otherwise ordered by the Hearing Officer or the [HEARING BODY], the Participant seeking review shall file a petition for interlocutory review within fourteen (14) days after the date of the action that is the subject of the petition. The petition shall contain, in a separately identified section, a demonstration that the ruling for which interlocutory review is sought presents an extraordinary circumstance which makes prompt review necessary to prevent prejudice to the Participant's ability to present its position in the proceeding. The petition shall be filed with any offer of proof and supported by affidavit if based on facts that do not appear of record. Responses to petitions for interlocutory review shall be filed within seven (7) days after service of the petition. No replies to responses are allowed.

The Hearing Officer shall file a report to the [HEARING BODY] within fourteen (14) days from the filing of the petition. The Hearing Officer's report shall set forth the relevant facts and other background information relating to the ruling on which interlocutory review is sought, the basis for the Hearing Officer's ruling, a summary of the Participants' arguments on the petition for interlocutory review, and the recommendation of the Hearing Officer for the disposition of the petition by the [HEARING BODY].

On review of a Hearing Officer's ruling, the [HEARING BODY] may affirm or reverse the ruling in whole or in part, and may take any other just and reasonable action with respect to the ruling, such as declining to act on an interlocutory basis. The [HEARING BODY] may reject the petition for interlocutory review on the grounds that the ruling for which review is sought does not present an extraordinary circumstance which makes prompt review necessary to prevent prejudice to a Participant's ability to present its position in the proceeding, without considering or ruling on the substance of the petitioner's arguments. Issuance of a ruling on a petition for interlocutory review shall require (i) a quorum (as defined in Paragraph 1.7.8) of the [HEARING BODY], and (ii) majority vote of the members of the [HEARING BODY] voting on the final order (which number of members voting shall not be less than a quorum). Petitions to rehear or reconsider the [HEARING BODY'S] action taken on interlocutory review shall not be allowed. Filing and disposition of a petition for interlocutory review of a ruling of the Hearing Officer shall not suspend or otherwise delay a hearing or any other scheduled dates in the proceeding except as authorized by the Hearing Officer or the [HEARING BODY] based on a finding of exceptional circumstances.

A non-Participant that has been ordered by the Hearing Officer pursuant to paragraph 1.5.8 to produce or provide documents, information or testimony, and has failed to obtain the relief

sought from the Hearing Officer through filing objections to or a motion to quash the order, shall also be entitled to seek interlocutory review by the [HEARING BODY] of the Hearing Officer's order, with respect to (i) whether the non-Participant is within the class of Persons subject to such orders pursuant to paragraph 1.5.8, and (ii) the reasonableness of the Hearing Officer's order to produce or provide document, information or testimony.

1.4.5 Disqualification

A Hearing Officer, Technical Advisor or member of the [HEARING BODY] shall recuse himself or herself from a proceeding if participation would violate the Compliance Enforcement Authority's applicable conflict of interest policy.

Any Participant may file a motion to disqualify or for recusal of a Hearing Officer, Technical Advisor or member of the [HEARING BODY] from a proceeding on grounds of a conflict of interest, an ex parte communication prohibited by section 1.4.7, or the existence of other circumstances that could interfere with the impartial performance of his or her duties. The Participant shall set forth and support its alleged grounds for disqualification by affidavit. A motion for disqualification shall be filed within fifteen (15) days after the later of: (1) the time when the Participant learns of the facts believed to constitute the basis for disqualification; or (2) the time when the Participant is notified of the assignment of the Hearing Officer or Technical Advisor.

The Hearing Officer shall issue a proposed ruling for the [HEARING BODY]'s consideration upon the filing of a motion for disqualification unless the Hearing Officer is the subject of the motion. The [HEARING BODY], without the participation of any member who is the subject of the motion, shall issue a final ruling on the motion. If the Hearing Officer is recused or disqualified, the [HEARING BODY] will appoint a replacement Hearing Officer. To ensure fairness to the Participants and expedite completion of the proceeding when a replacement Hearing Officer is appointed after a hearing has commenced, the replacement Hearing Officer may recall any witness or may certify familiarity with any part or all of the record.

If a quorum (as defined in Paragraph 1.7.8) of the [HEARING BODY] does not remain after any recusals and rulings on motions for disqualification, then the Compliance Enforcement Authority shall appoint a new member(s) to the [HEARING BODY] to create a quorum, which new member(s) shall serve on the [HEARING BODY] through the conclusion of the proceeding but not thereafter. The Compliance Enforcement Authority shall only appoint the number of new members as are necessary to create a quorum. Any new member of the [HEARING BODY] shall be subject to the provisions applicable herein to all [HEARING BODY] members.

1.4.6 Technical Advisor

The Hearing Officer and/or the [HEARING BODY] may elect to use one or more Technical Advisors to assist in any proceeding. Such an election may be made at any time during the course of a proceeding. Any Staff member who serves as a Technical Advisor shall not have been involved in or consulted at any time in regard to any Compliance Staff investigation, ~~initial~~ determination of a Possible Violation, Alleged Violation or Penalty, or assessment of a Registered Entity's proposed Mitigation Plan that resulted in the proceeding in which technical

advice would be rendered, and shall not be a member of Staff participating in the proceeding on which such technical advice would be rendered.

If the Hearing Officer or [HEARING BODY] uses a Technical Advisor to assist in any hearing, the Hearing Officer or [HEARING BODY] shall disclose the identity, employment history and professional affiliations of the Technical Advisor within two (2) days of the Technical Advisor's assignment to the proceeding, and Participants to the hearing may raise objections to the Technical Advisor's participation in accordance with Paragraph 1.4.5.

1.4.7 No Ex Parte Communications

- a) Once a Registered Entity requests a hearing pursuant to Paragraph 1.3:
 - 1) neither the [HEARING BODY], the Hearing Officer, nor the Technical Advisor(s), if any, may communicate either directly or indirectly with any Person concerning any issue in the proceeding outside of the hearing process; except that
 - 2) the [HEARING BODY], the Hearing Officer, and the Technical Advisor(s), if any, may communicate outside of the hearing process either directly or indirectly with a Participant or a Participant's representative:
 - A) in writing if the writing is simultaneously provided to all Participants; or
 - B) orally if a representative for every Participant is present in person or by telephone;
 - C) subject to the requirement that the substance of any ruling on any issue discussed shall be memorialized on the record or by the issuance of a notice or ruling, and that any Participant objecting to the ruling shall have the opportunity to state its objection on the record.
- b) The proscription in Subparagraph (a)(1) does not prohibit members of the Compliance Staff from communicating with the Registered Entity, and representatives, agents or employees thereof on any topic, provided that any member of the Compliance Staff involved in any such communication relating to the subject matter of the proceeding may not be, and may not subsequently serve as, a Technical Advisor.
- c) The proscription in Subparagraph (a)(1) also does not prohibit communications between members of the [HEARING BODY], the Hearing Officer and any Technical Advisor.
- d) Any member of the [HEARING BODY], the Hearing Officer or any Technical Advisor who receives or who makes or knowingly causes to be made a communication prohibited by this Paragraph shall, within seven (7) days of the communication, file and serve on the Participants in the proceeding a notice of ex parte communication setting forth the date, time and place of communication, a summary of the substance and nature of the communication and all responses thereto, and a list of each ~~person~~Person who made or received the communication and, if the communication or any response thereto was in writing, a copy of the written communication shall be attached.

1.4.8 Appearances

Participants shall file written appearances within seven (7) days after the notice of hearing is issued. A Participant's written appearance shall identify the name(s) of each individual authorized to represent the Participant in the proceeding exclusive of witnesses. An individual may appear on his or her own behalf. A corporation, limited liability company, association, partnership or governmental body may appear by any bona fide officer or designee who has the authority to act on behalf of the Participant. A Participant also may appear by an attorney.

A Participant's written appearance shall state, with respect to each individual that the Participant identifies for service, the individual's name, address, telephone number, and facsimile number and email address, if available, where service shall be made.

A Participant may withdraw any individual from the Participant's representation or otherwise change the identity of individuals authorized to represent the Participant in a proceeding by filing a notice of a change in service list.

Any attorney appearing on behalf of a Participant shall be licensed to practice and in good standing before the Supreme Court of the United States or the highest court of any State, territory of the United States or the District of Columbia.

Individuals representing Participants in any hearing also shall enter their appearances at the beginning of the hearing by stating their names, addresses, telephone numbers and email addresses orally on the record.

1.4.9 Failure to Appear or Exercise Diligence

The failure of any Participant to appear during any hearing without good cause and without notification may be grounds for dismissal or deciding against the interests of such Participant.

1.4.10 Consolidation of Proceedings

In the event that more than one Registered Entity receives a Notice of Alleged Violation for the same event or transaction, and each Registered Entity selects the full hearing procedure described in Sections 1.4 to 1.7, the Hearing Body on its own motion may exercise its discretion to examine the actions of all Registered Entities in a single proceeding as long as an initial opinion has not been rendered by the Hearing Officer pursuant to Section 1.7.4 in any proceeding to be consolidated.

A Participant may file a motion pursuant to Paragraph 1.5.5 to consolidate into a single proceeding ~~allegations~~Allegations of ~~violations~~Violations of different Reliability Standards against a single Respondent, and related contests of Penalties or Mitigation Plans, arising out of the same event or transaction. Such consolidation may be allowed in the discretion of the Hearing Officer or [HEARING BODY], as applicable.

1.5 Prehearing Procedure

1.5.1 [Intentionally left blank]

1.5.2 Prehearing Conference

The purpose of the prehearing conference shall be to:

- 1) Preliminarily identify the issues;
- 2) Discuss a schedule for any discovery to be conducted and address any discovery issues that are raised at that time;
- 3) Explore the possibility of obtaining admissions of fact and of the genuineness of documents that would avoid unnecessary proof;
- 4) Develop a schedule for the preparation and submission of evidence and witness testimony in advance of the evidentiary hearing;
- 5) Schedule a date(s) for the evidentiary hearing; and
- 6) Address such other matters as may aid in the simplification of the evidence and disposition of the proceeding.

1.5.3 Summary Disposition

A Hearing Officer, on the Hearing Officer's own motion or on the motion of a Participant, may issue an initial opinion granting, in whole or in part, summary disposition if it appears that there are no issues of material fact. If the Hearing Officer is considering summary disposition in the absence of a Participant motion, the Hearing Officer shall request the Participants to identify in writing any issues of material fact and to comment on the proposed disposition. Factual information in the Participants' comments shall be supported by affidavit. Following review of the Participants' comments, if it still appears to the Hearing Officer that there are no genuine issues of material fact, the Hearing Officer may proceed without an evidentiary hearing. The Hearing Officer shall, however, allow the Participants the opportunity to file briefs. When the Hearing Officer issues an initial opinion granting a motion for summary disposition in whole or in part, the ruling shall set forth the rationale for the grant. An initial opinion of the Hearing Officer granting summary disposition shall be confirmed, rejected or modified in a final order issued by the [HEARING BODY].

1.5.4 Status Hearings

Any Participant may request, and the Hearing Officer may call, a status hearing at any time subsequent to the prehearing conference to address issues that have arisen between the Participants. Such issues may include, but are not limited to, discovery disputes and scheduling matters. The Hearing Officer shall direct the Clerk to issue a notice of status hearing that sets forth the date, time and place for the hearing, and identifies the matters to be addressed at the hearing.

1.5.5 Motions

Unless otherwise provided, a Participant may file a motion at any time requesting any relief as may be appropriate. Unless a Hearing Officer allows a motion to be made orally on the record, motions shall be filed in writing. Motions based on facts that do not appear of record shall be supported by affidavit. Unless otherwise specified by the Hearing Officer, responses to motions shall be filed within fourteen (14) days after service of the motion, and replies to responses shall be filed within seven (7) days after service of the responses; however, a Hearing Officer may deny dilatory, repetitive, or frivolous motions without awaiting a response. Unless otherwise

ordered by a Hearing Officer, the filing of a motion does not stay the proceeding or extend any scheduled dates in the proceeding.

1.5.6 Experts

A Participant may employ an expert(s) to testify or consult in a proceeding. Any expert utilized in either capacity shall sign an agreement evidencing the expert's understanding and acknowledgement of the non-public nature of the proceeding and that unauthorized public disclosure of information obtained in connection with the expert's participation in the proceeding is prohibited. The Participant employing the expert shall propose the agreement for approval via a motion, and its approval shall be subject, in addition to consideration of any objections by other Participants, to ensuring that appropriate safeguards are maintained to protect the confidentiality of the proceeding and the information disclosed therein.

