**Re: North American Electric Reliability Corporation
Docket No. RR010-___-000
Petition for Approval of Revised Pro Forma Delegation Agreement,
Revised Delegation Agreements with the Eight Regional Entities, and
Amendments to the NERC Rules of Procedure**

Dear Ms. Bose:

The North American Electric Reliability Corporation (NERC) hereby submits a "Petition for Approval of Revised Pro Forma Delegation Agreement, Revised Delegation Agreements with the Eight Regional Entities, and Amendments to the NERC Rules of Procedure." The Petition also requests approval of amendments to the Bylaws of several of the Regional Entities. This Petition is submitted pursuant to §215(e)(4) and (f) of the Federal Power Act and the Commission's regulations at 18 C.F.R. §39.8 and §39.10.

NERC's filing consists of: (1) this transmittal letter, (2) the narrative text of this filing which follows this transmittal letter, and (3) Attachments 1A, 1B, 2A, 2B, 3A, 3B, 4A, 4B, 5A, 5B, 5C, 6A, 6B, 7A, 7B, 8A, 8B, 9A, 9B, 10, 11A, 11B, 12A, 12B, 13A, 13B, 14A, 14B, 15 and 16, all of which is being transmitted in a single pdf file. Pages iv and v in the Table of Contents to the narrative text list and identify the Attachments.

Please contact the undersigned if you have any questions concerning this filing.

Respectfully submitted,

/s/ Owen E. MacBride
Owen E. MacBride

Attorney for North American Electric
Reliability Corporation

Attachment 16: New Appendix 5B to the NERC Rules of Procedure – *Statement of Compliance Registry Criteria*

I. INTRODUCTION

The North American Electric Reliability Corporation (“NERC”), in accordance with §215(e)(4) of the Federal Power Act (“FPA”) and 18 C.F.R. §39.8, respectfully requests Commission approval of the following documents:

- Revised pro forma Delegation Agreement with Regional Entities (**Attachment 1** to this filing)
- Revised Delegation Agreements with each of the eight Regional Entities, based on the revised pro forma Delegation Agreement (**Attachments 2** through **9**)¹
- Amendments to Section 5.4 of the FRCC Bylaws which are included in Exhibit B to the Delegation Agreement with FRCC (in **Attachment 2**)²
- Revisions to Exhibit A to the Delegation Agreements with FRCC and SERC, to reflect minor adjustments to the bulk electric system facilities included in each of these regions (included in **Attachments 2** and **6**, respectively)
- Amended Bylaws of MRO which are included in the Delegation Agreement with MRO (in **Attachment 3**).³ **Attachment 10** is a redlined version of the amended MRO Bylaws.

¹ The eight Regional Entities are Florida Reliability Coordinating Council (“FRCC”), Midwest Reliability Organization (“MRO”), Northeast Power Coordinating Council (“NPCC”), ReliabilityFirst Corporation (“ReliabilityFirst”), SERC Reliability Corporation (“SERC”), Southwest Power Pool Regional Entity (“SPP RE”), Texas Reliability Entity (“Texas RE”), and Western Electricity Coordinating Council (“WECC”). On May 6, 2010, in Docket No. RR10-6-000, the Commission approved NERC’s proposed Delegation Agreement with Texas RE as the successor Regional Entity in the Electric Reliability Council of Texas (“ERCOT”) region to Texas Regional Entity, a division of ERCOT (“Old Texas RE”). NERC, Texas RE and Old Texas RE are planning that the Delegation Agreement approved by the Commission in Docket No. RR10-6-000 will become effective on July 1, 2010 and the existing Delegation Agreement with Old Texas RE will terminate on that date.

² The FRCC Bylaws are “Regional Entity Rules” as defined in 18 C.F.R. §39.1, and therefore approval of the amendments to the FRCC Bylaws is also requested pursuant to §215(f) of the FPA and 18 C.F.R. §39.10.

³ The MRO Bylaws are “Regional Entity Rules” as defined in 18 C.F.R. §39.1, and therefore approval of the amendments to the MRO Bylaws is also requested pursuant to §215(f) of the FPA and 18 C.F.R. §39.10.

In addition, in accordance with §215(f) of the FPA and 18 C.F.R. §39.10, NERC respectfully requests approval of the following revisions and additions to the NERC Rules of Procedure (“ROP”):

- Revisions to Sections 200, 400, 500, 800, 1000, 1100 and 1200 of the NERC ROP (**Attachment 11**)
- Revisions to Appendix 4A to the NERC ROP -- *Audit of Regional Entity Compliance Programs* (**Attachment 12**)
- Revisions to Appendix 4A to the NERC ROP – *Sanction Guidelines of the North American Electric Reliability Corporation* (**Attachment 13**)
- Revisions to Appendix 4C to the NERC ROP – *Compliance Monitoring and Enforcement Program* (**Attachment 14**)
- Revision to Appendix 5 to the NERC ROP – *Organization Registration and Certification Manual* – this Appendix has been renumbered as Appendix 5A, with no other changes (**Attachment 15**)
- Addition of new Appendix 5B to the NERC ROP – *Statement of Compliance Registry Criteria* – this is Version 5.0 of the *Statement of Compliance Registry Criteria* which is being added as an Appendix to the ROP, with no textual changes (**Attachment 16**)

Section III of this Petition describes the proposed revised pro forma Delegation Agreement and the proposed revised Delegation Agreements between NERC and the eight Regional Entities, including any deviations or differences in the individual Delegation Agreements from the revised pro forma Delegation Agreement. Section III also describes the amendments to the FRCC and MRO Bylaws. Section IV of this Petition describes and explains the proposed revisions and additions to the NERC ROP and Appendices, all of which are Electric Reliability Organization (“ERO”) Rules.

NERC respectfully asks the Commission to issue an order approving the revised pro forma Delegation Agreement, the revised Delegation Agreements with the eight Regional Entities, and the proposed revisions and additions to the NERC ROP and Appendices, to be effective January 1, 2011.

III. REVISED DELEGATION AGREEMENTS

A. Process for Development of Revised Pro Forma Delegation Agreement

NERC and the Regional Entities have negotiated a revised pro forma Delegation Agreement, and individual Delegation Agreements based on the new pro forma agreement, in response to the need for changes identified in the course of NERC’s and the Regional Entities’ operations under §215 of the FPA and 18 C.F.R. Part 39 since 2007, and in particular in response to issues identified in NERC’s *Three-Year ERO Assessment Report* that was conducted in 2008-2009 and filed with the Commission on July 20, 2009.⁴ The *Three-Year ERO Assessment Report* identified a number of issues which were suitable to be addressed through revisions to the Regional Entity Delegation Agreements. Based on the aggregate basket of issues to be

⁴ *North American Electric Reliability Organization, Three-Year Electric Reliability Organization Performance Assessment Report Submitted in Accordance with 18 C.F.R. §39.3(c)*, filed July 20, 2009 in Docket No. RR09-7-0000 (“*Three-Year ERO Assessment Report*”).

addressed, NERC and the Regional Entities agreed it would be appropriate to negotiate a new pro forma Delegation Agreement and to enter into new Delegation Agreements consistent with the new pro forma agreement.⁵

NERC and the Regional Entities began working together to develop the revised pro forma Delegation Agreement in the Fall of 2009. In order to provide sufficient time for negotiations, for obtaining stakeholder input, and for filing with, and review and approval by, the Commission, of the revised pro forma Delegation Agreement and the individual Delegation Agreements, NERC requested Commission approval of an amendment to the Delegation Agreements to extend the expiration date of their initial terms by one year, from May 2010 to May 2, 2011. The Commission approved this amendment on January 14, 2010.⁶

In connection with the NERC Member Representatives Committee (“MRC”) meeting on November 4, 2009, NERC and the Regional Entities conducted a session with stakeholders for discussion of possible changes to the Delegation Agreements. Submission of written comments was also invited. On January 29, 2010, NERC posted a draft of the revised pro forma Delegation Agreement for stakeholder comment for a comment period running through March 5, 2010 (45 days). Written comments were received from eleven entities and organizations. Additionally, a

⁵ The Commission originally approved delegation agreements between NERC and the Regional Entities in an Order issued April 19, 2007. *Order Accepting ERO Compliance Filing, Accepting ERO/Regional Entity Delegation Agreements, and Accepting Regional Entity 2007 Business Plans*, 119 FERC ¶ 61,060 (2007) (“April 19, 2007 Order”), *Order on Rehearing*, 120 FERC ¶ 61,260 (2007). In subsequent Orders, the Commission has approved both revisions of general applicability to the Delegation Agreements and amendments to the Delegation Agreements with particular Regional Entities to address particular circumstances. *See, e.g., Order Addressing Revised Delegation Agreements*, 122 FERC ¶ 61,245 (2008); *Order Accepting Compliance Filings, Subject to Conditions*, 125 FERC ¶ 61,330 (2008); *Order on Compliance Filing*, 127 FERC ¶ 61,209 (2009).

⁶ Letter Order issued January 14, 2010, in Docket No. RR10-2-000.

discussion concerning the proposed revisions to the Delegation Agreement was held during the February 15, 2010 MRC meeting.

Based on review and consideration of stakeholder comments on the public posting, NERC and the Regional Entities completed negotiation of the revised pro forma Delegation Agreement during March and April, 2010. The respective boards of directors or trustees of the Regional Entities approved entry into revised Delegation Agreements, based on the revised pro forma Delegation Agreement, at meetings held during April and early May.⁷ At its May 12, 2010 meeting, the NERC Board of Trustees approved the revised pro forma Delegation Agreement and the revised Delegation Agreements with each of the Regional Entities, as required by Article X, section 1 of the NERC Bylaws.

B. Revised Pro Forma Delegation Agreement

1. Summary of Major Changes in the Pro Forma Delegation Agreement

This subsection identifies the provisions of the revised pro forma Delegation Agreement that NERC considers to be the most significant changes from the current pro forma Delegation Agreement. Section III.B.2 provides a detailed, section-by-section description of the differences between the current and revised pro forma Delegation Agreements. **Attachment 1A** is a clean version of the revised pro forma Delegation Agreement, while **Attachment 1B** is a redlined version of the revised pro forma Delegation Agreement against the current pro forma Delegation Agreement.

⁷ The Regional Entity boards approved entry into the revised Delegation Agreements at meetings held on the following dates: FRCC, May 5; MRO, April 26; NPCC, April 27; ReliabilityFirst, April 30; SERC, April 28; SPP RE, April 26; Texas RE, April 27; WECC, April 30. **Attachments 2** through **9** each contains a letter or board resolution from the respective Regional Entity memorializing that its board approved the revised Delegation Agreement on the date stated above.

- Under the revised pro forma Delegation Agreement, all of the Regional Entities have agreed to adopt the NERC Compliance Monitoring and Enforcement Program (“CMEP”), Appendix 4C to the NERC ROP.⁸ (Revised pro forma Delegation Agreement, §2(a)(iii) and Exhibit D.)
- Under the revised pro forma Delegation Agreement, a Regional Entity that also performs (or whose affiliated entity performs) registered functions as a Registered Entity cannot monitor its own compliance (or that of its affiliate) with applicable Reliability Standards, but rather must enter into an agreement with NERC or another Regional Entity to monitor and enforce the first Regional Entity’s compliance with the Reliability Standards that are applicable to its registered functions. (Revised pro forma Delegation Agreement, §4(a)-(b).)
- The revised pro forma Delegation Agreement expressly recognizes the possibility of coordinated compliance monitoring and enforcement, by two or more Regional Entities, of a Registered Entity that has operations in more than one region. (Revised pro forma Delegation Agreement, §4(c).)
- The revised pro forma Delegation Agreement adopts and uses the terms “Possible Violation,” “Alleged Violation,” and “Confirmed Violation,” which are being adopted in the revised NERC CMEP, Appendix 4C to the NERC ROP, in order to establish consistency among the Regional Entities as to when potential violations of Reliability Standards must be entered into the NERC and Regional Entity tracking systems and notices must be given to Registered Entities (*see* discussion in §IV.B and §IV.E below). (*See, e.g.*, Revised pro forma Delegation Agreement §6(b)-(d).)
- The revised pro forma Delegation Agreement establishes specific criteria on which NERC will base its reviews of dispositions of compliance matters by the Regional Entities. (Revised pro forma Delegation Agreement, §6(d).)
- The revised pro forma Delegation Agreement recognizes that a Regional Entity may have stakeholders lead or participate in its board compliance committee so long as integrity and independence are assured through reasonable and appropriate recusal procedures. (Revised pro forma Delegation Agreement, §6(h).)
- The revised pro forma Delegation Agreement contains an expanded description of the delegation-related activities to be carried out by the Regional Entities, including certification of Bulk Power System entities, reliability assessment and performance analysis, event analysis and reliability improvement activities, training and education,

⁸ The revised CMEP is discussed in §IV.E of this Petition. The agreement to adopt the uniform CMEP does not include the NERC uniform Hearing Procedures. (*See* the revised pro forma Delegation Agreement, Exhibit D, §1.0.) Only one Regional Entity has a deviation from the uniform CMEP: §5.3(vii) of the WECC CMEP does not contain a reference to a shortened hearing procedure, because the WECC hearing procedures do not include the shortened hearing procedure that is included in the NERC uniform Hearing Procedures. *See* §III.C.8 below.

and situation awareness and infrastructure security. (Revised pro forma Delegation Agreement, §7.)

- Under the revised pro forma Delegation Agreement, NERC will maintain a single consolidated Compliance Registry listing the bulk power system owners, operators, and users that are registered in the various reliability functional categories as responsible to comply with applicable Reliability Standards. NERC will register entities based on application of the criteria in the NERC *Statement of Compliance Registry Criteria* to information on owners, operators and users gathered and provided by the Regional Entities. (Revised pro forma Delegation Agreement, §7(b).)
- The revised pro forma Delegation Agreement contains a new section describing in detail the processes and procedures by which the parties intend for NERC to carry out its oversight responsibilities of the Regional Entities' performance of their delegated functions. (Revised pro forma Delegation Agreement, §8.)
- Under the revised pro forma Delegation Agreement, NERC and the Regional Entities will develop performance goals, measures and other parameters to assess their performance in carrying out their respective functions and other activities. The performance goals, measures, and other parameters will be public and will be reviewed and analyzed on the same timetable as the development of the annual NERC and Regional Entity business plans and budgets. Additionally, at the request of the NERC President, a Regional Entity may be required to develop an action plan to address areas of its performance that NERC reasonably determines, based on evaluation of performance against the performance goals, measures, and parameters, to be unsatisfactory. (Revised pro forma Delegation Agreement, §8(a).)
- The revised pro forma Delegation Agreement includes a specific collaborative process for establishing "directives" with respect to the Regional Entities' performance of their delegated functions and delegation-related activities. This process begins with collaboration, proceeds through notice and comment among the parties, and concludes with a binding decision by the NERC President, with the opportunity for the Regional Entity(ies) to ask the NERC Board to review the NERC President's determination. (Revised pro forma Delegation Agreement, §8(c))
- The revised pro forma Delegation Agreement expressly identifies the requirements that will provide the basis for any audits performed by NERC of the Regional Entity's performance. (Revised pro forma Delegation Agreement, §8(f).)
- The revised pro forma Delegation Agreement specifies more detailed procedures for the preparation of the annual Regional Entity business plans and budgets. (Revised pro forma Delegation Agreement, §9 and Exhibit E.)
- The revised pro forma Delegation Agreement provides for the possibility of using penalties collected by a Regional Entity for violations of Reliability Standards in a manner other than as an offset to the Regional Entity's overall statutory budget in the

following year. Any such departure from the normal treatment would require prior approval by NERC and the Commission. (Revised pro forma Delegation Agreement, §9(j) and Exhibit E, §5.)

- The initial term of the revised Delegation Agreements is five years rather than three years. This is consistent with the current pro forma Delegation Agreement, which provided for an initial term of three years from May 2007 to May 2010 and a renewal term of five years. (Revised pro forma Delegation Agreement, §12(b).)

2. Detailed Description of Changes in the Revised Pro Forma Delegation Agreement

This subsection provides a detailed description, on a section-by-section basis, of the changes from the current pro forma Delegation Agreement to the revised pro forma Delegation Agreement, as shown in legislative style (redlined) in **Attachment 1B**. In addition to the substantive changes described below, the revised pro forma Delegation Agreement reflects a more consistent use of defined terms and more consistent capitalization of defined terms.

a. Base Delegation Agreement

Initial paragraph and recitals. The initial paragraph identifies the effective date of the revised Delegation Agreement as January 1, 2011, consistent with NERC's request in this Petition. In the initial paragraph and the recitals, a number of defined terms have been capitalized. The last recital describes the basis and purpose on which NERC and the Regional Entities have negotiated and entered into the revised Delegation Agreements.

Section 1, Definitions. The Definitions section has been revised to provide that certain defined terms (as identified by capitalization) from the NERC Glossary of Terms Used in Reliability Standards as well as from the FPA, the Commission's ERO Regulations, and the NERC ROP, are used in the pro forma Delegation Agreement. The Definitions section has also been revised to state that terms may be defined elsewhere in the Delegation Agreement. "Regional Entity" and "Reliability Standard" have been removed from the Definitions section because they are defined elsewhere.

Section 2, Representations. Section 2(a)(iii) has been revised to state that the Regional Entity has adopted the NERC CMEP, Appendix 4C to the NERC ROP. Revisions have been made to §2(b) for grammatical purposes.

Section 3, Covenants. Revisions have been made to correctly use defined terms and to provide correct cross-references within the revised pro forma Delegation Agreement.

Section 4, Delegation of Authority. Revisions have been made to §4(a) for consistent use of terms and to recognize that certain limitations on the geographic scope of the Regional Entity's Delegated Authority may be set forth in Exhibit A to the Delegation Agreement. In addition, §4(a) has been revised, and new §4(b) has been added, to specify that a Regional Entity that also performs (or whose affiliated entity performs) registered functions as a Registered Entity cannot monitor its own compliance (or that of its affiliate) with applicable Reliability Standards, but rather must enter into an agreement with NERC or another Regional Entity to monitor and enforce the first Regional Entity's compliance with the Reliability Standards that are applicable to its registered functions.

New §4(c) has been added to allow Regional Entities to enter into arrangements, subject to approval by NERC, to perform compliance monitoring and enforcement activities outside their regions, with respect to Registered Entities that have registered functions monitored by more than one Regional Entity.

Sections §4(b) and (c) of the current pro forma Delegation Agreement are §4(d) and (e) of the revised pro forma Delegation Agreement. Revisions have been made to these subsections to use defined terms and to provide correct cross-references.

Section 5, Development and Proposal of Reliability Standards. In §5(a)(ii), a reference to a section of the NERC ROP has been changed to be consistent with the revised ROP. Other revisions have been made to §5 to use defined terms and for greater clarity.

Section 6, Enforcement of Compliance with Reliability Standards. Revisions have been made throughout §6 to use defined terms, including the terms Possible Violation, Alleged Violation and Confirmed Violation, and other defined terms that are used in the revised uniform CMEP.

Section 6(a) has been revised to provide for consistent use of defined terms and other terms. Section 6(a) has also been revised (i) to note that limitations or exceptions to the geographic scope of the Regional Entity's delegated authority to enforce Reliability Standards may be specified in Exhibit A; (ii) to specify that any changes to the Regional Entity's CMEP require approval of the Commission; and (iii) to specify that in implementing its CMEP, the Regional Entity agrees to comply with any directives issued pursuant to new §8(c) and with any guidance or directions issued by the NERC Board or a Board committee pursuant to new §8(d).

Sections 6(b)-(d) and (f) have been revised to use defined terms

Section 6(c) has been revised to specify that a Possible Violation, Alleged Violation or Confirmed Violation shall be treated as non-public unless the matter is filed with the Commission as a Notice of Penalty or, if disclosure is required, is dismissed.

New §6(d) provides that the Regional Entity shall report all Possible Violations, Alleged Violations and Confirmed Violations to NERC for review and, in the case of Confirmed Violations, penalties or sanctions, and settlements, for approval. This provision clarifies what compliance enforcement actions by the Regional Entity are subject to approval by NERC. Section 6(d) also states that following NERC's approval of a Regional Entity's disposition of a

compliance enforcement matter, NERC shall file the disposition with the Commission if required. Further, §6(d) states the criteria by which NERC will review the Regional Entity's dispositions. Those criteria are:

- (i) whether the disposition is supported by a sufficient record compiled in accordance with the NERC ROP, NERC directives and Commission requirements, taking into account the nature of the Possible Violation, Alleged Violation or Confirmed Violation;
- (ii) whether the disposition is consistent with any applicable directives issued pursuant to new §8(c), any applicable directions or guidance issued pursuant to new §8(d), or other applicable NERC guidance concerning the subject Reliability Standards;
- (iii) if the disposition is a Confirmed Violation or settlement, whether it provides for a penalty or sanction (including no penalty or sanction) in accordance with the NERC *Sanction Guidelines*; and
- (iv) whether the disposition is reasonably consistent with other dispositions by the Regional Entity and by other Regional Entities of Possible Violations, Alleged Violations and Confirmed Violations involving the same or similar facts and circumstances.

The specification of these criteria in the revised pro forma Delegation Agreement is intended to bring greater clarity and certainty to the scope and bases of NERC's review of Regional Entity dispositions of compliance enforcement matters. Section 6(d) provides that NERC may reject any Regional Entity disposition of a compliance enforcement matter, with an explanation of why NERC believes the disposition does not meet the above criteria.

Section 6(d) also provides that the Regional Entity may submit a disposition requiring NERC approval that has previously been rejected by NERC, or a revised disposition following a rejection, directly to the NERC Board of Trustees Compliance Committee ("BOTCC") for approval, without revising the disposition to address all the grounds on which NERC originally rejected the disposition. This provision provides a means for the Regional Entity to submit a disposition to the BOTCC for approval or rejection if the Regional Entity disagrees with the

reasons NERC staff rejected the disposition and/or believes submission of further revised versions of the disposition to NERC staff will not be useful.

Finally, §6(d) states that final approval of the Regional Entity's disposition of a Possible Violation, Alleged Violation or Confirmed Violation shall be made by the NERC BOTCC; however, the BOTCC may, by appropriate resolution, delegate authority for final approval of dispositions of specified categories of Possible Violations, Alleged Violations and Confirmed Violations to the NERC President. This delegation authority provides the BOTCC with the ability to reduce its workload by avoiding the need to review dispositions of certain categories of compliance enforcement matters, and thereby enable the BOTCC to devote more attention to dispositions of more serious or complicated compliance enforcement matters.

Section 6(e) has been revised to clarify that it is decisions of the Regional Entity Hearing Body with respect to penalty determinations that may be filed with, and heard and disposed of by, NERC, in accordance with procedures in the NERC ROP.

Section 6(g) has been revised (from §6(f) in the current pro forma Delegation Agreement) to specify that the Regional Entity's CMEP shall be maintained in compliance with the NERC CMEP and the annual NERC CMEP Implementation Plan.

Section 6(h) has been revised (from §6(g) in the current pro forma Delegation Agreement) to specify that the Regional Entity shall maintain a conflict of interest policy that assures the integrity and independence of its CMEP, including the integrity and independence of persons or decision-making bodies making final determinations in compliance enforcement actions under §5.0 of the NERC CMEP.

Section 6(i) has been revised (from §6(h) in the current pro forma Delegation Agreement) to provide that NERC will review the Regional Entity's CMEP at least once every five years

rather than at least once every three years. However, this subsection continues to provide that NERC may review the Regional Entity's CMEP as often as NERC deems necessary.

Sections 6(i) and 6(j) in the current pro forma Delegation Agreement have been deleted. Portions of these subsections are encompassed by §6(a), §8(a) and §8(c) – (e) of the revised pro forma Delegation Agreement, and the remaining provisions were viewed to be no longer necessary, particularly in light of the agreement that all Regional Entities will adopt the NERC uniform CMEP.

Section 7, Delegation-Related Activities. Section 7 has been significantly expanded to identify the delegation-related activities the Regional Entity will perform, in addition to its delegated authority to develop and adopt Regional Reliability Standards and (for Regional Entities organized on an Interconnection-wide basis) Regional Variances under §5 and to monitor and enforce compliance with Reliability Standards under §6. The initial paragraph of §7 states that the Regional Entity's delegation-related activities include, but are not limited to, those described in subsections 7(a) through 7(f), each of which shall be considered a statutory activity.

Section 7(a) provides that the NERC Board shall set criteria for certification of Bulk-Power System entities, in accordance with the NERC ROP, and that the Regional Entity shall issue certifications to entities in accordance with the NERC ROP.

Section 7(b) provides for NERC to develop criteria for registration of owners, operators, and users of the Bulk-Power System as Registered Entities, and states that NERC shall apply the registration criteria to register owners, operators, and users as Registered Entities.⁹ It also provides that NERC shall maintain the registration database (*i.e.*, the Compliance Registry). Currently, the Regional Entities have the initial responsibility to register owners, operators, and

⁹ As part of this filing, NERC is proposing to add the *Statement of Compliance Registry Criteria* to the ROP as Appendix 5B. *See* §IV.G below and **Attachment 16**.

users, and to maintain Regional compliance registries. However, revised §7(b) does provide that the Regional Entity shall provide data and information to NERC to enable NERC to maintain a registration database that is accurate and up-to-date. Finally, §7(b) provides that the NERC BOTCC shall hear appeals from owners, operators, and users contesting registration, in accordance with the NERC ROP; and that if the BOTCC upholds a registration decision, NERC shall defend the decision in any subsequent appeal of the decision by the Registered Entity to the Commission.

Section 7(c) addresses the Regional Entity's responsibilities with respect to the Reliability Assessment and Performance Analysis Program. The responsibilities described in this subsection are consistent with those currently performed by the Regional Entities in this program, but new §7(c) memorializes them in the Delegation Agreement. Section 7(c) also specifies that NERC shall develop data-gathering quality control procedures, forms and reporting mechanisms which shall be used by the Regional Entity in carrying out its responsibilities.

Section 7(d) addresses the Regional Entity's responsibilities with respect to Event Analysis and Reliability Improvement. Section 7(d) specifies that the Regional Entity will conduct event analysis pursuant to the NERC ROP and applicable governmental regulations; that NERC and the Regional Entity will coordinate event analysis to support the effective and efficient use of their collective resources, consistency in event analysis, and timely delivery of event analysis reports; and that in collaboration with NERC, the Regional Entity will disseminate to the industry lessons learned and other information from event analysis.

Section 7(e) addresses the Regional Entity's responsibilities with respect to the Training and Education Program, and specifies that the Regional Entity may provide training and education to Registered Entities, as it deems necessary, in support of its performance of

delegated functions and related activities. NERC may also provide training and education programs to Registered Entities on topics relating to NERC's responsibilities as the ERO.

Finally, Section 7(f) addresses the Regional Entity's responsibilities with respect to the Situation Awareness and Infrastructure Security Program (which includes Critical Infrastructure Protection). It specifies that the Regional Entity will gather and assess situation awareness information provided by Registered Entities pursuant to the NERC ROP and applicable governmental regulations, and will provide other data, information and assistance to NERC in support of NERC's activities in monitoring present conditions and responding to events on the Bulk-Power System. In addition, the Regional Entity will collaborate with NERC in its efforts to coordinate electric industry activities to promote critical infrastructure protection of the Bulk-Power System.

Section 8, Oversight of Performance of Delegated Functions and Related Activities.

Section 8 is a new section that sets forth processes and procedures NERC and the Regional Entities intend to be used in NERC's oversight of the Regional Entities' performance of Delegated Authority and related activities under the Delegation Agreements. The introductory paragraph of §8 states that it is the intent of NERC and the Regional Entities that matters relating to NERC's oversight of a Regional Entity's performance of its Delegated Authority and related activities shall be established, to the maximum extent possible, by collaboration between NERC and the Regional Entity and, if applicable, other Regional Entities.

Section 8(a) provides that NERC shall develop, in collaboration with the Regional Entities, performance goals, measures and other parameters, and performance reports, which shall be used to measure NERC's and the Regional Entity's performance of their respective functions and related activities. These performance goals, measures and parameters and the form

of performance reports will be approved by the NERC President and made public. Section 8(a) further provides that NERC will use the performance goals, measures and parameters and performance reports to evaluate the Regional Entity's performance of its delegated functions and related activities and to provide advice and direction to the Regional Entity on performance improvements. Additionally, the performance goals, measures and other parameters and their values will be reviewed by NERC and the Regional Entities, and revised if appropriate, and made public, on the same timeline as the annual business planning and budgeting process.

Section 8(a)(iii) specifies that at the request of the NERC President, a Regional Entity will be required to develop, submit for NERC approval, and implement, action plans to address areas of its performance that are reasonably determined by NERC, based on analysis of the Regional Entity's performance against the performance goals, measures and parameters, or its performance of specific activities, to be unsatisfactory. Before requiring the Regional Entity to adopt and implement an action plan or other remedial action, NERC must notify the Regional Entity of the need and basis for an action plan or other remedial action and provide an opportunity for the Regional Entity to submit a response contesting NERC's evaluation of its performance and the need for an action plan. Additionally, the Regional Entity may ask the NERC President to reconsider the request, and thereafter may ask the NERC Board to review and reconsider the request. Section 8(a)(iii) further specifies that NERC and the Regional Entity will work collaboratively in the development and implementation of the action plan. A final action plan submitted by the Regional Entity will be made public unless the NERC President determines the action plan or specific portions of it should be non-public.

Section 8(b) provides that NERC will make available to the Regional Entity standardized training and education programs for Regional Entity personnel, which will be designed taking

into account input from the Regional Entities on topics relating to the delegated functions and related activities.

Section 8(c) sets forth the process by which NERC may issue directives to a Regional Entity concerning the manner in which the Regional Entity shall perform its delegated functions and related activities under the Delegation Agreement. (An ERO Rule requiring Commission approval is not a §8(c) directive.) NERC will initiate the development of a directive through a collaborative process with the Regional Entity and, if applicable, other Regional Entities. Any directive developed through this collaborative process will be approved and issued by the NERC President. If, after a reasonable time, NERC and the Regional Entity(ies) cannot reach agreement on the directive, NERC may issue the directive with the approval of the NERC President. However, before the directive is issued, the Regional Entity(ies) must be given an opportunity to present their positions on the proposed directive, and a suggested alternative version(s), to the NERC President. A directive issued by the NERC President will be binding upon and complied with by the Regional Entity, subject to reasonable time periods for adoption, implementation, and funding of any necessary resources. The Regional Entity may ask the NERC Board (or a Board committee to which the Board delegates authority) to review and confirm, revise or revoke any directive issued without the Regional Entity's agreement; such a request must be made within 30 days after issuance of the directive absent good cause for a later request.

Section 8(c)(iv) states that NERC and Regional Entities will collaborate in deciding whether a directive will be made public; if no agreement is reached by the date of issuance of the directive, the NERC President will determine if it should be made public. Section 8(c)(iv) states

a presumption that a directive should be made public unless the NERC President makes a written determination, stating a specific reason, that the directive should be non-public.

Section 8(d) provides that the NERC Board, or a Board committee with delegated authority, may issue guidance and directions to the Regional Entity(ies) as to the manner in which delegated functions and related activities shall be performed. The Board or Board committee shall also establish reasonable time periods for implementation of guidance or directions, taking into account the impact on the reliability of the Bulk-Power System and the need for funding of any additional resources. The Regional Entity(ies) may request the NERC Board or Board committee to reconsider or revise any guidance or direction. Any guidance or direction must be stated in writing and will be public, unless the Board or Board committee determines particular guidance or direction should be non-public.

Section 8(e) states that NERC will conduct collaborative reviews with the Regional Entity(ies) that provide for the exchange of information on practices, experiences, and lessons learned in the implementation of the delegated functions. Essentially the same provision is found in §6(j) of the current pro forma Delegation Agreement.

Section 8(f) specifies that any audits NERC performs of the Regional Entity shall be limited to examination of the Regional Entity's compliance with the Delegation Agreement, the NERC ROP, the CMEP, Commission requirements, and directives issued pursuant to §8(c).

Section 9, Funding. This section has been expanded from the Funding section (§8) of the current pro forma Delegation Agreement. Exhibit E to the Delegation Agreement (discussed in §III.B.2.f below) contains other provisions concerning funding and costs. The introductory paragraph to §9 states the overall objective of the Funding section, which is to ensure, subject to

Commission approval, that the delegated functions and related activities in sections 5, 6 and 7 of the Delegation Agreement will have reasonable and adequate funding and resources.

Section 9(a) specifies that the Regional Entity will develop, through a collaborative process with NERC, and propose, an annual business plan and budget, in accordance with the ERO Regulations, Commission orders and NERC business planning and budgeting policies and instructions. The proposed business plan and budget must describe the activities necessary, and provide a budget with adequate resources, for the Regional Entity to carry out its Delegated Authority; and must show the funding sources and amounts to fund the proposed budget, including as applicable assessments to end users, penalty monies, and other sources of funds.

Section 9(b) specifies that NERC and the Regional Entity agree that the portion of the Regional Entity's approved budget for statutory functions and activities will be equitably allocated among end users within the Regional Entity's geographic boundaries and recovered through a formula based on Net Energy for Load ("NEL") or an alternative formula that is proposed by the Regional Entity and approved by NERC and the Commission. Section 9(b) is not substantively different from §8(b) of the current pro forma Delegation Agreement.

Section 9(c) specifies that NERC will determine that the assessments to fund the costs for its statutory functions in its Commission-approved budget are first allocated fairly among the Interconnections and regions according to the applicability of the work to those Interconnections and regions, and then equitably among the end users of the applicable interconnections and regions as appropriate, with allocation on a NEL basis presumed to be equitable. Section 9(c) is not substantively different from §8(c) of the current pro forma Delegation Agreement.

Section 9(d) specifies that NERC will provide the Regional Entity with the forms for submittal of its business plan and budget, and any accompanying instructions, in accordance with

a schedule for preparation of the business plan and budget developed by NERC and the Regional Entities. Section 9(e) specifies that the Regional Entity will submit its proposed annual business plan and budget for its Delegated Authority and related activities, and for all the Regional Entity's other activities, in accordance with the annual schedule for preparation of business plans and budgets that NERC and the Regional Entities will develop pursuant to Exhibit E.

Section 9(f) provides that NERC will fund the Regional Entity's performance of its Delegated Authority and related activities in accordance with the Regional Entity's Commission-approved business plan and budget, in the amount of the assessments to end users approved by the Commission. Section 9(f) refers to Exhibit E as setting forth the procedures and timing for billing and collecting the approved assessments from end users and other entities and payment of the approved assessment to the Regional Entity. Section 9(f) also states that NERC will not impose any material obligation or requirement regarding the Delegated Authority on the Regional Entity that has not been provided for in an approved business plan and budget, or an approved amended or supplemental and budget, without the Regional Entity's consent.

Section 9(g) contains provisions found in §8(e) of the current pro forma Delegation Agreement stating that NERC will develop, in consultation with the Regional Entities, a reasonable and consistent system of accounts, with a level of detail and record keeping comparable to the Commission's Uniform System of Accounts and sufficient to allow the Commission to compare each Commission-approved NERC and Regional Entity fiscal year budget with the actual results at the NERC and Regional Entity levels; that the Regional Entity will follow NERC's prescribed system of accounts except to the extent NERC permits a departure; and that NERC will make an informational filing with the Commission describing any waiver it permits and providing an explanation supporting the permitted departure. Other

provisions of §8(e) of the current Delegation Agreement have been deleted from this subsection as they are covered elsewhere in the revised pro forma Delegation Agreement.

The provisions found in §8(f) and §8(g) of the current pro forma Delegation Agreement have been deleted. The provisions in current §8(f) are found in §2(a) of Exhibit E of the revised pro forma Delegation Agreement, and the provisions of current §8(g) are covered in greater detail elsewhere in §9 and Exhibit E of the revised pro forma Delegation Agreement.

Section 9(h) is identical to §8(h) of the current pro forma Delegation Agreement and specifies that the Regional Entity will submit unaudited quarterly interim financial statements in form provided by NERC no later than 20 days after the end of the fiscal quarter (March 31, June 30, September 30, and December 31). Section 9(i) is comparable to §8(i) of the current pro forma Delegation Agreement but has been revised to specify that the Regional Entity will submit its audited financial statements for the fiscal year to NERC by May 1 of the following year (rather than within 150 days following the end of the fiscal year).¹⁰

The provision of §8(j) of the current pro forma Delegation Agreement, that NERC will have the right to review the Regional Entity's financial records no less than every three years, is not included in §9 of the revised pro forma Delegation Agreement, because NERC's review of the Regional Entity's financial records is now covered in §8 of Exhibit E to the revised pro forma Delegation Agreement.

¹⁰ This change is consistent with the revised procedure for the submission of NERC's and the Regional Entities' annual comparisons of their budgeted funding and expenditures to actual budgets and expenditures for the preceding year. On June 29, 2009, the Commission approved NERC's proposal to change the date for these annual filings from April 1 to May 30 to allow the budget-to-actual comparisons to be based on NERC's and the Regional Entities' audited financial statements for the preceding year. *North American Electric Reliability Corporation, Order Conditionally Accepting Compliance Filing*, 127 FERC ¶ 61,307 (2009).

Section 9(j) is comparable to §8(k) of the current pro forma Delegation Agreement and specifies that Exhibit E sets forth the mechanism through which the Regional Entity will offset penalty monies it receives (other than penalty monies received from an operational function or division or affiliated entity of the Regional Entity) against its next year's annual budget for carrying out functions under this Agreement, and the mechanism by which the Regional Entity will transmit to NERC any penalty monies received from an operational function or division or affiliated entity of the Regional Entity. However, the subsection has been amended to add a proviso that, subject to approval by NERC and the Commission, the Regional Entity may propose and implement an alternative use of penalty monies to that specified in Exhibit E.

Section 10, Assignment. The only revision to this provision (which is §9 of the current pro forma Delegation Agreement) is the addition of a proviso that the Regional Entity may not delegate its Delegated Authority to any other entity “without NERC’s express consent.”

Section 11, Default and Cure. Other than modification of internal and cross-references, the only revision to this provision (which is §10 of the current pro forma Delegation Agreement) is the following revision to one sentence: “The deadlines for cure and the right to declare a default and terminate this Agreement shall be suspended during the pendency of any efforts or proceedings in accordance with Section 18 of this Agreement to resolve a dispute as to whether a Breach has occurred or been cured.”

Section 12, Term and Termination. This section covers the same subject matter as §11 of the current pro forma Delegation Agreement. Sections 12(a) and (b) have been revised (i) to specify an Effective Date of January 1, 2011 (for which NERC is requesting approval in this Petition); (ii) to specify a term of five years from the Effective Date, with the possibility of renewal for successive additional five-year renewal terms (the current Delegation Agreements

only provide for a single five-year renewal term), and (iii) to update/revise cross-references to other sections of the revised pro forma Delegation Agreement. Establishing an (initial) term of five years from the proposed Effective Date of January 1, 2011 is consistent with the current Delegation Agreements which provided for a three-year initial term beginning in May 2007 with provision for a five-year renewal term. Prior to any renewal term, NERC must conduct an audit to ensure that the Regional Entity continues to meet all statutory and regulatory requirements necessary to maintain its eligibility for delegation.

Section 12(b) has been revised to provide that either Party may terminate the Delegation Agreement as of the end of a term by giving written notice at least one year prior to the end of the term. Section 12(b) has also been revised to state that if the Delegation Agreement is not renewed or becomes subject to termination, NERC and the Regional Entity shall work both to provide for a transition of Regional Entity's Delegated Authority to NERC or another entity and to provide for resolution of any wind-up costs associated with termination of the Delegation Agreement.

There are no revisions in §12(c) and (d) other than updating cross-references.

Section 13, Limitation of Liability. This section is identical to §12 of the current pro forma Delegation Agreement; no revisions have been made.

Section 14, No Third Party Beneficiaries. This section is identical to §13 of the current pro forma Delegation Agreement; only a typographical revision has been made.

Section 15, Confidentiality. This section is identical to §14 of the current pro forma Delegation Agreement; no revisions have been made.

Section 16, Amendment. This section is identical to §15 of the current pro forma Delegation Agreement; no revisions have been made.

Section 17, Amendments to the NERC Rules of Procedure. This section covers the same subject matter as §16 of the current pro forma Delegation Agreement; the only revisions that have been made are to update cross-references and to use defined terms.

Section 18, Dispute Resolution. This section covers the same subject matter as §17 of the current pro forma Delegation Agreement; however, in the revised pro forma Delegation Agreement, the Dispute Resolution procedure has been expanded to provide for a more detailed procedure with multiple steps. The expanded procedure includes: (i) a requirement for the Party invoking Dispute Resolution to do so by written notice to the other Party; (ii) a specified period (which may be extended by agreement) in which the Parties' designated representatives will negotiate to attempt to resolve the dispute; (iii) if the dispute is not resolved, escalation to the Parties' CEOs, who shall negotiate for a specified period (which may be extended by agreement) to attempt to resolve the dispute; and (iv) if the CEOs are unable to resolve the dispute, either Party may invoke any other available dispute resolution mechanism, including filing a complaint or petition with the Commission. The expanded Dispute Resolution process is more consistent with the type of process often found in commercial agreements.

Section 18(f) states that if the Parties are unable to resolve a dispute through negotiations, (i) it is the intent of the Parties that unresolved disputes shall be presented to and resolved by the Commission if the Commission has and accepts jurisdiction over the subject matter of the dispute, (ii) the Parties may, by mutual agreement, attempt to resolve the dispute through arbitration, mediation, or other process involving resort to an impartial neutral, and (iii) resolution of disputes through Commission proceedings, arbitration, mediation, or other use of an impartial neutral, is preferred over judicial proceedings.

The introductory paragraph of §18 states that during Dispute Resolution, the Regional Entity shall not suspend performance of any delegated function, and the Parties shall continue to make reasonable, good faith efforts to comply with their obligations under the Delegation Agreement. Finally, §18(g) provides that the Dispute Resolution process shall not apply to compliance enforcement actions against individual Registered Entities.

Section 19, Notice. This section is identical to §18 of the current pro forma Delegation Agreement, with the exception that the recipient of notices for NERC has been changed.

Section 20, Governing Law. This section is identical to §19 of the current pro forma Delegation Agreement; no revisions have been made.

Section 21, Headings. This section is identical to §20 of the current pro forma Delegation Agreement; no revisions have been made.

Section 22, Savings Clause. This section covers the same subject matter as §21 of the current pro forma Delegation Agreement. The only revisions from the current provision are for the use of defined terms, and to change the term “ensure reliability” to “maintain reliability.”

Section 23, Entire Agreement. This section is identical to §22 of the current pro forma Delegation Agreement; no revisions have been made.

Section 24, Execution of Counterparts. This section is identical to §23 of the current pro forma Delegation Agreement; no revisions have been made.

b. Exhibit A to Delegation Agreement

Exhibit A to the Delegation Agreements sets forth the Regional Entity’s geographic boundaries and any additions to or exclusions from the geographic or electrical boundaries within which the Regional Entity will carry out its delegated functions. The following instruction has been added to Exhibit A in the revised pro forma Delegation Agreement:

Any exclusions of geographic or electrical areas or of Registered Entities from the scope of the Registered Entity's Delegated Authority within the geographical or electrical boundaries shown on **Exhibit A**, and any additions of geographic or electrical areas or of Registered Entities located outside the boundaries shown on **Exhibit A** to the scope of the Regional Entity's Delegated Authority, shall be specifically stated or described in **Exhibit A**. (Emphasis in original.)

c. Exhibit B to Delegation Agreement

In the revised pro forma Delegation Agreement, there are no changes to the five criteria stated in the cover page to Exhibit B. Exhibit B to the individual Delegation Agreements includes each Regional Entity's current bylaws.

d. Exhibit C to Delegation Agreement

In the revised pro forma Delegation Agreement, there is only one change to the 34 Common Attributes of an acceptable Regional Entity Reliability Standards Development Procedure ("RSDP") which the Regional Entity's RSDP must meet. Specifically, in Common Attribute 34, the reference to "Violation Severity Levels" has been deleted. This is consistent with a recent change to the NERC RSDP, approved by the Commission, pursuant to which Violation Severity Levels and Violation Risk Factors for a Reliability Standard are no longer considered as a part of the standard and developed through the RSDP, but rather are considered compliance elements that are developed separately in conjunction with development of the standard and approved by the NERC Board.¹¹ Exhibit C to the individual Delegation Agreements includes each Regional Entity's current RSDP.

e. Exhibit D to the Delegation Agreement

Section 1.0 of Exhibit D has been revised to state that the Regional Entity will implement the NERC CMEP, Appendix 4C to the NERC ROP. All Regional Entities have agreed to

¹¹ This amendment to the NERC RSDP was approved by the Commission in a letter order issued February 5, 2010, in Docket No. 10-4-000.

implement the NERC CMEP.¹² Therefore, former §1.2 of Exhibit D, which provided for identification of any deviations between the Regional Entity's CMEP and the NERC uniform CMEP, has been deleted. However, revised §1.0 also specifies that for purposes of this commitment, the NERC CMEP does not include the NERC uniform Hearing Procedures. The Regional Entity's Hearing Procedures are addressed in §2.0, Regional Hearing of Compliance Matters. As in the current pro forma Delegation Agreement, §2.0 requires identification of the Regional Entity's hearing body and, if the hearing body is a compliance panel other than the Regional Entity Board, a description of how the members of the compliance panel are selected and the qualifications for selection to the compliance panel. Section 2.0 also specifies that the Regional Entity will conduct compliance hearings in accordance with Attachment 2, Hearing Procedures, to the NERC CMEP, subject to any deviations in the Regional Entity's hearing procedures that are listed in §2.0 or in a separate attachment.

Section 3.0 of Exhibit D in the revised pro forma Delegation Agreement has not been revised from the current pro forma Delegation Agreement. It requires the Regional Entity to identify any other decision-making bodies used within its compliance program, along with a description of the functions of that body, to the extent not described elsewhere, how the members of that body are selected, and the qualifications for selection.

f. Exhibit E to the Delegation Agreement

Exhibit E, Funding, has been considerably expanded in the revised pro forma Delegation Agreement, and some provisions have been moved to Exhibit E from the body of the Delegation Agreement.

¹² As noted above and described in §III.C.8 below, there is one deviation in the WECC CMEP from the uniform CMEP.

In Section 1, the list of Regional Entity activities funded through the ERO funding mechanism has been expanded. Event Analysis and Reliability Improvement has been listed as a separate statutory activity, and Situation Awareness and Infrastructure Security have been listed as two separate statutory activities rather than as a single activity. Reliability Readiness Evaluation and Improvement has been deleted from the list, as this program has been terminated. In addition, the references to the sections of the NERC ROP have been deleted as these were no longer considered useful for budgeting and funding purposes.

Section 2 contains detailed provisions concerning the development, submission, review and preparation of the Regional Entity's annual business plan and budget. Section 2(a) specifies that the Regional Entity's business plan and budget shall include supporting materials, including the proposed collection of all assessments, dues, fees, and charges, and the proposed expenditure of the funds to be collected in sufficient detail to justify the requested budgeted expenditures and assessments. The proposed business plan and budget and proposed assessment shall also provide for reasonable reserve mechanisms for unforeseen and extraordinary expenses and other contingencies.

Section 3 addresses the allocation of the Regional Entity's costs, and specifies that the assessments to fund the Regional Entity's delegated functions and related activities shall be allocated among all load-serving entities ("LSE") on the basis of NEL, unless a different method of allocating and collecting assessments has been submitted to and approved by NERC and the Commission. The Regional Entity must submit to NERC a list of the LSEs or designees that shall be responsible for paying the Regional Entity's assessment, the LSEs' proportionate NEL, and other data and information needed to calculate the Regional Entity's assessments to LSEs and designees.

Section 4 addresses collection and funding. Section 4(a) (similar to §3 of Exhibit E to the current pro forma Delegation Agreement) contains alternative provisions applicable if (i) NERC bills and collects the assessments directly from the LSEs and designees, or (ii) the Regional Entity acts as billing and collection agent on behalf of NERC. The text applicable where the Regional Entity acts as the billing and collection agent retains provisions regarding the Regional Entity's role that the Commission has previously required.

Section 4(b) specifies that NERC will pursue any non-payments of assessment amounts, and that to the extent reasonably practicable, the Regional Entity will assist NERC in pursuing and collecting any non-payments. Section 4(b) further specifies that the Regional Entity is not responsible and does not assume any liability for recovering non-payments or underpayments of assessment amounts; rather, NERC retains sole responsibility for recovering non-payments or underpayments of assessment amounts. Additionally, NERC will add the amount of any non-payments by end-users or designees within the Regional Entity's region that are reasonably determined to be uncollectible, to NERC's assessments for a subsequent year, with the amount of such non-payments to be allocated to end-users within Regional Entity's region. This provision memorializes the procedures that NERC and the Regional Entities have heretofore followed to recover unpaid assessments.

Section 4(c) is comparable to §3(c) of the current pro forma Delegation Agreement, and specifies that NERC will pay the Regional Entity's approved assessment to fund the cost of the Regional Entity's delegated functions and related activities to the Regional Entity in four equal quarterly payments. The subsection has been revised to state that the payment dates will be January 15, April 15, July 15 and October 15 of the budget year.

Section 5, Application of Penalties, is comparable to §4 of Exhibit E to the current pro forma Delegation Agreement. The section has been revised to provide for the possibility of an alternative application of penalty monies collected from Registered Entities, if approved by the Commission.¹³

Section 6, Budget and Funding for Regional Entity's Non-Statutory Activities, is comparable to §5 of Exhibit E to the current pro forma Delegation Agreement, and requires the Regional Entity to list any non-statutory activities and to describe the methods and procedures it uses to keep statutory funding and expenditures separate from non-statutory funding and expenditures. This section has been revised (i) to require the Regional Entity to provide a description of how its general and administrative costs are allocated between statutory and non-statutory activities, and (ii) to specify that the Regional Entity's non-statutory costs (if any), which cannot be included in the calculation of its assessments, dues, fees and other charges for statutory activities, must include a reasonable allocation of its general and administrative costs.

Section 7 specifies that if, during the course of the fiscal year, the Regional Entity determines it does not or will not have sufficient funds to carry out its delegated functions and related activities, the Regional Entity will submit a proposed amended or supplemental business plan and budget and request for approval of supplemental assessments, reflecting costs, cost increases or funding shortfalls not provided for in the its approved business plan and budget for the year. The section provides for review and approval by NERC of the amended or supplemental budget and assessment, and submission to the Commission for approval. The current pro forma Delegation Agreement does not contain a provision requiring the Regional

¹³ A possible alternative application of penalty payments would be to spread application of a large penalty payment or payments received in a year over two or more years, thereby avoiding large year-to-year fluctuations in assessment levels.

Entity to submit an amended or supplemental budget and assessment request during the course of the year in the event of unexpected costs or funding shortfalls.

Section 8 provides that NERC will conduct reviews of the quarterly and annual financial statements submitted by the Regional Entity pursuant to §9(h)-(i) of the base agreement. NERC's review of the Regional Entity's financial records was covered in §8(j) of the current base pro forma Delegation Agreement, but this topic has been moved to Exhibit E of the revised pro forma Delegation Agreement.

C. Revised Delegation Agreements with Regional Entities

This §III.C describes the revised Delegation Agreements between NERC and the individual Regional Entities, focusing on those respects in which an individual Delegation Agreement differs from the revised pro forma Delegation Agreement. **Attachments 2A** through **9A** are clean versions of the proposed revised Delegation Agreements between NERC and each of the eight Regional Entities. **Attachments 2B** to **9B** are redlined versions of the proposed revised Delegation Agreements against the revised pro forma Delegation Agreement. As discussed below, many of the deviations reflect unique circumstances of the particular Regional Entity and have previously been approved by the Commission.

The discussion below does not identify all provisions in the individual Delegation Agreements that differ from the revised pro forma Delegation Agreement due to insertion of specific information for the Regional Entity (such as the description of the particular Regional Entity's geographic boundaries in Exhibit A, or the inclusion of specific information on the Regional Entity's RSDP in the Common Attributes in Exhibit C); or due to selection of text options in the pro forma Delegation Agreement to reflect the circumstances of the particular Regional Entity (such as where text applying only to a Regional Entity organized on an

Interconnection-wide basis is deleted from the Delegation Agreement between NERC and a Regional Entity that is not organized on an Interconnection-wide basis; or where the Delegation Agreement describes the Regional Entity’s governing body using the applicable descriptive option provided in the pro forma Delegation Agreement).

1. Florida Reliability Coordinating Council Delegation Agreement and Request for Approval of Amendments to FRCC Bylaws

a. Differences from Pro Forma Delegation Agreement

The following list identifies deviations or differences in the revised FRCC Delegation Agreement (**Attachment 2**) from the revised pro forma Delegation Agreement, and also identifies certain differences between the current and the revised FRCC Delegation Agreements due to reasons other than the changes in the pro forma template.

1. In the first sentence of §9(j) of the base agreement, text has been deleted as shown below:

Exhibit E to this Agreement sets for the mechanism through which FRCC shall offset penalty monies it receives (~~other than penalty monies received from an operational function or division or affiliated entity of FRCC~~) against its next year’s annual budget for carrying out functions under this Agreement, ~~and the mechanism by which FRCC shall transmit to NERC and penalty monies received from an operational function or division or affiliated entity of FRCC.~~

This text has been deleted because FRCC has entered into an agreement with SERC, which is pending before the Commission for approval, pursuant to which SERC will perform the Compliance Enforcement Authority (“CEA”) functions with respect to those registered functions for which the FRCC Member Services Division (“MSC”) is the Registered Entity in the FRCC region.¹⁴ That proposed agreement provides that penalties collected by SERC from the FRCC

¹⁴ *Petition of the North American Electric Reliability Corporation for Approval of Compliance Monitoring and Enforcement Agreements Between SERC Reliability Corporation and Florida Reliability Coordinating Council and Southwest Power Pool Regional Entity and Related*

MSC for violations of Reliability Standards applicable to the MSC's registered functions, shall be used to reduce the portion of the FRCC ERO assessment to be paid by LSEs and designees in the FRCC region for the subsequent fiscal year. The *SERC-FRCC-SPP CMEP Agreements Filing* also requests approval for the same amendment to §8(k) of the current FRCC Delegation Agreement as is proposed in §9(j) of the revised FRCC Delegation Agreement (which addresses the same subject matter as §8(k) of the current agreement). As explained in the *SERC-FRCC-SPP CMEP Agreements Filing*, NERC, FRCC and SERC believe it is appropriate for LSEs in the FRCC region to receive the benefit of any penalties paid by FRCC as a Registered Entity, through reduced assessments in a future year, due to the fact that the LSEs in the FRCC region will be paying, through the annual FRCC assessment, SERC's costs to perform the CEA functions with respect to FRCC's registered functions.¹⁵ The Commission should rule on the proposed deviation in §9(j) of the revised FRCC Delegation Agreement consistent with the determination it makes on this point in its order on the *SERC-FRCC-SPP CMEP Agreements Filing*.

2. The third paragraph of Exhibit A to the FRCC Delegation Agreement contains revisions to the description of the FRCC region from the description contained in the current FRCC Delegation Agreement. The revisions are shown below in legislative style.

The areas of Baker and Nassau counties that are not part of the FRCC Region are part of the SERC Region. These sections are part of the Okefenoke Rural Electric Membership Corporation (OREMC) that is headquartered in Nahunta, GA or facilities owned by Georgia Transmission Corporation (GTC) that is headquartered in Tucker Georgia. Roughly two thirds of OREMC load is in Georgia and one third is in Florida. The majority of the OREMC load in Florida is connected directly to the Southern Company Balancing Area in the

Amendments to Delegation Agreements, filed March 10, 2010 in Docket No. RR10-7-000 (“*SERC-FRCC-SPP CMEP Agreements Filing*”).

¹⁵ *SERC-FRCC-SPP CMEP Agreements Filing* at 13-14.

SERC Region. Part of OREMC load is connected to both the Southern Company Balancing Area and FPL Balancing Area by a Georgia Transmission Corporation 115kV transmission line and Macedonia Switching Station in Baker County. A small portion of the OREMC load, about five (5) MW to twenty five (25) MW, is supplied as a radial feed from FPL West Nassau Substation. Georgia Transmission Corporation OREMC has secured firm transportation service from JEA and/or FPL on the Florida / Southern Interface to supply this load. The OREMC schedules energy on an hourly basis to cover this load. SERC will be responsible for registration and compliance monitoring of the Georgia Transmission Corporation in Baker County, Florida and of OREMC.

The effect of these revisions is that SERC, rather than FRCC, will be responsible for acting as the CEA with respect to the electrical facilities of Georgia Transmission Corporation and OREMC, as described above, that are physically located within the geographic boundaries of the FRCC region.

3. Exhibit A to the revised FRCC Delegation Agreement also contains the following statement:

Within the FRCC Region, compliance monitoring and enforcement functions with respect to reliability functions for which FRCC is a registered entity are performed by SERC Reliability Corporation (SERC) pursuant to a contract between FRCC and SERC dated as of (date).

This provision refers to the SERC-FRCC CMEP Agreement and is one of the amendments to the current FRCC Delegation Agreement for which approval has been requested in the *SERC-FRCC-SPP CMEP Agreements Filing* in Docket No. RR10-7-000.

4. Section 2.0 of Exhibit D to the revised FRCC Delegation Agreement identifies “the FRCC Board Compliance Committee (BCC), a balanced compliance panel reporting directly to the FRCC’s Board of Directors,” as FRCC’s hearing body. Section 2.0 also describes the composition of the BCC, the FRCC Industry Sectors from which the BCC members are drawn, the procedures for selection to populate the BCC pool and to select the hearing body from the BCC pool for a particular hearing, and the quorum and voting requirements for the BCC.

These provisions are identical to those in §2.0 of Exhibit D to the current FRCC Delegation Agreement.

5. Section 3.0, Other Decision-Making Bodies, in the revised FRCC Delegation Agreement differs from the current FRCC Delegation Agreement as shown below:

The FRCC has engaged ~~NERC~~ the SERC Reliability Corporation (SERC) to oversee the compliance monitoring and enforcement responsibility as related to FRCC's compliance with Reliability Standards requirements that are applicable to the functions for which FRCC is a Registered Entity.

This change is due to the proposed SERC-FRCC CMEP Agreement, and has also been proposed for approval in the *SERC-FRCC-SPP CMEP Agreements Filing* in Docket No. RR10-7-000.

6. In Section 5, Application of Penalties, of Exhibit E to the revised FRCC Delegation Agreement, the following deletions have been made from the pro forma language:

~~Except as otherwise approved by the Commission, all penalty monies received by FRCC, other than penalty monies received from an operational function or division of affiliated entity of [Regional Entity], shall be applied as a general offset to FRCC's budget requirements for U.S.-related activities under this Agreement for the subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity. Except as otherwise approved by the Commission, any penalty monies received from an operational function or division or affiliated entity of [Regional Entity] shall be transmitted to or retained by NERC and shall be used by NERC as a general offset to NERC's budget for its activities as the ERO under the Act for the following year.~~

These deletions are proposed for the same reason as the proposed deviations in §9(j) of the base agreement described in point 1 above. These same deletions have been proposed to §4 of the current FRCC Delegation Agreement (which is comparable to §5 of the revised Delegation Agreement) in the *SERC-FRCC-SPP CMEP Agreements Filing*. As with the proposed text deletions to §9(j) of the base agreement described in point 1 above, the Commission should rule on the proposed deviation in §5 of Exhibit E to the revised FRCC Delegation Agreement

consistent with the determination it makes on this point in its order on the *SERC-FRCC-SPP CMEP Agreements Filing*.

7. In §6, Budget and Funding for FRCC’s Non-Statutory Activities, of Exhibit E, the revised FRCC Delegation Agreement includes a detailed description of FRCC’s non-statutory activities and of the methods and procedures used by FRCC to keep its funding mechanisms for its statutory activities separate from its funding mechanisms for its non-statutory activities and to record the costs it incurs in performance of non-statutory functions separately from the costs it incurs in performance of its statutory activities.

b. Proposed Amendments to §5.4 of the FRCC Bylaws

NERC and FRCC are requesting approval of amendments to §5.4 of the FRCC Bylaws which are included in Exhibit B to the revised FRCC Delegation Agreement. In the interests of efficiency and avoiding multiple filings of different versions of the same document for approval, NERC has included the proposed Bylaws amendments in this Petition and requests that the Commission review and approve the Bylaws amendments in its Order on the revised Delegation Agreements. Because FRCC’s Bylaws are a “Regional Entity Rule” as defined in 18 C.F.R. §39.10, approval of the Bylaws amendments is requested pursuant to §215(f) of the FPA and 18 C.F.R. §39.10. The proposed amendments to the FRCC Bylaws §5.4, which pertains to the FRCC Compliance Committee, are as follows:

Section 5.4 Compliance Committee. Each Voting Member may appoint one (1) representative, empowered to vote on behalf of the Voting Member, to serve on the Compliance Committee. A representative may, if unable to attend a meeting, designate, in writing, an alternate to act on behalf of the representative. Quorum and Voting Rights shall be as defined in Sections 5.7 and 5.8. The Compliance Committee shall report directly to the Board and is charged with the responsibility of promoting reliability of the bulk power system within the FRCC through compliance related activities ~~and is charged with responsibility for the development and implementation of programs to ensure compliance for both FRCC Regional Reliability Standard and NERC Reliability Standards.~~ The

Compliance Committee is ~~not to be confused with~~ separate and distinct from the Board Compliance Committee which is primarily a “hearing body” and has a different voting structure as outlined in Exhibit D of the Delegation Agreement between the North American Electric Reliability Corporation and FRCC. The Compliance Committee may establish subcommittees and task forces as deemed necessary by its membership.

The proposed amendments were approved by the FRCC Board on May 5, 2010, and by the NERC Board of Trustees on May 12, 2010.

The first amendment in §5.4 (adopting the revised text “is charged with the responsibility of promoting reliability of the bulk power system within the FRCC through compliance related activities”), eliminates the responsibility of the FRCC Compliance Committee for developing and implementing the compliance program, which is a staff function, and replaces this responsibility with a broader charge to focus on promoting the reliability of the bulk power system within FRCC. The second amendment in §5.4 simply states somewhat more artfully than the existing text that the FRCC Compliance Committee is separate and distinct from the FRCC Board Compliance Committee.¹⁶ The third amendment in §5.4 authorizes the Compliance Committee to establish subcommittees and task forces as deemed necessary. These amendments are straightforward and should be approved by the Commission.

2. Midwest Reliability Organization Delegation Agreement and Request for Approval of Amendments to MRO Bylaws

a. Differences from Pro Forma Delegation Agreement

The following list identifies deviations or differences in the revised MRO Delegation Agreement (**Attachment 3**) from the revised pro forma Delegation Agreement, and also

¹⁶ The FRCC Board Compliance Committee is the FRCC hearing body and is described in §2.0 of Exhibit D to the revised Delegation Agreement. See point 4 in §III.C.1.a above.

identifies certain differences between the current and the revised MRO Delegation Agreements due to reasons other than the changes in the pro forma template.¹⁷

1. In §4(a) of the base Delegation Agreement, the following phrase has been deleted:

provided, that [REGIONAL ENTITY] shall not monitor and enforce compliance with Reliability Standards for [REGIONAL ENTITY] or an affiliate with respect to reliability functions for which [REGIONAL ENTITY] or an affiliate is a Registered Entity

MRO is not a Registered Entity for any functions and does not have any affiliates that are Registered Entities; therefore, the deleted text is inapplicable to MRO.

2. Similarly, the text of §4(b) (quoted below) has been deleted from the MRO Delegation Agreement, and the subsection has been marked “intentionally left blank”:

In circumstances where [REGIONAL ENTITY] or an affiliated entity is a Registered Entity, [REGIONAL ENTITY] shall enter into an agreement with another Regional Entity or NERC for the other Regional Entity or NERC to monitor and enforce [REGIONAL ENTITY]’s or affiliate’s compliance with Reliability Standards. Such agreements are subject to NERC and Commission approval.

MRO is not a Registered Entity for any functions and does not have any affiliates that are Registered Entities; therefore, the deleted text is inapplicable to MRO.

3. Similarly, deletions have been made from the first sentence of §9(j):

Exhibit E to this Agreement sets for the mechanism through which Midwest Reliability Organization shall offset penalty monies it receives (~~other than penalty monies received from an operational function or division or affiliated entity of [REGIONAL ENTITY]~~) against its next year’s annual budget for carrying out functions under this Agreement, ~~and the mechanism by which [REGIONAL ENTITY] shall transmit to NERC and penalty monies received from an operational function or division or affiliated entity of [REGIONAL ENTITY].~~

¹⁷ Although the MRO Bylaws included in Exhibit B to the revised MRO Delegation Agreement have been amended, only a clean version of the amended MRO Bylaws is included in **Attachments 3A** and **3B**. **Attachment 10** includes a redlined version of the amended MRO Bylaws, showing the amendments in legislative style. See §III.C.2.b below.

MRO is not a Registered Entity for any functions and does not have any affiliates that are Registered Entities; therefore, the deleted text is inapplicable to MRO.

4. Section 2.0 of Exhibit D to the revised MRO Delegation Agreement identifies its hearing body as “a balanced subset of its board that is appointed by the board with no more than one member from each sector.” This is a revision from §2.0 of Exhibit D of the current MRO Delegation Agreement, which specifies that MRO’s Hearing Body is its Board.

5. Section 3.0, Other Decision-Making Bodies, of Exhibit D to the revised MRO Delegation Agreement contains the following provision:

A presiding officer who presides over the reception of evidence may prepare recommendations to be used by the board of directors in preparing its decision in a compliance hearing. In addition to compliance hearings, Midwest Reliability Organization’s Hearing Body also reviews and approves settlements in a yes or no fashion, but it is not permitted to make modifications to negotiated settlements/agreements.

The first sentence appears in §3.0 to Exhibit D to the current MRO Delegation Agreement, however, the second sentence represents a change from the current MRO Delegation Agreement. In the current MRO Delegation Agreement, the second sentence reads: “Also, as described in other areas of the Agreement and in the business plan, the MRO Compliance Committee may provide technical review of alleged violations in support of staff as needed.” This sentence is being deleted because the charter of the MRO Compliance Committee has been revised to eliminate the responsibility to provide technical reviews of alleged violations. The new second sentence has been added because the MRO Board has delegated to the MRO Hearing Body the responsibility to review and approve settlement agreements with Registered Entities negotiated by MRO staff.

6. In Section 5, Application of Penalties, of Exhibit E to the revised MRO Delegation Agreement, the following deletions have been made from the pro forma language:

~~Except as otherwise approved by the Commission, all penalty monies received by Midwest Reliability Organization, other than penalty monies received from an operational function or division of affiliated entity of [Regional Entity], shall be applied as a general offset to Midwest Reliability Organization's budget requirements for U.S.-related activities under this Agreement for the subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity. Except as otherwise approved by the Commission, any penalty monies received from an operational function or division or affiliated entity of [Regional Entity] shall be transmitted to or retained by NERC and shall be used by NERC as a general offset to NERC's budget for its activities as the ERO under the Act for the following year.~~

These deletions are proposed for the same reason as the proposed deviations in §9(j) of the base agreement described in point 1 above, namely, that MRO is not a Registered Entity for any functions and does not have any affiliates that are Registered Entities; therefore, the deleted text is inapplicable to MRO.

b. Proposed Amendments to the MRO Bylaws

NERC and MRO are requesting approval of amendments to the MRO Bylaws. The amended MRO Bylaws are included in Exhibit B to the revised MRO Delegation Agreement. In accordance with the procedure for amendments set forth in the MRO Bylaws, these amendments were approved by the MRO membership on January 29, 2010. The amendments were then approved by the NERC Board of Trustees on May 12, 2010. In the interests of efficiency and avoiding multiple filings of different versions of the same document for approval, NERC has included the proposed Bylaws amendments in this Petition and requests that the Commission review and approve the Bylaws amendments in its Order on the revised Delegation Agreements. Because MRO's Bylaws are a "Regional Entity Rule" as defined in 18 C.F.R. §39.10, approval of the Bylaws amendments is requested pursuant to §215(f) of the FPA and 18 C.F.R. §39.10.

Attachment 10 contains a redlined version of the amended MRO Bylaws showing the amendments in legislative style. **Attachment 10** also includes MRO's letter to NERC requesting

approval by the NERC Board of the Bylaws amendments; this letter provides an explanation of the requirements and procedures followed by MRO for membership approval of the amendments. In addition, **Attachment 10** includes a section-by-section explanation of the basis for each amendment.¹⁸ Following is a list and brief explanation of the more significant amendments to the MRO Bylaws, listed in section order:

- In §1.14, the reference to the Mid-Continent Area Power Pool (“MAPP”) Reliability Council has been deleted because it is no longer necessary due to the formal separation between MRO and MAPP.
- In §1.18, the definition of “Organizational Standards” has been deleted, and all references to this term are deleted throughout the Bylaws. There has been no need identified for such standards.
- In §1.23 (formerly §1.25), text was removed requiring Transmission System Operators to be certified by the Commission.
- In new §1.24, a definition of “Regional Planning Entities” was added so that these entities can be specifically included in MRO membership.
- In §2.2, the term “regional differences” has been deleted because the term is not recognized by the NERC ROP, the Delegation Agreements, or by any rules and regulations of the Commission or other ERO Governmental Authorities.
- In §5.8, clarifying language has been added providing that all dues, fees and assessments of MRO will be consistent with the “regulations of applicable government authorities.”
- In §6.1, the requirement that the MRO members review the MRO budget for the ensuing year was eliminated, due to the fact that the budget is subject to review and comments before the MRO Board approves it. Given the other procedures for review and comment on a proposed budget or budget modification, and the statutory nature of the budget, this provision and the provision being eliminated from §6.5.1 (see immediately below) are unnecessary.

¹⁸ The section-by-section explanation does not include amendments that were purely typographical corrections (*see, e.g.*, the redlined amendments to §§1.2, 1.5 and 1.13 of the MRO Bylaws included in **Attachment 10**), or renumbering of sections due to deletion of existing sections or addition of new sections to the Bylaws.

- In §6.5.1, the requirement for a membership vote and approval by two-thirds of the Sector votes to approve a proposed modification to the MRO budget that has been approved by the MRO Board, has been deleted.
- §7.3 has been amended to specify that MRO directors should be individuals holding senior management or officer positions in MRO Member organizations. Some companies define “senior management” as a subset of the officer positions, which has the effect of unduly limiting the pool of candidates available to serve as MRO directors. The amendment allows either “senior management” or “officers” in Member organizations to serve as MRO directors.
- In §7.8, the quorum requirement for the MRO Board has been changed from two-thirds of the Directors to a majority of the Directors. This amendment will facilitate more timely and efficient actions by the Board.
- §8.1 has been amended to require that reviews of the efficiency and effectiveness of MRO organization groups be conducted periodically rather than annually. Annual efficiency and effectiveness reviews are not always needed, and the greater flexibility provided by the amended provision will allow for review of these groups whenever necessary.
- §18.1 and §18.2 (formerly §19.1 and §19.2) have been amended to make it clear that the hearing process, as set forth in the NERC ROP including the CMEP, will be used for disputes relating to violations of Reliability Standards; while the MRO dispute resolution process will be used for disputes between and among MRO members, or between a MRO member(s) and the MRO, relating to issues associated with business matters or interpretations of the MRO Bylaws.
- §19.1 (formerly §20.1) has been amended to provide that the MRO Board, by two-thirds vote, may amend the Bylaws as necessary and appropriate to comply with requirements of federal reliability legislation; Bylaws amendments for this purpose do not require approval by the MRO membership.

3. Northeast Power Coordinating Council Delegation Agreement

The following list identifies deviations or differences in the revised NPCC Delegation Agreement (**Attachment 4**) from the revised pro forma Delegation Agreement, and also identifies certain differences between the current and the revised NPCC Delegation Agreements due to reasons other than the changes in the pro forma template.

1. Section 1.0 of Exhibit D to the revised NPCC Delegation Agreement contains several provisions that reflect the cross-border scope of NPCC’s activities. Section 1.1 states

that NPCC will implement the NERC CMEP, Appendix 4 to the NERC ROP, within “the U.S. portion of” NPCC’s boundaries. Section 1.2 states:

Compliance monitoring and enforcement programs will be implemented within the Canadian portion of NPCC’s geographic area, consistent with individual Canadian Provincial Memoranda of Understanding (MOU) or Agreements and Canadian laws. All executed MOU’s and Agreements will be provided to NERC as allowable under Canadian law.

2. Section 2.0 of Exhibit D provides that the NPCC Compliance Committee, which reports to the NPCC Board, will be responsible for impaneling a Hearing Body when required. Section 2.0 further describes the composition and voting procedures of the NPCC Hearing Body as follows:

The Hearing Body will consist of five voting members of the NPCC Compliance Committee plus two alternates and business will always be conducted by five voting members as described in the *NPCC Hearing Procedure* (each member of the Hearing Body will be from a different voting sector). An independent Hearing Officer, who is not a member of the Compliance Committee, the NPCC Board, or NPCC Staff, will conduct the hearing. Committee members who represent the Registered Entity involved in the Hearing cannot participate on the Hearing Body. The Hearing Body will utilize a simple majority vote to resolve issues. This voting rule, along with the structure of the Hearing Body, fully supports the requirement that no two stakeholder sectors may control, and no single stakeholder sector may veto, a matter before the Hearing Body.

The above-described provisions of §2.0 of Exhibit D to the revised NPCC Delegation Agreement are essentially the same as the provisions in §2.0 of Exhibit D to the current NPCC Delegation Agreement.

3. Section 3.0, Other Decision-Making Bodies, of Exhibit D to the revised NPCC Delegation Agreement contains the following text:

NPCC Compliance Staff will be the sole decision making body to review and make final determinations on compliance submittals from Registered Entities related to Self-Certification; Self-Reporting; Exception Reporting; and Periodic Data Submittals. NPCC Compliance Staff will initially review all submittals received to assure that the information forwarded is accurate and complete. This process will be conducted by the staff members and may require contact via e-

mail or phone to confirm information. If after, initially receiving a compliance submittal, the Compliance Staff identifies an instance of non-compliance, a Notice of Possible Violation (NOPV), without penalty, is issued to the registered entity and NERC while the Compliance Staff continues its more detailed and comprehensive review of the submittal. It is during this review that the Compliance Staff confirms the violation, calculates an appropriate penalty or sanction and issues a Notice of Confirmed Violation (NOCV)

The reference to use of the Notice of Possible Violation by NPCC Compliance Staff is consistent with the adoption of this notice, at this stage of the compliance enforcement process, in the revised NERC uniform CMEP. Other, more extensive discussion of NPCC's CMEP processes that is contained in §3.0 of Exhibit D to the current NPCC Delegation Agreement has been deleted in deference to the use of the NERC uniform CMEP.

Among other things, the following provision in §3.0 of Exhibit D to the current NPCC Delegation Agreement, providing for the use of technical committees in the compliance enforcement process, has been deleted:

The Compliance Staff may consult with technical committees on a non-decisional basis for advice regarding a complex technical matter only, not a matter of compliance/non-compliance determinations, before the Compliance Staff renders its final decision and issues a Notice of Alleged Violation with Penalty or Sanction (NOAV) to the Registered Entity and NERC. This consultation process may only be initiated by the NPCC Compliance Staff and is not used in anyway to determine appropriate proposals for penalties or sanctions for violations. The use of technical committees on a non-decisional basis is not an inherent part of the review process, but instead is used on an ad hoc basis to provide technical expertise when the NPCC Compliance Staff determined it is necessary. The past experience of using these technical committees to address and resolve complex technical matters has always proven to be invaluable to NPCC. Any information furnished to a non-decisional technical committee will not include the identity of the specific Registered Entity but will include generic facts needed to resolve or clarify a particular technical matter. The NPCC independent Compliance Staff as well as the aforementioned technical committees will be bound by the antitrust guidelines, code of conduct, conflict of interest, confidentiality and any other applicable polices as referenced in the NERC Compliance Monitoring and Enforcement Program.

The deletion of this provision addresses concerns over references in Exhibit D to consultations by NPCC compliance staff with NPCC technical committees in the compliance enforcement

process, that have previously been raised by the Commission.¹⁹ The Commission previously directed NERC and NPCC to submit a filing on or before June 30, 2010, proposing a schedule for the termination of the technical committee consultations or a detailed justification for their continuation.²⁰ The deletion of the text quoted above from Exhibit D to the revised NPCC Delegation Agreement satisfies this directive by eliminating the technical committee consultations with NPCC compliance staff.

4. Section 6, Budget and Funding for NPCC's Non-Statutory Activities, of Exhibit E to the revised NPCC Delegation Agreement, contains a listing of NPCC's non-statutory activities (*i.e.*, the functions of NPCC's Criteria Services Division), and an extensive description of the methods and procedures used by NPCC to keep its funding mechanisms for its Regional Entity division separate from its funding mechanisms for its Criteria Services Division and to record the costs it incurs in performance of its non-statutory functions separately from the costs it incurs in performance of its statutory functions. This text is the same as the text on these topics in §5 of Exhibit E to the current NPCC Delegation Agreement.

4. ReliabilityFirst Delegation Agreement

The following list identifies deviations or differences in the revised ReliabilityFirst Delegation Agreement (**Attachment 5**) from the revised pro forma Delegation Agreement, and also identifies certain differences between the current and the revised ReliabilityFirst Delegation Agreements due to reasons other than the changes in the pro forma template.

¹⁹ See April 19, 2007 Order at P 312; Order Addressing Revised Delegation Agreements, 122 FERC ¶ 61,245 (2008), at P 174; Order Accepting Compliance Filings, Subject to Conditions, 125 FERC ¶ 61,330 (2008), at PP 92-94.

²⁰ Order Accepting Compliance Filings, Subject to Conditions, 125 FERC ¶ 61,330 (2008), at P 94.

1. The first sentence in the Exhibit B cover page is modified to include a reference to ReliabilityFirst's Standards Development Process as well as its Bylaws: "Exhibit B shall set forth the Regional Entity's bylaws, which, along with portions of the Standards Development Process as set out in Exhibit C, NERC agrees demonstrates that the Regional Entity meets the following criteria:" The reference to the ReliabilityFirst Standards Development Process is necessary because the ReliabilityFirst Bylaws do not address the provision of Criterion 3, "that membership is not a condition for participating in the development of or voting on proposed Regional Reliability Standards;" however, the criterion is addressed in the Standards Development Process.²¹ A similar reference is found in Exhibit B to the current ReliabilityFirst Delegation Agreement.

2. Section 2.0 of Exhibit D to the revised ReliabilityFirst Delegation Agreement identifies the ReliabilityFirst hearing body as "a composition of members of the ReliabilityFirst Compliance Committee as established by the Board of Directors of ReliabilityFirst as set out in the ReliabilityFirst Compliance Committee Charter." Further, §2.0 specifies that the hearing body is subject to the requirement that "No two industry sectors may control any decision and no single segment may veto any matter brought before the Hearing Body either before or after any recusals or disqualifications." This provision is a revision from §2.0 of Exhibit D to the current ReliabilityFirst Delegation Agreement, which states:

ReliabilityFirst shall establish a hearing body with authority to conduct and render decisions in a formal compliance hearing of a Registered Entity who is the subject of a notice of alleged violation, proposed penalty or sanction, contested mitigation plan or contested remedial action directive. ReliabilityFirst's hearing body generally will be the Board Compliance Committee (CC), which is a portion of the full Board of Directors. The CC is comprised of five (5) Directors, three (3) of which are independent Board of Director members, and two (2) that are

²¹ See "Openness" on page 9 of the ReliabilityFirst Standards Development Process included in Exhibit C to the revised ReliabilityFirst Delegation Agreement (**Attachment 5**).

stakeholder Board of Director members. For the Hearing Body to take action at a hearing, a quorum must be present. A quorum is a majority of the members of the Hearing Body, provided that at least two independent directors are present. If a quorum of the Hearing Body does not remain after any recusals and rulings on motions for disqualification, the compliance committee shall appoint a new member to the Hearing Body from among other directors to create a quorum. Each Hearing Body member shall have one vote with respect to matters presented at a hearing. Action may be taken at a hearing at which a quorum is present upon the vote of the majority of members present.

Section 2.0 has been revised to refer to the Reliability*First* Compliance Committee Charter because the Compliance Committee Charter contains the provisions governing the composition and the attendance, quorum and voting requirements for the Compliance Committee.²² Specifically, the Compliance Committee Charter provides:

COMPOSITION

The Committee shall be comprised of five (5) directors, three (3) of whom shall be independent directors according to independence standards established under the governance guidelines adopted by the Board. Committee members shall be elected by the Board at its annual meeting and shall serve until their successors are duly elected and qualified. The Committee shall have a chair and a vice chair. The vice chair shall assume the duties of the chair in the absence of the chair at any meeting. The Committee's chair and vice chair shall both be independent directors designated by the full Board upon the recommendation of the Nominating and Governance Committee.

* * * * *

ATTENDANCE AND VOTING

Members of the Committee should endeavor to be present, in person or by telephone, at all meetings; however, three (3) Committee members shall constitute a quorum, provided the majority of the members at a meeting are independent directors. Each member of the Committee, including the chair, shall be entitled to one vote on each matter presented before the Committee. Action by the Committee may be taken at any duly called meeting at which a quorum is present upon the vote of a majority of the members present.

²² For information, a copy of the Reliability*First* Compliance Committee Charter is provided in **Attachment 5C**.

ReliabilityFirst's Bylaws allow ReliabilityFirst to add another independent director to its Board by resolution of the Board.²³ If another independent director is added, ReliabilityFirst can make corresponding revisions to the Compliance Committee Charter without having to amend the Delegation Agreement.

5. SERC Reliability Corporation Delegation Agreement

The following list identifies deviations or differences in the revised SERC Delegation Agreement (**Attachment 6**) from the revised pro forma Delegation Agreement, and also identifies certain differences between the current and revised SERC Delegation Agreements due to reasons other than the changes in the pro forma template.

1. Section 6 of the revised base SERC Delegation Agreement contains an additional subsection 6(j) that is not included in the revised pro forma Delegation Agreement:

(j) SERC may also perform compliance monitoring and enforcement activities outside of the Region shown on **Exhibit A**, on behalf of NERC and/or other Regional Entities, such activities to be undertaken pursuant to a contract between SERC and each such other Regional Entity that is approved by NERC and by the Commission.

This provision authorizes SERC to engage in cross-regional compliance monitoring activities such as the SERC-FRCC and SERC-SPP RE CMEP Agreements that are pending approval by the Commission in Docket No. RR10-7-000. The above text has also been proposed as an amendment to the current SERC Delegation Agreement (as §6(k)) in the *SERC-FRCC-SPP CMEP Agreements Filing* and is also pending approval by the Commission in Docket No. RR10-7-000. The Commission should take action on this provision in the revised SERC Delegation Agreement consistent with the determination it makes on this provision in Docket No. RR10-7-000.

²³ See §7.4(a) and (d) to the ReliabilityFirst Bylaws, which are included in **Attachment 5A**.

2. In Exhibit A to the revised SERC Delegation Agreement, a revision has been made to a portion of the description of the SERC Regional Boundaries, from the description found in Exhibit A to the current SERC Delegation Agreement:

The area in N.E. Florida (part of Baker and Nassau counties) ~~is~~ served by Okefenoke Rural Electric Membership Corporation (OREMC), a member of Georgia Systems Operations Corporation, and facilities physically located in Baker County, Florida owned by Georgia Transmission Corporation are ~~and is therefore~~ part of the SERC Region and not the FRCC Region.

This revision reflects that SERC will serve as the CEA for certain facilities located in Florida within the geographic boundaries of FRCC. This revision corresponds to the revision to Exhibit A to the FRCC Delegation Agreement described in point 2 in §III.C.1.a above.

3. Also in Exhibit A to the revised SERC Delegation Agreement, the following provision is added:

SERC may also perform compliance and enforcement activities outside of the Region, on behalf of NERC and/or other Regional Entities, such activities to be undertaken pursuant to a contract between the Regional Entities that is approved by the Board Executive Committee, NERC and the Federal Energy Regulatory Commission.

This provision has been added in light of the agreements between SERC and FRCC and SERC and SPP RE for SERC to perform the CEA functions in the FRCC and SPP RE regions with respect to the Registered Entity functions performed by FRCC and by Southwest Power Pool, respectively. As described in points 1, 3, 5 and 6 in §III.C.1.a above with respect to FRCC, the SERC-FRCC and SERC-SPP RE CMEP agreements, as well as this proposed amendment to Exhibit A to the SERC Delegation Agreement, are currently pending before the Commission for approval in Docket No. RR10-7-000. The Commission should take action on this provision in Exhibit A to the revised SERC Delegation Agreement consistent with the determination it makes

on this point in its order in Docket No. RR10-7-000 on the *SERC-FRCC-SPP CMEP Agreements Filing*.

4. The SERC Bylaws included in Exhibit B to the revised SERC Delegation Agreement include the following new Section 4.3:

4.3 Other Statutory Activities. The Corporation may also perform statutory functions outside of the Region, on behalf of NERC or other Regional Entities, such activities to be undertaken pursuant to a contract that is approved by the Board Executive Committee.

The purpose of this new section is to provide the internal corporate authority for SERC to engage in CMEP functions outside the SERC region. This proposed amendment to the SERC Bylaws has been submitted for Commission approval in the *SERC-FRCC-SPP RE CMEP Agreements Filing* and is pending approval in Docket No. RR10-7-000. The Commission should rule on this provision in Exhibit A to the revised SERC Delegation Agreement consistent with the determination it makes on this point in its order in Docket No. RR10-7-000 on the *SERC-FRCC-SPP CMEP Agreements Filing*.

5. Section 2.0 of Exhibit D to the revised SERC Delegation Agreement identifies SERC's Hearing Body as a balanced compliance panel reporting directly to the SERC Board, specifically, as the Board Compliance Committee or a subset of the Board Compliance Committee. Section 2.0 then provides a detailed description of the composition, quorum and voting requirements for the Hearing Body. This text is identical to the text appearing in §2.0 of Exhibit D to the current SERC Delegation Agreement.

6. Section 6 of Exhibit E to the revised SERC Delegation Agreement contains the following paragraph:

Costs associated with Cross-Regional Compliance Monitoring. The costs associated with any Cross-Regional Compliance Monitoring performed by SERC pursuant to section 6(j) of this Agreement with respect to registered functions of

another Regional Entity are to be funded by payments from the NERC or the Regional Entity contracting with SERC for such services, in accordance with the contract between SERC and NERC or the other Regional Entity. Where such a contract has been entered into SERC will include a description of the resources it has budgeted to perform such services, and its estimated costs (including an appropriate allocation of SERC's General and Administrative costs) to perform such services, in each budget year, in SERC's annual business plan and budget that is submitted to NERC and to the Commission for approval.

This provision addresses the funding for SERC's costs in performing the CEA functions for the FRCC and Southwest Power Pool Registered Entity function pursuant to the SERC-FRCC and SERC-SPP RE CMEP Agreements. Approval for this provision was requested in the *SERC-FRCC-SPP CMEP Agreements Filing* and is pending before the Commission in Docket No. RR10-7-000. The Commission should take action on this provision in Exhibit E to the revised SERC Delegation Agreement consistent with the determination it makes on this point in its order in Docket No. RR10-7-000 on the *SERC-FRCC-SPP CMEP Agreements Filing*.

6. Southwest Power Pool Regional Entity Delegation Agreement

The following list identifies deviations or differences in the revised SPP RE Delegation Agreement (**Attachment 7**) from the revised pro forma Delegation Agreement, and also identifies certain differences between the current and revised SPP RE Delegation Agreements due to reasons other than the changes in the pro forma template.

1. In the first sentence of §9(j) of the base agreement, text has been deleted as shown below:

Exhibit E to this Agreement sets for the mechanism through which SPP shall offset penalty monies it receives (~~other than penalty monies received from an operational function or division or affiliated entity of [REGIONAL ENTITY]~~) against its next year's annual budget for carrying out functions under this Agreement, ~~and the mechanism by which [REGIONAL ENTITY] shall transmit to NERC and penalty monies received from an operational function or division or affiliated entity of [REGIONAL ENTITY].~~

This text has been deleted because SPP RE has entered into an agreement with SERC, which is pending before the Commission in Docket No. RR10-7-000, pursuant to which SERC will perform the CEA functions with respect to those registered functions for which Southwest Power Pool, Inc., is the Registered Entity in the SPP RE region. That proposed agreement, like the SERC-FRCC CMEP Agreement discussed in point 1 in §III.C.1.a above, provides that penalties collected by SERC from Southwest Power Pool for violations of Reliability Standards applicable to Southwest Power Pool's registered functions, shall be used to reduce the portion of the SPP RE ERO assessment to be paid by LSEs and designees in the SPP RE region for the subsequent fiscal year. The *SERC-FRCC-SPP CMEP Agreements Filing* also requests approval for the same amendment to §8(k) of the current SPP RE Delegation Agreement as is proposed in §9(j) of the revised SPP RE Delegation Agreement (which addresses the same subject matter as §8(k) of the current agreement). As explained in the *SERC-FRCC-SPP CMEP Agreements Filing*, NERC, FRCC and SPP RE believe it is appropriate for LSEs in the SPP RE region to receive the benefit of any penalties paid by Southwest Power Pool as a Registered Entity, through reduced assessments in a future year, due to the fact that the LSEs in the SPP RE region will be paying, through the annual SPP RE assessment, SERC's costs to perform the CEA functions with respect to Southwest Power Pool's registered functions.²⁴ The Commission should rule on the proposed deviation in §9(j) of the revised SPP RE Delegation Agreement consistent with the determination it makes on this point in its order on the *SERC-FRCC-SPP CMEP Agreements Filing*.

2. Exhibit A to the revised SPP RE Delegation Agreement also contains the following statement:

²⁴ *SERC-FRCC-SPP CMEP Agreements Filing* at 20.

Within the SPP Region, compliance monitoring and enforcement functions with respect to reliability functions for which SPP is the registered entity are performed by SERC Reliability Corporation (SERC) pursuant to a contract between SPP and SERC dated as of (DATE).

This provision refers to the SERC-SPP RE CMEP Agreement and is one of the amendments to the current SPP RE Delegation Agreement for which approval has been requested in the *SERC-FRCC-SPP CMEP Agreements Filing* and is pending in Docket No. RR10-7-000.

3. Section 2.0 of Exhibit D to the revised SPP RE Delegation Agreement identifies the SPP RE hearing body as the SPP Regional Entity Trustees. This is the same hearing body identified in §2.0 of Exhibit D to the current SPP RE Delegation Agreement.

4. Section 3.0, Other Decision-Making Bodies, of Exhibit D to the revised SPP RE Delegation Agreement contains the following statement:

SPP has engaged the SERC Reliability Corporation (SERC) to oversee the compliance monitoring and enforcement responsibility within the SPP Region as related to SPP's compliance with Reliability Standards requirements that are applicable to the functions for which SPP is a Registered Entity.

This change is due to the proposed SERC-SPP RE CMEP Agreement, and has also been proposed in the *SERC-FRCC-SPP CMEP Agreements Filing* and is pending approval in Docket No. RR10-7-000. The Commission should rule on this provision in Exhibit D to the revised SPP RE Delegation Agreement consistent with the determination it makes on this point in its order in Docket No. RR10-7-000 on the *SERC-FRCC-SPP CMEP Agreements Filing*.

5. In Section 5, Application of Penalties, of Exhibit E to the revised SPP RE Delegation Agreement, the following deletions have been made from the pro forma language:

Except as otherwise approved by the Commission, all penalty monies received by SPP, ~~other than penalty monies received from an operational function or division of affiliated entity of [Regional Entity],~~ shall be applied as a general offset to SPP's budget requirements for U.S.-related activities under this Agreement for the subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity. ~~Except as~~

~~otherwise approved by the Commission, any penalty monies received from an operational function or division or affiliated entity of [Regional Entity] shall be transmitted to or retained by NERC and shall be used by NERC as a general offset to NERC's budget for its activities as the ERO under the Act for the following year.~~

These deletions are proposed for the same reason as the proposed deviations in §9(j) of the base agreement described in point 1 above. These same deletions have been proposed to §4 of the current SPP RE Delegation Agreement (which is comparable to §5 of the revised Delegation Agreement) in the *SERC-FRCC-SPP CMEP Agreements Filing*. As with the proposed text deletions to §9(j) of the base agreement described in point 1 above, the Commission should rule on the proposed deviation in §5 of Exhibit E to the revised SPP RE Delegation Agreement consistent with the determination it makes on this point in its order on the *SERC-FRCC-SPP CMEP Agreements Filing* in Docket No. RR10-7-000.

6. In §6, Budget and Funding for SPP's Non-Statutory Activities, of Exhibit E, the revised SPP RE Delegation Agreement includes detailed descriptions of Southwest Power Pool's non-statutory activities and of the methods and procedures used by SPP RE and Southwest Power Pool to keep funding mechanisms for SPP RE's statutory activities separate from funding mechanisms for Southwest Power Pool's non-statutory activities and to record the costs Southwest Power Pool incurs in performance of non-statutory functions separately from the costs SPP RE incurs in performance of statutory activities. These descriptions are essentially the same as the text on these topics in §5 of Exhibit E to the current SPP RE Delegation Agreement. Two notable revisions are the following:

- In the current SPP RE Delegation Agreement, the first sentence of the fourth paragraph of the text describing how SPP RE keeps its funding sources for statutory and non-statutory activities separate reads as follows: "As provided in section 3(b) of this Exhibit E, on a quarterly basis, **SPP will invoice NERC**, an amount equal to one-fourth of the current year approved annual funding amount for SPP's statutory activities." (Emphasis added.) In the

revised Delegation Agreement, this sentence has been revised to read: “As provided in section 4(c) of this Exhibit E, on a quarterly basis, **NERC will pay SPP** an amount equal to one-fourth of the current year approved annual funding amount for SPP’s statutory activities.” This revision is consistent with §4(c) of Exhibit E to the revised pro forma Delegation Agreement.

- The following sentence has been added to the end of the fourth paragraph of the description of the methods and procedures used to keep statutory and non-statutory funding separate: “The RE General Manager shall have sole authority to approve all withdrawal of funds from the SPP Regional Entity bank account.”

7. Texas Reliability Entity Delegation Agreement

The following list identifies deviations or differences in the revised Texas RE Delegation Agreement (**Attachment 8**) from the revised pro forma Delegation Agreement, and also identifies certain differences, due to reasons other than the changes in the pro forma template, between the revised Texas RE Delegation Agreement and the Texas RE Delegation Agreement that was approved by the Commission on May 6, 2010, in Docket No. RR10-6-000.²⁵

1. Section 2.0 of Exhibit D to the revised Texas RE Delegation Agreement identifies the Texas RE Hearing Body as the Public Utility Commission of Texas (“PUCT”). However, although the PUCT is the Hearing Body for Texas RE, and conducts any compliance-related hearings, the PUCT only issues a recommendation to the Texas RE Board, which makes the final determination, as stated in the following two excerpt from §2.0:

Texas RE will use the PUCT as its Hearing Body, and the PUCT (as Hearing Body) will issue recommendations to the Texas RE Board of Directors (“Board”) which will make final decisions following regional hearing of compliance matters.

²⁵ In a letter Order issued May 6, 2010, in Docket RR10-6-000, the Commission approved the proposed Delegation Agreement between NERC and Texas RE, as the successor to Old Texas RE as the Regional Entity for the ERCOT region. NERC and Texas RE anticipate that Texas RE will assume its responsibilities as the Regional Entity, and the Delegation Agreement approved by the Commission in Docket No. RR10-6-000 will go into effect, on July 1, 2010. The Texas RE Delegation Agreement in **Attachment 8** includes the approved Bylaws (in Exhibit B) and the approved Standards Development Process (in Exhibit C) of Texas RE.

* * * * *

Texas RE shall establish the PUCT as the hearing body, with authority to conduct compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan. The PUCT will issue a final recommendation to the Board rather than a final order.

Section 2.0 contains extensive discussion of the PUCT's hearing procedures and its policies and requirements concerning holding hearings in public and treatment of confidential information. Section 2.0 refers to Attachment 1 – Texas RE Regional Hearing Process, and Attachment 2 – Texas RE Rules of Procedure, both of which are included as attachments to Exhibit D. The text in §2.0 and in Attachments 1 and 2 is the same as in §1.2 and Attachments 1 and 2 to Exhibit D to the Texas RE Delegation Agreement approved in Docket RR10-6-000, although the organization of some of the text in §2.0 has been changed to conform to the organization of §2.0 of Exhibit D to the revised pro forma Delegation Agreement.

2. In Exhibit E to the revised Texas RE Delegation Agreement, the following sentence has been added to §3, Allocation of Costs:

NERC and Texas RE agree that for purposes of Section 3 and 4 of this Exhibit E, Electric Reliability Council of Texas (ERCOT ISO), as the sole independent system operator and Balancing Authority, is the only load-serving entity or designee in Texas RE's region and shall be invoiced for the entire NERC and Texas RE assessments approved for collection.

As the designated sole LSE in the region, ERCOT ISO will be billed by NERC for the entire NERC and Texas RE assessment amounts, and then will bill and collect the assessments from the LSEs and "Qualified Scheduling Entities" that are participants in the ERCOT market.

3. Section 6, Budget and Funding for Texas RE's Non-Statutory Activities, of Exhibit E contains the following paragraph:

Texas RE does not anticipate auditing or investigating market participants' compliance with ERCOT Protocols and Operating Guides in 2011. Texas RE will, however, need to respond to subpoenas and provide testimony and support to

the Public Utility Commission of Texas (PUCT) regarding Texas RE's ERCOT Protocol and Operating Guide compliance and enforcement audits, investigations, and reports from the period in which Texas RE conducted the compliance investigations.

This paragraph replaces text in Exhibit E to the Texas RE Delegation Agreement approved in Docket RR10-6-000, stating that Texas RE's non-statutory activities, at least through December 31, 2010, would include investigation of market participants' compliance with the ERCOT Protocols and Operating Guides which contain the Regional criteria for planning and operating reliable interconnected bulk electrical systems in the ERCOT region, assistance or cooperation in enforcement of violations, and development of policies, processes, standards, and procedures to implement these ERCOT compliance activities. Texas RE no longer expects to engage in these activities after December 31, 2010.

4. Section 6 of Exhibit E of the revised Texas RE Delegation Agreement also includes a detailed description of the methods and procedures Texas RE will employ to keep its funding mechanisms for its statutory activities separate from its funding mechanisms for its non-statutory activities, and to record the costs it incurs in performance of its non-statutory functions separately from the costs it incurs in performance of its statutory functions. This description is the same as in Exhibit E to the Texas RE Delegation Agreement that was approved in Docket No. RR10-6-000.

8. Western Electricity Coordinating Council Delegation Agreement

The following list identifies deviations or differences in the revised WECC Delegation Agreement (**Attachment 9**) from the revised pro forma Delegation Agreement, and also identifies certain differences between the current and revised WECC Delegation Agreements due to reasons other than the changes in the pro forma template.

1. In §1.0 of Exhibit D to the revised WECC Delegation Agreement, WECC adopts the NERC CMEP, Appendix 4C to the NERC ROP, but with the single proviso that §5.3(vii) of the WECC CMEP does not refer to “shortened hearing procedures.” This is because the WECC hearing procedures, which are an Attachment to Exhibit D, do not use the shortened hearing procedures that are contained in the NERC uniform Hearing Procedures.²⁶

2. Section 2.0 of Exhibit D to the revised WECC Delegation Agreement states that WECC’s Hearing Body is the Compliance Hearing Body as established under the WECC Compliance Hearing Body Charter. Section 2.0 contains a description of the composition of the Compliance Hearing Body and a description of the manner in which the specific five-member or three-member Hearing Panel is selected for each hearing.

3. Section 2.0 of Exhibit D to the revised WECC Delegation Agreement also states that WECC will conduct compliance hearings in accordance with the hearing procedures which are included as the Attachment to Exhibit D. The WECC Hearing Procedures have previously been authorized by the Commission, and were most recently filed with the Commission in a compliance filing dated February 17, 2009.²⁷ The only change being made to the current version of the WECC Hearing Procedures is the deletion of three definitions from §1.1.4: “Bulk-Power System,” “Reliable Operation,” and “Reliability Standards.” These three definitions are also

²⁶ NERC and WECC acknowledge that the Commission has questioned why the WECC Hearing Procedures does not provide for a shortened hearing procedure as in the NERC uniform Hearing Procedures, and that they are required to file a report with the Commission by December 31, 2010 addressing the merits of retaining this deviation. *See* Letter Order issued August 26, 2009, in Docket Nos. RR06-1-022 and RR07-7-008.

²⁷ *Compliance Filing of the North American Electric Reliability Corporation in Response to December 19, 2008 Order*, filed February 17, 2009, in Docket Nos. RR06-1-021 *et al.* The Commission accepted this compliance filing in a letter order issued June 1, 2009. *Order on Compliance Filing*, 127 FERC ¶ 61,209 (2009).

being deleted from the Definitions section of the NERC uniform Hearing Procedures (*see* §IV.A.2 below and **Attachments 14A-14B**).²⁸

4. Section 3.0, Other Decision-Making Bodies, of Exhibit D to the revised WECC Delegation Agreement states that “The WECC Compliance Committee provides general oversight and policy guidance but does not have decision-making authority with respect to compliance matters.”

5. Section 1 of Exhibit E to the revised WECC Delegation Agreement contains additional descriptions of WECC’s statutory activities beyond the listing included in §1 of Exhibit E to the revised pro forma Delegation Agreement:

- Under “Compliance Enforcement,” Exhibit E to the revised WECC Delegation Agreement contains the following text: “This category will encompass WECC’s Compliance Monitoring and Enforcement Program, including activities under the WECC Reliability Management System.” This text (with the addition of the words “Compliance Monitoring”) is included in Exhibit E to the current WECC Delegation Agreement.
- Under “Reliability Assessment and Performance Analysis (including necessary data gathering activities),” Exhibit E to the revised WECC Delegation Agreement contains the following text: “This category includes WECC’s Transmission Expansion Planning Program, and Loads and Resources Activities, and all necessary supporting activities.” This text (with the addition of the words “and all necessary supporting activities”) is included in Exhibit E to the current WECC Delegation Agreement.
- Under “Training and Education,” Exhibit E to the revised WECC Delegation Agreement contains the following text: “This category includes WECC’s Training Program.” This text is also included in Exhibit E to the current WECC Delegation Agreement.
- Under “Situation Awareness,” Exhibit E to the revised WECC Delegation Agreement contains the following text: “This category includes WECC’s Reliability Coordinator Functions, Western Interconnection Synchrophasor Program, WECC Interchange Tool, and all necessary supporting activities.” The reference to “WECC’s Reliability Coordinator Functions” is included in Exhibit E to the current WECC Delegation

²⁸ These three definitions are being deleted from the NERC Hearing Procedures, Attachment 2 to Appendix 4C to the NERC ROP, because the terms are defined in §200 of the NERC ROP, and Appendix 4C is incorporating definitions in §200 of the ROP rather than restating them.

Agreement. The additional references to “Western Interconnection Syncrophasor Program and WECC Interchange Tool” have been proposed for approval in Docket No. RR10-9-000, where NERC and WECC are requesting Commission approval for (among other things) an amendment to §1 of Exhibit E to the current WECC Delegation Agreement.²⁹ The additional text “and all necessary supporting activities” is new, and is intended to make it clear that supporting activities for the three expressly-listed activities are also statutory activities that will be funded through the ERO funding mechanism.

6. Section 3 of Exhibit E to the revised WECC Delegation Agreement includes additional text regarding the options available to LSEs and Balancing Authorities in the WECC Region regarding the annual billing of the NERC and WECC assessments: either to have WECC bill and collect the assessments directly from the LSEs in the Balancing Authority’s area, or to have WECC bill only the Balancing Authority which in turn bills and collects the assessment from the LSEs in its area and remits the payments to WECC. These provisions are included in §2 of Exhibit E to the current WECC Delegation Agreement.

7. Section 4, Collection of Funding, in Exhibit E to the revised WECC Delegation Agreement differs from the revised pro forma Delegation Agreement to reflect the particular billing, collection and remittance procedures previously established between NERC and WECC and approved by the Commission. Specifically, WECC, acting as the billing and collection agent, bills LSEs and Balancing Authorities in the WECC region one time per year, prior to November 15 of the preceding year, for the entire assessment amount for the year for NERC, WECC and the Western Interconnection Regional Advisory Body (“WIRAB”). WECC remits its collections to NERC, by electronic funds transfer, once per week, along with a breakdown of the collections among NERC statutory funding, WECC statutory funding, and WIRAB statutory

²⁹ See *Petition of the North American Electric Reliability Corporation for Approval of Amended 2010 Business Plan and Budget of the Western Electricity Coordinating Council and Amendment to Exhibit E to Delegation Agreement with the Western Electricity Coordinating Council*, filed April 22, 2010 in Docket No. RR10-9-000. A corrected version of the proposed amendment to Exhibit E was filed in that Docket on May 11, 2010.

funding. Within three business days following receipt of an electronic transfer of collected assessments from WECC, NERC electronically transfers to WECC the portion of the payment received from WECC constituting WECC statutory funding, and electronically transfers to WIRAB the portion of the payment received from WECC constituting WIRAB statutory funding. The provisions implementing this process are already included in Exhibit E to the current WECC Delegation Agreement.³⁰ In addition, §4(c) of Exhibit E to the revised pro forma Delegation Agreement is deleted from §4 of Exhibit E to the revised WECC Delegation Agreement, because it is unnecessary in light of the particular arrangements for billing, collecting and remitting the WECC statutory assessment.³¹

8. Section 6 of Exhibit E to the revised WECC Delegation Agreement identifies the Western Renewable Generation Information System as a non-statutory activity of WECC, and provides a description of the methods and procedures used by WECC to keep its funding mechanism for statutory activities separate from its funding mechanisms for non-statutory activities and to record the costs it incurs in performance of non-statutory functions separately from the costs it incurs in performance of its statutory functions. Exhibit E to the current WECC Delegation Agreement also contains a description of these methods and procedures; the description in the revised WECC Delegation Agreement has been updated.

³⁰ See, e.g., *Order Accepting Compliance Filings, Subject to Conditions*, 125 FERC ¶ 61,330 (2008), at PP 11 and 122.

³¹ Section 4(c) of Exhibit E to the revised pro forma Delegation Agreement states: “Upon approval by ERO Governmental Authorities of [Regional Entity]’s annual assessment to fund the costs of its delegated functions and related activities, NERC shall pay [Regional Entity]’s annual assessment to the Regional Entity in four equal quarterly payments on January 15, April 15, July 15 and October 15 of the budget year.”

IV. AMENDMENTS TO THE NERC RULES OF PROCEDURE

A. Process for Development of Proposed Amendments

NERC and the Regional Entities developed a set of proposed amendments to the NERC ROP in conjunction with their development of the revised pro forma Delegation Agreement. The origin of the development of the revisions to the ROP was the same as the origin of the revisions to the Delegation Agreement, namely, issues identified in the preparation of the *Three-Year ERO Assessment Report*. Revisions have been developed, and are proposed for approval in this filing, to the following sections of and appendices to the NERC ROP:

- Section 400 – Compliance Enforcement
- Section 500 – Organization Registration and Certification
- Section 800 – Reliability Assessment and Performance Analysis
- Section 1000 – Situation Awareness and Infrastructure
- Section 1100 – Annual NERC Business Plans and Budgets
- Section 1200 – Regional Delegation Agreements
- Appendix 4A – *Audit of Regional Entity Compliance Programs*
- Appendix 4B – *Sanction Guidelines*
- Appendix 4C – *Compliance Monitoring and Enforcement Program*

In addition, NERC is proposing to add the *Statement of Compliance Registry Criteria* as an Appendix, identified as Appendix 5B to the ROP, with no changes to the existing text; and to re-label Appendix 5 – *Organization Registration and Certification Manual* as Appendix 5A, with no changes to the existing text.

As required by its Bylaws, NERC posted a set of proposed amendments to the ROP, including to Appendices 4A, 4B and 4C, on March 16, 2010, for a 45-day stakeholder comment

period ending April 30, 2010.³² Comments were received from a total of 17 individuals and organizations. NERC and the Regional Entities considered these comments and made a number of revisions to the proposed amendments based on the comments. The proposed amendments were then submitted to the NERC Board of Trustees for consideration and approval. On May 12, 2010, the NERC Board approved the amendments to the ROP for which the Commission's approval is requested in this Petition.

B. Amendments to the NERC Rules of Procedure Sections 100-1600

The following discussion identifies and explains the revisions to Sections 200, 400, 500, 800, 1000, 1100 and 1200 of the NERC ROP on a section-by-section basis. Clean and redlined versions of amended Sections 100 – 1600 of the ROP are provided in **Attachments 11A** and **11B**.

1. Amendments to Section 200 – Definitions

The definition of “Confirmed Violation” has been amended to include a violation that the entity has admitted to in a settlement agreement. In addition, a reference to the “appeals process” has been changed to the “hearings and appeals process.” These amendments are consistent with amendments to the definition of this term in §1.1.9 in Appendix 4C.

2. Amendments to Section 400 – Compliance Enforcement

Two recurring reasons for amendments in §400 are: (1) to adopt new or revised terminology adopted in amended Appendix 4C, such as the terms “possible violation,” “alleged violation” and “confirmed violation” and the change of “compliance violation investigation” to “compliance investigation;” and (2) to delete material that is covered in detail in Appendix 4C.

³² Article XI, section 2 of the NERC Bylaws requires that proposed amendments to the NERC ROP must be publicly posted for a 45-day comment period before being considered for approval by the NERC Board of Trustees.

The coverage of certain topics in detail in both §400 of the ROP and in Appendix 4C presented the potential for confusion and inconsistency. Therefore, in a number of sections of §400, substantive text (in some cases an entire subsection) has been deleted and replaced with references to Appendix 4C.

Section 401, Scope of the NERC Compliance Enforcement Program. Several topics of a generally applicable nature that were previously covered in other parts of §400 have been moved to §401. New §401.10 addresses the treatment of confidential information in the Compliance Monitoring and Enforcement Program, and provides that information will be treated as confidential, and where applicable as critical energy infrastructure information, in accordance with §1500 of the ROP. These provisions have been moved from current §408.3, which is being deleted. New Section 401.11 addresses the public posting of compliance-related information, and provides that when the affected bulk power system owner, operator, or user either agrees to a possible or alleged violation of a reliability standard or a report of a compliance audit or investigation, or the time for submitting an appeal is expired, or all appeals processes are complete, NERC shall, subject to the confidentiality requirements of the ROP, publicly post each confirmed violation, penalty or sanction, and final compliance audit or compliance investigation report, on its web site. Section 401.11 details the information to be included in the public posting, including a statement by the bulk power system owner, operator or user if it elects to provide one. The provisions of §401.11 have been moved from current §408.6, which is being deleted. New §401.12 provides that NERC compliance monitoring and enforcement program staff shall periodically review and analyze all reports of possible, alleged and confirmed violations to identify trends and other pertinent issues; these provisions have been moved from current §408.5, which is being deleted.

Section 401.9 has been amended to use the terminology possible, alleged and confirmed violations.

Section 402, NERC Oversight of the Regional Entity Compliance Enforcement Programs. Section 402.1.3 has been amended to provide that once every five years, rather than once every three years, NERC shall conduct an audit to evaluate how each Regional Entity compliance enforcement program implements the NERC CMEP. Now that the Regional Entity compliance enforcement programs have been established and functioning for approximately three years, and an initial round of NERC audits has been conducted, NERC and the Regional Entities determined that the frequency of these audits could be lengthened to a maximum of five years. Section 402.1.3 has also been amended to state explicitly that such audits will be based on (among other things) Appendix 4C and any directives in effect pursuant to the delegation agreement.³³ Further, the following text has been added to §402.1.3 to clarify the scope of such audits of cross-border Regional Entities:

In addition, audits of cross-border regional entities shall cover applicable requirements imposed on the regional entity by statute, regulation, or order of, or agreement with, provincial governmental and/or regulatory authorities for which NERC has auditing responsibilities over the regional entity's compliance with such requirements within Canada or Mexico. Participation of a representative of an applicable ERO governmental authority shall be subject to the limitations of sections 3.1.6 and 8.0 of Appendix 4C of these rules of procedure regarding disclosures of non-public compliance information related to other jurisdictions.

Section 402.1.3.2 has been eliminated. This subsection specified that NERC would re-audit Registered Entities that had been audited by a Regional Entity to verify the findings of the Regional Entity's compliance audit and to evaluate how well the Regional Entity compliance program is meeting its delegated authority and responsibilities. This program was time-

³³ As described in §III.B.2.a above, §8(c) of the amended pro forma Delegation Agreement provides for the development and issuance of directives to the Regional Entity(ies).

consuming for NERC and the Regional Entities and a burden to the Registered Entities that were re-audited. NERC and the Regional Entities jointly concluded that this program did not represent an efficient use of resources and that NERC has sufficient other tools available to monitor the effectiveness of the Regional Entities' compliance enforcement programs.

In §402.2, §402.2.1, §402.2.2 and §402.4, specific references have been added to Appendix 4C of the ROP. Section 402.2.2 has also been amended to change the text “NERC shall develop a single, uniform compliance monitoring and enforcement program” to “NERC shall maintain a single, uniform compliance monitoring and enforcement program,” which better describes NERC's obligation in this regard going forward.

Section 402.4 has been amended to replace a reference to “the reporting and disclosure process in Section 408” with “the reporting and disclosure process in **Appendix 4C.**” Existing §408 is being deleted because its subject matter is covered in Appendix 4C. Section 402.4 has also been revised to use the new term “possible violations.”

In §402.5, a sentence describing the authority to issue remedial action directives has been revised as follows:

Remedial action directives may be issued by NERC or a regional entity that is aware of a bulk power system owner, operator, or user that is about to engage in an act or practice that would result in noncompliance with a reliability standard, where such directive is immediately necessary to protect the reliability of the bulk power system from an imminent threat.

The added text makes the sentence consistent with the definition of “remedial action directive” in Appendix 4C.

Section 402.6 has been amended to update a cross-reference due to reordering and renumbering of later sections in §400.

Section 402.8, concerning confidentiality, has been amended to encompass all information obtained by NERC or a Regional Entity through any CMEP process:

To maintain the integrity of the NERC Compliance Monitoring and Enforcement Program, NERC and regional entity staff, audit team members, and committee members shall maintain the confidentiality of information obtained and shared during compliance monitoring and enforcement processes including investigations, audits, spot checks, drafting of reports, appeals, and closed meetings.

Section 402.9, concerning Auditor Training, has been amended to delete references to “volunteers” and add a reference to “industry subject matter experts.” NERC and the Regional Entities are continuing to phase out the use of industry volunteers in compliance audits, but will continue to use industry subject matter expertise where resort to such expertise is necessary and appropriate.

Section 403, Required Attributes of Regional Entity Compliance Enforcement Programs. The initial paragraph of §403 has been amended to require that each regional Entity compliance enforcement program must (1) conform to and comply with the NERC uniform CMEP in Appendix 4C, except to the extent of any deviations that are stated in the Regional Entity’s delegation agreement,³⁴ and (2) meet all of the attributes set forth in §403.

In a number of subsections of §403, express references to Appendix 4C have been added.

Section 403.3 has been amended to state, as an additional exception to the prohibition on a Regional Entity sub-delegating its compliance enforcement program duties to entities or persons other than the Regional Entity compliance enforcement program staff, that sub-delegations may occur “by agreement with express approval of NERC and of FERC or other appropriate ERO governmental authority, to another regional entity.” This exception allows for

³⁴ Any such deviation would be stated in Exhibit D to the Regional Entity’s delegation agreement. *See* Exhibit D to the revised pro forma Delegation Agreement in **Attachment 1**.

arrangements such as the SERC-FRCC and SERC-SPP RE CMEP Agreements now pending before the Commission for approval in Docket No. RR10-7-000.

Section 403.4 has been amended to add compliance hearings in which the registered entity contests a mitigation plan component, to the list of compliance hearings which the Regional Entity's board or compliance panel should have authority to conduct.

Sections 403.5, 403.6, 403.6.2, 403.6.3, 403.6.4, 403.7, 403.10.6 (formerly 403.10.5), 403.11.2, and 403.16 (formerly 403.21) have been amended to refer to the compliance monitoring and enforcement program," consistent with the description of this program used throughout §400 and Appendix 4C.

Section 403.6.1 has been amended to expand the scope of the compliance processes in which Regional Entity compliance enforcement program staff shall not have a conflict of interest in the outcome, to all compliance monitoring and enforcement processes, not just compliance violation investigations, compliance audits, reports and sanctions. Similarly, §403.6.2 has been amended to specify that Regional Entity CMEP staff shall have the authority and responsibility to carry out all compliance monitoring and enforcement processes, not just investigations and audits; and should have authority to make determinations of compliance or noncompliance, not just "initial determinations." Additionally, §403.6.2 has been amended to delete a reference to "regional members," and add a reference to industry "subject matter" experts, assisting in compliance monitoring and enforcement processes.

Section 403.6.3 has been amended to specify that Regional Entity CMEP staff may call upon independent technical subject matter experts, who have no conflict of interest in the outcome of the compliance monitoring and enforcement process, to provide technical advice in determinations of compliance and noncompliance.

Section 403.7 has been amended to provide for the use of industry subject matter experts, as well as Regional Entity members, to provide technical expertise in CMEP activities. The reference to “volunteers” has been deleted from §403.7.3. Section 403.7.3 has also been amended to provide that industry subject matter experts, Regional Entity members, or Regional Entity committees shall not make determinations (not just “initial” determinations) of noncompliance or levy penalties, sanctions or remedial actions, and that authority and responsibility for evaluating and determining compliance or noncompliance and for levying penalties, sanctions and remedial actions shall not be delegated to any person or entity other than the Regional Entity compliance staff.

Section 403.7.5 has been amended to replace the term “compliance violation investigations” with the new term “compliance investigations.”

Sections 403.8 and 403.9 have been amended to expand references to the regional entity’s compliance enforcement program to the compliance monitoring and enforcement program.

Section 403.10 has been amended as follows:

Information Submittal — All bulk power system owners, operators, and users within the regional entity responsible for complying with reliability standards shall submit timely and accurate information when requested by the regional entity or NERC, ~~in accordance with established procedures of NERC and the regional entity.~~

In carrying out compliance monitoring and enforcement processes, NERC and Regional Entity compliance staffs need to be able to request and receive information from Registered Entities without necessarily having to base the request on an “established procedure.” Similarly, a new §403.10.2 has been added, as follows:

The regional entity or NERC has the authority to request information from bulk power system owners, operators, and users pursuant to section 401.3 or this

section 403.10 without invoking a specific compliance monitoring and enforcement process in **Appendix 4C**, for purposes of determining whether to pursue one such process in a particular case and/or validating in the enforcement phase of a matter the conclusions reached through the compliance monitoring and enforcement process(es).

NERC and Regional Entity compliance staffs need to be able to request information from Registered Entities without having to specify that the request is based on one of the eight specific compliance monitoring and enforcement processes detailed in Appendix 4C. As the text of new §403.10.2 indicates, in some instances the CMEP staff needs to request and review information from the Registered Entity in order to be able to determine which of the eight CMEP processes is most appropriately used.

Section 403.10.1 has been amended to eliminate potentially ambiguous use of a pronoun.

Section 403.10.3 (formerly §403.10.2) has been amended to state that Regional Entities shall report information to NERC “when required or requested,” and “in accordance with **Appendix 4C** and other NERC procedures.”

Section 403.10.4 (formerly §403.10.3) has been amended (1) to replace the terms “self-reported, alleged, or confirmed” violations with the new terms “possible, alleged and confirmed” violations; (2) to change the reference to “enforcement authority or enforcement responsibilities” of the Regional Entity to “compliance monitoring and enforcement authority;” and (3) to delete a reference to Section 408, which has been deleted, and replace it with a reference to Appendix 4C.

Section 403.10.5 (formerly §403.10.4) has been amended to state that the regional Entity compliance staff shall review a Registered Entity’s mitigation plan in accordance with Appendix 4C, rather than in accordance with §403.18. The previously-referenced §403.18 has been deleted because the topic of review and approval of mitigation plans is fully covered in Appendix 4C. In

addition, the last sentence of §403.10.5, stating that Regional Entity compliance staff may issue remedial action directives, has been deleted. This sentence was out of place in §403.10, the topic of which is “Information Submittal,” and it is covered in §7.0 of Appendix 4C.

Section 403.10.7 (formerly §403.10.6) has been amended to delete the term “spot check,” which limited the processes the Regional Entity could use to verify compliance information submitted by bulk power system owners, operators, and users.

Section 403.11 has been amended to specify that each Regional Entity must “maintain and implement” a program of proactive compliance audits of bulk power system owners, operators, and users responsible for complying with Reliability Standards, and to specify that the audit program must be implemented in accordance with Appendix 4C.

Section 403.11.1 and 403.11.2 have been amended to state expressly what was stated by implication previously, namely, that compliance audits of entities registered as balancing authorities, reliability coordinators or transmission operators will be performed every three years, and will include a component conducted on the Registered Entity’s site. Compliance audits of all other registered entities will be performed on a schedule established by NERC.

Section 403.11.3 has been amended to state that a compliance audit shall include a review of supporting documentation and evidence used by the Registered Entity to “demonstrate” compliance for “an appropriate period prior to the compliance audit.” Currently the subsection states that an audit will include review of documentation and evidence used by the Registered Entity for its self-certifications since its last compliance audit, which was a more narrowly-focused requirement.

Section 403.11.4, concerning NERC staff and ERO governmental authority participation on compliance audit teams, has been deleted, as this topic is covered in §3.1.5.3 of amended Appendix 4C.

Current §403.12, Compliance Audit Results, and §403.13, Compliance Violation Investigations, have been deleted, as these topics are covered in §3.1.6 and §3.4, respectively, of amended Appendix 4C. (The term “Compliance Violation Investigation” has been replaced with the term “Compliance Investigation” in Appendix 4C and elsewhere.)

Section 403.12 (formerly §403.14) has been amended to specify that “all compliance monitoring and enforcement processes, and information obtained from such processes,” are to be non-public “and treated as confidential in accordance with Section 1500 and Appendix 4C” of the ROP, unless the Regional Entity, NERC, the Commission or another applicable governmental authority determines a need to conduct a compliance monitoring and enforcement process on a public basis, or unless advance authorization is obtained from an applicable governmental authority to make a compliance monitoring and enforcement process, or information from a process, public. The current version of this section only encompasses compliance audits and compliance violation investigations, not all CMEP processes. This section has also been amended to specify that NERC and the Regional Entities shall publish (i) schedules of compliance audits scheduled each year, (ii) a public report of each compliance audit, and (iii) notices of penalty and settlement agreements (this provision is consistent with the current provisions of Appendix 4C). Finally, this section has been amended to specify that the prohibition on making information from a compliance monitoring and enforcement process public does not prohibit NERC or a Regional Entity from publicly disclosing “information of general applicability and usefulness to owners, operators, and users of the bulk power system

concerning reliability and compliance matters,” so long as specific allegations or conclusions regarding possible or alleged violations are not included in such disclosures.

Current §403.15, Report all Violations, has been deleted, as the requirements for Regional Entities to report possible, alleged, and confirmed violations are covered in detail in §5.0 and §8.0 of amended Appendix 4C.

Section 403.14 (formerly §403.17) has been amended to identify the *Sanction Guidelines* as Appendix 4B to the ROP, and to specify that all confirmed violations, penalties and sanctions will be provided to NERC for review and filing with applicable ERO governmental authorities as a notice of penalty “in accordance with Appendix 4C.”

Current §403.18, Mitigation of Violations, and current §403.19, Settlement Process, have been deleted, as these topics are covered in detail in §6.0 and §5.6, respectively, of Appendix 4C.

Section 403.15 (formerly §403.20), Regional Hearing Process, has been amended to expressly refer to the hearing process in Attachment 2 to Appendix 4C and the Regional Entity’s delegation agreement, as follows:

Each regional entity compliance enforcement program shall establish and maintain a fair, independent, and nondiscriminatory process for hearing contested violations and any penalties or sanctions levied, in conformance with Attachment 2 to **Appendix 4C** to these rules of procedure and any deviations therefrom that are set forth in the regional entity’s delegation agreement ~~where authorized by applicable legislation or agreement.~~

This subsection has also been amended to add proposed remedial action directives and components of proposed mitigation plans to the list of matters that bulk power system owners, operators and users may use the hearing process to contest. This subsection has been further amended to delete the provision that “in ERCOT, the Public Utility Commission of Texas may act as the final adjudicator” in the Regional Entity hearing process; the delegation agreement between NERC and Texas RE now specifies that the PUCT will act as the hearing body, but the

Texas RE Board will be the decision-making body. (*See* §III.C.7 above.) Finally, this section has been amended to state that a bulk power system owner, operator, or user may appeal the outcome of the Regional Entity hearing process to NERC “in accordance with Section 409 of these rules of procedure.”

Section 403.16 (formerly §403.21) has been amended to add a reference to Appendix 4C. Additionally, this section has been amended to remove the phrase “with delegated authority” after “regional entity”, since all Regional Entities have delegated authority pursuant to their delegation agreements with NERC to carry out the CMEP.

Section 404, NERC Monitoring of Compliance for Regional Entities or Bulk Power Owners, Operators, or Users. Revisions have been made in this section to (i) add references to Appendix 4C, (ii) use the phrase “compliance monitoring and enforcement”, (iii) replace the term “compliance violation investigation” with the new term “compliance investigation,” and (iv) replace the term “Compliance Monitor” with “Compliance Enforcement Authority.”

The initial paragraph of §404 has been amended to state that “industry subject matter experts” may be used as appropriate in compliance activities.

Current §404.2, Mitigation Plans, has been deleted because this topic is covered in detail in §6.0 of Appendix 4C.

Section 404.2 (formerly §404.3) has been amended to replace a reference to Section 408 with a reference to Appendix 4C. Current §408 is being deleted because its subject matter is covered in Appendix 4C.

Section 404.3 (formerly §404.4) has been amended to add mitigation plan components imposed by NERC to the list of matters that may be appealed. In addition, the reference to the

applicable provisions for such appeals has been changed to Sections 408 through 410, reflecting the deletion and renumbering of sections.

Section 405, Monitoring of Standards and Other Requirements Applicable to NERC. This section has been amended to replace a reference to Section 408 with a reference to Appendix 4C. Current §408 is being deleted because its subject matter is covered in Appendix 4C.

Section 406, Independent Audits of the NERC Compliance Monitoring and Enforcement Program. Section 406.3 has been amended to replace a reference to Section 408 with a reference to Appendix 4C. Current §408 is being deleted because its subject matter is covered in Appendix 4C.

Section 407, Penalties, Sanctions, and Remedial Actions. Section 407.1 has been revised as follows:

NERC Review of Regional Penalties and Sanctions — NERC shall review all penalties, sanctions, and remedial actions imposed by each regional entity for violations of reliability standards to determine if the regional entity's determination is supported by a sufficient record compiled by the regional entity, is consistent with the *Sanction Guidelines* incorporated into these rules as **Appendix 4B** and with other directives, guidance and directions issued by NERC pursuant to the delegation agreement, and is consistent with penalties, sanctions and remedial actions imposed by the regional entity and other regional entities for consistency with similar violations involving the same or similar facts and circumstances and fairness in application.

As revised, §407.1 is consistent with the criteria for NERC review of Regional Entity dispositions of compliance matters specified in §6(d) of the revised pro forma Delegation Agreement.

Section 407.2 has been amended to refer to the “regional entity compliance monitoring and enforcement program staff,” and to use the correct title of Appendix 4B.

Current §407.3, Hearing Processes, has been deleted. The requirement for a Regional Entity hearing process is covered in §403.15 of the amended ROP as well as in Exhibit D to the pro forma Delegation Agreement.

[Current] Section 408, Reporting and Disclosure Process. This section is being deleted in its entirety because the Regional Entity’s reporting obligations with respect to compliance monitoring and enforcement process matters are covered in detail in §5.0 and §8.0 of amended Appendix 4C. In addition, (i) the provisions of current §408.3 relating to Confidential Information have been moved to new §401.10 of the amended ROP; (ii) the provisions of §408.5, Violation Information Review, have been moved to new §401.12; and (ii) the provisions of §408.6, Public Posting, have been moved to new §401.11.

Section 408, Review of NERC Decisions (formerly §409). Section 408.1 has been amended to provide an updated cross-reference to §409 as the section covering appeals by Registered Entities of decisions of Regional Entity hearing bodies. There are no other amendments to renumbered §408.

Section 409, Appeals from Final Decisions of Regional Entities (formerly §410). The only amendments to this section are in §409.1, where the term “compliance violation investigation” has been replaced by the new term “compliance investigation,” and the description of the compliance determinations of Regional Entities that can be appealed to NERC has been generalized with the addition of the phrase “other compliance monitoring and enforcement process.”

Section 410, Hold Harmless (formerly §411). In this section (i) cross-references to §409 and §410 have been changed to §408 and §409, to reflect renumbering of those sections,

and (ii) the reference to “industry volunteers” has been replaced by a reference to “industry subject matter experts.”

Section 411, Requests for Technical Feasibility Exceptions to NERC Critical Infrastructure Protection Standards (formerly §412). This section has been renumbered, but has not otherwise been amended.

3. Amendments to Section 500 – Organization Registration and Certification

Throughout §500, references to Appendix 5, the NERC *Organization Registration and Certification Manual*, have been changed to Appendix 5A to reflect the renumbering of that Appendix.

Section 501, Scope of the Organization Registration and Certification Program. In §501.1.1, the list of types of Registered Entities has been deleted. This amendment removes the need to amend this section if a new category of Registered Entity (*i.e.*, a new reliability functional category) is created or an existing one is deleted. In addition, text has been added to require bulk power system owners, operators, and users to

Provide NERC and the applicable regional entity with timely updates to information concerning the registered entity’s ownership, operations, contact information, and other information that may affect the registered entity’s registration status or other information recorded in the compliance registry.

Section 501.1.2 has been amended to read as follows:

NERC and regional entities assisting NERC in the development of the compliance registry shall ~~consider the following factors in determining~~ which organizations should be placed in the registry based on the criteria provided in the NERC *Statement of Compliance Registry Criteria*, which is incorporated into these rules as **Appendix 5B**.

The specific factors listed in current §501.1.2.1 through §501.1.2.6 have been deleted. With the proposed addition of the *Statement of Compliance Registry Criteria* as an Appendix to the ROP, it would be duplicative and potentially confusing and inconsistent to also continue to list the

criteria, in a considerably more summary fashion than in the *Statement of Compliance Registry Criteria*, in §501. Following these deleted subsections, the text of §501.1.2 continues with the text concerning Joint Registration Organizations that was formerly numbered as §501.1.2.7.

Section 501.3, Delegation and Oversight, has been amended to make minor grammatical revisions, and to specify that “The regional entity shall administer an organization registration and certification program in accordance with such delegation [from NERC] to meet NERC’s program goals and requirements.” Further, in §501.3.3, which requires NERC to develop and maintain a program to monitor and oversee Regional Entity registration and certification programs, subsection 501.3.3.1 has been amended to specify that “This program shall monitor whether the regional entity carries out its organization registration and certification responsibilities ~~program~~ in accordance with NERC requirements”

Section 502, ERO Organization Registration and Certification Program Requirements. Section 502.1.2 has been amended to add the delegation agreement to the list of documents specifying the NERC requirements for the Organization Registration and Certification Program, that a Regional Entity must follow in carrying out its delegated authority for the program. Section 502.2 has been amended to state: “To ensure consistency and fairness of the program, NERC shall develop procedures to be used by all regional entities in carrying out their organization registration and certification ~~programs~~ responsibilities” This is consistent with the amendment to §501.3.3.1 described above.

Section 502.2.2.6, which requires NERC to develop and provide training in auditing skills to individuals who participate in certification audits, has been amended to delete references to “industry volunteers” participating in certification audits, and to add a reference to “industry subject matter experts” participating in such audits.

Section 503, Regional Entity Implementation of Organization Registration and Certification Program Requirements. In §503.2, which lists the organization registration activities to be performed by the Regional Entities, current subsection 503.2.1, which states “Entities seeking registration shall contact the regional entity in which they operate to become registered and, if necessary, certified,” has been deleted. As provided in §7(b) of the revised pro forma Delegation Agreement, NERC will be responsible for maintaining the single consolidated Compliance Registry and will use information provided by the Regional Entities to register owners, operators, and users of the Bulk Power System on the Compliance Registry.

Section 504, Appeals. The first sentence of §504.2 has been amended as follows: “Each regional entity with delegated responsibilities for certification shall establish and maintain a fair, independent, and nondiscriminatory appeals process.” Currently this provision applies to both registration and certification, however, as noted earlier in the discussion of §7(b) of the revised pro forma Delegation Agreement, the Regional Entities will no longer be responsible for maintaining Regional Compliance Registries to register entities. Additionally, in §504.2, the statement “in ERCOT, the Public Utility Commission of Texas may act as the final adjudicator” has been deleted. Under the Delegation Agreement between NERC and Texas RE, the PUCT will be the hearing body but the Texas RE Board will be the final decision-making body. (*See* §III.C.7 above.)

Section 505, Program Maintenance. There are no amendments to this section.

Section 506, Independent Audit of NERC Organization and Certification Program. Section 506.3 has been amended to delete a reference to “the reporting and disclosure process in Section 408,” since §408 of the ROP is being deleted.

Section 507, Provisions Relating to Joint Registrations and Joint Registration Organizations. Section 507.7 has been amended to use the new terms “possible violation, alleged violation and confirmed violation” that are being adopted in amended Appendix 4C.

4. Amendments to Section 800 – Reliability Assessment and Performance Analysis

The amendments to §800 are in §807 and §808. Section 807, Analysis of Major Events, has been amended to add a new subsection (c) (with the subsequent subsections re-lettered accordingly), and §808, Analysis of Off-Normal Events, Potential System Vulnerabilities, and System Performance, has been amended by the addition of a new subsection 3, each with the same text:

Each user, owner, and operator of the bulk power system shall provide NERC and the applicable regional entities with such information as is necessary to enable NERC and the applicable regional entities to carry out their responsibilities under this section.

These amendments are intended to clarify NERC’s and the Regional Entities’ authority to request and obtain information from bulk power system owners, operators, and users necessary to enable NERC and the Regional Entities to respond to, investigate, analyze, and develop “lessons learned” information concerning, major system events, off-normal events, potential bulk power system vulnerabilities, and bulk power system performance. Authority for these added provisions with respect to U.S. entities is found in the Commission’s regulations at 18 C.F.R. §39.2(d).

In addition, §808.1 and §808.2 have been amended to add references to regional entities, as well as to NERC, having responsibilities for the activities and analyses described in these subsections.

5. Amendments to Section 1000 – Situation Awareness and Infrastructure Security

The only amendment to §1000 is in §1003.2.5, to change the reference to “Cyber Security Standard” to “Cyber Security Standards.” This revision is appropriate to recognize that there are now nine Critical Infrastructure Protection standards in effect.

6. Amendments to Section 1100 – Annual NERC Business Plans and Budgets

The amendments to §1100 are intended to be consistent with the expanded provisions in §9 and Exhibit E of the revised pro forma Delegation Agreement on the annual NERC and Regional Entity business plans and budgets (*see* §§III.B.2.a and f above). There are no amendments to §1101 and §1102.

Section 1103, NERC Budget Development. Section 1103.1 has been amended to delete the provision that the NERC annual budget process “shall be initiated in March” for the following year, and to specify instead that the annual budget process shall be scheduled and conducted so as to allow sufficient time for all necessary actions in the budget development process, leading up to and including “timely submission of the proposed budget to FERC for approval in accordance with FERC regulations.” As the NERC (and Regional Entity) business planning and budgeting process has evolved, it typically begins early in the preceding year (or even late in the second preceding year).

Section 1103.3, which lists the information to be included in NERC’s annual budget submissions to the Commission and other ERO governmental authorities, has been amended to list information that NERC, based on experience in preparing annual budgets for governmental approvals for 2007, 2008, 2009 and 2010, has found to be appropriate for, and desired by the governmental authorities to be provided in, the budget submissions:

The NERC annual budget submittal to ERO governmental authorities shall include description and explanation of NERC's proposed ERO program activities for the year; the following information: (1) budget component justification based on statutory or other authorities; (2) explanation of how each the budgeted activity lends itself to the accomplishment of the statutory or other authorities; sufficiency of resources provided for in the budget to carry out the ERO program responsibilities; explanation of the (3) methods of calculationsing and budget estimates; identification and explanation of changes in budget components from the previous year's budget; information on staffing and organization charts; and such other information as is required by FERC and other ERO governmental authorities having authority to approve the proposed budget (4) who prioritizes competing needs; (5) how the budget meets the objectives of affordability, sustainability, and efficiency and effectiveness of expenditures; (6) implementation to meet international standards; (7) transparency; and (8) accountability and execution in accordance with operating plan, performance measures, and shifting priorities.

Section 1104, Submittal of Regional Entity Budgets to NERC. Section 1104.1 has been amended to more fully describe the cycle of business plan and budget preparation by the Regional Entities working with NERC. The current text only requires the Regional Entity to submit its proposed business plan and budget to NERC by June 1 of the preceding year so that the business plan and budget can be approved by the NERC Board and filed with the Commission for approval by the date established in the Commission's regulations.³⁵ In practice, NERC and the Regional Entities work collaboratively on the preparation of the Regional Entity business plans and budgets for 8 to 10 months prior to the filing date, with several drafts being exchanged and reviewed during this process. The amendments also specify that the Regional Entity's budget shall include supporting materials in accordance with the format developed by NERC and the Regional Entities (including content listed in the existing text of this section, which is specified in 18 C.F.R. §39.4). The specific amendments to §1104.1 are as follows:

Each regional entity shall submit its proposed annual budget for carrying out its delegated authority functions as well as all other activities and funding to NERC in accordance with a schedule developed by NERC and the regional entities,

³⁵ 18 C.F.R. §39.4(b).

which shall provide for the regional entity to submit its final budget that has been approved by its board of directors or other governing body no later than ~~June 4~~ July 1 of the prior year, in order to provide sufficient time for NERC's review and comment on the proposed budget and approval of the regional entity budget by the NERC Board of Trustees in time for the NERC and regional budgets to be submitted to FERC and other ERO governmental authorities for approval in accordance with their regulations. The regional entity's budget shall include, ~~together with~~ supporting materials in accordance with the budget and reporting format developed by NERC and the regional entities, including the regional entity's complete business plan and organization chart, explaining the proposed collection of all dues, fees, and charges and the proposed expenditure of funds collected in sufficient detail to justify the requested funding collection and budget expenditures.

Section 1104.3, concerning NERC's right to review the financial books and records of each Regional Entity, has been deleted. NERC's right to review the Regional Entity's financial records is established by the Delegation Agreement (*see* §8 of Exhibit E to the revised pro forma Delegation Agreement), and therefore §1104.3 was deemed to be unnecessary.

Section 1105, Submittal of NERC and Regional Entity Budgets to Governmental Authorities for Approval. Section 1105.1 has been amended to delete the requirement that the budget filing with ERO governmental authorities must include “the previous year's audited financial statements” [of NERC and the Regional Entities]. In accordance with the Commission's Order issued June 29, 2009 approving NERC's proposal to file the annual comparison of the NERC and Regional Entity actual costs to budgets for the preceding year by May 30 (rather than April 1) so that the comparisons can be based on NERC's and the Regional Entities' audited financial statements for the preceding year, NERC will now include its and the Regional Entities' audited financial statements for the preceding years in the May 30 filings, rather than in the annual business plan and budget filings.³⁶

³⁶ *North American Electric Reliability Corporation, Order Conditionally Accepting Compliance Filing*, 127 FERC ¶ 61,307 (2009), at PP 23-24. NERC recently filed the annual comparison of actual costs to budgets for 2009, including the NERC and Regional Entity audited financial

Section 1106, NERC and Regional Entity Billing and Collections. The footnote to §1106 has been amended as follows:

A regional entity ~~shall~~ may allocate funding obligations using an ~~NERC approved~~ alternative method approved by NERC and by FERC and other appropriate ERO governmental authorities, as ~~stated~~ provided for in the regional delegation agreement.