1.5.7 Inspection and Copying of Documents in Possession of Staff

(a) Documents to be Available for Inspection and Copying

(1) Within five (5) days after issuance of the notice of hearing, Staff shall make available for inspection and copying by the Respondent, all ~~documents~~Documents prepared or obtained by Staff through or in connection with any compliance monitoring process(es) that led to the institution of proceedings. Such ~~documents~~Documents shall include but are not limited to:

(A) requests for information to the Respondent;

(B) every written request, including e-mail, directed to persons not employed by the Compliance Enforcement Authority to provide information or ~~documents~~Documents or to be interviewed;

(C) the ~~documents~~Documents provided in response to any such requests described in (A) and (B) above;

(D) all transcripts of testimony recorded during the Staff investigation and all exhibits to the transcript;

(E) all other ~~documents~~Documents obtained from the Respondent; and

(F) all other ~~documents~~Documents obtained from persons not employed by the Compliance Enforcement Authority.

The sole bases pursuant to which Staff shall be authorized to withhold ~~documents~~Documents from inspection and copying shall be the bases set forth in Paragraph 1.5.7(b); provided, however, that the ~~documents~~Documents made available for inspection and copying need not include (i) exact copies of ~~documents~~Documents the Respondent previously provided to Staff, and (ii) any ~~documents~~Documents provided to the Respondent with or as part of the ~~notice~~Notice of Alleged Violation, ~~notice~~Notice of Penalty, assessment of proposed Mitigation Plan or Remedial Action Directive.

(2) Where there are Participants in a proceeding in addition to a single Respondent and Compliance Staff, the Hearing Officer or [HEARING BODY] shall oversee the Staff's designation of ~~documents~~Documents to be produced to such other Participants and the development, execution and enforcement of any protective order deemed necessary.

(3) Staff shall promptly inform the Hearing Officer and each other Respondent if, after the issuance of a notice of hearing, requests for information are issued by Staff related to the same compliance monitoring process(es) that led to the institution of the proceeding. If Staff receives ~~documents~~Documents pursuant to a request for information after ~~documents~~Documents have been made available to a Respondent for inspection and copying as set forth in Subparagraph (a), the additional ~~documents~~Documents shall be made available to the Respondent not later than fourteen (14) days after Staff receives such ~~documents~~Documents. If a date for the evidentiary hearing has been scheduled, Staff shall make the additional ~~documents~~Documents available to the Respondent not less than ten (10) days before the hearing. If Staff receives such ~~documents~~Documents ten or fewer days before the hearing is scheduled to begin or after the hearing begins, Staff shall make the additional ~~documents~~Documents available immediately to the Respondent.

(4) Nothing in subparagraph (a)(1) shall limit the discretion of the Compliance Enforcement Authority to make any other ~~document~~Document available to the Respondent or the authority of the Hearing Officer to order the production of any other ~~documents~~Documents or information by any Participant.

(b) Documents That May Be Withheld by Staff

(1) Staff may withhold a ~~document~~Document from inspection and copying by the Respondent if:

(A) the ~~document~~Document is privileged to Staff or constitutes attorney work product of Staff's counsel (in applying this provision, the attorney-client privilege shall be recognized as absolute and any demand for production of attorney work product shall be granted only after a showing of substantial need by the Respondent);

(B) the ~~document~~Document is an examination or inspection report, an internal memorandum, or other note or writing prepared by a Staff member that shall not be offered in evidence;

(C) the ~~document~~Document would disclose (i) an examination, investigatory or enforcement technique or guideline of the Compliance Enforcement Authority, a federal, state, or foreign regulatory authority, or a self-regulatory organization; (ii) the identity of a source, including a federal, state, or foreign regulatory authority or a self-regulatory organization, that furnished information or was furnished information on a confidential basis regarding an investigation, an examination, an enforcement proceeding, or any other type of civil or criminal enforcement action; or (iii) an examination, an investigation, an enforcement proceeding, or any other type of civil or criminal enforcement action under consideration by, or initiated by, the Compliance Enforcement Authority, a federal, state, or foreign regulatory authority, or a self-regulatory organization; or

(D) the Hearing Officer grants leave to withhold a ~~document~~Document or category of ~~documents~~Documents as not relevant to the subject matter of the proceeding, or for other good cause shown.

Provided, that where a ~~document~~Document contains information of the type listed in Subparagraphs (A), (B), (C) or (D) that is capable of being redacted, Staff shall make the document available for inspection and copying by Respondent in redacted form.

(2) Nothing in Subparagraph (b)(1)(B), (C) or (D) authorizes Staff to withhold a ~~document~~Document, or a part thereof, that contains exculpatory evidence. Nothing in Subparagraph (b)(1) requires Staff to withhold a ~~document~~Document from disclosure.

(c) Withheld Document List

At the time it is required to make ~~documents~~Documents available for inspection and copying, Staff shall also provide to the Hearing Officer, the Respondent and any other Participant to which ~~documents~~Documents are being made available, a list of ~~documents~~Documents withheld by Staff pursuant to Subparagraph (b)(1). Upon review, the Hearing Officer may order Staff to make any ~~document~~Document withheld available to the Respondent(s) for inspection and copying.

(d) Timing of Inspection and Copying

Except as set forth in this Paragraph, the Hearing Officer shall determine the schedule of production of ~~documents~~Documents for inspection and copying, provided that the Hearing Officer may modify any time period for production set forth in this Paragraph as warranted by the circumstances.

(e) Place and Time of Inspection and Copying

Documents subject to inspection and copying pursuant to this Paragraph shall be made available to the Respondent for inspection and copying at the Compliance Enforcement Authority office where the ~~documents~~Documents are ordinarily maintained, or at such other office as the Hearing Officer, in his or her discretion, shall designate, or as the Participants otherwise agree. A Respondent shall be given access to the ~~documents~~Documents at the Compliance Enforcement Authority's offices during normal business hours. A Respondent shall not be given custody of the ~~documents~~Documents or be permitted to remove the ~~documents~~Documents from the Compliance Enforcement Authority's offices.

(f) Copying Costs

A Respondent may obtain a photocopy of all ~~documents~~Documents made available for inspection. A Respondent shall be responsible for the cost of photocopying. Unless otherwise ordered by the Hearing Officer, charges for copies made at the request of a Respondent shall be at a rate to be established by the Compliance Enforcement Authority.

(g) Failure to Make Documents Available — Harmless Error

In the event that a ~~document~~Document required to be made available to a Respondent pursuant to this Paragraph is not made available by Staff, no rehearing or amended decision of a proceeding already heard or decided shall be required where the failure to make the ~~document~~Document available was harmless error. Should a dispute arise as to whether a rehearing or amended decision is required due to the failure of Staff to produce a ~~document~~Document, the burden shall be on Staff to show that such failure was harmless error. The Hearing Officer, or, upon review, the [HEARING BODY] shall determine whether the failure to make the ~~document~~Document available was harmless error.

1.5.8 Other Discovery Procedures

In addition to the production of ~~documents~~Documents by Staff for inspection and copying by Respondent pursuant to Paragraph 1.5.7, the Participants shall be entitled to utilize all other discovery methods provided for in Rules 402 through 409 of the FERC Rules of Practice and Procedure, 18 C.F.R. §385.402 through 385.409, including data requests, written interrogatories and requests for production of ~~documents~~Documents or things, depositions by oral examination, requests for inspection of ~~documents~~Documents and other property, requests for admissions, and requests for issuance of orders to one or more Registered Entities to produce ~~documents~~Documents for inspection and copying or at the hearing or to provide testimony by an authorized representative in deposition or at the hearing. Unless otherwise directed by the Hearing Officer or [HEARING BODY] upon motion by a Participant or by the Hearing Officer, or by the [HEARING BODY] on its own motion, such discovery, and the resolution of any disputes concerning such discovery, shall be conducted in accordance with the provisions of Rules 402 through 410 and 510(e) of the FERC Rules of Practice and Procedure, 18 C.F.R. §385.402 through 385.410 and 385.510(e), which are hereby incorporated by reference into these Hearing Procedures, subject to the following limitations and modifications to such Rules:

- (a) The provisions of Subparagraphs (d), (e) and (f) of Paragraph 1.5.7 shall apply to any such discovery.
- (b) Rule 403(b)(2) (18 C.F.R. §385.403(b)(2)) and Rule 410(d)(2) (18 C.F.R. §385.410(b)(2)) shall not be applicable.
- (c) The Hearing Officer and the [HEARING BODY] have the authority to issue orders to compel the appearance by or production of ~~documents~~Documents or information by, only a Person that (i) is a Participant or (ii) is a Registered Entity (including an authorized representative thereof) that is not a Participant. The Hearing Officer and the [HEARING BODY] do not have authority to require a United States marshal or deputy marshal to serve an order to produce or provide ~~documents~~Documents, information or testimony.
- (d) References to “subpoena” in Rules 404, 409, 410 and 510(e) shall be deemed to be to an order to a non-Participant Registered Entity to produce or provide ~~documents~~Documents, information or testimony.

- (e) References to the “Commission” in Rules 402 through 410 and 510(e) shall be to FERC except as follows: (i) the references in Rules 402(a), 404(b)(1) and 405(b), the second reference in Rule 410(d), and the references in Rule 510(e)(1) and (2) shall be deemed to be to the [HEARING BODY], (ii) the reference in Rule 385.406(b)(4) to “Commission trial staff” shall be deemed to be to Compliance Staff, and (iii) the reference in Rule 510(e)(3) shall be deemed to be to the Hearing Officer or [HEARING BODY].
- (f) Unless otherwise ordered by the Hearing Officer or [HEARING BODY], a data request, set of interrogatories, request for production of ~~documents~~Documents or things, request for inspection of ~~documents~~Documents or other property, request for admissions, or order to produce or provide ~~documents~~Documents, information or testimony, shall not specify a due date or response date that is fewer than 21 days from the date of service of the request or date of the order.
- (g) A list of withheld ~~documents~~Documents, if any, shall be provided by any Participant required to produce ~~documents~~Documents, at the time the documents are required to be produced, to the Hearing Officer and to each Participant entitled to receive production of the ~~documents~~Documents. Upon review, the Hearing Officer may order the Participant to make any ~~document~~Document withheld available to any other Participant or Participants for inspection and copying.
- (h) In the event a ~~document~~Document or information required to be produced or provided by a Participant pursuant to discovery is not produced or provided by the Participant, no rehearing or amended decision of a proceeding already heard or decided shall be required where the failure to produce or provide the ~~document~~Document or information was harmless error. Should a dispute arise as to whether a rehearing or amended decision is required due to the failure of a Participant to produce or provide a ~~document~~Document or information, the burden shall be on the Participant that failed to produce or provide the ~~document~~Document or information to show that such failure was harmless error. The Hearing Officer or, upon review, the [HEARING BODY] shall determine whether the failure to make the ~~document~~Document available was harmless error.
- (i) Unless otherwise ordered by the Hearing Officer or [HEARING BODY], all such discovery shall be requested, scheduled and conducted so as to be completed within six (6) months following the date of the initial prehearing conference held pursuant to Paragraphs 1.4.1 and 1.5.2.
- (j) Notwithstanding (f) and (i), however, if the shortened hearing procedure in Paragraph 1.3.2 is used in a proceeding, the Hearing Officer, on his or her own motion or on motion of a Participant, shall establish a schedule for discovery, including response periods for responding to discovery requests, that are consistent with the expedited nature of the proceeding contemplated by the shortened hearing procedure.

The Hearing Officer’s ruling on all motions relating to disputes concerning such discovery shall consider the following objectives: (i) full disclosure of all relevant ~~documents~~Documents and

information; (ii) the exercise of due diligence in the conduct of discovery by a Participant; and (iii) disallowing use of discovery as a means to delay the proceeding or to harass or burden any other Participant.

1.5.9 Pre-Evidentiary Hearing Submission of Testimony and Evidence

Unless the Hearing Officer orders otherwise and with the exception of (i) any adverse Participant examination pursuant to Paragraph 1.6.16 and (ii) the testimony and ~~documents~~Documents of a non-Participant provided pursuant to an order to produce or provide ~~documents~~Documents, information or testimony, all witness testimony in a hearing must be prepared in written form, may have exhibits, schedules and attachments thereto, and shall be filed in advance of the evidentiary hearing pursuant to a schedule determined by the Hearing Officer, as it may be amended. Where a Participant intends to use a ~~document~~Document or other demonstrative evidence that has not been filed as part of written testimony in the conduct of cross-examination (other than ~~documents~~Documents that are to be produced by a non-Participant at the hearing pursuant to an order to produce ~~documents~~Documents), the Participant intending to use such ~~document~~Document or demonstrative evidence shall provide it to the other Participants and the Hearing Officer at least three (3) business days prior to the date at which the witness will be cross-examined at the evidentiary hearing.

Compliance Staff shall file the ~~documents~~Documents it intends to offer into evidence as its direct case, including the written testimony of its witnesses along with exhibits, schedules and attachments thereto, first. The Registered Entity shall file the ~~documents~~Documents it intends to offer into evidence as its direct case, which also may be responsive to Staff's direct case, including the written testimony of its witnesses along with exhibits, schedules and attachments thereto, second. Staff shall file as its rebuttal case the ~~documents~~Documents it intends to offer into evidence in response to the Registered Entity's direct case, including the written testimony of its witnesses along with exhibits, schedules and attachments thereto, third.