The amended text makes it clear that any alternative allocation method to the preferred NEL-based method must be approved by NERC and by the Commission and other appropriate governmental authorities.

Section 1107, Penalty Applications. Section 1107.1 has been amended (1) to change references to an “investigation” that leads to imposition of a penalty to a “compliance monitoring and enforcement process,” thereby broadening the scope of the provision; and (2) to add a proviso that a different disposition of penalty monies is permitted if it “is provided for in the delegation agreement, or in a contract or a disposition of the violation that is approved by NERC and FERC.” This additional text makes it clear that any alternative disposition of penalty monies must be approved by both NERC and the Commission (whether through approval of a provision in a delegation agreement or of a separate agreement).

Sections 1107.2 and 1107.3 have also been amended to change references to an “investigation” that leads to imposition of a penalty to a “compliance monitoring and enforcement process.” In addition, §1107.2 has been amended to specify that penalty monies shall be applied as a general offset to the budget of the entity (*i.e.*, NERC or a Regional Entity) receiving the penalty payment for the subsequent fiscal year if received by July 1, or for the second subsequent fiscal year if received on or after July 1. This amendment formalizes in the

reports for 2009. *North American Electric Reliability Corporation’s Report of Comparisons of Budgeted to Actual Costs for 2009 for NERC and the Regional Entities*, filed June 1, 2010 in Docket No. RR10-10-000.

ROP the policy that NERC and the Regional Entities have followed to determine the budget year for which penalty payments should be used as a budget offset.

Section 1107.4, concerning exceptions to the general rule for application of penalty payments, has been amended as follows:

Exceptions or alternatives to the foregoing provisions ~~policy due to statutory or regulatory restrictions~~ will be ~~considered on a case-by-case basis~~ allowed if approved by NERC and by FERC and any other applicable ERO governmental authority.

As amended, this section provides for a broader availability of alternative treatment to the general rule for application of penalty payments, but requires approval of any alternative by NERC and by the Commission and any other applicable ERO governmental authority. An alternative treatment could include, among other possibilities, using a large penalty payment (or a large aggregate amount of penalty payments received in one year) as a general offset to the receiving entity's budget over two or more years, rather than in a single year as provided by the general rule.

Section 1108, Special Assessments. Section 1108 has been amended to expressly recognize the possibility of a filing for approval of an amended or supplemental budget, including if necessary a special or additional assessment for statutory functions, of NERC or a Regional Entity. As amended, this section makes it clear that an amended or supplemental budget and/or assessment request can be filed by NERC for a Regional Entity. The amended provision is consistent with new §7 of Exhibit E to the revised pro forma Delegation Agreement (*see* §III.B.2.f above).

7. Amendments to Section 1200 – Regional Delegation Agreements

Section 1205, Sub-delegation. Section 1205 has been amended to remove the absolute prohibition on sub-delegation by a Regional Entity of its delegated responsibilities and

authorities, to allow for sub-delegation to another Regional Entity, with approval by NERC and by the Commission and other applicable ERO governmental authorities. The amendment also makes it clear that Regional Entities may share resources so long as the sharing does not result in cross-subsidization or sub-delegation:

The regional entity shall not sub-delegate any responsibilities and authorities delegated to it by its regional delegation agreement with NERC except with the approval of NERC and FERC and other appropriate ERO governmental authorities. Responsibilities and authorities may only be sub-delegated to another regional entity. Regional entities may share resources with one another so long as such arrangements do not result in cross-subsidization or in any sub-delegation of authorities.

Section 1207, Regional Entity Audits. Section 1207 has been amended to specify that NERC will audit each Regional Entity approximately every five years, rather than approximately every three years, to verify that the Regional Entity continues to comply with the NERC ROP and the obligations of the delegation agreement. This change is consistent with the revised Delegation Agreements that provide for renewal terms of five years (rather than the initial term of three years). In addition, with the Regional Entities having been in operation for approximately three years carrying out delegated authorities, and with NERC having conducted an initial round of audits, NERC and the Regional Entities believe that, going forward, the NERC audits (and the concomitant expenditure of NERC and Regional Entity time and resources) can be conducted with reduced frequency. Additionally, text has been added to §1207 specifying the scope and methods of conducting the audits:

Audits of regional entities shall be conducted, to the extent practical, based on professional auditing standards recognized in the U.S., including Generally Accepted Auditing Standards, Generally Accepted Government Auditing Standards, and standards sanctioned by the Institute of Internal Auditors, and if applicable to the coverage of the audit, may be based on Canadian or other international standards. The audits required by this section 1207 shall not duplicate the audits of regional entity compliance monitoring and enforcement

programs provided for in **Appendix 4A**, Audit of Regional Compliance Programs, to these rules of procedure.

Section 1208, Process for Considering Registered Entity Requests to Transfer to Another Regional Entity. A new §1208 has been added to the ROP to establish a formal process for considering, evaluating, and approving (or rejecting) requests by a Registered Entity that is registered in the region of one Regional Entity to have its registration transferred to a different Regional Entity. NERC and Regional Entities have received such requests and concluded that it would be useful and appropriate to have a process for addressing such requests established in the ROP. As detailed in new §1208, the process requires:

- a written request by the Registered Entity to the two Regional Entities, including a statement of reasons justifying the proposed transfer and discussion of impacts on other bulk power system owners, operators, and users;
- posting of the request on the Regional Entities' web sites for a 21-day public comment period;
- consultation between the Regional Entities; §1208.2 specifies factors the regional Entities are to consider in evaluating the request;
- notice to the Registered Entity of the Regional Entity's decision (which may be approval, rejection, or disagreement over whether the proposed transfer should be approved);
- if the Regional Entities agree that the transfer is appropriate, submission of a written request for approval to the NERC Board; §1208.3 specifies the information to be included in the request and considered by the NERC Board;
- if the Regional Entities do not agree that the transfer is appropriate, submission by the Regional Entity that agrees with the transfer of a written request for approval to the NERC Board, with the opportunity for the other Regional Entity to submit a written statement to the NERC Board explaining why the transfer is not appropriate;
- Prior to action by the NERC Board, posting of information on the proposed transfer, including the submission(s) from the Regional Entity(ies), on the NERC web site for a 21-day public comment period; and
- if the proposed transfer is approved by the NERC Board, submission of appropriate amendments to the two Regional Entities' Delegation Agreements to the Commission for approval.

Section 1208 also specifies that if the NERC Board disapproves a proposed transfer, the Regional Entity(ies) that believe the transfer would be appropriate may, if requested by the Registered Entity, file a petition with the Commission pursuant to 18 C.F.R. §39.8(f) and (g) requesting that the Commission order amendments to the delegation agreements of the two Regional Entities to effectuate the proposed transfer.

Section 1208 specifies that no transfer of a Registered Entity shall be effective (i) unless approved by the Commission, and (ii) any earlier than January 1 of the second calendar year following approval by the Commission, unless an earlier effective date is agreed to by both Regional Entities and NERC and is approved by the Commission. The provision that a transfer cannot be effective until January 1 of the second calendar year following approval (absent agreement to a different effective date) is intended to allow any impacts of the transfer on the two Regional Entities to be addressed in their budgets and assessments. This amount of lead time is necessary in light of the fact that Regional Entity budgets and assessments for a year are developed during the first 6 or 7 months of the preceding year, submitted to the NERC Board for approval in late July or early August, and submitted to the Commission for approval by approximately August 24.

C. Amendments to Appendix 4A to the NERC Rules of Procedure

Appendix 4A, *Audit of Regional Entity Compliance Programs*, has been amended to establish more detailed provisions for NERC's audits of Regional Entity compliance monitoring and enforcement programs. Although the amendments are discussed below on a section-by-section basis, Appendix 4A has in fact been comprehensively re-evaluated and rewritten by NERC and the Regional Entities. Clean and redlined versions of amended Appendix 4A are provided in **Attachments 12A** and **12B**.

The first section of amended Appendix 4A, titled “Overview, Objective, and Scope” (expanded from the current title “Overview”), has been amended to use several defined terms and acronyms used elsewhere in the ROP. The section has also been amended to specify that a purpose of the audit is to determine whether the CMEP, “as implemented by the regional entity, effectively meets the requirements under the CMEP, the NERC Rules of Procedure (ROP), and the corresponding annual implementation plan.” As amended, it also specifies that each year, NERC will establish which standards requirements will be placed into the CMEP “through its annual implementation plan.” The amended section further specifies:

The scope of the regional entity audits includes the CMEP, related sections of the ROP, the annual implementation plan as approved by NERC, and additional directives provided by NERC for implementing the CMEP and related ROP sections.

The second section of amended Appendix 4A, titled “Scheduling,” has been amended to specify that each Regional Entity compliance program will be audited at least once every five years, rather than once every three years. This amendment is consistent with the amendment to §402.1.3 of the ROP. This section has also been amended to specify that the schedule for the Regional Entity audit program is approved by NERC staff, rather than by NERC staff and the NERC Compliance and Certification Committee (“CCC”). NERC believes establishing the audit schedule should be a staff function, without stakeholder participation.

The third section of amended Appendix 4A is a new section, titled “Audit Team,” and consists largely of new text. This section provides that:

- A NERC staff member will be designated Audit Team Lead (“ATL”) for the Regional Entity audits, with responsibility to maintain oversight of the auditing process, and coordinate and facilitate the audit process steps with applicable ERO governmental authorities, the CCC and the audited Regional Entity.
- NERC staff will conduct the audit, in whole or in part, but NERC may also use external, independent auditors to conduct the audit, in whole or in part.

- At the discretion of the CCC, a representative from the CCC may participate as an observer; representatives from applicable ERO governmental authorities may also participate as observers, but subject to the limitations of §3.1.6 and §8.0 of Appendix 4C regarding disclosure of non-public compliance information related to other jurisdictions.
- Compliance staff from other Regional Entities may participate as observers, with consent of NERC and the compliance manager of the Regional Entity being audited.

The requirements in current Appendix 4A that the audit team shall include at least one representative from the CCC (one of whom shall serve as the ATL) and at least one compliance manager from another Regional Entity, have been deleted. Although this section still allows for a CCC representative to participate on the audit team as an observer, at the direction of the CCC, the ATL role should be a NERC staff function. Additionally, the following provision was deleted as unnecessary: “Audit team members shall not be from the regional entity being audited.” Amended Appendix 4A provides that the entire universe of persons who may participate on audit teams consists of NERC staff and independent auditors, and (as observers) representatives of the CCC, applicable ERO Governmental Authorities, and (with consent) compliance staff of other Regional Entities, and does not provide for representatives of the Regional Entity being audited to participate on the audit team.

The fourth section of amended Appendix 4A is titled “Planning or Pre-Audit” (expanded from “Pre-Audit” in current Appendix 4A). It provides for NERC to send a Notification of Intent to Audit letter to the CEO of the Regional Entity to be audited at least 60 days prior to the on-site audit, setting forth the scope of the audit and key audit dates. The NERC ATL will also send a pre-audit questionnaire(s) and request(s) for information to the Regional Entity, which are to be completed and returned, with the requested documentation, 30 days prior to the on-site audit. This section also provides that the Regional Entity may request a planning conference

with NERC to review audit scope, logistics, and other coordination matters to effectuate an efficient audit process.

The fifth section of amended Appendix 4A, titled “On-Site Audit and Fieldwork” (expanded from “On-Site Audit” in the current Appendix 4C), specifies that NERC shall evaluate the Regional Entity’s controls, physical security, tools, staff training and internal procedures to meet the requirements of the Regional Entity audit program scope. The section provides that detailed questions related to the Regional Entity’s completed questionnaire(s) and requests for information are evaluated along with a random sampling of applicable evidence, and that the evidentiary review of Regional Entity documentation is used to determine whether the Regional Entity’s program is effective and meeting the requirements specified under “Overview, Objective, and Scope.”

The sixth section of amended Appendix 4A, titled “Reporting” (revised from “Preparation and Posting of the Audit Report” in the current Appendix 4A), provides for the following sequence of events:

- Upon completion of on-site fieldwork, the audit team will provide an exit briefing which will include any preliminary findings and/or results from the examination.
- Within 30 business days following the last day of on-site fieldwork, NERC will provide the Regional Entity with a draft report including a review of the scope, methodology and evaluation of internal controls.
- The Regional Entity has 30 business days to respond to the draft audit report, and may request a conference with NERC to address concerns with the draft report.
- NERC will issue a final report to the Regional Entity 45 business days after receipt of the Regional Entity’s comments on the draft report.
- The Regional Entity is provided an opportunity to respond to the conclusions in the final audit report.
- NERC presents the final audit report to the NERC Board of Trustees Compliance Committee (“BOTCC”).

- After the presentation to the BOTCC, the final report and the Regional Entity's response are posted on the NERC website.
- If there are exceptions to the identified audit scope, the Regional Entity develops a corrective action plan to resolve the exceptions, and provides quarterly updates to NERC on the status of the corrective actions, until completed.

This section also provides that until NERC issues the final audit report, the draft report and the information provided and discussions held will be kept confidential.

D. Amendments to Appendix 4B to the NERC Rules of Procedure

The amendments to Appendix 4B, *Sanction Guidelines of the North American Electric Reliability Corporation*, are largely for the purpose of consistency with other provisions of the ROP and Appendix 4C that are being amended, including to more consistently use defined terms; and not for the purpose of making substantive changes to the manner in which, or the basis upon which, penalties and sanctions for violations of Reliability Standard are determined. Clean and redlined versions of amended Appendix 4B are provided in **Attachments 13** and **13B**.

Section 2, Document Scope and Exclusions, of Appendix 4B has been amended (i) to use consistently the new terms "possible violation" and "confirmed violation;" (ii) to provide appropriate (and more specific) cross-references to the NERC Compliance Monitoring and Enforcement Program in Appendix 4C (and to delete references to §400 of the ROP) and; (iii) to replace the awkward term "dispel" a violation with "dismiss." The amendments to this section eliminate the reference to "applicable regional entity program documents" as a source of the steps a Regional Entity will follow to process a violation from possible to confirmed violation status, as all Regional Entities have now agreed to adopt the NERC uniform CMEP in Appendix 4C for these actions.

Section 3.2, Settlement of Compliance Violations, has been amended (i) to use the new term "possible violation," and (ii) to replace a reference to §403.19, Settlement Process, of the

ROP, which has been deleted, with a reference to Appendix 4C, which sets forth the procedures for settlement of a compliance enforcement matter.

Section 3.3, Settlement Request, has been amended to specify that an entity found in or being investigated for a violation may request settlement negotiations at any time, including prior to issuance of a notice of alleged violation; however, NERC or the Regional Entity may decline to enter into or continue settlement negotiations after the possible violation or alleged violation becomes a confirmed violation. As amended, this section is consistent with §5.6 of amended Appendix 4C. The basis for this provision is explained in the discussion of the amendments to Appendix 4C. (*See* §IV.E.5 below.)

Section 3.5, Timing of Determination of Penalty, Sanction or Remedial Action, has been amended (i) to use the new terms “possible violation” and “alleged violation;” (ii) to replace the term “dispelled” (violation) with “dismissed;” and (iii) to specify that the penalty, sanction, or other remedial action for a violation will be determined when the violation becomes a confirmed violation or is resolved as part of a settlement agreement.

Section 3.6, Determining Party, has been amended to specify that “the determination of a penalty, sanction or other remedial action for a violation will generally be undertaken by the same entity determining the violation to be a confirmed violation, but subject to review by NERC if the determination is made by a regional entity.” As amended, this section is consistent with §5.8 and §5.9 of amended Appendix 4C.

In §6, Remedial Action, §6.1, Definition and Anticipated Use has been amended to make it more consistent with the definition of and provisions applicable to Remedial Action Directives in Appendix 4C. Specifically, the first paragraph of this section has been amended as follows:

Remedial actions are directives that may be issued to a bulk power system owner, operator, or user to resolve an alleged violation of a reliability standard by

addressing conditions, practices, or any other relevant action or activity that is immediately necessary to terminate or correct to protect the reliability of the bulk power system from an imminent threat. A remedial action directive will be issued when NERC or the regional entity identifies an alleged violation of a reliability standard that must be corrected immediately to promptly reduce protect the reliability of the bulk power system from the imminent ~~the reliability~~ threat that NERC or the regional entity has identified ~~poses to the reliability of the bulk power system~~.

Additionally, §6.4, Scope of Application, has been amended to specify that:

The scope of remedial action directives issued by NERC or the regional entity will be limited to conditions, practices, or any other relevant actions or activities resulting in noncompliance, or that NERC or the regional entity considers at significant risk of becoming noncompliant, to requirements of the reliability standards, and that present an imminent threat to the reliability of the bulk power system.

Further, §6.5, Availability, has been amended to specify that “NERC or the regional entity may issue remedial action directives to entities in the United States regarding a violation that is immediately necessary to terminate or correct to protect the reliability of the bulk power system from an imminent threat, irrespective of whether that violation is ultimately verified or ~~dispelled~~ dismissed by NERC or the regional entity’s investigation of the violation.” Finally, §6.7, Types of Remedial Actions, has been amended to refer to the need to reduce or eliminate “imminent” threats to the reliability of the bulk power system. As amended, these provisions in §6 are consistent with the definition of “Remedial Action Directive” in §1.1.25, and with §7.0, of amended Appendix 4C.

E. Amendments to Appendix 4C to the NERC Rules of Procedure

Appendix 4C, *Compliance Monitoring and Enforcement Program*, has been extensively revised. In addition to the changes to the text described in the section-by-section discussion below, all the process flow charts have been removed from Appendix 4C. References in the text to the process charts have also been deleted. These charts were cumbersome to maintain in the

document, and presented the potential for inconsistency with the text (which should control), and therefore for confusion and misunderstanding. Therefore, NERC and the Regional Entities agreed that the charts should be removed from Appendix 4C.

In addition, revisions have been made throughout Appendix 4C (including Attachment 2, Hearing Procedures) to more consistently use defined terms (capitalized to indicate the term is a defined term) and acronyms. Further, because a number of new sections have been added throughout Appendix 4C and other sections have been reordered, cross-references have been revised as necessary throughout Appendix 4C.

Clean and redlined versions of amended Appendix 4C are provided in **Attachments 14A** and **14B**.

1. Section 1.0 – Introduction

In the initial paragraph of §1.0, the sentence “This is accomplished through compliance monitoring and rigorous proactive Compliance Audits” (referring to monitoring, assessing and enforcing compliance with Reliability Standards) has been deleted, since the CMEP is comprised of more than just Compliance Audits.

At the start of §1.1, Definitions, a statement has been added that capitalized terms used in Appendix 4C shall have the meanings set forth in this section or in §200 of the ROP. This sentence recognizes that some defined terms have been imported from §200 of the ROP. As a result, some terms formerly not capitalized in Appendix 4C are capitalized in amended Appendix 4C, because they are defined in §200 of the ROP (*e.g.*, Bulk Power System).

A number of new defined terms have been added, and some existing defined terms have been modified, to incorporate the progression of steps in the compliance enforcement process embodied in revised Appendix 4C, *i.e.*, a compliance enforcement matter starts with a

Preliminary Screen and moves to Possible Violation, then to Alleged Violation, and finally to Confirmed Violation. New or modified definitions for this purpose include Alleged Violation (§1.1.1³⁷), Confirmed Violation (§1.1.9), Notice of Alleged Violation (§1.1.15), Notice of Completion of Enforcement Action (§1.1.16), Notice of Confirmed Violation (§1.1.17), Notice of Possible Violation (§1.1.19), Possible Violation (§1.1.21), and Preliminary Screen (§1.1.22):

- A Preliminary Screen is “an initial evaluation of evidence indicating potential noncompliance with a Reliability Standard has occurred or is occurring, conducted by the Compliance Enforcement Authority for the purpose of determining whether a Possible Violation exists.” It consists of “an evaluation of whether (1) the entity allegedly involved in the potential noncompliance is registered, and (2) the Reliability Standard requirement to which the evidence of potential noncompliance relates is applicable to the entity and is enforceable.” (§1.1.22)
- A Possible Violation is the identification, using one of the compliance monitoring and enforcement processes in Section 3.0 of Appendix 4C, of a possible failure by a Registered Entity to comply with a Reliability Standard that is applicable to the Registered Entity. (§1.1.21) The defined term “Possible Violation” has been added to achieve consistency among the Regional Entities. The concept of a “possible violation” is not new, and in practical terms does not add a new step to the compliance enforcement process. From the beginning of the CMEP, the Commission has required that NERC and the Regional Entities report possible violations of Reliability Standards to the Commission on a non-public basis.
- A Notice of Possible Violation is issued to the Registered Entity and states that a Possible Violation has been identified, provides a brief description of the Possible Violation, and directs the Registered Entity to retain and preserve all data and records relating to the Possible Violation. (§1.1.19)
- An Alleged Violation is a Possible Violation for which the Compliance Enforcement Authority has determined, based on an assessment of the facts and circumstances surrounding the Possible Violation, that evidence exists to indicate a Registered Entity has violated a Reliability Standard. (§1.1.1)
- A Notice of Alleged Violation is issued by the Compliance Enforcement Authority to the Registered Entity pursuant to §5.3 of Appendix 4C. (§1.1.15)
- A Confirmed Violation is an Alleged Violation for which an entity has (1) accepted the finding of the violation and will not seek an appeal, or (2) completed the hearing and appeal process within NERC, or (3) allowed the time for requesting a hearing or

³⁷ Section numbers cited in this discussion are the section numbers in the amended Appendix 4C.

submitting an appeal to expire, or (4) admitted to the violation in a settlement agreement. (§1.1.9)

- A Notice of Confirmed Violation is a notice issued by the Compliance Enforcement Authority to a Registered Entity confirming the violation of one or more Reliability Standards, as a result of (1) the Registered Entity accepting a Notice of Alleged Violation and the proposed penalty or sanction, or (2) the finding of a violation through a hearing and appeal; or (3) expiration of the period for requesting a hearing or appeal, or (4) the Registered Entity admitting the violation as part of an executed settlement agreement. (§1.1.17)
- A Notice of Penalty is a notice prepared by NERC and filed with the Commission, following approval by NERC of a Notice of Confirmed Violation or a settlement agreement, stating the penalty or sanction imposed or agreed to for the Confirmed Violation or as part of the settlement. (§1.1.18)
- A Notice of Completion of Enforcement Action is a notice issued by the Compliance Enforcement Authority to a Registered Entity, pursuant to Section 5.10 of amended Appendix 4C, stating that an enforcement action is closed. (§1.1.16)

The defined term “Compliance Violation Investigation,” which is one of the compliance monitoring processes, has been changed to “Compliance Investigation.” (§1.1.8)

The defined term “End Date” has been added, as the last date of the period to be covered by a Compliance Audit. (§1.1.10)

The definition of Exception Reporting has been expanded to include “Information provided to the Compliance Enforcement Authority by a Registered Entity indicating that a violation of a Reliability Standard has occurred . . . or enabling the Compliance Enforcement Authority to ascertain the Registered Entity’s compliance.” In addition, the sentence “Some Reliability Standards require Exception Reporting” has been deleted as not appropriately included in a definition. (§1.1.11)

The definition of Mitigation Plan has been internally reorganized for clarity and to reduce it to one sentence, with no substantive change. (§1.1.12)

The definition of NERC Compliance Registry (§1.1.13) is now essentially the same as the definition of “Regional Compliance Registry” in current Appendix 4C (with the phrase

“maintained by NERC” added). The defined term “Regional Compliance Registry” has been deleted, since the Regional Entities will no longer maintain compliance registries. (The definition of “NERC Compliance Registry” in the current Appendix 4C stated it was “a compilation of the Regional Compliance Registries”).

The definition of Registered Entity has been amended to use the defined term Bulk Power System and to delete a reference to the deleted term Regional Compliance Registry. (§1.1.24)

The definition of Remedial Action Directive has been amended to use the defined term Bulk Power System. (§1.1.25)

The definition of Required Date has been amended to delete the sentence “Such date shall provide the Registered Entity a reasonable period of time in which to take the required action, given the circumstances and the action required.” The deleted sentence was not appropriately included in a definition. (§1.1.26)

The definition of Self-Certification has been revised for minor grammatical improvements. (§1.1.27)

The definition of Self-Reporting has been amended to read: “A report by a Registered Entity stating (1) that the Registered Entity believes it has violated a Reliability Standard, and (2) the actions that have been taken or will be taken to resolve the violation.” (§1.1.28) The definition in current Appendix 4C implied that the Registered Entity would make a determination that a violation had occurred, which is a determination to be made by the Compliance Enforcement Authority.

The definition of Spot Checking has been revised to make it only one sentence. The sentence “Spot Checking may require an on-site review to complete” has been deleted as not appropriately included in a definition. (§1.1.29)

2. Section 2.0 – Identification of Organizations Responsible for Complying with Reliability Standards

The revisions to the first five paragraphs of §2.0 reflect the revised roles of NERC and the Regional Entities in registering entities and maintaining the Compliance Registry. NERC will now be responsible for maintaining the single, consolidated Compliance Registry for the entire Bulk Power System; the Regional Entities will no longer maintain individual regional compliance registries. NERC will register entities based on application of the criteria in the *NERC Statement of Compliance Registry Criteria* (which is being incorporated into the ROP as Appendix 5B) to information on owners, operators, and users of the Bulk Power System gathered and provided by the Regional Entities. In addition, in the event of a registration appeal to NERC or an Applicable Governmental Authority, the Regional Entity will provide information requested by NERC concerning how the Registered Entity meets the registration criteria or is otherwise material to the reliability of the Bulk Power System.

In addition, amended §2.0 specifies that “Organizations are responsible to register and to comply with Reliability Standards if they are owners, operators, and users of the Bulk Power System, perform a function listed in the functional types identified in Section II of Appendix 5B, and are material to the reliable operation of the Bulk Power System as defined by the criteria and notes in Appendix 5B.” This affirmative obligation is consistent with the Commission-approved *Statement of Compliance Registry Criteria*. Amended §2.0 also requires the Registered Entity to inform NERC or the applicable Regional Entity promptly of changes to the Registered Entity’s registration information.

Amended §2.0 provides that NERC will notify organizations of their inclusion on the NERC Compliance Registry, and shall inform the Registered Entity at the time of registration of the Reliability Standards that are applicable to the reliability functions for which the Registered

Entity is registered. Further, NERC will maintain on its website a current listing of Reliability Standards that are applicable to all Registered Entities. NERC will also provide the Commission and other Applicable Governmental Authorities monthly updates to the NERC Compliance Registry.

Section 2.0 has been amended in several places to replace references to “Compliance Enforcement Authority” with “NERC and [or] the applicable [each] Regional Entity,” for greater clarity. Finally, the sixth and final paragraph of §2.0 has been amended to show the term Bulk Power System as a defined term.

3. Section 3.0 – Compliance Monitoring and Enforcement Processes

The initial paragraph of §3.0 has been shortened by deleting the list of the individual compliance monitoring processes.

a. Section 3.1 – Compliance Audits

Section 3.1.1, Compliance Audit Process Steps. In the process step listed in §3.1.1, a reference to “the member” has been changed to “the new audit team member(s)” for greater clarity. The fifth and sixth process steps have been revised to use new defined terms, and the fifth step has also been revised to specify that the Compliance Enforcement Authority will conduct a Preliminary Screen for Possible Violations based on the potential noncompliances identified in the audit report. The process step “The Compliance Enforcement Authority provides the final audit report to the Registered Entity and to NERC” has been moved to be the last step listed in sequence.

Section 3.1.3, Frequency of Compliance Audits. A grammatical error has been corrected.

Section 3.1.4, Scope of Compliance Audits. The existing text (as amended) of §3.1.4 has been captioned as §3.1.4.1, Reliability Standards, and two new subsections with new text have been added. As amended, §3.1.4.1 specifies that a Compliance Audit shall include those Reliability Standards applicable to the Registered Entity that are identified in the NERC Implementation Plan for the current year (rather than for the current and three previous years), may include other Reliability Standards applicable to the Registered Entity that are identified in the Regional Entity's Regional Implementation Plan for the current year, and may include any other Reliability Standards that are applicable to the Registered Entity. The statement "If a Reliability Standard does not require retention of data for the full period of the Compliance Audit, the Compliance Audit will be applicable to the data retention period specified in the Reliability Standard," has been deleted from this subsection and is addressed in the next subsection (§3.1.4.2).

New §3.1.4.2, Period Covered, addresses the time period to be covered in a Compliance Audit, and specifies as follows:

The Registered Entity's data and information should show compliance with the Reliability Standards that are the subject of the Compliance Audit for the period beginning with the day after the prior audit by the Compliance Enforcement Authority ended (or the later of June 18, 2007 or the Registered Entity's date of registration if the Registered Entity has not previously been subject to a Compliance Audit), and ending with the End Date for the Compliance Audit. However, if another Compliance Monitoring and Enforcement process has been conducted with respect to the Registered Entity subsequent to the date that would otherwise be the start of the period, the period covered by the Compliance Audit may, in the Regional Entity's discretion, begin with the completion of that Compliance Monitoring and Enforcement process for those Reliability Standards requirements that were the subject of the Compliance Monitoring and Enforcement process. The End Date will be stated in the Compliance Enforcement Authority's notification of the Compliance Audit issued to the Registered Entity pursuant to Section 3.1.1. The Registered Entity will be expected to demonstrate compliance for the entire period described above. However, if a Reliability Standard specifies a document retention period that does not cover the entire period described above, the Registered Entity will not be

found in noncompliance solely on the basis of the lack of specific information that has rightfully not been retained based on the retention period specified in the Reliability Standard. However, in such cases, the Compliance Enforcement Authority will require the Registered Entity to demonstrate compliance through other means.

The time period to be covered by a Compliance Audit, and in particular the starting date for the coverage period, has been a subject of considerable controversy and confusion among Registered Entities and Regional Entities, and the extensive text that has been added in §3.1.4.2 is intended to bring greater clarity and certainty to this topic. An issue of particular concern in the industry relates to the fact that some Reliability Standards specify document retention periods such as one year, six months, or shorter periods, that are less than the time period since the Registered Entity's last Compliance Audit. While a Registered Entity cannot specifically be faulted for failing to retain documents for a longer period than the document retention period stated in the Reliability Standard, there is a need from a compliance monitoring perspective to be able to verify compliance for the time period since the previous compliance monitoring process took place. The text in §3.1.4.2 is intended to balance these concerns by providing that a Registered Entity will not be found in noncompliance solely on the basis of lack of specific information or documentation that has rightfully not been retained based on the retention period specified in the Reliability Standard, but that the Compliance Enforcement Authority will require the Registered Entity to demonstrate compliance by other means.

Finally, new subsection 3.1.4.3 has been added to specify that a Compliance Audit will include a review of any Mitigation Plans which the Registered Entity has not yet completed, for the purpose of determining whether the Registered Entity is making adequate progress towards completion of the Mitigation Plans.

Section 3.1.5, Conduct of Compliance Audits. Section 3.1.5 has also been separated into several subsections, with subsection 3.1.5.3 comprised of new text.

Subsection 3.1.5.1, Composition of Compliance Audit Teams, specifies that the audit team shall be comprised of staff from the Compliance Enforcement Authority and such other persons as are included in the audit team pursuant to (new) subsection 3.1.5.3, which addresses observers and other participants. Text stating that NERC compliance staff, the Commission, and other regulatory bodies may participate on the audit team has been deleted from this subsection, as this topic is covered in subsection 3.1.5.3. Additionally, a reference to “industry volunteers” as audit team members has been changed to “industry subject matter experts.”

In subsection 3.1.5.2, Requirements for Compliance Audit Team Members, a sentence referring to a transitional matter applicable to Compliance Audits conducted prior to January 1, 2008 has been deleted. Additionally, the fourth point in this subsection has been reorganized to be structurally consistent with the first three points.

Subsection 3.1.5.3 addresses participation in a Compliance Audit by persons other than the audit team of the Regional Entity conducting the audit:

- NERC staff (which may include contractors to NERC) may participate either as observers or as audit team members.
- Members of the Regional Entity’s compliance staff, in addition to the audit team, may participate as observers.
- With permission of the Regional Entity, compliance staff from other Regional Entities may participate as observers or as audit team members.
- Representatives of Applicable Governmental Authorities, including the Commission, to whose reliability jurisdiction the Registered Entity is subject, may participate as observers or as audit team members.
- At the request of the Registered Entity, the Regional Entity may allow representatives of other Registered Entities to attend the audit for educational purposes.

The audit team leader or other staff of the Regional Entity conducting the audit will communicate in advance with observers or other attendees to ensure there are no undue disruptions to the audit, no conflicts of interest, and no other considerations that may be detrimental to the conduct and quality of the audit. The audit team leader will work with proposed observers and attendees to facilitate observation in a less disruptive manner, or to schedule their participation in, observation of, or attendance at another Compliance Audit in which such issues are not presented.

Finally, in subsection 3.1.5.4, Registered Entity Objections to Compliance Audit Team, only a minor grammatical revision has been made to the existing text of Appendix 4C.

Section 3.1.6, Compliance Audit Reports. In the first and third paragraphs of this section, references to “Alleged Violations” have been changed to “evidence of possible noncompliance with Reliability Standards” found by the audit team or to “Possible Violations.” Based on the new progression of steps in the compliance enforcement process in amended Appendix 4C, the Compliance Audit team would not identify “Alleged Violations” but at most “Possible Violations.”

In the second paragraph of this section, revisions have been made to reflect that Bulk Power System is now a defined term in amended Appendix 4C.

The third paragraph of this section specifies that if the final audit report identifies Possible Violations, the audit report, or the portions identifying the Possible Violations, shall not be made public until (i) the Possible Violation is dismissed prior to becoming a Confirmed Violation, (ii) NERC submits a Notice of Penalty to the Commission or other Applicable Governmental Authority, or (iii) the Registered Entity admits to a violation or enters into a settlement agreement.

b. Section 3.2 – Self-Certification

Section 3.2 has been revised, consistent with the new progression of steps in the compliance enforcement process in amended Appendix 4C, to specify that “If the Compliance Enforcement Authority concludes, after completing a Preliminary Screen(s), that there is a Possible Violation of a Reliability Standard, it shall send the Registered Entity a Notice of Possible Violation.” Additionally, a provision stating that “Regional Entities will notify NERC of any Alleged Violations as required by Section 8.0” has been deleted as redundant; the reporting and disclosure requirements are covered in §8.0.

c. Section 3.3 – Spot Checking

Throughout §3.3, revisions have been made for greater clarity, to effect grammatical corrections, and to correctly reflect “Spot Checking” as a defined term. In addition, the final process step for Spot Checking has been revised, consistent with the new progression of steps in the compliance enforcement process in amended Appendix 4C, to specify that “If the Compliance Enforcement Authority concludes, after completing a Preliminary Screen(s), that there is a Possible Violation of a Reliability Standard, it shall send the Registered Entity a Notice of Possible Violation.” Also, a provision stating that “Regional Entities will notify NERC of any Alleged Violations as required by Section 8.0” has been deleted as redundant; the reporting and disclosure requirements are covered in §8.0.

d. Section 3.4 – Compliance Investigations

Revisions have been made throughout §3.4 to reflect that the name of this compliance monitoring process has been changed from “Compliance Violation Investigation” to “Compliance Investigation,” as well as to correctly reflect other defined terms.

In footnote 4, the term “possible violation” has been changed to the non-defined and more generally-applicable term “potential noncompliance,” to avoid confusion with the defined term “Possible Violation.” A similar revision has been made in the first process step listed in §3.4.1 to avoid confusion with the defined term “Possible Violation.”

The sequence of the fifth and sixth process steps in §3.4.1 has been reversed, to reflect that an on-site visit would typically occur after the Registered Entity has provided data or documentation requested by the Compliance Enforcement Authority.

The process step in §3.4.1 specifying that the Registered Entity may be required to support information it provides by a verification or attestation, or produce officers, employees or other authorized representatives to provide testimony, has been revised and expanded to read as follows:

In conducting the Compliance Investigation, the Compliance Enforcement Authority may require the Registered Entity to (i) provide a verification under oath by an officer, employee, attorney or other authorized representative of the Registered Entity attesting to the accuracy, completeness and truth of the Registered Entity’s responses to the Compliance Enforcement Authority’s requests for information; and (ii) produce one or more officers, employees or other authorized representatives of the Registered Entity who are familiar with the matter(s) that are the subject of the Compliance Investigation, to be interviewed or to provide testimony under oath concerning such matters. The Compliance Enforcement Authority shall determine in each case (i) whether representatives of the Registered Entity shall be allowed to be present when an interview is taking place or testimony is being taken, and (ii) whether, and by what method, the interview or testimony shall be recorded; provided, that counsel for the person being interviewed or giving testimony may be present when the interview is being conducted or testimony is being taken (regardless of whether such counsel also represents the Registered Entity).

The last sentence in the above provision is based on the Commission’s conclusions in a previous order concerning the processes for gathering information in a compliance (violation) investigation.³⁸

The next-to-last process step for Compliance Investigations has been revised, consistent with the new progression of steps in the compliance enforcement process in amended Appendix 4C, to specify that “If the Compliance Enforcement Authority concludes, at any time during the Compliance Investigation, and after completing a Preliminary Screen(s), that there is a Possible Violation of a Reliability Standard, it shall send the Registered Entity a Notice of Possible Violation.” Additionally, a process step stating that “Regional Entities will notify NERC of any Alleged Violations as required by Section 8.0” has been deleted as redundant; the reporting and disclosure requirements are covered in §8.0.

e. Section 3.5 – Self Reporting

The final process step for Self-Reporting in §3.5.1 has been revised, consistent with the new progression of steps in the compliance enforcement process in amended Appendix 4C, to specify that “If the Compliance Enforcement Authority concludes, after conducting a Preliminary Screen(s), that there is a Possible Violation of a Reliability Standard, it shall send the Registered Entity a Notice of Possible Violation.” Additionally, a process step stating that “Regional Entities will notify NERC of any Alleged Violations as required by Section 8.0” has been deleted as redundant; the reporting and disclosure requirements are covered in §8.0.

³⁸ *April 19, 2007 Order* at P 71. The Commission there noted that the procedures it was describing, which are now being incorporated into §3.4.1, are similar to the Commission’s own investigative rules at 18 C.F.R. §1b.16(b).

f. Section 3.6 – Periodic Data Submittals

The fifth process step for Periodic Data Submittals in §3.6.1 has been revised to state that if the Compliance Enforcement Authority’s assessment, based on the Periodic Data Submittal, of the Registered Entity’s compliance indicates there may be a Possible Violation, the Registered Entity will be provided an opportunity to comment on the assessment before it is finalized. Additionally, the process step that specified the Compliance Enforcement Authority notifies the Registered Entity of the completion of the assessment has been deleted. Further, the final process step for has been revised, consistent with the new progression of steps in the compliance enforcement process in amended Appendix 4C, to specify that “If the Compliance Enforcement Authority concludes, after conducting a Preliminary Screen(s), that there is a Possible Violation of a Reliability Standard, it shall send the Registered Entity a Notice of Possible Violation.” With these revisions, an assessment that does not indicate any Possible Violations would not be provided to the Registered Entity for comment, nor would the Registered Entity be notified of the results of the assessment.

Finally, a process step stating that “Regional Entities will notify NERC of any Alleged Violations as required by Section 8.0” has been deleted as redundant; the reporting and disclosure requirements are covered in §8.0.

g. Section 3.7 – Exception Reporting

There are no revisions to §3.7.

h. Section 3.8 -- Complaints

The initial paragraph of §3.8 has been revised to state that a Complaint received by a Regional Entity will be reviewed to determine if the Complaint provides sufficient basis for initiating another Compliance Monitoring and Enforcement process (rather than a Compliance

Violation Investigation), as any one of the other compliance monitoring and enforcement processes could be appropriately used to further investigate the matters raised in a Complaint. Similar revisions have been made in the rest of §3.8, §3.8.1 and §3.8.2 to change “Compliance Violation Investigation” to “Compliance Monitoring and Enforcement process.” Additionally, references to “the applicable provisions of Section 3.4” (the section of Appendix 4C pertaining to Compliance Investigation) have been changed to “the applicable provisions of Section 3.0.”

In §3.8.2, Anonymous Complainant Notification Procedure, two references to “possible violation” have been changed to “the information” and “information indicating violations of Reliability Standards,” to avoid confusion with the defined term “Possible Violation.”

4. Section 4.0 – Annual Implementation Plans

There are no revisions to §4.0.

5. Section 5.0 – Enforcement Actions³⁹

Section 5.0 has been extensively revised to present the revised, standardized progression of steps for processing evidence of a potential noncompliance discovered by the Compliance Enforcement Authority (*i.e.*, the Regional Entity or NERC, as applicable) through one of the compliance monitoring processes set forth in §3.0, through to Confirmed Violation stage if applicable.⁴⁰ Although the Regional Entities and NERC have generally been using these process steps, the revisions to §5.0 (along with the accompanying definitions in §1.1) will standardize

³⁹ In the second paragraph of §5.0, a reference to requesting a written determination from “the NERC compliance program officer” concerning a data or information request, has been changed to “NERC director of enforcement,” to reflect the NERC staff member who is now responsible for receiving such requests.

⁴⁰ A sentence has been added to §5.0, before the first subsection, specifying that “The following enforcement process is undertaken by the Compliance Enforcement Authority following identification, through one of the Compliance Monitoring and Enforcement processes set forth in Section 3.0, of evidence of noncompliance with a Reliability Standard by a Registered Entity.”

these process steps, result in the use of consistent terminology, and provide a clear statement of the process steps in Appendix 4C for the benefit of Registered Entities. Under the revised process steps, upon discovery of evidence of a potential noncompliance with a Reliability Standard, the Compliance Enforcement Authority (the Regional Entity or NERC, as applicable) will follow the following process steps:

- Preliminary Screen to determine if there is a Possible Violation. The Preliminary Screen consists of determining whether (i) the entity allegedly involved in the potential noncompliance is a Registered Entity, and (ii) the Reliability Standard requirement to which the potential noncompliance relates is applicable to the entity and is enforceable. The Compliance Enforcement Authority shall maintain records of all Preliminary Screens. (§5.1)
- Issuance of Notice of Possible Violation to the Registered Entity (assuming the Preliminary Screen results in an affirmative determination).⁴¹ The Notice of Possible Violation states that a Possible Violation by the Registered Entity has been identified, provides a brief description of the Possible Violation, including the Reliability Standard requirement(s) and the date(s) involved, and instructs the Registered Entity to retain and preserve all data and records relating to the Possible Violation. At this point the Compliance Enforcement Authority enters the Possible Violation into the NERC compliance reporting and tracking system (thereby reporting it to NERC⁴²); NERC in turn reports the Possible Violation to the NERC BOTCC and to the Commission, on a confidential basis.⁴³ (§5.1)

⁴¹ Although this process step is not included in the current Appendix 4C, the Regional Entities have follow the practice of issuing “initial notices of violation,” “preliminary notices of alleged violation,” and similarly-titled notices to Registered Entities, upon initially identifying a possible violation of a Reliability Standard requirement. Under revised Appendix 4C, such notices will consistently be captioned by the Regional Entities as “Notice of Possible Violation.”

⁴² Entry of the Possible Violation (and, subsequently, the Alleged Violation and the Confirmed Violation) into the NERC compliance violation and tracking system will result in the actual Notices becoming accessible to NERC. Because NERC compliance staff will continuously monitor the compliance reporting and tracking system, the entry of the Possible Violation (as well as the entry of subsequent actions in the enforcement process) into the compliance reporting and tracking system serves to notify NERC of the Regional Entity’s action, and eliminates the need to require the Regional Entity to make a separate report to NERC.

⁴³ The revised process steps will provide a more consistent and more readily identifiable point at which evidence of a possible violation is to be reported to NERC and, in turn, to the Commission. This is discussed further under §8.0, Reporting and Disclosure, below.

- Assessment of the Possible Violation. After issuing the Notice of Possible Violation, the Compliance Enforcement Authority conducts an assessment of the facts and circumstances surrounding the Possible Violation to determine whether evidence exists to indicate the Registered Entity has violated the subject Reliability Standard requirement(s), or whether the Possible Violation should be dismissed. The Compliance Enforcement Authority may consider additional information in performing this assessment. (§5.2)
- Issuance of Notice of Alleged Violation to the Registered Entity. If the Compliance Enforcement Authority determines that evidence exists to indicate the Registered Entity has violated the subject Reliability Standard requirement(s), and the Registered Entity has not yet entered into settlement negotiations, the Compliance Enforcement Authority issues a Notice of Alleged Violation to the Registered Entity.⁴⁴ The Notice of Alleged Violation must include the Compliance Enforcement Authority's proposed penalty or sanction, if any, for the Alleged Violation. Other than the requirement that the proposed penalty or sanction must be included in the Notice, the required contents of the Notice of Alleged Violation (as listed in §5.3) have not been changed. (§5.3)
- Reporting the Alleged Violation to NERC and to the Commission. Upon issuing the Notice of Alleged Violation to the Registered Entity, the Compliance Enforcement Authority will also enter the Alleged Violation into the NERC compliance reporting and tracking system. NERC, in turn, within two business days, will provide a copy of the Notice of Alleged Violation to the Commission and, if the Alleged Violation pertains to a portion of the Bulk Power System over which another Applicable Governmental Authority has jurisdiction, to such other Applicable Governmental Authority.⁴⁵ (§5.3)
- Registered Entity response contesting the Alleged Violation. If the Registered Entity contests the Alleged Violation or the proposed penalty or sanction, it must submit a response explaining its position together with any supporting information and documents. The Compliance Enforcement Authority will schedule a conference with the Registered Entity within 10 business days after receipt of the response. If the Compliance Enforcement Authority and the Registered Entity cannot resolve all issues within 40 days (which may be extended by agreement) following the response,

⁴⁴ The provision postponing issuance of a Notice of Alleged Violation if the Compliance Enforcement Authority and Registered Entities have entered into settlement negotiations has been added because some Registered Entities have expressed a desire not to receive a Notice of Alleged Violation (which may result in reporting and disclosure requirements for the Registered Entity) if they are actively engaged in settlement negotiations.

⁴⁵ The conditional prohibitions on disclosure of non-public U.S. compliance information to another Applicable Governmental Authority and on disclosure of non-public non-U.S. compliance information to the Commission, that are found in §5.1 of current Appendix 4C, are preserved in §5.3 of revised Appendix 4C.

the Registered Entity may request a hearing, or else the Alleged Violation will become a Confirmed Violation. (§5.4)

- Appeal of a Regional Entity Hearing Body decision. If the Registered Entity contests the Alleged Violation and/or proposed penalty or sanction, and requests a hearing, but the Hearing Body rules against the Registered Entity, the Registered Entity may appeal the Hearing Body's decision to NERC in accordance with §409 of the ROP. (§5.7)
- Settlement discussions. The Registered Entity may also request settlement discussions at any time in the process, including prior to issuance of a Notice of Alleged Violation; however, the Compliance Enforcement Authority may decline to engage in or continue settlement negotiations once the Possible Violation or Alleged Violation becomes a Confirmed Violation.⁴⁶ NERC must be notified of and may participate in any settlement negotiations. Any settlement agreement must ensure that the reliability of the Bulk Power System will not be compromised, and that no violation of a Reliability Standards will occur, as the result of the settlement, and must provide for waiver of the Registered Entity's right to further hearing and appeal. The Registered Entity may submit an explanatory statement to be included in the settlement agreement, which shall be subject to the consent of the Compliance Enforcement Authority as part of the negotiated agreement. The settlement agreement may state that the Registered Entity (i) admits, or (ii) does not contest, or (iii) neither admits nor denies the Alleged Violation, but may not state that the Registered Entity denies the Alleged Violation. (§5.6)
- Dismissal. If the Compliance Enforcement Authority dismisses a Possible Violation or Alleged Violation before it becomes a Confirmed Violation, the Compliance Enforcement Authority will issue a Notice of Completion of Enforcement Action to the Registered Entity. (§5.10)
- Issuance of Notice of Confirmed Violation. If the Registered Entity (i) accepts (or fails to respond to) the Notice of Alleged Violation, or (ii) contests the Alleged Violation but fails to request a hearing within the ensuing 40-day period, the Compliance Enforcement Authority will issue a Notice of Confirmed Violation or other enforcement action to the Registered Entity and enter the Confirmed Violation into the NERC compliance reporting and tracking system. The Compliance Enforcement Authority and the Registered Entity may agree in writing to extend the

⁴⁶ The provision has been added specifying that NERC or the Regional Entity may decline to engage in or to continue settlement negotiations when the violation becomes a Confirmed Violation, so that Registered Entities will have a strong incentive to enter into settlement negotiations upon receiving a Notice of Possible Violation or Notice of Confirmed Violation. Further, the objective of expeditiously completing the enforcement process will be defeated if a Registered Entity can do nothing until after a violation reaches the Confirmed Violation stage, and then initiate settlement discussions with the Compliance Enforcement Authority.

- 40-day period. (§§5.3-5.4) The Notice of Confirmed Violation will include a detailed record of the enforcement action, including the facts and circumstances analyzed and the information on which the Compliance Enforcement Authority relied in proposing the penalty or sanction. (§5.8)
- Written statement from the Registered Entity. The Registered Entity will also be notified of its right to submit a written explanatory statement to accompany the Notice of Confirmed Violation. The explanatory statement must include the name, title and signature of an officer, employee, attorney or other authorized representative of the Registered Entity. (§5.4)
 - NERC review of Notice of Confirmed Violation. NERC will review the Notice of Confirmed Violation and use the information in it to prepare a Notice of Penalty. NERC will advise the Regional Entity of any additional detail or further development of factual findings NERC deems necessary before the Notice of Penalty can be issued. If NERC directs the Regional Entity to revise the penalty determination, either the Registered Entity or the Regional Entity compliance staff may reopen the proceedings on any issue on which the penalty was based, irrespective of whether the issues was previously litigated, settled, or unopposed. (§5.8)
 - NERC preparation of Notice of Penalty. NERC will provide a draft Notice of Penalty to the Regional Entity, which in turn will advise the Registered Entity that the Notice of Penalty is pending public filing. NERC will file the Notice of Penalty, along with any written statement provided by the Registered Entity, with the Commission and any other Applicable Governmental Authority no sooner than five business days after NERC approves the Notice of Confirmed Violation or settlement agreement.⁴⁷ The penalty or sanction will be effective upon expiration of the 30 day period after the Notice of Penalty is filed, or such longer period as ordered by the Commission. (§5.9; see also §8.0)
 - Payment due invoice and receipt of payment of penalty. Following Commission approval of, or expiration of the period for action by the Commission on, the Notice of Penalty, the Compliance Enforcement Authority will issue a payment due notice and invoice to the Registered Entity for any penalty, specifying that payment is due 30 days from the date of the notice and invoice. Upon receipt of payment, the Compliance Enforcement Authority will issue a notice confirming payment to the Registered Entity. (§5.10)
 - Notice of Completion of Enforcement Action. After completion by the Registered Entity of all requirements in the Notice of Penalty and any settlement agreement, the

⁴⁷ The conditional prohibitions on disclosure of non-public U.S. compliance information to another Applicable Governmental Authority and on disclosure of non-public non-U.S. compliance information to the Commission, that are found in §5.6 of current Appendix 4C, are preserved in §5.9 of revised Appendix 4C.

Compliance Enforcement Authority will issue a Notice of Completion of Enforcement Action to the Registered Entity, which will include a release of any data retention directives previously issued. Upon issuance of the Notice of Completion of Enforcement Action, the enforcement action is closed. (§5.10)

None of the notices or other issuances or developments throughout the above-described enforcement process are made public except for, and until, the filing and posting of the Notice of Penalty and/or any settlement agreement.

6. Section 6.0 – Mitigation of Violations of Reliability Standards⁴⁸

a. Section 6.1 – Requirement for Submission of Mitigation Plans

Section 6.1 has been revised to specify that in addition to being required to submit a Mitigation Plan upon being found in violation of a Reliability Standard, a Registered Entity may also submit a proposed Mitigation Plan at any other time, including with a Self-Report; or, without admitting it has committed a violation, in response to a Notice of Possible Violation of Notice of Alleged Violation.

b. Section 6.2 – Contents of Mitigation Plans

Section 6.2 has been revised to incorporate use of the terms “Possible Violation,” “Alleged Violation,” and “Confirmed Violation, and to use other defined terms. In addition, a provision has been added to specify that a proposed Mitigation Plan must include “the Registered Entity’s action plan to correct the cause of the Possible, Alleged or Confirmed Violation,” as well as its plan to correct the violation itself.

⁴⁸ In the initial paragraph of §6.0, a reference to requesting a written determination from “the NERC compliance program officer” concerning a data or information request, has been changed to “NERC director of enforcement,” to reflect the NERC staff member who is now responsible for receiving such requests.

c. Section 6.3 – Timetable for Completion of Mitigation Plans

Section 6.3 has been revised to specify that a Mitigation Plan “should encompass actions necessary to prevent a recurring violation of the Reliability Standard requirements underlying the Possible, Alleged or Confirmed Violation(s).”

d. Section 6.4 – Submission of Mitigation Plans

Section 6.4 has been revised to specify that a Registered Entity may submit a Mitigation Plan in response to a Notice of Possible Violation, without being deemed to have admitted the violation or the appropriateness of a penalty or sanction. This section has also been revised to properly use defined terms.

e. Section 6.5 – Review and Acceptance or Rejection of Mitigation Plans

A minor revision for clarity has been made to the first sentence of the first paragraph in §6.5. Additionally, a paragraph has been added to §6.5 to provide for the provisional acceptance of a proposed Mitigation Plan by the Regional Entity before it has completed its review of the facts and circumstances underlying the violation:

If a Registered Entity submits a Mitigation Plan prior to issuance of a Notice of Confirmed Violation or entry into a settlement, such as with a Self-Report or in response to a Notice of Possible Violation, the Regional Entity may provisionally accept the proposed Mitigation Plan. If the Regional Entity subsequently determines, upon completing its assessment of the Possible Violation, that the facts and circumstances are different than those on which the accepted Mitigation Plan was based, the Regional Entity may, by notice to the Registered Entity and to NERC, require the Registered Entity to submit a revised Mitigation Plan that fully addresses the facts and circumstances of the violation. The Regional Entity’s notice shall state the additional or different facts and circumstances that need to be addressed in the revised Mitigation Plan. The Registered Entity shall submit a revised Mitigation Plan in response to the notice within thirty (30) days following the date of the notice, unless the Regional Entity specifies or allows a longer time period. The Registered Entity’s revised Mitigation Plan shall be subject to review and acceptance or rejection by the Regional Entity and by NERC in accordance with this Section 6.5. If the Regional Entity issues a Notice of Confirmed Violation or enters into a settlement with the Registered Entity and does not identify a need to request modifications to the provisionally-accepted Mitigation

Plan based on additional or different facts and circumstances, the Regional Entity shall issue a notice to the Registered Entity, with a copy to NERC, stating that the “provisional” nature of the acceptance is terminated and the acceptance is final. The Regional Entity shall issue such notice within five (5) business days of issuance of the Notice of Confirmed Violation or entry into the settlement.

This provision allows the Regional Entity to provisionally approve a proposed Mitigation Plan before the Regional Entity has completed its investigation or assessment of the noncompliance, so that the Registered Entity can proceed to implement the actions in the Mitigation Plan. Allowing the Registered Entity to proceed to implement its corrective actions as soon as possible, rather than requiring the Registered Entity to wait until the Regional Entity has completed its assessment of the matter, is beneficial to the reliability of the Bulk Power System. However, if the Regional Entity subsequently determines, upon completing its investigation or assessment of the noncompliance, that there are additional or different underlying facts and circumstances that necessitate additional mitigating actions, there needs to be a process by which the Regional Entity can require the Registered Entity to modify or expand the actions in its Mitigation Plan. This new provision in §6.5 provides that process.

Additionally, the last sentence of §6.5 has been revised to specify that NERC will publicly post an approved Mitigation Plan as part of the public posting of the Notice of Penalty in accordance with §8.0 of Appendix 4C or the posting of the settlement in accordance with §5.6.

f. Section 6.6 – Completion/Confirmation of Implementation of Mitigation Plans

In the second paragraph of §6.6, a reference to the Compliance Enforcement Authority verifying that the Registered Entity has completed its Mitigation Plan and is in compliance with the subject Reliability Standard, has been changed to Reliability Standard requirement(s). The provisions of a Mitigation Plan will typically relate to specific requirements of Reliability Standards that were found to have been violated.

g. Section 6.7 -- Recordkeeping

Section 6.7 has been revised to use the new defined terms Notice of Possible Violation and Notice of Alleged Violation.

7. Section 7.0 – Remedial Action Directives

Section 7.0 has been amended to incorporate new defined terms in amended Appendix 4C.

8. Section 8.0 – Reporting and Disclosure

Section 8.0 has been revised to provide that Regional Entities shall report all Possible Violations, Alleged Violations and Confirmed Violations to NERC by promptly entering the item into the NERC compliance reporting and tracking system.⁴⁹ The current version of this provision states, in accordance with previous Commission directives,⁵⁰ that Regional Entities “shall report to NERC . . . any allegations or evidence of violations of Reliability Standards regardless of significance, whether verified or still under investigation, that are received or obtained by the Regional Entity through any means” within specified time periods. Consistent with the revised enforcement process steps based on Possible Violations, Alleged Violations and Confirmed Violations, requiring Regional Entities to submit reports to NERC at the “Possible Violation” stage will standardize this reporting process as well. The Possible Violation stage is the stage at which the Regional Entity first has identified a possible failure by a Registered Entity

⁴⁹ The Regional Entity’s entry of the item into the compliance reporting and tracking system being implemented by NERC and the Regional Entities will immediately provide NERC, electronically, with the relevant Notice. Therefore, it is no longer necessary to specify that a Regional Entity must separately provide NERC with “a copy” of the Notice of Possible Violation, Alleged Violation or Confirmed Violation within a specific time period (*e.g.*, 2 days/48 hours). Upon the Regional Entity entering the item into the compliance reporting and tracking system, NERC will have received the report.

⁵⁰ *See, e.g., April 19, 2007 Order* at PP 200-201, citing 18 C.F.R. §39.7(d).

to comply with a Reliability Standard that is applicable to the Registered Entity, but the Regional Entity has not taken the additional investigative or assessment steps to determine that the matter is an Alleged Violation.⁵¹ The reports are to include information regarding the nature of the Possible Violation, Alleged Violation or Confirmed Violation, the name of the Registered Entity involved, the status of any ongoing review and assessment, the name of a knowledgeable Regional Entity staff person to serve as a contact, and in the case of an Alleged Violation or Confirmed Violation, its potential impact on Bulk Power System Reliability.⁵²

In P 201 of the *April 19, 2007 Order*, the Commission stated that “NERC cannot adequately exercise its oversight of Regional Entity compliance programs unless it receives information on all allegations of violations, and in particular, those for which Regional Entities have declined enforcement action. Nor are we [the Commission] in a position to monitor NERC and the Regional Entities in this regard unless NERC provides us with timely information on all allegations of violation.” Under the revised compliance enforcement process steps in §5.0 of amended Appendix 4C, evidence of potential noncompliance with a Reliability Standard that is identified or obtained by a Regional Entity will become a Possible Violation (resulting in issuance of a Notice of Possible Violation) unless the Regional Entity’s Preliminary Screen shows the potential noncompliance is not a Possible Violation. However, the only grounds on which, as the result of the Preliminary Screen, evidence of a potential noncompliance will not become a Possible Violation, are that (i) the entity involved in the matter is not a Registered

⁵¹ The Regional Entity’s additional review of the matter after a Notice of Possible Violation is issued may result in a determination that no violation has occurred and the matter should be dismissed before reaching the Alleged Violation stage.

⁵² At the Possible Violation stage, before the Regional Entity has conducted an assessment, it is not expected that the Regional Entity would have sufficient information to report the potential impact of the Possible Violation on Bulk Power System reliability.

Entity, (ii) the Reliability Standard requirement to which the evidence relates is not applicable to the entity (*e.g.*, it is applicable to a reliability function for which the Registered Entity is not registered), or (iii) the requirement is not enforceable.⁵³ (*See* §5.1.)

Section 8.0 has also been revised to delete references to submission of required reports in accordance with (current) §403.15, 403.17 and 403.19 of the ROP. Current §403.15 and §403.19 are being deleted, and current §403.17 (renumbered as §403.14) has been revised to refer to Appendix 4C for the filing and reporting requirements. (*See* §IV.B.1 above.)

Text relating to the contents of Confirmed Violations, including the Registered Entity's statement, has been deleted because this subject is covered in §5.0. However, §8.0 has been revised to specify that the Regional Entity shall report a Confirmed Violation to NERC at the same time the Notice of Confirmed Violation is issued to the Registered Entity, and that NERC will publicly post each Notice of Penalty on its Web site, with the identity of the violator, together with any statement submitted by the Registered Entity, when NERC files the Notice of Penalty with the Commission. A provision that "NERC will publish public reports quarterly on its Web site of all Confirmed Violations of Reliability Standards during the quarter just completed, with the identity of the violator," has been deleted as unnecessary, since the individual Notices of Penalty are posted on the web site when filed with the Commission.

Finally, other revisions have been made to §8.0 to incorporate newly defined terms in Appendix 4C.

⁵³ In addition, amended §5.1 requires the Compliance Enforcement Authority to maintain records of all Preliminary Screens, which will allow its determinations (if any) not to issue a Notice of Possible Violation based on a Preliminary Screen to be audited.

9. Section 9.0 – Data Retention and Confidentiality

In §9.2, a reference to “Compliance Violation Investigations” has been changed to the new defined term, “Compliance Investigations.” In §9.3.2, a reference to “industry volunteers” has been changed to “industry subject matter experts,” consistent with revisions made elsewhere in §400 of the ROP and Appendix 4C. In §9.3.3, a reference to §1500 of the ROP has been added in connection with a requirement that critical energy infrastructure information shall be redacted.

10. Attachment 2 – Hearing Procedures

Revisions have been made throughout Attachment 2 in order to consistently capitalize defined terms and to remove capitalization from terms that are not defined terms. These revisions include capitalizing some terms that have become defined terms as the result of the revisions to the text of the Compliance Monitoring and Enforcement Program in Appendix 4C (*e.g.*, “Possible Violation”). In addition, cross-references to sections of the ROP have been revised where necessary due to renumbering of sections in the ROP.

In §1.1.5, Definitions, the definitions of Bulk-Power System, Reliable Operation, and Reliability Standards have been deleted. These terms have been deleted because they are now defined terms in the CMEP pursuant to §1.1 of the CMEP, and therefore do not need to be separately defined in the Hearing Procedures. (Section 1.1.5 specifies that “as used in these Hearing Procedures, definitions in Section 1.1 of the NERC Compliance Monitoring and Enforcement Program shall apply.”)

Section 1.8, Settlement, has been revised as follows:

Settlements may be entered into at any time pursuant to Section 5.6 of the NERC Compliance Monitoring and Enforcement Program and the Compliance Enforcement Authority’s settlement procedures, provided, that the Compliance Enforcement Authority may decline to engage in or continue settlement

negotiations after a Possible Violation or Alleged Violation becomes a Confirmed Violation.

This revision conforms to the revision to §5.6, Settlement Process, of the CMEP (*see* discussion in §IV.E.5 above).

F. Amendment to Appendix 5A to the NERC Rules of Procedure

The NERC *Statement of Compliance Registry Criteria* is being added as an Appendix to the NERC ROP. As a result, current Appendix 5, *Organization Registration and Certification Manual*, is being re-numbered as Appendix 5A. No textual changes are being proposed to the *Organization Registration and Certification Manual* from the current version, other than the re-numbering of Appendix 5 to Appendix 5A. **Attachment 15** is a copy of the *Organization Registration and Certification Manual*, renumbered as Appendix 5A.

G. New Appendix 5B to the NERC Rules of Procedure

The NERC *Statement of Compliance Registry Criteria* is being incorporated into the NERC ROP as Appendix 5B. Incorporation of the *Statement of Compliance Registry Criteria* into the ROP enables provisions in §500 of the ROP on criteria for registration to be deleted, with the result that the registration criteria are stated in one place, Appendix 5B. (*See* §IV.B.2 above.) No textual changes are being proposed from the current version of the *Statement of Compliance Registry Criteria*, Version 5.0, as last approved by the Commission.⁵⁴ Incorporation of the *Statement of Compliance Registry Criteria* into the ROP will not change the process used to revise it; NERC already posts proposed revisions to the *Statement of Compliance Registry Criteria* for a notice and comment period, and then submits the revisions for approval by the

⁵⁴ Version 5.0 of the *Statement of Compliance Registry Criteria* was submitted to the Commission in a compliance filing dated July 31, 2008 in Docket Nos. RC07-4-003, RC07-6-003 and RC07-7-003 (*Compliance Filing of the North American Electric Reliability Corporation in Response to December 20, 2007 Order*) and approved by a Letter Order issued October 16, 2008 in those dockets.

NERC Board of Trustees and then by the Commission. **Attachment 16** is Version 5.0 of the *Statement of Compliance Registry Criteria*, with a cover page added showing it as Appendix 5B to the ROP.

V. CONCLUSION

For the reasons stated in this filing, the North American Electric Reliability Corporation respectfully requests that the Commission, after providing notice and opportunity for public comment in accordance with §215(e)(4) of the FPA and 18 C.F.R. §39.8, issue an order approving the revised pro forma Delegation Agreement (**Attachment 1**) and revised Delegation Agreements between NERC and the eight Regional Entities (**Attachments 2 through 9**).

NERC also respectfully requests that the Commission, after providing notice and opportunity for public comment in accordance with §215(f) of the FPA and 18 C.F.R. §39.10, issue an order approving the proposed amendments to the Bylaws of FRCC (included in Exhibit B to **Attachment 2**) and MRO (**Attachment 10**).

NERC also respectfully requests that the Commission, after providing notice and opportunity for public comment in accordance with §215(f) of the FPA and 18 C.F.R. §39.10, issue an order approving the proposed revisions to Sections 400, 400, 800, 1000, 1100 and 1200 of the NERC ROP (**Attachment 11**), the proposed revisions to Appendices 4A, 4B, 4C and 5A to the ROP (**Attachments 12 through 15**), and proposed new Appendix 5B to the ROP (**Attachment 16**).

Finally, NERC requests that the Commission approve the revised Delegation Agreements and the proposed revisions and additions to the NERC ROP to be effective January 1, 2011.

Respectfully submitted,

Gerald W. Cauley

ATTACHMENT 1A

NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION

REVISED PRO FORMA DELEGATION AGREEMENT

CLEAN VERSION

**AMENDED AND RESTATED DELEGATION AGREEMENT BETWEEN
NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION
AND [REGIONAL ENTITY]**

AMENDED AND RESTATED DELEGATION AGREEMENT (“Agreement”) made as of [January 1, 2011], between the North American Electric Reliability Corporation (“NERC”), an organization certified by the Federal Energy Regulatory Commission (“Commission”) pursuant to Section 215(c) of the Federal Power Act to establish and enforce Reliability Standards for the Bulk-Power System, and [REGIONAL ENTITY], an organization established to develop and enforce Reliability Standards within the geographic boundaries identified on **Exhibit A** to this Agreement, and for other purposes. NERC and [REGIONAL ENTITY] may be individually referred to herein as “Party” or collectively as “Parties.”

WITNESSETH

WHEREAS, Subtitle A of the Electricity Modernization Act of 2005 added Section 215 to the Federal Power Act (16 U.S.C. § 824n) (hereafter “the Act”), which, among other things, provides for the establishment of an electric reliability organization (“ERO”) to develop and enforce Reliability Standards applicable to all owners, operators, and users of the Bulk-Power System;

WHEREAS, the Commission has adopted regulations for the implementation of the Act, which are set forth at Chapter I, Title 18, Code of Federal Regulations, Part 39 (the “ERO Regulations”);

WHEREAS, the Commission has certified NERC as the ERO that will, in accordance with the Act, establish and enforce Reliability Standards for the Bulk-Power System, subject to certain delegation provisions described below;

WHEREAS, the Act recognizes the international interdependency of electric reliability within North America and envisions the ERO and such applicable Regional Entities as international organizations;

WHEREAS, the Act and Section 39.8 of the ERO Regulations provide for the delegation by the ERO of authority to propose and enforce Reliability Standards to regional entities (“Regional Entities”) such as [REGIONAL ENTITY] provided that:

(A) The Regional Entity is governed by —

- (i) an independent board;
- (ii) a balanced stakeholder board; or
- (iii) a combination independent and balanced stakeholder board.

(B) The Regional Entity otherwise satisfies the provisions of Section 215(c)(1) and (2) of the Act; and

(C) The agreement promotes effective and efficient administration of Bulk-Power System reliability;

WHEREAS, certain Regional Entities are organized on an Interconnection-wide basis and are therefore entitled to the presumption set forth in the Act that: “[t]he ERO and the Commission shall rebuttably presume that a proposal for delegation to a Regional Entity organized on an Interconnection-wide basis promotes effective and efficient administration of bulk power system reliability and should be approved”;

WHEREAS, the Act further provides that the ERO shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Reliability Standard or modification to a Reliability Standard to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest;

WHEREAS, [REGIONAL ENTITY] [is/is not] organized on an Interconnection-wide basis and therefore [is/is not] entitled to the rebuttable presumptions accorded such an entity;

WHEREAS, NERC will work through [REGIONAL ENTITY] to carry out certain of its activities in furtherance of its responsibilities as the ERO under the Act;

WHEREAS, NERC has concluded that [REGIONAL ENTITY] meets all requirements of the Act, the ERO Regulations, and the NERC Rules of Procedure as approved by the Commission (“NERC Rules of Procedure”) necessary to qualify for delegation; and

WHEREAS, NERC and [REGIONAL ENTITY], having operated under a predecessor agreement to this Agreement, have negotiated this amended and restated Agreement so as to incorporate the benefits of their mutual experience and lessons learned while operating under the predecessor agreement and thereby provide for the more efficient and effective execution of their respective responsibilities in a transparent manner that is pursuant to Section 215 of the Act and the ERO Regulations;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, NERC and [REGIONAL ENTITY] agree as follows:

1. Definitions. The capitalized terms used in this Agreement shall be defined as set forth in the Act, the ERO Regulations, the NERC Rules of Procedure, or the NERC Glossary of Terms Used in Reliability Standards, or, if not so defined, shall be defined as set forth in this Section 1 or elsewhere in the text of this Agreement:

(a) Breach means (i) the failure of a Party to perform or observe any material term, condition or covenant of the Agreement or (ii) a representation in Section 2 of the Agreement shall have become materially untrue.

(b) Cross-Border Regional Entity means a Regional Entity that encompasses a part of the United States and a part of Canada or Mexico.

(c) Delegated Authority means the authority delegated by NERC to [REGIONAL ENTITY] to propose and enforce Reliability Standards pursuant to the Act and to undertake related activities set forth in this Agreement in furtherance of these delegated functions in accordance with the Act, the ERO Regulations and this Agreement.

2. Representations.

(a) For purposes of its Delegated Authority, [REGIONAL ENTITY] hereby represents and warrants to NERC that:

(i) [REGIONAL ENTITY] is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder. [REGIONAL ENTITY] is governed in accordance with its bylaws by [*select appropriate*: an independent board/a balanced stakeholder board/ a combination independent and balanced stakeholder board]. Pursuant to these bylaws, no two industry sectors can control any [REGIONAL ENTITY] decision and no single industry sector can veto any [REGIONAL ENTITY] decision. The relevant portions of such bylaws are attached hereto in **Exhibit B**¹, and as so attached are in full force and effect. No other such corporate governance documents are binding upon [REGIONAL ENTITY].

(ii) As set forth in **Exhibit C** hereto², [REGIONAL ENTITY] has developed a standards development procedure, which provides the process that [REGIONAL ENTITY] may use to develop Regional Reliability Standards [and Regional Variances, if the regional entity is organized on an Interconnection-wide basis] that are proposed to NERC for adoption.

(iii) As set forth in **Exhibit D** hereto, [REGIONAL ENTITY] has adopted the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure, which provides for the enforcement of Reliability Standards within [REGIONAL ENTITY]'s geographic boundaries as shown on **Exhibit A**.

(b) NERC hereby represents and warrants to [REGIONAL ENTITY] that:

(i) NERC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder; and

(ii) NERC has been certified as the ERO by the Commission pursuant to the Act.

¹ The **Exhibit B** from [REGIONAL ENTITY] shall meet the requirements contained in **Exhibit B** to this Agreement.

² The **Exhibit C** from [REGIONAL ENTITY] shall meet the requirements contained in **Exhibit C** to this Agreement.

3. Covenants.

(a) During the term of this Agreement, [REGIONAL ENTITY] shall maintain and preserve its qualifications for delegation pursuant to the Act and shall not amend its Regional Entity Rules without NERC's approval, which shall not be unreasonably withheld or delayed and which shall, in the case of a Regional Entity organized on an Interconnection-wide basis, be governed by the presumptions provided for in Section 215(d)(2) and (e)(4)(C) of the Act, and be subject to any required Commission approval.

(b) During the term of this Agreement, NERC shall maintain its qualification and status as the ERO pursuant to the Act and, subject to the provisions of Sections 17 and 18 of this Agreement, NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations or programs of [REGIONAL ENTITY] under this Agreement without first obtaining the consent of [REGIONAL ENTITY], which consent shall not be unreasonably withheld or delayed.

(c) During the term of this Agreement, NERC and [REGIONAL ENTITY] shall adhere to and require that all participants in their respective activities under this Agreement follow and comply with the NERC Antitrust Compliance Guidelines.

4. Delegation of Authority.

(a) Based upon the representations, warranties and covenants of [REGIONAL ENTITY] in Sections 2 and 3 above, the corporate governance documents set forth in **Exhibit B**, the standards development process set forth in **Exhibit C**, and the compliance monitoring and enforcement program set forth in **Exhibit D**, NERC hereby delegates authority, pursuant to Section 215(e)(4) of the Act, to [REGIONAL ENTITY] for the purpose of proposing Reliability Standards to NERC, as set forth in Section 5 of this Agreement, and enforcing Reliability Standards, as set forth in Section 6 of this Agreement, within the geographic boundaries and such other scope set forth on **Exhibit A**, *provided*, that [REGIONAL ENTITY] shall not monitor and enforce compliance with Reliability Standards for [REGIONAL ENTITY] or an affiliated entity with respect to reliability functions for which [REGIONAL ENTITY] or an affiliate is a Registered Entity. Any exclusions from this delegation of authority to

[REGIONAL ENTITY] within, or additions to this delegation of authority to [REGIONAL ENTITY] beyond, the geographic boundaries set forth on **Exhibit A** are stated on **Exhibit A**.

(b) In circumstances where [REGIONAL ENTITY] or an affiliated entity is a Registered Entity, [REGIONAL ENTITY] shall enter into an agreement with another Regional Entity or NERC for the other Regional Entity or NERC to monitor and enforce [REGIONAL ENTITY]'s or affiliate's compliance with Reliability Standards. Such agreements are subject to NERC and Commission approval.

(c) Nothing in this Agreement shall prohibit [REGIONAL ENTITY] from entering into an arrangement between one or more other Regional Entities to perform compliance monitoring and enforcement activities outside of its region, on behalf of NERC and/or other Regional Entities, for Registered Entities that have registered functions monitored by more than one Regional Entity, subject to approval by NERC.

(d) For Cross-Border Regional Entities, the authority delegated by this Agreement shall extend only to the portion of the region identified on **Exhibit A** that is within the United States. Any delegation of authority by ERO Governmental Authorities in Canada or Mexico shall be governed by a separate agreement and is outside the scope of this Agreement; provided, however, that both [REGIONAL ENTITY] and NERC shall endeavor to ensure that this Agreement and such separate agreements are compatible.

(e) As a condition to this delegation of authority and subject to the provisions of Section 17 of this Agreement, [REGIONAL ENTITY] shall comply with the applicable provisions of NERC's Certificate of Incorporation, Bylaws, Rules of Procedure, and Reliability Standards, as from time to time adopted, approved, or amended.

5. Development and Proposal of Reliability Standards.

(a) In connection with its Delegated Authority, [REGIONAL ENTITY] shall be entitled to:

(i) propose Reliability Standards, Regional Variances, or modifications thereof to NERC, which shall be considered by NERC through an open and inclusive process for proposing and adopting Reliability Standards that affords [REGIONAL ENTITY] reasonable notice and opportunity to be heard; and

(ii) develop Regional Reliability Standards [and Regional Variances, if Regional Entity is organized on an Interconnection-wide basis] through [REGIONAL ENTITY]'s process as set forth in **Exhibit C**. Proposals approved through [REGIONAL ENTITY]'s process shall be reviewed by the NERC Board after NERC provides notice and an opportunity for interested persons to comment. In the case of a proposal from a Regional Entity organized on an Interconnection-wide basis, comments shall be limited to the factors identified in NERC Rule of Procedure 312.3 as it may be amended from time to time. The NERC Board shall promptly thereafter consider such proposed Regional Reliability Standard or Regional Variance, applying the rebuttable presumption described in subsection 5(b) of this Agreement if the proposed Regional Reliability Standard or Regional Variance is from a Regional Entity organized on an Interconnection-wide basis, and either approve the proposed Regional Reliability Standard or Regional Variance and submit it to the Commission for approval, or disapprove it in writing setting forth its reasons. [REGIONAL ENTITY] may appeal any disapproval of a proposed Regional Reliability Standard or Regional Variance to the Commission.

(b) Pursuant to Section 215(d)(3) of the Act, NERC shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Regional Reliability Standard or Regional Variance or modification thereof to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. Any person challenging such proposal from the Regional Entity organized on an Interconnection-wide basis shall have the burden of proof. NERC shall not find that this presumption has been rebutted except based upon substantial evidence that has been disclosed to, and been subject to comment by, the Interconnection-wide Regional Entity during NERC's review of the proposal.

6. Enforcement of Compliance with Reliability Standards.

(a) In connection with its delegated authority pursuant to this Agreement, [REGIONAL ENTITY] shall enforce Reliability Standards (including Regional Reliability Standards and Regional Variances) within the geographic boundaries set forth, or as otherwise specified, in **Exhibit A** through the compliance monitoring and enforcement program set forth in **Exhibit D**. NERC and [REGIONAL ENTITY] agree that this compliance monitoring and

enforcement program meets all applicable requirements of the Act, Order No. 672 of the Commission, and the ERO Regulations, including, *inter alia*, the requirement for an audit program pursuant to Section 39.7(a) of the ERO Regulations, the assessment of penalties pursuant to Section 39.7(c) through 39.7(g) of the ERO Regulations and the requirements for due process. [REGIONAL ENTITY] may not change its compliance monitoring and enforcement program set forth in **Exhibit D** absent NERC's approval, which shall not be unreasonably withheld or delayed, and the approval of the Commission. Subject to the rights and limitations specified in Sections 17 and 18 of this Agreement, [REGIONAL ENTITY] agrees to comply with the NERC Rules of Procedure, with any directives issued pursuant to Section 8(c) of this Agreement, and with any guidance and directions issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, in implementing this program.

(b) [REGIONAL ENTITY] shall report promptly to NERC any Possible Violation, Alleged Violation, or Confirmed Violation of a Reliability Standard, and its eventual disposition by [REGIONAL ENTITY]. Such report shall include the owner's, operator's, or user's name, which Reliability Standard or Reliability Standards were the subject of the Possible Violation, Alleged Violation, or Confirmed Violation, when the Possible Violation, Alleged Violation, or Confirmed Violation occurred, other pertinent facts including circumstances surrounding the Possible Violation, Alleged Violation, or Confirmed Violation with any known risk to the Bulk-Power System, when the Possible Violation, Alleged Violation, or Confirmed Violation was or will be mitigated, the name of a person knowledgeable about the Possible Violation, Alleged Violation, or Confirmed Violation to serve as a point of contact with the Commission, and any other information required by NERC compliance program procedures. NERC shall promptly forward such report to the Commission. NERC and [REGIONAL ENTITY] shall cooperate in filing such periodic summary reports as the Commission shall from time to time direct on Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards and summary analyses of such Possible Violations, Alleged Violations, and Confirmed Violations.

(c) Each Possible Violation, Alleged Violation, or Confirmed Violation shall be treated as nonpublic unless the matter is filed with the Commission as a Notice of Penalty, or, if disclosure is required, dismissed. The disposition of each Possible Violation, Alleged Violation, or Confirmed Violation that relates to a Cybersecurity Incident or that would

jeopardize the security of the Bulk-Power System if publicly disclosed shall remain nonpublic unless the Commission directs otherwise.

(d) All dispositions by [REGIONAL ENTITY] of Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards shall be reported to NERC for review and, in the case of Confirmed Violations, penalties or sanctions, and settlements, for approval. Following approval of a disposition by NERC, NERC shall file the disposition with the Commission, if required by, and in accordance with, Section 215(e) of the Act and Section 39.7 of the ERO Regulations. NERC shall review [REGIONAL ENTITY]'s dispositions based on the following criteria:

(i) whether the disposition is supported by a sufficient record compiled by [REGIONAL ENTITY] in accordance with the NERC Rules of Procedure, NERC directives and Commission requirements, taking into account the nature of the Possible Violation, Alleged Violation, or Confirmed Violation,

(ii) whether the disposition is consistent with any applicable directives issued pursuant to Section 8(c) of this Agreement, any applicable directions or guidance issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, or other applicable NERC guidance, concerning the Reliability Standards to which the Possible Violation, Alleged Violation, or Confirmed Violation relates,

(iii) if the disposition is a Confirmed Violation or settlement, whether it provides for a penalty or sanction, or a determination of no penalty or sanction, determined in accordance with the NERC Sanction Guidelines, Appendix 4B to the NERC Rules of Procedure, and

(iv) whether the disposition is reasonably consistent with other dispositions by [REGIONAL ENTITY] and by other Regional Entities of Possible Violations, Alleged Violations, and Confirmed Violations involving the same or similar facts and circumstances.

NERC may reject any disposition, with an explanation of why NERC believes the disposition does not meet the above criteria. [REGIONAL ENTITY] may submit a disposition requiring NERC approval that has been rejected by NERC, or a revised disposition following a rejection, directly to the NERC Board Compliance Committee for approval without revising the disposition to address all the grounds on which NERC originally rejected the disposition. The

final approval of [REGIONAL ENTITY]'s disposition of a Possible Violation, Alleged Violation, or Confirmed Violation shall be made by the NERC Board Compliance Committee, provided, that the NERC Board or NERC Board Compliance Committee may, by appropriate resolution, delegate authority for final approval of dispositions of specified categories of Possible Violations, Alleged Violations, or Confirmed Violations to the NERC President.

(e) All appeals of penalties imposed by [REGIONAL ENTITY] as a result of a decision by [REGIONAL ENTITY]'s Hearing Body shall be filed with, heard by and disposed of by, NERC in accordance with the NERC Rules of Procedure.

(f) [REGIONAL ENTITY] shall maintain the capability to conduct investigations of Possible Violations and Alleged Violations of Reliability Standards and to conduct such investigations in a confidential manner.

(g) [REGIONAL ENTITY] shall maintain a program of proactive monitoring and enforcement of compliance with Reliability Standards, in accordance with the NERC Compliance Monitoring and Enforcement Program and the annual NERC Compliance Monitoring and Enforcement Program Implementation Plan.

(h) As part of its compliance monitoring and enforcement program, [REGIONAL ENTITY] shall maintain a conflict of interest policy that assures the integrity and independence of such program, including the integrity and independence of the persons or decision-making bodies making final determinations in compliance enforcement actions under Section 5.0 of the NERC Compliance Monitoring and Enforcement Program. A Regional Entity may have stakeholders lead or participate in its board compliance committee so long as integrity and independence are assured through reasonable and appropriate recusal procedures.

(i) As often as NERC deems necessary, but no less than every five years, NERC shall review [REGIONAL ENTITY]'s compliance monitoring and enforcement program to determine that: (i) the program meets all applicable legal requirements; (ii) actual practices reflect the requirements; and (iii) the program administered pursuant to the Delegated Authority promotes consistent interpretations across North America of Reliability Standards and comparable levels of sanctions and penalties for violations of Reliability Standards constituting comparable levels of threat to reliability of the Bulk-Power System.

7. **Delegation-Related Activities.**

NERC will engage [REGIONAL ENTITY] on its behalf to carry out certain of its activities that are in furtherance of Bulk-Power System reliability and NERC's responsibilities as the ERO under the Act or in support of the Delegated Authority, as specified in the NERC Rules of Procedure and listed on **Exhibit E**. These delegation-related activities shall include, but are not limited to, those described in subsections (a) through (f), each of which shall be considered a statutory activity:

(a) Certification of Bulk-Power System Entities. The NERC Board shall set criteria for certification in accordance with the NERC Rules of Procedure. [REGIONAL ENTITY] shall issue certifications in accordance with the NERC Rules of Procedure.

(b) Registration of owners, operators, and users of the Bulk-Power System as responsible for compliance with requirements of Reliability Standards.

(i) The NERC Board shall develop criteria for registration of owners, operators, and users of the Bulk-Power System as Registered Entities and shall apply the registration criteria to register owners, operators and users of the Bulk-Power System as Registered Entities.

(ii) NERC shall maintain a registration database of Registered Entities, based on data and information provided by [REGIONAL ENTITY] and other Regional Entities. [REGIONAL ENTITY] shall provide timely and accurate information relating to registrations to NERC, on at least a monthly basis, to enable NERC to maintain a registration database that is accurate and up-to-date.

(iii) The NERC Board Compliance Committee shall hear and decide appeals from owners, operators and users of the Bulk-Power System contesting registration, in accordance with the NERC Rules of Procedure. If the NERC Board Compliance Committee upholds the decision to register an owner, operator, or user, NERC shall defend the decision in any subsequent appeal of the decision by the Registered Entity to the Commission.

(c) Reliability Assessment and Performance Analysis. [REGIONAL ENTITY] shall develop assessments of the reliability of the Bulk-Power System, or ensure that data and information are collected, analyzed and provided to NERC in support of the development of reliability assessments, in accordance with the NERC Rules of Procedure. [REGIONAL ENTITY] shall also develop and maintain, and collect data in support of the development and maintenance of, reliability performance metrics and assessments of risks to the Reliable

Operation of the Bulk-Power System, in accordance with the NERC Rules of Procedure and NERC directives. NERC shall develop data-gathering quality control procedures, forms and reporting mechanisms, which shall be used by [REGIONAL ENTITY] and other Regional Entities in carrying out their responsibilities under this subsection (c).

(d) Event Analysis and Reliability Improvement. [REGIONAL ENTITY] shall conduct event analysis pursuant to the NERC Rules of Procedure and applicable governmental regulations. NERC and [REGIONAL ENTITY] shall coordinate event analysis to support the effective and efficient use of their collective resources, consistency in event analysis, and timely delivery of event analysis reports. In collaboration with NERC, [REGIONAL ENTITY] shall disseminate to the electric industry lessons learned and other information obtained or resulting from event analysis.

(e) Training and Education. [REGIONAL ENTITY] may provide training and education to Registered Entities, as it deems necessary, in support of its performance of delegated functions and related activities under this Agreement. NERC may also provide training and education programs to Registered Entities on topics relating to NERC's responsibilities as the ERO.

(f) Situation Awareness and Infrastructure Security.

(i) [REGIONAL ENTITY] shall gather and assess situation awareness information provided by Registered Entities pursuant to the NERC Rules of Procedure and applicable governmental regulations, and shall provide other data, information and assistance to NERC in support of NERC's activities in monitoring present conditions, and responding to events, on the Bulk-Power System

(ii) [REGIONAL ENTITY] shall collaborate with NERC in its efforts to coordinate electric industry activities to promote critical infrastructure protection of the Bulk-Power System in North America.

8. Oversight of Performance of Delegated Functions and Related Activities.

This Section 8 sets forth processes and procedures which the Parties intend shall be used in NERC's oversight of [REGIONAL ENTITY]'s performance of its Delegated Authority and related activities pursuant to this Agreement. It is the intent of NERC and [REGIONAL ENTITY] that matters relating to NERC's oversight of [REGIONAL ENTITY]'s performance of its Delegated Authority and related activities shall be established or resolved by collaboration

between NERC and [REGIONAL ENTITY] and, where applicable, other Regional Entities, to the maximum extent possible, consistent with the construct that NERC and the Regional Entities are operating together in a collaborative manner to carry out the responsibilities of the ERO under Section 215 of the Act and the ERO Regulations.

(a) (i) NERC shall develop, in collaboration with [REGIONAL ENTITY] and other Regional Entities, performance goals, measures and other parameters (including, without limiting the scope of such goals, measures and parameters, financial performance goals, measures and parameters), and performance reports, which shall be used to measure NERC's and [REGIONAL ENTITY]'s performance of their respective functions and related activities. The performance goals, measures and parameters and the form of performance reports shall be approved by the NERC President and shall be made public. [REGIONAL ENTITY] shall provide data, information and reports to NERC, in accordance with established schedules, to enable NERC to calculate [REGIONAL ENTITY]'s performance to the agreed-upon goals, measures and parameters.

(ii) NERC shall use the performance goals, measures and parameters and performance reports to evaluate [REGIONAL ENTITY]'s performance of its delegated functions and related activities and to provide advice and direction to [REGIONAL ENTITY] on performance improvements. The performance goals, measures and other parameters and the values of such goals, measures and parameters, shall be reviewed by NERC, [REGIONAL ENTITY] and the other Regional Entities, revised if appropriate, and made public, on the same timeline as the annual business planning and budgeting process described in Section 9 of this Agreement.

(iii) At the request of the President of NERC, [REGIONAL ENTITY] shall be required to develop, submit for NERC approval, and implement action plans to address areas of its performance that are reasonably determined by NERC, based on analysis of [REGIONAL ENTITY]'s performance against the performance goals, measures and parameters, or performance of specific activities, to be unsatisfactory, *provided*, that prior to requiring [REGIONAL ENTITY] to adopt and implement an action plan or other remedial action, NERC shall issue a notice to [REGIONAL ENTITY] of the need and basis for an action plan or other remedial action and provide an opportunity for [REGIONAL ENTITY] to submit a written response contesting NERC's evaluation of [REGIONAL ENTITY]'s performance and the need

for an action plan. [REGIONAL ENTITY] may request that the President of NERC reconsider the request, and thereafter may request that the NERC Board review and reconsider the request. NERC and [REGIONAL ENTITY] shall work collaboratively as needed in the development and implementation of [REGIONAL ENTITY]'s action plan. A final action plan submitted by [REGIONAL ENTITY] to NERC shall be made public unless the President of NERC makes a written determination that the action plan or specific portions of the plan should be maintained as non-public.

(b) NERC shall make available to [REGIONAL ENTITY] standardized training and education programs, which shall be designed taking into account input from [REGIONAL ENTITY] and other Regional Entities, for [REGIONAL ENTITY] personnel on topics relating to the delegated functions and related activities.

(c) (i) NERC may issue directives to [REGIONAL ENTITY] concerning the manner in which [REGIONAL ENTITY] shall perform its delegated functions and related activities under this Agreement. The NERC Rules of Procedure, or any other ERO Rule requiring approval of the Commission, shall not be considered "directives." NERC shall initiate the development of a directive through a collaborative process with [REGIONAL ENTITY] and, if applicable, other Regional Entities to which the directive will apply. Any directive developed through the collaborative process shall be approved by, and issued under the signature of, the NERC President.

(ii) If after a period of time that is reasonable under the circumstances, NERC and [REGIONAL ENTITY] and, if applicable, other Regional Entities are unable to reach agreement on the contents of the directive, NERC may issue the directive with the approval of and under the signature of the NERC President; *provided*, that before the NERC President issues a directive pursuant to this paragraph (ii), [REGIONAL ENTITY] and, if applicable, other Regional Entities, shall be given a reasonable opportunity to present their positions on, and a suggested alternative version or versions of, the proposed directive to the NERC President.

(iii) Upon issuance of a directive by the NERC President, it shall be binding upon, and shall be complied with by, [REGIONAL ENTITY], subject to reasonable time periods for adoption, implementation, and funding of any necessary resources. Upon request by [REGIONAL ENTITY], the NERC Board (or a committee of the Board to which the Board

delegates appropriate authority) shall review and shall confirm, revise or revoke any directive that was issued by the NERC President without [REGIONAL ENTITY]'s agreement, *provided*, that [REGIONAL ENTITY] shall request such review within thirty (30) days following issuance of the directive by the NERC President unless good cause can be shown for a later request.

(iv) NERC and [REGIONAL ENTITY] and, if applicable, other Regional Entities, shall collaborate in deciding whether a directive (whether issued pursuant to paragraph (ii) or paragraph (iii)) shall be made public. If no agreement is reached by the date of issuance as to whether the directive shall be made public, the NERC President shall decide whether the directive will be made public, *provided*, that is the intent of the Parties that the NERC President shall apply a presumption that directives should be made public, unless the NERC President makes a written determination stating a specific reason for maintaining a particular directive as non-public.

(d) In addition to the issuance of directives pursuant to subsection (c), the NERC Board (or a Board committee to which the Board has delegated authority) may issue guidance or directions as to the manner in which [REGIONAL ENTITY], and, if applicable, other Regional Entities, shall perform delegated functions and related activities. The Board or Board committee shall also establish reasonable time periods for the implementation of any such guidance or directions, taking into account the impact on the reliability of the Bulk-Power System and the need for funding of additional resources. Any such guidance or directions shall be stated in writing and shall be public, unless the Board or Board committee makes a written determination stating a specific reason for maintaining particular guidance or directions as non-public. [REGIONAL ENTITY], either individually or in conjunction with other Regional Entities, may request that the NERC Board or Board committee reconsider or revise the guidance or direction.

(e) NERC shall conduct collaborative reviews with [REGIONAL ENTITY], either individually or in conjunction with one or more other Regional Entities, that provide for the exchange of information on practices, experiences, and lessons learned in the implementation of the delegated functions.

(f) Any audits of [REGIONAL ENTITY] performed by NERC shall be limited to an examination of [REGIONAL ENTITY]'s compliance with this Agreement, NERC's Rules of

Procedure, the Compliance Monitoring and Enforcement Program, Commission requirements, and directives that are in effect pursuant to Section 8(c)

9. **Funding.** [REGIONAL ENTITY] and NERC shall ensure, subject to Commission approval in accordance with the ERO Regulations, that the delegated functions and related activities described in Sections 5, 6 and 7 and listed on **Exhibit E** have reasonable and adequate funding and resources by undertaking the following:

(a) [REGIONAL ENTITY] shall develop, through a collaborative process with NERC, and propose, an annual business plan and budget, in accordance with ERO Regulations, Commission orders and NERC business planning and budgeting policies and instructions. [REGIONAL ENTITY]'s proposed business plan and budget shall describe the activities necessary for, and provide a budget with adequate resources for, [REGIONAL ENTITY] to carry out its Delegated Authority under this Agreement, including the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E**. [REGIONAL ENTITY]'s business plan and budget shall show the funding sources and amounts to fund the proposed budget, including as applicable assessments to end users, penalty monies, and other sources of funds.

(b) [REGIONAL ENTITY] and NERC agree that the portion of [REGIONAL ENTITY]'s approved budget for the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E** that is to be funded by assessments, will be equitably allocated among end users within the geographic boundaries described in **Exhibit A** and recovered through a formula based on Net Energy for Load, or through such other formula as is proposed by [REGIONAL ENTITY] and approved by NERC and the Commission. If [REGIONAL ENTITY] proposes to use a formula other than Net Energy for Load beginning in the following year, [REGIONAL ENTITY] shall submit the proposed formula to NERC in sufficient time that NERC may review and approve the proposed formula and file it with the Commission by May 15 for approval, and the proposed formula shall be effective for the following year if approved by the Commission on or before the date the Commission approves the annual business plan and budget submitted by NERC and [REGIONAL ENTITY] to the Commission pursuant to the ERO Regulations for such year.

(c) NERC shall determine that the assessments to fund the costs for its statutory functions in its Commission-approved budget are first allocated fairly among the

Interconnections and regions according to the applicability of this work to those Interconnections and regions, and then equitably among the end users of the applicable interconnections and regions as appropriate. Allocation on a Net Energy for Load basis will be presumed to satisfy this equitability requirement.

(d) NERC shall provide [REGIONAL ENTITY] with the form or forms for business plan and budget submittal, and any accompanying instructions, in accordance with the schedule for preparation of the business plan and budget developed by NERC and the Regional Entities.

(e) [REGIONAL ENTITY] shall submit its proposed annual business plan and budget for carrying out its Delegated Authority functions and related activities described in Sections 5, 6 and 7 and listed on Exhibit E, as well as for all other activities of [REGIONAL ENTITY], to NERC for review and approval in accordance with the annual schedule for the preparation of business plans and budgets which shall be developed collaboratively by NERC and the Regional Entities, as more fully described in **Exhibit E**.

(f) NERC shall fund [REGIONAL ENTITY]'s performance of its Delegated Authority and related activities in accordance with [REGIONAL ENTITY]'s Commission-approved business plan and budget, in the amount of [REGIONAL ENTITY]'s assessments to end users approved by the Commission. **Exhibit E** sets forth the procedures and timing for billing and collecting [REGIONAL ENTITY]'s approved assessments from end users and other entities and payment of the approved assessment amount to [REGIONAL ENTITY], unless otherwise modified and approved by NERC and the Commission. NERC shall not impose any material obligation or requirement regarding the Delegated Authority upon [REGIONAL ENTITY] that has not been provided for in an approved business plan and budget or an approved amended or supplemental business plan and budget, without [REGIONAL ENTITY]'s consent.

(g) NERC shall develop, in consultation with the Regional Entities, a reasonable and consistent system of accounts, with a level of detail and record keeping comparable to the Commission's Uniform System of Accounts and sufficient to allow the Commission to compare each Commission-approved NERC and [REGIONAL ENTITY] fiscal year budget with the actual results at the NERC and Regional Entity levels. [REGIONAL ENTITY] shall follow NERC's prescribed system of accounts except to the extent that NERC permits a departure from the prescribed system of accounts. NERC shall make an informational filing with the

Commission describing any such waiver it permits and providing an explanation supporting the permitted departure.

(h) [REGIONAL ENTITY] shall submit unaudited quarterly interim financial statements in form provided by NERC no later than 20 days after the end of the fiscal quarter (March 31, June 30, September 30, and December 31).

(i) [REGIONAL ENTITY] shall submit audited financial statements annually, including supporting materials, in a form provided by NERC no later than May 1 of the following year.

(j) **Exhibit E** to this Agreement sets forth the mechanism through which [REGIONAL ENTITY] shall offset penalty monies it receives (other than penalty monies received from an operational function or division or affiliated entity of [REGIONAL ENTITY]) against its next year's annual budget for carrying out functions under this Agreement, and the mechanism by which [REGIONAL ENTITY] shall transmit to NERC any penalty monies received from an operational function or division or affiliated entity of [REGIONAL ENTITY]. *Provided*, that, subject to approval by NERC and the Commission, [REGIONAL ENTITY] may propose and implement an alternative use of penalty monies to that set forth in **Exhibit E**.

10. Assignment. This Agreement may be assigned by either Party only with the prior written consent of the other, which consent shall be granted or withheld in such non-assigning Party's sole discretion, subject to approval by the Commission. Any assignment under this Agreement shall not relieve a Party of its obligations, nor shall a Party's obligations be enlarged, in whole or in part, by reason thereof. [REGIONAL ENTITY] may not delegate in whole or in part its Delegated Authority to any other entity without NERC's express consent; provided, however, that nothing in this provision shall prohibit [REGIONAL ENTITY] from contracting with other entities to assist it in carrying out its Delegated Authority, provided [REGIONAL ENTITY] retains control and responsibility for such Delegated Authority.

11. Default and Cure. Upon a Breach, the non-breaching Party shall give written notice of such Breach to the breaching Party (the "Default Notice"). Subject to a suspension of the following deadlines as specified below, the breaching Party shall have thirty (30) calendar days from receipt of the Default Notice within which to cure such Breach; *provided however*, that if

such Breach is not capable of cure within thirty (30) calendar days, the breaching Party shall commence such cure within thirty (30) calendar days after notice and continuously and diligently complete such cure within ninety (90) calendar days from receipt of the Default Notice; and, if cured within such time, the Breach specified in such notice shall cease to exist. Subject to the limitation specified in the following sentence, if a Breach is not cured as provided in this Section 11, or if a Breach is not capable of being cured within the period provided for herein, the nonbreaching Party shall have the right to declare a default and terminate this Agreement by written notice at any time until cure occurs, and be relieved of any further obligation hereunder. The deadlines for cure and the right to declare a default and terminate this Agreement shall be suspended during the pendency of any efforts or proceedings in accordance with Section 18 of this Agreement to resolve a dispute as to whether a Breach has occurred or been cured. The provisions of this Section 11 will survive termination of this Agreement.

12. Term and Termination.

(a) This Agreement shall become effective on [January 1, 2011] (the “Effective Date”).

(b) The term of the Agreement shall be five (5) years from the Effective Date, prior to which time NERC shall conduct an audit pursuant to subsection 6(i) to ensure that [REGIONAL ENTITY] continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. If [REGIONAL ENTITY] meets such requirements, this Agreement may be renewed for another five (5) year term. This Agreement may be renewed for successive additional five (5) year renewal terms provided that prior to the end of each renewal term, NERC shall conduct an audit pursuant to subsection 6(i) to ensure that [REGIONAL ENTITY] continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. Provided, that either Party may terminate this Agreement as of the end of a term by giving written notice to terminate at least one (1) year prior to the end of the term. If this Agreement is not renewed or becomes subject to termination for any reason, the Parties shall work to provide for a transition of [REGIONAL ENTITY]’s Delegated Authority to NERC or to another eligible entity and to provide for the resolution of any wind-up costs associated with termination of this Agreement. The termination of this Agreement shall not take effect until such transition has been effected, unless the

transition period exceeds one year, at which time [REGIONAL ENTITY] may unilaterally terminate.

(c) If any provision of this Agreement, or the application thereof to any person, entity or circumstance, is held by a court or regulatory authority of competent jurisdiction to be invalid, void, or unenforceable, or if a modification or condition to this Agreement is imposed by a regulatory authority exercising jurisdiction over this Agreement, the Parties shall endeavor in good faith to negotiate such amendment or amendments to this Agreement as will restore the relative benefits and obligations of the signatories under this Agreement immediately prior to such holding, modification or condition. If either Party finds such holding, modification or condition unacceptable and the Parties are unable to renegotiate a mutually acceptable resolution, either Party may unilaterally terminate this Agreement. Such termination shall be effective one year following written notice by either Party to the other Party and to the Commission, or at such other time as may be mutually agreed by [REGIONAL ENTITY] and NERC.

(d) Notwithstanding any termination of this Agreement, provisions contained in Limitation of Liability (Section 13), No Third Party Beneficiaries (Section 14) and Confidentiality (Section 15) shall survive this Agreement in accordance with their terms until sixty (60) days following the expiration of any applicable statute of limitations.

13. Limitation of Liability. [REGIONAL ENTITY] and NERC agree not to sue each other or their directors, officers, employees, and persons serving on their committees and subgroups based on any act or omission of any of the foregoing in the performance of duties pursuant to this Agreement or in conducting activities under the authority of Section 215 of the Act, other than seeking a review of such action or inaction by the Commission. NERC and [REGIONAL ENTITY] shall not be liable to one another for any damages whatsoever, including without limitation, direct, indirect, incidental, special, multiple, consequential (including attorneys' fees and litigation costs), exemplary, or punitive damages arising out of or resulting from any act or omission associated with the performance of the [REGIONAL ENTITY]'s or NERC's responsibilities under this Agreement or in conducting activities under the authority of Section 215 of the Act, except to the extent that the [REGIONAL ENTITY] or NERC is found liable for gross negligence or intentional misconduct, in which case [REGIONAL ENTITY] or NERC

shall not be liable for any indirect, incidental, special, multiple, consequential (including without limitation attorneys' fees and litigation costs), exemplary, or punitive damages.

14. No Third Party Beneficiaries. Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to, or any liability to, any third party.

15. Confidentiality. During the course of the Parties' performance under this Agreement, a Party may receive Confidential Information, as defined in Section 1500 of NERC's Rules of Procedure. Except as set forth herein, the Parties agree to keep in confidence and not to copy, disclose, or distribute any Confidential Information or any part thereof, without the prior written permission of the issuing Party, unless disclosure is required by subpoena, law, or other directive of a court, administrative agency, or arbitration panel, in which event the recipient hereby agrees to provide the Party that provided the Confidential Information with prompt notice of such request or requirement in order to enable such issuing Party to (a) seek an appropriate protective order or other remedy, (b) consult with the recipient with respect to taking steps to resist or narrow the scope of such request or legal process, or (c) waive compliance, in whole or in part, with the terms of this Section. In the event a protective order or other remedy is not obtained or the issuing Party waives compliance with the provisions, the recipient agrees to furnish only that portion of the Confidential Information which the recipient's counsel advises is legally required and to exercise best efforts to obtain assurance that confidential treatment will be accorded to such Confidential Information. In addition, each Party shall ensure that its officers, trustees, directors, employees, subcontractors and subcontractors' employees, and agents to whom Confidential Information is exposed are under obligations of confidentiality that are at least as restrictive as those contained herein. This confidentiality provision does not prohibit reporting and disclosure as directed by NERC, as set forth in Section 6 of this Agreement.

16. Amendment. Neither this Agreement nor any of the terms hereof, may be amended unless such amendment is made in writing, signed by the Parties, and filed with and approved by the Commission.

17. Amendments to the NERC Rules of Procedure. NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations, or programs of [REGIONAL ENTITY] under this Agreement without first obtaining the consent of [REGIONAL ENTITY], which consent shall not be unreasonably withheld or delayed. To the extent [REGIONAL ENTITY] does not consent, NERC shall have the right to invoke the dispute resolution provisions of Section 18 and, if such effort fails to resolve the dispute, to petition the Commission to adopt the amendment to the NERC Rules of Procedure. To the extent that the Commission issues an order amending or materially affecting the rights or obligations of [REGIONAL ENTITY] under this Agreement, [REGIONAL ENTITY] shall have the option, exercisable no later than 60 days after issuance of such order, to terminate this Agreement. Such termination shall be effective one year following written notice by [REGIONAL ENTITY] to NERC and the Commission, or at such other time as may be mutually agreed by [REGIONAL ENTITY] and NERC.

18. Dispute Resolution. In the event a dispute arises under this Agreement between NERC and [REGIONAL ENTITY] (including disputes relating to NERC's performance of its obligations under this Agreement and/or disputes relating to [REGIONAL ENTITY]'s performance of its obligations under this Agreement) which cannot be resolved through discussions between representatives of the Parties in the normal course of operations, the Parties shall use the following procedures ("Dispute Resolution") to attempt to resolve the dispute. [REGIONAL ENTITY] shall not suspend performance of any delegated function, and the Parties shall continue to make reasonable, good faith efforts to comply with their obligations under this Agreement, during the pendency of Dispute Resolution. All notices required to be sent pursuant to this Dispute Resolution procedure shall be sent in accordance with Section 19 of this Agreement. This Dispute Resolution procedure is separate from and in addition to all other processes provided for in this Agreement.

(a) The Party invoking Dispute Resolution shall send a notice to the other Party describing the dispute, stating the invoking Party's position with respect to the dispute, stating that the Party is invoking Dispute Resolution, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the invoking Party.

(b) Within three (3) business days after receipt of the notice invoking Dispute Resolution, the receiving Party shall send a notice to the invoking Party acknowledging receipt of the notice invoking Dispute Resolution, stating the receiving Party's position with respect to the dispute, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the receiving Party.

(c) During the period commencing three (3) business days and ending twenty (20) business days after the date of the receiving Party's notice, the designated representatives shall engage in good faith negotiations to attempt to resolve the dispute, *provided*, that the designated representatives may agree prior to the end of such twenty (20) business day period that the process should move to the next step of Dispute Resolution.

(d) If the designated representatives are unable to arrive at a resolution of the dispute by the end of the time period described in subsection (c), they shall notify the chief executive officers of their respective Parties. The chief executive officers of the Parties shall thereafter engage in good faith negotiations to attempt to resolve the dispute during the period of twenty (20) business days immediately following the time period described in subsection (c), *provided*, that the chief executive officers may agree prior to the end of such twenty (20) business day period that negotiations are at impasse and the process may move to the next step as described in subsection (f). Upon mutual agreement of the Parties, the twenty (20) business day period may be extended to pursue ongoing good faith negotiations.

(e) If a resolution of the dispute is achieved by the Parties, it shall be memorialized in a writing that is acceptable in form and substance to each party and is signed by the designated representative or chief executive officer on behalf of each Party.

(f) If the Parties are unable to resolve the dispute pursuant to the process described in subsections (a) through (e), then either Party may invoke any other available dispute resolution mechanism, including, without limitation, filing a complaint or petition with the Commission requesting resolution of the dispute by the Commission, or filing a complaint for relief in a court having jurisdiction over Parties and the subject matter of the dispute in accordance with Section 20. *Provided, however*, that: (i) it is the intent of the Parties that unresolved disputes shall be presented to and resolved by the Commission if the Commission has and accepts jurisdiction over the subject matter of the dispute, (ii) the Parties may, by mutual agreement, attempt to

resolve the dispute through arbitration, mediation, or other process involving resort to an impartial neutral, and (iii) it is the intent of the Parties that resolution of disputes through Commission proceedings, arbitration, mediation, or other use of an impartial neutral, is preferred over resort to judicial proceedings.

(g) This Section 18 shall not apply to compliance enforcement actions against individual Registered Entities.

19. Notice. Whether expressly so stated or not, all notices, demands, requests, and other communications required or permitted by or provided for in this Agreement shall be given in writing to a Party at the address set forth below, or at such other address as a Party shall designate for itself in writing in accordance with this Section, and shall be delivered by hand or reputable overnight courier:

If to NERC:

20. Governing Law. When not in conflict with or preempted by federal law, this Agreement will be governed by and construed in accordance with the laws of New Jersey without giving effect to the conflict of law principles thereof. The Parties recognize and agree not to contest the exclusive or primary jurisdiction of the Commission to interpret and apply this Agreement; provided however that if the Commission declines to exercise or is precluded from exercising jurisdiction of any action arising out of or concerning this Agreement, such action shall be brought in any state or federal court of competent jurisdiction in New Jersey. All Parties hereby consent to the jurisdiction of any state or federal court of competent jurisdiction in New Jersey for the purpose of hearing and determining any action not heard and determined by the Commission.

21. **Headings.** The headings and captions in this Agreement are for convenience of reference only and shall not define, limit, or otherwise affect any of the terms or provisions hereof.
22. **Savings Clause.** Nothing in this Agreement shall be construed to preempt or limit any authority that [REGIONAL ENTITY] may have to adopt reliability requirements or take other actions to maintain reliability of the Bulk-Power System within the geographic boundaries described in **Exhibit A** that are outside the Delegated Authority, as long as such reliability requirements and actions are not inconsistent with Reliability Standards applicable to the region described in **Exhibit A** and do not result in a lessening of reliability outside the region described in **Exhibit A**.
23. **Entire Agreement.** This Agreement constitutes the entire agreement, and supersedes all prior agreements and understandings, both written and oral, among the parties with respect to the subject matter of this Agreement.
24. **Execution of Counterparts.** This Agreement may be executed in counterparts and each shall have the same force and effect as the original.

NOW THEREFORE, the parties have caused this Agreement to be executed by its duly authorized representatives, effective as of the Effective Date.

NORTH AMERICAN
ELECTRIC RELIABILITY CORPORATION

[REGIONAL ENTITY]

By: _____

By: _____

Name: _____

Name: _____

Title: _____

Title: _____

Date: _____

Date: _____

Exhibit A — Regional Boundaries

Exhibit A to the delegation agreement for each Regional Entity receiving Delegated Authority shall describe the geographic or electrical boundaries covered by the proposed delegation of authority. **Exhibit A** for each Regional Entity shall reflect coordination with neighboring Regional Entities, as appropriate, to ensure that all relevant areas are either included within the geographic boundaries of a Regional Entity or specifically identified as not being within the geographic boundaries of any Regional Entity. Any exclusions of geographic or electrical areas or of Registered Entities from the scope of the Regional Entity's Delegated Authority within the geographic or electrical boundaries shown on **Exhibit A**, and any additions of geographic or electrical areas or of Registered Entities located outside the boundaries shown on **Exhibit A** to the scope of the Regional Entity's Delegated Authority, shall be specifically stated or described in **Exhibit A**.

Exhibit B – Governance

Exhibit B shall set forth the Regional Entity’s bylaws, which NERC agrees demonstrate that the Regional Entity meets the following criteria:

CRITERION 1: The Regional Entity shall be governed by an independent board, a balanced stakeholder board, or a combination independent and balanced stakeholder board. (Federal Power Act § 215(e)(4)(A), 18 C.F.R. § 39.8(c)(1), Order No. 672 at ¶ 727.)

CRITERION 2: The Regional Entity has established rules that assure its independence of the users and owners and operators of the bulk power system, while assuring fair stakeholder representation in the selection of its directors. Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 699, 700.)

CRITERION 3: If the Regional Entity has members, the Regional Entity has established rules that assure that its membership is open, that it charges no more than a nominal membership fee and agrees to waive the fee for good cause shown, and that membership is not a condition for participating in the development of or voting on proposed Regional Reliability Standards. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 170-173.)

CRITERION 4: The Regional Entity has established rules that assure balance in its decision-making committees and subordinate organizational structures and assure no two industry sectors can control any action and no one industry sector can veto any action. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶ 728.)

CRITERION 5: The Regional Entity has established rules that provide reasonable notice and opportunity for public comment, due process, openness, and balance of interests in exercising its duties. (Federal Power Act § 215(c)(2)(D) and (e)(4), 18 C.F.R. § 39.8(c)(2).)

Exhibit C – Regional Standard Development Procedure

Exhibit C shall set forth the Regional Entity’s standards development procedure, which NERC agrees meets the following common attributes:

COMMON ATTRIBUTE 1

Proposed regional reliability standards shall be subject to approval by NERC, as the electric reliability organization, and by FERC before becoming mandatory and enforceable under Section 215 of the FPA [add reference to any applicable authorities in Canada and Mexico]. No regional reliability standard shall be effective within the [Regional Entity Name] area unless filed by NERC with FERC [and applicable authorities in Canada and Mexico] and approved by FERC [and applicable authorities in Canada and Mexico].

COMMON ATTRIBUTE 2

[Regional Entity Name] regional reliability standards shall provide for as much uniformity as possible with reliability standards across the interconnected bulk power system of the North American continent. A [Regional Entity Name] reliability standard shall be more stringent than a continent-wide reliability standard, including a regional difference that addresses matters that the continent-wide reliability standard does not, or shall be a regional difference necessitated by a physical difference in the bulk power system. A regional reliability standard that satisfies the statutory and regulatory criteria for approval of proposed North American reliability standards, and that is more stringent than a continent-wide reliability standard, would generally be acceptable.

COMMON ATTRIBUTE 3

[Regional Entity Name] regional reliability standards, when approved by FERC [add applicable authorities in Canada], shall be made part of the body of NERC reliability standards and shall be enforced upon all applicable bulk power system owners, operators, and users within the [Regional Entity Name] area, regardless of membership in the region.

COMMON ATTRIBUTE 4

Requester — The requester is the sponsor of the regional reliability standard request and may assist in the development of the standard. Any member of [Regional Entity Name], or group within [Regional Entity Name] shall be allowed to request that a regional reliability standard be developed, modified, or withdrawn. Additionally, any entity (person, organization, company, government agency, individual, etc.) that is directly and materially affected by the reliability of the bulk power system in the [Regional Entity Name] area shall be allowed to request a regional reliability standard be developed, modified, or withdrawn.

COMMON ATTRIBUTE 5

[Standards or other named] committee — The [Regional Entity Name] [standards] committee manages the standards development process. The [standards] committee will consider which requests for new or revised standards shall be assigned for development (or existing standards considered for deletion). The [standards] committee will advise the [Regional Entity Name] board on standards presented for adoption.

COMMON ATTRIBUTE 6

[Alternative 6A: For a Regional Entity that chooses to vote using a balanced stakeholder committee.]

The [standards] committee is a balanced stakeholder committee, inclusive of all stakeholder interests that provide for or are materially impacted by the reliability of the bulk power system. [The [standards] committee votes to approve standards.] See Appendix A for the representation model of the [standards] committee.

[Alternative 6B: For a Regional Entity that chooses to vote using a balanced ballot body of stakeholders.]

[Registered ballot body] — The registered ballot body comprises all entities or individuals that qualify for one of the stakeholder segments; are registered with [Regional Entity Name] as potential ballot participants in the voting on standards; and are current with any designated fees. Each member of the registered ballot body is eligible to vote on standards. [Each standard action has its own ballot pool formed of interested members of the registered ballot body. Each ballot pool comprises those members of the registered ballot body that respond to a pre-ballot survey for that particular standard action indicating their desire to participate in such a ballot pool.] The representation model of the registered ballot body is provided in Appendix A.]

COMMON ATTRIBUTE 7

[Regional Entity Name] will coordinate with NERC such that the acknowledgement of receipt of a standard request identified in step 1, notice of comment posting period identified in step 4, and notice for vote identified in step 5 below are concurrently posted on both the [Regional Entity Name] and NERC websites.

COMMON ATTRIBUTE 8

An acceptable standard request shall contain a description of the proposed regional reliability standard subject matter containing sufficiently descriptive detail to clearly define the purpose, scope, impacted parties, and other relevant information of the proposed standard.

COMMON ATTRIBUTE 9

Within [no greater than 60] days of receipt of a completed standard request, the [standards] committee shall determine the disposition of the standard request.

COMMON ATTRIBUTE 10

The [standards] committee may take one of the following actions:

- Accept the standard request as a candidate for development of a new standard, revision of an existing standard, or deletion of an existing standard. The [standards] committee may, at its discretion, expand or narrow the scope of the standard request under consideration. The [standards] committee shall prioritize the development of standard in relation to other proposed standards, as may be required based on the volume of requests and resources.
- Reject the standard request. If the [standards] committee rejects a standard request, a written explanation for rejection will be delivered to the requester within [no greater than 30] days of the decision.
- Remand the standard request back to the requester for additional work. The standards process manager will make reasonable efforts to assist the requester in addressing the deficiencies identified by the [standards] committee. The requester may then resubmit the modified standard request using the process above. The requester may choose to withdraw the standard request from further consideration prior to acceptance by the [standards] committee.

COMMON ATTRIBUTE 11

Any standard request that is accepted by the [standards] committee for development of a standard (or modification or deletion of an existing standard) shall be posted for public viewing on the [Regional Entity Name] website within [no greater than 30] days of acceptance by the committee.

COMMON ATTRIBUTE 12

The standards process manager shall submit the proposed members of the drafting team to the [standards] committee. The [standards] committee shall approve the drafting team membership within 60 days of accepting a standard request for development, modifying the recommendations of the standards process manager as the committee deems appropriate, and assign development of the proposed standard to the drafting team.

COMMON ATTRIBUTE 13

At the direction from the [standards] committee, the standards process manager shall facilitate the posting of the draft standard on the [Regional Entity Name] website, along with a draft implementation plan and supporting documents, for a no less than a [30]-day comment period. The standards process manager shall provide notice to [Regional Entity Name] stakeholders and other potentially interested entities, both within and outside of the [Regional Entity Name] area, of the posting using communication procedures then currently in effect or by other means as deemed appropriate.

COMMON ATTRIBUTE 14

The drafting team shall prepare a summary of the comments received and the changes made to the proposed standard as a result of these comments. The drafting team shall summarize comments that were rejected by the drafting team and the reason(s) that these comments were rejected, in part or whole. The summary, along with a response to each comment received will be posted on the [Regional Entity Name] website no later than the next posting of the proposed standard.

COMMON ATTRIBUTE 15

Upon recommendation of the drafting team, and if the [standards] committee concurs that all of the requirements for development of the standard have been met, the standards process manager shall post the proposed standard and implementation plan for ballot and shall announce the vote to approve the standard, including when the vote will be conducted and the method for voting. Once the notice for a vote has been issued, no substantive modifications may be made to the proposed standard unless the revisions are posted and a new notice of the vote is issued.

COMMON ATTRIBUTE 16

The standards process manager shall schedule a vote by the [Regional Entity Name] [registered ballot body/[standards] committee]. The vote shall commence no sooner than [15] days and no later than [30] days following the issuance of the notice for the vote.

COMMON ATTRIBUTE 17

[Alternative 17A: For an RE that chooses to vote using a balanced stakeholder committee.]

The [standards] committee shall give due consideration to the work of the drafting team, as well as the comments of stakeholders and minority objections, in approving a proposed regional reliability standard for submittal to the [Regional Entity Name] board. The [standards]

committee may vote to approve or not approve the standard. Alternatively, the [standards] committee may remand the standard to the drafting team for further work or form a new drafting team for that purpose.

[Alternative 17B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

The [Regional Entity Name] registered ballot body shall be able to vote on the proposed standard during a period of [not less than 10] days.

COMMON ATTRIBUTE 18

[Alternative 18A: For an RE that chooses to vote using a balanced stakeholder committee.]

The [standards] committee may not itself modify the standard without issuing a new notice to stakeholders regarding a vote of the modified standard.

[Alternative 18B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

All members of [Regional Entity Name] are eligible to participate in voting on proposed new standards, standard revisions or standard deletions. [Alternatively: Each standard action requires formation of a ballot pool of interested members of the registered ballot body.]

COMMON ATTRIBUTE 19

[Alternative 19A: For an RE that chooses to vote using a balanced stakeholder committee.]

Actions by the committee shall be recorded in the regular minutes of the committee.

[Alternative 19B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

Approval of the proposed regional reliability standard shall require a [two thirds] majority in the affirmative (affirmative votes divided by the sum of affirmative and negative votes). Abstentions and non-responses shall not count toward the results, except that abstentions may be used in the determination of a quorum. A quorum shall mean [XX%] of the members of the [registered ballot body/ballot pool] submitted a ballot.

COMMON ATTRIBUTE 20

Under no circumstances may the board substantively modify the proposed regional reliability standard.

COMMON ATTRIBUTE 21

Once a regional reliability standard is approved by the board, the standard will be submitted to NERC for approval and filing with FERC [and applicable authorities in Canada and Mexico.]

COMMON ATTRIBUTE 22

- **Open** - Participation in the development of a regional reliability standard shall be open to all organizations that are directly and materially affected by the [Regional Entity Name] bulk power system reliability. There shall be no undue financial barriers to participation. Participation shall not be conditioned upon membership in [Regional Entity Name], and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements. Meetings of drafting teams shall be open to the [Regional Entity Name] members and others.

COMMON ATTRIBUTE 23

- **Balanced** - The [Regional Entity Name] standards development process strives to have an appropriate balance of interests and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter.

COMMON ATTRIBUTE 24

- **Inclusive** — Any entity (person, organization, company, government agency, individual, etc.) with a direct and material interest in the bulk power system in the [Regional Entity Name] area shall have a right to participate by: a) expressing a position and its basis, b) having that position considered, and c) having the right to appeal.

COMMON ATTRIBUTE 25

- **Fair due process** — The regional reliability standards development procedure shall provide for reasonable notice and opportunity for public comment. At a minimum, the procedure shall include public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of interested stakeholders.

COMMON ATTRIBUTE 26

- **Transparent** — All actions material to the development of regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the regional entity's Web site.

COMMON ATTRIBUTE 27

- Does not unnecessarily delay development of the proposed reliability standard.

COMMON ATTRIBUTE 28

Each standard shall enable or support one or more of the reliability principles, thereby ensuring that each standard serves a purpose in support of the reliability of the regional bulk power system. Each standard shall also be consistent with all of the reliability principles, thereby ensuring that no standard undermines reliability through an unintended consequence.

COMMON ATTRIBUTE 29

While reliability standards are intended to promote reliability, they must at the same time accommodate competitive electricity markets. Reliability is a necessity for electricity markets, and robust electricity markets can support reliability. Recognizing that bulk power system reliability and electricity markets are inseparable and mutually interdependent, all regional reliability standards shall be consistent with NERC's market interface principles. Consideration of the market interface principles is intended to ensure that standards are written such that they achieve their reliability objective without causing undue restrictions or adverse impacts on competitive electricity markets.

COMMON ATTRIBUTE 30

To ensure uniformity of regional reliability standards, a regional reliability standard shall consist of the elements identified in this section of the procedure. These elements are intended to apply a systematic discipline in the development and revision of standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

COMMON ATTRIBUTE 31

All mandatory requirements of a regional reliability standard shall be within the standard. Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself.

COMMON ATTRIBUTE 32

Applicability	<p>Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions.</p> <p>If not applicable to the entire [Regional Entity Name] area, then a clear identification of the portion of the bulk power system to which the standard applies. Any limitation on the applicability of the standard based on electric facility requirements should be described.</p>
----------------------	---

COMMON ATTRIBUTE 33

Measure(s)	<p>Each requirement shall be addressed by one or more measures. Measures are used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure will identify to whom the measure applies and the expected level of performance or outcomes required demonstrating compliance. Each measure shall be tangible, practical, and as objective as is practical. It is important to realize that measures are proxies to assess required performance or outcomes. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.</p>
-------------------	---

COMMON ATTRIBUTE 34

Compliance Monitoring Process	<p>Defines for each measure:</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible for providing the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes. • The entity that is responsible for evaluating data or
--------------------------------------	---

	<p>information to assess performance or outcomes.</p> <ul style="list-style-type: none">• The time period in which performance or outcomes is measured, evaluated, and then reset.• Measurement data retention requirements and assignment of responsibility for data archiving.

EXHIBIT D – COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

1.0 REGIONAL COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

[**REGIONAL ENTITY**] will implement the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure (which for purposes of this section 1.0 shall not include Attachment 2, Hearing Procedures), to monitor and enforce compliance with Reliability Standards by the owners, operators, and users within [**REGIONAL ENTITY**]'s geographic or electrical boundaries, and such other scope, set forth on **Exhibit A** of this Agreement.

2.0 REGIONAL HEARING OF COMPLIANCE MATTERS

[**REGIONAL ENTITY**] shall establish and maintain a hearing body with authority to conduct and render decisions in compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan, which shall be either [**REGIONAL ENTITY**]'s board or a balanced compliance panel reporting directly to [**REGIONAL ENTITY**]'s board. [**REGIONAL ENTITY**]'s hearing body is [its board] [if not the board, insert the name of the committee or group serving as the hearing body].

[If the hearing body is a compliance panel other than the board, provide here a description of how the members of the compliance panel are selected and the qualifications to be selected for the compliance panel.]

[**REGIONAL ENTITY**] shall conduct all compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, proposed Mitigation Plan, or a proposed Remedial Action Directive, in accordance with Attachment 2, Hearing Procedures, to the NERC Compliance Monitoring and Enforcement Program, subject to the following deviations, if any: [Describe any deviations, or state "None". If there are deviations from the NERC pro forma Hearing Procedures, [**REGIONAL ENTITY**]'s Hearing Procedures shall be included as a separate attachment to this Exhibit D.]

3.0 OTHER DECISION-MAKING BODIES

If [*Regional Entity*] uses other decision-making bodies within its compliance program, provide here a description of the function of that body to the extent not described elsewhere in the Agreement or exhibits, how the members of that body are selected, and the qualifications to be selected for that body.]

Exhibit E — Funding

1. Scope of activities funded through the ERO funding mechanism

[Regional Entity] shall include in its annual budget submission to NERC amounts for costs it will incur in performing its delegated functions and related activities as described in Sections 5, 6 and 7 of the Agreement. These activities shall include:

- Reliability Standard Development
- Compliance Monitoring and Enforcement
- Organization Registration and Certification
- Reliability Assessment and Performance Analysis (including necessary data gathering activities)
- Event Analysis and Reliability Improvement
- Training and Education
- Situation Awareness
- Infrastructure Security

2. Preparation of Annual Business Plan and Budget

(a) NERC and [Regional Entity], in conjunction with the other Regional Entities, shall collaboratively develop an annual schedule for the development, submission, review and approval of [Regional Entity's] business plan and budget. The annual schedule for the preparation of business plans and budgets shall require [Regional Entity] (i) to submit to NERC draft(s) of [Regional Entity]'s proposed business plan and budget and other preliminary documents and information, and (ii) to submit a final proposed business plan and budget that has been approved by [Regional Entity] Board of Trustees to NERC by July 1 or such other agreed date as provides sufficient time for NERC's review, approval and submission of [Regional Entity]'s business plan and budget to the Commission 130 days in advance of the beginning of each fiscal year. The [Regional Entity] business plan and budget submission shall include supporting materials, including [Regional Entity]'s complete business plan and organization chart, explaining the proposed collection of all assessments, dues, fees and charges, and the proposed expenditure of the funds to be collected in sufficient detail to justify the requested budgeted expenditures and assessments. [Regional Entity]'s business plan and budget and proposed assessments shall provide for reasonable reserve mechanisms for unforeseen and extraordinary expenses and other contingencies, consistent with generally accepted accounting principles.

(b) NERC shall review and approve [Regional Entity]'s proposed business plan and budget and proposed assessments for performing the delegated functions and related activities described in Sections 5, 6 and 7 of this Agreement and listed above in Section 1 of this **Exhibit E**, or shall direct [Regional Entity] to make such revisions as NERC deems appropriate prior to approval. NERC shall submit [Regional Entity]'s approved business plan and budget and proposed assessments to the Commission for approval as part of NERC's overall business plan and budget submission, in accordance with the ERO Regulations.

3. Allocation of Costs

Assessments to fund the costs of [REGIONAL ENTITY]'s delegated functions and related activities pursuant to the Agreement shall be allocated among all load-serving entities on the basis of Net Energy for Load, unless a different method(s) of allocating and calculating such assessments has been submitted to and approved by NERC and the Commission in accordance with Section 9(b) of the Agreement. [Regional Entity] shall submit to NERC annually at the same time it submits its budget request a list of the load-serving entities or designees within its geographic boundaries that shall be responsible for paying [Regional Entity's] assessment and the load-serving entities' proportionate Net Energy for Load, and such other data and information as is necessary to allocate and calculate the allocation of [Regional Entity's] assessment to the load-serving entities or designees under the method(s) of allocation and calculation that will be used.

4. Collection of Funding

[IF NERC WILL BILL AND COLLECT ASSESSMENTS DIRECTLY FROM LOAD-SERVING ENTITIES IN REGIONAL ENTITY'S REGION, USE THE FOLLOWING TEXT FOR SECTION 4(a):]

(a) NERC shall submit invoices to the load-serving entities or designees identified by [Regional Entity] covering the NERC and [Regional Entity] assessments approved for collection.

[IF THE REGIONAL ENTITY WILL ACT AS THE BILLING AND COLLECTION AGENT ON BEHALF OF NERC TO BILL AND COLLECT ASSESSMENTS FROM LOAD-SERVING ENTITIES IN REGIONAL ENTITY'S REGION, USE THE FOLLOWING TEXT FOR SECTION 4(a):]

(a) NERC and [Regional Entity] agree that [Regional Entity] shall act as the billing and collection agent on behalf of NERC to bill and collect [Regional Entity]'s assessments from load-serving entities and designees (or such other entities as agreed by NERC and [Regional Entity]). [Regional Entity] agrees that it shall (i) issue all invoices to load-serving entities and other entities in a prompt and timely manner after receipt from NERC of the information needed to issue the invoices; (ii) exercise commercially reasonable efforts to collect invoices that are not paid as of the due date(s); and (iii) transfer all funds collected to NERC in a timely manner, as follows: Prior to the start of each calendar quarter, and once per week thereafter until all billings for the quarter are collected, [Regional Entity] will electronically transfer to NERC, in immediately available funds, all payments received by [Regional Entity] from load-serving entities or other entities for payment of invoices. On the same day that [Regional Entity] makes each electronic transfer of funds to NERC, [Regional Entity] shall send an e-mail to the Chief Financial Officer or Controller of NERC detailing the collections being transmitted, including a listing of the load-serving entities or other entities from which payments were collected and the amount collected from each entity. [Note: If NERC and Regional Entity have a different collection and payment arrangement, the preceding two sentences will be modified accordingly to describe it.]

[Regional Entity] agrees that it shall not in any way use its position as billing and collection agent for NERC to attempt to influence NERC's policies or decisions on matters relating to adoption of Reliability Standards (including Regional Reliability Standards and Regional Variances), administration of the compliance monitoring and enforcement program and other compliance and enforcement matters, determination and imposition of penalties and sanctions, budgeting matters including review and approval of [Regional Entity's] budgets and business plans, or any other NERC decisions, including by issuing invoices, engaging in collection activities or transferring funds collected to NERC in an untimely manner or other than in accordance with this Agreement.

(b) NERC shall pursue any non-payments of assessment amounts and shall request assistance from ERO Governmental Authorities as necessary to secure collection. To the extent reasonably practicable, [Regional Entity] shall assist NERC in pursuing and collecting any non-payments. Notwithstanding the foregoing, [Regional Entity] is not responsible and does not assume any liability for recovering non-payments or underpayments of assessment amounts. NERC shall retain sole responsibility for recovering non-payments or underpayments of assessment amounts. NERC shall add the amount of any non-payments by end-users or designees within [REGIONAL ENTITY]'s region, that are reasonably determined to be uncollectible, to NERC's assessments for a subsequent year with the amount of such non-payments to be allocated to end-users within [Regional Entity]'s region.

(c) Upon approval by ERO Governmental Authorities of [Regional Entity]'s annual assessment to fund the costs of its delegated functions and related activities, NERC shall pay [Regional Entity's] annual assessment to Regional Entity in four equal quarterly payments on January 15, April 15, July 15 and October 15 of the budget year.

5. Application of Penalties

Except as otherwise approved by the Commission, all penalty monies received by [Regional Entity], other than penalty monies received from an operational function or division or affiliated entity of [Regional Entity], shall be applied as a general offset to [Regional Entity]'s budget requirements for U.S.-related activities under this Agreement for the subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity. Except as otherwise approved by the Commission, any penalty monies received from an operational function or division or affiliated entity of [Regional Entity] shall be transmitted to or retained by NERC and shall be used by NERC as a general offset to NERC's budget for its activities as the ERO under the Act for the following year.

6. Budget and Funding for [Regional Entity's] Non-Statutory Activities

In addition to its delegated functions and related activities, as specified in Sections 5, 6 and 7 of the Agreement and in Section 1 of this **Exhibit E** (such delegated functions and activities referred to in this Section 6 as "statutory activities"), [Regional Entity] performs the following other functions and activities (such other functions and activities being

referred to in this Section 6 as "non-statutory activities"): [List and describe all non-statutory activities performed by Regional Entity, or state "None".]

[Regional Entity] shall employ the following methods and procedures to (i) keep its funding mechanisms for its statutory activities separate from its funding mechanisms for its non-statutory activities, and (ii) record the costs it incurs in the performance of its non-statutory functions separately from the costs it incurs in the performance of its statutory functions: [List and describe the methods and procedures Regional Entity employs to keep costs and funding of statutory activities separate from costs and funding of non-statutory activities, including at a minimum a description of how Regional Entity's bank accounts and receivables/payables procedures are set up for both statutory and non-statutory functions, a description of how Regional Entity ensures each employee involved in both statutory and non-statutory functions keeps accurate time records reflecting his/her activities, and a description of how Regional Entity's general and administrative costs are allocated between statutory activities and non-statutory activities. If the necessary descriptions are lengthy they may be provided in a separate attachment labeled "Attachment E-1", and state here "See Attachment E-1." If Regional Entity has listed no non-statutory functions in the preceding paragraph, state here "Not applicable."]

[Regional Entity] shall provide its budget for such non-statutory activities to NERC at the same time that [Regional Entity] submits its proposed annual business plan and budget for statutory activities to NERC pursuant to Section 9 of the Agreement. [Regional Entity's] budget for non-statutory activities that is provided to NERC shall contain a detailed list of [Regional Entity's] non-statutory activities and a description of the funding sources for the non-statutory activities. [Regional Entity] agrees that no costs (which shall include a reasonable allocation of [Regional Entity]'s general and administrative costs) of non-statutory activities are to be included in the calculation of [Regional Entity's] assessments, dues, fees, and other charges for its statutory activities.

7. Amended or Supplemental Business Plans and Budgets

During the course of the fiscal year, if [Regional Entity] determines it does not or will not have sufficient funds to carry out its delegated functions and related activities, [Regional Entity] shall submit to NERC one or more proposed amended or supplemental business plans and budgets and requests for approval of supplemental assessments, reflecting costs, cost increases or funding shortfalls not provided for in [Regional Entity]'s approved business plan and budget for the fiscal year. NERC shall review and approve the proposed amended or supplemental business plan and budget and proposed supplemental assessment, or shall direct [Regional Entity] to make such revisions as NERC deems appropriate prior to approval. NERC shall submit [Regional Entity]'s approved amended or supplemental business plan and budget and proposed supplemental assessment to the Commission for approval.

8. NERC Review of Regional Entity Financial Statements

NERC shall conduct reviews of the quarterly and annual financial statements submitted by [Regional Entity] pursuant to Section 9(h) and (i) of the Agreement. [Regional Entity] shall

4-14-2010

provide supporting documentation for the quarterly and annual financial statements as reasonably requested by NERC based on its reviews.

ATTACHMENT 1B

NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION

REVISED PRO FORMA DELEGATION AGREEMENT

REDLINED AGAINST

CURRENT PRO FORMA DELEGATION AGREEMENT

**AMENDED AND RESTATED DELEGATION AGREEMENT BETWEEN
NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION
AND [REGIONAL ENTITY]**

AMENDED AND RESTATED DELEGATION AGREEMENT (“Agreement”) made ~~this ___ day of _____ 2008,~~ as of [January 1, 2011], between the North American Electric Reliability Corporation (“NERC”), an organization certified by the Federal Energy Regulatory Commission (“Commission”) pursuant to Section 215(c) of the Federal Power Act to establish and enforce Reliability Standards for the ~~bulk power system~~ Bulk-Power System, and ~~the~~ [REGIONAL ENTITY], an organization established to develop and enforce Reliability Standards within the geographic boundaries identified on **Exhibit A** to this Agreement, and for other purposes. NERC and [REGIONAL ENTITY] may be individually referred to herein as “Party” or collectively as “Parties.”

WITNESSETH

WHEREAS, Subtitle A of the Electricity Modernization Act of 2005 added Section 215 to the Federal Power Act (16 U.S.C. § 824n) (hereafter “the Act”) ~~and, which,~~ which, among other things, provides for the establishment of an electric reliability organization (“ERO”) to develop and enforce Reliability Standards applicable to all owners, operators, and users of the ~~bulk power system~~ Bulk-Power System;

WHEREAS, the Commission has adopted regulations for the implementation of the Act, which are set forth at Chapter I, Title 18, Code of Federal Regulations, Part ~~39, as adopted by Commission Order No. 672 in Docket No. RM05-30-000 on February 3, 2006 (114 FERC ¶ 61,104; hereafter “Order 672~~ 39 (the “ERO Regulations”));

WHEREAS, the Commission has certified NERC as the ERO that will, in accordance with the Act, establish and enforce Reliability Standards for the ~~bulk power system~~ Bulk-Power System, subject to certain delegation provisions described below;

WHEREAS, the Act recognizes the international interdependency of electric reliability within North America and envisions the ERO and such applicable Regional Entities as international organizations;

WHEREAS, the Act and Section 39.8 of the ~~Commission's regulations~~ERO Regulations provide for the delegation by the ERO of authority to propose and enforce Reliability Standards to regional entities ("Regional Entities") such as [REGIONAL ENTITY] provided that:

(A) The Regional Entity is governed by —

- (i) an independent board;
- (ii) a balanced stakeholder board; or
- (iii) a combination independent and balanced stakeholder board.