If appropriate due to the number and/or complexity of the issues, the Hearing Officer may allow for the Registered Entity to submit a rebuttal case that responds to Staff's rebuttal case, in which event the Hearing Officer shall also allow Staff to submit a surrebuttal case that responds to the Registered Entity's rebuttal case.

Each round of evidence shall be limited in scope to responding to the preceding round of evidence, except that the Registered Entity's direct case may exceed the scope of Staff's direct case if necessary for the Registered Entity to set forth its direct case fully.

The Participants shall file the ~~documents~~Documents they intend to offer into evidence in accordance with the Hearing Officer's schedule, as it may be amended. Such filings of written testimony and other evidence in advance of the evidentiary hearing shall not entitle the ~~documents~~Documents to be admitted into the evidentiary record. The Participants must offer their witnesses' testimony and other proposed evidence for admission into the evidentiary record during the evidentiary hearing.

Any Participant who fails, without good cause shown, to comply with the Hearing Officer's schedule for the filing of written testimony and other evidence in advance of the evidentiary hearing may be limited in the presentation of its evidence during the evidentiary hearing or have

its participation in the evidentiary hearing otherwise restricted by the Hearing Officer to avoid undue prejudice and delay.

1.5.10 Protective Orders

- a) All proceedings conducted pursuant to these Hearing Procedures, and any written testimony, exhibits, other evidence, transcripts, comments, briefs, rulings and other issuances, shall be non-public and shall be held in confidence by all Participants, except as the ERO (within the U.S., in accordance with the authorization previously granted by FERC to release information about a non-public proceeding) or FERC (in the case of U.S.-related information) or another Applicable Governmental Authority (in the case of non-U.S.-related information) authorizes or directs public disclosure of any portion of the record. In addition to this general proscription, at any time during a proceeding, the Hearing Officer, on his or her own motion or on the motion of any Participant or of any non-Participant ordered to produce ~~documents~~Documents, information or testimony, may enter a protective order to designate as proprietary and protect the confidential, proprietary or trade secret nature of any data, information or studies, or any other information the public release of which may cause a security risk or harm to a Participant.
- b) The following types of information will be considered entitled to protection through a protective order: (i) confidential business and market information, including information that is proprietary, commercially valuable, or competitively sensitive; (ii) ~~critical energy infrastructure information~~Critical Energy Infrastructure Information; (iii) information related to a Cybersecurity Incident; (iv) personnel information that identifies or could be used to identify a specific individual, or that reveals personnel, financial, medical or other personal information; (v) audit work papers; (vi) investigative files or ~~documents~~Documents that would disclose investigative techniques of Staff, any Compliance Enforcement Authority, the ERO or any federal, state or foreign regulatory authority. Nothing in this Subparagraph 1.5.10(b) shall require Staff to produce any ~~documents~~Documents it is entitled to withhold under Subparagraph 1.5.7(b).
- c) A motion for a protective order shall specify the proposed expiration date for the proprietary status of the data, ~~documents~~Documents or information, if any, and shall propose requirements or safeguards to be met for individuals participating in the proceeding to review the protected information while maintaining its proprietary status.
- d) A ~~document~~Document submitted and marked as proprietary, or a statement made at a hearing and identified as proprietary, shall be afforded proprietary treatment pending the timely submission of a motion to protect the confidential, proprietary or trade secret nature of that ~~document~~Document or statement and a ruling on such a motion by the Hearing Officer.
- e) The protective order shall identify the data, ~~documents~~Documents or information that will be accorded proprietary treatment; the individuals participating in the proceeding, by category or otherwise, entitled to view the proprietary information; and the requirements, conditions or safeguards that must be met before an individual may view the information.
- f) A public redacted version of each ~~document~~Document and transcript that contains information that is protected pursuant to this Paragraph must be filed with the proprietary

version and must be served on each Participant for distribution to those individuals participating in the proceeding who are not entitled to view the proprietary information.

- g) Should it be necessary to address proprietary information during a hearing, the Hearing Officer shall, while the information is being addressed, close the hearing to all individuals other than those entitled to view the proprietary information in accordance with the protective order.

1.5.11 Pre-Evidentiary Hearing Memorandum

The Hearing Officer or the [HEARING BODY] may request, as needed on a case by case basis due to the number or complexity of the issue(s), the submission of memoranda prior to the evidentiary hearing that outline each Participant's position on the issue(s) in dispute, the key facts and arguments, and the applicable Reliability Standard, rules, orders or other authority. The purpose of such memoranda will be to aid the Hearing Officer and [HEARING BODY] in preparation for the evidentiary hearing. A Participant will not be deemed to have waived any issue, fact or argument that is not set forth in a pre-evidentiary hearing memorandum. The Hearing Officer may establish page limitations on such submissions.

1.6 Evidentiary Hearing Procedure

1.6.1 Evidentiary Hearings

The purpose of the evidentiary hearing shall be to admit the Participants' evidence into the record, and for each Participant to have the opportunity to cross-examine the other Participant's witnesses. A schedule for briefs, unless waived by the Participants, shall be set at the conclusion of the evidentiary hearing. The evidentiary hearing also may be used to address any other issue pending between the Participants.

1.6.2 Order of Receiving Evidence

In all proceedings Compliance Staff shall open and close.

1.6.3 Opening and Closing Statements

Opening and closing statements will not be made during the evidentiary hearing as a matter of course except that such statements may be allowed when requested by a Participant, and shall be required when requested by the Hearing Officer or the [HEARING BODY]. Any Participant's request for such statements, or a Hearing Officer or [HEARING BODY] notice requiring such statements, shall be made at least ten (10) days in advance of the start of the evidentiary hearing.

1.6.4 Right of Participant to Present Evidence

Subject to compliance with the requirements of these Hearing Procedures concerning the timing of submission of written testimony and other evidence, a Participant has the right to present such evidence, to make such objections and arguments, and to conduct such cross-examination as may be necessary to assure the true and full disclosure of the facts.

1.6.5 Exhibits

All material offered in evidence, except oral testimony allowed by the Hearing Officer or the testimony of a non-Participant pursuant to an order to produce or provide ~~documents~~Documents, information or testimony, shall be offered in the form of an exhibit. Each exhibit must be marked for identification. A Participant must provide the court reporter with two (2) copies of every exhibit that the Participant offers into evidence, and will provide copies of any exhibit not served in advance of the evidentiary hearing to the Participants and the Hearing Officer.

1.6.6 Witness Attendance at Evidentiary Hearing

Each witness shall attend the evidentiary hearing in person unless a Participant has been informed in advance of the evidentiary hearing that all other Participants waive cross-examination of the witness and neither the Hearing Officer nor the members of the [HEARING BODY] have any questions for the witness, in which event the witness does need not be present at the evidentiary hearing. All testimony offered at the evidentiary hearing is to be under oath or affirmation. If a witness is not required to attend the evidentiary hearing, then the Participant on whose behalf the witness prepared testimony shall submit an affidavit of the witness attesting to the veracity of the witness' testimony, and the Participant shall be allowed to introduce the witness' testimony, and the exhibits, schedules and attachments thereto, into the evidentiary record based on such affidavit.

1.6.7 Admission of Evidence

Compliance Staff shall offer its exhibits into evidence first and the Registered Entity second, unless the Participants agree otherwise.

Except for witnesses who are not required to attend the evidentiary hearing, the Participants shall call each witness in turn. Following the witness' swearing in, the witness shall attest to the veracity of his or her written testimony. The witness may identify any language and/or figures in his or her written testimony or exhibits that the witness would like to change or correct. Subject to objection, such changes or corrections may be allowed at the Hearing Officer's discretion for the purpose of obtaining a full, accurate and complete record without imposing undue delay or prejudice on any Participant. The Participant whose witness has made changes or written corrections to written testimony and exhibits shall file corrected copies with the Clerk and provide corrected copies to the Hearing Officer and other Participant.

Once a witness has attested to the veracity of his or her testimony, the Participant on whose behalf the witness is testifying shall move for admission of the witness' testimony, including all exhibits, schedules and attachments thereto, into evidence. Other Participants may object to the introduction of the witness' testimony, or any part thereof, as set forth in Paragraph 1.6.11. Subject to the Hearing Officer's ruling on the objection, the witness' testimony shall be admitted into evidence. The witness shall then be turned over for cross-examination by other Participants, and for any questions by the Hearing Officer or any member of the [HEARING BODY], in accordance with Paragraph 1.6.14, and then for redirect examination in accordance with Paragraph 1.6.15. Witnesses shall be cross-examined on all previously-served testimony (direct, rebuttal or surrebuttal) when they first take the witness stand.

Except (i) in exceptional cases and upon a showing of good cause and (ii) witnesses testifying pursuant to an order to produce or provide ~~documents~~Documents, information or testimony issued to a non-Participant, no witness shall be allowed to testify during the evidentiary hearing

unless a Participant has served the witness' written testimony in advance of the evidentiary hearing in accordance with the schedule established by the Hearing Officer. Due to the undue prejudice such surprise witness testimony would impose on other Participants, it is the Compliance Enforcement Authority's policy to discourage witness testimony at an evidentiary hearing when a Participant has not served the witness' written testimony in advance of the evidentiary hearing. If such testimony is allowed, sufficient procedural steps shall be taken by the Hearing Officer to provide the other Participants with a fair opportunity for response and cross-examination.

1.6.8 Evidence that is Part of a Book, Paper or Document

When relevant and material matter offered in evidence is embraced in a book, paper or ~~document~~Document containing other matter that is not material or relevant, the Participant offering the same must plainly designate the matter offered as evidence, and segregate and exclude the material not offered to the extent practicable. If the material not offered is in such volume as would unnecessarily encumber the record, such book, papers or ~~document~~Document will not be received in evidence but may be marked for identification and, if properly authenticated, the relevant or material matter may be read into the record, or, if the Hearing Officer so directs, a separate copy of such matter in proper form shall be offered as an exhibit. All other Participants shall be afforded an opportunity to examine the book, paper or ~~document~~Document and to offer in evidence in like manner other portions thereof if found to be material and relevant.

1.6.9 Stipulations

The Participants may stipulate to any relevant fact or the authenticity of any relevant ~~document~~Document. Stipulations may be made in writing or entered orally in the record. Notwithstanding stipulation, the Hearing Officer may require evidence of the facts stipulated in order to provide a complete evidentiary record on which to base the final order.

1.6.10 Official Notice

Where relevant and material to the subject matter of the proceeding, the Hearing Officer may, upon request of a Participant, take official notice of any of the following:

- 1) Rules, regulations, administrative rulings and orders, written policies of governmental bodies, and rulings and orders of other Compliance Enforcement Authorities.
- 2) The orders, transcripts, exhibits, pleadings or any other matter contained in the record of other docketed proceedings of the Compliance Enforcement Authority.
- 3) State, provincial and federal statutes and municipal and local ordinances.
- 4) The decisions of state, provincial and federal courts.
- 5) Generally recognized scientific or technical facts within the specialized knowledge of the Compliance Enforcement Authority.
- 6) All other matters of which the courts of the United States may take judicial notice.

All requests to take official notice shall be submitted in advance of the evidentiary hearing in accordance with a schedule established by the Hearing Officer. Before ruling on a request to take official notice, the Hearing Officer shall afford the other Participant opportunity to object or to show the contrary to the matter for which official notice is requested. An accurate copy of any item officially noticed shall be introduced into the record in the form of an exhibit presented by the Participant requesting official notice unless waived by the Participants and approved by the Hearing Officer. Any information officially noticed and not presented as an exhibit shall be set forth in a statement on the record.

1.6.11 Admissibility of Evidence

Any evidence offered, including that included in a book, paper or ~~document~~Document pursuant to Paragraph 1.6.8, shall be subject to appropriate and timely objections. Any Participant objecting to the admission or exclusion of evidence must state the grounds for objection.

The admission of evidence shall not be limited by the generally recognized rules of evidence as applied in the courts of the United States or of the states, although the Hearing Officer may take such rules of evidence into consideration in ruling on the admissibility of evidence. The Hearing Officer will exercise discretion in the admission of evidence based upon arguments advanced by the Participants, and shall admit evidence if it is of a type commonly relied upon by reasonably prudent persons in the conduct of their affairs. The Hearing Officer may only exclude material from the record in response to a motion or objection by a Participant.

Formal exception to a ruling on admissibility of evidence need not be taken to be preserved.

1.6.12 Offer of Proof

Any Participant who has had evidence excluded may make an offer of proof on the record. The offer of proof may consist of a statement made on the record of the substance of the evidence that the Participant claims would have been adduced, or any written or documentary exhibit that the Participant sought to introduce. Any such exhibit shall be retained as part of the record.

1.6.13 Reservation of Evidentiary Ruling

The Hearing Officer shall rule upon any objection to the admissibility of evidence at the time the objection is made; provided that the Hearing Officer has discretion to reserve such a ruling or to require the Participants to file written arguments in relation thereto. If the Hearing Officer reserves the ruling, appropriate steps shall be taken during the evidentiary hearing to ensure a full, complete and accurate record in relation to the objected to evidence in the event the objection to the evidence's admissibility is overruled.