(B) The Regional Entity otherwise satisfies the provisions of Section 215(c)(1) and (2) of the Act; and

(C) The agreement promotes effective and efficient administration of ~~bulk power system~~Bulk-Power System reliability;

WHEREAS, certain Regional Entities are organized on an Interconnection-wide basis and are therefore entitled to the presumption set forth in the Act that: “[t]he ERO and the Commission shall rebuttably presume that a proposal for delegation to a Regional Entity organized on an Interconnection-wide basis promotes effective and efficient administration of bulk power system reliability and should be approved”;

WHEREAS, the Act further provides that the ERO shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Reliability Standard or modification to a Reliability Standard to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest;

WHEREAS, [REGIONAL ENTITY] [is/is not] organized on an Interconnection-wide basis and therefore [is/is not] entitled to the rebuttable presumptions accorded such an entity;

WHEREAS, NERC will work through [REGIONAL ENTITY] to carry out certain of its activities in furtherance of its responsibilities as the ~~electric reliability organization~~ERO under the Act; ~~and~~

WHEREAS, NERC has concluded that [REGIONAL ENTITY] meets all requirements of the Act, the ~~Commission's regulations~~ERO Regulations, and the NERC Rules of Procedure as approved by the Commission ("NERC Rules of Procedure") necessary to qualify for delegation; and

WHEREAS, NERC and [REGIONAL ENTITY], having operated under a predecessor agreement to this Agreement, have negotiated this amended and restated Agreement so as to incorporate the benefits of their mutual experience and lessons learned while operating under the predecessor agreement and thereby provide for the more efficient and effective execution of their respective responsibilities in a transparent manner that is pursuant to Section 215 of the Act and the ERO Regulations;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, NERC and [REGIONAL ENTITY]; agree as follows:

1. Definitions. The capitalized terms used in this Agreement shall be defined as set forth in the Act, the ~~Commission's regulations, or~~ERO Regulations, the NERC Rules of Procedure, or the NERC Glossary of Terms Used in Reliability Standards, or, if not so defined, shall be defined as ~~follows~~set forth in this Section 1 or elsewhere in the text of this Agreement:

(a) Breach means (i) the failure of a Party to perform or observe any material term, condition or covenant of the Agreement or (ii) a representation in Section 2 of the Agreement shall have become materially untrue.

(b) Cross-Border Regional Entity means a Regional Entity that encompasses a part of the United States and a part of Canada or Mexico.

(c) Delegated Authority means the authority delegated by NERC to [REGIONAL ENTITY] to propose and enforce Reliability Standards pursuant to the Act and to undertake

related activities set forth in this Agreement in furtherance of these delegated functions in accordance with the Act, the ERO Regulations and this Agreement.

~~(d) — [REGIONAL ENTITY] Rules means the bylaws, a rule of procedure or other organizational rule or protocol of [REGIONAL ENTITY].~~

~~(e) — Reliability Standard means a requirement approved by the Commission under Section 215 of the Federal Power Act to provide for reliable operation of the bulk power system. The term includes requirements for the operation of existing bulk power system facilities, including cyber security protection, and the design of planned additions or modifications to such facilities to the extent necessary for reliable operation of the bulk power system; but the term does not include any requirement to enlarge such facilities or to construct new transmission capacity or generation capacity.~~

2. Representations.

(a) For purposes of its Delegated Authority, [REGIONAL ENTITY] hereby represents and warrants to NERC that:

(i) [REGIONAL ENTITY] is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder. [REGIONAL ENTITY] is governed in accordance with its bylaws by [*select appropriate: an independent board/a balanced stakeholder board/ a combination independent and balanced stakeholder board*]. Pursuant to these bylaws, no two industry sectors can control any [REGIONAL ENTITY] decision and no single industry sector can veto any [REGIONAL ENTITY] decision. The relevant portions of such bylaws are attached hereto in **Exhibit B**¹, and as so attached are in full force and effect. No other such corporate governance documents are binding upon [REGIONAL ENTITY].

¹ The **Exhibit B** from ~~each Regional Entity~~ [REGIONAL ENTITY] shall meet the requirements contained in **Exhibit B** to this ~~pro forma~~ Agreement.
Amended and Restated Pro Forma Regional Delegation Agreement
~~Amended and Restated for July 21, 2008 Compliance Filing~~

(ii) As set forth in **Exhibit C** hereto², [REGIONAL ENTITY] has developed a standards development procedure, which provides the process that [REGIONAL ENTITY] may use to develop Regional Reliability Standards [and Regional Variances, if the regional entity is organized on an Interconnection-wide basis] that are proposed to NERC for adoption.

(iii) As set forth in **Exhibit D** hereto³, [REGIONAL ENTITY] has ~~developed a regional compliance enforcement program~~adopted the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure, which provides for the enforcement of Reliability Standards within ~~its~~[REGIONAL ENTITY]'s geographic boundaries as shown on Exhibit A.

(b) NERC hereby represents and warrants to [REGIONAL ENTITY] that:

(i) ~~It~~NERC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder; and

(ii) ~~It~~NERC has been certified as the ERO by the Commission pursuant to the Act.

3. Covenants.

(a) During the term of this Agreement, [REGIONAL ENTITY] shall maintain and preserve its qualifications for delegation pursuant to the Act and shall not amend ~~the [REGIONAL ENTITY]its Regional Entity~~ Rules without NERC's approval, which shall not be unreasonably withheld or delayed and which shall, in the case of a Regional Entity organized on an Interconnection-wide basis, be governed by the presumptions provided for in Section 215(d)(2) and (e)(4)(C) of the Act, and be subject to any required Commission approval.

(b) During the term of this ~~agreement~~Agreement, NERC shall maintain its qualification and status as the ERO pursuant to the Act and, subject to the provisions of Sections

² The **Exhibit C** from ~~each Regional Entity~~[REGIONAL ENTITY] shall meet the requirements contained in **Exhibit C** to this pro forma Agreement.

~~³ The **Exhibit D** from each Regional Entity shall meet the requirements contained in **Exhibit D** to this pro forma Agreement.~~

~~1617~~ and ~~1718~~ of this Agreement, NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations or programs of [REGIONAL ENTITY] under this Agreement without first obtaining the consent of [REGIONAL ENTITY], which consent shall not be unreasonably withheld or delayed.

- (c) During the term of this ~~agreement~~Agreement, NERC and [REGIONAL ENTITY]

shall adhere to and require that all participants in their respective activities under this Agreement follow and comply with the NERC Antitrust Compliance Guidelines.

4. Delegation of Authority.

(a) Based upon the representations, warranties and covenants of [REGIONAL ENTITY] in Sections 2 and 3 above, the corporate governance documents set forth in **Exhibit B**, the standards development process set forth in **Exhibit C**, and the ~~regional~~ compliance monitoring and enforcement program set forth in **Exhibit D**, NERC hereby delegates authority, pursuant to Section 215(e)(4) of the Act, to [REGIONAL ENTITY] for the purpose of proposing Reliability Standards to NERC, as set forth in Section 5 of this Agreement, and enforcing Reliability Standards, as set forth in Section 6 of this Agreement, within the geographic boundaries ~~set forth on Exhibit A. No further redelegation of authority or responsibility, in total or in part, under this Agreement is allowed without NERC's express consent.~~ and such other scope set forth on Exhibit A, provided, that [REGIONAL ENTITY] shall not monitor and enforce compliance with Reliability Standards for [REGIONAL ENTITY] or an affiliated entity with respect to reliability functions for which [REGIONAL ENTITY] or an affiliate is a Registered Entity. Any exclusions from this delegation of authority to [REGIONAL ENTITY] within, or additions to this delegation of authority to [REGIONAL ENTITY] beyond, the geographic boundaries set forth on Exhibit A are stated on Exhibit A.

(b) In circumstances where [REGIONAL ENTITY] or an affiliated entity is a Registered Entity, [REGIONAL ENTITY] shall enter into an agreement with another Regional Entity or NERC for the other Regional Entity or NERC to monitor and enforce [REGIONAL ENTITY]'s or affiliate's compliance with Reliability Standards. Such agreements are subject to NERC and Commission approval.

(c) Nothing in this Agreement shall prohibit [REGIONAL ENTITY] from entering into an arrangement between one or more other Regional Entities to perform compliance monitoring and enforcement activities outside of its region, on behalf of NERC and/or other Regional Entities, for Registered Entities that have registered functions monitored by more than one Regional Entity, subject to approval by NERC.

(d) ~~(b)~~ For Cross-Border Regional Entities, the authority delegated by this Agreement shall extend only to the portion of the region identified on **Exhibit A** that is within the United States. Any delegation of authority by ~~governmental authorities~~ ERO Governmental Authorities in Canada or Mexico shall be governed by a separate agreement and is outside the scope of this Agreement; provided, however, that both [REGIONAL ENTITY] and NERC shall endeavor to ensure that this Agreement and such separate agreements are compatible.

(e) ~~(e)~~ As a condition to this delegation of authority and subject to the provisions of ~~section 16~~ Section 17 of this Agreement, [REGIONAL ENTITY] shall comply with the applicable provisions of NERC's Certificate of Incorporation, Bylaws, Rules of Procedure, and Reliability Standards, as from time to time adopted, approved, or amended.

5. Development and Proposal of Reliability Standards.

(a) In connection with its Delegated Authority, [REGIONAL ENTITY] shall be entitled to:

(i) propose Reliability Standards, Regional Variances, or modifications thereof to NERC, which shall be considered by NERC through an open and inclusive process for proposing and adopting Reliability Standards that affords [REGIONAL ENTITY] reasonable notice and opportunity to be heard; and

(ii) develop Regional Reliability Standards [and Regional Variances, if Regional Entity is organized on an Interconnection-wide basis] through [REGIONAL ENTITY]'s process as set forth in **Exhibit C**. Proposals approved through [REGIONAL ENTITY]'s process shall be reviewed by the NERC Board ~~of Trustees~~ after NERC provides notice and an opportunity for interested persons to comment. In the case of a proposal from a Regional Entity organized on an Interconnection-wide basis, comments shall be limited to the factors identified in NERC Rule ~~313, section 3.1~~ of Procedure 312.3 as it may be amended from time to time. The NERC ~~board of trustees~~ Board shall promptly thereafter consider such

proposed Regional Reliability Standard or Regional Variance, applying the rebuttable presumption described in subsection 5(b) of this Agreement if the proposed Regional Reliability Standard or Regional Variance is from a Regional Entity organized on an Interconnection-wide basis, and either approve the proposed ~~standard~~Regional Reliability Standard or Regional Variance and submit it to the Commission for approval, or disapprove it in writing setting forth its reasons. [REGIONAL ENTITY] may appeal any disapproval of a proposed Regional Reliability Standard or Regional Variance to the Commission.

(b) Pursuant to Section 215(d)(3) of the Act, NERC shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Regional Reliability Standard or Regional Variance or modification thereof to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. Any person challenging such proposal from the ~~[INTERCONNECTION-WIDE REGIONAL ENTITY]~~Regional Entity organized on an Interconnection-wide basis shall have the burden of proof. NERC shall not find that this presumption has been rebutted except based upon substantial evidence that has been disclosed to, and been subject to comment by, the ~~[INTERCONNECTION-WIDE REGIONAL ENTITY]~~Interconnection-wide Regional Entity during NERC's review of the proposal.

6. Enforcement of Compliance with Reliability Standards.

(a) In connection with its delegated authority pursuant to this Agreement, [REGIONAL ENTITY] shall enforce Reliability Standards (including Regional Reliability Standards and Regional Variances) within the geographic boundaries set forth, or as otherwise specified, in **Exhibit A** through the compliance monitoring and enforcement program set forth in **Exhibit D**. NERC and [REGIONAL ENTITY] agree that this compliance monitoring and enforcement program meets all applicable requirements of the Act, Order No. 672 ~~and of~~ the Commission's ~~regulations~~, and the ERO Regulations, including, *inter alia*, the requirement for an audit program pursuant to Section 39.7(a) of the ~~Commission's regulations~~ERO Regulations, the assessment of penalties pursuant to Section 39.7(c) through 39.7(g) of the ~~Commission's regulations~~ERO Regulations and the requirements for due process. [REGIONAL ENTITY] may not change its compliance monitoring and enforcement program set forth in **Exhibit D** absent NERC's approval, which shall not be unreasonably withheld or delayed, and the

approval of the Commission. Subject to the rights and limitations ~~of specified in~~ Sections ~~1617~~ and ~~1718~~ of this Agreement, [REGIONAL ENTITY] agrees to comply with the NERC Rules of Procedure, with any directives issued pursuant to Section 8(c) of this Agreement, and with any guidance and directions issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, in implementing this program.

(b) [REGIONAL ENTITY] shall report promptly to NERC any ~~self-reported violation or investigation of a violation or an alleged violation~~ Possible Violation, Alleged Violation, or Confirmed Violation of a Reliability Standard, and its eventual disposition by [REGIONAL ENTITY]. Such report shall include the owner's, operator's, or user's name, which Reliability Standard or Reliability Standards were ~~violated or allegedly violated, when the violation or alleged violation~~ the subject of the Possible Violation, Alleged Violation, or Confirmed Violation, when the Possible Violation, Alleged Violation, or Confirmed Violation occurred, other pertinent facts ~~about the violation~~ including circumstances surrounding the ~~violation~~ Possible Violation, Alleged Violation, or Confirmed Violation with any known risk to the ~~bulk power system~~ Bulk-Power System, when the ~~violation~~ Possible Violation, Alleged Violation, or Confirmed Violation was or will be mitigated, the name of a person knowledgeable about the ~~violation or alleged violation~~ Possible Violation, Alleged Violation, or Confirmed Violation to serve as a point of contact with the Commission, and any other information required by NERC compliance program procedures. NERC shall promptly forward such report to the Commission. NERC and [REGIONAL ENTITY] shall cooperate in filing such periodic summary reports as the Commission shall from time to time direct on ~~violations~~ Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards and summary analyses of such ~~violations~~ Possible Violations, Alleged Violations, and Confirmed Violations.

(c) Each ~~violation or alleged violation~~ Possible Violation, Alleged Violation, or Confirmed Violation shall be treated as nonpublic ~~until~~ unless the matter is filed with the Commission as a ~~notice of penalty or resolved by an admission that the owner, operator, or user of the bulk power system violated a Reliability Standard or by a settlement or other negotiated disposition. The disposition of each violation or alleged violation~~ Notice of Penalty, or, if disclosure is required, dismissed. The disposition of each Possible Violation, Alleged Violation, or Confirmed Violation that relates to a Cybersecurity Incident or that would

jeopardize the security of the ~~bulk power system~~ Bulk-Power System if publicly disclosed shall ~~be~~ remain nonpublic unless the Commission directs otherwise.

(d) All dispositions by [REGIONAL ENTITY] of Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards shall be reported to NERC for review and, in the case of Confirmed Violations, penalties or sanctions, and settlements, for approval. Following approval of a disposition by NERC, NERC shall file the disposition with the Commission, if required by, and in accordance with, Section 215(e) of the Act and Section 39.7 of the ERO Regulations. NERC shall review [REGIONAL ENTITY]'s dispositions based on the following criteria:

(i) whether the disposition is supported by a sufficient record compiled by [REGIONAL ENTITY] in accordance with the NERC Rules of Procedure, NERC directives and Commission requirements, taking into account the nature of the Possible Violation, Alleged Violation, or Confirmed Violation,

(ii) whether the disposition is consistent with any applicable directives issued pursuant to Section 8(c) of this Agreement, any applicable directions or guidance issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, or other applicable NERC guidance, concerning the Reliability Standards to which the Possible Violation, Alleged Violation, or Confirmed Violation relates,

(iii) if the disposition is a Confirmed Violation or settlement, whether it provides for a penalty or sanction, or a determination of no penalty or sanction, determined in accordance with the NERC Sanction Guidelines, Appendix 4B to the NERC Rules of Procedure, and

(iv) whether the disposition is reasonably consistent with other dispositions by [REGIONAL ENTITY] and by other Regional Entities of Possible Violations, Alleged Violations, and Confirmed Violations involving the same or similar facts and circumstances.

NERC may reject any disposition, with an explanation of why NERC believes the disposition does not meet the above criteria. [REGIONAL ENTITY] may submit a disposition requiring NERC approval that has been rejected by NERC, or a revised disposition following a rejection, directly to the NERC Board Compliance Committee for approval without revising the disposition to address all the grounds on which NERC originally rejected the disposition. The

final approval of [REGIONAL ENTITY]'s disposition of a Possible Violation, Alleged Violation, or Confirmed Violation shall be made by the NERC Board Compliance Committee, provided, that the NERC Board or NERC Board Compliance Committee may, by appropriate resolution, delegate authority for final approval of dispositions of specified categories of Possible Violations, Alleged Violations, or Confirmed Violations to the NERC President.

(e) All appeals of penalties imposed by [REGIONAL ENTITY] as a result of a decision by [REGIONAL ENTITY]'s Hearing Body shall be filed with, heard by and disposed of by, NERC; in accordance with the NERC Rules of Procedure.

(f) ~~(e)~~ [REGIONAL ENTITY] shall maintain the capability to conduct investigations of ~~potential violations~~ Possible Violations and Alleged Violations of Reliability Standards and to conduct such investigations in a confidential manner.

(g) ~~(f)~~ [REGIONAL ENTITY] shall maintain a program of proactive monitoring and enforcement ~~audits including procedures for spot checks of self-reported compliance and periodic audits of all responsible entities as defined in Exhibit D~~ of compliance with Reliability Standards, in accordance with the NERC Compliance Monitoring and Enforcement Program and the annual NERC Compliance Monitoring and Enforcement Program Implementation Plan.

(h) ~~(g)~~ As part of its compliance monitoring and enforcement program, [REGIONAL ENTITY] shall maintain a conflict of interest policy that assures the integrity and independence of such program, including the integrity and ~~the~~ independence of the persons or decision-making bodies making final determinations in compliance ~~program staff from those subject to~~ enforcement actions under Section 5.0 of the NERC Compliance Monitoring and Enforcement Program. A Regional Entity may have stakeholders lead or participate in its board compliance committee so long as integrity and independence are assured through reasonable and appropriate recusal procedures.

(i) ~~(h)~~ As often as NERC deems necessary, but no less than every ~~three~~ five years, NERC shall review [REGIONAL ENTITY]'s compliance monitoring and enforcement program to ~~ensure~~ determine that: (i) the program meets all applicable legal requirements; (ii) actual practices reflect the requirements; and (iii) the program administered pursuant to the Delegated Authority promotes consistent interpretations across North America of Reliability Standards and comparable levels of sanctions and penalties ~~to~~ for violations of Reliability Standards

constituting comparable levels of threat to reliability of the ~~bulk power system~~Bulk-Power System.

~~(i) [REGIONAL ENTITY] shall modify its compliance enforcement program as needed to reflect additions to, deletions from, or modifications of Reliability Standards and, subject to the rights and limitations of Sections 16 and 17 of this Agreement, shall modify its compliance enforcement program as needed: (i) to reflect amendments to the NERC Rules; (ii) to comply with NERC directives resulting from the review of compliance enforcement programs as provided in Section 6(h) of this Agreement; or (iii) to resolve a conflict with a function, rule, order, tariff, rate schedule, or agreement accepted, approved, or ordered by the Commission.~~

~~(j) NERC shall conduct a review with the Regional Entities that provides for the exchange of information on practices, experiences, and lessons learned in the implementation of compliance enforcement programs.~~

7. Delegation-Related Activities.

~~7. Delegation-Related Services.~~ NERC will engage [REGIONAL ENTITY] on its behalf to carry out certain of its activities that are in furtherance of ~~its~~Bulk-Power System reliability and NERC's responsibilities as the ERO under the Act or in support of ~~delegated functions~~the Delegated Authority, as specified in the NERC Rules of Procedure and listed on **Exhibit E**. These delegation-related activities shall include, but are not limited to, those described in subsections (a) through (f), each of which shall be considered a statutory activity:

(a) Certification of Bulk-Power System Entities. The NERC Board shall set criteria for certification in accordance with the NERC Rules of Procedure. [REGIONAL ENTITY] shall issue certifications in accordance with the NERC Rules of Procedure.

(b) Registration of owners, operators, and users of the Bulk-Power System as responsible for compliance with requirements of Reliability Standards.

(i) The NERC Board shall develop criteria for registration of owners, operators, and users of the Bulk-Power System as Registered Entities and shall apply the registration criteria to register owners, operators and users of the Bulk-Power System as Registered Entities.

(ii) NERC shall maintain a registration database of Registered Entities, based on data and information provided by [REGIONAL ENTITY] and other Regional Entities. [REGIONAL ENTITY] shall provide timely and accurate information relating to registrations to NERC, on at least a monthly basis, to enable NERC to maintain a registration database that is accurate and up-to-date.

(iii) The NERC Board Compliance Committee shall hear and decide appeals from owners, operators and users of the Bulk-Power System contesting registration, in accordance with the NERC Rules of Procedure. If the NERC Board Compliance Committee upholds the decision to register an owner, operator, or user, NERC shall defend the decision in any subsequent appeal of the decision by the Registered Entity to the Commission.

(c) Reliability Assessment and Performance Analysis. [REGIONAL ENTITY] shall develop assessments of the reliability of the Bulk-Power System, or ensure that data and information are collected, analyzed and provided to NERC in support of the development of reliability assessments, in accordance with the NERC Rules of Procedure. [REGIONAL ENTITY] shall also develop and maintain, and collect data in support of the development and maintenance of, reliability performance metrics and assessments of risks to the Reliable Operation of the Bulk-Power System, in accordance with the NERC Rules of Procedure and NERC directives. NERC shall develop data-gathering quality control procedures, forms and reporting mechanisms, which shall be used by [REGIONAL ENTITY] and other Regional Entities in carrying out their responsibilities under this subsection (c).

(d) Event Analysis and Reliability Improvement. [REGIONAL ENTITY] shall conduct event analysis pursuant to the NERC Rules of Procedure and applicable governmental regulations. NERC and [REGIONAL ENTITY] shall coordinate event analysis to support the effective and efficient use of their collective resources, consistency in event analysis, and timely delivery of event analysis reports. In collaboration with NERC, [REGIONAL ENTITY] shall disseminate to the electric industry lessons learned and other information obtained or resulting from event analysis.

(e) Training and Education. [REGIONAL ENTITY] may provide training and education to Registered Entities, as it deems necessary, in support of its performance of delegated functions and related activities under this Agreement. NERC may also provide

training and education programs to Registered Entities on topics relating to NERC's responsibilities as the ERO.

(f) Situation Awareness and Infrastructure Security.

(i) [REGIONAL ENTITY] shall gather and assess situation awareness information provided by Registered Entities pursuant to the NERC Rules of Procedure and applicable governmental regulations, and shall provide other data, information and assistance to NERC in support of NERC's activities in monitoring present conditions, and responding to events, on the Bulk-Power System

(ii) [REGIONAL ENTITY] shall collaborate with NERC in its efforts to coordinate electric industry activities to promote critical infrastructure protection of the Bulk-Power System in North America.

8. Oversight of Performance of Delegated Functions and Related Activities.

This Section 8 sets forth processes and procedures which the Parties intend shall be used in NERC's oversight of [REGIONAL ENTITY]'s performance of its Delegated Authority and related activities pursuant to this Agreement. It is the intent of NERC and [REGIONAL ENTITY] that matters relating to NERC's oversight of [REGIONAL ENTITY]'s performance of its Delegated Authority and related activities shall be established or resolved by collaboration between NERC and [REGIONAL ENTITY] and, where applicable, other Regional Entities, to the maximum extent possible, consistent with the construct that NERC and the Regional Entities are operating together in a collaborative manner to carry out the responsibilities of the ERO under Section 215 of the Act and the ERO Regulations.

(a) (i) NERC shall develop, in collaboration with [REGIONAL ENTITY] and other Regional Entities, performance goals, measures and other parameters (including, without limiting the scope of such goals, measures and parameters, financial performance goals, measures and parameters), and performance reports, which shall be used to measure NERC's and [REGIONAL ENTITY]'s performance of their respective functions and related activities. The performance goals, measures and parameters and the form of performance reports shall be approved by the NERC President and shall be made public. [REGIONAL ENTITY] shall provide data, information and reports to NERC, in accordance with established schedules, to

enable NERC to calculate [REGIONAL ENTITY]'s performance to the agreed-upon goals, measures and parameters.

(ii) NERC shall use the performance goals, measures and parameters and performance reports to evaluate [REGIONAL ENTITY]'s performance of its delegated functions and related activities and to provide advice and direction to [REGIONAL ENTITY] on performance improvements. The performance goals, measures and other parameters and the values of such goals, measures and parameters, shall be reviewed by NERC, [REGIONAL ENTITY] and the other Regional Entities, revised if appropriate, and made public, on the same timeline as the annual business planning and budgeting process described in Section 9 of this Agreement.

(iii) At the request of the President of NERC, [REGIONAL ENTITY] shall be required to develop, submit for NERC approval, and implement action plans to address areas of its performance that are reasonably determined by NERC, based on analysis of [REGIONAL ENTITY]'s performance against the performance goals, measures and parameters, or performance of specific activities, to be unsatisfactory, *provided*, that prior to requiring [REGIONAL ENTITY] to adopt and implement an action plan or other remedial action, NERC shall issue a notice to [REGIONAL ENTITY] of the need and basis for an action plan or other remedial action and provide an opportunity for [REGIONAL ENTITY] to submit a written response contesting NERC's evaluation of [REGIONAL ENTITY]'s performance and the need for an action plan. [REGIONAL ENTITY] may request that the President of NERC reconsider the request, and thereafter may request that the NERC Board review and reconsider the request. NERC and [REGIONAL ENTITY] shall work collaboratively as needed in the development and implementation of [REGIONAL ENTITY]'s action plan. A final action plan submitted by [REGIONAL ENTITY] to NERC shall be made public unless the President of NERC makes a written determination that the action plan or specific portions of the plan should be maintained as non-public.

(b) NERC shall make available to [REGIONAL ENTITY] standardized training and education programs, which shall be designed taking into account input from [REGIONAL ENTITY] and other Regional Entities, for [REGIONAL ENTITY] personnel on topics relating to the delegated functions and related activities.

(c) (i) NERC may issue directives to [REGIONAL ENTITY] concerning the manner in which [REGIONAL ENTITY] shall perform its delegated functions and related activities under this Agreement. The NERC Rules of Procedure, or any other ERO Rule requiring approval of the Commission, shall not be considered “directives.” NERC shall initiate the development of a directive through a collaborative process with [REGIONAL ENTITY] and, if applicable, other Regional Entities to which the directive will apply. Any directive developed through the collaborative process shall be approved by, and issued under the signature of, the NERC President.

(ii) If after a period of time that is reasonable under the circumstances, NERC and [REGIONAL ENTITY] and, if applicable, other Regional Entities are unable to reach agreement on the contents of the directive, NERC may issue the directive with the approval of and under the signature of the NERC President; *provided*, that before the NERC President issues a directive pursuant to this paragraph (ii), [REGIONAL ENTITY] and, if applicable, other Regional Entities, shall be given a reasonable opportunity to present their positions on, and a suggested alternative version or versions of, the proposed directive to the NERC President.

(iii) Upon issuance of a directive by the NERC President, it shall be binding upon, and shall be complied with by, [REGIONAL ENTITY], subject to reasonable time periods for adoption, implementation, and funding of any necessary resources. Upon request by [REGIONAL ENTITY], the NERC Board (or a committee of the Board to which the Board delegates appropriate authority) shall review and shall confirm, revise or revoke any directive that was issued by the NERC President without [REGIONAL ENTITY]’s agreement, *provided*, that [REGIONAL ENTITY] shall request such review within thirty (30) days following issuance of the directive by the NERC President unless good cause can be shown for a later request.

(iv) NERC and [REGIONAL ENTITY] and, if applicable, other Regional Entities, shall collaborate in deciding whether a directive (whether issued pursuant to paragraph (ii) or paragraph (iii)) shall be made public. If no agreement is reached by the date of issuance as to whether the directive shall be made public, the NERC President shall decide whether the directive will be made public, *provided*, that is the intent of the Parties that the NERC President shall apply a presumption that directives should be made public, unless the NERC President

makes a written determination stating a specific reason for maintaining a particular directive as non-public.

(d) In addition to the issuance of directives pursuant to subsection (c), the NERC Board (or a Board committee to which the Board has delegated authority) may issue guidance or directions as to the manner in which [REGIONAL ENTITY], and, if applicable, other Regional Entities, shall perform delegated functions and related activities. The Board or Board committee shall also establish reasonable time periods for the implementation of any such guidance or directions, taking into account the impact on the reliability of the Bulk-Power System and the need for funding of additional resources. Any such guidance or directions shall be stated in writing and shall be public, unless the Board or Board committee makes a written determination stating a specific reason for maintaining particular guidance or directions as non-public. [REGIONAL ENTITY], either individually or in conjunction with other Regional Entities, may request that the NERC Board or Board committee reconsider or revise the guidance or direction.

(e) NERC shall conduct collaborative reviews with [REGIONAL ENTITY], either individually or in conjunction with one or more other Regional Entities, that provide for the exchange of information on practices, experiences, and lessons learned in the implementation of the delegated functions.

(f) Any audits of [REGIONAL ENTITY] performed by NERC shall be limited to an examination of [REGIONAL ENTITY]'s compliance with this Agreement, NERC's Rules of Procedure, the Compliance Monitoring and Enforcement Program, Commission requirements, and directives that are in effect pursuant to Section 8(c)

9. ~~8.~~ **Funding.** [REGIONAL ENTITY] and NERC shall ensure, subject to Commission approval in accordance with the ERO Regulations, that the delegated functions and related activities described in Sections 5, 6 and 7 and listed on Exhibit E have reasonable and adequate funding and resources by undertaking the following:

(a) ~~NERC shall fund [REGIONAL ENTITY]~~ [REGIONAL ENTITY] shall develop, through a collaborative process with NERC, and propose, an annual business plan and budget, in accordance with ERO Regulations, Commission orders and NERC business planning and budgeting policies and instructions. [REGIONAL ENTITY]'s proposed business plan and

budget shall describe the activities necessary for, and provide a budget with adequate resources for, [REGIONAL ENTITY] to carry out its Delegated Authority under this Agreement, including the functions ~~listed on Exhibit E, and shall not impose any obligation or requirement regarding Delegated Authority upon [REGIONAL ENTITY] without providing appropriate funding to carry out such mandates;~~ and activities described in Sections 5, 6 and 7 and listed on Exhibit E. [REGIONAL ENTITY]'s business plan and budget shall show the funding sources and amounts to fund the proposed budget, including as applicable assessments to end users, penalty monies, and other sources of funds.

(b) [REGIONAL ENTITY] and NERC agree that ~~costs~~the portion of ~~carrying out [REGIONAL ENTITY]'s responsibilities under the Delegation Agreement~~[REGIONAL ENTITY]'s approved budget for the functions and activities described in Sections 5, 6 and 7 and listed on Exhibit E that is to be funded by assessments, will be equitably allocated among end users within the geographic boundaries described in **Exhibit A** and recovered through a formula based on ~~net energy~~Net Energy for ~~load~~Load, or through such other formula as is proposed by [REGIONAL ENTITY] and approved by NERC and the Commission. If [REGIONAL ENTITY] proposes to use a formula other than ~~net energy~~Net Energy for ~~load~~Load beginning in the following year, [REGIONAL ENTITY] shall submit the proposed formula to NERC in sufficient time that NERC may review and approve the proposed formula and file it with the Commission by May 15 for approval ~~by May 15,~~ and the proposed formula shall be effective for the following year if approved by the Commission on or before the date the Commission approves the annual business plan and budget submitted by NERC and ~~[Regional Entity~~REGIONAL ENTITY] to the Commission pursuant to ~~18 C.F.R. §39.4~~the ERO Regulations for such year;

(c) NERC ~~will ensure~~shall determine that the assessments to fund the costs for its ~~responsibilities~~statutory functions in its Commission-approved budget are first allocated fairly among the ~~interconnections~~Interconnections and regions according to the applicability of this work to those ~~interconnections~~Interconnections and regions, and then equitably among the end users of the applicable interconnections and regions as appropriate. Allocation on a ~~net energy~~Net Energy for ~~load~~Load basis will be presumed to satisfy this equitability requirement.

(d) NERC shall provide [REGIONAL ENTITY] with the form ~~for budget submittal no later than April 30 of the prior year, or forms for business plan and budget submittal, and any~~

accompanying instructions, in accordance with the schedule for preparation of the business plan and budget developed by NERC and the Regional Entities.

(e) [REGIONAL ENTITY] shall submit its proposed annual business plan and budget for carrying out its Delegated Authority functions and related activities described in Sections 5, 6 and 7 and listed on Exhibit E, as well as for all other activities of [REGIONAL ENTITY], to NERC for review and approval in accordance with the annual schedule for the preparation of business plans and budgets which shall be developed collaboratively by NERC and the Regional Entities, as more fully described in **Exhibit E**.

(f) NERC shall fund [REGIONAL ENTITY]'s performance of its Delegated Authority and related activities in accordance with [REGIONAL ENTITY]'s Commission-approved business plan and budget, in the amount of [REGIONAL ENTITY]'s assessments to end users approved by the Commission. **Exhibit E** sets forth the procedures and timing for billing and collecting [REGIONAL ENTITY]'s approved assessments from end users and other entities and payment of the approved assessment amount to [REGIONAL ENTITY], unless otherwise modified and approved by NERC and the Commission. NERC shall not impose any material obligation or requirement regarding the Delegated Authority upon [REGIONAL ENTITY] that has not been provided for in an approved business plan and budget or an approved amended or supplemental business plan and budget, without [REGIONAL ENTITY]'s consent.

(g) ~~(e) [REGIONAL ENTITY] shall submit its annual budget for carrying out its Delegated Authority functions and related activities listed on **Exhibit E**, as well as all other [REGIONAL ENTITY] activities and funding to NERC no later than June 1 of the prior fiscal year such that NERC may submit its budget to the Commission 130 days in advance of the beginning of each fiscal year. The [REGIONAL ENTITY] budget submission shall include supporting materials, including [REGIONAL ENTITY]'s complete business plan and organization chart, explaining the proposed collection of all dues, fees and charges, and the proposed expenditure of funds collected in sufficient detail to justify the requested funding collection and budget expenditures.~~ NERC shall develop, in consultation with the Regional Entities, a reasonable and consistent system of accounts, with a level of detail and record keeping comparable to the Commission's Uniform System of Accounts and sufficient to allow the Commission to compare each Commission-approved NERC and [REGIONAL ENTITY]

fiscal year budget with the actual results at the NERC and Regional Entity ~~level~~levels.
[REGIONAL ENTITY] shall follow NERC's prescribed system of accounts except to the extent that NERC permits a departure from the prescribed system of accounts. NERC shall make an informational filing with the Commission describing any such waiver it permits and providing an explanation supporting the permitted departure.

~~(f) [REGIONAL ENTITY]'s funding system shall include reasonable reserve funding for unforeseen and extraordinary expenses and other contingencies, consistent with generally accepted accounting principles.~~

~~(g) NERC shall review and approve [REGIONAL ENTITY]'s budget for meeting its responsibilities under the Delegation Agreement.~~

(h) [REGIONAL ENTITY] shall submit unaudited quarterly interim financial statements in form provided by NERC no later than 20 days after the end of the fiscal quarter (March 31, June 30, September 30, and December 31).

(i) [REGIONAL ENTITY] shall submit audited financial statements annually, including supporting materials, in a form provided by NERC no later than ~~150 days after the end~~May 1 of the ~~fiscal~~following year.

~~(j) NERC shall have the right to review from time to time, in reasonable intervals but no less than every three years, the financial records of [REGIONAL ENTITY] in order to ensure that the documentation fairly represents in all material respects appropriate funding under this Agreement.~~
~~(k)~~ **Exhibit E** to this Agreement sets forth the mechanism through which [REGIONAL ENTITY] shall offset penalty monies it receives (other than penalty monies received from an operational function or division or affiliated entity of [REGIONAL ENTITY]) against its next year's annual budget for carrying out functions under this Agreement, and the mechanism by which [REGIONAL ENTITY] shall transmit to NERC any penalty monies received from an operational function or division or affiliated entity of [REGIONAL ENTITY]. Provided, that, subject to approval by NERC and the Commission, [REGIONAL ENTITY] may propose and implement an alternative use of penalty monies to that set forth in **Exhibit E**.

9.10. Assignment. This Agreement may be assigned by either Party only with the prior written consent of the other, which consent shall be granted or withheld in such non-assigning Party's sole discretion, subject to approval by the Commission. Any assignment under this

Agreement shall not relieve a Party of its obligations, nor shall a Party's obligations be enlarged, in whole or in part, by reason thereof. [REGIONAL ENTITY] may not delegate in whole or in part its Delegated Authority to any other entity without NERC's express consent; provided, however, that nothing in this provision shall prohibit [REGIONAL ENTITY] from contracting with other entities to assist it in carrying out its Delegated Authority, provided [REGIONAL ENTITY] retains control and responsibility for such Delegated Authority.

10.11. Default and Cure. Upon a Breach, the non-breaching Party shall give written notice of such Breach to the breaching Party (the "Default Notice"). Subject to a suspension of the following deadlines as specified below, the breaching Party shall have thirty (30) calendar days from receipt of the Default Notice within which to cure such Breach; *provided however*, that if such Breach is not capable of cure within thirty (30) calendar days, the breaching Party shall commence such cure within thirty (30) calendar days after notice and continuously and diligently complete such cure within ninety (90) calendar days from receipt of the Default Notice; and, if cured within such time, the Breach specified in such notice shall cease to exist. Subject to the limitation specified in the following sentence, if a Breach is not cured as provided in this ~~article~~, Section 11, or if a Breach is not capable of being cured within the period provided for herein, the nonbreaching Party shall have the right to declare a default and terminate this Agreement by written notice at any time until cure occurs, and be relieved of any further obligation hereunder. The deadlines for cure and the right to declare a default and terminate this Agreement shall be suspended during the pendency of any efforts or proceedings in accordance with Section ~~17~~18 of this Agreement to resolve a dispute as to whether a Breach has occurred or been cured. The provisions of this ~~article~~ Section 11 will survive termination of this Agreement.

11.12. Term and Termination.

(a) This Agreement shall become effective ~~thirty (30) days after the date of issuance of a final Commission order approving this Agreement without requiring any changes to this Agreement unacceptable to either Party~~ on [January 1, 2011] (the "Effective Date").

(b) The ~~initial~~ term of the Agreement shall be ~~three~~five (35) years from the ~~original effective date of May XX, 2007~~, Effective Date, prior to which time NERC shall conduct an audit pursuant to ~~subsections 6(e) and 7~~ subsection 6(i) to ensure that [REGIONAL ENTITY]

continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. If [REGIONAL ENTITY] meets such requirements, this Agreement may be renewed for another five (5) year term. This Agreement may be renewed for successive additional five (5) year renewal terms provided that prior to the end of each renewal term, NERC shall conduct an audit pursuant to subsection 6(i) to ensure that [REGIONAL ENTITY] continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. Provided, that either Party may terminate this Agreement as of the end of a term by giving written notice to terminate at least one (1) year prior to the end of the term. If this Agreement is not renewed or becomes subject to termination for any reason, the Parties shall work to ~~ensure~~provide for a transition of [REGIONAL ENTITY]'s Delegated Authority to NERC or to another eligible entity and to provide for the resolution of any wind-up costs associated with termination of this Agreement. The termination of this Agreement shall not take effect until such transition has been effected, unless the transition period exceeds one year, at which time [REGIONAL ENTITY] may unilaterally terminate.

(c) If any provision of this Agreement, or the application thereof to any person, entity or circumstance, is held by a court or regulatory authority of competent jurisdiction to be invalid, void, or unenforceable, or if a modification or condition to this Agreement is imposed by a regulatory authority exercising jurisdiction over this Agreement, the Parties shall endeavor in good faith to negotiate such amendment or amendments to this Agreement as will restore the relative benefits and obligations of the signatories under this Agreement immediately prior to such holding, modification or condition. If either Party finds such holding, modification or condition unacceptable and the Parties are unable to renegotiate a mutually acceptable resolution, either Party may unilaterally terminate this Agreement. Such termination shall be effective one year following written notice by either Party to the other Party and to the Commission, or at such other time as may be mutually agreed by [REGIONAL ENTITY] and NERC.

(d) Notwithstanding any termination of this Agreement, provisions contained in Limitation of Liability (Section ~~12~~13), No Third Party Beneficiaries (Section ~~13~~14) and Confidentiality (Section ~~14~~15) shall survive this Agreement in accordance with their terms until sixty (60) days following the expiration of any applicable statute of limitations.

12.13. Limitation of Liability. [REGIONAL ENTITY] and NERC agree not to sue each other or their directors, officers, employees, and persons serving on their committees and subgroups based on any act or omission of any of the foregoing in the performance of duties pursuant to this Agreement or in conducting activities under the authority of Section 215 of the Act, other than seeking a review of such action or inaction by the Commission. NERC and [REGIONAL ENTITY] shall not be liable to one another for any damages whatsoever, including without limitation, direct, indirect, incidental, special, multiple, consequential (including attorneys' fees and litigation costs), exemplary, or punitive damages arising out of or resulting from any act or omission associated with the performance of the [REGIONAL ENTITY]'s or NERC's responsibilities under this Agreement or in conducting activities under the authority of Section 215 of the Act, except to the extent that the [REGIONAL ENTITY] or NERC is found liable for gross negligence or intentional misconduct, in which case [REGIONAL ENTITY] or NERC shall not be liable for any indirect, incidental, special, multiple, consequential (including without limitation attorneys' fees and litigation costs), exemplary, or punitive damages.

13.14. No Third Party Beneficiaries. Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to, or any liability to, any third party.

14.15. Confidentiality. During the course of the Parties' performance under this Agreement, a Party may receive Confidential Information, as defined in Section 1500 of NERC's Rules of Procedure. Except as set forth herein, the Parties agree to keep in confidence and not to copy, disclose, or distribute any Confidential Information or any part thereof, without the prior written permission of the issuing Party, unless disclosure is required by subpoena, law, or other directive of a court, administrative agency, or arbitration panel, in which event the recipient hereby agrees to provide the Party that provided the Confidential Information with prompt notice of such request or requirement in order to enable such issuing Party to (a) seek an appropriate protective order or other remedy, (b) consult with the recipient with respect to taking steps to resist or narrow the scope of such request or legal process, or (c) waive compliance, in whole or in part, with the terms of this Section. In the event a protective order or other remedy is not obtained or the issuing Party waives compliance with the provisions, the recipient agrees to furnish only that portion of the Confidential Information which the

recipient's counsel advises is legally required and to exercise best efforts to obtain assurance that confidential treatment will be accorded to such Confidential Information. In addition, each Party shall ensure that its officers, trustees, directors, employees, subcontractors and subcontractors' employees, and agents to whom Confidential Information is exposed are under obligations of confidentiality that are at least as restrictive as those contained herein. This confidentiality provision does not prohibit reporting and disclosure as directed by NERC, as set forth in Section 6 of this Agreement.

15.16. Amendment. Neither this Agreement nor any of the terms hereof, may be amended unless such amendment is made in writing, signed by the Parties, and filed with and approved by the Commission.

17. ~~+6.~~ Amendments to the NERC Rules of Procedure. NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations, or programs of [REGIONAL ENTITY] under this Agreement without first obtaining the consent of [REGIONAL ENTITY], which consent shall not be unreasonably withheld or delayed. To the extent [REGIONAL ENTITY] does not consent, NERC shall have the right to invoke the dispute resolution provisions of Section ~~17~~18 and, if such effort fails to resolve the dispute, to petition the Commission to adopt the amendment to the NERC Rules of Procedure. To the extent that the Commission issues an order amending or materially affecting the rights or obligations of [REGIONAL ENTITY] under this Agreement, [REGIONAL ENTITY] shall have the option, exercisable no later than 60 days after issuance of such order, to terminate this Agreement. Such termination shall be effective one year following written notice by [REGIONAL ENTITY] to NERC and the Commission, or at such other time as may be mutually agreed by [REGIONAL ENTITY] and NERC.

17.18. Dispute Resolution. In the event a dispute arises under this Agreement between NERC and [REGIONAL ENTITY]; (including disputes relating to NERC's performance of its obligations under this Agreement and/or disputes relating to [REGIONAL ENTITY]'s performance of its obligations under this Agreement) which cannot be resolved through discussions between representatives of the Parties ~~with authority to settle the dispute shall meet~~

~~and confer in good faith in an effort to resolve the dispute in a timely manner. In the event the designated representatives are unable to resolve the dispute within thirty (30) days or such other period as the Parties may agree upon, each Party shall have all rights to pursue all remedies, except as expressly limited by the terms of this Agreement. Neither Party shall have the right to pursue other remedies until the Dispute Resolution procedures of this Section 17 have been exhausted. This Section 17 shall not apply to enforcement actions against individual entities.~~ in the normal course of operations, the Parties shall use the following procedures (“Dispute Resolution”) to attempt to resolve the dispute. [REGIONAL ENTITY] shall not suspend performance of any delegated function, and the Parties shall continue to make reasonable, good faith efforts to comply with their obligations under this Agreement, during the pendency of Dispute Resolution. All notices required to be sent pursuant to this Dispute Resolution procedure shall be sent in accordance with Section 19 of this Agreement. This Dispute Resolution procedure is separate from and in addition to all other processes provided for in this Agreement.

(a) The Party invoking Dispute Resolution shall send a notice to the other Party describing the dispute, stating the invoking Party’s position with respect to the dispute, stating that the Party is invoking Dispute Resolution, and naming the Party’s designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the invoking Party.

(b) Within three (3) business days after receipt of the notice invoking Dispute Resolution, the receiving Party shall send a notice to the invoking Party acknowledging receipt of the notice invoking Dispute Resolution, stating the receiving Party’s position with respect to the dispute, and naming the Party’s designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the receiving Party.

(c) During the period commencing three (3) business days and ending twenty (20) business days after the date of the receiving Party’s notice, the designated representatives shall engage in good faith negotiations to attempt to resolve the dispute, *provided*, that the designated representatives may agree prior to the end of such twenty (20) business day period that the process should move to the next step of Dispute Resolution.

(d) If the designated representatives are unable to arrive at a resolution of the dispute by the end of the time period described in subsection (c), they shall notify the chief executive officers of their respective Parties. The chief executive officers of the Parties shall thereafter engage in good faith negotiations to attempt to resolve the dispute during the period of twenty (20) business days immediately following the time period described in subsection (c), provided, that the chief executive officers may agree prior to the end of such twenty (20) business day period that negotiations are at impasse and the process may move to the next step as described in subsection (f). Upon mutual agreement of the Parties, the twenty (20) business day period may be extended to pursue ongoing good faith negotiations.

(e) If a resolution of the dispute is achieved by the Parties, it shall be memorialized in a writing that is acceptable in form and substance to each party and is signed by the designated representative or chief executive officer on behalf of each Party.

(f) If the Parties are unable to resolve the dispute pursuant to the process described in subsections (a) through (e), then either Party may invoke any other available dispute resolution mechanism, including, without limitation, filing a complaint or petition with the Commission requesting resolution of the dispute by the Commission, or filing a complaint for relief in a court having jurisdiction over Parties and the subject matter of the dispute in accordance with Section 20. Provided, however, that: (i) it is the intent of the Parties that unresolved disputes shall be presented to and resolved by the Commission if the Commission has and accepts jurisdiction over the subject matter of the dispute, (ii) the Parties may, by mutual agreement, attempt to resolve the dispute through arbitration, mediation, or other process involving resort to an impartial neutral, and (iii) it is the intent of the Parties that resolution of disputes through Commission proceedings, arbitration, mediation, or other use of an impartial neutral, is preferred over resort to judicial proceedings.

(g) This Section 18 shall not apply to compliance enforcement actions against individual Registered Entities.

~~18-19~~ Notice. Whether expressly so stated or not, all notices, demands, requests, and other communications required or permitted by or provided for in this Agreement shall be given in writing to a Party at the address set forth below, or at such other address as a Party shall

designate for itself in writing in accordance with this Section, and shall be delivered by hand or reputable overnight courier:

19.20. Governing Law. When not in conflict with or preempted by federal law, this Agreement will be governed by and construed in accordance with the laws of New Jersey without giving effect to the conflict of law principles thereof. The Parties recognize and agree not to contest the exclusive or primary jurisdiction of the Commission to interpret and apply this Agreement; provided however that if the Commission declines to exercise or is precluded from exercising jurisdiction of any action arising out of or concerning this Agreement, such action shall be brought in any state or federal court of competent jurisdiction in New Jersey. All Parties hereby consent to the jurisdiction of any state or federal court of competent jurisdiction in New Jersey for the purpose of hearing and determining any action not heard and determined by the Commission.

20.21. Headings. The headings and captions in this Agreement are for convenience of reference only and shall not define, limit, or otherwise affect any of the terms or provisions hereof.

21.22. Savings Clause. Nothing in this Agreement shall be construed to preempt or limit any authority that [REGIONAL ENTITY] may have to adopt reliability requirements or take other actions to ~~ensure~~maintain reliability of the ~~bulk power system~~Bulk-Power System within the geographic boundaries described in **Exhibit A** that are outside the ~~authority delegated from NERC~~Delegated Authority, as long as such reliability requirements and actions are not inconsistent with Reliability Standards applicable to the region described in **Exhibit A** and do not result in a lessening of reliability outside the region described in **Exhibit A**.

~~22~~23. **Entire Agreement.** This Agreement constitutes the entire agreement, and supersedes all prior agreements and understandings, both written and oral, among the parties with respect to the subject matter of this Agreement.

~~23~~24. **Execution of Counterparts.** This Agreement may be executed in counterparts and each shall have the same force and effect as the original.

NOW THEREFORE, the parties have caused this Agreement to be executed by its duly authorized representatives, effective as of the ~~date first above written~~Effective Date.

NORTH AMERICAN
ELECTRIC RELIABILITY CORPORATION

[REGIONAL ENTITY]

By: _____

By: _____

Name: _____

Name: _____

Title: _____

Title: _____

Date: _____

Date: _____

Exhibit A — Regional Boundaries

Exhibit A to the delegation agreement for each Regional Entity receiving Delegated Authority shall describe the geographic or electrical boundaries covered by the proposed delegation of authority. **Exhibit A** for each Regional Entity shall reflect coordination with neighboring Regional Entities, as appropriate, to ensure that all relevant areas are either included within the geographic boundaries of a Regional Entity or specifically identified as not being within the geographic boundaries of any Regional Entity. Any exclusions of geographic or electrical areas or of Registered Entities from the scope of the Regional Entity's Delegated Authority within the geographic or electrical boundaries shown on **Exhibit A**, and any additions of geographic or electrical areas or of Registered Entities located outside the boundaries shown on **Exhibit A** to the scope of the Regional Entity's Delegated Authority, shall be specifically stated or described in **Exhibit A**.

Exhibit B – Governance

Exhibit B shall set forth the Regional Entity’s bylaws, which NERC agrees demonstrate that the Regional Entity meets the following criteria:

CRITERION 1: The Regional Entity shall be governed by an independent board, a balanced stakeholder board, or a combination independent and balanced stakeholder board. (Federal Power Act § 215(e)(4)(A), 18 C.F.R. § 39.8(c)(1), Order No. 672 at ¶ 727.)

CRITERION 2: The Regional Entity has established rules that assure its independence of the users and owners and operators of the bulk power system, while assuring fair stakeholder representation in the selection of its directors. Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 699, 700.)

CRITERION 3: If the Regional Entity has members, the Regional Entity has established rules that assure that its membership is open, that it charges no more than a nominal membership fee and agrees to waive the fee for good cause shown, and that membership is not a condition for participating in the development of or voting on proposed Regional Reliability Standards. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 170-173.)

CRITERION 4: The Regional Entity has established rules that assure balance in its decision-making committees and subordinate organizational structures and assure no two industry sectors can control any action and no one industry sector can veto any action. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶ 728.)

CRITERION 5: The Regional Entity has established rules that provide reasonable notice and opportunity for public comment, due process, openness, and balance of interests in exercising its duties. (Federal Power Act § 215(c)(2)(D) and (e)(4), 18 C.F.R. § 39.8(c)(2).)

Exhibit C – Regional Standard Development Procedure

Exhibit C shall set forth the Regional Entity’s standards development procedure, which NERC agrees meets the following common attributes:

COMMON ATTRIBUTE 1

Proposed regional reliability standards shall be subject to approval by NERC, as the electric reliability organization, and by FERC before becoming mandatory and enforceable under Section 215 of the FPA [add reference to any applicable authorities in Canada and Mexico]. No regional reliability standard shall be effective within the [Regional Entity Name] area unless filed by NERC with FERC [and applicable authorities in Canada and Mexico] and approved by FERC [and applicable authorities in Canada and Mexico].

COMMON ATTRIBUTE 2

[Regional Entity Name] regional reliability standards shall provide for as much uniformity as possible with reliability standards across the interconnected bulk power system of the North American continent. A [Regional Entity Name] reliability standard shall be more stringent than a continent-wide reliability standard, including a regional difference that addresses matters that the continent-wide reliability standard does not, or shall be a regional difference necessitated by a physical difference in the bulk power system. A regional reliability standard that satisfies the statutory and regulatory criteria for approval of proposed North American reliability standards, and that is more stringent than a continent-wide reliability standard, would generally be acceptable.

COMMON ATTRIBUTE 3

[Regional Entity Name] regional reliability standards, when approved by FERC [add applicable authorities in Canada], shall be made part of the body of NERC reliability standards and shall be enforced upon all applicable bulk power system owners, operators, and users within the [Regional Entity Name] area, regardless of membership in the region.

COMMON ATTRIBUTE 4

Requester — The requester is the sponsor of the regional reliability standard request and may assist in the development of the standard. Any member of [Regional Entity Name], or group within [Regional Entity Name] shall be allowed to request that a regional reliability standard be developed, modified, or withdrawn. Additionally, any entity (person, organization, company, government agency, individual, etc.) that is directly and materially affected by the reliability of the bulk power system in the [Regional Entity Name] area shall be allowed to request a regional reliability standard be developed, modified, or withdrawn.

COMMON ATTRIBUTE 5

[Standards or other named] committee — The [Regional Entity Name] [standards] committee manages the standards development process. The [standards] committee will consider which requests for new or revised standards shall be assigned for development (or existing standards considered for deletion). The [standards] committee will advise the [Regional Entity Name] board on standards presented for adoption.

COMMON ATTRIBUTE 6

[Alternative 6A: For a Regional Entity that chooses to vote using a balanced stakeholder committee.]

The [standards] committee is a balanced stakeholder committee, inclusive of all stakeholder interests that provide for or are materially impacted by the reliability of the bulk power system. [The [standards] committee votes to approve standards.] See Appendix A for the representation model of the [standards] committee.

[Alternative 6B: For a Regional Entity that chooses to vote using a balanced ballot body of stakeholders.]

[Registered ballot body] — The registered ballot body comprises all entities or individuals that qualify for one of the stakeholder segments; are registered with [Regional Entity Name] as potential ballot participants in the voting on standards; and are current with any designated fees. Each member of the registered ballot body is eligible to vote on standards. [Each standard action has its own ballot pool formed of interested members of the registered ballot body. Each ballot pool comprises those members of the registered ballot body that respond to a pre-ballot survey for that particular standard action indicating their desire to participate in such a ballot pool.] The representation model of the registered ballot body is provided in Appendix A.]

COMMON ATTRIBUTE 7

[Regional Entity Name] will coordinate with NERC such that the acknowledgement of receipt of a standard request identified in step 1, notice of comment posting period identified in step 4, and notice for vote identified in step 5 below are concurrently posted on both the [Regional Entity Name] and NERC websites.

COMMON ATTRIBUTE 8

An acceptable standard request shall contain a description of the proposed regional reliability standard subject matter containing sufficiently descriptive detail to clearly define the purpose, scope, impacted parties, and other relevant information of the proposed standard.

COMMON ATTRIBUTE 9

Within [no greater than 60] days of receipt of a completed standard request, the [standards] committee shall determine the disposition of the standard request.

COMMON ATTRIBUTE 10

The [standards] committee may take one of the following actions:

- Accept the standard request as a candidate for development of a new standard, revision of an existing standard, or deletion of an existing standard. The [standards] committee may, at its discretion, expand or narrow the scope of the standard request under consideration. The [standards] committee shall prioritize the development of standard in relation to other proposed standards, as may be required based on the volume of requests and resources.
- Reject the standard request. If the [standards] committee rejects a standard request, a written explanation for rejection will be delivered to the requester within [no greater than 30] days of the decision.
- Remand the standard request back to the requester for additional work. The standards process manager will make reasonable efforts to assist the requester in addressing the deficiencies identified by the [standards] committee. The requester may then resubmit the modified standard request using the process above. The requester may choose to withdraw the standard request from further consideration prior to acceptance by the [standards] committee.

COMMON ATTRIBUTE 11

Any standard request that is accepted by the [standards] committee for development of a standard (or modification or deletion of an existing standard) shall be posted for public viewing on the [Regional Entity Name] website within [no greater than 30] days of acceptance by the committee.

COMMON ATTRIBUTE 12

The standards process manager shall submit the proposed members of the drafting team to the [standards] committee. The [standards] committee shall approve the drafting team membership within 60 days of accepting a standard request for development, modifying the recommendations of the standards process manager as the committee deems appropriate, and assign development of the proposed standard to the drafting team.

COMMON ATTRIBUTE 13

At the direction from the [standards] committee, the standards process manager shall facilitate the posting of the draft standard on the [Regional Entity Name] website, along with a draft implementation plan and supporting documents, for a no less than a [30]-day comment period. The standards process manager shall provide notice to [Regional Entity Name] stakeholders and other potentially interested entities, both within and outside of the [Regional Entity Name] area, of the posting using communication procedures then currently in effect or by other means as deemed appropriate.

COMMON ATTRIBUTE 14

The drafting team shall prepare a summary of the comments received and the changes made to the proposed standard as a result of these comments. The drafting team shall summarize comments that were rejected by the drafting team and the reason(s) that these comments were rejected, in part or whole. The summary, along with a response to each comment received will be posted on the [Regional Entity Name] website no later than the next posting of the proposed standard.

COMMON ATTRIBUTE 15

Upon recommendation of the drafting team, and if the [standards] committee concurs that all of the requirements for development of the standard have been met, the standards process manager shall post the proposed standard and implementation plan for ballot and shall announce the vote to approve the standard, including when the vote will be conducted and the method for voting. Once the notice for a vote has been issued, no substantive modifications may be made to the proposed standard unless the revisions are posted and a new notice of the vote is issued.

COMMON ATTRIBUTE 16

The standards process manager shall schedule a vote by the [Regional Entity Name] [registered ballot body/[standards] committee]. The vote shall commence no sooner than [15] days and no later than [30] days following the issuance of the notice for the vote.

COMMON ATTRIBUTE 17

[Alternative 17A: For an RE that chooses to vote using a balanced stakeholder committee.]

The [standards] committee shall give due consideration to the work of the drafting team, as well as the comments of stakeholders and minority objections, in approving a proposed regional reliability standard for submittal to the [Regional Entity Name] board. The [standards]

committee may vote to approve or not approve the standard. Alternatively, the [standards] committee may remand the standard to the drafting team for further work or form a new drafting team for that purpose.

[Alternative 17B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

The [Regional Entity Name] registered ballot body shall be able to vote on the proposed standard during a period of [not less than 10] days.

COMMON ATTRIBUTE 18

[Alternative 18A: For an RE that chooses to vote using a balanced stakeholder committee.]

The [standards] committee may not itself modify the standard without issuing a new notice to stakeholders regarding a vote of the modified standard.

[Alternative 18B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

All members of [Regional Entity Name] are eligible to participate in voting on proposed new standards, standard revisions or standard deletions. [Alternatively: Each standard action requires formation of a ballot pool of interested members of the registered ballot body.]

COMMON ATTRIBUTE 19

[Alternative 19A: For an RE that chooses to vote using a balanced stakeholder committee.]

Actions by the committee shall be recorded in the regular minutes of the committee.

[Alternative 19B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

Approval of the proposed regional reliability standard shall require a [two thirds] majority in the affirmative (affirmative votes divided by the sum of affirmative and negative votes). Abstentions and non-responses shall not count toward the results, except that abstentions may be used in the determination of a quorum. A quorum shall mean [XX%] of the members of the [registered ballot body/ballot pool] submitted a ballot.

COMMON ATTRIBUTE 20

Under no circumstances may the board substantively modify the proposed regional reliability standard.

COMMON ATTRIBUTE 21

Once a regional reliability standard is approved by the board, the standard will be submitted to NERC for approval and filing with FERC [and applicable authorities in Canada and Mexico.]

COMMON ATTRIBUTE 22

- **Open** - Participation in the development of a regional reliability standard shall be open to all organizations that are directly and materially affected by the [Regional Entity Name] bulk power system reliability. There shall be no undue financial barriers to participation. Participation shall not be conditioned upon membership in [Regional Entity Name], and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements. Meetings of drafting teams shall be open to the [Regional Entity Name] members and others.

COMMON ATTRIBUTE 23

- **Balanced** - The [Regional Entity Name] standards development process strives to have an appropriate balance of interests and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter.

COMMON ATTRIBUTE 24

- **Inclusive** — Any entity (person, organization, company, government agency, individual, etc.) with a direct and material interest in the bulk power system in the [Regional Entity Name] area shall have a right to participate by: a) expressing a position and its basis, b) having that position considered, and c) having the right to appeal.

COMMON ATTRIBUTE 25

- **Fair due process** — The regional reliability standards development procedure shall provide for reasonable notice and opportunity for public comment. At a minimum, the procedure shall include public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of interested stakeholders.

COMMON ATTRIBUTE 26

- **Transparent** — All actions material to the development of regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the regional entity's Web site.

COMMON ATTRIBUTE 27

- Does not unnecessarily delay development of the proposed reliability standard.

COMMON ATTRIBUTE 28

Each standard shall enable or support one or more of the reliability principles, thereby ensuring that each standard serves a purpose in support of the reliability of the regional bulk power system. Each standard shall also be consistent with all of the reliability principles, thereby ensuring that no standard undermines reliability through an unintended consequence.

COMMON ATTRIBUTE 29

While reliability standards are intended to promote reliability, they must at the same time accommodate competitive electricity markets. Reliability is a necessity for electricity markets, and robust electricity markets can support reliability. Recognizing that bulk power system reliability and electricity markets are inseparable and mutually interdependent, all regional reliability standards shall be consistent with NERC's market interface principles. Consideration of the market interface principles is intended to ensure that standards are written such that they achieve their reliability objective without causing undue restrictions or adverse impacts on competitive electricity markets.

COMMON ATTRIBUTE 30

To ensure uniformity of regional reliability standards, a regional reliability standard shall consist of the elements identified in this section of the procedure. These elements are intended to apply a systematic discipline in the development and revision of standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

COMMON ATTRIBUTE 31

All mandatory requirements of a regional reliability standard shall be within the standard. Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself.

COMMON ATTRIBUTE 32

Applicability	<p>Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions.</p> <p>If not applicable to the entire [Regional Entity Name] area, then a clear identification of the portion of the bulk power system to which the standard applies.</p> <p>Any limitation on the applicability of the standard based on electric facility requirements should be described.</p>
----------------------	--

COMMON ATTRIBUTE 33

Measure(s)	<p>Each requirement shall be addressed by one or more measures. Measures are used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure will identify to whom the measure applies and the expected level of performance or outcomes required demonstrating compliance. Each measure shall be tangible, practical, and as objective as is practical. It is important to realize that measures are proxies to assess required performance or outcomes. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.</p>
-------------------	---

COMMON ATTRIBUTE 34

Compliance Monitoring Process	<p>Defines for each measure:</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible for providing the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes. • The entity that is responsible for evaluating data or
--------------------------------------	---

	<p>information to assess performance or outcomes.</p> <ul style="list-style-type: none">• The time period in which performance or outcomes is measured, evaluated, and then reset.• Measurement data retention requirements and assignment of responsibility for data archiving.• Violation severity levels.
--	---

EXHIBIT D – COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

1.0 REGIONAL COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

~~1.1 Obligations of [Fill in Name of Regional Entity]~~

~~[Fill in Name of Regional Entity REGIONAL ENTITY] will implement the NERC Compliance Monitoring and Enforcement Program, (Appendix 4C to the NERC Rules of Procedure) (which for purposes of this section 1.0 shall not include Attachment 2, Hearing Procedures), to monitor and enforce compliance with Reliability Standards by the owners, operators, and users within [Fill in Name of Regional Entity REGIONAL ENTITY]'s geographic or electrical boundaries, and such other scope, set forth on Exhibit A of this Agreement, subject to any deviations from the NERC Compliance Monitoring and Enforcement Program described in Section 1.2 below (the "Compliance Program").~~

~~1.2 Deviations from the NERC Compliance Monitoring and Enforcement Program~~

~~[Describe each deviation from the NERC Compliance Monitoring and Enforcement Program required by the Regional Entity. Identify each NERC Compliance Monitoring and Enforcement Program section from which a deviation is required by the Regional Entity. For each section describe how the Regional Entity will implement its alternative, why the alternative is necessary, and how that alternative meets the obligations set forth in the NERC Rules of Procedure and Section 39.7 of FERC Order 672. Separate attachments to this Exhibit D may be used if the information is voluminous.]~~

2.0 REGIONAL HEARING OF COMPLIANCE MATTERS

~~[Fill in Name of Regional Entity REGIONAL ENTITY] shall establish and maintain a hearing body with authority to conduct and render decisions in compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan, which shall be either [Fill in Name of Regional Entity REGIONAL ENTITY]'s board or a balanced compliance panel reporting directly to [Fill in Name of Regional Entity REGIONAL ENTITY]'s board. [Fill in Name of Regional Entity REGIONAL ENTITY]'s hearing body is [its board] [if not the board, insert the name of the committee or group serving as the hearing body].~~

~~[If the hearing body is a compliance panel other than the board, provide here a description of how the members of the compliance panel are selected and the qualifications to be selected for the compliance panel.]~~

[REGIONAL ENTITY] shall conduct all compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, proposed Mitigation Plan, or a proposed Remedial Action Directive, in accordance with Attachment 2, Hearing Procedures, to the NERC Compliance Monitoring and Enforcement Program, subject to the following deviations, if any: [Describe any deviations, or state "None". If there are deviations from the NERC pro forma Hearing Procedures, [REGIONAL ENTITY]'s Hearing Procedures shall be included as a separate attachment to this Exhibit D.]

3.0 OTHER DECISION-MAKING BODIES

If [~~Fill in Name of Regional Entity~~] uses other decision-making bodies within its compliance program, provide here a description of the function of that body to the extent not described elsewhere in the Agreement or exhibits, how the members of that body are selected, and the qualifications to be selected for that body.]

Exhibit E — Funding

1. Scope of activities funded through the ERO funding mechanism

[Regional Entity] shall include in its annual budget submission to NERC amounts for costs it will incur in ~~support of performing its~~ delegated ~~activities~~functions and related activities ~~that are in furtherance of NERC's responsibilities as the ERO under the Act, as specified in the NERC Rules~~ as described in Sections 5, 6 and 7 of the Agreement. These activities shall include:

- Reliability Standard Development ~~(Section 300)~~
- Compliance Monitoring and Enforcement ~~(Section 400)~~
- Organization Registration and Certification ~~(Section 500)~~
- ~~Reliability Readiness Evaluation and Improvement (Section 700)~~
- Reliability Assessment and Performance Analysis (~~Section 800~~) ~~(including necessary data gathering activities)~~
- Event Analysis and Reliability Improvement
- Training and Education ~~(Section 900)~~
- Situation Awareness
- ~~Situational Awareness and~~ Infrastructure Security ~~(Section 1000)~~

2. Preparation of Annual Business Plan and Budget

(a) NERC and [Regional Entity], in conjunction with the other Regional Entities, shall collaboratively develop an annual schedule for the development, submission, review and approval of [Regional Entity's] business plan and budget. The annual schedule for the preparation of business plans and budgets shall require [Regional Entity] (i) to submit to NERC draft(s) of [Regional Entity]'s proposed business plan and budget and other preliminary documents and information, and (ii) to submit a final proposed business plan and budget that has been approved by [Regional Entity] Board of Trustees to NERC by July 1 or such other agreed date as provides sufficient time for NERC's review, approval and submission of [Regional Entity]'s business plan and budget to the Commission 130 days in advance of the beginning of each fiscal year. The [Regional Entity] business plan and budget submission shall include supporting materials, including [Regional Entity]'s complete business plan and organization chart, explaining the proposed collection of all assessments, dues, fees and charges, and the proposed expenditure of the funds to be collected in sufficient detail to justify the requested budgeted expenditures and assessments. [Regional Entity]'s business plan and budget and proposed assessments shall provide for reasonable reserve mechanisms for unforeseen and extraordinary expenses and other contingencies, consistent with generally accepted accounting principles.

(b) NERC shall review and approve [Regional Entity]'s proposed business plan and budget and proposed assessments for performing the delegated functions and related activities described in Sections 5, 6 and 7 of this Agreement and listed above in Section 1 of this Exhibit E, or shall direct [Regional Entity] to make such revisions as NERC deems appropriate prior to approval. NERC shall submit [Regional Entity]'s approved business plan and budget and proposed assessments to the Commission for approval as part of

NERC's overall business plan and budget submission, in accordance with the ERO Regulations.