1.6.14 Cross-Examination

Each witness shall be tendered for cross-examination subsequent to the admission of the witness' testimony into the evidentiary record. Each Participant shall have the right to cross-examine each witness of any other Participants. A Participant may waive cross-examination of any witness. The Hearing Officer and any member of the [HEARING BODY] may ask the witness questions following the conclusion of the witness' cross-examination by the other Participant, and prior to the witness' redirect examination pursuant to Paragraph 1.6.15. If a member of the

[HEARING BODY] seeks to ask a witness questions, the member shall do so by submitting the question in writing to the Hearing Officer, and the Hearing Officer shall ask the question of the witness.

1.6.15 Redirect Examination

A Participant shall be entitled to conduct redirect examination of each of the Participant's witnesses who are subject to cross-examination or questions of the Hearing Officer or a member of the [HEARING BODY]. Any redirect examination shall be limited in scope to the witness' cross-examination and questions of the Hearing Officer and members of the [HEARING BODY]. If a member of the Hearing Body seeks to ask a witness questions, the member shall do so by submitting the question in written form to the Hearing Officer, and the Hearing Officer shall ask the question of the witness.

1.6.16 Examination of Adverse Participant

Any Participant may call any adverse Participant, or any employee or agent thereof, during the evidentiary hearing to provide oral testimony on the Participant's behalf, and may conduct such oral examination as though the witness were under cross-examination. If a Participant intends to call an adverse Participant for examination, it shall give notice to the Hearing Officer and all other Participants setting forth the grounds for such examination at least fourteen (14) days in advance of the evidentiary hearing, and the Participant who, or whose employee or agent, is sought to be called shall file any objection at least seven (7) days in advance of the evidentiary hearing. Any Participant may conduct oral examination of a witness testifying pursuant to an order to produce or provide ~~documents~~[Documents](#), information or testimony issued to a non-Participant, as though the witness were under cross-examination.

1.6.17 Close of the Evidentiary Record

The Hearing Officer shall designate the time at which the evidentiary record will be closed, which will typically be at the conclusion of the evidentiary hearing. Evidence may not be added to the evidentiary record after it is closed, provided that the Hearing Officer may reopen the evidentiary record for good cause shown by any Participant.

1.7 Post- Evidentiary Hearing Procedure

1.7.1 Briefs

- a) At the close of the evidentiary hearing, Participants may file initial and reply briefs.
- b) Briefs shall be concise, and, if in excess of twenty (20) pages, excluding appendices, shall contain a table of contents. Statements of fact should be supported by record citations.
- c) The Hearing Officer will prescribe the time for filing briefs, giving due regard to the nature of the proceeding, the extent of the record, the number and complexity of the issues, and the objective of expedition.
- d) Unless the Hearing Officer prescribes otherwise, all Participants shall file initial and reply briefs simultaneously.

- e) Participants' reply briefs shall be limited in scope to responding to arguments and issues raised in other Participants' initial briefs.
- f) The Hearing Officer may, with the agreement of the Participants, allow oral closing statements to be made on the record in lieu of briefs.
- g) The Hearing Officer may establish reasonable page limitations applicable to briefs.

1.7.2 Other Pleadings

Post-hearing pleadings other than briefs are permitted, but, absent good cause shown, such pleadings may not seek to introduce additional evidence into the record.

1.7.3 Draft Initial Opinions

The Hearing Officer may permit or require Participants to file draft initial opinions that set forth the Participants' proposed findings of fact and conclusions.

1.7.4 Hearing Officer's Initial Opinion

Except as otherwise ordered by the [HEARING BODY], at the conclusion of the evidentiary hearing, and following the submission of initial and reply briefs and draft orders, if any, the Hearing Officer shall prepare an initial opinion for the [HEARING BODY]'s review and consideration. The initial opinion shall include a statement of each finding and conclusion, and the reasons or basis therefore, for all material issues of fact, law or discretion presented on the record. The initial opinion also shall contain the appropriate orders to dispose of the proceeding, including any Penalty, Mitigation Plan or Remedial Action Directive that the Hearing Officer proposes the [HEARING BODY] require. If the initial opinion proposes a Penalty, the initial opinion shall include a proposed ~~notice~~Notice of Penalty. The initial opinion shall note if the subject of the proceeding has been deemed to involve a Cybersecurity Incident, if any information in the proceeding was deemed to be Critical Energy Infrastructure Information, or if any information in the proceeding is the subject of a protective order pursuant to Paragraph 1.5.10.

1.7.5 Exceptions

- a) Within twenty-one (21) days after service of the initial opinion, or such other time as is fixed by the Hearing Officer, any Participant may file exceptions to the initial opinion in a brief designated "brief on exceptions" and, within fourteen (14) days after the time for filing briefs on exceptions or such other time as is set by the Hearing Officer, any Participant may file as a reply, a "brief in reply to exceptions."
- b) Exceptions and replies thereto with respect to statements, findings of fact or conclusion in the initial opinion must be specific and must be stated and numbered separately in the brief. With regard to each, the Participant must specify each error asserted, and include a concise discussion of any policy considerations applicable and any other arguments in support of the Participant's position. Suggested replacement language for all statements to which exception is taken must be provided. Exceptions and arguments may be filed (1) together in one brief; or (2) in two separate documents, one designated as the brief

containing arguments, and the other designed "Exceptions," containing the suggested replacement language.

- c) Arguments in briefs on exceptions and replies thereto shall be concise and, if in excess of twenty (20) pages, shall contain a table of contents.
- d) Participants shall not raise arguments in their briefs in reply to exceptions that are not responsive to any argument raised in any other Participant's brief on exceptions.
- e) Statements of fact should be supported by citation to the record.
- f) The Hearing Officer may establish reasonable page limitations applicable to arguments included in briefs on exception and briefs in reply to exceptions. Such page limitations shall not apply to a Participant's proposed replacement language.
- g) Unless good cause is shown, if a Participant does not file a brief on exceptions, or if a Participant filed a brief on exceptions that does not object to a part of the initial opinion, the Participant shall be deemed to have waived any objection to the initial opinion in its entirety, or to the part of the initial opinion to which the Participant did not object, whichever applies. This provision shall not prohibit the Participant, in its brief in reply to exceptions, from responding to another Participant's exceptions to such part of the initial opinion or from proposing alternative replacement language to the replacement language proposed by the other Participant for such part of the initial opinion.

1.7.6 Oral Argument

The [HEARING BODY] may elect to hear oral argument. If oral argument is held without briefs having been filed, Participants will be given the opportunity to present argument on all issues. If oral argument is held where briefs have been filed, argument may be limited to issues identified by the [HEARING BODY]. The [HEARING BODY] will direct the Clerk to issue a notice of oral argument that identifies the date, time, place and issues for the argument.

The presentation of written materials or visual aids is permitted at oral argument. To the extent such materials or aids contain factual information, they shall be supported by the record, and shall contain accurate record citations. Such materials or aids may not contain new calculations or quantitative analyses not presented in the record, unless they are based on underlying data contained in the record. Copies of all written materials or visual aids to be presented at oral argument shall be served on all Participants not less than 48 hours prior to the time and date of oral argument.

1.7.7 Additional Hearings

After the evidentiary record has been closed but before issuance of an initial opinion, the Hearing Officer may reopen the evidentiary record and hold additional hearings. Such action may be taken on the Hearing Officer's or the [HEARING BODY]'s own motion if there is reason to believe that reopening is warranted by any changes in conditions, or by the need to compile a complete evidentiary record on which to base the final order. Any Participant may file a motion to reopen the record, which shall contain the reasons for reopening, including material changes in conditions or the identification of additional evidence that should be included in the record, and a

brief statement of proposed additional evidence and an explanation why such evidence was not previously adduced.

1.7.8 [HEARING BODY] Final Order

Following the receipt of the initial opinion, any exceptions and replies thereto, and oral argument, if any, the [HEARING BODY] shall issue its final order. Issuance of a final order shall require (i) a quorum of the [HEARING BODY], which shall be (after any recusals, disqualifications and appointments of replacement members) at least fifty (50) percent of the number of members normally assigned to the [HEARING BODY], and (ii) majority vote of the members of the [HEARING BODY] voting on the final order (which number of members voting shall not be less than a quorum). The [HEARING BODY] shall strive, but shall not be required, to issue its final order within thirty (30) days following the last to occur of the initial opinion, exceptions or replies thereto, or oral argument. The final order may adopt, modify, amend or reject the initial opinion in its entirety or in part. The final order shall include a statement of each finding and conclusion, and the reasons or basis therefore, for all material issues of fact, law or discretion presented on the record. The [HEARING BODY] will base its determinations in the final order on the record. The final order also shall contain the appropriate orders to dispose of the proceeding, including any Penalty, sanction, Remedial Action Directive or Mitigation Plan required. If the final order imposes a Penalty, it shall be entitled “Final Order and Notice of Penalty”. The final order shall note if the subject of the proceeding has been deemed to involve a Cybersecurity Incident, if any information in the proceeding was deemed to be Critical Energy Infrastructure Information, or if any information in the proceeding is the subject of a protective order issued pursuant to Paragraph 1.5.10. The [HEARING BODY] shall direct the Clerk to serve the final order on the Participants. The service of the final order shall include a notice informing the Participants of their appeal rights to the ERO or to FERC, as applicable.

1.7.9 The Record

The Clerk shall maintain the record for all dockets. The record shall include any of the following, including all attachments thereto and documents filed therewith, that exist in any docket:

- 1) Notice of Alleged Violation and Registered Entity’s response thereto;
- 2) Registered Entity’s proposed Mitigation Plan and Staff’s statement identifying its disagreement(s) therewith;
- 3) Remedial Action Directives and the Registered Entity’s notice contesting the Remedial Action Directive;
- 4) Registered Entity’s request for a hearing;
- 5) Participant filings, motions, and responses;
- 6) Notices, rulings, orders and other issuances of the Hearing Officer and [HEARING BODY];
- 7) Transcripts;

- 8) Evidence received;
- 9) Written comments submitted in lieu of written testimony;
- 10) Matters officially noticed;
- 11) Offers of proof, objections and rulings thereon, and any written or documentary evidence excluded from the evidentiary record;
- 12) Briefs, pre-evidentiary hearing memorandums, and draft opinions;
- 13) Post-hearing pleadings other than briefs;
- 14) The Hearing Officer's initial opinion;
- 15) Exceptions to the Hearing Officer's initial opinion, and any replies thereto;
- 16) The [HEARING BODY]'s final order, any ~~notice~~[Notice](#) of Penalty issued therewith, and the Clerk's notice transmitting the final order to the Participants;
- 17) All notices of ex parte communications; and
- 18) Any notifications of recusal and motions for disqualification of a member of the [HEARING BODY] or Hearing Officer of Technical Advisor and any responses or replies thereto.

1.7.10 Appeal

A Final Order of the [HEARING BODY] may be appealed to NERC in accordance with NERC's Rules of Procedure, Section ~~410.409~~[409](#). The Clerk shall transmit to NERC the record of any docket that is the subject of an appealed final order.

1.8 Settlement

Settlements may be entered into at any time pursuant to Section ~~5.45.6~~[5.6](#) of the NERC Compliance Monitoring and Enforcement Program and the Compliance Enforcement Authority's settlement procedures, [provided, that the Compliance Enforcement Authority may decline to engage in or continue settlement negotiations after a Possible Violation or Alleged Violation becomes a Confirmed Violation.](#)

1.9 Remedial Action Directives

1.9.1 Initiation of Remedial Action Directive Hearing

Staff] may issue a Remedial Action Directive to a Registered Entity at any time, including during any proceeding related to an ~~alleged violation~~[Alleged Violation](#) of a Reliability Standard. The Remedial Action Directive shall be delivered to the Registered Entity in accordance with Section 7.0 of the NERC Compliance Monitoring and Enforcement Program. The Compliance Enforcement Authority will notify NERC within two (2) days after its Staff issues a Remedial Action Directive.

The Registered Entity may contest the Remedial Action Directive by filing a written notice with the Clerk of the Compliance Enforcement Authority that states that the Registered Entity contests the Remedial Action Directive and that the Registered Entity requests a Remedial Action Directive hearing. The Registered Entity shall attach a copy of the Remedial Action Directive to its written notice. The Registered Entity must provide such notice within two (2) business days following the date of actual receipt (as defined in Section 7.0 of the NERC Compliance Monitoring and Enforcement Program) of the Remedial Action Directive. If the Registered Entity does not give written notice to the Compliance Enforcement Authority within the required time period, the Registered Entity shall be deemed to have waived its right to contest the Remedial Action Directive.

The Clerk shall assign a docket number, and issue a notice of hearing that sets forth the date, time and place at which the hearing will convene pursuant to Paragraph 1.4.1.

1.9.2 Remedial Action Directive Hearing Procedure

Hearings to address Remedial Action Directives shall be conducted only under the expedited hearing process set forth in this Paragraph 1.9.2. The full hearing procedures described in Sections 1.4 to 1.7 are applicable to the Remedial Action Directive hearing unless the context of a provision is inconsistent with or otherwise renders it inapplicable to the procedures set forth in this Paragraph.

The Remedial Action Directive hearing may be presided over by a Hearing Officer and will be conducted according to the following guidelines:

- a) The Hearing Officer or the [HEARING BODY] will hold a prehearing conference within two (2) business days after receipt of the Registered Entity's request for a hearing.
- b) An evidentiary hearing will be conducted on the matter, in person or by teleconference, within seven (7) business days after the prehearing conference.
- c) At the evidentiary hearing, Staff shall present oral witness testimony and evidence to show why the Remedial Action Directive should be complied with, and the Registered Entity shall present oral witness testimony and evidence to show why the Remedial Action Directive is not necessary or should be modified. All witness testimony shall be rendered under oath.
- d) At the evidentiary hearing, the Participants shall have the opportunity to make opening statements. In addition, the Participants shall have the opportunity to make closing arguments, and Staff shall have the opportunity to make a rebuttal to the Registered Entity's closing argument.
- e) The Participants may file initial briefs and reply briefs, and/or draft opinions, on an expedited schedule set by the Hearing Officer or the [HEARING BODY]. Oral argument shall not be held.
- f) The [HEARING BODY] shall issue a summary written decision within ten (10) days following the hearing, stating whether the Registered Entity shall or shall not be required

to comply with the Remedial Action Directive and identifying any modifications to the Remedial Action Directive that it finds appropriate.

Within thirty (30) days following issuance of its summary written decision, the [HEARING BODY] shall issue a full written decision. The written decision shall state the conclusions of the [HEARING BODY] with respect to the Remedial Action Directive, and shall explain the reasons for the [HEARING BODY]'s conclusions.

Section I — Executive Summary

Overview

The NERC Compliance and Certification Committee (CCC) is responsible for developing and approving these processes. The CCC is comprised of representatives from a diverse set of industry segments and therefore represents the industry as a whole. Industry participants have input into the development and revision of this process through their segment representatives on the CCC.

The purpose of this document is threefold: (1) to define the registration process and to identify which functional entities must register as owners, operators, and users of the bulk power system required to comply with reliability standards; (2) to define the organization certification process; and (3) to define the transitional organization certification process and to identify which functional entities are eligible to use the transitional organization certification process.

In the fall of 2004 NERC requested that entities responsible for reliability coordinator, balancing authority, transmission operator, planning authority, and transmission planner function identify to their respective regional entities which of these functions they were currently responsible for. At that time information concerning the name of the organization, a contact name, and the footprint for which they had responsibility was required. Although the Functional Model identified 16 entities, only these five entities needed to provide information. Certification standards associated with the NERC Reliability Standards are under development and additional information and relationships need to be defined for these five entities as well as other functional entities.

To Whom Does This Document Apply?

All industry participants responsible for, or intending to be responsible for, the following functions must register with NERC through the organization registration process. The entities are defined in the NERC Glossary of Terms used in reliability standards with responsibilities designated by the individual standards.

	Entities that Must Register by 3/15/2006	Entities that will need to be certified
Reliability Coordinator	√*	√
Transmission Operator	√*	√
Balancing Authority	√*	√
Planning Authority	√*	
Transmission Planner	√*	
Transmission Service Provider	√	
Transmission Owner	√	
Resource Planner	√	
Distribution Provider	√	
Generator Owner	√	
Generator Operator	√	
Load-serving Entity	√	
Purchasing-Selling Entity	√	
Market Operator		
standards Developer		
Compliance Monitor	√	

*These entities may have already submitted initial mapping information through a pre-registration process, and must now complete a full registration which includes, but is not limited to, updating and verifying this previous information.

What Processes Will Be Used?

	Registration	Certification
Existing Certified Control Areas	√	√*
Existing Non-Certified Control Areas	√	√
Existing Reliability Coordinators	√	√
New BA, TOP, and RC	√	√
TP and PA	√	n.a.
Other FM entities	√	n.a.

*At its discretion, a regional entity may accept use of the transitional certification process in lieu of the full certification process.

When will These Processes Begin?

Registration began in January of 2006. Registration for new entities will be ongoing. If a registered entity's information changes, a new application form indicating the changes must be submitted.

Certification will begin upon implementation of the organization certification standards, expected to be about September 1, 2006, and must be completed for the existing entities by December 31, 2008. Certification will be ongoing for new entities.

Transitional certification of certified control areas to the certified functional entities will begin upon implementation of the organization certification standards, expected to be about September 1, 2006, and must be completed by December 31, 2008.

Where to Access and Submit Form(s)?

Registration and certification forms will be available on the NERC Web site and may be available by the regional entities through their respective Web sites. Completed forms are to be sent electronically to the compliance and certification manager of the applicant's regional entity.

According to the *Role of the Regions*¹ document, it is desirable that entities operate within a single reliability region; however, if an applicant operates in more than one region, they must complete and submit separate registration applications to each of those regions.

Roles and Responsibilities

The following is a high-level overview of the roles and responsibilities in the registration and certification processes:

NERC

1. Oversight of entity processes performed by the regional entities, including:
 - a. Governance as per the regional entity's delegation agreement with NERC.
 - b. Coordination of process execution when applicants are registering and/or certifying in multiple regional entities.
2. NERC acronym management, including:
 - a. Issue acronym to entity and inform regional entity.
 - b. Ensure entities have only one acronym for all regional entities in which they operate.
3. Make modeling changes based on registration information.
4. Maintain accurate registration and certification records.
5. Publish up-to-date list of functional entities.

¹ "Role of the Regional Reliability Councils: Follow-up Report" prepared by the Regional Managers Committee for the NERC Members Committee meeting on May 2, 2005.

Regional Entity

1. Performs data collection and mapping of footprints.
2. Approves entity registration applications.
3. Approves entity certification applications.
4. Notifies NERC of entities registered within the regional entity.
5. Notifies NERC of entities certified within the regional entity.
6. Ensures entity obtains acronym from NERC.
7. Ensures that all bulk power system assets within its footprint are within the footprint of a registered entity.

Applicant

1. Complete and submit registration and/or certification application.
2. Submit updates to registration and/or certification information as necessary and/or requested.
3. Respond to regional entity and/or NERC questions pertaining to registration and/or certification.
4. Provide documentation or other evidence requested or required to verify compliance with certification standard.

Section II — Organization Registration and Certification Processes

Regional Entity Process

The NERC organization registration and certification processes are regionally administered. Pursuant with its delegation agreement with NERC, each regional entity is responsible for registering and certifying industry participants within their geographical footprint. Each regional entity must use the following NERC processes.

Organization Registration — Entities Required to Register

All industry participants responsible for one or more of the functions shown must register as a performer of each function through the organization registration process. These entities are defined in the NERC Glossary of Terms used in reliability standards with responsibilities designated by the individual standards.

- Reliability Coordinator
- Transmission Operator
- Balancing Authority
- Planning Authority
- Transmission Planner
- Transmission Service Provider
- Transmission Owner
- Resource Planner
- Distribution Provider
- Generator Owner
- Generator Operator
- Load-Serving Entity
- Purchasing-Selling Entity
- Compliance Monitor

Organization Certification

According to NERC organization certification standards, all entities responsible for the reliability coordinator, transmission operator, and/or balancing authority functions shall be certified. The objective is to have the entire NERC footprint covered by certified reliability coordinator, transmission operator, and balancing authority prior to January 1, 2009. As of January 1, 2009, control area will no longer be a recognized term at NERC. Historically, the certification process typically takes three to nine months to complete.

There are two processes through which organization certification will be accomplished.

1. **Transitional Organization Certification Process** — Previously certified control areas electing to become certified as a transmission operator and/or balancing authority function may be able to utilize the transitional organization certification process at the discretion of the regional entity. Existing certified control areas that wish to use the transitional organization certification process must do so prior to the expiry of the control area functional designation on January 1, 2009.

A regional entity's discretion respecting transitional certification extends to whether to allow the use of this process in their regional entity at all, as well as to whether they permit a given applicant to use it. Regional entity's decisions in this regard remain subject to NERC oversight and governance pursuant to approved delegation agreements.

Applicants wishing to use this process must have been certified — or must first complete their certification — as a control area in a manner, including documentation, that clearly and completely demonstrates full compliance with all certification process requirements that the transitional certification process provides relaxation for.

2. **Organization Certification Process** — All non-certified entities or a new entities seeking certification as a reliability coordinator, transmission operator, or balancing authority function must complete the organization certification process for each function.

Existing non-certified entities currently responsible for balancing authority and/or transmission operator functions can be certified as a control area. This control area certification process must be completed prior to December 1, 2006. However, the entity will have to be certified as a functional entity using the “transitional” or “regular” certification process before January 1, 2009.

An existing control area or reliability coordinator currently responsible for reliability coordinator, transmission operator, and/or balancing authority functions and electing to:

1. Become certified as those functional model entities will be able to do so either all at the same time or one at a time as long as they become certified in all applicable functions prior to January 1, 2009.
2. Become certified in only one or two of the three can do so at any time but must continue to perform the other function(s) until such time as another entity becomes certified to perform those functions. If no other entity elects to become certified in the uncertified functions, then the control area or reliability coordinator must become certified in those functions prior to January 1, 2009.
3. Not become certified in any of the functions must continue to perform those functions until such time as another entity becomes certified to perform those functions. If no other entity becomes certified to perform any one or all of those functions, then the control area or reliability coordinator must become certified to perform the functions prior to January 1, 2009.

Section III — Organization Registration Procedure

1. The applicant seeking registration shall begin the process by submitting a completed registration application to the compliance and certification manager in each of the regional entities in which it intends to perform that function.
2. For applicants that span multiple regional entities, all affected regional entities will inform NERC of the request. In all such cases, NERC will be the coordinator and will notify the applicant of NERC's role.
3. Entities that have NERC acronyms shall use them on the form.
 - a. If an entity does not have an acronym, NERC may initiate assignment of one or the entity can request one.
 - b. An entity responsible for more than one function can use a single acronym or can use separate acronyms for each function it performs.
 - c. Acronyms must be activated before they can be used.
 - d. NERC activates acronyms.
 - e. If/as applicable, acronyms will not be activated until the registration process is complete.
 - f. Entities requiring certification will not have their acronym(s) activated until they have been certified.
4. All affected regional entities shall evaluate the submitted information and determine if any information is incomplete.
5. The regional entity region or NERC shall inform the applicant of any inaccurate or incomplete data.
6. When the data is complete and accurate the regional entity region or NERC shall notify the applicant.
7. The regional entity region shall inform NERC that the registration process is complete.
8. If/as applicable, NERC informs the regional entity when the acronym has been activated.
9. The regional entity or NERC notifies the applicant that the registration process is complete.
10. For applicants that are required to be certified, the regional entity or NERC shall notify the applicant when the certification process can begin.

Registration Flow Diagram

Transitional Certification

(only available until January 1, 2009)

The transitional organization certification process may apply, at the discretion of the regional entity, to a control area previously certified to perform as a control area, electing to be certified as a balancing authority and/or transmission operator:

1. The entity will have to complete the appropriate certification self assessment questionnaire.
2. The entity will have to self-assess its ability to perform any additional requirements that they are not currently certified to perform.
3. The entity by affidavit (a document signed by an officer of the company) will have to verify that they are capable of continuing to perform the requirements of the balancing authority or transmission operator that they are currently responsible for.
4. The Certification Review Team shall be formed. That team, using the above documents, shall determine whether the applicant meets NERC's organization certification requirements. This may be done without a site visit; however, the review team has at its disposal all of the tools accorded any review team (additional questionnaire, site visit, neighboring entity questionnaire, previous compliance issues, results of previous readiness audits, etc.).
 - a. An on-site visit is required of all entities that have not previously undergone a site visit for control area certification or readiness audit.