3. Allocation of Costs

~~[Regional Entity] shall allocate its dues, fees, and other charges for its~~ Assessments to fund the costs of [REGIONAL ENTITY]'s delegated functions and related activities pursuant to the ~~delegation agreement~~ Agreement shall be allocated among all load-serving entities on the basis of ~~net energy-Net Energy~~ for load ~~Load~~, unless a different method(s) of allocating and calculating such ~~dues, fees and charges~~ assessments has been submitted to and approved by NERC and the Commission in accordance with Section 89(b) of the ~~delegation agreement~~ Agreement. [Regional Entity] shall submit to NERC annually at the same time it submits its budget request a list of the load-serving entities or designees within its geographic boundaries ~~and their~~ that shall be responsible for paying [Regional Entity's] assessment and the load-serving entities' proportionate ~~net energy~~ Net Energy for ~~load~~ Load, and such other data and information as is necessary to allocate and calculate the allocation of [Regional Entity's] ~~dues, fees and charges under any such different~~ assessment to the load-serving entities or designees under the method(s) of allocation and calculation that will be used.

3.4. Collection of Funding

[IF NERC WILL BILL AND COLLECT ASSESSMENTS DIRECTLY FROM LOAD-SERVING ENTITIES IN REGIONAL ENTITY'S REGION, USE THE FOLLOWING TEXT FOR SECTION 34(a):]

(a) NERC shall submit invoices to the load-serving entities or designees identified by [Regional Entity] covering the NERC and [Regional Entity] ~~budgets~~ assessments approved for collection.

~~NERC shall pursue any non-payments and shall request assistance from applicable governmental authorities as necessary to secure collection.~~

[IF THE REGIONAL ENTITY WILL ACT AS THE BILLING AND COLLECTION AGENT ON BEHALF OF NERC TO BILL AND COLLECT ASSESSMENTS FROM LOAD-SERVING ENTITIES IN REGIONAL ENTITY'S REGION, USE THE FOLLOWING TEXT FOR SECTION 34(a):]

(a) NERC and [Regional Entity] agree that [Regional Entity] shall act as the billing and collection agent on behalf of NERC to bill and collect [Regional Entity]'s assessments ~~for the costs of activities under the Act~~ from load-serving entities and designees (or such other entities as agreed by NERC and [Regional Entity]). [Regional Entity] agrees that it shall (i) issue all invoices to load-serving entities and other entities in a prompt and timely manner after receipt from NERC of the information needed to issue the invoices; (ii) exercise commercially reasonable efforts to collect invoices that are not paid as of the due date(s); and (iii) transfer all funds collected to NERC in a timely manner, as follows: ~~Once~~ Prior to

the start of each calendar quarter, and once per week thereafter until all billings for the quarter are collected, [Regional Entity] will electronically transfer to NERC, in immediately available funds, all payments received by [Regional Entity] from load-serving entities or other entities ~~during that week~~ for payment of invoices. On the same day that [Regional Entity] makes each electronic transfer of funds to NERC, [Regional Entity] shall send an e-mail to the Chief Financial Officer or Controller of NERC detailing the collections being transmitted, including a listing of the load-serving entities or other entities from which payments were collected and the amount collected from each entity. [Note: If NERC and Regional Entity have a different collection and payment arrangement, the preceding two sentences will be modified accordingly to describe it.]

[Regional Entity] agrees that it shall not in any way use its position as billing and collection agent for NERC to attempt to influence NERC's policies or decisions on matters relating to adoption of ~~reliability standards~~ Reliability Standards (including ~~regional standards and differences~~ Regional Reliability Standards and Regional Variances), administration of the compliance monitoring and enforcement program and other compliance and enforcement matters, determination and imposition of penalties and sanctions, budgeting matters including review and approval of [Regional Entity's] budgets and business plans, or any other NERC decisions, including by issuing invoices, engaging in collection activities or transferring funds collected to NERC in an untimely manner or other than in accordance with this Agreement.

~~(b) Upon approval of the annual funding requirements by applicable governmental authorities, NERC shall fund [Regional Entity's] costs identified in Section 1 of this Exhibit E in four equal quarterly payments.~~

(b) NERC shall pursue any non-payments of assessment amounts and shall request assistance from ERO Governmental Authorities as necessary to secure collection. To the extent reasonably practicable, [Regional Entity] shall assist NERC in pursuing and collecting any non-payments. Notwithstanding the foregoing, [Regional Entity] is not responsible and does not assume any liability for recovering non-payments or underpayments of assessment amounts. NERC shall retain sole responsibility for recovering non-payments or underpayments of assessment amounts. NERC shall add the amount of any non-payments by end-users or designees within [REGIONAL ENTITY]'s region, that are reasonably determined to be uncollectible, to NERC's assessments for a subsequent year with the amount of such non-payments to be allocated to end-users within [Regional Entity]'s region.

(c) Upon approval by ERO Governmental Authorities of [Regional Entity]'s annual assessment to fund the costs of its delegated functions and related activities, NERC shall pay [Regional Entity's] annual assessment to Regional Entity in four equal quarterly payments on January 15, April 15, July 15 and October 15 of the budget year.

4.5. Application of Penalties

~~All~~ Except as otherwise approved by the Commission, all penalty monies received by [Regional Entity], other than penalty monies received from an operational function or

division or affiliated entity of [Regional Entity], shall be applied as a general offset to ~~the~~ ~~entity~~ [Regional Entity]'s budget requirements for U.S.-related activities under this Agreement for the subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity. ~~Any~~ Except as otherwise approved by the Commission, any penalty monies received from an operational function or division or affiliated entity of [Regional Entity] shall be transmitted to or retained by NERC and shall be used by NERC as a general offset to NERC's budget for its activities as the ERO under the Act for the following year.

5.6. Budget and Funding for [Regional Entity's] Non-Statutory Activities

In addition to its delegated ~~activities~~ functions and related activities ~~that are in furtherance of NERC's responsibilities as the ERO under the Act~~, as specified in Sections 5, 6 and 7 of the Agreement and in Section 1 of this **Exhibit E** (such delegated functions and activities referred to in this Section 56 as "statutory activities"), [Regional Entity] performs the following other functions and activities (such other functions and activities being referred to in this Section 56 as "non-statutory activities"): [List and describe all non-statutory activities performed by Regional Entity, or state "None".]

[Regional Entity] shall employ the following methods and procedures to (i) keep its funding mechanisms for its statutory activities separate from its funding mechanisms for its non-statutory activities, and (ii) record the costs it incurs in the performance of its non-statutory functions separately from the costs it incurs in the performance of its statutory functions: [List and ~~described~~ describe the methods and procedures Regional Entity employs to keep costs and funding of statutory activities separate from costs and funding of non-statutory activities, including at a minimum a description of how Regional Entity's bank accounts and receivables/payables procedures are set up for both statutory and non-statutory functions ~~and~~, a description of how Regional Entity ensures each employee involved in both statutory and non-statutory functions keeps accurate time records reflecting his/her activities, and a description of how Regional Entity's general and administrative costs are allocated between statutory activities and non-statutory activities. If the necessary descriptions are lengthy they may be provided in a separate attachment labeled "Attachment E-1", and state here "See Attachment E-1." If Regional Entity has listed no non-statutory functions in the preceding paragraph, state here "Not applicable."]

[Regional Entity] shall provide its budget for such non-statutory activities to NERC at the same time that [Regional Entity] submits its proposed annual business plan and budget ~~request~~ for statutory activities to NERC pursuant to Section ~~4-9~~ 9 of the Agreement. [Regional Entity's] budget for non-statutory activities that is provided to NERC shall contain a detailed list of [Regional Entity's] non-statutory activities and a description of the funding sources for the non-statutory activities. [Regional Entity] agrees that no costs (which shall include a reasonable allocation of [Regional Entity]'s general and administrative costs) of non-statutory activities are to be included in the calculation of [Regional Entity's] assessments, dues, fees, and other charges for its statutory activities.

7. Amended or Supplemental Business Plans and Budgets

During the course of the fiscal year, if [Regional Entity] determines it does not or will not have sufficient funds to carry out its delegated functions and related activities, [Regional Entity] shall submit to NERC one or more proposed amended or supplemental business plans and budgets and requests for approval of supplemental assessments, reflecting costs, cost increases or funding shortfalls not provided for in [Regional Entity]'s approved business plan and budget for the fiscal year. NERC shall review and approve the proposed amended or supplemental business plan and budget and proposed supplemental assessment, or shall direct [Regional Entity] to make such revisions as NERC deems appropriate prior to approval. NERC shall submit [Regional Entity]'s approved amended or supplemental business plan and budget and proposed supplemental assessment to the Commission for approval.

8. NERC Review of Regional Entity Financial Statements

NERC shall conduct reviews of the quarterly and annual financial statements submitted by [Regional Entity] pursuant to Section 9(h) and (i) of the Agreement. [Regional Entity] shall provide supporting documentation for the quarterly and annual financial statements as reasonably requested by NERC based on its reviews.

Mr. David Cook
Vice President, General Counsel
NERC
1120 G St. NW, Suite 990
Washington DC 20005

RE: REVISED FRCC REGIONAL DELEGATION AGREEMENT

Dear David:

The Florida Reliability Coordinating Council (FRCC) Board of Directors, Regional Entity Division, passed the motion below regarding the Amended and Restated FRCC Regional Delegation Agreement at its board meeting today, May 5, 2010.

Motion to approve the FRCC Regional Delegation Agreement, as amended, and to authorize the FRCC President and CEO, Sarah S. Rogers, to execute the Agreement on behalf of the FRCC, and to make any non-substantive changes necessary to finalize the document for filing with NERC.

Pursuant to your request, we are providing you the Amended and Restated FRCC Regional Delegation Agreement, for presentation to the NERC Board of Trustees.

If you have any questions, please feel free to give me a call.

Sincerely,

SARAH S ROGERS
President and CEO

**AMENDED AND RESTATED DELEGATION AGREEMENT BETWEEN
NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION
AND FLORIDA RELIABILITY COORDINATING COUNCIL**

AMENDED AND RESTATED DELEGATION AGREEMENT (“Agreement”) made as of [January 1, 2011], between the North American Electric Reliability Corporation (“NERC”), an organization certified by the Federal Energy Regulatory Commission (“Commission”) pursuant to Section 215(c) of the Federal Power Act to establish and enforce Reliability Standards for the Bulk-Power System, and Florida Reliability Coordinating Council (“FRCC”), an organization established to develop and enforce Reliability Standards within the geographic boundaries identified on **Exhibit A** to this Agreement, and for other purposes. NERC and FRCC may be individually referred to herein as “Party” or collectively as “Parties.”

WITNESSETH

WHEREAS, Subtitle A of the Electricity Modernization Act of 2005 added Section 215 to the Federal Power Act (16 U.S.C. § 824n) (hereafter “the Act”), which, among other things, provides for the establishment of an electric reliability organization (“ERO”) to develop and enforce Reliability Standards applicable to all owners, operators, and users of the Bulk-Power System;

WHEREAS, the Commission has adopted regulations for the implementation of the Act, which are set forth at Chapter I, Title 18, Code of Federal Regulations, Part 39 (the “ERO Regulations”);

WHEREAS, the Commission has certified NERC as the ERO that will, in accordance with the Act, establish and enforce Reliability Standards for the Bulk-Power System, subject to certain delegation provisions described below;

WHEREAS, the Act recognizes the international interdependency of electric reliability within North America and envisions the ERO and such applicable Regional Entities as international organizations;

WHEREAS, the Act and Section 39.8 of the ERO Regulations provide for the delegation by the ERO of authority to propose and enforce Reliability Standards to regional entities (“Regional Entities”) such as FRCC provided that:

(A) The Regional Entity is governed by —

- (i) an independent board;
- (ii) a balanced stakeholder board; or
- (iii) a combination independent and balanced stakeholder board.

(B) The Regional Entity otherwise satisfies the provisions of Section 215(c)(1) and (2) of the Act; and

(C) The agreement promotes effective and efficient administration of Bulk-Power System reliability;

WHEREAS, certain Regional Entities are organized on an Interconnection-wide basis and are therefore entitled to the presumption set forth in the Act that: “[t]he ERO and the Commission shall rebuttably presume that a proposal for delegation to a Regional Entity organized on an Interconnection-wide basis promotes effective and efficient administration of bulk power system reliability and should be approved”;

WHEREAS, the Act further provides that the ERO shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Reliability Standard or modification to a Reliability Standard to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest;

WHEREAS, FRCC is not organized on an Interconnection-wide basis and therefore is not entitled to the rebuttable presumptions accorded such an entity;

WHEREAS, NERC will work through FRCC to carry out certain of its activities in furtherance of its responsibilities as the ERO under the Act;

WHEREAS, NERC has concluded that FRCC meets all requirements of the Act, the ERO Regulations, and the NERC Rules of Procedure as approved by the Commission (“NERC Rules of Procedure”) necessary to qualify for delegation; and

WHEREAS, NERC and FRCC, having operated under a predecessor agreement to this Agreement, have negotiated this amended and restated Agreement so as to incorporate the benefits of their mutual experience and lessons learned while operating under the predecessor agreement and thereby provide for the more efficient and effective execution of their respective responsibilities in a transparent manner that is pursuant to Section 215 of the Act and the ERO Regulations;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, NERC and FRCC agree as follows:

1. Definitions. The capitalized terms used in this Agreement shall be defined as set forth in the Act, the ERO Regulations, the NERC Rules of Procedure, or the NERC Glossary of Terms Used in Reliability Standards, or, if not so defined, shall be defined as set forth in this Section 1 or elsewhere in the text of this Agreement:

(a) Breach means (i) the failure of a Party to perform or observe any material term, condition or covenant of the Agreement or (ii) a representation in Section 2 of the Agreement shall have become materially untrue.

(b) Cross-Border Regional Entity means a Regional Entity that encompasses a part of the United States and a part of Canada or Mexico.

(c) Delegated Authority means the authority delegated by NERC to FRCC to propose and enforce Reliability Standards pursuant to the Act and to undertake related activities set forth in this Agreement in furtherance of these delegated functions in accordance with the Act, the ERO Regulations and this Agreement.

2. Representations.

(a) For purposes of its Delegated Authority, FRCC hereby represents and warrants to NERC that:

(i) FRCC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder. FRCC is governed in accordance with its bylaws by [a balanced stakeholder board. Pursuant to these bylaws, no two industry sectors can control any FRCC decision and no single industry sector can veto any FRCC decision. The relevant portions of such bylaws are attached hereto in **Exhibit B**¹, and as so attached are in full force and effect. No other such corporate governance documents are binding upon FRCC.

(ii) As set forth in **Exhibit C** hereto², FRCC has developed a standards development procedure, which provides the process that FRCC may use to develop Regional Reliability Standards that are proposed to NERC for adoption.

(iii) As set forth in **Exhibit D** hereto, FRCC has adopted the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure, which provides for the enforcement of Reliability Standards within FRCC's geographic boundaries as shown on **Exhibit A**.

(b) NERC hereby represents and warrants to FRCC that:

(i) NERC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder; and

(ii) NERC has been certified as the ERO by the Commission pursuant to the Act.

¹ The **Exhibit B** from FRCC shall meet the requirements contained in **Exhibit B** to this Agreement.

² The **Exhibit C** from FRCC shall meet the requirements contained in **Exhibit C** to this Agreement.

3. Covenants.

(a) During the term of this Agreement, FRCC shall maintain and preserve its qualifications for delegation pursuant to the Act and shall not amend its Regional Entity Rules without NERC's approval, which shall not be unreasonably withheld or delayed and which shall, in the case of a Regional Entity organized on an Interconnection-wide basis, be governed by the presumptions provided for in Section 215(d)(2) and (e)(4)(C) of the Act, and be subject to any required Commission approval.

(b) During the term of this Agreement, NERC shall maintain its qualification and status as the ERO pursuant to the Act and, subject to the provisions of Sections 17 and 18 of this Agreement, NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations or programs of FRCC under this Agreement without first obtaining the consent of FRCC, which consent shall not be unreasonably withheld or delayed.

(c) During the term of this Agreement, NERC and FRCC shall adhere to and require that all participants in their respective activities under this Agreement follow and comply with the NERC Antitrust Compliance Guidelines.

4. Delegation of Authority.

(a) Based upon the representations, warranties and covenants of FRCC in Sections 2 and 3 above, the corporate governance documents set forth in **Exhibit B**, the standards development process set forth in **Exhibit C**, and the compliance monitoring and enforcement program set forth in **Exhibit D**, NERC hereby delegates authority, pursuant to Section 215(e)(4) of the Act, to FRCC for the purpose of proposing Reliability Standards to NERC, as set forth in Section 5 of this Agreement, and enforcing Reliability Standards, as set forth in Section 6 of this Agreement, within the geographic boundaries and such other scope set forth on **Exhibit A**, *provided*, that FRCC shall not monitor and enforce compliance with Reliability Standards for FRCC or an affiliated entity with respect to reliability functions for which FRCC or an affiliate is a Registered Entity. Any exclusions from this delegation of authority to FRCC within, or additions to this delegation of authority to FRCC beyond, the geographic boundaries set forth on **Exhibit A** are stated on **Exhibit A**.

(b) In circumstances where FRCC or an affiliated entity is a Registered Entity, FRCC shall enter into an agreement with another Regional Entity or NERC for the other

Regional Entity or NERC to monitor and enforce FRCC's or affiliate's compliance with Reliability Standards. Such agreements are subject to NERC and Commission approval.

(c) Nothing in this Agreement shall prohibit FRCC from entering into an arrangement between one or more other Regional Entities to perform compliance monitoring and enforcement activities outside of its region, on behalf of NERC and/or other Regional Entities, for Registered Entities that have registered functions monitored by more than one Regional Entity, subject to approval by NERC.

(d) For Cross-Border Regional Entities, the authority delegated by this Agreement shall extend only to the portion of the region identified on **Exhibit A** that is within the United States. Any delegation of authority by ERO Governmental Authorities in Canada or Mexico shall be governed by a separate agreement and is outside the scope of this Agreement; provided, however, that both FRCC and NERC shall endeavor to ensure that this Agreement and such separate agreements are compatible.

(e) As a condition to this delegation of authority and subject to the provisions of Section 17 of this Agreement, FRCC shall comply with the applicable provisions of NERC's Certificate of Incorporation, Bylaws, Rules of Procedure, and Reliability Standards, as from time to time adopted, approved, or amended.

5. Development and Proposal of Reliability Standards.

- (a) In connection with its Delegated Authority, FRCC shall be entitled to:
- (i) propose Reliability Standards, Regional Variances, or modifications thereof to NERC, which shall be considered by NERC through an open and inclusive process for proposing and adopting Reliability Standards that affords FRCC reasonable notice and opportunity to be heard; and
 - (ii) develop Regional Reliability Standards through FRCC's process as set forth in **Exhibit C**. Proposals approved through FRCC's process shall be reviewed by the NERC Board after NERC provides notice and an opportunity for interested persons to comment. In the case of a proposal from a Regional Entity organized on an Interconnection-wide basis, comments shall be limited to the factors identified in NERC Rule of Procedure 312.3 as it may be amended from time to time. The NERC Board shall promptly thereafter consider such proposed Regional Reliability Standard or Regional Variance, applying the

rebuttable presumption described in subsection 5(b) of this Agreement if the proposed Regional Reliability Standard or Regional Variance is from a Regional Entity organized on an Interconnection-wide basis, and either approve the proposed Regional Reliability Standard or Regional Variance and submit it to the Commission for approval, or disapprove it in writing setting forth its reasons. FRCC may appeal any disapproval of a proposed Regional Reliability Standard or Regional Variance to the Commission.

(b) Pursuant to Section 215(d)(3) of the Act, NERC shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Regional Reliability Standard or Regional Variance or modification thereof to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. Any person challenging such proposal from the Regional Entity organized on an Interconnection-wide basis shall have the burden of proof. NERC shall not find that this presumption has been rebutted except based upon substantial evidence that has been disclosed to, and been subject to comment by, the Interconnection-wide Regional Entity during NERC's review of the proposal.

6. Enforcement of Compliance with Reliability Standards.

(a) In connection with its delegated authority pursuant to this Agreement, FRCC shall enforce Reliability Standards (including Regional Reliability Standards and Regional Variances) within the geographic boundaries set forth, or as otherwise specified, in **Exhibit A** through the compliance monitoring and enforcement program set forth in **Exhibit D**. NERC and FRCC agree that this compliance monitoring and enforcement program meets all applicable requirements of the Act, Order No. 672 of the Commission, and the ERO Regulations, including, *inter alia*, the requirement for an audit program pursuant to Section 39.7(a) of the ERO Regulations, the assessment of penalties pursuant to Section 39.7(c) through 39.7(g) of the ERO Regulations and the requirements for due process. FRCC may not change its compliance monitoring and enforcement program set forth in **Exhibit D** absent NERC's approval, which shall not be unreasonably withheld or delayed, and the approval of the Commission. Subject to the rights and limitations specified in Sections 17 and 18 of this Agreement, FRCC agrees to comply with the NERC Rules of Procedure, with any directives issued pursuant to Section 8(c)

of this Agreement, and with any guidance and directions issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, in implementing this program.

(b) FRCC shall report promptly to NERC any Possible Violation, Alleged Violation, or Confirmed Violation of a Reliability Standard, and its eventual disposition by FRCC. Such report shall include the owner's, operator's, or user's name, which Reliability Standard or Reliability Standards were the subject of the Possible Violation, Alleged Violation, or Confirmed Violation, when the Possible Violation, Alleged Violation, or Confirmed Violation occurred, other pertinent facts including circumstances surrounding the Possible Violation, Alleged Violation, or Confirmed Violation with any known risk to the Bulk-Power System, when the Possible Violation, Alleged Violation, or Confirmed Violation was or will be mitigated, the name of a person knowledgeable about the Possible Violation, Alleged Violation, or Confirmed Violation to serve as a point of contact with the Commission, and any other information required by NERC compliance program procedures. NERC shall promptly forward such report to the Commission. NERC and FRCC shall cooperate in filing such periodic summary reports as the Commission shall from time to time direct on Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards and summary analyses of such Possible Violations, Alleged Violations, and Confirmed Violations.

(c) Each Possible Violation, Alleged Violation, or Confirmed Violation shall be treated as nonpublic unless the matter is filed with the Commission as a Notice of Penalty, or, if disclosure is required, dismissed. The disposition of each Possible Violation, Alleged Violation, or Confirmed Violation that relates to a Cybersecurity Incident or that would jeopardize the security of the Bulk-Power System if publicly disclosed shall remain nonpublic unless the Commission directs otherwise.

(d) All dispositions by FRCC of Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards shall be reported to NERC for review and, in the case of Confirmed Violations, penalties or sanctions, and settlements, for approval. Following approval of a disposition by NERC, NERC shall file the disposition with the Commission, if required by, and in accordance with, Section 215(e) of the Act and Section 39.7 of the ERO Regulations. NERC shall review FRCC's dispositions based on the following criteria:

(i) whether the disposition is supported by a sufficient record compiled by FRCC in accordance with the NERC Rules of Procedure, NERC directives and

Commission requirements, taking into account the nature of the Possible Violation, Alleged Violation, or Confirmed Violation,

(ii) whether the disposition is consistent with any applicable directives issued pursuant to Section 8(c) of this Agreement, any applicable directions or guidance issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, or other applicable NERC guidance, concerning the Reliability Standards to which the Possible Violation, Alleged Violation, or Confirmed Violation relates,

(iii) if the disposition is a Confirmed Violation or settlement, whether it provides for a penalty or sanction, or a determination of no penalty or sanction, determined in accordance with the NERC Sanction Guidelines, Appendix 4B to the NERC Rules of Procedure, and

(iv) whether the disposition is reasonably consistent with other dispositions by FRCC and by other Regional Entities of Possible Violations, Alleged Violations, and Confirmed Violations involving the same or similar facts and circumstances.

NERC may reject any disposition, with an explanation of why NERC believes the disposition does not meet the above criteria. FRCC may submit a disposition requiring NERC approval that has been rejected by NERC, or a revised disposition following a rejection, directly to the NERC Board Compliance Committee for approval without revising the disposition to address all the grounds on which NERC originally rejected the disposition. The final approval of FRCC's disposition of a Possible Violation, Alleged Violation, or Confirmed Violation shall be made by the NERC Board Compliance Committee, provided, that the NERC Board or NERC Board Compliance Committee may, by appropriate resolution, delegate authority for final approval of dispositions of specified categories of Possible Violations, Alleged Violations, or Confirmed Violations to the NERC President.

(e) All appeals of penalties imposed by FRCC as a result of a decision by FRCC's Hearing Body shall be filed with, heard by and disposed of by, NERC in accordance with the NERC Rules of Procedure.

(f) FRCC shall maintain the capability to conduct investigations of Possible Violations and Alleged Violations of Reliability Standards and to conduct such investigations in a confidential manner.

(g) FRCC shall maintain a program of proactive monitoring and enforcement of compliance with Reliability Standards, in accordance with the NERC Compliance Monitoring and Enforcement Program and the annual NERC Compliance Monitoring and Enforcement Program Implementation Plan.

(h) As part of its compliance monitoring and enforcement program, FRCC shall maintain a conflict of interest policy that assures the integrity and independence of such program, including the integrity and independence of the persons or decision-making bodies making final determinations in compliance enforcement actions under Section 5.0 of the NERC Compliance Monitoring and Enforcement Program. A Regional Entity may have stakeholders lead or participate in its board compliance committee so long as integrity and independence are assured through reasonable and appropriate recusal procedures.

(i) As often as NERC deems necessary, but no less than every five years, NERC shall review FRCC's compliance monitoring and enforcement program to determine that: (i) the program meets all applicable legal requirements; (ii) actual practices reflect the requirements; and (iii) the program administered pursuant to the Delegated Authority promotes consistent interpretations across North America of Reliability Standards and comparable levels of sanctions and penalties for violations of Reliability Standards constituting comparable levels of threat to reliability of the Bulk-Power System.

7. Delegation-Related Activities.

NERC will engage FRCC on its behalf to carry out certain of its activities that are in furtherance of Bulk-Power System reliability and NERC's responsibilities as the ERO under the Act or in support of the Delegated Authority, as specified in the NERC Rules of Procedure and listed on **Exhibit E**. These delegation-related activities shall include, but are not limited to, those described in subsections (a) through (f), each of which shall be considered a statutory activity:

(a) Certification of Bulk-Power System Entities. The NERC Board shall set criteria for certification in accordance with the NERC Rules of Procedure. FRCC shall issue certifications in accordance with the NERC Rules of Procedure.

(b) Registration of owners, operators, and users of the Bulk-Power System as responsible for compliance with requirements of Reliability Standards.

(i) The NERC Board shall develop criteria for registration of owners, operators, and users of the Bulk-Power System as Registered Entities and shall apply the registration criteria to register owners, operators and users of the Bulk-Power System as Registered Entities.

(ii) NERC shall maintain a registration database of Registered Entities, based on data and information provided by FRCC and other Regional Entities. FRCC shall provide timely and accurate information relating to registrations to NERC, on at least a monthly basis, to enable NERC to maintain a registration database that is accurate and up-to-date.

(iii) The NERC Board Compliance Committee shall hear and decide appeals from owners, operators and users of the Bulk-Power System contesting registration, in accordance with the NERC Rules of Procedure. If the NERC Board Compliance Committee upholds the decision to register an owner, operator, or user, NERC shall defend the decision in any subsequent appeal of the decision by the Registered Entity to the Commission.

(c) Reliability Assessment and Performance Analysis. FRCC shall develop assessments of the reliability of the Bulk-Power System, or ensure that data and information are collected, analyzed and provided to NERC in support of the development of reliability assessments, in accordance with the NERC Rules of Procedure. FRCC shall also develop and maintain, and collect data in support of the development and maintenance of, reliability performance metrics and assessments of risks to the Reliable Operation of the Bulk-Power System, in accordance with the NERC Rules of Procedure and NERC directives. NERC shall develop data-gathering quality control procedures, forms and reporting mechanisms, which shall be used by FRCC and other Regional Entities in carrying out their responsibilities under this subsection (c).

(d) Event Analysis and Reliability Improvement. FRCC shall conduct event analysis pursuant to the NERC Rules of Procedure and applicable governmental regulations. NERC and FRCC shall coordinate event analysis to support the effective and efficient use of their collective resources, consistency in event analysis, and timely delivery of event analysis reports. In collaboration with NERC, FRCC shall disseminate to the electric industry lessons learned and other information obtained or resulting from event analysis.

(e) Training and Education. FRCC may provide training and education to Registered Entities, as it deems necessary, in support of its performance of delegated functions and related activities under this Agreement. NERC may also provide training and education programs to Registered Entities on topics relating to NERC's responsibilities as the ERO.

(f) Situation Awareness and Infrastructure Security.

(i) FRCC shall gather and assess situation awareness information provided by Registered Entities pursuant to the NERC Rules of Procedure and applicable governmental regulations, and shall provide other data, information and assistance to NERC in support of NERC's activities in monitoring present conditions, and responding to events, on the Bulk-Power System

(ii) FRCC shall collaborate with NERC in its efforts to coordinate electric industry activities to promote critical infrastructure protection of the Bulk-Power System in North America.

8. Oversight of Performance of Delegated Functions and Related Activities.

This Section 8 sets forth processes and procedures which the Parties intend shall be used in NERC's oversight of FRCC's performance of its Delegated Authority and related activities pursuant to this Agreement. It is the intent of NERC and FRCC that matters relating to NERC's oversight of FRCC's performance of its Delegated Authority and related activities shall be established or resolved by collaboration between NERC and FRCC and, where applicable, other Regional Entities, to the maximum extent possible, consistent with the construct that NERC and the Regional Entities are operating together in a collaborative manner to carry out the responsibilities of the ERO under Section 215 of the Act and the ERO Regulations.

(a) (i) NERC shall develop, in collaboration with FRCC and other Regional Entities, performance goals, measures and other parameters (including, without limiting the scope of such goals, measures and parameters, financial performance goals, measures and parameters), and performance reports, which shall be used to measure NERC's and FRCC's performance of their respective functions and related activities. The performance goals, measures and parameters and the form of performance reports shall be approved by the NERC President and shall be made public. FRCC shall provide data, information and reports to NERC, in accordance with established schedules, to enable NERC to calculate FRCC's performance to the agreed-upon goals, measures and parameters.

(ii) NERC shall use the performance goals, measures and parameters and performance reports to evaluate FRCC's performance of its delegated functions and related activities and to provide advice and direction to FRCC on performance improvements. The performance goals, measures and other parameters and the values of such goals, measures and parameters, shall be reviewed by NERC, FRCC and the other Regional Entities, revised if appropriate, and made public, on the same timeline as the annual business planning and budgeting process described in Section 9 of this Agreement.

(iii) At the request of the President of NERC, FRCC shall be required to develop, submit for NERC approval, and implement action plans to address areas of its performance that are reasonably determined by NERC, based on analysis of FRCC's performance against the performance goals, measures and parameters, or performance of specific activities, to be unsatisfactory, *provided*, that prior to requiring FRCC to adopt and implement an action plan or other remedial action, NERC shall issue a notice to FRCC of the need and basis for an action plan or other remedial action and provide an opportunity for FRCC to submit a written response contesting NERC's evaluation of FRCC's performance and the need for an action plan. FRCC may request that the President of NERC reconsider the request, and thereafter may request that the NERC Board review and reconsider the request. NERC and FRCC shall work collaboratively as needed in the development and implementation of FRCC's action plan. A final action plan submitted by FRCC to NERC shall be made public unless the President of NERC makes a written determination that the action plan or specific portions of the plan should be maintained as non-public.

(b) NERC shall make available to FRCC standardized training and education programs, which shall be designed taking into account input from FRCC and other Regional Entities, for FRCC personnel on topics relating to the delegated functions and related activities.

(c) (i) NERC may issue directives to FRCC concerning the manner in which FRCC shall perform its delegated functions and related activities under this Agreement. The NERC Rules of Procedure, or any other ERO Rule requiring approval of the Commission, shall not be considered "directives." NERC shall initiate the development of a directive through a collaborative process with FRCC and, if applicable, other Regional Entities to which the directive will apply. Any directive developed through the collaborative process shall be approved by, and issued under the signature of, the NERC President.

(ii) If after a period of time that is reasonable under the circumstances, NERC and FRCC and, if applicable, other Regional Entities are unable to reach agreement on the contents of the directive, NERC may issue the directive with the approval of and under the signature of the NERC President; *provided*, that before the NERC President issues a directive pursuant to this paragraph (ii), FRCC and, if applicable, other Regional Entities, shall be given a reasonable opportunity to present their positions on, and a suggested alternative version or versions of, the proposed directive to the NERC President.

(iii) Upon issuance of a directive by the NERC President, it shall be binding upon, and shall be complied with by, FRCC, subject to reasonable time periods for adoption, implementation, and funding of any necessary resources. Upon request by FRCC, the NERC Board (or a committee of the Board to which the Board delegates appropriate authority) shall review and shall confirm, revise or revoke any directive that was issued by the NERC President without FRCC's agreement, *provided*, that FRCC shall request such review within thirty (30) days following issuance of the directive by the NERC President unless good cause can be shown for a later request.

(iv) NERC and FRCC and, if applicable, other Regional Entities, shall collaborate in deciding whether a directive (whether issued pursuant to paragraph (ii) or paragraph (iii)) shall be made public. If no agreement is reached by the date of issuance as to whether the directive shall be made public, the NERC President shall decide whether the directive will be made public, *provided*, that is the intent of the Parties that the NERC President shall apply a presumption that directives should be made public, unless the NERC President makes a written determination stating a specific reason for maintaining a particular directive as non-public.

(d) In addition to the issuance of directives pursuant to subsection (c), the NERC Board (or a Board committee to which the Board has delegated authority) may issue guidance or directions as to the manner in which FRCC, and, if applicable, other Regional Entities, shall perform delegated functions and related activities. The Board or Board committee shall also establish reasonable time periods for the implementation of any such guidance or directions, taking into account the impact on the reliability of the Bulk-Power System and the need for funding of additional resources. Any such guidance or directions shall be stated in writing and shall be public, unless the Board or Board committee makes a written determination stating a

specific reason for maintaining particular guidance or directions as non-public. FRCC, either individually or in conjunction with other Regional Entities, may request that the NERC Board or Board committee reconsider or revise the guidance or direction.

(e) NERC shall conduct collaborative reviews with FRCC, either individually or in conjunction with one or more other Regional Entities, that provide for the exchange of information on practices, experiences, and lessons learned in the implementation of the delegated functions.

(f) Any audits of FRCC performed by NERC shall be limited to an examination of FRCC's compliance with this Agreement, NERC's Rules of Procedure, the Compliance Monitoring and Enforcement Program, Commission requirements, and directives that are in effect pursuant to Section 8(c)

9. Funding. FRCC and NERC shall ensure, subject to Commission approval in accordance with the ERO Regulations, that the delegated functions and related activities described in Sections 5, 6 and 7 and listed on **Exhibit E** have reasonable and adequate funding and resources by undertaking the following:

(a) FRCC shall develop, through a collaborative process with NERC, and propose, an annual business plan and budget, in accordance with ERO Regulations, Commission orders and NERC business planning and budgeting policies and instructions. FRCC's proposed business plan and budget shall describe the activities necessary for, and provide a budget with adequate resources for, FRCC to carry out its Delegated Authority under this Agreement, including the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E**. FRCC's business plan and budget shall show the funding sources and amounts to fund the proposed budget, including as applicable assessments to end users, penalty monies, and other sources of funds.

(b) FRCC and NERC agree that the portion of FRCC's approved budget for the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E** that is to be funded by assessments, will be equitably allocated among end users within the geographic boundaries described in **Exhibit A** and recovered through a formula based on Net Energy for Load, or through such other formula as is proposed by FRCC and approved by NERC and the Commission. If FRCC proposes to use a formula other than Net Energy for Load beginning in

the following year, FRCC shall submit the proposed formula to NERC in sufficient time that NERC may review and approve the proposed formula and file it with the Commission by May 15 for approval, and the proposed formula shall be effective for the following year if approved by the Commission on or before the date the Commission approves the annual business plan and budget submitted by NERC and FRCC to the Commission pursuant to the ERO Regulations for such year.

(c) NERC shall determine that the assessments to fund the costs for its statutory functions in its Commission-approved budget are first allocated fairly among the Interconnections and regions according to the applicability of this work to those Interconnections and regions, and then equitably among the end users of the applicable interconnections and regions as appropriate. Allocation on a Net Energy for Load basis will be presumed to satisfy this equitability requirement.

(d) NERC shall provide FRCC with the form or forms for business plan and budget submittal, and any accompanying instructions, in accordance with the schedule for preparation of the business plan and budget developed by NERC and the Regional Entities.

(e) FRCC shall submit its proposed annual business plan and budget for carrying out its Delegated Authority functions and related activities described in Sections 5, 6 and 7 and listed on Exhibit E, as well as for all other activities of FRCC, to NERC for review and approval in accordance with the annual schedule for the preparation of business plans and budgets which shall be developed collaboratively by NERC and the Regional Entities, as more fully described in **Exhibit E**.

(f) NERC shall fund FRCC's performance of its Delegated Authority and related activities in accordance with FRCC's Commission-approved business plan and budget, in the amount of FRCC's assessments to end users approved by the Commission. **Exhibit E** sets forth the procedures and timing for billing and collecting FRCC's approved assessments from end users and other entities and payment of the approved assessment amount to FRCC, unless otherwise modified and approved by NERC and the Commission. NERC shall not impose any material obligation or requirement regarding the Delegated Authority upon FRCC that has not been provided for in an approved business plan and budget or an approved amended or supplemental business plan and budget, without FRCC's consent.

(g) NERC shall develop, in consultation with the Regional Entities, a reasonable and consistent system of accounts, with a level of detail and record keeping comparable to the Commission's Uniform System of Accounts and sufficient to allow the Commission to compare each Commission-approved NERC and FRCC fiscal year budget with the actual results at the NERC and Regional Entity levels. FRCC shall follow NERC's prescribed system of accounts except to the extent that NERC permits a departure from the prescribed system of accounts. NERC shall make an informational filing with the Commission describing any such waiver it permits and providing an explanation supporting the permitted departure.

(h) FRCC shall submit unaudited quarterly interim financial statements in form provided by NERC no later than 20 days after the end of the fiscal quarter (March 31, June 30, September 30, and December 31).

(i) FRCC shall submit audited financial statements annually, including supporting materials, in a form provided by NERC no later than May 1 of the following year.

(j) **Exhibit E** to this Agreement sets forth the mechanism through which FRCC shall offset penalty monies it receives (against its next year's annual budget for carrying out functions under this Agreement. *Provided*, that, subject to approval by NERC and the Commission, FRCC may propose and implement an alternative use of penalty monies to that set forth in **Exhibit E**.

10. Assignment. This Agreement may be assigned by either Party only with the prior written consent of the other, which consent shall be granted or withheld in such non-assigning Party's sole discretion, subject to approval by the Commission. Any assignment under this Agreement shall not relieve a Party of its obligations, nor shall a Party's obligations be enlarged, in whole or in part, by reason thereof. FRCC may not delegate in whole or in part its Delegated Authority to any other entity without NERC's express consent; provided, however, that nothing in this provision shall prohibit FRCC from contracting with other entities to assist it in carrying out its Delegated Authority, provided FRCC retains control and responsibility for such Delegated Authority.

11. Default and Cure. Upon a Breach, the non-breaching Party shall give written notice of such Breach to the breaching Party (the "Default Notice"). Subject to a suspension of the

following deadlines as specified below, the breaching Party shall have thirty (30) calendar days from receipt of the Default Notice within which to cure such Breach; *provided however*, that if such Breach is not capable of cure within thirty (30) calendar days, the breaching Party shall commence such cure within thirty (30) calendar days after notice and continuously and diligently complete such cure within ninety (90) calendar days from receipt of the Default Notice; and, if cured within such time, the Breach specified in such notice shall cease to exist. Subject to the limitation specified in the following sentence, if a Breach is not cured as provided in this Section 11, or if a Breach is not capable of being cured within the period provided for herein, the nonbreaching Party shall have the right to declare a default and terminate this Agreement by written notice at any time until cure occurs, and be relieved of any further obligation hereunder. The deadlines for cure and the right to declare a default and terminate this Agreement shall be suspended during the pendency of any efforts or proceedings in accordance with Section 18 of this Agreement to resolve a dispute as to whether a Breach has occurred or been cured. The provisions of this Section 11 will survive termination of this Agreement.

12. Term and Termination.

(a) This Agreement shall become effective on [January 1, 2011] (the “Effective Date”).

(b) The term of the Agreement shall be five (5) years from the Effective Date, prior to which time NERC shall conduct an audit pursuant to subsection 6(i) to ensure that FRCC continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. If FRCC meets such requirements, this Agreement may be renewed for another five (5) year term. This Agreement may be renewed for successive additional five (5) year renewal terms provided that prior to the end of each renewal term, NERC shall conduct an audit pursuant to subsection 6(i) to ensure that FRCC continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. Provided, that either Party may terminate this Agreement as of the end of a term by giving written notice to terminate at least one (1) year prior to the end of the term. If this Agreement is not renewed or becomes subject to termination for any reason, the Parties shall work to provide for a transition of FRCC’s Delegated Authority to NERC or to another eligible entity and to provide for the resolution of any wind-up costs associated with termination of this Agreement.

The termination of this Agreement shall not take effect until such transition has been effected, unless the transition period exceeds one year, at which time FRCC may unilaterally terminate.

(c) If any provision of this Agreement, or the application thereof to any person, entity or circumstance, is held by a court or regulatory authority of competent jurisdiction to be invalid, void, or unenforceable, or if a modification or condition to this Agreement is imposed by a regulatory authority exercising jurisdiction over this Agreement, the Parties shall endeavor in good faith to negotiate such amendment or amendments to this Agreement as will restore the relative benefits and obligations of the signatories under this Agreement immediately prior to such holding, modification or condition. If either Party finds such holding, modification or condition unacceptable and the Parties are unable to renegotiate a mutually acceptable resolution, either Party may unilaterally terminate this Agreement. Such termination shall be effective one year following written notice by either Party to the other Party and to the Commission, or at such other time as may be mutually agreed by FRCC and NERC.

(d) Notwithstanding any termination of this Agreement, provisions contained in Limitation of Liability (Section 13), No Third Party Beneficiaries (Section 14) and Confidentiality (Section 15) shall survive this Agreement in accordance with their terms until sixty (60) days following the expiration of any applicable statute of limitations.

13. Limitation of Liability. FRCC and NERC agree not to sue each other or their directors, officers, employees, and persons serving on their committees and subgroups based on any act or omission of any of the foregoing in the performance of duties pursuant to this Agreement or in conducting activities under the authority of Section 215 of the Act, other than seeking a review of such action or inaction by the Commission. NERC and FRCC shall not be liable to one another for any damages whatsoever, including without limitation, direct, indirect, incidental, special, multiple, consequential (including attorneys' fees and litigation costs), exemplary, or punitive damages arising out of or resulting from any act or omission associated with the performance of the FRCC's or NERC's responsibilities under this Agreement or in conducting activities under the authority of Section 215 of the Act, except to the extent that the FRCC or NERC is found liable for gross negligence or intentional misconduct, in which case FRCC or NERC shall not be liable for any indirect, incidental, special, multiple, consequential (including without limitation attorneys' fees and litigation costs), exemplary, or punitive damages.

14. **No Third Party Beneficiaries.** Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to, or any liability to, any third party.

15. **Confidentiality.** During the course of the Parties' performance under this Agreement, a Party may receive Confidential Information, as defined in Section 1500 of NERC's Rules of Procedure. Except as set forth herein, the Parties agree to keep in confidence and not to copy, disclose, or distribute any Confidential Information or any part thereof, without the prior written permission of the issuing Party, unless disclosure is required by subpoena, law, or other directive of a court, administrative agency, or arbitration panel, in which event the recipient hereby agrees to provide the Party that provided the Confidential Information with prompt notice of such request or requirement in order to enable such issuing Party to (a) seek an appropriate protective order or other remedy, (b) consult with the recipient with respect to taking steps to resist or narrow the scope of such request or legal process, or (c) waive compliance, in whole or in part, with the terms of this Section. In the event a protective order or other remedy is not obtained or the issuing Party waives compliance with the provisions, the recipient agrees to furnish only that portion of the Confidential Information which the recipient's counsel advises is legally required and to exercise best efforts to obtain assurance that confidential treatment will be accorded to such Confidential Information. In addition, each Party shall ensure that its officers, trustees, directors, employees, subcontractors and subcontractors' employees, and agents to whom Confidential Information is exposed are under obligations of confidentiality that are at least as restrictive as those contained herein. This confidentiality provision does not prohibit reporting and disclosure as directed by NERC, as set forth in Section 6 of this Agreement.

16. **Amendment.** Neither this Agreement nor any of the terms hereof, may be amended unless such amendment is made in writing, signed by the Parties, and filed with and approved by the Commission.

17. **Amendments to the NERC Rules of Procedure.** NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations, or programs of FRCC

under this Agreement without first obtaining the consent of FRCC, which consent shall not be unreasonably withheld or delayed. To the extent FRCC does not consent, NERC shall have the right to invoke the dispute resolution provisions of Section 18 and, if such effort fails to resolve the dispute, to petition the Commission to adopt the amendment to the NERC Rules of Procedure. To the extent that the Commission issues an order amending or materially affecting the rights or obligations of FRCC under this Agreement, FRCC shall have the option, exercisable no later than 60 days after issuance of such order, to terminate this Agreement. Such termination shall be effective one year following written notice by FRCC to NERC and the Commission, or at such other time as may be mutually agreed by FRCC and NERC.

18. Dispute Resolution. In the event a dispute arises under this Agreement between NERC and FRCC (including disputes relating to NERC's performance of its obligations under this Agreement and/or disputes relating to FRCC's performance of its obligations under this Agreement) which cannot be resolved through discussions between representatives of the Parties in the normal course of operations, the Parties shall use the following procedures ("Dispute Resolution") to attempt to resolve the dispute. FRCC shall not suspend performance of any delegated function, and the Parties shall continue to make reasonable, good faith efforts to comply with their obligations under this Agreement, during the pendency of Dispute Resolution. All notices required to be sent pursuant to this Dispute Resolution procedure shall be sent in accordance with Section 19 of this Agreement. This Dispute Resolution procedure is separate from and in addition to all other processes provided for in this Agreement.

(a) The Party invoking Dispute Resolution shall send a notice to the other Party describing the dispute, stating the invoking Party's position with respect to the dispute, stating that the Party is invoking Dispute Resolution, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the invoking Party.

(b) Within three (3) business days after receipt of the notice invoking Dispute Resolution, the receiving Party shall send a notice to the invoking Party acknowledging receipt of the notice invoking Dispute Resolution, stating the receiving Party's position with respect to the dispute, and naming the Party's designated representative for negotiating a resolution of the

dispute. The designated representative shall have authority to resolve the dispute on behalf of the receiving Party.

(c) During the period commencing three (3) business days and ending twenty (20) business days after the date of the receiving Party's notice, the designated representatives shall engage in good faith negotiations to attempt to resolve the dispute, *provided*, that the designated representatives may agree prior to the end of such twenty (20) business day period that the process should move to the next step of Dispute Resolution.

(d) If the designated representatives are unable to arrive at a resolution of the dispute by the end of the time period described in subsection (c), they shall notify the chief executive officers of their respective Parties. The chief executive officers of the Parties shall thereafter engage in good faith negotiations to attempt to resolve the dispute during the period of twenty (20) business days immediately following the time period described in subsection (c), *provided*, that the chief executive officers may agree prior to the end of such twenty (20) business day period that negotiations are at impasse and the process may move to the next step as described in subsection (f). Upon mutual agreement of the Parties, the twenty (20) business day period may be extended to pursue ongoing good faith negotiations.

(e) If a resolution of the dispute is achieved by the Parties, it shall be memorialized in a writing that is acceptable in form and substance to each party and is signed by the designated representative or chief executive officer on behalf of each Party.

(f) If the Parties are unable to resolve the dispute pursuant to the process described in subsections (a) through (e), then either Party may invoke any other available dispute resolution mechanism, including, without limitation, filing a complaint or petition with the Commission requesting resolution of the dispute by the Commission, or filing a complaint for relief in a court having jurisdiction over Parties and the subject matter of the dispute in accordance with Section 20. *Provided, however*, that: (i) it is the intent of the Parties that unresolved disputes shall be presented to and resolved by the Commission if the Commission has and accepts jurisdiction over the subject matter of the dispute, (ii) the Parties may, by mutual agreement, attempt to resolve the dispute through arbitration, mediation, or other process involving resort to an impartial neutral, and (iii) it is the intent of the Parties that resolution of disputes through Commission proceedings, arbitration, mediation, or other use of an impartial neutral, is preferred over resort to judicial proceedings.

(g) This Section 18 shall not apply to compliance enforcement actions against individual Registered Entities.

19. Notice. Whether expressly so stated or not, all notices, demands, requests, and other communications required or permitted by or provided for in this Agreement shall be given in writing to a Party at the address set forth below, or at such other address as a Party shall designate for itself in writing in accordance with this Section, and shall be delivered by hand or reputable overnight courier:

If to NERC:

North American Electric
Reliability Corporation
116-390 Village Blvd.
Princeton, NJ 08540-5721
Attn: General Counsel
Facsimile: (609) 452-9550

If to FRCC:

Florida Reliability Coordinating
Council, Inc.
1408 N Westshore Blvd
Tampa, FL 33607
Attn: Sarah Rogers
Facsimile: (813) 289- 5646

20. Governing Law. When not in conflict with or preempted by federal law, this Agreement will be governed by and construed in accordance with the laws of New Jersey without giving effect to the conflict of law principles thereof. The Parties recognize and agree not to contest the exclusive or primary jurisdiction of the Commission to interpret and apply this Agreement; provided however that if the Commission declines to exercise or is precluded from exercising jurisdiction of any action arising out of or concerning this Agreement, such action shall be brought in any state or federal court of competent jurisdiction in New Jersey. All Parties hereby consent to the jurisdiction of any state or federal court of competent jurisdiction in New Jersey for the purpose of hearing and determining any action not heard and determined by the Commission.

21. Headings. The headings and captions in this Agreement are for convenience of reference only and shall not define, limit, or otherwise affect any of the terms or provisions hereof.

22. Savings Clause. Nothing in this Agreement shall be construed to preempt or limit any authority that FRCC may have to adopt reliability requirements or take other actions to maintain

reliability of the Bulk-Power System within the geographic boundaries described in **Exhibit A** that are outside the Delegated Authority, as long as such reliability requirements and actions are not inconsistent with Reliability Standards applicable to the region described in **Exhibit A** and do not result in a lessening of reliability outside the region described in **Exhibit A**.

23. Entire Agreement. This Agreement constitutes the entire agreement, and supersedes all prior agreements and understandings, both written and oral, among the parties with respect to the subject matter of this Agreement.

24. Execution of Counterparts. This Agreement may be executed in counterparts and each shall have the same force and effect as the original.

NOW THEREFORE, the parties have caused this Agreement to be executed by its duly authorized representatives, effective as of the Effective Date.

Exhibit A — FRCC Boundaries

The FRCC physical boundaries are entirely within the State of Florida. The area of the State of Florida that is within the FRCC Region is peninsular Florida east of the Apalachicola River with the exception of a small section of Baker and Nassau counties in northeast Florida. Areas west of the Apalachicola River in Florida are within the SERC Region. The entire FRCC Region is within the Eastern Interconnection. The entire FRCC Region is under the direction of the FRCC Reliability Coordinator.

The FRCC Region interconnects with the SERC Region via 10 transmission lines. The 10 lines consist of two 500 kV, four 230 kV and four 115 kV lines. These lines are referred to as the “Florida / Southern Interface”.

The areas of Baker and Nassau counties that are not part of the FRCC Region are part of the SERC Region. These sections are part of the Okefenokee Rural Electric Membership Corporation (OREMC) that is headquartered in Nahunta, GA or facilities owned by Georgia Transmission Corporation (GTC) that is headquartered in Tucker Georgia. Roughly two thirds of OREMC load is in Georgia and one third is in Florida. The majority of the OREMC load in Florida is connected directly to the Southern Company Balancing Area in the SERC Region. Part of OREMC load is connected to both the Southern Company Balancing Area and FPL Balancing Area by a Georgia Transmission Corporation 115kV transmission line and Macedonia Switching Station in Baker County. A small portion of the OREMC load, about five (5) MW to twenty five (25) MW, is supplied as a radial feed from FPL West Nassau Substation. Georgia Transmission Corporation has secured firm transmission service from JEA and/or FPL on the Florida / Southern Interface to supply this load. The OREMC schedules energy on an hourly basis to cover this load. SERC will be responsible for registration and compliance monitoring of the Georgia Transmission Corporation facilities in Baker County, Florida and of OREMC.

Within the FRCC Region, compliance monitoring and enforcement functions with respect to reliability functions for which the FRCC is a registered entity are performed by SERC Reliability Corporation (SERC) pursuant to a contract between FRCC and SERC dated as of (date).

Exhibit B – Governance

Exhibit B shall set forth the Regional Entity's bylaws, which NERC agrees demonstrate that the Regional Entity meets the following criteria:

CRITERION 1: The Regional Entity shall be governed by an independent board, a balanced stakeholder board, or a combination independent and balanced stakeholder board. (Federal Power Act § 215(e)(4)(A), 18 C.F.R. § 39.8(c)(1), Order No. 672 at ¶ 727.)

CRITERION 2: The Regional Entity has established rules that assure its independence of the users and owners and operators of the bulk power system, while assuring fair stakeholder representation in the selection of its directors. Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 699, 700.)

CRITERION 3: If the Regional Entity has members, the Regional Entity has established rules that assure that its membership is open, that it charges no more than a nominal membership fee and agrees to waive the fee for good cause shown, and that membership is not a condition for participating in the development of or voting on proposed Regional Reliability Standards. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 170-173.)

CRITERION 4: The Regional Entity has established rules that assure balance in its decision-making committees and subordinate organizational structures and assure no two industry sectors can control any action and no one industry sector can veto any action. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶ 728.)

CRITERION 5: The Regional Entity has established rules that provide reasonable notice and opportunity for public comment, due process, openness, and balance of interests in exercising its duties. (Federal Power Act § 215(c)(2)(D) and (e)(4), 18 C.F.R. § 39.8(c)(2).)

**BYLAWS OF
FLORIDA RELIABILITY COORDINATING COUNCIL, INC.**

ARTICLE I

Membership

Section 1.1 Eligibility.

(a) Membership in the Florida Reliability Coordinating Council, Inc. (“FRCC”) is open to any entity, without cost, that: (i) has a material interest in the reliability of the bulk power system in the FRCC region; (ii) satisfies the criteria for membership specified in this Section 1.1; (iii) qualifies for eligibility in one or more of the Sectors identified in Section 1.2; (iv) submits a written request for membership; and (v) agrees to comply with and be bound by these FRCC Bylaws (“Bylaws”) and other rules and regulations adopted by the FRCC Board of Directors, by execution of the appropriate form of Member Agreement set forth in Appendix A to these Bylaws (“Member Agreement”). Any person or entity that meets the foregoing requirements shall become a “Member” of FRCC.

(b) FRCC shall engage in two categories of activities:

(i) FRCC shall engage in the “Regional Entity Activities” specified in Section 1 of Exhibit E of the Delegation Agreement between FRCC and the North American Electric Reliability Corporation (“NERC”) dated May 2, 2007, as amended from time to time with the agreement of NERC and the approval of the Federal Energy Regulatory Commission (“Delegation Agreement”). Under the Delegation Agreement, FRCC is the Regional Entity, as defined in Sec. 215 of the Federal Power Act, with delegated authority to propose and enforce Reliability Standards for the bulk power system in the FRCC Region. The FRCC Region is defined as the geographic area of Florida east of the Apalachicola River.

(ii) FRCC shall engage in certain “Member Services Activities,” under which it provides, coordinates or administers a variety of services relating to the planning and operation of the bulk power system in the FRCC Region for or on behalf of entities meeting the criteria in Section 1.1(c)(ii) and participating in the funding of such services as specified in these Bylaws. The “Member Services” are specified in the business plan and budget approved by the Board of Directors in accordance with these Bylaws for submission to NERC under the Delegation Agreement, and as approved by NERC and the Federal Energy Regulatory Commission (“Business Plan and Budget”). Member Services are funded as specified in Section 6.2 of these Bylaws.

(c) FRCC shall have two types of Members:

(i) All Members of FRCC shall be “Regional Entity Members.” Regional Entity Members shall be eligible to participate in the Regional Entity Activities of FRCC. Such participation shall be in accordance with these Bylaws, the Member Agreement, and the Delegation Agreement, as from time to time adopted or amended and approved, and such other requirements as govern FRCC as a Regional Entity.

(ii) All Members that participate in the generation, marketing, transmission or purchase for resale of electric energy, ancillary services or capacity on, from or to the bulk power system in the FRCC Region may choose to be “Services Members,” and may participate in FRCC Member Services Activities as specified in these Bylaws. Subject to the requirements of Section 1.2, only Members that are Services Members shall be eligible to participate in decisions governing the Member Services of FRCC, or the voting rights and funding obligations of Services Members.

Section 1.2 Voting Member. A Voting Member is a Member that is not an Affiliate Member or an Adjunct Member. All Voting Members shall be eligible to vote on questions governing Regional Entity Activities. Only Voting Members that are Services Members shall be eligible to vote on questions governing Member Services or Member Services Activities. For purposes of the following Sector classifications, “Load Serving Entity,” whether standing alone or as part of another specified term, shall mean an entity that provides electric service to persons or entities other than the Load Serving Entity itself that purchase such service for their own use and not for resale. Voting Members shall be classified into one of the following Sectors, based on the primary nature of its activities in the FRCC Region relevant to Regional Entity Activities:

(a) **Suppliers Sector** - any entity engaged in wholesale power marketing transactions in the FRCC Region; or a generating entity that is included in the NERC Compliance Registry as a generation owner or generation operator for a facility in the FRCC Region, or that owns or is developing generation greater than 20 MW located within the FRCC Region and meets any of the following: (1) an entity with FERC-approved market-based rate authority, or (2) an exempt wholesale generator, or (3) a facility selling any output pursuant to a power purchase agreement (including fuel conversion arrangements), or (4) a FERC approved Qualifying Facility.

(b) **Non-Investor Owned Utility Wholesale Sector** - generation and transmission cooperatives and municipal joint action agencies that sell electricity to non-investor owned Load Serving Entities with native load in the FRCC Region.

(c) **Load Serving Entity Sector** - any Load Serving Entity that is not investor owned and that generates less than 25% of its energy requirements for retail sales or has an annual Full Requirements Energy for Load (FREL) of 1800 GWH or less in the FRCC Region.

(d) **Generating Load Serving Entity Sector** - any Load Serving Entity that is not investor owned and that generates at least 25% of its energy requirements for retail sales, and that has an annual Full Requirements Energy for Load (FREL) greater than 1800 GWH in the FRCC Region.

(e) **Investor Owned Utility Sector** - investor owned utilities generating and serving retail native load greater than 15,000 GWH in the FRCC Region.

(f) **General Sector** - persons or entities that take delivery of energy within the FRCC Region that is not purchased for resale; agents or associations representing groups of such entities that are commercial or industrial entities; agents or advocate groups representing small customers; and other persons or entities owning assets or engaging in commercial activities in the FRCC Region.

Section 1.3 Affiliate Member. An Affiliate Member is defined as an entity that (i) otherwise qualifies as a Voting Member pursuant to Section 1.1 and 1.2 and (ii) is an Affiliate of a Voting Member. For purposes of these Bylaws, being an “Affiliate” shall mean that (1) a Voting Member controls, is controlled by or is under common control with, such Affiliate Member, and (2) for any exempt wholesale generator, as defined the Public Utility Holding Company Act of 2005, as amended, the meaning provided in Section 214 of the Federal Power Act. Affiliate Members shall have no right to vote on any matter, nor any right to be elected or appointed to the Board. Except as to funding, Affiliate Members shall be bound by the same obligations as Voting Members and Adjunct Members of FRCC. Questions as to whether an entity is an Affiliate of a Voting Member shall be resolved by the Board.

Section 1.4 Adjunct Member. A person or entity may be approved as an Adjunct Member by the Board if such entity has a material interest in the reliability of the bulk power system in the FRCC region but does not meet the definitions and requirements to join as a Voting Member or Affiliate Member. Adjunct Members shall have no right to vote on any matter, nor any right to be elected or appointed to the Board. Except as to funding, Adjunct Members shall be bound by the same obligations as Voting Members and Affiliate Members of FRCC.

Section 1.5 New Members. The Board shall review and act upon membership applications. Prior to membership, the Board shall certify that an applicant complies with the eligibility requirements.

Section 1.6 Membership Commitment. Each Member of the FRCC shall be required to execute, in counterpart, a Member Agreement, as applicable, in the form shown in Appendix A to these Bylaws.

Section 1.7 Obligations.

(a) Each Member of the FRCC shall promote, support and comply with the purposes and policies of the FRCC as set forth in its Certificate of Incorporation and Bylaws, and the other documents governing the activities of FRCC identified in the Bylaws.

(b) Each Member of the FRCC shall appoint a representative as provided herein to receive notices from the FRCC and shall give to the FRCC Chief Executive Officer (“CEO”) in writing (signed by a duly authorized representative of the Member) the name, business address and electronic address of the person thus appointed. An appointed representative of a Member who is unable to attend a meeting may designate, in writing, an alternate to act on behalf of the Member.

Section 1.8 Participation.

(a) For purposes of these Bylaws, an entity and all of its Affiliates shall be considered one "Entity." No Entity shall simultaneously hold more than one Voting Member status or have more than one voting representative on a Standing Committee, or more than one seat on the Board.

(b) An Entity may join FRCC in any Sector in which it qualifies for Membership, provided that an Entity may join as a Voting Member in only one Sector. In the event that an Entity qualifies for more than one Sector, such Entity may join such other Sectors as an Affiliate Member upon payment of any applicable Affiliate Member Annual Fees in accordance with Article VI Section 6.2(b)(ii) for each Sector in which such Entity desires to participate as an Affiliate Member. Once an Entity has elected to be a Voting Member of one Sector, the Entity must continue to vote in that Sector for a minimum of one (1) year. If, at any point, it is determined that an Entity no longer meets the qualifications for the Sector it selected, the Entity may not vote in that Sector; however, that Entity may then immediately elect to become a Voting Member in any Sector for which it does qualify. Questions as to whether an Entity meets the qualifications of a Sector shall be resolved by the Board.

(c) Subject to the requirements of these Bylaws and the Articles of Incorporation, each Voting Member in good standing is entitled to vote on each matter submitted to a vote of the Voting Members. A Member in good standing is one that (i) meets all qualifications for membership as provided in these Bylaws, (ii) is not in arrears for payment of any applicable annual fees for membership or payment of any other fees owed to FRCC unless such payment is being disputed in good faith, and (iii) has not been found by a court to be in breach of any contract with FRCC. Voting Members that are not in good standing are not entitled to vote on any matter until they have regained good standing.

ARTICLE II

Meetings of Voting Members

Section 2.1 Annual Meeting of Voting Members. Voting Members shall meet at least annually on a date and at a place to be established by the Board ("Annual Meeting"). The Voting Members from each Sector shall elect, by majority vote, each Voting Member having one (1) vote, Directors to the Board who will represent their Sector. The Voting Members shall conduct such other business as may be properly brought before them. Meetings may be held by telephone conferencing, video conferencing or by other means enabling all participants in the meeting to communicate with each other. The Annual Meeting shall be open to Affiliate Members and Adjunct Members, and such other invitees as the Board may deem appropriate, provided that the Services Members, along with Affiliate and Adjunct Members that have paid the fees specified in Section 6.2(b)(ii) or (iii), may meet separately to consider matters relating to Member Services.

Section 2.2 Special Meetings. Special meetings of the Voting Members, for any purpose or purposes, unless otherwise prescribed by the laws of the State of Florida, or by the

Articles of Incorporation, may be called by the Chair of the Board. Special meetings of the Regional Entity Members shall be called upon request of six (6) or more Voting Members representing three (3) or more Sectors. Special meetings of the Services Members shall be called upon request of six (6) or more Voting Members that are Services Members representing three (3) or more Sectors. Notice of a special meeting stating the place, date, hour and agenda for the special meeting shall be given to the Voting Members not less than three (3) business days before the meeting. Such request for a special meeting shall state the purpose or purposes of the proposed special meeting, which shall be included as part of an agenda to be distributed to the Voting Members not less than three (3) business days before the meeting. Meetings may be held by telephone conferencing, video conferencing or by other means enabling all participants in the meeting to communicate with each other.

Section 2.3 Place of Meeting. All meetings shall be held at or near the principal office of the FRCC in Tampa, Florida, or at such other place within or outside the State of Florida as shall be determined from time to time by the Board.

Section 2.4 Notice of Meetings.

(a) Notice of the Annual Meeting or any regular or special meeting of the Voting Members shall be sent by mail or electronic means to each Member's representative at the business or electronic address specified in accordance with Section 1.7(b) at least ten (10) business days before the date of the meeting. The notice shall set forth a proposed agenda for the meeting, but any matter may be considered and acted upon at any meeting, whether or not the matter was listed in the proposed agenda, if addition of the item to the agenda is approved at the meeting by the vote of the eligible Voting Members whose votes equal sixty percent (60%) or more of the total weighted sector vote of the eligible Voting Members; provided, however, that at least three (3) Sectors are represented in the affirmative. Meetings may be held at any time without notice if all of the eligible Voting Members are present, or if those not present waive notice in writing either before or after the meeting.

(b) The record date for determining Members entitled to notice shall be one month prior to the meeting date.

Section 2.5 Quorum. Representation at any meeting of the Regional Entity Members of more than 50% of the Voting Members, or representation at any meeting of the Services Members of more than 50% of the Voting Members that are Services Members, shall constitute a quorum for the transaction of business at such meeting; provided, however, that in each case at least four (4) eligible Sectors are represented.

Section 2.6 Voting. Voting by Voting Members shall be by the six (6) Sectors as defined in Section 1.2, except as otherwise provided herein. Each Voting Member within a Sector has one non-divisible vote. Each Sector shall have a “Sector Vote” in proportion to the voting rights specified in Section 3.2(e), which is to be split into an affirmative and a negative component, in the proportion that each component bears to the total votes of the Voting Members within that Sector. Action by the Voting Members shall require affirmative Sector Votes greater than 6.50.

Section 2.7 Action without Meeting. Any action that may be taken at a meeting of the Regional Entity Members or the Services Members may be taken without a meeting if consent in writing, setting forth the action so to be taken, shall be signed by all Voting Members eligible to vote in such meeting before the action is taken.

Section 2.8 Remote Attendance. Any Member otherwise eligible may participate in any meeting by telephone, videoconference communications equipment, or other means enabling all persons participating in the meeting to communicate with each other. A Member participating in a meeting by such means shall be deemed present in person at such meeting.

Section 2.9 Termination of Members.

(a) A Member may be terminated for non-payment of fees or monies due FRCC as provided in Section 6.3, or for a significant violation of obligations as set forth in Section 1.7. The Board may, by resolution, establish a fair and reasonable procedure to terminate a Member.

(b) A Member whose membership has been terminated shall be liable to FRCC for fees and any other monies due FRCC as a result of obligations incurred or commitments made prior to termination.

Section 2.10 Withdrawal. Any other provision of these Bylaws notwithstanding, any Member may withdraw from participation in the activities of FRCC at any time upon written notice to the CEO, whereupon it shall cease to be a Member and shall cease to be entitled or obligated to participate in the activities of the Board, Standing Committees, or any subcommittees, and shall have no further obligations as a Member; provided, however, that if such notice is given more than thirty (30) days after such Member's receipt of its statement of fees and expenses for a fiscal year, the Member shall be obligated to pay its fees and other monies due to FRCC for the full fiscal year within which such termination is effective.

Section 2.11 Reinstatement. A former Member shall be required to apply for Membership as set forth in Section 1.1. The Board may reinstate Membership on any reasonable terms that the Board deems appropriate.

Section 2.12 Property Ownership and Control. Subject to applicable laws, rules, regulations, agreements, and FRCC protocols, each Member shall retain sole control of its own facilities and the use thereof, and nothing in these Bylaws shall require a Member to construct or dedicate facilities for the benefit of any other electric system or allow its facilities to be used by any other Member or to construct or provide any facilities for its own use, and nothing herein shall be deemed to impair the ability or right of any Member to take such actions or to fail to act, as it deems necessary or desirable, with respect to the management, extension, construction, maintenance and operation of its own facilities, present and future. A Member has no interest in the property of FRCC and waives the right to require a partition of any FRCC property.

ARTICLE III

Board of Directors

Section 3.1 Powers. The affairs of FRCC shall be managed by the Board of Directors ("Board"). The Board may exercise all such powers of the FRCC and do all such lawful acts and things as are not prohibited by the laws of the State of Florida, by the Federal Power Act, by the Articles of Incorporation or by these Bylaws.

Section 3.2 Number, Election, Tenure and Governance.

(a) Number. The Board shall include (16) Directors allocated among the Sectors as follows, and such other Directors as provided in by Section 3.2(b)(4):

- (1) Suppliers Sector- three (3) Directors
- (2) Non-Investor Owned Utility Wholesale Sector - two (2) Directors
- (3) Load Serving Entity Sector-
- Municipal - one (1) Director
- Cooperative - one (1) Director
- (4) Generating Load Serving Entity Sector - three (3) Directors

- (5) Investor Owned Utility Sector - Three (3) Directors
- (6) General Sector - Two (2) Directors
- (7) The CEO of FRCC - an ex-officio non-voting Director.

(b) Election.

(1) Directors, with the exception of the CEO, shall be elected as described herein.

(2) Within each Sector, only Voting Members from a given Sector may elect Directors for that Sector.