Section IV — Transitional Certification Procedure

Certification Process

1. Applicants seeking certification:
 - a. In a single NERC regional entity shall initiate the certification process by completing a certification application and sending it to the compliance and certification manager in the regional entity. The regional entity in which the applicant plans to perform will conduct the certification process.
 - b. In multiple regional entities shall initiate the certification process by completing a certification application and sending it to the compliance and certification manager in each affected regional entity, each of which will inform NERC. NERC will be the coordinator and will notify the applicant of NERC's role. NERC shall coordinate the certification process among the affected regional entities.
2. Upon receipt, the application will be assessed for completeness and accuracy. When the application is deemed complete and accurate it will be accepted; at that time the applicant and the regional entity or NERC shall agree to a timeline, including specific milestones for the certification process. The applicant and the regional entity or NERC shall complete the NERC organization certification process within nine months of the date of acceptance of the application unless agreed to differently by all parties involved in the process.
3. The regional entity or NERC shall require the entity to complete the transitional certification self-assessment of its ability to perform any additional requirements that they are not currently certified to perform. The regional entity or NERC shall provide all participants with a copy of expectations regarding confidentiality and retention of all data reporting, completed questionnaires and forms, reports, and recommendations associated with the documentation it provides and receives.
4. The regional entity or NERC shall require the entity to complete an affidavit (a document signed by an officer of the company) verifying capability of continuing to perform the requirements of the organization certification standard that they are currently responsible for.
5. The regional entity or NERC shall assemble a Certification Review Team charged with the responsibility of determining if the applicant meets NERC's organization certification requirements. The review team members shall subject themselves to NERC confidentiality agreements for any data or information made available to them through the certification review process.
 - a. If the applicant objects to any member of the certification team, the applicant must make that known, in writing, to the regional entity or NERC listing the reasons for the objection.
 - b. The regional entity will either replace the team member or respond with written justification for keeping the member on the team.
6. The review team shall consist of a minimum of three individuals including a regional entity representative and a NERC representative at NERC's option. The selected individuals shall represent at least three of the categories listed below:

- a. Balancing Authority
- b. Reliability Coordinator
- c. Transmission Operator
- d. Transmission Owner
- e. Transmission Service Provider
- f. Transmission Planner
- g. Planning Authority
- h. Generation Operator
- i. Generation Owner
- j. Distribution Provider
- k. Representative from NERC staff
- l. Representative from regional entity staff
- m. Representative from another regional entity
- n. Representative from an RTO or ISO, when applicable

The balancing authority review team shall minimally consist of a balancing authority and its reliability coordinator; the reliability coordinator review team shall minimally consist of a reliability coordinator, one of its balancing authorities, and one of its transmission operators; and the transmission operator review team shall minimally consist of a transmission operator and reliability coordinator.

- o. Review team members shall not be employees of or have a direct financial interest in the applicant or any of its affiliates.
 - p. Review processes that involve an entity that is responsible for a function identified in the Reliability Standards across regional entity boundaries shall have a review team that includes at least one representative from each of the affected regional entities. Each individual regional entity shall select its representative to the team.
- 7. The regional entity or NERC, with agreement of the applicant and all other affected regional entities, may elect to contract an independent review team.
 - 8. The review team shall identify any deficiencies (to both the applicant and to the regional entities) that must be resolved to the satisfaction of the review team prior to the review team making a recommendation to certify.

9. The review team shall formulate a certification recommendation based on:
 - a. Data collected and validated from the questionnaires, if applicable.
 - b. Data collected during a previous control area or readiness audit.
 - c. Information, demonstrations, and reviews provided as part of a follow-up to correct identified deficiencies.

10. The review team shall support its recommendation through a written report. All members of the review team shall have an equal voice in the certification recommendation. This allows for a minority opinion if the review team cannot reach a consensus.
 - a. If the applicant intends to operate in a single NERC regional entity, the review team shall make a recommendation to the regional entity. The regional entity shall approve or disapprove the certification. The regional entity shall notify NERC of the certification decision.
 - b. If the applicant intends to operate in multiple regional entities, the review team shall make a recommendation to those regional entities. All affected regional entities must approve granting of the certification or the certification shall be denied.
 - c. The regional entity or NERC shall verify the regional entity approvals prior to allowing certification. The regional entity shall notify NERC of the certification decision.

11. The regional entity or NERC (in consultation with the affected regional entities) may grant a time extension, not to exceed 180 days, to the applicant.
 - a. If the applicant fails to meet the conditions set by the regional entity or NERC, within the granted timeframe, the applicant's request for certification shall be denied.
 - b. If the applicant meets the conditions set by the regional entity(s), within the granted timeframe, the regional entity or NERC (in consultation with the affected regional entities) shall respond to the applicant's notification of completion of requirements within 30 days.

12. After the applicant has been awarded certification, the regional entity or NERC shall notify all appropriate entities as to the date that the applicant may begin its operation as a certified entity. The applicant must commence operation within 12 months of certification.
 - a. Failure to begin operation within the 12-month period shall require the applicant to re-apply for certification.

13. If the applicant disagrees with the decision, the applicant can initiate the regional entity alternate dispute resolution process within 60 days of the date of the written denial. If the dispute is still unresolved following the regional entity alternate dispute resolution process the applicant can initiate the NERC alternate dispute resolution process. NERC's decision shall be final.

The following additional steps may be included in the transitional certification process:

14. The regional entity or NERC shall provide the questionnaires, a certification schedule, the deadlines for questionnaire submission, and a statement of expectations of the applicant and all of the entities participating in the certification process to those entities that must complete these documents. These questionnaires and other related documents address the applicant's capabilities and actions as they relate to established entity functions and tasks. The regional entity shall distribute questionnaires and other related documents to the following entities as appropriate:
 - a. Applicant (i.e. entity seeking certification).
 - b. All balancing authorities, transmission operator(s), and reliability coordinators in which the applicant intends to operate or interconnect transmission facilities.
 - c. Relevant transmission owners, transmission service providers, planning authorities, generation owners, generation operators, transmission planner, distribution providers, and/or other applicable entities.
15. The review team shall inform the applicant before the on-site visit of any documentation or clarification that is necessary to support the questionnaire.
16. The applicant retains the responsibility for all delegated tasks. The applicant shall identify to the review team all tasks that have been delegated to another entity prior to the on-site visit.
17. The review team shall conduct at least one on-site visit to the applicant's facilities. This may also apply to the facilities of entities responsible for delegated tasks. During the visit, the review team will:
 - a. Review with the applicant the data collected through the questionnaires;
 - b. Interview the operations and management personnel;
 - c. Inspect the facilities and equipment;
 - d. Request a demonstration of all tools identified in the certification standard;
 - e. Review all necessary documents and data including all agreements, processes, and procedures identified in the certification standard;
 - f. Review certification documents and projected system operator work schedules; and
 - g. Review any additional documentation that is needed to support the completed questionnaire or inquiries arising during the site-visit.

Section V — Organization Certification Procedure

Requirements — Certification Process

1. Applicants seeking certification:
 - a. In a single NERC regional entity, shall initiate the certification process by completing a certification application and sending it to the regional entity. The regional entity in which the applicant plans to operate will conduct the certification process.
 - b. In multiple regional entities, shall initiate the certification process by completing a certification application and sending it to the compliance and certification manager in each affected regional entity; each affected regional entity will inform NERC of the request. NERC will be the coordinator and will notify the applicant of NERC's role. NERC shall coordinate the review process among the affected regional entities.
2. Upon receipt, the application will be assessed for completeness and accuracy. When the application is deemed complete and accurate it will be accepted; at that time the applicant and regional entity or NERC shall agree to a timeline, including specific milestones for the certification process. The applicant and the regional entity or NERC shall complete the NERC organization certification process within nine months of the date of acceptance of the application unless agreed to differently by all parties involved in the process.
3. The regional entity or NERC shall notify all entities identified below that will provide input into the certification review and provide each with the necessary information regarding the applicant's request for certification, the certification process, and the duties expected from each entity. The regional entity or NERC shall provide all participants with a copy of expectations regarding confidentiality and retention of all data reporting, completed questionnaires and forms, reports, and recommendations associated with the documentation it provides and receives.
4. The regional entity shall notify NERC that the certification process has begun for the entity to enable NERC to carry out their roles and responsibilities.
5. NERC shall implement the required changes to integrate the new entity into the system.
6. The regional entity or NERC shall provide the questionnaires, a certification schedule, the deadlines for questionnaire submission, a statement of expectations of the applicant and all of the entities participating in the certification process to those entities that must complete these documents. These questionnaires and other related documents address the applicant's capabilities and actions as they relate to established entity functions and tasks. The regional entity shall distribute questionnaires and other related documents to the following entities as appropriate:
 - a. Applicant (i.e., entity seeking certification).
 - b. All balancing authorities, transmission operator(s), and reliability coordinators in which the applicant intends to operate or interconnect transmission facilities.
 - c. Relevant transmission owners, transmission service providers, planning authorities, generation owners, generation operators, transmission planner, distribution providers, and/or other applicable entities.

7. The regional entity or NERC shall assemble a Certification Review Team charged with the responsibility of determining if the applicant meets NERC's organization certification requirements. The review team members shall subject themselves to NERC confidentiality agreements for any data or information made available to them through the certification review process.
 - a. If the applicant objects to any member of the certification team, the applicant must make that known, in writing, to the regional entity or NERC listing the reasons for the objection.
 - b. The regional entity will either replace the team member or respond with written justification for keeping the member on the team.

8. The review team shall consist of a minimum of three individuals including a regional entity representative and NERC (at NERC's option). The selected individuals shall represent at least three of the categories listed below:
 - a. Balancing Authority
 - b. Reliability Coordinator
 - c. Transmission Operator
 - d. Transmission Owner
 - e. Transmission Service Provider
 - f. Transmission Planner
 - g. Planning Authority
 - h. Generation Operator
 - i. Generation Owner
 - j. Distribution Provider
 - k. Representative from NERC staff
 - l. Representative from regional entity staff
 - m. Representative from another NERC regional entity
 - n. Representative from an RTO or ISO, when applicable

The balancing authority review team shall minimally consist of a balancing authority and its reliability coordinator; the reliability coordinator review team shall minimally consist of a reliability coordinator, one of its balancing authorities, and one of its transmission operators; and the transmission operator review team shall minimally consist of a transmission operator and reliability coordinator.

- o. Review team members shall not be employees of or have a direct financial interest in the applicant or any of its affiliates.
 - p. Review processes that involve an entity that is responsible for a function identified in the reliability standards across regional entity boundaries shall have a review team that includes at least one representative from each of the affected regional entities. Each regional entity, not the regional entity or NERC, shall select its representative to the team.
9. The regional entity or NERC may elect, with agreement of the applicant and all other affected regional entities, to contract an independent review team.
10. The review team shall inform the applicant before the on-site visit of any documentation or clarification that is necessary to support the questionnaire.
11. The applicant retains the responsibility for all delegated tasks. The applicant shall identify to the review team prior to the on-site visit all tasks that have been delegated to another entity.
12. The review team shall conduct at least one on-site visit to the applicant's facilities. This may also apply to the facilities of entities responsible for delegated tasks. During the visit, the review team will:
- a. Review with the applicant the data collected through the questionnaires;
 - b. Interview the operations and management personnel;
 - c. Inspect the facilities and equipment;
 - d. Request a demonstration of all tools identified in the certification standard;
 - e. Review all necessary documents and data including all agreements, processes, and procedures identified in the certification standard;
 - f. Review certification documents and projected system operator work schedules; and
 - g. Review any additional documentation that is needed to support the completed questionnaire or inquiries arising during the site-visit.
13. The review team shall identify any deficiencies (to both the applicant and to the regional entity) that must be resolved to the satisfaction of the review team prior to the review team making a recommendation to certify.
14. The review team shall formulate a certification recommendation based on:
- a. Data collected and validated from the questionnaires;
 - b. Data collected during demonstrations of tools and review of documents observed during on-site visit(s); and
 - c. Information, demonstrations and reviews provided as part of a follow-up to correct identified deficiencies.
15. The review team shall support its recommendation through a written report. All members of the review team shall have an equal voice in the certification recommendation. This allows for a minority opinion if the review team cannot reach a consensus.

- a. If the applicant intends to operate in a single regional entity, the review team shall make a recommendation to the regional entity. The regional entity shall approve or disapprove the certification. The regional entity shall notify NERC of the certification decision.
 - b. If the applicant intends to operate in multiple regional entities, the review team shall make a recommendation to those regional entities. All affected regional entities must approve granting of the certification or the certification is denied.
 - c. The regional entity or NERC shall verify the regional entity approvals prior to allowing certification. The regional entity shall notify NERC of the certification decision.
16. The regional entity or NERC (in consultation with the affected regional entities) may grant a time extension, not to exceed 180 days, to the applicant.
- a. If the applicant fails to meet the conditions set by the regional entity or NERC, within the granted timeframe, the applicant's request for certification shall be denied.

If the applicant meets the conditions set by the regional entity(s), within the granted timeframe, the regional entity or NERC (in consultation with the affected regional entities) shall respond to the applicant's notification of completion of requirements within 30 days.

17. After the applicant has been awarded certification, the regional entity or NERC shall notify all appropriate entities as to the date that the applicant may begin its operation as a certified entity. Applicant must commence operation within 12 months of certification.
- a. Failure to begin operation within the 12-month period shall require the applicant to re-apply for certification.
 - b. If the applicant disagrees with the decision, the applicant can initiate the regional entities Alternate Dispute Resolution process within 60 days of the date of the written denial. If the dispute is still unresolved following the regional entities Alternate Dispute Resolution Process the applicant can initiate the NERC Alternate Dispute Resolution Process. NERC's decision shall be final.

Definitions

Applicant	Industry participant who formally submits an application to register or to become certified to perform one or more functional entity responsibilities.
Certification	The process undertaken by a regional entity to verify that an applicant is capable of responsibilities for tasks associated with a particular function such as control area, balancing authority, transmission operator, or reliability coordinator.
Compliance and Certification Manager	The individual/individuals within the regional entity that is/are responsible for monitoring compliance of entities applicable NERC Reliability Standards.
Days	Days as used in the registration and certification processes are defined as calendar days.
Footprint	The geographical or electric area served by an entity.
Functional Entity	An entity responsible for a function that is required to ensure the reliable operation of the electric grid as identified in the NERC Reliability Standards.
Mapping	The process of determining whether a regional entity's footprint is being served by registered entities.
NERC Acronym	A name given to NERC registered entities that will be used to identify the entity for certain NERC activities. Note: corporate entities may have multiple NERC acronyms to show different corporate involvement in NERC activities.
Non-Certified	An entity that is responsible for a specific function but has not been certified to perform that function by the regional entity.
Regional Entity	
Registration	Process undertaken by a regional entity to identify which entities are responsible for reliability functions within the regional entity's footprint.
Transitional Certification	A process used by regional entities to transition control areas previously certified using the NERC control area certification process to certification as a functional entity.

Section VI — NERC Organization Certification Appeals Process

Overview

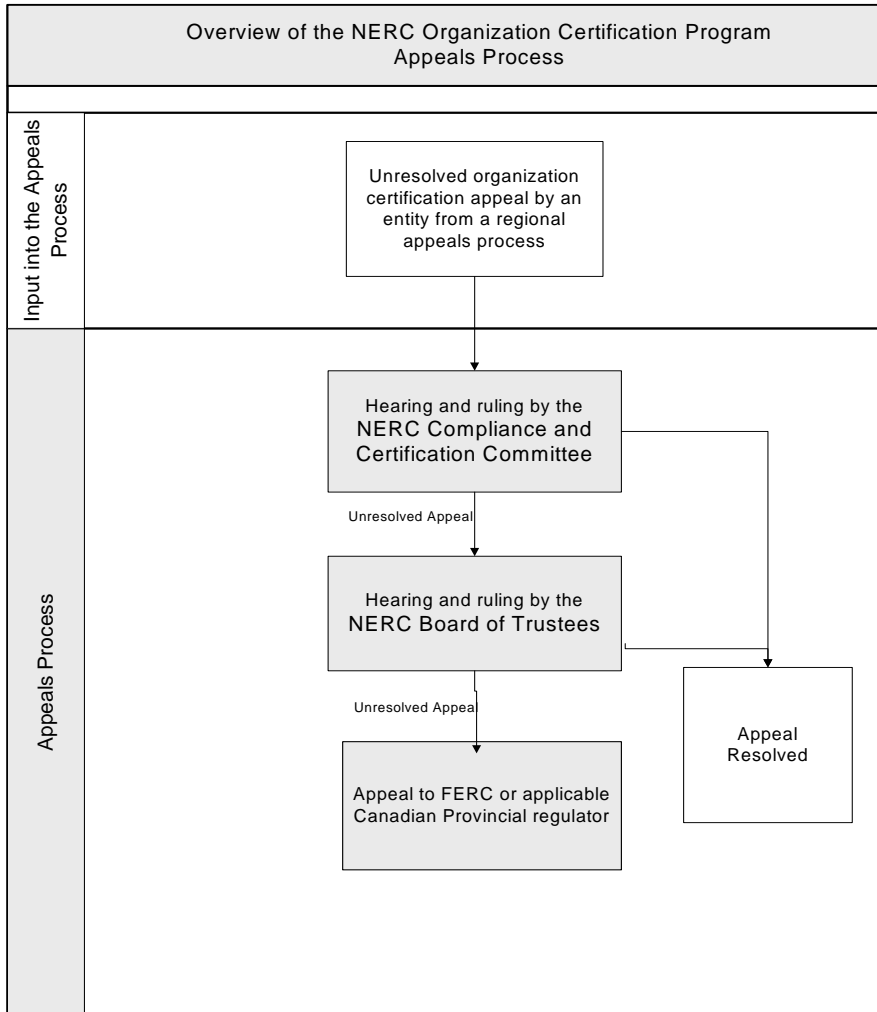

NERC's mission is to ensure that the bulk power system in North America is reliable, adequate, and secure. Since its formation in 1968, NERC has operated successfully as a voluntary, self-regulatory organization, relying on reciprocity, peer pressure, and the mutual self-interest of all those involved.

The NERC Organization Certification Program provides a key means to fulfill NERC's mission. In conducting this program, NERC has established documented procedures and will ensure due process to achieve fair and equitable certification of organizations.

Scope

This document describes the process for appealing organization certification findings from the NERC Organization Certification Program. Any entity reviewed under the Organization Certification Program can file an appeal using this process. The top of Figure 1 shows how an entity appeal of an organization certification decision will apply to the NERC appeals process.

Figure 1: Appeals Process Overview

1. Appeal for an Organization Certification Finding

Any functional entity or Regional Entity (RE) can appeal an organization certification decision issued as a result of organization certification actions of the NERC Organization Certification Program. An appeal of certification decision can be initiated after using all steps in a RE appeals process have been exhausted and the entity or RE chooses to appeal further.

2. Requirements and Conditions for Appeals

- a. For all appeals under the NERC Organization Certification Program, the appeals process begins when an entity notifies the NERC vice president–compliance in writing that it wishes to use the NERC appeals process.
 - i) The vice president–compliance is the main contact for all parties in all steps of the appeals process.
 - ii) If an appeal is not filed within fourteen calendar days of the date that the audit report or finding is issued, or the final RE appeals process ruling is made, the finding shall be considered final and unappealable.
- b. Each party in the appeals process shall pay its own expenses for each step in the process.
- c. A stipulation of invoking the appeals process is that the entity requesting the appeal agrees that neither NERC (its members, Board of Trustees, committees, subcommittees, and staff), any person assisting in the appeals process, nor any company employing a person assisting in the appeals process, shall be liable, and they shall be held harmless against the consequences of or any action or inaction or of any agreement reached in resolution of the dispute or any failure to reach agreement as a result of the appeals proceeding. This “hold harmless” clause does not extend to matters constituting gross negligence, intentional misconduct, or a breach of confidentiality.
- d. Parties retain whatever rights they may have to seek further review of a decision in whatever regulatory agency or court may have jurisdiction.

3. Appeals Process — Hearing and Ruling by the Compliance and Certification Committee

- a. Within twenty-eight calendar days of receiving notice from the NERC vice president–compliance that the RE appeals process did not resolve the appeal, the CCC will conduct a hearing where all the parties or representatives of the disputing parties will present the issue in question.
 - i) The CCC must have a quorum present to conduct the hearing.
 - ii) The hearing shall be closed to the public to protect confidential information.
 - iii) CCC members who are interested parties or have an interest in the outcome shall not participate in the hearing.
- b. The CCC will deliberate the issue in a one-day session, take a vote on how to resolve the appeal, and recommend a resolution based on a majority vote, all according to established CCC procedures.
 - i) Should both parties accept the solution, the matter will be considered resolved and the process terminated.

- ii) If either of the parties wishes to pursue the appeal further, or if the CCC process cannot be completed in accordance with the timeline of the appeals process outlined in this document, the NERC vice president–compliance shall be notified within seven calendar days.

The NERC vice president–compliance will forward the appeal to the NERC board of trustees within seven calendar days of being notified for resolution.

4. Appeals Process — Hearing and Ruling by the NERC Board of Trustees

- a. The NERC board will be asked to resolve a dispute related to the NERC Organization Certification Program if and only if the prior steps outlined in this procedure have failed to render an acceptable solution.
- b. At the next regularly scheduled NERC board meeting, or at a special meeting if the board determines it is necessary, the chairman of the CCC will present to the board a summary of the dispute and the actions taken in an attempt to resolve it.
 - i) Each party will then present their side of the dispute.
 - ii) The NERC board will then decide the dispute.
- c. A record of the appeals process shall be maintained and available upon request. Confidentiality of the record of the appeal will be based on the FERC guidelines for the treatment of critical infrastructure information. Entities may request information considered competitive or market sensitive information be withheld.

5. General Requirement

- a. Parties are entitled to a fair and impartial appeals process. No one with a direct interest in a dispute may participate in the appeals process except as a party or witness.

NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION

NEW APPENDIX 5B

TO THE

RULES OF PROCEDURE

STATEMENT OF COMPLIANCE REGISTRY CRITERIA

Appendix 5B

Statement of Compliance Registry Criteria

Revision 5.0 — Approved: NERC Board of Trustees July 30, 2008

Effective: October 16, 2008

Statement of Compliance Registry Criteria (Revision 5.0)

Summary

Since becoming the Electric Reliability Organization (ERO), NERC has initiated a program to identify candidate organizations for its compliance registry. The program, conducted by NERC and the Regional Entities¹, will also confirm the functions and information now on file for currently-registered organizations. NERC and the Regional Entities have the obligation to identify and register all entities that meet the criteria for inclusion in the compliance registry, as further explained in the balance of this document.

This document describes how NERC will identify organizations that may be candidates for registration and assign them to the compliance registry.

Organizations will be responsible to register and to comply with approved reliability standards to the extent that they are owners, operators, and users of the bulk power system, perform a function listed in the functional types identified in Section II of this document, and are material to the reliable operation of the interconnected bulk power system as defined by the criteria and notes set forth in this document. NERC will apply the following principles to the compliance registry:

- In order to carry out its responsibilities related to enforcement of Reliability Standards, NERC must identify the owners, operators, and users of the bulk power system who have a material impact² on the bulk power system through a compliance registry. NERC and the Regional Entities will make their best efforts to identify all owners, users and operators who have a material reliability impact on the bulk power system in order to develop a complete and current registry list. The registry will be updated as required and maintained on an on-going basis.
- Organizations listed in the compliance registry are responsible and will be monitored for compliance with applicable mandatory reliability standards. They will be subject to NERC's and the Regional Entities' compliance and enforcement programs.

¹ The term "Regional Entities" includes Cross-Border Regional Entities.

² The criteria for determining whether an entity will be placed on the registry are set forth in the balance of this document. At any time a person may recommend in writing, with supporting reasons, to the director of compliance that an organization be added to or removed from the compliance registry, pursuant to NERC ROP 501.1.3.5.

- NERC and Regional Entities will not monitor nor hold those not in the registry responsible for compliance with the standards. An entity which is not initially placed on the registry, but which is identified subsequently as having a material reliability impact, will be added to the registry. Such entity will not be subject to a sanction or penalty by NERC or the Regional Entity for actions or inactions prior to being placed on the registry, but may be required to comply with a remedial action directive or mitigation plan in order to become compliant with applicable standards. After such entity has been placed on the compliance registry, it shall be responsible for complying with Reliability Standards and may be subject to sanctions or penalties as well as any remedial action directives and mitigation plans required by the Regional Entities or NERC for future violations, including any failure to follow a remedial action directive or mitigation plan to become compliant with Reliability Standards.
- Required compliance by a given organization with the standards will begin the later of (i) inclusion of that organization in the compliance registry and (ii) approval by the appropriate governmental authority of mandatory reliability standards applicable to the entity.

Entities responsible for funding NERC and the Regional Entities have been identified in the budget documents filed with FERC. Presence on or absence from the compliance registry has no bearing on an entity's independent responsibility for funding NERC and the Regional Entities.

Background

In 2005, NERC and the Regional Entities conducted a voluntary organization registration program limited to balancing authorities, planning authorities, regional reliability organizations, reliability coordinators, transmission operators, and transmission planners. The list of the entities that were registered constitutes what NERC considered at that time as its compliance registry.

NERC has recently initiated a broader program to identify additional organizations potentially eligible to be included in the compliance registry and to confirm the information of organizations currently on file. NERC believes this is a prudent activity at this time because:

- As of July 20, 2006, NERC was certified as the ERO created for the U.S. by the Energy Policy Act of 2005 (EPAct) and FERC Order 672. NERC has also filed with Canadian authorities for similar recognition in their respective jurisdictions.
- FERC's Order 672 directs that owners, operators and users of the bulk power system shall be registered with the ERO and the appropriate Regional Entities.
- As the ERO, NERC has filed its current reliability standards with FERC and with Canadian authorities. As accepted and approved by FERC and appropriate Canadian authorities, the reliability standards are no longer voluntary, and organizations that do not fully comply with them may face penalties or other sanctions determined and levied by NERC or the Regional Entities.
- NERC's reliability standards include compliance requirements for additional reliability function types beyond the six types registered by earlier registration programs.

- Based on selection as the ERO, the extension and expansion of NERC’s current registration program³ is the means by which NERC and the Regional Entities will plan, manage and execute reliability standard compliance oversight of owners, operators, and users of the bulk power system.
- Organizations listed in the compliance registry are subject to NERC’s and the Regional Entities’ compliance and enforcement programs.

Statement of Issue

As the ERO, NERC intends to comprehensively and thoroughly protect the reliability of the grid. To support this goal NERC will include in its compliance registry each entity that NERC concludes can materially impact the reliability of the bulk power system. However, the potential costs and effort of ensuring that every organization potentially within the scope of “owner, operator, and user of the bulk power system” becomes registered while ignoring their impact upon reliability, would be disproportionate to the improvement in reliability that would reasonably be anticipated from doing so.