(3) Within the Load Serving Entity Sector, Director(s) representing 0.5 votes shall all be from a municipal and Director(s) representing 0.5 votes shall be from a cooperative.

(4) Within each Sector, Voting Members from a given Sector may, by majority vote, elect additional Directors subject to a maximum of five (5) Directors representing such Sector. The total votes of the Directors for such Sector shall not exceed the total votes of the Directors of such Sector specified in Section 3.2(a).

(c) Alternate Director. Any Director unable to attend a meeting may designate, in writing, an alternate to act on behalf of the Director.

(d) Term. The term for all Directors shall be two (2) years. Any Director may be reelected for consecutive terms, without limitation. Directors within a Sector shall have staggered terms as determined by the Sector.

(e) Voting Rights.

(1) Except as provided for in subsections (2) and (3) below, each Sector shall have the number of votes as specified below:

- Suppliers Sector 2.5 Votes
- Non-Investor Owned Utility Wholesale Sector 2.0 Votes
- Load Serving Entity Sector
 - Municipal 0.5 Votes
 - Cooperative 0.5 Votes
- Generating Load Serving Entity Sector 3.0 Votes
- Investor Owned Utility Sector 3.5 Votes
- General Sector 1.0 Vote

Total 13.0 Votes

(2) Each Director, as defined in Section 3.2(a) and 3.2 (b), shall have an equal proportional vote of that Sector's total voting strength. This provision shall

apply separately to the municipal and cooperative Directors of the Load Serving Entity Sector.

- (3) If the majority of the Voting Members of a Sector are Services Members, Directors elected by that sector shall be deemed "Services Member Directors." Only Services Member Directors shall be eligible to vote on questions governing Member Services or Member Services Activities. Deliberations on such matters may be limited to Services Member Directors, Voting Members that are Services Members, and Affiliate and Adjunct Members that have paid the fees specified in Section 6.2(b)(ii) or (iii), upon the vote of the Services Member Directors.
- (4) The CEO of FRCC shall not have a vote.

(f) **Limitations.** Each person or alternate serving on the Board shall be a representative of a Voting Member. Unless otherwise provided in these Bylaws, if a representative of a Voting Member is elected to serve on the Board, such person shall only be eligible to serve in such capacity so long as such person remains the representative of said Voting Member. A Voting Member shall not have more than one (1) officer, employee or agent serving as a Director.

Section 3.3 Meetings. Regular meetings of the Board shall be held at such times and places, within or outside the State of Florida, as may be determined by the Board. Special meetings of the Board may be called by the Chair. Special meetings shall be called upon request of six (6) or more Directors. Regular or Special Meetings may be held by telephone conferencing, video conferencing or by other means enabling all participants in the meeting to communicate with each other. Except as specified in Section 3.2(e)(3), the meetings of the Board shall be open to all Members, and such other invitees as the Board may deem appropriate. The Board may meet in closed session to discuss matters of a confidential nature, including but not limited to personnel matters, litigation, or commercially sensitive information of any person or entity.

Section 3.4 Notice of Meetings. Notice of any regular or special meeting of the Board shall be sent by mail or electronic means to each Director, and to each Member, at such Director's and Member's usual place of business at least (ten) 10 business days, in the case of a regular meeting, or (five) 5 business days, in the case of a special meeting, before the date of the meeting. Such notice shall also be sent to the observers of the Board specified in Section 8.1. The notice shall set forth a proposed agenda for the meeting. Subject to the requirements of Section 3.2(e)(3), no agenda item may be added to the agenda at any meeting of the Board which requires action by the Board unless all Directors are present and all agree to allow such an item to be put to a vote. Meetings may be held at any time without notice if all of the Directors of the Board are present, or if those not present waive notice in writing either before or after the meeting.

Section 3.5 Quorum. The presence at a meeting of the Directors whose votes equal sixty percent (60%) or more of the total voting strength of the Board, or in the case of matters governed by Section 3.2(e)(3), votes equal to sixty percent (60%) or more of the total voting

strength of the Directors eligible to vote, shall constitute a quorum for any action of the Board, provided, however, that in each case at least one Director from at least four (4) Sectors are present. If at any meeting a quorum shall fail to attend, a majority of those Directors present at the meeting may adjourn that meeting without further notice until a quorum shall attend. Once a quorum is present, any business may be transacted which might have been transacted at the meeting as originally called.

Section 3.6 Voting. Action by the Board shall require approval of sixty percent (60%) or more of the total eligible voting strength of the Board.

Section 3.7 Remote Attendance. Directors shall be deemed present and voting at a meeting of the Board if participating in the meeting by means of a conference telephone, video conferencing, or other means enabling all persons participating in the meeting to communicate with each other.

Section 3.8 Action without Meeting. Any action that may be taken at a meeting of the Board may be taken without a meeting if consent in writing, setting forth the action so to be taken, shall be signed before the action by all Directors eligible to participate in such action.

Section 3.9 Vacancies and Removal. A Director may be removed with cause at any time by an affirmative vote of 60% of the Voting Members of the Sector that elected that Director. In addition, the Board may remove a Director for cause, upon at least seventy-five percent (75%) affirmative votes of the remaining total voting strength of the Board. The right to elect Directors may not be assigned, sold, pledged or transferred in any manner. A vacancy may be filled only by the Voting Members of the Sector in which the vacancy occurs. Any Director so chosen shall hold office until his or her successor is duly elected and qualified or until his or her earlier resignation, ineligibility or removal.

Section 3.10 Officers. At the Board of Directors meeting following the Annual Meeting of the Voting Members, the Board shall elect a Chair, Vice Chair, and Secretary-Treasurer, who shall be the officers of the FRCC. No two officers of FRCC shall be officers, employees or agents of Voting Members of the same Sector or its Affiliates. The CEO of FRCC may not be elected to act as Chair, Vice-Chair or Secretary/Treasurer.

(a) Term of Office. Each officer of the Board of Directors shall hold office for two (2) fiscal years, and until his or her successor is duly elected and qualified.

(b) Removal of Officers. Any officer of the Board of Directors may be removed with or without cause at any time by the affirmative vote of seventy percent (70%) of the total voting strength of the Board.

(c) Compensation. There shall be no compensation paid to any officer of the Board of Directors of FRCC, provided that an officer serving on the staff of FRCC may be compensated for their services on the staff of FRCC.

Section 3.11 Responsibilities of Board of Director Officers

(a) Chair. The Chair shall serve as the Chair of the Board. The Chair shall preside at all meetings of the Members and Board, provided that, if the Chair is not eligible to vote in a meeting governed by Section 3.2(e)(3), the Directors that are eligible shall select one of the number to preside at such meeting. The Chair shall be responsible for the preparation of the agenda for all meetings of the Members and Board. The Chair shall be a member of and preside over a Personnel and Compensation Committee, which shall have responsibilities for such matters relating to staff.

(b) Vice Chair. The Vice Chair shall, in the absence or disability of the Chair, perform the duties and exercise the powers of the Chair, subject to the provisions of Section 3.11(a), and shall perform such other duties and have such other powers as the Board may from time to time prescribe. The Vice Chair shall be a member of a Personnel and Compensation Committee, which shall have responsibilities for such matters relating to staff.

(c) Secretary-Treasurer. The Secretary-Treasurer shall be responsible to assure that the FRCC staff has adequate procedures to distribute the agenda of the meetings of the Voting Members and the Board, keep the minutes of the proceedings of said meetings, and maintain the financial books and records of the FRCC, including disbursement of the funds of the FRCC in accordance with the authorized annual budget. The Secretary-Treasurer shall be a member of the Personnel and Compensation Committee, which shall have responsibilities for such matters relating to staff.

Section 3.12 Vacancy. Any vacancy in a Board of Director Officer occurring for any reason shall be filled as specified in Section 3.9.

ARTICLE IV

Chief Executive Officer

Section 4.1 CEO. The Board shall hire the CEO who, under the Board's direction, shall carry on the general affairs of the FRCC. The CEO shall be a member of the staff of FRCC and shall be a non-voting Director. It shall be the CEO's duty to approve the expenditure of the monies appropriated by the Board in accordance with the Budget approved by the Board. The CEO shall make an annual report and periodic reports to the Board concerning the activities of FRCC. The CEO shall serve as President of FRCC. The CEO shall comply with all directives of the Board. All agents and employees shall report, and be responsible, to the CEO. The CEO shall perform such other duties as may be determined from time to time by the Board.

ARTICLE V

Standing Committees

Section 5.1 Standing Committees. There shall be a Planning Committee, an Operating Committee, a Compliance Committee, and such other committees, subcommittees,

and task forces as the Board may appoint, when deemed necessary to carry out the purposes of the FRCC.

Section 5.2 Planning Committee. Each Voting Member may appoint one (1) representative, empowered to vote on behalf of the Voting Member, to serve on the Planning Committee. A representative may, if unable to attend a meeting, designate, in writing, an alternate to act on behalf of the representative. Affiliate Members and Adjunct Members may appoint a non-voting representative to serve on the Planning Committee. Quorum and Voting Rights shall be as defined in Sections 5.7 and 5.8. The Planning Committee shall report directly to the Board and is charged with the responsibility of promoting the reliability of the bulk power system in the FRCC Region, and assessing and encouraging generation and transmission adequacy. The Planning Committee may establish subcommittees and task forces as deemed necessary by its membership.

Section 5.3 Operating Committee. Each Voting Member may appoint one (1) representative, empowered to vote on behalf of the Voting Member, to serve on the Operating Committee. A representative may, if unable to attend a meeting, designate, in writing, an alternate to act on behalf of the representative. Affiliate Members and Adjunct Members may appoint a non-voting representative to serve on the Operating Committee. Quorum and Voting Rights shall be as defined in Sections 5.7 and 5.8. The Operating Committee shall report directly to the Board and is charged with responsibility for the coordination, operations planning, operation and maintenance of the bulk power system in the FRCC Region. The Operating Committee may establish subcommittees and task forces as deemed necessary by its membership.

Section 5.4 Compliance Committee. Each Voting Member may appoint one (1) representative, empowered to vote on behalf of the Voting Member, to serve on the Compliance Committee. A representative may, if unable to attend a meeting, designate, in writing, an alternate to act on behalf of the representative. Quorum and Voting Rights shall be as defined in Sections 5.7 and 5.8. The Compliance Committee shall report directly to the Board and is charged with the responsibility of promoting reliability of the bulk power system within the FRCC through compliance related activities. The Compliance Committee is separate and distinct from the Board Compliance Committee which is primarily a “hearing body” and has a different voting structure as outlined in Exhibit D of the Delegation Agreement between the North American Electric Reliability Corporation and FRCC. The Compliance Committee may establish subcommittees and task forces as deemed necessary by its membership.

Section 5.5 Rules of Procedure. Each Standing Committee shall set its rules of procedure, provided that quorum, voting rights and voting shall be as specified in Sections 5.7 and 5.8. Such Rules of Procedure shall be as approved by the Board. All action by any Standing Committee shall be reported as prescribed herein and shall be subject to revision, alteration and approval by the Board.

Section 5.6 Quorum. Representation at any meeting of a Standing Committee of sixty percent (60%) or more of the total voting strength of the Standing Committee shall constitute a quorum for the transaction of business at such meeting; provided, however, that action on matters dealing with the scope or funding of Member Services shall require sixty

percent (60%) or more of the total voting strength of members of the Standing Committee representing Voting Members that are Services Members; and provided further that a quorum shall require that at least three (3) Sectors are represented, all three of which shall be Sectors a majority of the members of which are Services Members in the case of a quorum for action on matters governing Member Services.

Section 5.7 Voting. Voting is by Sector. Each voting representative present at a meeting is assigned a vote equal to the voting strength of his or her Sector, as provided in this section, divided by the number of voting representatives present in that Sector, except that no voting representative present at a meeting shall have more than one (1) vote, except an Investor Owned Utility Sector voting representative who may have up to 1.167 votes. Action by a Standing Committee shall require an affirmative vote equal to or greater than sixty percent (60%) of the total eligible voting strength of the Standing Committee.

Sector Votes	
(1) Suppliers Sector	2.5 Votes
(2) Non-Investor Owned Utility Wholesale Sector	2.0 Votes
(3) Load Serving Entity Sector	
Municipal	0.5 Vote
Cooperative	0.5 Vote
(4) Generating Load Serving Entity Sector	3.0 Votes
(5) Investor Owned Utility Sector	3.5 Votes
(6) General Sector	1.0 Vote
Total	13.0 Votes

Only representatives of Voting Members that are Services Members shall be eligible to vote on questions governing Member Services.

Section 5.8 Meetings. Regular meetings of the Standing Committees shall be held at such times and places, within or outside the State of Florida, as may be determined by the Standing Committees. Special meetings of the Standing Committees may be called by the Chair or upon the request of representatives from three (3) different Sectors. Regular or Special Meetings may be held by telephone conferencing, video conferencing, or by other means enabling all participants in the meeting to communicate with each other. The meetings of the Standing Committees shall be open to all Members, and such other invitees as the Board may deem appropriate.

ARTICLE VI

General Provisions

Section 6.1 Budget. The Board shall annually adopt a budget for the FRCC for administrative expenses of the FRCC, including salaries, and for the costs associated with the various committees, subcommittees, professional services, projects and studies. The Board shall

approve the scope and funding of Member Services, in accordance with the provisions of these Bylaws. The funding for Member Services special projects approved by the Board may be based on a special funding, with an equitable allocation of the costs for the special project as approved by the Board. The budget may be amended from time to time during the fiscal year as determined by the Board, subject to the filing and approval requirements applicable to FRCC as a Regional Entity under the Delegation Agreement.

Section 6.2 Funding.

(a) The funding of FRCC's Regional Entity Activities shall be in accordance with the provisions of Exhibit E and the section numbered eight (8) of the Delegation Agreement.

(b) The Member Services of FRCC shall be funded through an allocation of their costs to all Members that are Services Members in accordance with the provisions of subsections 6.2(b)(i) - (iii) below. The funding of all Member Services shall be kept separate from the funding of Regional Entity Activities as specified in the Business Plan and Budget.

(i) **Services Members.** The allocation for Voting Members that are Services Members shall be based on the following calculation; provided, however, that in no event shall the allocation be less than \$20,000 per annum.

$$\text{Services Member Allocation} = 0.25 (1/N) + 0.25 (B/C) + 0.25 (D/E) + 0.25 (F/G)$$

- N Total number of voting Services Members
- B Voting Services Member's previous-year Full Requirements Energy for Load (FREL) within the FRCC
- C Total of factor B for all voting Services Members
- D Voting Services Member's Net Summer Generating Capacity within the FRCC Region as of December 31 of the previous year, as defined in the FRCC Load and Resource Plan
- E Total of factor D for all voting Services Members
- F Sum of Circuit Miles of Transmission Facilities (69kV and above) of voting Services Members within the FRCC Region times the respective operating voltage as of December 31 of the previous year
- G Total of factor F for all voting Services Members

Full Requirements Energy for Load (FREL) The net electrical energy requirements of the Services Member's electric system, and the net electric energy requirements of all full requirements customers of the Services Member, except if a full requirements customer of a Services Member joins FRCC. In such case, the electrical energy requirements of such full requirements customer will only be counted for the funding calculation for that Services Member who is the full requirements customer, and not for the Services Member who is the supplier of the full requirements. There should be no double counting of FREL between Services Members.

Net Summer Generating Capacity The maximum summer rated capacity, modified for ambient limitations, that a generating unit can sustain over a specified period, less the capacity used to supply the demand of station service or auxiliary needs. For jointly owned units, the Net Capacity will be allocated based on the ownership share of each Services Member who is a joint owner, unless otherwise mutually agreed by the joint owner Services Members.

Circuit Miles of Transmission Facilities The distance (following the path of transmission facility) in miles between substations or switching stations times the number of circuits at the same voltage level. For jointly owned transmission facilities, the Circuit Miles of Transmission Facilities will be allocated based on the ownership share of each Services Member who is a joint owner, unless otherwise mutually agreed by the joint owner Services Members.

(ii) Affiliate Members. The fee for an Affiliate Member that wishes to participate in Member Services activities shall be \$5,000 per annum. The fee for an Affiliate Member, only participating in Regional Entity Activities, shall be waived.

(iii) Adjunct Members. The fees for an Adjunct Member that wishes to participate in Member Services activities shall be \$5,000 per annum. The fee for an Adjunct Member, only participating in Regional Entity Activities, shall be waived.

Section 6.3 Fees. The Member Services membership fee shall be due and payable concurrent with the submission of the written application for membership. The initial membership fee will be prorated on an annual basis depending upon the quarter in which a Member joins. Thereafter, membership fees shall be due and payable on or before January 1st of each year or in installments as determined by the Board. The FRCC shall notify, in writing, any Member who is delinquent in the payment of any applicable membership fee. The notice shall provide a time certain, not to exceed thirty days (30) days from the date of the written notice, during which any such delinquency may be cured. Failure to cure a delinquency within the stated time will result in the loss of all membership rights and designations. In the event of an uncured lapse in the payment of a fee, membership in the FRCC shall be terminated.

Section 6.4 Staff. The FRCC shall employ a staff, including the CEO, to carry out the objectives of the organization. The CEO shall be a non-voting Director of the Board. The duties of the CEO are as defined in Article IV, Section 4.1.

Section 6.5 Expenses. The personal expenses of each Member and Director participating in the activities of the FRCC and its committees and subcommittees shall be borne by the Member on whose behalf such person is acting, unless determined otherwise by the Board.

Section 6.6 Minimum Sector Membership. If the number of Voting Members of a Sector is not greater than one (1), such Sector shall not be entitled to a vote at the Voting Members meetings, Board of Directors meetings, or the Standing Committee meetings.

Section 6.7 Indemnification. The FRCC shall indemnify and hold harmless, to the maximum extent permitted by law, any Member, Director, Member representative, agent, officer or employee of the FRCC and the heirs, estates, successors or assigns of any of them, from any and all claims or liabilities, including costs or attorneys' fees for defending against assertion of any such claim or liability, arising from any act or failure to act of such person for, on behalf of, or at the direction of the FRCC, unless such act or failure to act constituted a willful violation of state, federal or local law, willful misconduct, or gross negligence. With the approval of the Board, the FRCC may reimburse costs, attorneys fees, and other expenses for defending against assertions of any such claims or liabilities prior to the final disposition of any such proceeding. The foregoing rights to be indemnified, held harmless, or reimbursed shall not operate in derogation or prohibition of any other rights which the person indemnified, held harmless or reimbursed may have. The FRCC, by vote of the Board, shall purchase insurance against all or any part of the liabilities which may be incurred by the FRCC and may cause the FRCC to indemnify and hold harmless as and to the extent it may deem appropriate such other person or persons as it may deem appropriate.

Section 6.8 Fiscal Year. The fiscal year of the FRCC shall be the twelve (12) month period of January 1st through December 31st.

Section 6.9 Depositories. All funds of the FRCC shall be deposited in the name of the FRCC in such bank, banks or other financial institutions as the CEO shall from time to time designate and shall be drawn out on checks, drafts or other orders signed on behalf of the FRCC by such person or persons as the Board shall from time to time designate.

ARTICLE VII

Amendments

Section 7.1 Amendments. Subject to the provision that no amendment to these Bylaws may limit the rights of a Member to resign from Membership, subject to the provisions of Section 1.2, and subject to the requirements for approval by NERC and the Federal Energy Regulatory Commission applicable to the FRCC as a Regional Entity, these Bylaws may be amended, altered, or repealed through the following procedure:

(a) Any Voting Member or Director may suggest amendments to these Bylaws. Such suggestions must include a proposed amendment, and any necessary supporting documents. They should be sent to the CEO of FRCC for placement on the agenda for a Board meeting in the time and manner prescribed by the Board.

(b) If the proposal is approved by the Board of Directors, the Board shall place the proposal on the agenda of either the next Annual Meeting of the Voting Members, or pursuant to Board discretion, at a Special Meeting of the Voting Members called for that purpose.

(c) Voting Members shall vote to enact the Board-approved amendment in accordance with Sections 2.5 and 2.6, and subject to the provisions of Section 1.2 of the Bylaws.

Section 7.2 Review of Governance. The Board shall appoint a task force to review these Bylaws, and to submit recommendations to the Board on necessary amendments, at the discretion of the Board or if any of the following events occurs. Such task force shall include representation from each Sector.

(a) The number of Voting Members in a Sector is not greater than one (1).

(b) A Regional Transmission Organization of any type is approved by the Federal Energy Regulatory Commission to operate in the FRCC Region.

(c) Any federal or state legislation or regulatory action that significantly alters the functions of the FRCC.

(d) Any new entity that has or is expected to have financial transactions in the wholesale electric market in the FRCC Region wishes to join the FRCC, and does not otherwise meet the membership requirements as then defined in these Bylaws.

ARTICLE VIII

Observers of the Board

Section 8.1 Observers of the Board. The Chairman of the Florida Public Service Commission, or designee, shall be invited to attend meetings of the Board. The Board shall invite other observers as the Board deems appropriate.

ARTICLE IX

Section 9.1 Board Compliance Committee. FRCC shall establish and maintain a hearing body with authority to conduct and render decisions in compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan, which shall be the FRCC Board Compliance Committee (BCC), a balanced compliance panel reporting directly to the FRCC's Board of Directors.

The BCC will consist of one (1) Voting Member from each of the six (6) sectors in the FRCC, who shall be a member of the Board of Directors. Each year, two (2) members from each Sector of the FRCC Board of Directors will volunteer to serve in a BCC pool. At the time a hearing request is received, the Chair of the FRCC Board of Directors will appoint one member from each Sector to form the BCC for that hearing. The Board Member from the Registered Entity that has requested the hearing will not be selected for that BCC. In the event one (1) Sector of the FRCC declines to participate on the BCC, the Chair of the Board of Directors shall randomly select one (1) additional BCC member from the remaining five (5) Sectors to constitute the BCC. The Chair of the FRCC Board of Directors will appoint a Chair and Vice-Chair of the BCC. Terms of BCC members will be equivalent to the time it takes to complete the hearing for which they were selected. Members may be re-appointed to subsequent terms without any limits to the number of terms they serve.

FRCC Industry Sectors are as follows:

- One (1) Member from the Investor Owned Utility Sector
- One (1) Member from the Suppliers Sector
- One (1) Member from the Non-Investor Owned Utility Wholesale Sector
- One(1) Member from the Load Serving Entity Sector
- One (1) Member from the Generating Load Serving Entity Sector
- One (1) Member from the General Sector

Each member of the BCC shall be a full voting member. There will be no alternates or proxies for the BCC members. Decisions of the BCC shall require (i) a quorum to be present requiring at least fifty (50) percent of the number of members assigned to the BCC provided, however, that

in each case at least four (4) eligible Sectors are represented and (ii) a majority vote of the members of the BCC voting on the decision.

ARTICLE X

Audit

Section 10.1 Audit. The Board shall engage a certified public accounting firm to audit the books and accounts of the FRCC for each fiscal year.

ARTICLE XI

Miscellaneous Provisions

Section 11.1 Headings. The headings used in these Bylaws are for convenience and may not be considered in construing these Bylaws.

Section 11.2 Number and Gender. All singular words include the plural, and all plural words include the singular. All pronouns of one gender include reference to the other gender.

Section 11.3 Parties Bound. These Bylaws will bind and inure to the benefit of any Members, Director, Member representative, agent, officer, or employee of the FRCC and their respective administrators, legal representatives, successors, and assigns except as these Bylaws otherwise provide.

Section 11.4 Minority Positions. Any Voting Member or Standing Committee Representative who has a minority opinion on any significant issue may present the minority opinion to the Board in a manner as prescribed by the Board.

Amended September 25, 2007

Amended June 27, 2008

Amended February 6, 2009

Exhibit C – Regional Standard Development Procedure

Exhibit C shall set forth the Regional Entity's standards development procedure, which NERC agrees meets the following common attributes:

COMMON ATTRIBUTE 1

Proposed regional reliability standards shall be subject to approval by NERC, as the electric reliability organization, and by FERC before becoming mandatory and enforceable under Section 215 of the FPA [add reference to any applicable authorities in Canada and Mexico]. No regional reliability standard shall be effective within the [Regional Entity Name] area unless filed by NERC with FERC [and applicable authorities in Canada and Mexico] and approved by FERC [and applicable authorities in Canada and Mexico].

COMMON ATTRIBUTE 2

[Regional Entity Name] regional reliability standards shall provide for as much uniformity as possible with reliability standards across the interconnected bulk power system of the North American continent. A [Regional Entity Name] reliability standard shall be more stringent than a continent-wide reliability standard, including a regional difference that addresses matters that the continent-wide reliability standard does not, or shall be a regional difference necessitated by a physical difference in the bulk power system. A regional reliability standard that satisfies the statutory and regulatory criteria for approval of proposed North American reliability standards, and that is more stringent than a continent-wide reliability standard, would generally be acceptable.

COMMON ATTRIBUTE 3

[Regional Entity Name] regional reliability standards, when approved by FERC [add applicable authorities in Canada], shall be made part of the body of NERC reliability standards and shall be enforced upon all applicable bulk power system owners, operators, and users within the [Regional Entity Name] area, regardless of membership in the region.

COMMON ATTRIBUTE 4

Requester — The requester is the sponsor of the regional reliability standard request and may assist in the development of the standard. Any member of [Regional Entity Name], or group within [Regional Entity Name] shall be allowed to request that a regional reliability standard be developed, modified, or withdrawn. Additionally, any entity (person, organization, company, government agency, individual, etc.) that is directly and materially affected by the reliability of the bulk power system in the [Regional Entity Name] area shall be allowed to request a regional reliability standard be developed, modified, or withdrawn.

COMMON ATTRIBUTE 5

[Standards or other named] committee — The [Regional Entity Name] [standards] committee manages the standards development process. The [standards] committee will consider which requests for new or revised standards shall be assigned for development (or existing standards considered for deletion). The [standards] committee will advise the [Regional Entity Name] board on standards presented for adoption.

COMMON ATTRIBUTE 6

[Alternative 6A: For a Regional Entity that chooses to vote using a balanced stakeholder committee.]

The [standards] committee is a balanced stakeholder committee, inclusive of all stakeholder interests that provide for or are materially impacted by the reliability of the bulk power system. [The [standards] committee votes to approve standards.] See Appendix A for the representation model of the [standards] committee.

[Alternative 6B: For a Regional Entity that chooses to vote using a balanced ballot body of stakeholders.]

[Registered ballot body] — The registered ballot body comprises all entities or individuals that qualify for one of the stakeholder segments; are registered with [Regional Entity Name] as potential ballot participants in the voting on standards; and are current with any designated fees. Each member of the registered ballot body is eligible to vote on standards. [Each standard action has its own ballot pool formed of interested members of the registered ballot body. Each ballot pool comprises those members of the registered ballot body that respond to a pre-ballot survey for that particular standard action indicating their desire to participate in such a ballot pool.] The representation model of the registered ballot body is provided in Appendix A.]

COMMON ATTRIBUTE 7

[Regional Entity Name] will coordinate with NERC such that the acknowledgement of receipt of a standard request identified in step 1, notice of comment posting period identified in step 4, and notice for vote identified in step 5 below are concurrently posted on both the [Regional Entity Name] and NERC websites.

COMMON ATTRIBUTE 8

An acceptable standard request shall contain a description of the proposed regional reliability standard subject matter containing sufficiently descriptive detail to clearly define the purpose, scope, impacted parties, and other relevant information of the proposed standard.

COMMON ATTRIBUTE 9

Within [no greater than 60] days of receipt of a completed standard request, the [standards] committee shall determine the disposition of the standard request.

COMMON ATTRIBUTE 10

The [standards] committee may take one of the following actions:

- Accept the standard request as a candidate for development of a new standard, revision of an existing standard, or deletion of an existing standard. The [standards] committee may, at its discretion, expand or narrow the scope of the standard request under consideration. The [standards] committee shall prioritize the development of standard in relation to other proposed standards, as may be required based on the volume of requests and resources.
- Reject the standard request. If the [standards] committee rejects a standard request, a written explanation for rejection will be delivered to the requester within [no greater than 30] days of the decision.
- Remand the standard request back to the requester for additional work. The standards process manager will make reasonable efforts to assist the requester in addressing the deficiencies identified by the [standards] committee. The requester may then resubmit the modified standard request using the process above. The requester may choose to withdraw the standard request from further consideration prior to acceptance by the [standards] committee.

COMMON ATTRIBUTE 11

Any standard request that is accepted by the [standards] committee for development of a standard (or modification or deletion of an existing standard) shall be posted for public viewing on the [Regional Entity Name] website within [no greater than 30] days of acceptance by the committee.

COMMON ATTRIBUTE 12

The standards process manager shall submit the proposed members of the drafting team to the [standards] committee. The [standards] committee shall approve the drafting team membership within 60 days of accepting a standard request for development, modifying the recommendations of the standards process manager as the committee deems appropriate, and assign development of the proposed standard to the drafting team.

COMMON ATTRIBUTE 13

At the direction from the [standards] committee, the standards process manager shall facilitate the posting of the draft standard on the [Regional Entity Name] website, along with a draft implementation plan and supporting documents, for a no less than a [30]-day comment period. The standards process manager shall provide notice to [Regional Entity Name] stakeholders and other potentially interested entities, both within and outside of the [Regional Entity Name] area, of the posting using communication procedures then currently in effect or by other means as deemed appropriate.

COMMON ATTRIBUTE 14

The drafting team shall prepare a summary of the comments received and the changes made to the proposed standard as a result of these comments. The drafting team shall summarize comments that were rejected by the drafting team and the reason(s) that these comments were rejected, in part or whole. The summary, along with a response to each comment received will be posted on the [Regional Entity Name] website no later than the next posting of the proposed standard.

COMMON ATTRIBUTE 15

Upon recommendation of the drafting team, and if the [standards] committee concurs that all of the requirements for development of the standard have been met, the standards process manager shall post the proposed standard and implementation plan for ballot and shall announce the vote to approve the standard, including when the vote will be conducted and the method for voting. Once the notice for a vote has been issued, no substantive modifications may be made to the proposed standard unless the revisions are posted and a new notice of the vote is issued.

COMMON ATTRIBUTE 16

The standards process manager shall schedule a vote by the [Regional Entity Name] [registered ballot body/[standards] committee]. The vote shall commence no sooner than [15] days and no later than [30] days following the issuance of the notice for the vote.

COMMON ATTRIBUTE 17

[Alternative 17A: For an RE that chooses to vote using a balanced stakeholder committee.]

The [standards] committee shall give due consideration to the work of the drafting team, as well as the comments of stakeholders and minority objections, in approving a proposed regional reliability standard for submittal to the [Regional Entity Name] board. The [standards]

committee may vote to approve or not approve the standard. Alternatively, the [standards] committee may remand the standard to the drafting team for further work or form a new drafting team for that purpose.

[Alternative 17B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

The [Regional Entity Name] registered ballot body shall be able to vote on the proposed standard during a period of [not less than 10] days.

COMMON ATTRIBUTE 18

[Alternative 18A: For an RE that chooses to vote using a balanced stakeholder committee.]

The [standards] committee may not itself modify the standard without issuing a new notice to stakeholders regarding a vote of the modified standard.

[Alternative 18B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

All members of [Regional Entity Name] are eligible to participate in voting on proposed new standards, standard revisions or standard deletions. [Alternatively: Each standard action requires formation of a ballot pool of interested members of the registered ballot body.]

COMMON ATTRIBUTE 19

[Alternative 19A: For an RE that chooses to vote using a balanced stakeholder committee.]

Actions by the committee shall be recorded in the regular minutes of the committee.

[Alternative 19B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

Approval of the proposed regional reliability standard shall require a [two thirds] majority in the affirmative (affirmative votes divided by the sum of affirmative and negative votes). Abstentions and non-responses shall not count toward the results, except that abstentions may be used in the determination of a quorum. A quorum shall mean [XX%] of the members of the [registered ballot body/ballot pool] submitted a ballot.

COMMON ATTRIBUTE 20

Under no circumstances may the board substantively modify the proposed regional reliability standard.

COMMON ATTRIBUTE 21

Once a regional reliability standard is approved by the board, the standard will be submitted to NERC for approval and filing with FERC [and applicable authorities in Canada and Mexico.]

COMMON ATTRIBUTE 22

- **Open** - Participation in the development of a regional reliability standard shall be open to all organizations that are directly and materially affected by the [Regional Entity Name] bulk power system reliability. There shall be no undue financial barriers to participation. Participation shall not be conditioned upon membership in [Regional Entity Name], and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements. Meetings of drafting teams shall be open to the [Regional Entity Name] members and others.

COMMON ATTRIBUTE 23

- **Balanced** - The [Regional Entity Name] standards development process strives to have an appropriate balance of interests and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter.

COMMON ATTRIBUTE 24

- **Inclusive** — Any entity (person, organization, company, government agency, individual, etc.) with a direct and material interest in the bulk power system in the [Regional Entity Name] area shall have a right to participate by: a) expressing a position and its basis, b) having that position considered, and c) having the right to appeal.

COMMON ATTRIBUTE 25

- **Fair due process** — The regional reliability standards development procedure shall provide for reasonable notice and opportunity for public comment. At a minimum, the procedure shall include public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of interested stakeholders.

COMMON ATTRIBUTE 26

- **Transparent** — All actions material to the development of regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the regional entity's Web site.

COMMON ATTRIBUTE 27

- Does not unnecessarily delay development of the proposed reliability standard.

COMMON ATTRIBUTE 28

Each standard shall enable or support one or more of the reliability principles, thereby ensuring that each standard serves a purpose in support of the reliability of the regional bulk power system. Each standard shall also be consistent with all of the reliability principles, thereby ensuring that no standard undermines reliability through an unintended consequence.

COMMON ATTRIBUTE 29

While reliability standards are intended to promote reliability, they must at the same time accommodate competitive electricity markets. Reliability is a necessity for electricity markets, and robust electricity markets can support reliability. Recognizing that bulk power system reliability and electricity markets are inseparable and mutually interdependent, all regional reliability standards shall be consistent with NERC's market interface principles. Consideration of the market interface principles is intended to ensure that standards are written such that they achieve their reliability objective without causing undue restrictions or adverse impacts on competitive electricity markets.

COMMON ATTRIBUTE 30

To ensure uniformity of regional reliability standards, a regional reliability standard shall consist of the elements identified in this section of the procedure. These elements are intended to apply a systematic discipline in the development and revision of standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

COMMON ATTRIBUTE 31

All mandatory requirements of a regional reliability standard shall be within the standard. Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself.

COMMON ATTRIBUTE 32

Applicability	<p>Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions.</p> <p>If not applicable to the entire [Regional Entity Name] area, then a clear identification of the portion of the bulk power system to which the standard applies. Any limitation on the applicability of the standard based on electric facility requirements should be described.</p>
----------------------	---

COMMON ATTRIBUTE 33

Measure(s)	<p>Each requirement shall be addressed by one or more measures. Measures are used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure will identify to whom the measure applies and the expected level of performance or outcomes required demonstrating compliance. Each measure shall be tangible, practical, and as objective as is practical. It is important to realize that measures are proxies to assess required performance or outcomes. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.</p>
-------------------	---

COMMON ATTRIBUTE 34

Compliance Monitoring Process	<p>Defines for each measure:</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible for providing the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes. • The entity that is responsible for evaluating data or
--------------------------------------	---

	<p>information to assess performance or outcomes.</p> <ul style="list-style-type: none">• The time period in which performance or outcomes is measured, evaluated, and then reset.• Measurement data retention requirements and assignment of responsibility for data archiving.

I. Introduction and Background

Purpose

This manual establishes the process for development, revision, withdrawal and approval of FRCC Regional Reliability Standards for the FRCC Region. FRCC Regional Reliability Standards apply to the reliability planning and reliable operation of the Bulk Power System in the FRCC Region. Proposed FRCC Regional Reliability Standards shall be subject to approval by the North American Electric Reliability Corporation (NERC), as the electric reliability organization, and by the Federal Energy Regulatory Commission (FERC) before becoming mandatory and enforceable under Section 215 of the Federal Power Act. FRCC Regional Reliability Standards, when approved by FERC, shall be made part of the body of NERC reliability standards and shall be enforced upon all applicable bulk power system owners, operators and users within the FRCC Region, regardless of membership in the region.

The FRCC Regional Reliability Standards Development Process is based on providing an open and fair process that ensures all interested and affected parties have an opportunity to participate in the development of FRCC Regional Reliability Standards. Any entity (person, organization, company, government agency, individual, etc.) with a direct and material interest in the reliability of the FRCC Bulk Power System has a right to participate by: a) expressing a position and its basis, b) having that position considered, c) voting on and d) having the right to appeal.

FRCC Regional Reliability Standard Principles

FRCC Regional Reliability Standards go beyond, add detail to, or implement NERC Reliability Standards, or cover matters not addressed in NERC Reliability Standards. FRCC Regional Reliability Standards shall not be inconsistent with or less stringent than NERC Reliability Standards.

FRCC Regional Reliability Standards are based on NERC's Reliability Principles and Market Interface Principles. Each FRCC Regional Reliability Standard shall enable or support one or more of NERC's Reliability Principles and must accommodate competitive electricity markets by being consistent with NERC's Market Interface Principles.

The FRCC Regional Reliability Standard Development Process defines the fair and open process for development, revision, withdrawal and approval of FRCC Regional Reliability Standards for the FRCC Region and has the following characteristics:

- **Due Process** – Any interested party, or any entity that is directly and materially affected by the reliability of the FRCC Bulk Power System has a right to participate in this process as indicated in this manual.
- **Openness** – Participation is open to any interested party or any entity that is directly and materially affected by the reliability of the FRCC Bulk Power System. Participation shall not be conditional upon membership in the FRCC. All FRCC Regional Reliability Standard development meetings will be open and noticed on the FRCC website.

- **Balance** – The FRCC Regional Reliability Standard Development Process shall have a balance of interests and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter.

II. FRCC Regional Reliability Standard Definition, Characteristics, and Elements

Definition

A FRCC Regional Reliability Standard defines certain obligations or requirements of all owners, operators and users of the FRCC Bulk Power System regardless of membership in the FRCC. The obligations or requirements must be material to reliability and measurable. Each obligation and requirement shall support one or more of the NERC reliability principles and shall be consistent with all of the NERC reliability and market interface principles.

FRCC Regional Reliability Standards go beyond, add detail to, or implement NERC reliability standards, or cover matters not addressed in NERC reliability standards. FRCC Regional Reliability Standards shall not be inconsistent with or less stringent than NERC reliability standards.

Characteristics

A FRCC Regional Reliability Standard shall have the following characteristics:

- **Material to Reliability** - A FRCC Regional Reliability Standard shall be material to the reliability of the FRCC Bulk Power System. If the reliability of the FRCC Bulk Power System could be compromised without a particular standard or by a failure to comply with that standard, then the standard is material to reliability.
- **Measurable** - A FRCC Regional Reliability Standard shall establish technical or performance requirements that can be practically measured.
- **Relative to NERC Reliability Standards** - A FRCC Regional Reliability Standard must go beyond, add detail to, or implement NERC reliability standards, or cover matters not addressed in NERC reliability standards.

Although FRCC Regional Reliability Standards have a common format and process, several types of Reliability Standards may exist, each with a different approach to measurement:

- **Technical standards** related to the provision, maintenance, operation, or state of Bulk Power System will likely contain measures of physical parameters and will often be technical in nature.
- **Performance standards** related to the actions of entities providing for or impacting the reliability of the FRCC Bulk Power System will likely contain measures of the results of such actions, or the nature of the performance of such actions.
- **Preparedness standards** related to the actions of entities to be prepared for conditions that are unlikely to occur but are critical to reliability will likely contain measures of such preparations or the state of preparedness.

Elements

A FRCC Regional Reliability Standard shall consist of the elements identified in this section of this manual. These elements are intended to apply a systematic discipline in the development and revision of Reliability Standards. The format allows a clear statement of the purpose, requirements, measures, and compliance elements associated with each Reliability Standard. Supporting documents to aid in the implementation of a Reliability Standard may be referenced by the Reliability Standard but are not part of the Reliability Standard itself.

Performance Elements of a FRCC Regional Reliability Standard

Identification Number	A unique identification number assigned in accordance with an administrative classification system to facilitate tracking and reference.
Title	A brief, descriptive phrase identifying the topic of the Reliability Standard.
Applicability	Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions. If not applicable to the entire FRCC, then a clear identification of the portion of the bulk power system to which the standard applies. Any limitation on the applicability of the standard based on electric facility requirements should be described.
Effective Date and Status	The effective date of the Reliability Standard or, the proposed effective date.
Purpose	The purpose of the Reliability Standard. The purpose shall explicitly state what outcome will be achieved or is expected by this Reliability Standard.
Requirement(s)	Explicitly stated technical, performance, and preparedness requirements. Each requirement identifies what entity is responsible and what action is to be performed or what outcome is to be achieved. Each statement in the requirements section shall be a statement for which compliance is mandatory. Any additional comments or statements for which compliance is not mandatory, such as background or explanatory information should be placed in a separate document and referenced.
Risk Factor(s)	The potential reliability significance of each requirement, designated as a High, Medium or Lower Risk Factor in accordance with the criteria listed below: A Lower Risk Factor requirement is administrative in nature and (a) is a requirement that, if violated, would not be expected to affect the electrical state or capability of the FRCC Bulk Power System, or the ability to effectively monitor and control the FRCC Bulk Power System; or (b) is a requirement in a planning time frame that, if violated, would not, under the emergency, abnormal, or restorative

	<p>conditions anticipated by the preparations, be expected to affect the electrical state or capability of the FRCC Bulk Power System, or the ability to effectively monitor, control, or restore the FRCC Bulk Power System.</p> <p>A Medium Risk Factor requirement (a) is one that, if violated, could directly affect the electrical state or the capability of the FRCC Bulk Power System but is unlikely to lead to FRCC Bulk Power System instability, separation, or cascading failures; or (b) is a requirement in the planning time frame that , if violated, could under emergency, abnormal, or restorative conditions anticipated by the preparations, directly affect the electrical state or capability of the FRCC Bulk Power System, or the ability to effectively monitor and control the FRCC Bulk Power System but is unlikely, under emergency, abnormal, or restoration conditions anticipated by the preparations, to lead to FRCC Bulk Power System instability, separation, or cascading failures, nor to hinder restoration to a normal condition.</p> <p>A High Risk Factor requirement (a) is one that, if violated, could directly cause or contribute to FRCC Bulk Power System instability, separation, or a cascading sequence of failures, or could place the FRCC Bulk Power System at an unacceptable risk of instability, separation, or cascading failures, or (b) is a requirement in a planning time frame that, if violated, could under emergency, abnormal, or restorative conditions anticipated by the preparations, directly cause or contribute to FRCC Bulk Power System instability, separation, or a cascading sequence of failures, or could place the FRCC Bulk Power System at an unacceptable risk of instability, separation, or cascading failures, or could hinder restoration to a normal condition.</p>
Measure(s)	<p>Each requirement shall be addressed by one or more measures. Measures that will be used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure identifies to whom the measure applies and the expected level of performance or outcomes required to demonstrate compliance. Each measure shall be tangible, practical, and as objective as is practical. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.</p>
Compliance Monitoring Process	<p>The compliance elements define:</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible to provide the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes.

	<ul style="list-style-type: none"> • The entity that is responsible for evaluating data or information to assess performance or outcomes. • The time period in which performance or outcomes is measured, evaluated, and then reset. • Measurement data retention requirements and assignment of responsibility for data archiving.
<p>Violation Severity Levels</p>	<p>Defines the degree to which compliance with a requirement was not achieved. The violation severity levels, are part of the standard and are approved with the standard.</p>

III. Roles in the FRCC Regional Reliability Standard Development Process

Nomination, Modification, or Withdrawal of A Regional Standard

Any member of the FRCC, or group (i.e. committee, subcommittee, working group or task force) within the FRCC, shall be allowed to request that a FRCC Regional Reliability Standard be developed, modified, or withdrawn. Additionally, any interested party or any entity that is directly and materially affected by the reliability of the FRCC Bulk Power System shall be allowed to request that a FRCC Regional Reliability Standard be developed, modified, or withdrawn.

Standard Development Process Roles

FRCC Board of Directors – The FRCC Board of Directors shall consider for adoption as FRCC Regional Reliability Standards, those Standards that have been developed and approved by this process. Once the Board adopts a FRCC Regional Reliability Standard, such Standard shall be submitted to NERC for approval. When approved by NERC, it will be submitted to FERC for approval.

Registered Ballot Body (RBB) – The registered ballot body votes to approve FRCC Regional Reliability Standards. The RBB comprises all entities or persons that qualify for one of the FRCC Industry Sectors as defined in Section 1.2 of the FRCC Bylaws, and are registered with FRCC as potential ballot participants in the voting on standards. FRCC membership is not a requirement to participate in the development of and voting on FRCC Regional Reliability Standards. Any entity or person that has a material interest in the reliability of the FRCC Bulk Power System shall be allowed to register as potential ballot participants in the RBB. (See Appendix C)

Ballot Pool (BP) – Each standard action has its own BP formed of interested members of the RBB. The BP comprises those members of the RBB that respond to a pre-ballot survey for that particular standard that indicates their desire to participate in the ballot of that standard. The BP will vote to approve each FRCC Regional Reliability Standard.

FRCC Operating Committee (OC) and FRCC Planning Committee (PC) – The FRCC OC and the FRCC PC (both of which are balanced stakeholder committees, see Appendix C) shall have the primary responsibility for the development, modification or withdrawal of FRCC Regional Reliability Standards.

FRCC Standards Process Manager – The FRCC Regional Reliability Standard Development Process shall be administered by the FRCC Standards Process Manager. The FRCC Standards Process Manager will ensure the integrity of the process and the consistency of quality and completeness of the FRCC Regional Reliability Standards. The FRCC Standards Process Manager will facilitate all steps in this process, and will coordinate with NERC to ensure required information is posted on both NERC and FRCC websites.

Standard Drafting Team – A team of technical experts, such as FRCC Subcommittees, Working Groups, Task Forces, or the FRCC Staff, will be appointed by the FRCC OC and/or PC, that will:

- Develop the details of the FRCC Regional Reliability Standard,
- Consider and respond to industry comments,
- Participate in forums to help build consensus on draft FRCC Regional Reliability Standards,
- Assist in the implementation of approved FRCC Regional Reliability Standards,
- Provide technical oversight in response to changing industry conditions,
- Assist in the identification of the need for new FRCC Regional Reliability Standards.

FRCC Compliance Staff – The FRCC compliance staff provides input and comments during the standard development process to ensure the requirements are not ambiguous, that measures will be effective and that the compliance elements of a standard can be practically implemented.

IV. Steps in Developing a FRCC Regional Reliability Standard

Step 1 – Request a new FRCC Regional Reliability Standard or modification to, or withdrawal of an existing FRCC Regional Reliability Standard

A request to develop, modify or withdraw a FRCC Regional Reliability Standard shall be submitted to the FRCC Standards Process Manager (via email to FRCCStandard@frcc.com) by any member of the FRCC, or group (i.e. committee, subcommittee, working group or task force) within the FRCC, or any interested party or any entity that is directly and materially affected by reliability of the FRCC Bulk Power System. The FRCC Standards Process Manager will acknowledge receipt of the request within fifteen (15) calendar days of its receipt.

Step 2 – Assignment of FRCC Regional Reliability Standard Request

The FRCC Standards Process Manager will assign the request to the FRCC OC, the FRCC PC, or both as appropriate.

Step 3 – Posting of FRCC Regional Reliability Standard Request

The request for standard development, modification or withdrawal will be posted for notification and comment on the FRCC public website for a period of fifteen (15) calendar days, and will be reviewed by the FRCC OC and/or PC. A notice of the posting for comment will be sent to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator to seek input on the proposed request.

Step 4 – Acceptance of a FRCC Regional Reliability Standard Request

The FRCC OC and/or the PC will review the request and any comments submitted to determine if the request received will be accepted or rejected within sixty (60) days of its submission. The decision will be posted and, if accepted, the OC and/or the PC will assign and direct a Standard Drafting Team to develop the draft Regional Reliability Standard. If the request is rejected, the FRCC Standards Process Manager will send notification to the entity making the request and to all entities that received the notice in Step 3 above.

Step 5 – Drafting and Posting of a FRCC Regional Reliability Standard

The FRCC OC and/or PC will assign a Standard Drafting Team, within 60 days of acceptance of the request, to develop, in a timely manner, a draft FRCC Regional Reliability Standard that will address the accepted request. The FRCC OC and/or PC may provide a timeframe that is desired for completion of the standard development.

Under the direction of the FRCC OC and/or PC, the Standard Drafting Team, will consider all comments received on the posting of the standard request and will develop a draft FRCC Regional Reliability Standard and corresponding implementation plan.

The draft FRCC Regional Reliability Standard, implementation plan and any supporting documents shall be posted for comments on the FRCC public website for a period of fifteen (15) calendar days, or such longer period as determined by the drafting team or as directed by the FRCC OC and/or the PC. Notice of the posting will go out to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public

Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator to seek comments.

Comments shall be submitted (via email) to the FRCC Standards Process Manager (FRCCStandard@frcc.com). All comments are due by the close of business on the 15th calendar day of posting, or such later date as determined by the drafting team or as directed by the FRCC OC and/or PC. If the comment due date falls on a weekend or nationally recognized holiday, the comments shall be due by the close of business on the next regularly scheduled business day.

Step 6 – Standards Drafting Team Review of Comments

All comments should be submitted electronically to the FRCC Standards Process Manager who will forward to the Standard Drafting Team for consideration. All timely comments will be considered.

Under the direction given by the FRCC OC and/or the PC, the Standard Drafting Team will review the comments received and revise the draft FRCC Regional Reliability Standard and/or implementation plan as needed. The Standard Drafting Team will develop written responses to each comment received.

All responses to the submitted comments will be documented and posted on the FRCC public website. If needed, a second draft of the FRCC Regional Reliability Standard will be posted for another comment period. Such comment period shall be fifteen (15) calendar days, or such longer period as determined by the drafting team or as directed by the FRCC OC and/or PC.

Notice of the posting will go out to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator to seek comments.

Based on comments received to the posting, Step 6 will be repeated as necessary until the Standards Drafting Team believes the draft FRCC Regional Reliability Standard is ready to submit to the Ballot Pool for approval.

Step 7 –Establishment of Ballot Pool

The Standard Drafting Team shall submit the final draft of the proposed FRCC Regional Reliability Standard, along with any minority opinions, and all comments and written responses received during the posting(s), to the FRCC Standards Process Manager. The FRCC Standards Process Manager shall establish a Ballot Pool for standard action at least fifteen (15) calendar days prior to the start of a ballot. A pre-ballot survey will be sent to each entity of the RBB to determine their desire to be placed in the Ballot Pool. Once the ballot period opens, the Ballot Pool will be closed and changes to the Ballot Pool participation will not be allowed.

Step 8 – Ballot of the new or revised FRCC Regional Reliability Standard

The FRCC Standards Process Manager will post the final draft of the standard on the FRCC website at least fifteen (15) calendar days before a ballot can begin. The Ballot Pool shall have a minimum of ten (10) calendar days to vote on a standard. The Ballot Pool may vote to approve or not approve the standard. If approved, the FRCC Standards Process Manager will submit the FRCC Regional Reliability Standard, proposed implementation plan, and any supporting documents to the FRCC Board of Directors for adoption.

If approval by the Ballot Pool is not obtained, the PC and/or OC will determine if the draft standard is to be sent back to the standard drafting team to repeat step 6 to incorporate any comments, or to take no further action.

If no further action is taken, the reason for such will be posted on the FRCC public website. A notice of the posting will be sent to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator.

Step 9 – Adoption of FRCC Regional Reliability Standards by the FRCC Board of Directors

At a regular or special meeting, the FRCC Board of Directors may consider adoption of the proposed FRCC Regional Reliability Standard that has been approved by the RBB Ballot Pool. A FRCC Regional Reliability Standard submitted for adoption by the FRCC Board of Directors must be posted for notification and comment on the FRCC public website at least ten (10) calendar days prior to action by the FRCC Board of Directors. Notice of the posting will be sent to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator. The FRCC Board of Directors shall consider the comments received, the responses provided, and any dissenting opinions. The FRCC Board of Directors shall adopt or reject a FRCC Regional Reliability Standard as submitted, but may not modify the proposed FRCC Regional Reliability Standard. If the FRCC Board of Directors chooses not to adopt a FRCC Regional Reliability Standard, it shall provide its reasons for not doing so.

If the FRCC Board of Directors chooses not to adopt the proposed FRCC Regional Reliability Standard, the reason for such decision will be posted on the FRCC public website. Notice of the posting will be sent to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator.

Step 10 – Submission to NERC and FERC

Once the FRCC Regional Reliability Standard is adopted by the FRCC Board of Directors, the FRCC Standard Process Manager shall submit the FRCC Regional Reliability Standard to NERC for approval. When approved by NERC, it shall be submitted by NERC to FERC for approval. If NERC or FERC rejects the FRCC Regional Reliability Standard, the FRCC Board of Directors will determine if the standard is to be sent back to the OC and/or PC to incorporate their comments or to take no further action on the standard. A FRCC Regional Reliability Standard that is adopted by the FRCC Board of Directors, approved by NERC and FERC, shall become effective on a date designated by FERC.

V. Special Procedures

Urgent Action

Under certain conditions, the entity making the request or the FRCC OC and/or the PC may designate a proposed or revised FRCC Regional Reliability Standard as requiring urgent action. Urgent action may be appropriate when a delay in implementing a proposed or revised FRCC Regional Reliability Standard will materially impact reliability of the Bulk Power System in the FRCC Region. The FRCC OC and/or the PC must use its judgment carefully to ensure an urgent action is truly necessary and not simply an expedient way to change or implement a FRCC Regional Reliability Standard.

The entity making the request, or the FRCC OC and/or the PC, will prepare a draft of the proposed FRCC Regional Reliability Standard and submit it to the Standards Process Manager for urgent action. The submission must include a justification for the urgent action. The Standards Process Manager shall immediately post the draft as specified in Step 5. The posting shall be a minimum of ten (10) calendar days before the RBB can consider the draft for approval. All comments received during the posting will be considered. Once approved by the RBB, the proposed urgent FRCC Regional Reliability Standard will be sent to the FRCC Board of Directors for adoption.

A FRCC Regional Reliability Standard that is adopted by the FRCC Board of Directors, as an urgent action shall have a termination date specified that shall not exceed 180 days from the approved date. Should there be a need to make the FRCC Regional Reliability Standard permanent, the replacement FRCC Regional Reliability Standard would be required to go through the full standards development process.

An urgent action FRCC Regional Reliability Standard that expires may be renewed by the FRCC Board of Directors using the urgent action process again, in the event a permanent FRCC Regional Reliability Standard has not been adopted. In determining whether to authorize the extension of an urgent action FRCC Regional Reliability Standard, the FRCC OC and/or the PC shall consider the impact to the reliability of the FRCC Bulk Electric System of not continuing the FRCC Regional Reliability Standard. In addition, consideration will be given to whether expeditious progress is being made toward a permanent replacement.

The FRCC OC and/or the PC shall not request the FRCC Board of Directors to extend an urgent action FRCC Regional Reliability Standard if there is insufficient progress toward adopting a permanent replacement FRCC Regional Standard or if the FRCC OC and/or the PC lack confidence that a reasonable completion date is achievable. The intent is to ensure that an urgent action FRCC Regional Reliability Standard does not in effect take on a degree of permanence due to the lack of an expeditious effort to develop a permanent replacement FRCC Regional Reliability Standard. With these principles, there is no pre-determined limit on the number of times an urgent action may be renewed. However, each urgent action FRCC Regional Reliability Standard renewal shall be effective only upon adoption by the FRCC Board of Directors, and approval by NERC and FERC.

Interpretations of Standards

Any member of the FRCC, or group within the FRCC, or an entity that is directly and materially affected by reliability of the FRCC Bulk Power System shall be permitted to request an interpretation of a FRCC Regional Reliability Standard. The entity requesting an interpretation shall send a request to the FRCC Standards Process Manager explaining the specific circumstances surrounding the request and what clarifications are required as applied to those circumstances. The request should indicate the material impact to the requesting party, or others, caused by the lack of clarity or a possible incorrect interpretation of the FRCC Regional Reliability Standard. The FRCC Standards Process Manager will assemble a team with the relevant expertise to address the clarification.

As soon as practical (but not more than thirty (30) calendar days following the receipt of the request), the team will draft a written interpretation of the FRCC Regional Reliability Standard addressing the issues raised. The FRCC Standards Process Manager will submit the written interpretation to the OC and/or PC for review and approval. If approved by the FRCC OC and/or the PC, the interpretation is appended to the FRCC Regional Reliability Standard and is effective immediately. The interpretation will stand until such time as the FRCC Regional Reliability Standard is revised through the normal process, at which time the FRCC Regional Reliability Standard will be modified to incorporate the clarifications provided by the interpretation.

Appeals

Any member of the FRCC, or group within the FRCC, or any entity that is directly and materially affected by reliability of the FRCC Bulk Power System, and who feel they have been or will be adversely affected by any substantive or procedural action or inaction related to the development, approval, revision, or withdrawal of a FRCC Regional Reliability Standard shall have the right to appeal. This appeals process applies only to the FRCC Regional Reliability Standards Process as defined in this document

The burden of proof to show adverse effect shall be on the appellant. Appeals shall be made within thirty (30) calendar days of the date of the action purported to cause the adverse effect. The final decisions of any appeal shall be documented in writing and posted on the FRCC public website. Notice of the posting will be sent to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator .

The appeals process provides two levels, with the goal of expeditiously resolving the issue to the satisfaction of the participants:

Level 1 Appeal

Level 1 is the required first step in this appeals process. The appellant submits to the FRCC Standards Process Manager a complaint in writing that describes the substantive or procedural action associated with a FRCC Regional Reliability Standard or the FRCC Regional Reliability Standards Process. The appellant describes in the complaint the actual or potential adverse impact to the appellant. Assisted by any necessary staff and committee resources, the FRCC Standards Process Manager shall prepare a written

response addressed to the appellant as soon as practical but not more than forty-five (45) calendar days after receipt of the complaint. If the appellant accepts the response as a satisfactory resolution of the issue, both the complaint and response will be made a part of the record associated with the FRCC Regional Reliability Standard.

Level 2 Appeal

If after the Level 1 Appeal, the appellant remains unsatisfied with the resolution, notification shall be made in writing to the FRCC Standards Process Manager. Within thirty (30) calendar days of receiving the notification, the FRCC Standards Process Manager shall convene a Level 2 Appeals Panel. This panel shall consist of five members appointed by the FRCC Board of Directors. In all cases, Level 2 Appeals Panel members shall have no direct affiliation with the participants in the appeal.

The FRCC Standards Process Manager shall post on the FRCC public website the notice of the Level 2 appeal and other relevant materials. Notice of the posting will be sent to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator. At least fifteen (15) calendar days notice of the meeting of the Level 2 Appeals Panel will be made. In addition to the appellant, any entity that is directly and materially affected by the reliability of the FRCC Bulk Power System, and who is directly and materially affected by the substantive or procedural action referenced in the complaint shall be heard by the panel.

The Level 2 Appeals Panel shall not consider any expansion of the scope of the appeal that was not presented in the Level 1 Appeal. The Level 2 Appeals Panel may in its decision find for the appellant and remand the issue to the FRCC OC and/or the PC for resolution with a statement of the issues and facts in regard to which fair and equitable action was not taken. The Level 2 Appeals Panel may find against the appellant with a specific statement of the facts that demonstrate fair and equitable treatment of the appellant and the appellant's objections.

The Level 2 Appeals Panel may not, however, revise, approve, disapprove, or adopt a FRCC Regional Reliability Standard, as these responsibilities remain with the FRCC Board of Directors. The actions of the Level 2 Appeals Panel shall be posted on the FRCC public website. Notice of the posting will be sent to (1) the Registered Ballot body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator.

VI. Maintenance of the FRCC Regional Reliability Standards and Process

Requests to Revise the FRCC Regional Reliability Standard Development Process

Any member of the FRCC, or group (i.e. committee, subcommittee, working group or task force) within the FRCC, or any entity that is directly and materially affected by the reliability of the FRCC Bulk Power System may submit a written request to modify the FRCC Regional Reliability Standard Development Process Manual. The FRCC Standards Process Manager shall oversee the handling of the request. The FRCC OC and/or the PC shall review the request and submit recommendations to the FRCC Board of Directors for consideration. The FRCC Board of Directors, on its own motion, may amend the FRCC Regional Reliability Standard Process.

Five-Year Review

Each FRCC Regional Reliability Standard shall be reviewed at least once every five (5) years. The review date will be determined from the effective date or the latest revision date whichever is later. The review process shall be conducted in accordance with Steps 1 through 10 of the FRCC Regional Reliability Standard Development Process Manual. As a result of this review, a FRCC Regional Reliability Standard shall be reaffirmed, revised, or withdrawn.

Filing of FRCC Regional Standards with Regulatory Agencies

All adopted FRCC Regional Reliability Standards will be filed with FERC.

APPENDIX A

Email completed form to FRCCStandard@frcc.com

FRCC Regional Reliability Standard Request Form

Title of Proposed Standard
Request Date

Requestor Information	TYPE (Check a box for each one that applies)
Name	<input type="checkbox"/> New Standard
Primary Contact	<input type="checkbox"/> Revision to existing Standard
Telephone	<input type="checkbox"/> Withdrawal of existing Standard
Fax	
Email	<input type="checkbox"/> Urgent Action

Purpose (Describe the purpose of the standard – what the standard will achieve in support of reliability)

Industry Need (Provide a detailed statement justifying the need for the proposed standard, along with any supporting documentation)

Brief Description (Describe the proposed standard in sufficient detail to clearly define the scope in a manner that can be easily understood by others)

FRCC Regional Reliability Standard Request Form

The Standard will Apply to the Following Functions (Check box for each one that applies)

<input type="checkbox"/>	Reliability Coordinator	Ensures the reliability of the bulk transmission system within its Reliability Authority area.
<input type="checkbox"/>	Balancing Authority	Integrates resource plans ahead of time, and maintains load-interchange-resource balance within its metered boundary and supports system frequency in real time
<input type="checkbox"/>	Planning Authority	Plans the Bulk Electric System
<input type="checkbox"/>	Resource Planner	Develops a long-term plan for the resource adequacy of specific loads within a Planning Authority area
<input type="checkbox"/>	Transmission Planner	Develops a long-term plan for the reliability of transmission systems within its portion of the Planning Authority area
<input type="checkbox"/>	Transmission Service Provider	Provides transmission services to qualified market agreements
<input type="checkbox"/>	Transmission Owner	Owens transmission facilities
<input type="checkbox"/>	Transmission Operator	Operates and maintains the transmission facilities, and executes switching orders
<input type="checkbox"/>	Distribution Provider	Provides and operates the “wires” between the transmission system and the customer
<input type="checkbox"/>	Generator Owner	Owens and maintains generation unit(s)
<input type="checkbox"/>	Generator Operator	Operates generation units(s) and performs the functions of supplying energy and Interconnected Operations Services
<input type="checkbox"/>	Purchasing-Selling Entity	The function of purchasing or selling energy, capacity, and all necessary Interconnected Operations Services as required
<input type="checkbox"/>	Load-Serving Entity	Secures energy and transmission (and related generation services) to serve the end user

FRCC Regional Reliability Standard Request Form

NERC Reliability Principles

Applicable Reliability Principles (Check box for all that apply.)	
	1. Interconnected bulk electric systems shall be planned and operated in a coordinated manner to perform reliably under normal and abnormal conditions as defined in the NERC Standards.
	2. The frequency and voltage of interconnected bulk electric systems shall be controlled within defined limits through the balancing of real and reactive power supply and demand.
	3. Information necessary for the planning and operation of interconnected bulk electric systems shall be made available to those entities responsible for planning and operating the systems reliably.
	4. Plans for emergency operation and system restoration of interconnected bulk electric systems shall be developed, coordinated, maintained, and implemented.
	5. Facilities for communication, monitoring, and control shall be provided, used, and maintained for the reliability of interconnected bulk electric systems.
	6. Personnel responsible for planning and operating interconnected bulk electric systems shall be trained, qualified, and have the responsibility and authority to implement actions.
	7. The security of the interconnected bulk electric systems shall be assessed, monitored, and maintained on a wide-area basis.

NERC Market Interface Principles

Does the proposed Standard comply with all of the following Market Interface Principles?	
Recognizing that reliability is an essential requirement of a robust North American economy:	
yes or no	1. A reliability standard shall not give any market participant an unfair competitive advantage.
yes or no	2. A reliability standard shall neither mandate nor prohibit any specific market structure.
yes or no	3. A reliability standard shall not preclude market solutions to achieving compliance with that standard.
yes or no	4. A reliability standard shall not require the public disclosure of commercially sensitive information. All market participants shall have equal opportunity to access commercially non-sensitive information that is required for compliance with reliability standards.

APPENDIX B

Process Diagram

APPENDIX C

Development of and Voting of the Registered Ballot Body

1. Registration Procedures

The Registered Ballot Body (RBB) comprises all entities¹ and persons that:

- Qualify for one of the FRCC Industry Sectors, and
- Are registered with the FRCC as potential ballot participants in the voting on FRCC Regional Reliability Standards.

All registrations will be done electronically. All entities and persons will self-select to belong to the RBB. The sectors shall be identical to those in Section 1.2 of the FRCC Bylaws.

All RBB members will have the ability to vote on a standard. Voting will be done in writing (either email or facsimile) with each RBB member having one vote. The RBB representative will have the right to register and participate in ballot pools to cast their vote on a standard being considered for approval.

2. Sector Qualification Guidelines

The general guidelines are as follows:

- An entity or person may register in the RBB in any Sector in which it qualifies for provided that an entity or person registers as a potential ballot participant in only one (1) Sector.
- Any individual currently employed by an organization that is eligible to join one or more of the other five (5) sectors, shall not be qualified to join as a General Sector RBB member.

3. Ballot Pool Voting

A Ballot Pool will be established to vote on any proposed standards action. Each RBB member choosing to belong to a Ballot Pool will have one individual vote. Two-thirds of the individual votes of the Ballot Pool shall constitute a quorum.

Approval of a FRCC Regional Reliability Standard requires the affirmative vote of a two-thirds majority of the weighted sector votes cast. The number of votes cast in each sector is the sum of the affirmative and negative votes, excluding abstentions.

The following steps will be used to determine if there is sufficient affirmative votes:

1. The number of affirmative votes cast in each sector will be divided by the sum of affirmative and negative votes cast to determine the fractional affirmative vote for each sector. Abstentions will not be counted.

¹ An entity and all of its Affiliates (as defined in the FRCC Bylaws) shall be considered one entity for purposes of registering as a potential ballot participant.

2. The fractional affirmative vote for a sector will then be multiplied by the Sector Weight Factor to determine the weighted fractional affirmative vote for a sector. The Sector Weight Factors are:
 - a. Suppliers Sector: Weight Factor = 2.5
 - b. Non-Investor Owned Utility Wholesale Sector: Weight Factor = 2.0
 - c. Load Serving Entity Sector: Weight Factor = 1.0
 - d. Generating Load Serving Entity Sector: Weight Factor = 3.0
 - e. Investor Owned Utility Sector: Weight Factor = 3.5
 - f. General Sector: Weight Factor = 1.0
3. The sum of the weighted fractional affirmative votes from all sectors divided by the sum of the weights of the sectors voting will be used to determine if a two-thirds majority has been achieved. A sector will be considered as “voting” if any member of the sector in the Ballot Pool casts either an affirmative or negative vote.
4. A FRCC Regional Reliability Standard will be considered “approved” if the sum of the weighted fractional affirmative votes from all sectors divided by the sum of the weights of the voting sectors is two-thirds or greater.

History of Revisions

Approved March 2, 2006
Amended July 25, 2006
Amended October 24, 2006
Amended September 25, 2007

EXHIBIT D – COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

1.0 REGIONAL COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

FRCC will implement the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure (which for purposes of this section 1.0 shall not include Attachment 2, Hearing Procedures), to monitor and enforce compliance with Reliability Standards by the owners, operators, and users within **FRCC's** geographic or electrical boundaries, and such other scope, set forth on **Exhibit A** of this Agreement.

2.0 REGIONAL HEARING OF COMPLIANCE MATTERS

FRCC shall establish and maintain a hearing body with authority to conduct and render decisions in compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan, which shall be the FRCC Board Compliance Committee (BCC), a balanced compliance panel reporting directly to the FRCC's Board of Directors.

The BCC will consist of one (1) Voting Member from each of the six (6) sectors in the FRCC, who shall be a member of the Board of Directors. Each year, two (2) members from each Sector of the FRCC Board of Directors will volunteer to serve in a BCC pool. At the time a hearing request is received, the Chair of the FRCC Board of Directors will appoint one member from each Sector to form the BCC for that hearing. The Board Member from the Registered Entity that has requested the hearing will not be selected for that BCC. In the event one (1) Sector of the FRCC declines to participate on the BCC, the Chair of the Board of Directors shall randomly select one (1) additional BCC member from the remaining five (5) Sectors to constitute the BCC. The Chair of the FRCC Board of Directors will appoint a Chair and Vice-Chair of the BCC. Terms of BCC members will be equivalent to the time it takes to complete the hearing for which they were selected. Members may be re-appointed to subsequent terms without any limits to the number of terms they serve.

FRCC Industry Sectors are as follows:

- One (1) Member from the Investor Owned Utility Sector
- One (1) Member from the Suppliers Sector
- One (1) Member from the Non-Investor Owned Utility Wholesale Sector
- One(1) Member from the Load Serving Entity Sector
- One (1) Member from the Generating Load Serving Entity Sector
- One (1) Member from the General Sector

Each member of the BCC shall be a full voting member. There will be no alternates or proxies for the BCC members. Decisions of the BCC shall require (i) a quorum to be present requiring at least fifty (50) percent of the number of members assigned to the BCC provided, however, that in each case at least four (4) eligible Sectors are represented and (ii) a majority vote of the members of the BCC voting on the decision.