NERC wishes to identify as many organizations as possible that may need to be listed in its compliance registry. Identifying these organizations is necessary and prudent at this time for the purpose of determining resource needs, both at the NERC and Regional Entity level, and to begin the process of communication with these entities regarding their potential responsibilities and obligations. NERC and the Regional Entities believe that primary candidate entities can be identified at this time, while other entities can be identified later, as and when needed. Selection principles and criteria for the identification of these initial entities are required. This list will become the “Initial Non-binding Organization Registration List”. With FERC having made the approved Reliability Standards enforceable, this list becomes the NERC Compliance Registry.

Resolution

NERC and the Regional Entities have identified two principles they believe are key to the entity selection process. These are:

1. There needs to be consistency between regions and across the continent with respect to which entities are registered, and;
2. Any entity reasonably deemed material to the reliability of the bulk power system will be registered, irrespective of other considerations.

To address the second principle the Regional Entities, working with NERC, will identify and register any entity they deem material to the reliability of the bulk power system.

In order to promote consistency, NERC and the Regional Entities intend to use the following criteria as the basis for determining whether particular entities should be identified as candidates for registration. All organizations meeting or exceeding the criteria will be identified as candidates.

³ See: NERC ERO Application; Exhibit C; Section 500 – Organization Registration and Certification.

The following four groups of criteria (Sections I-IV) plus the statements in Section V will provide guidance regarding an entity’s registration status:

- Section I determines if the entity is an owner, operator, or user of the bulk power system and, hence, a candidate for organization registration.
- Section II uses NERC’s current functional type definitions to provide an initial determination of the functional types for which the entities identified in Section I should be considered for registration.
- Section III lists the criteria regarding smaller entities; these criteria can be used to forego the registration of entities that were selected to be considered for registration pursuant to Sections I and II and, if circumstances change, for later removing entities from the registration list that no longer meet the relevant criteria.
- Section IV — additional criteria for joint registration. Joint registration criteria may be used by Joint Action Agencies, Generation and Transmission Cooperatives and other entities which agree upon a clear division of compliance responsibility for Reliability Standards by written agreement. Pursuant to FERC’s directive in paragraph 107 of Order No. 693, rules pertaining to joint registration and Joint Registration Organizations will now be found in Sections 501 and 507 of the NERC Rules of Procedure.

I. Entities that use, own or operate elements of the bulk electric system as established by NERC’s approved definition of bulk electric system below are (i) owners, operators, and users of the bulk power system and (ii) candidates for registration:

“As defined by the Regional Reliability Organization, the electrical generation resources, transmission lines, interconnections with neighboring systems, and associated equipment, generally operated at voltages of 100 kV or higher. Radial transmission facilities serving only load with one transmission source are generally not included in this definition.”⁴

II. Entities identified in Part I above will be categorized as registration candidates who may be subject to registration under one or more appropriate functional entity types based on a comparison of the functions the entity normally performs against the following function type definitions:

Function Type	Acronym	Definition/Discussion
Balancing Authority	BA	The responsible entity that integrates resource plans ahead of time, maintains load-interchange-generation balance within a BA area, and supports Interconnection frequency in real-time.

⁴ However, ownership of radial transmission facilities intended to be covered by the vegetation management standard (applicable to transmission lines 200 kV and above) would be included in this definition.

Function Type	Acronym	Definition/Discussion
Distribution Provider	DP	Provides and operates the “wires” between the transmission system and the end-use customer. For those end-use customers who are served at transmission voltages, the Transmission Owner also serves as the DP. Thus, the DP is not defined by a specific voltage, but rather as performing the Distribution function at any voltage.
Generator Operator	GOP	The entity that operates generating unit(s) and performs the functions of supplying energy and interconnected operations services.
Generator Owner	GO	Entity that owns and maintains generating units.
Interchange Authority	IA	The responsible entity that authorizes implementation of valid and balanced Interchange Schedules between Balancing Authority Areas, and ensures communication of Interchange information for reliability assessment purposes.
Load-Serving Entity	LSE	Secures energy and transmission service (and related interconnected operations services) to serve the electrical demand and energy requirements of its end-use customers.
Planning Authority	PA	The responsible entity that coordinates and integrates transmission facility and service plans, resource plans, and protection systems.
Purchasing-Selling Entity	PSE	The entity that purchases or sells and takes title to energy, capacity, and interconnected operations services. PSE may be affiliated or unaffiliated merchants and may or may not own generating facilities.
Reliability Coordinator	RC	The entity that is the highest level of authority who is responsible for the reliable operation of the bulk power system, has the wide area view of the bulk power system, and has the operating tools, processes and procedures, including the authority to prevent or mitigate emergency operating situations in both next-day analysis and real-time operations. The RC has the purview that is broad enough to enable the calculation of interconnection reliability operating limits, which may be based on the operating parameters of transmission systems beyond

Function Type	Acronym	Definition/Discussion
		any Transmission Operator's vision.
Reserve Sharing Group	RSG	A group whose members consist of two or more Balancing Authorities that collectively maintain, allocate, and supply operating reserves required for each BA's use in recovering from contingencies within the group. Scheduling energy from an adjacent BA to aid recovery need not constitute reserve sharing provided the transaction is ramped in over a period the supplying party could reasonably be expected to load generation in (e.g., ten minutes). If the transaction is ramped in quicker, (e.g., between zero and ten minutes) then, for the purposes of disturbance control performance, the areas become a RSG.
Resource Planner	RP	The entity that develops a long-term (generally one year and beyond) plan for the resource adequacy of specific loads (customer demand and energy requirements) within a PA area.
Transmission Owner	TO	The entity that owns and maintains transmission facilities.
Transmission Operator	TOP	The entity responsible for the reliability of its local transmission system and operates or directs the operations of the transmission facilities.
Transmission Planner	TP	The entity that develops a long-term (generally one year and beyond) plan for the reliability (adequacy) of the interconnected bulk electric transmission systems within its portion of the PA area.
Transmission Service Provider	TSP	The entity that administers the transmission tariff and provides transmission service to transmission customers under applicable transmission service agreements.

- III. Entities identified in Part II above as being subject to registration as an LSE, DP, GO, GOP, TO, or TOP should be excluded from the registration list for these functions if they do not meet any of the criteria listed below:

III (a) Load-serving Entity:

- III.a.1 Load-serving entity peak load is > 25 MW and is directly connected to the bulk power (>100 kV) system, or;
- III.a.2 Load-serving entity is designated as the responsible entity for facilities that are part of a required underfrequency load shedding (UFLS) program designed, installed, and operated for the protection of the bulk power system, or;
- III.a.3 Load-serving entity is designated as the responsible entity for facilities that are part of a required undervoltage load shedding (UVLS) program designed, installed, and operated for the protection of the bulk power system.

[Exclusion: A load-serving entity will not be registered based on these criteria if responsibilities for compliance with approved NERC reliability standards or associated requirements including reporting have been transferred by written agreement to another entity that has registered for the appropriate function for the transferred responsibilities, such as a load-serving entity, balancing authority, transmission operator, G&T cooperative or joint action agency as described in Sections 501 and 507 of the NERC Rules of Procedure.]

- III.a.4 Distribution providers registered under the criteria in III.b.1 or III.b.2 will be registered as a load serving entity (LSE) for all load directly connected to their distribution facilities.

[Exclusion: A distribution provider will not be registered based on this criterion if responsibilities for compliance with approved NERC reliability standards or associated requirements including reporting have been transferred by written agreement to another entity that has registered for the appropriate function for the transferred responsibilities, such as a load-serving entity, balancing authority, transmission operator, G&T cooperative, or joint action agency as described in Sections 501 and 507 of the NERC Rules of Procedure.]

III(b) Distribution Provider:

- III.b.1 Distribution provider system serving >25 MW of peak load that is directly connected to the bulk power system.

[Exclusion: A distribution provider will not be registered based on this criterion if responsibilities for compliance with approved NERC reliability standards or associated requirements including reporting have been transferred by written agreement to another entity that has registered for the appropriate function for the transferred responsibilities, such as a load-serving entity, balancing authority, transmission operator, G&T cooperative, or joint action agency as described in Sections 501 and 507 of the NERC Rules of Procedure.] or;

- III.b.2 Distribution provider is the responsible entity that owns, controls, or operates facilities that are part of any of the following protection systems or programs designed, installed, and operated for the protection of the bulk power system:

- a required UFLS program.
- a required UVLS program.
- a required special protection system.
- a required transmission protection system.

[Exclusion: A distribution provider will not be registered based on these criteria if responsibilities for compliance with approved NERC reliability standards or associated requirements including reporting have been transferred by written agreement to another entity that has registered for the appropriate function for the transferred responsibilities, such as a load-serving entity, balancing authority, transmission operator, G&T cooperative, or joint action agency as described in Sections 501 and 507 of the NERC Rules of Procedure.]

III(c) Generator Owner/Operator:

- III.c.1 Individual generating unit > 20 MVA (gross nameplate rating) and is directly connected to the bulk power system, or;
- III.c.2 Generating plant/facility > 75 MVA (gross aggregate nameplate rating) or when the entity has responsibility for any facility consisting of one or more units that are connected to the bulk power system at a common bus with total generation above 75 MVA gross nameplate rating, or;
- III.c.3 Any generator, regardless of size, that is a blackstart unit material to and designated as part of a transmission operator entity's restoration plan, or;

- III.c.4 Any generator, regardless of size, that is material to the reliability of the bulk power system.

[Exclusions:

A generator owner/operator will not be registered based on these criteria if responsibilities for compliance with approved NERC reliability standards or associated requirements including reporting have been transferred by written agreement to another entity that has registered for the appropriate function for the transferred responsibilities, such as a load-serving entity, G&T cooperative or joint action agency as described in Sections 501 and 507 of the NERC Rules of Procedure.

As a general matter, a customer-owned or operated generator/generation that serves all or part of retail load with electric energy on the customer's side of the retail meter may be excluded as a candidate for registration based on these criteria if (i) the net capacity provided to the bulk power system does not exceed the criteria above or the Regional Entity otherwise determines the generator is not material to the bulk power system and (ii) standby, back-up and maintenance power services are provided to the generator or to the retail load pursuant to a binding obligation with another generator owner/operator or under terms approved by the local regulatory authority or the Federal Energy Regulatory Commission, as applicable.]

III(d) Transmission Owner/Operator:

- III.d.1 An entity that owns/operates an integrated transmission element associated with the bulk power system 100 kV and above, or lower voltage as defined by the Regional Entity necessary to provide for the reliable operation of the interconnected transmission grid; or

- III.d.2 An entity that owns/operates a transmission element below 100 kV associated with a facility that is included on a critical facilities list that is defined by the Regional Entity.

[Exclusion: A transmission owner/operator will not be registered based on these criteria if responsibilities for compliance with approved NERC reliability standards or associated requirements including reporting have been transferred by written agreement to another entity that has registered for the appropriate function for the transferred responsibilities, such as a load-serving entity, G&T cooperative or joint action agency as described in Sections 501 and 507 of the NERC Rules of Procedure.]

IV. Joint Registration Organization and applicable Member Registration.

Pursuant to FERC's directive in paragraph 107 of Order No. 693, NERC's rules pertaining to joint registrations and Joint Registration Organizations are now found in Section 501 and 507 of the NERC Rules of Procedure.

- V. If NERC or a Regional Entity encounters an organization that is not listed in the compliance registry, but which should be subject to the reliability standards, NERC or the Regional Entity is obligated and will add that organization to the registry, subject to that organization's right to challenge as provided in Section 500 of NERC's Rules of Procedure and as described in Note 3 below.

Notes to the above Criteria

1. The above are general criteria only. The Regional Entity considering registration of an organization not meeting (e.g., smaller in size than) the criteria may propose registration of that organization if the Regional Entity believes and can reasonably demonstrate⁵ that the organization is a bulk power system owner, or operates, or uses bulk power system assets, and is material to the reliability of the bulk power system. Similarly, the Regional Entity may exclude an organization that meets the criteria described above as a candidate for registration if it believes and can reasonably demonstrate to NERC that the bulk power system owner, operator, or user does not have a material impact on the reliability of the bulk power system.
2. An organization not identified using the criteria, but wishing to be registered, may request that it be registered. For further information refer to: NERC Rules of Procedure, Section 500 – Organization Registration and Certification; Part 1.3.
3. An organization may challenge its registration within the compliance registry. NERC or the Regional Entity will provide the organization with all information necessary to timely challenge that determination including notice of the deadline for contesting the determination and the relevant procedures to be followed as described in the NERC Rules of Procedure; Section 500 – Organization Registration and Certification.
4. If an entity is part of a class of entities excluded based on the criteria above as individually being unlikely to have a material impact on the reliability of the bulk power system, but that in aggregate have been demonstrated to have such an impact it may be registered for applicable standards and requirements irrespective of other considerations.

⁵ The reasonableness of any such demonstration will be subject to review and remand by NERC itself, or by any agency having regulatory or statutory oversight of NERC as the ERO (e.g., FERC or appropriate Canadian authorities).