FRCC shall conduct all compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, proposed Mitigation Plan, or a proposed Remedial Action Directive, in accordance with Attachment 2, Hearing Procedures, to the NERC Compliance Monitoring and Enforcement Program, subject to the following deviations, if any: None.

3.0 OTHER DECISION-MAKING BODIES

The FRCC has engaged the SERC Reliability Corporation (SERC) to oversee the compliance monitoring and enforcement responsibility as related to FRCC's compliance with Reliability Standard requirements that are applicable to the functions for which FRCC is a Registered Entity.

Exhibit E — Funding

1. Scope of activities funded through the ERO funding mechanism

FRCC shall include in its annual budget submission to NERC amounts for costs it will incur in performing its delegated functions and related activities as described in Sections 5, 6 and 7 of the Agreement. These activities shall include:

- Reliability Standard Development
- Compliance Monitoring and Enforcement
- Organization Registration and Certification
- Reliability Assessment and Performance Analysis (including necessary data gathering activities)
- Event Analysis and Reliability Improvement
- Training and Education
- Situation Awareness
- Infrastructure Security

2. Preparation of Annual Business Plan and Budget

(a) NERC and FRCC, in conjunction with the other Regional Entities, shall collaboratively develop an annual schedule for the development, submission, review and approval of [Regional Entity's] business plan and budget. The annual schedule for the preparation of business plans and budgets shall require FRCC (i) to submit to NERC draft(s) of FRCC's proposed business plan and budget and other preliminary documents and information, and (ii) to submit a final proposed business plan and budget that has been approved by FRCC Board of Trustees to NERC by July 1 or such other agreed date as provides sufficient time for NERC's review, approval and submission of FRCC's business plan and budget to the Commission 130 days in advance of the beginning of each fiscal year. The FRCC business plan and budget submission shall include supporting materials, including FRCC's complete business plan and organization chart, explaining the proposed collection of all assessments, dues, fees and charges, and the proposed expenditure of the funds to be collected in sufficient detail to justify the requested budgeted expenditures and assessments. FRCC's business plan and budget and proposed assessments shall provide for reasonable reserve mechanisms for unforeseen and extraordinary expenses and other contingencies, consistent with generally accepted accounting principles.

(b) NERC shall review and approve FRCC's proposed business plan and budget and proposed assessments for performing the delegated functions and related activities described in Sections 5, 6 and 7 of this Agreement and listed above in Section 1 of this **Exhibit E**, or shall direct FRCC to make such revisions as NERC deems appropriate prior to approval. NERC shall submit FRCC's approved business plan and budget and proposed assessments to the Commission for approval as part of NERC's overall business plan and budget submission, in accordance with the ERO Regulations.

3. Allocation of Costs

Assessments to fund the costs of FRCC's delegated functions and related activities pursuant to the Agreement shall be allocated among all load-serving entities on the basis of Net Energy for Load, unless a different method(s) of allocating and calculating such assessments has been submitted to and approved by NERC and the Commission in accordance with Section 9(b) of the Agreement. FRCC shall submit to NERC annually at the same time it submits its budget request a list of the load-serving entities or designees within its geographic boundaries that shall be responsible for paying [Regional Entity's] assessment and the load-serving entities' proportionate Net Energy for Load, and such other data and information as is necessary to allocate and calculate the allocation of [Regional Entity's] assessment to the load-serving entities or designees under the method(s) of allocation and calculation that will be used.

4. Collection of Funding

(a) NERC shall submit invoices to the load-serving entities or designees identified by FRCC covering the NERC and FRCC assessments approved for collection.

(b) NERC shall pursue any non-payments of assessment amounts and shall request assistance from ERO Governmental Authorities as necessary to secure collection. To the extent reasonably practicable, FRCC shall assist NERC in pursuing and collecting any non-payments. Notwithstanding the foregoing, FRCC is not responsible and does not assume any liability for recovering non-payments or underpayments of assessment amounts. NERC shall retain sole responsibility for recovering non-payments or underpayments of assessment amounts. NERC shall add the amount of any non-payments by end-users or designees within FRCC's region, that are reasonably determined to be uncollectible, to NERC's assessments for a subsequent year with the amount of such non-payments to be allocated to end-users within FRCC's region.

(c) Upon approval by ERO Governmental Authorities of FRCC's annual assessment to fund the costs of its delegated functions and related activities, NERC shall pay FRCC's annual assessment to Regional Entity in four equal quarterly payments on January 15, April 15, July 15 and October 15 of the budget year.

5. Application of Penalties

Except as otherwise approved by the Commission, all penalty monies received by FRCC shall be applied as a general offset to FRCC's budget requirements for U.S.-related activities under this Agreement for the subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity.

6. Budget and Funding for FRCC's Non-Statutory Activities

In addition to its delegated functions and related activities, as specified in Sections 5, 6 and 7 of the Agreement and in Section 1 of this **Exhibit E** (such delegated functions and

activities referred to in this Section 6 as “statutory activities”), FRCC performs the following other functions and activities (such other functions and activities being referred to in this Section 6 as "non-statutory activities"):

Non-Statutory Activities

The Member Services division of the FRCC provides, coordinates or administers a variety of services relating to the reliable planning and operation of the bulk power system in the FRCC Region. These services are carried out by the FRCC Planning Committee (PC) and the FRCC Operating Committee (OC), and its various subcommittees, task forces and working groups.

Planning Committee (PC)

The PC promotes the reliability of the bulk power system in the FRCC Region, and assesses and encourages generation and transmission adequacy. The PC, through the FRCC Regional Transmission Planning Process, provides a vehicle for ensuring that transmission planning within the FRCC will provide for the development of a robust transmission network within the FRCC Region. The activities of the PC include the activities of the following Member Services working groups: the Stability Working Group, the Transmission Working Group, the Resources Working Group, the ATC Working Group and the Fuel Reliability Working Group. The activities of these working groups pertain to the facilitated and coordinated effort for the running of engineering studies and communications in a cost effective, open and transparent manner for the members to complete common tasks to ensure future bulk power reliability. This includes any transmission planning that allows transmission owners to meet FERC’s Order 890 requirement for wide area planning and implementation of data and reporting to the Florida Public Service Commission on resource adequacy and transmission reliability.

Operating Committee (OC)

The OC is responsible for the coordination, planning, operation and maintenance of reliable bulk power supply in the FRCC. Its primary reliability goals are the continuous improvement of the situational awareness of the operators interconnected within the FRCC, and ensuring that adequate physical, operational and cyber security objectives are in place for the Region’s shared communications network. The OC ensures reliable operations are maintained through the development and implementation of the Reliability Process for the FRCC Bulk Electric System, formerly the FRCC Security Process.

Operating Reliability Subcommittee (ORS)

The ORS provides overall administration for the development and implementation of operating procedures and other reliability matters. The ORS reviews and assesses regional import and export limits, scheduled transmission outages, real-time system reliability, events analysis, information and data exchange and other reliability issues. The ORS provides formal oversight and implementation of the Reliability Process for the FRCC Bulk Electric System, formerly the FRCC Security Process, which establishes the reliability responsibilities of the various entities within the Region and specifically monitors the agents

responsible for performing the Reliability Coordinator and Operations Planning Coordinator functions.

Data Exchange Working Group (DEWG)

The DEWG, subordinate to the ORS, supports the real-time data needs of the FRCC Reliability Coordinator and other entities identified by the FRCC ORS, and for developing methodologies to facilitate the exchange of real-time, modeling, and other operational data to help assure reliable electric power system operations. Within the FRCC, all entities provide system data via the FRCC Reliability Data Link (RDL). The FRCC RDL receives all substation topology information, line flows, voltage levels, unit parameters, etc. from the operating entities on a real-time basis. Data is available to all.

FRCC Telecommunications Subcommittee (TS)

The TS provides formal oversight over the TS budget which is included in the OC budget. The primary purpose of the TS is to ensure that adequate and redundant communications facilities are made available to the operating entities within the FRCC. The TS administers the FRCC hotline program, Satellite phone program, RDL program and also ensures that reliable and redundant communications are maintained with NERCNet, from a Regional communications perspective. All TS programs are in support of the RC function and are therefore non-statutory, with the exception of the FRCC satellite phone program which is a tool used by the Regional Entity to perform situational awareness and thus is budgeted as statutory.

Non Statutory Situation Awareness and Infrastructure Security Program

This program maintains and enhances the situational awareness of the operators of the interconnected system by supporting the tools necessary to efficiently communicate Electricity Sector Information Sharing and Analysis Center information within and outside of the FRCC Region. The program also ensures that the FRCC entity shared communications networks, include the appropriate physical, operational, and cyber security protections in order to function reliably.

FRCC shall employ the following methods and procedures to (i) keep its funding mechanisms for its statutory activities separate from its funding mechanisms for its non-statutory activities, and (ii) record the costs it incurs in the performance of its non-statutory functions separately from the costs it incurs in the performance of its statutory functions:

(i) Separation of funding sources for statutory activities and non-statutory activities. The FRCC maintains a separate bank account for Statutory receivable collection. The statutory billing is done at the beginning of each quarter and an invoice is rendered to NERC only for the statutory receivable. NERC wires monies due directly into the Statutory bank account. All non-statutory receivables are deposited into a separate bank account. Member Services invoices are rendered to each member quarterly and deposited into this separate account.

(ii) Separation of costs of statutory activities and non-statutory activities. FRCC has adopted the NERC Chart of Accounts for Expenses and the NERC Rules of Procedure

Categories as well as Member Services Functional Categories and utilizes these in order to correctly code each invoice received for all goods and services as well as for staff to specify where their time is spent each day for their time accounting reports. These methods are used to ensure that no statutory funds are used to pay for non-statutory expenses and that no non-statutory funds are used to pay for statutory expenses.

Each employee and officer (with the exception of the President and CEO) turns in a time sheet with their time accounted for between statutory and non-statutory functions that they personally spent their time on. Within statutory and non-statutory they further break down their time by the function areas. Each employee and officer fills out their time sheet daily and turns them in every two weeks to the Controller. The employees use the department codes to split their time according to what they did that day. These times are totaled by the Controller and Full-Time Equivalents (FTE's) for each function are calculated.

Accounting personnel route to the responsible department head all invoices pertaining to their job responsibility. The department head assigns the functional category, signs the invoices and returns it to accounting for payment processing. The accounting staff evaluates and assigns the appropriate General Ledger account number based on the Chart of Accounts and enters both the account number and the department number on the accounts payable system. Expenses such as Facilities Rent, stationary, utilities and other items of a general nature are split to each of the functions based on FTE's, on a monthly basis. Only expenses that cannot be determined to be specifically for a particular function are split on an allocated basis. Any expenses received that are for a particular function within a particular area are charged directly to that area and are not split.

All expenses are reviewed by a Department Head, an Accounting Assistant and the Controller for accuracy of coding and assignment to particular functions whether that be for Statutory or Non-statutory.

FRCC shall provide its budget for such non-statutory activities to NERC at the same time that FRCC submits its proposed annual business plan and budget for statutory activities to NERC pursuant to Section 9 of the Agreement. FRCC's budget for non-statutory activities that is provided to NERC shall contain a detailed list of FRCC's non-statutory activities and a description of the funding sources for the non-statutory activities. FRCC agrees that no costs (which shall include a reasonable allocation of FRCC's general and administrative costs) of non-statutory activities are to be included in the calculation of FRCC's assessments, dues, fees, and other charges for its statutory activities.

7. Amended or Supplemental Business Plans and Budgets

During the course of the fiscal year, if FRCC determines it does not or will not have sufficient funds to carry out its delegated functions and related activities, FRCC shall submit to NERC one or more proposed amended or supplemental business plans and budgets and requests for approval of supplemental assessments, reflecting costs, cost increases or funding shortfalls not provided for in FRCC's approved business plan and budget for the

fiscal year. NERC shall review and approve the proposed amended or supplemental business plan and budget and proposed supplemental assessment, or shall direct FRCC to make such revisions as NERC deems appropriate prior to approval. NERC shall submit FRCC's approved amended or supplemental business plan and budget and proposed supplemental assessment to the Commission for approval.

8. NERC Review of Regional Entity Financial Statements

NERC shall conduct reviews of the quarterly and annual financial statements submitted by FRCC pursuant to Section 9(h) and (i) of the Agreement. FRCC shall provide supporting documentation for the quarterly and annual financial statements as reasonably requested by NERC based on its reviews.

ATTACHMENT 2B

NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION

REVISED DELEGATION AGREEMENT

WITH

FLORIDA RELIABILITY COORDINATING COUNCIL

REDLINED AGAINST

REVISED PRO FORMA DELEGATION AGREEMENT

**AMENDED AND RESTATED DELEGATION AGREEMENT BETWEEN
NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION
AND ~~REGIONAL ENTITY~~ FLORIDA RELIABILITY COORDINATING COUNCIL**

AMENDED AND RESTATED DELEGATION AGREEMENT (“Agreement”) made as of [January 1, 2011], between the North American Electric Reliability Corporation (“NERC”), an organization certified by the Federal Energy Regulatory Commission (“Commission”) pursuant to Section 215(c) of the Federal Power Act to establish and enforce Reliability Standards for the Bulk-Power System, and ~~REGIONAL ENTITY~~ Florida Reliability Coordinating Council (“FRCC”), an organization established to develop and enforce Reliability Standards within the geographic boundaries identified on **Exhibit A** to this Agreement, and for other purposes. NERC and ~~REGIONAL ENTITY~~ FRCC may be individually referred to herein as “Party” or collectively as “Parties.”

WITNESSETH

WHEREAS, Subtitle A of the Electricity Modernization Act of 2005 added Section 215 to the Federal Power Act (16 U.S.C. § 824n) (hereafter “the Act”), which, among other things, provides for the establishment of an electric reliability organization (“ERO”) to develop and enforce Reliability Standards applicable to all owners, operators, and users of the Bulk-Power System;

WHEREAS, the Commission has adopted regulations for the implementation of the Act, which are set forth at Chapter I, Title 18, Code of Federal Regulations, Part 39 (the “ERO Regulations”);

WHEREAS, the Commission has certified NERC as the ERO that will, in accordance with the Act, establish and enforce Reliability Standards for the Bulk-Power System, subject to certain delegation provisions described below;

WHEREAS, the Act recognizes the international interdependency of electric reliability within North America and envisions the ERO and such applicable Regional Entities as international organizations;

WHEREAS, the Act and Section 39.8 of the ERO Regulations provide for the delegation by the ERO of authority to propose and enforce Reliability Standards to regional entities (“Regional Entities”) such as ~~REGIONAL ENTITY~~FRCC provided that:

(A) The Regional Entity is governed by —

- (i) an independent board;
- (ii) a balanced stakeholder board; or
- (iii) a combination independent and balanced stakeholder board.

(B) The Regional Entity otherwise satisfies the provisions of Section 215(c)(1) and (2) of the Act; and

(C) The agreement promotes effective and efficient administration of Bulk-Power System reliability;

WHEREAS, certain Regional Entities are organized on an Interconnection-wide basis and are therefore entitled to the presumption set forth in the Act that: “[t]he ERO and the Commission shall rebuttably presume that a proposal for delegation to a Regional Entity organized on an Interconnection-wide basis promotes effective and efficient administration of bulk power system reliability and should be approved”;

WHEREAS, the Act further provides that the ERO shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Reliability Standard or modification to a Reliability Standard to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest;

WHEREAS, ~~REGIONAL ENTITY~~FRCC ~~is/is not~~is not organized on an Interconnection-wide basis and therefore ~~is/is not~~is not entitled to the rebuttable presumptions accorded such an entity;

WHEREAS, NERC will work through ~~REGIONAL ENTITY~~FRCC to carry out certain of its activities in furtherance of its responsibilities as the ERO under the Act;

WHEREAS, NERC has concluded that ~~[REGIONAL ENTITY]~~FRCC meets all requirements of the Act, the ERO Regulations, and the NERC Rules of Procedure as approved by the Commission (“NERC Rules of Procedure”) necessary to qualify for delegation; and

WHEREAS, NERC and ~~[REGIONAL ENTITY]~~FRCC, having operated under a predecessor agreement to this Agreement, have negotiated this amended and restated Agreement so as to incorporate the benefits of their mutual experience and lessons learned while operating under the predecessor agreement and thereby provide for the more efficient and effective execution of their respective responsibilities in a transparent manner that is pursuant to Section 215 of the Act and the ERO Regulations;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, NERC and ~~[REGIONAL ENTITY]~~FRCC agree as follows:

1. Definitions. The capitalized terms used in this Agreement shall be defined as set forth in the Act, the ERO Regulations, the NERC Rules of Procedure, or the NERC Glossary of Terms Used in Reliability Standards, or, if not so defined, shall be defined as set forth in this Section 1 or elsewhere in the text of this Agreement:

(a) Breach means (i) the failure of a Party to perform or observe any material term, condition or covenant of the Agreement or (ii) a representation in Section 2 of the Agreement shall have become materially untrue.

(b) Cross-Border Regional Entity means a Regional Entity that encompasses a part of the United States and a part of Canada or Mexico.

(c) Delegated Authority means the authority delegated by NERC to ~~[REGIONAL ENTITY]~~FRCC to propose and enforce Reliability Standards pursuant to the Act and to undertake related activities set forth in this Agreement in furtherance of these delegated functions in accordance with the Act, the ERO Regulations and this Agreement.

2. Representations.

(a) For purposes of its Delegated Authority, ~~[REGIONAL ENTITY]~~FRCC hereby represents and warrants to NERC that:

(i) ~~{REGIONAL ENTITY}~~FRCC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder. ~~{REGIONAL ENTITY}~~FRCC is governed in accordance with its bylaws by [~~select appropriate: an independent board/a balanced stakeholder board/a combination independent and balanced stakeholder board~~]. Pursuant to these bylaws, no two industry sectors can control any ~~{REGIONAL ENTITY}~~FRCC decision and no single industry sector can veto any ~~{REGIONAL ENTITY}~~FRCC decision. The relevant portions of such bylaws are attached hereto in **Exhibit B**¹, and as so attached are in full force and effect. No other such corporate governance documents are binding upon ~~{REGIONAL ENTITY}~~FRCC.

(ii) As set forth in **Exhibit C** hereto², ~~{REGIONAL ENTITY}~~FRCC has developed a standards development procedure, which provides the process that ~~{REGIONAL ENTITY}~~FRCC may use to develop Regional Reliability Standards [~~and Regional Variances, if the regional entity is organized on an Interconnection-wide basis~~] that are proposed to NERC for adoption.

(iii) As set forth in **Exhibit D** hereto, ~~{REGIONAL ENTITY}~~FRCC has adopted the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure, which provides for the enforcement of Reliability Standards within ~~{REGIONAL ENTITY}~~FRCC's geographic boundaries as shown on **Exhibit A**.

(b) NERC hereby represents and warrants to ~~{REGIONAL ENTITY}~~FRCC that:

(i) NERC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder; and

¹ The **Exhibit B** from ~~{REGIONAL ENTITY}~~FRCC shall meet the requirements contained in **Exhibit B** to this Agreement.

² The **Exhibit C** from ~~{REGIONAL ENTITY}~~FRCC shall meet the requirements contained in **Exhibit C** to this Agreement.

(ii) NERC has been certified as the ERO by the Commission pursuant to the Act.

3. Covenants.

(a) During the term of this Agreement, ~~REGIONAL ENTITY~~FRCC shall maintain and preserve its qualifications for delegation pursuant to the Act and shall not amend its Regional Entity Rules without NERC's approval, which shall not be unreasonably withheld or delayed and which shall, in the case of a Regional Entity organized on an Interconnection-wide basis, be governed by the presumptions provided for in Section 215(d)(2) and (e)(4)(C) of the Act, and be subject to any required Commission approval.

(b) During the term of this Agreement, NERC shall maintain its qualification and status as the ERO pursuant to the Act and, subject to the provisions of Sections 17 and 18 of this Agreement, NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations or programs of ~~REGIONAL ENTITY~~FRCC under this Agreement without first obtaining the consent of ~~REGIONAL ENTITY~~FRCC, which consent shall not be unreasonably withheld or delayed.

(c) During the term of this Agreement, NERC and ~~REGIONAL ENTITY~~FRCC shall adhere to and require that all participants in their respective activities under this Agreement follow and comply with the NERC Antitrust Compliance Guidelines.

4. Delegation of Authority.

(a) Based upon the representations, warranties and covenants of ~~REGIONAL ENTITY~~FRCC in Sections 2 and 3 above, the corporate governance documents set forth in **Exhibit B**, the standards development process set forth in **Exhibit C**, and the compliance monitoring and enforcement program set forth in **Exhibit D**, NERC hereby delegates authority, pursuant to Section 215(e)(4) of the Act, to ~~REGIONAL ENTITY~~FRCC for the purpose of proposing Reliability Standards to NERC, as set forth in Section 5 of this Agreement, and enforcing Reliability Standards, as set forth in Section 6 of this Agreement, within the geographic boundaries and such other scope set forth on **Exhibit A**, *provided*, that ~~REGIONAL ENTITY~~FRCC shall not monitor and enforce compliance with Reliability Standards for ~~REGIONAL ENTITY~~FRCC or an affiliated entity with respect to reliability

functions for which ~~{REGIONAL ENTITY}~~FRCC or an affiliate is a Registered Entity. Any exclusions from this delegation of authority to ~~{REGIONAL ENTITY}~~FRCC within, or additions to this delegation of authority to ~~{REGIONAL ENTITY}~~FRCC beyond, the geographic boundaries set forth on **Exhibit A** are stated on **Exhibit A**.

(b) In circumstances where ~~{REGIONAL ENTITY}~~FRCC or an affiliated entity is a Registered Entity, ~~{REGIONAL ENTITY}~~FRCC shall enter into an agreement with another Regional Entity or NERC for the other Regional Entity or NERC to monitor and enforce ~~{REGIONAL ENTITY}~~FRCC's or affiliate's compliance with Reliability Standards. Such agreements are subject to NERC and Commission approval.

(c) Nothing in this Agreement shall prohibit ~~{REGIONAL ENTITY}~~FRCC from entering into an arrangement between one or more other Regional Entities to perform compliance monitoring and enforcement activities outside of its region, on behalf of NERC and/or other Regional Entities, for Registered Entities that have registered functions monitored by more than one Regional Entity, subject to approval by NERC.

(d) For Cross-Border Regional Entities, the authority delegated by this Agreement shall extend only to the portion of the region identified on **Exhibit A** that is within the United States. Any delegation of authority by ERO Governmental Authorities in Canada or Mexico shall be governed by a separate agreement and is outside the scope of this Agreement; provided, however, that both ~~{REGIONAL ENTITY}~~FRCC and NERC shall endeavor to ensure that this Agreement and such separate agreements are compatible.

(e) As a condition to this delegation of authority and subject to the provisions of Section 17 of this Agreement, ~~{REGIONAL ENTITY}~~FRCC shall comply with the applicable provisions of NERC's Certificate of Incorporation, Bylaws, Rules of Procedure, and Reliability Standards, as from time to time adopted, approved, or amended.

5. Development and Proposal of Reliability Standards.

(a) In connection with its Delegated Authority, ~~{REGIONAL ENTITY}~~FRCC shall be entitled to:

(i) propose Reliability Standards, Regional Variances, or modifications thereof to NERC, which shall be considered by NERC through an open and inclusive process

for proposing and adopting Reliability Standards that affords ~~[REGIONAL ENTITY]~~FRCC reasonable notice and opportunity to be heard; and

(ii) develop Regional Reliability Standards ~~and Regional Variances, if Regional Entity is organized on an Interconnection-wide basis~~ through ~~[REGIONAL ENTITY]~~FRCC's process as set forth in **Exhibit C**. Proposals approved through ~~[REGIONAL ENTITY]~~FRCC's process shall be reviewed by the NERC Board after NERC provides notice and an opportunity for interested persons to comment. In the case of a proposal from a Regional Entity organized on an Interconnection-wide basis, comments shall be limited to the factors identified in NERC Rule of Procedure 312.3 as it may be amended from time to time. The NERC Board shall promptly thereafter consider such proposed Regional Reliability Standard or Regional Variance, applying the rebuttable presumption described in subsection 5(b) of this Agreement if the proposed Regional Reliability Standard or Regional Variance is from a Regional Entity organized on an Interconnection-wide basis, and either approve the proposed Regional Reliability Standard or Regional Variance and submit it to the Commission for approval, or disapprove it in writing setting forth its reasons. ~~[REGIONAL ENTITY]~~FRCC may appeal any disapproval of a proposed Regional Reliability Standard or Regional Variance to the Commission.

(b) Pursuant to Section 215(d)(3) of the Act, NERC shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Regional Reliability Standard or Regional Variance or modification thereof to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. Any person challenging such proposal from the Regional Entity organized on an Interconnection-wide basis shall have the burden of proof. NERC shall not find that this presumption has been rebutted except based upon substantial evidence that has been disclosed to, and been subject to comment by, the Interconnection-wide Regional Entity during NERC's review of the proposal.

6. Enforcement of Compliance with Reliability Standards.

(a) In connection with its delegated authority pursuant to this Agreement, ~~[REGIONAL ENTITY]~~FRCC shall enforce Reliability Standards (including Regional Reliability Standards and Regional Variances) within the geographic boundaries set forth, or as

otherwise specified, in **Exhibit A** through the compliance monitoring and enforcement program set forth in **Exhibit D**. NERC and ~~{REGIONAL ENTITY}~~FRCC agree that this compliance monitoring and enforcement program meets all applicable requirements of the Act, Order No. 672 of the Commission, and the ERO Regulations, including, *inter alia*, the requirement for an audit program pursuant to Section 39.7(a) of the ERO Regulations, the assessment of penalties pursuant to Section 39.7(c) through 39.7(g) of the ERO Regulations and the requirements for due process. ~~{REGIONAL ENTITY}~~FRCC may not change its compliance monitoring and enforcement program set forth in **Exhibit D** absent NERC's approval, which shall not be unreasonably withheld or delayed, and the approval of the Commission. Subject to the rights and limitations specified in Sections 17 and 18 of this Agreement, ~~{REGIONAL ENTITY}~~FRCC agrees to comply with the NERC Rules of Procedure, with any directives issued pursuant to Section 8(c) of this Agreement, and with any guidance and directions issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, in implementing this program.

(b) ~~{REGIONAL ENTITY}~~FRCC shall report promptly to NERC any Possible Violation, Alleged Violation, or Confirmed Violation of a Reliability Standard, and its eventual disposition by ~~{REGIONAL ENTITY}~~FRCC. Such report shall include the owner's, operator's, or user's name, which Reliability Standard or Reliability Standards were the subject of the Possible Violation, Alleged Violation, or Confirmed Violation, when the Possible Violation, Alleged Violation, or Confirmed Violation occurred, other pertinent facts including circumstances surrounding the Possible Violation, Alleged Violation, or Confirmed Violation with any known risk to the Bulk-Power System, when the Possible Violation, Alleged Violation, or Confirmed Violation was or will be mitigated, the name of a person knowledgeable about the Possible Violation, Alleged Violation, or Confirmed Violation to serve as a point of contact with the Commission, and any other information required by NERC compliance program procedures. NERC shall promptly forward such report to the Commission. NERC and ~~{REGIONAL ENTITY}~~FRCC shall cooperate in filing such periodic summary reports as the Commission shall from time to time direct on Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards and summary analyses of such Possible Violations, Alleged Violations, and Confirmed Violations.

(c) Each Possible Violation, Alleged Violation, or Confirmed Violation shall be treated as nonpublic unless the matter is filed with the Commission as a Notice of Penalty, or, if disclosure is required, dismissed. The disposition of each Possible Violation, Alleged Violation, or Confirmed Violation that relates to a Cybersecurity Incident or that would jeopardize the security of the Bulk-Power System if publicly disclosed shall remain nonpublic unless the Commission directs otherwise.

(d) All dispositions by ~~REGIONAL ENTITY~~FRCC of Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards shall be reported to NERC for review and, in the case of Confirmed Violations, penalties or sanctions, and settlements, for approval. Following approval of a disposition by NERC, NERC shall file the disposition with the Commission, if required by, and in accordance with, Section 215(e) of the Act and Section 39.7 of the ERO Regulations. NERC shall review ~~REGIONAL ENTITY~~FRCC's dispositions based on the following criteria:

(i) whether the disposition is supported by a sufficient record compiled by ~~REGIONAL ENTITY~~FRCC in accordance with the NERC Rules of Procedure, NERC directives and Commission requirements, taking into account the nature of the Possible Violation, Alleged Violation, or Confirmed Violation,

(ii) whether the disposition is consistent with any applicable directives issued pursuant to Section 8(c) of this Agreement, any applicable directions or guidance issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, or other applicable NERC guidance, concerning the Reliability Standards to which the Possible Violation, Alleged Violation, or Confirmed Violation relates,

(iii) if the disposition is a Confirmed Violation or settlement, whether it provides for a penalty or sanction, or a determination of no penalty or sanction, determined in accordance with the NERC Sanction Guidelines, Appendix 4B to the NERC Rules of Procedure, and

(iv) whether the disposition is reasonably consistent with other dispositions by ~~REGIONAL ENTITY~~FRCC and by other Regional Entities of Possible Violations, Alleged Violations, and Confirmed Violations involving the same or similar facts and circumstances.

NERC may reject any disposition, with an explanation of why NERC believes the disposition does not meet the above criteria. ~~{REGIONAL ENTITY}~~FRCC may submit a disposition requiring NERC approval that has been rejected by NERC, or a revised disposition following a rejection, directly to the NERC Board Compliance Committee for approval without revising the disposition to address all the grounds on which NERC originally rejected the disposition. The final approval of ~~{REGIONAL ENTITY}~~FRCC's disposition of a Possible Violation, Alleged Violation, or Confirmed Violation shall be made by the NERC Board Compliance Committee, provided, that the NERC Board or NERC Board Compliance Committee may, by appropriate resolution, delegate authority for final approval of dispositions of specified categories of Possible Violations, Alleged Violations, or Confirmed Violations to the NERC President.

(e) All appeals of penalties imposed by ~~{REGIONAL ENTITY}~~FRCC as a result of a decision by ~~{REGIONAL ENTITY}~~FRCC's Hearing Body shall be filed with, heard by and disposed of by, NERC in accordance with the NERC Rules of Procedure.

(f) ~~{REGIONAL ENTITY}~~FRCC shall maintain the capability to conduct investigations of Possible Violations and Alleged Violations of Reliability Standards and to conduct such investigations in a confidential manner.

(g) ~~{REGIONAL ENTITY}~~FRCC shall maintain a program of proactive monitoring and enforcement of compliance with Reliability Standards, in accordance with the NERC Compliance Monitoring and Enforcement Program and the annual NERC Compliance Monitoring and Enforcement Program Implementation Plan.

(h) As part of its compliance monitoring and enforcement program, ~~{REGIONAL ENTITY}~~FRCC shall maintain a conflict of interest policy that assures the integrity and independence of such program, including the integrity and independence of the persons or decision-making bodies making final determinations in compliance enforcement actions under Section 5.0 of the NERC Compliance Monitoring and Enforcement Program. A Regional Entity may have stakeholders lead or participate in its board compliance committee so long as integrity and independence are assured through reasonable and appropriate recusal procedures.

(i) As often as NERC deems necessary, but no less than every five years, NERC shall review ~~{REGIONAL ENTITY}~~FRCC's compliance monitoring and enforcement program to determine that: (i) the program meets all applicable legal requirements; (ii) actual practices reflect the requirements; and (iii) the program administered pursuant to the Delegated Authority

promotes consistent interpretations across North America of Reliability Standards and comparable levels of sanctions and penalties for violations of Reliability Standards constituting comparable levels of threat to reliability of the Bulk-Power System.

7. Delegation-Related Activities.

NERC will engage ~~[REGIONAL ENTITY]~~FRCC on its behalf to carry out certain of its activities that are in furtherance of Bulk-Power System reliability and NERC's responsibilities as the ERO under the Act or in support of the Delegated Authority, as specified in the NERC Rules of Procedure and listed on **Exhibit E**. These delegation-related activities shall include, but are not limited to, those described in subsections (a) through (f), each of which shall be considered a statutory activity:

(a) Certification of Bulk-Power System Entities. The NERC Board shall set criteria for certification in accordance with the NERC Rules of Procedure. ~~[REGIONAL ENTITY]~~FRCC shall issue certifications in accordance with the NERC Rules of Procedure.

(b) Registration of owners, operators, and users of the Bulk-Power System as responsible for compliance with requirements of Reliability Standards.

(i) The NERC Board shall develop criteria for registration of owners, operators, and users of the Bulk-Power System as Registered Entities and shall apply the registration criteria to register owners, operators and users of the Bulk-Power System as Registered Entities.

(ii) NERC shall maintain a registration database of Registered Entities, based on data and information provided by ~~[REGIONAL ENTITY]~~FRCC and other Regional Entities. ~~[REGIONAL ENTITY]~~FRCC shall provide timely and accurate information relating to registrations to NERC, on at least a monthly basis, to enable NERC to maintain a registration database that is accurate and up-to-date.

(iii) The NERC Board Compliance Committee shall hear and decide appeals from owners, operators and users of the Bulk-Power System contesting registration, in accordance with the NERC Rules of Procedure. If the NERC Board Compliance Committee upholds the decision to register an owner, operator, or user, NERC shall defend the decision in any subsequent appeal of the decision by the Registered Entity to the Commission.

(c) Reliability Assessment and Performance Analysis. ~~REGIONAL ENTITY~~FRCC shall develop assessments of the reliability of the Bulk-Power System, or ensure that data and information are collected, analyzed and provided to NERC in support of the development of reliability assessments, in accordance with the NERC Rules of Procedure. ~~REGIONAL ENTITY~~FRCC shall also develop and maintain, and collect data in support of the development and maintenance of, reliability performance metrics and assessments of risks to the Reliable Operation of the Bulk-Power System, in accordance with the NERC Rules of Procedure and NERC directives. NERC shall develop data-gathering quality control procedures, forms and reporting mechanisms, which shall be used by ~~REGIONAL ENTITY~~FRCC and other Regional Entities in carrying out their responsibilities under this subsection (c).

(d) Event Analysis and Reliability Improvement. ~~REGIONAL ENTITY~~FRCC shall conduct event analysis pursuant to the NERC Rules of Procedure and applicable governmental regulations. NERC and ~~REGIONAL ENTITY~~FRCC shall coordinate event analysis to support the effective and efficient use of their collective resources, consistency in event analysis, and timely delivery of event analysis reports. In collaboration with NERC, ~~REGIONAL ENTITY~~FRCC shall disseminate to the electric industry lessons learned and other information obtained or resulting from event analysis.

(e) Training and Education. ~~REGIONAL ENTITY~~FRCC may provide training and education to Registered Entities, as it deems necessary, in support of its performance of delegated functions and related activities under this Agreement. NERC may also provide training and education programs to Registered Entities on topics relating to NERC's responsibilities as the ERO.

(f) Situation Awareness and Infrastructure Security.

(i) ~~REGIONAL ENTITY~~FRCC shall gather and assess situation awareness information provided by Registered Entities pursuant to the NERC Rules of Procedure and applicable governmental regulations, and shall provide other data, information and assistance to NERC in support of NERC's activities in monitoring present conditions, and responding to events, on the Bulk-Power System

(ii) ~~[REGIONAL ENTITY]~~FRCC shall collaborate with NERC in its efforts to coordinate electric industry activities to promote critical infrastructure protection of the Bulk-Power System in North America.

8. Oversight of Performance of Delegated Functions and Related Activities.

This Section 8 sets forth processes and procedures which the Parties intend shall be used in NERC's oversight of ~~[REGIONAL ENTITY]~~FRCC's performance of its Delegated Authority and related activities pursuant to this Agreement. It is the intent of NERC and ~~[REGIONAL ENTITY]~~FRCC that matters relating to NERC's oversight of ~~[REGIONAL ENTITY]~~FRCC's performance of its Delegated Authority and related activities shall be established or resolved by collaboration between NERC and ~~[REGIONAL ENTITY]~~FRCC and, where applicable, other Regional Entities, to the maximum extent possible, consistent with the construct that NERC and the Regional Entities are operating together in a collaborative manner to carry out the responsibilities of the ERO under Section 215 of the Act and the ERO Regulations.

(a) (i) NERC shall develop, in collaboration with ~~[REGIONAL ENTITY]~~FRCC and other Regional Entities, performance goals, measures and other parameters (including, without limiting the scope of such goals, measures and parameters, financial performance goals, measures and parameters), and performance reports, which shall be used to measure NERC's and ~~[REGIONAL ENTITY]~~FRCC's performance of their respective functions and related activities. The performance goals, measures and parameters and the form of performance reports shall be approved by the NERC President and shall be made public. ~~[REGIONAL ENTITY]~~FRCC shall provide data, information and reports to NERC, in accordance with established schedules, to enable NERC to calculate ~~[REGIONAL ENTITY]~~FRCC's performance to the agreed-upon goals, measures and parameters.

(ii) NERC shall use the performance goals, measures and parameters and performance reports to evaluate ~~[REGIONAL ENTITY]~~FRCC's performance of its delegated functions and related activities and to provide advice and direction to ~~[REGIONAL ENTITY]~~FRCC on performance improvements. The performance goals, measures and other parameters and the values of such goals, measures and parameters, shall be reviewed by NERC, ~~[REGIONAL ENTITY]~~FRCC and the other Regional Entities, revised if appropriate, and made

public, on the same timeline as the annual business planning and budgeting process described in Section 9 of this Agreement.

(iii) At the request of the President of NERC, ~~{REGIONAL ENTITY}~~FRCC shall be required to develop, submit for NERC approval, and implement action plans to address areas of its performance that are reasonably determined by NERC, based on analysis of ~~{REGIONAL ENTITY}~~FRCC's performance against the performance goals, measures and parameters, or performance of specific activities, to be unsatisfactory, *provided*, that prior to requiring ~~{REGIONAL ENTITY}~~FRCC to adopt and implement an action plan or other remedial action, NERC shall issue a notice to ~~{REGIONAL ENTITY}~~FRCC of the need and basis for an action plan or other remedial action and provide an opportunity for ~~{REGIONAL ENTITY}~~FRCC to submit a written response contesting NERC's evaluation of ~~{REGIONAL ENTITY}~~FRCC's performance and the need for an action plan. ~~{REGIONAL ENTITY}~~FRCC may request that the President of NERC reconsider the request, and thereafter may request that the NERC Board review and reconsider the request. NERC and ~~{REGIONAL ENTITY}~~FRCC shall work collaboratively as needed in the development and implementation of ~~{REGIONAL ENTITY}~~FRCC's action plan. A final action plan submitted by ~~{REGIONAL ENTITY}~~FRCC to NERC shall be made public unless the President of NERC makes a written determination that the action plan or specific portions of the plan should be maintained as non-public.

(b) NERC shall make available to ~~{REGIONAL ENTITY}~~FRCC standardized training and education programs, which shall be designed taking into account input from ~~{REGIONAL ENTITY}~~FRCC and other Regional Entities, for ~~{REGIONAL ENTITY}~~FRCC personnel on topics relating to the delegated functions and related activities.

(c) (i) NERC may issue directives to ~~{REGIONAL ENTITY}~~FRCC concerning the manner in which ~~{REGIONAL ENTITY}~~FRCC shall perform its delegated functions and related activities under this Agreement. The NERC Rules of Procedure, or any other ERO Rule requiring approval of the Commission, shall not be considered "directives." NERC shall initiate the development of a directive through a collaborative process with ~~{REGIONAL ENTITY}~~FRCC and, if applicable, other Regional Entities to which the directive will apply. Any directive developed through the collaborative process shall be approved by, and issued under the signature of, the NERC President.

(ii) If after a period of time that is reasonable under the circumstances, NERC and ~~REGIONAL ENTITY~~FRCC and, if applicable, other Regional Entities are unable to reach agreement on the contents of the directive, NERC may issue the directive with the approval of and under the signature of the NERC President; *provided*, that before the NERC President issues a directive pursuant to this paragraph (ii), ~~REGIONAL ENTITY~~FRCC and, if applicable, other Regional Entities, shall be given a reasonable opportunity to present their positions on, and a suggested alternative version or versions of, the proposed directive to the NERC President.

(iii) Upon issuance of a directive by the NERC President, it shall be binding upon, and shall be complied with by, ~~REGIONAL ENTITY~~FRCC, subject to reasonable time periods for adoption, implementation, and funding of any necessary resources. Upon request by ~~REGIONAL ENTITY~~FRCC, the NERC Board (or a committee of the Board to which the Board delegates appropriate authority) shall review and shall confirm, revise or revoke any directive that was issued by the NERC President without ~~REGIONAL ENTITY~~FRCC's agreement, *provided*, that ~~REGIONAL ENTITY~~FRCC shall request such review within thirty (30) days following issuance of the directive by the NERC President unless good cause can be shown for a later request.

(iv) NERC and ~~REGIONAL ENTITY~~FRCC and, if applicable, other Regional Entities, shall collaborate in deciding whether a directive (whether issued pursuant to paragraph (ii) or paragraph (iii)) shall be made public. If no agreement is reached by the date of issuance as to whether the directive shall be made public, the NERC President shall decide whether the directive will be made public, *provided*, that is the intent of the Parties that the NERC President shall apply a presumption that directives should be made public, unless the NERC President makes a written determination stating a specific reason for maintaining a particular directive as non-public.

(d) In addition to the issuance of directives pursuant to subsection (c), the NERC Board (or a Board committee to which the Board has delegated authority) may issue guidance or directions as to the manner in which ~~REGIONAL ENTITY~~FRCC, and, if applicable, other Regional Entities, shall perform delegated functions and related activities. The Board or Board committee shall also establish reasonable time periods for the implementation of any such guidance or directions, taking into account the impact on the reliability of the Bulk-Power

System and the need for funding of additional resources. Any such guidance or directions shall be stated in writing and shall be public, unless the Board or Board committee makes a written determination stating a specific reason for maintaining particular guidance or directions as non-public. ~~REGIONAL ENTITY~~FRCC, either individually or in conjunction with other Regional Entities, may request that the NERC Board or Board committee reconsider or revise the guidance or direction.

(e) NERC shall conduct collaborative reviews with ~~REGIONAL ENTITY~~FRCC, either individually or in conjunction with one or more other Regional Entities, that provide for the exchange of information on practices, experiences, and lessons learned in the implementation of the delegated functions.

(f) Any audits of ~~REGIONAL ENTITY~~FRCC performed by NERC shall be limited to an examination of ~~REGIONAL ENTITY~~FRCC's compliance with this Agreement, NERC's Rules of Procedure, the Compliance Monitoring and Enforcement Program, Commission requirements, and directives that are in effect pursuant to Section 8(c)

9. Funding. ~~REGIONAL ENTITY~~FRCC and NERC shall ensure, subject to Commission approval in accordance with the ERO Regulations, that the delegated functions and related activities described in Sections 5, 6 and 7 and listed on **Exhibit E** have reasonable and adequate funding and resources by undertaking the following:

(a) ~~REGIONAL ENTITY~~FRCC shall develop, through a collaborative process with NERC, and propose, an annual business plan and budget, in accordance with ERO Regulations, Commission orders and NERC business planning and budgeting policies and instructions. ~~REGIONAL ENTITY~~FRCC's proposed business plan and budget shall describe the activities necessary for, and provide a budget with adequate resources for, ~~REGIONAL ENTITY~~FRCC to carry out its Delegated Authority under this Agreement, including the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E**. ~~REGIONAL ENTITY~~FRCC's business plan and budget shall show the funding sources and amounts to fund the proposed budget, including as applicable assessments to end users, penalty monies, and other sources of funds.

(b) ~~REGIONAL ENTITY~~FRCC and NERC agree that the portion of ~~REGIONAL ENTITY~~FRCC's approved budget for the functions and activities described in Sections 5, 6

and 7 and listed on **Exhibit E** that is to be funded by assessments, will be equitably allocated among end users within the geographic boundaries described in **Exhibit A** and recovered through a formula based on Net Energy for Load, or through such other formula as is proposed by ~~REGIONAL ENTITY~~FRCC and approved by NERC and the Commission. If ~~REGIONAL ENTITY~~FRCC proposes to use a formula other than Net Energy for Load beginning in the following year, ~~REGIONAL ENTITY~~FRCC shall submit the proposed formula to NERC in sufficient time that NERC may review and approve the proposed formula and file it with the Commission by May 15 for approval, and the proposed formula shall be effective for the following year if approved by the Commission on or before the date the Commission approves the annual business plan and budget submitted by NERC and ~~REGIONAL ENTITY~~FRCC to the Commission pursuant to the ERO Regulations for such year.

(c) NERC shall determine that the assessments to fund the costs for its statutory functions in its Commission-approved budget are first allocated fairly among the Interconnections and regions according to the applicability of this work to those Interconnections and regions, and then equitably among the end users of the applicable interconnections and regions as appropriate. Allocation on a Net Energy for Load basis will be presumed to satisfy this equitability requirement.

(d) NERC shall provide ~~REGIONAL ENTITY~~FRCC with the form or forms for business plan and budget submittal, and any accompanying instructions, in accordance with the schedule for preparation of the business plan and budget developed by NERC and the Regional Entities.

(e) ~~REGIONAL ENTITY~~FRCC shall submit its proposed annual business plan and budget for carrying out its Delegated Authority functions and related activities described in Sections 5, 6 and 7 and listed on Exhibit E, as well as for all other activities of ~~REGIONAL ENTITY~~FRCC, to NERC for review and approval in accordance with the annual schedule for the preparation of business plans and budgets which shall be developed collaboratively by NERC and the Regional Entities, as more fully described in **Exhibit E**.

(f) NERC shall fund ~~REGIONAL ENTITY~~FRCC's performance of its Delegated Authority and related activities in accordance with ~~REGIONAL ENTITY~~FRCC's Commission-approved business plan and budget, in the amount of ~~REGIONAL~~

~~ENTITY~~FRCC's assessments to end users approved by the Commission. **Exhibit E** sets forth the procedures and timing for billing and collecting ~~REGIONAL ENTITY~~FRCC's approved assessments from end users and other entities and payment of the approved assessment amount to ~~REGIONAL ENTITY~~FRCC, unless otherwise modified and approved by NERC and the Commission. NERC shall not impose any material obligation or requirement regarding the Delegated Authority upon ~~REGIONAL ENTITY~~FRCC that has not been provided for in an approved business plan and budget or an approved amended or supplemental business plan and budget, without ~~REGIONAL ENTITY~~FRCC's consent.

(g) NERC shall develop, in consultation with the Regional Entities, a reasonable and consistent system of accounts, with a level of detail and record keeping comparable to the Commission's Uniform System of Accounts and sufficient to allow the Commission to compare each Commission-approved NERC and ~~REGIONAL ENTITY~~FRCC fiscal year budget with the actual results at the NERC and Regional Entity levels. ~~REGIONAL ENTITY~~FRCC shall follow NERC's prescribed system of accounts except to the extent that NERC permits a departure from the prescribed system of accounts. NERC shall make an informational filing with the Commission describing any such waiver it permits and providing an explanation supporting the permitted departure.

(h) ~~REGIONAL ENTITY~~FRCC shall submit unaudited quarterly interim financial statements in form provided by NERC no later than 20 days after the end of the fiscal quarter (March 31, June 30, September 30, and December 31).

(i) ~~REGIONAL ENTITY~~FRCC shall submit audited financial statements annually, including supporting materials, in a form provided by NERC no later than May 1 of the following year.

(j) **Exhibit E** to this Agreement sets forth the mechanism through which ~~REGIONAL ENTITY~~FRCC shall offset penalty monies it receives (~~other than penalty monies received from an operational function or division or affiliated entity of [REGIONAL ENTITY]FRCC~~) against its next year's annual budget for carrying out functions under this Agreement, ~~and the mechanism by which [REGIONAL ENTITY]FRCC shall transmit to NERC any penalty monies received from an operational function or division or affiliated entity of [REGIONAL ENTITY]FRCC.~~ *Provided*, that, subject to approval by NERC and the

Commission, ~~REGIONAL ENTITY~~FRCC may propose and implement an alternative use of penalty monies to that set forth in **Exhibit E**.

10. Assignment. This Agreement may be assigned by either Party only with the prior written consent of the other, which consent shall be granted or withheld in such non-assigning Party's sole discretion, subject to approval by the Commission. Any assignment under this Agreement shall not relieve a Party of its obligations, nor shall a Party's obligations be enlarged, in whole or in part, by reason thereof. ~~REGIONAL ENTITY~~FRCC may not delegate in whole or in part its Delegated Authority to any other entity without NERC's express consent; provided, however, that nothing in this provision shall prohibit ~~REGIONAL ENTITY~~FRCC from contracting with other entities to assist it in carrying out its Delegated Authority, provided ~~REGIONAL ENTITY~~FRCC retains control and responsibility for such Delegated Authority.

11. Default and Cure. Upon a Breach, the non-breaching Party shall give written notice of such Breach to the breaching Party (the "Default Notice"). Subject to a suspension of the following deadlines as specified below, the breaching Party shall have thirty (30) calendar days from receipt of the Default Notice within which to cure such Breach; *provided however*, that if such Breach is not capable of cure within thirty (30) calendar days, the breaching Party shall commence such cure within thirty (30) calendar days after notice and continuously and diligently complete such cure within ninety (90) calendar days from receipt of the Default Notice; and, if cured within such time, the Breach specified in such notice shall cease to exist. Subject to the limitation specified in the following sentence, if a Breach is not cured as provided in this Section 11, or if a Breach is not capable of being cured within the period provided for herein, the nonbreaching Party shall have the right to declare a default and terminate this Agreement by written notice at any time until cure occurs, and be relieved of any further obligation hereunder. The deadlines for cure and the right to declare a default and terminate this Agreement shall be suspended during the pendency of any efforts or proceedings in accordance with Section 18 of this Agreement to resolve a dispute as to whether a Breach has occurred or been cured. The provisions of this Section 11 will survive termination of this Agreement.

12. Term and Termination.

(a) This Agreement shall become effective on [January 1, 2011] (the “Effective Date”).

(b) The term of the Agreement shall be five (5) years from the Effective Date, prior to which time NERC shall conduct an audit pursuant to subsection 6(i) to ensure that ~~REGIONAL ENTITY~~FRCC continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. If ~~REGIONAL ENTITY~~FRCC meets such requirements, this Agreement may be renewed for another five (5) year term. This Agreement may be renewed for successive additional five (5) year renewal terms provided that prior to the end of each renewal term, NERC shall conduct an audit pursuant to subsection 6(i) to ensure that ~~REGIONAL ENTITY~~FRCC continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. Provided, that either Party may terminate this Agreement as of the end of a term by giving written notice to terminate at least one (1) year prior to the end of the term. If this Agreement is not renewed or becomes subject to termination for any reason, the Parties shall work to provide for a transition of ~~REGIONAL ENTITY~~FRCC’s Delegated Authority to NERC or to another eligible entity and to provide for the resolution of any wind-up costs associated with termination of this Agreement. The termination of this Agreement shall not take effect until such transition has been effected, unless the transition period exceeds one year, at which time ~~REGIONAL ENTITY~~FRCC may unilaterally terminate.

(c) If any provision of this Agreement, or the application thereof to any person, entity or circumstance, is held by a court or regulatory authority of competent jurisdiction to be invalid, void, or unenforceable, or if a modification or condition to this Agreement is imposed by a regulatory authority exercising jurisdiction over this Agreement, the Parties shall endeavor in good faith to negotiate such amendment or amendments to this Agreement as will restore the relative benefits and obligations of the signatories under this Agreement immediately prior to such holding, modification or condition. If either Party finds such holding, modification or condition unacceptable and the Parties are unable to renegotiate a mutually acceptable resolution, either Party may unilaterally terminate this Agreement. Such termination shall be effective one year following written notice by either Party to the other Party and to the Commission, or at such other time as may be mutually agreed by ~~REGIONAL ENTITY~~FRCC and NERC.

(d) Notwithstanding any termination of this Agreement, provisions contained in Limitation of Liability (Section 13), No Third Party Beneficiaries (Section 14) and Confidentiality (Section 15) shall survive this Agreement in accordance with their terms until sixty (60) days following the expiration of any applicable statute of limitations.

13. Limitation of Liability. ~~REGIONAL ENTITY~~FRCC and NERC agree not to sue each other or their directors, officers, employees, and persons serving on their committees and subgroups based on any act or omission of any of the foregoing in the performance of duties pursuant to this Agreement or in conducting activities under the authority of Section 215 of the Act, other than seeking a review of such action or inaction by the Commission. NERC and ~~REGIONAL ENTITY~~FRCC shall not be liable to one another for any damages whatsoever, including without limitation, direct, indirect, incidental, special, multiple, consequential (including attorneys' fees and litigation costs), exemplary, or punitive damages arising out of or resulting from any act or omission associated with the performance of the ~~REGIONAL ENTITY~~FRCC's or NERC's responsibilities under this Agreement or in conducting activities under the authority of Section 215 of the Act, except to the extent that the ~~REGIONAL ENTITY~~FRCC or NERC is found liable for gross negligence or intentional misconduct, in which case ~~REGIONAL ENTITY~~FRCC or NERC shall not be liable for any indirect, incidental, special, multiple, consequential (including without limitation attorneys' fees and litigation costs), exemplary, or punitive damages.

14. No Third Party Beneficiaries. Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to, or any liability to, any third party.

15. Confidentiality. During the course of the Parties' performance under this Agreement, a Party may receive Confidential Information, as defined in Section 1500 of NERC's Rules of Procedure. Except as set forth herein, the Parties agree to keep in confidence and not to copy, disclose, or distribute any Confidential Information or any part thereof, without the prior written permission of the issuing Party, unless disclosure is required by subpoena, law, or other directive of a court, administrative agency, or arbitration panel, in which event the recipient hereby agrees to provide the Party that provided the Confidential Information with prompt

notice of such request or requirement in order to enable such issuing Party to (a) seek an appropriate protective order or other remedy, (b) consult with the recipient with respect to taking steps to resist or narrow the scope of such request or legal process, or (c) waive compliance, in whole or in part, with the terms of this Section. In the event a protective order or other remedy is not obtained or the issuing Party waives compliance with the provisions, the recipient agrees to furnish only that portion of the Confidential Information which the recipient's counsel advises is legally required and to exercise best efforts to obtain assurance that confidential treatment will be accorded to such Confidential Information. In addition, each Party shall ensure that its officers, trustees, directors, employees, subcontractors and subcontractors' employees, and agents to whom Confidential Information is exposed are under obligations of confidentiality that are at least as restrictive as those contained herein. This confidentiality provision does not prohibit reporting and disclosure as directed by NERC, as set forth in Section 6 of this Agreement.

16. Amendment. Neither this Agreement nor any of the terms hereof, may be amended unless such amendment is made in writing, signed by the Parties, and filed with and approved by the Commission.

17. Amendments to the NERC Rules of Procedure. NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations, or programs of ~~REGIONAL ENTITY~~FRCC under this Agreement without first obtaining the consent of ~~REGIONAL ENTITY~~FRCC, which consent shall not be unreasonably withheld or delayed. To the extent ~~REGIONAL ENTITY~~FRCC does not consent, NERC shall have the right to invoke the dispute resolution provisions of Section 18 and, if such effort fails to resolve the dispute, to petition the Commission to adopt the amendment to the NERC Rules of Procedure. To the extent that the Commission issues an order amending or materially affecting the rights or obligations of ~~REGIONAL ENTITY~~FRCC under this Agreement, ~~REGIONAL ENTITY~~FRCC shall have the option, exercisable no later than 60 days after issuance of such order, to terminate this Agreement. Such termination shall be effective one year following written notice by ~~REGIONAL ENTITY~~FRCC to NERC and the Commission, or at such other time as may be mutually agreed by ~~REGIONAL ENTITY~~FRCC and NERC.

18. **Dispute Resolution**. In the event a dispute arises under this Agreement between NERC and ~~REGIONAL ENTITY~~FRCC (including disputes relating to NERC's performance of its obligations under this Agreement and/or disputes relating to ~~REGIONAL ENTITY~~FRCC's performance of its obligations under this Agreement) which cannot be resolved through discussions between representatives of the Parties in the normal course of operations, the Parties shall use the following procedures ("Dispute Resolution") to attempt to resolve the dispute. ~~REGIONAL ENTITY~~FRCC shall not suspend performance of any delegated function, and the Parties shall continue to make reasonable, good faith efforts to comply with their obligations under this Agreement, during the pendency of Dispute Resolution. All notices required to be sent pursuant to this Dispute Resolution procedure shall be sent in accordance with Section 19 of this Agreement. This Dispute Resolution procedure is separate from and in addition to all other processes provided for in this Agreement.

(a) The Party invoking Dispute Resolution shall send a notice to the other Party describing the dispute, stating the invoking Party's position with respect to the dispute, stating that the Party is invoking Dispute Resolution, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the invoking Party.

(b) Within three (3) business days after receipt of the notice invoking Dispute Resolution, the receiving Party shall send a notice to the invoking Party acknowledging receipt of the notice invoking Dispute Resolution, stating the receiving Party's position with respect to the dispute, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the receiving Party.

(c) During the period commencing three (3) business days and ending twenty (20) business days after the date of the receiving Party's notice, the designated representatives shall engage in good faith negotiations to attempt to resolve the dispute, *provided*, that the designated representatives may agree prior to the end of such twenty (20) business day period that the process should move to the next step of Dispute Resolution.

(d) If the designated representatives are unable to arrive at a resolution of the dispute by the end of the time period described in subsection (c), they shall notify the chief executive

officers of their respective Parties. The chief executive officers of the Parties shall thereafter engage in good faith negotiations to attempt to resolve the dispute during the period of twenty (20) business days immediately following the time period described in subsection (c), *provided*, that the chief executive officers may agree prior to the end of such twenty (20) business day period that negotiations are at impasse and the process may move to the next step as described in subsection (f). Upon mutual agreement of the Parties, the twenty (20) business day period may be extended to pursue ongoing good faith negotiations.

(e) If a resolution of the dispute is achieved by the Parties, it shall be memorialized in a writing that is acceptable in form and substance to each party and is signed by the designated representative or chief executive officer on behalf of each Party.

(f) If the Parties are unable to resolve the dispute pursuant to the process described in subsections (a) through (e), then either Party may invoke any other available dispute resolution mechanism, including, without limitation, filing a complaint or petition with the Commission requesting resolution of the dispute by the Commission, or filing a complaint for relief in a court having jurisdiction over Parties and the subject matter of the dispute in accordance with Section 20. *Provided, however*, that: (i) it is the intent of the Parties that unresolved disputes shall be presented to and resolved by the Commission if the Commission has and accepts jurisdiction over the subject matter of the dispute, (ii) the Parties may, by mutual agreement, attempt to resolve the dispute through arbitration, mediation, or other process involving resort to an impartial neutral, and (iii) it is the intent of the Parties that resolution of disputes through Commission proceedings, arbitration, mediation, or other use of an impartial neutral, is preferred over resort to judicial proceedings.

(g) This Section 18 shall not apply to compliance enforcement actions against individual Registered Entities.

19. Notice. Whether expressly so stated or not, all notices, demands, requests, and other communications required or permitted by or provided for in this Agreement shall be given in writing to a Party at the address set forth below, or at such other address as a Party shall designate for itself in writing in accordance with this Section, and shall be delivered by hand or reputable overnight courier:

20. Governing Law. When not in conflict with or preempted by federal law, this Agreement will be governed by and construed in accordance with the laws of New Jersey without giving effect to the conflict of law principles thereof. The Parties recognize and agree not to contest the exclusive or primary jurisdiction of the Commission to interpret and apply this Agreement; provided however that if the Commission declines to exercise or is precluded from exercising jurisdiction of any action arising out of or concerning this Agreement, such action shall be brought in any state or federal court of competent jurisdiction in New Jersey. All Parties hereby consent to the jurisdiction of any state or federal court of competent jurisdiction in New Jersey for the purpose of hearing and determining any action not heard and determined by the Commission.

21. Headings. The headings and captions in this Agreement are for convenience of reference only and shall not define, limit, or otherwise affect any of the terms or provisions hereof.

22. Savings Clause. Nothing in this Agreement shall be construed to preempt or limit any authority that ~~REGIONAL ENTITY~~FRCC may have to adopt reliability requirements or take other actions to maintain reliability of the Bulk-Power System within the geographic boundaries described in **Exhibit A** that are outside the Delegated Authority, as long as such reliability requirements and actions are not inconsistent with Reliability Standards applicable to the region described in **Exhibit A** and do not result in a lessening of reliability outside the region described in **Exhibit A**.

23. **Entire Agreement.** This Agreement constitutes the entire agreement, and supersedes all prior agreements and understandings, both written and oral, among the parties with respect to the subject matter of this Agreement.

24. **Execution of Counterparts.** This Agreement may be executed in counterparts and each shall have the same force and effect as the original.

NOW THEREFORE, the parties have caused this Agreement to be executed by its duly authorized representatives, effective as of the Effective Date.

Exhibit A — ~~Regional~~ FRCC Boundaries

The FRCC physical boundaries are entirely within the State of Florida. The area of the State of Florida that is within the FRCC Region is peninsular Florida east of the Apalachicola River with the exception of a small section of Baker and Nassau counties in northeast Florida. Areas west of the Apalachicola River in Florida are within the SERC Region. The entire FRCC Region is within the Eastern Interconnection. The entire FRCC Region is under the direction of the FRCC Reliability Coordinator.

The FRCC Region interconnects with the SERC Region via 10 transmission lines. The 10 lines consist of two 500 kV, four 230 kV and four 115 kV lines. These lines are referred to as the “Florida / Southern Interface”.

The areas of Baker and Nassau counties that are not part of the FRCC Region are part of the SERC Region. These sections are part of the Okefenokee Rural Electric Membership Corporation (OREMC) that is headquartered in Nahunta, GA or facilities owned by Georgia Transmission Corporation (GTC) that is headquartered in Tucker Georgia. Roughly two thirds of OREMC load is in Georgia and one third is in Florida. The majority of the OREMC load in Florida is connected directly to the Southern Company Balancing Area in the SERC Region. Part of OREMC load is connected to both the Southern Company Balancing Area and FPL Balancing Area by a Georgia Transmission Corporation 115kV transmission line and Macedonia Switching Station in Baker County. A small portion of the OREMC load, about five (5) MW to twenty five (25) MW, is supplied as a radial feed from FPL West Nassau Substation. Georgia Transmission Corporation has secured firm transmission service from JEA and/or FPL on the Florida / Southern Interface to supply this load. The OREMC schedules energy on an hourly basis to cover this load. SERC will be responsible for registration and compliance monitoring of the Georgia Transmission Corporation facilities in Baker County, Florida and of OREMC.

Within the FRCC Region, compliance monitoring and enforcement functions with respect to reliability functions for which the FRCC is a registered entity are performed by SERC Reliability Corporation (SERC) pursuant to a contract between FRCC and SERC dated as of (date).

Exhibit B – Governance

Exhibit B shall set forth the Regional Entity’s bylaws, which NERC agrees demonstrate that the Regional Entity meets the following criteria:

CRITERION 1: The Regional Entity shall be governed by an independent board, a balanced stakeholder board, or a combination independent and balanced stakeholder board. (Federal Power Act § 215(e)(4)(A), 18 C.F.R. § 39.8(c)(1), Order No. 672 at ¶ 727.)

CRITERION 2: The Regional Entity has established rules that assure its independence of the users and owners and operators of the bulk power system, while assuring fair stakeholder representation in the selection of its directors. Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 699, 700.)

CRITERION 3: If the Regional Entity has members, the Regional Entity has established rules that assure that its membership is open, that it charges no more than a nominal membership fee and agrees to waive the fee for good cause shown, and that membership is not a condition for participating in the development of or voting on proposed Regional Reliability Standards. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 170-173.)

CRITERION 4: The Regional Entity has established rules that assure balance in its decision-making committees and subordinate organizational structures and assure no two industry sectors can control any action and no one industry sector can veto any action. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶ 728.)

CRITERION 5: The Regional Entity has established rules that provide reasonable notice and opportunity for public comment, due process, openness, and balance of interests in exercising its duties. (Federal Power Act § 215(c)(2)(D) and (e)(4), 18 C.F.R. § 39.8(c)(2).)

**BYLAWS OF
FLORIDA RELIABILITY COORDINATING COUNCIL, INC.**

ARTICLE I

Membership

Section 1.1 Eligibility.

(a) Membership in the Florida Reliability Coordinating Council, Inc. (“FRCC”) is open to any entity, without cost, that: (i) has a material interest in the reliability of the bulk power system in the FRCC region; (ii) satisfies the criteria for membership specified in this Section 1.1; (iii) qualifies for eligibility in one or more of the Sectors identified in Section 1.2; (iv) submits a written request for membership; and (v) agrees to comply with and be bound by these FRCC Bylaws (“Bylaws”) and other rules and regulations adopted by the FRCC Board of Directors, by execution of the appropriate form of Member Agreement set forth in Appendix A to these Bylaws (“Member Agreement”). Any person or entity that meets the foregoing requirements shall become a “Member” of FRCC.

(b) FRCC shall engage in two categories of activities:

(i) FRCC shall engage in the “Regional Entity Activities” specified in Section 1 of Exhibit E of the Delegation Agreement between FRCC and the North American Electric Reliability Corporation (“NERC”) dated May 2, 2007, as amended from time to time with the agreement of NERC and the approval of the Federal Energy Regulatory Commission (“Delegation Agreement”). Under the Delegation Agreement, FRCC is the Regional Entity, as defined in Sec. 215 of the Federal Power Act, with delegated authority to propose and enforce Reliability Standards for the bulk power system in the FRCC Region. The FRCC Region is defined as the geographic area of Florida east of the Apalachicola River.

(ii) FRCC shall engage in certain “Member Services Activities,” under which it provides, coordinates or administers a variety of services relating to the planning and operation of the bulk power system in the FRCC Region for or on behalf of entities meeting the criteria in Section 1.1(c)(ii) and participating in the funding of such services as specified in these Bylaws. The “Member Services” are specified in the business plan and budget approved by the Board of Directors in accordance with these Bylaws for submission to NERC under the Delegation Agreement, and as approved by NERC and the Federal Energy Regulatory Commission (“Business Plan and Budget”). Member Services are funded as specified in Section 6.2 of these Bylaws.

(c) FRCC shall have two types of Members:

(i) All Members of FRCC shall be “Regional Entity Members.” Regional Entity Members shall be eligible to participate in the Regional Entity Activities of FRCC. Such participation shall be in accordance with these Bylaws, the Member Agreement, and the Delegation Agreement, as from time to time adopted or amended and approved, and such other requirements as govern FRCC as a Regional Entity.

(ii) All Members that participate in the generation, marketing, transmission or purchase for resale of electric energy, ancillary services or capacity on, from or to the bulk power system in the FRCC Region may choose to be “Services Members,” and may participate in FRCC Member Services Activities as specified in these Bylaws. Subject to the requirements of Section 1.2, only Members that are Services Members shall be eligible to participate in decisions governing the Member Services of FRCC, or the voting rights and funding obligations of Services Members.

Section 1.2 Voting Member. A Voting Member is a Member that is not an Affiliate Member or an Adjunct Member. All Voting Members shall be eligible to vote on questions governing Regional Entity Activities. Only Voting Members that are Services Members shall be eligible to vote on questions governing Member Services or Member Services Activities. For purposes of the following Sector classifications, “Load Serving Entity,” whether standing alone or as part of another specified term, shall mean an entity that provides electric service to persons or entities other than the Load Serving Entity itself that purchase such service for their own use and not for resale. Voting Members shall be classified into one of the following Sectors, based on the primary nature of its activities in the FRCC Region relevant to Regional Entity Activities:

(a) **Suppliers Sector** - any entity engaged in wholesale power marketing transactions in the FRCC Region; or a generating entity that is included in the NERC Compliance Registry as a generation owner or generation operator for a facility in the FRCC Region, or that owns or is developing generation greater than 20 MW located within the FRCC Region and meets any of the following: (1) an entity with FERC-approved market-based rate authority, or (2) an exempt wholesale generator, or (3) a facility selling any output pursuant to a power purchase agreement (including fuel conversion arrangements), or (4) a FERC approved Qualifying Facility.

(b) **Non-Investor Owned Utility Wholesale Sector** - generation and transmission cooperatives and municipal joint action agencies that sell electricity to non-investor owned Load Serving Entities with native load in the FRCC Region.

(c) **Load Serving Entity Sector** - any Load Serving Entity that is not investor owned and that generates less than 25% of its energy requirements for retail sales or has an annual Full Requirements Energy for Load (FREL) of 1800 GWH or less in the FRCC Region.

(d) **Generating Load Serving Entity Sector** - any Load Serving Entity that is not investor owned and that generates at least 25% of its energy requirements for retail sales, and that has an annual Full Requirements Energy for Load (FREL) greater than 1800 GWH in the FRCC Region.

(e) **Investor Owned Utility Sector** - investor owned utilities generating and serving retail native load greater than 15,000 GWH in the FRCC Region.

(f) **General Sector** - persons or entities that take delivery of energy within the FRCC Region that is not purchased for resale; agents or associations representing groups of such entities that are commercial or industrial entities; agents or advocate groups representing small customers; and other persons or entities owning assets or engaging in commercial activities in the FRCC Region.

Section 1.3 Affiliate Member. An Affiliate Member is defined as an entity that (i) otherwise qualifies as a Voting Member pursuant to Section 1.1 and 1.2 and (ii) is an Affiliate of a Voting Member. For purposes of these Bylaws, being an “Affiliate” shall mean that (1) a Voting Member controls, is controlled by or is under common control with, such Affiliate Member, and (2) for any exempt wholesale generator, as defined the Public Utility Holding Company Act of 2005, as amended, the meaning provided in Section 214 of the Federal Power Act. Affiliate Members shall have no right to vote on any matter, nor any right to be elected or appointed to the Board. Except as to funding, Affiliate Members shall be bound by the same obligations as Voting Members and Adjunct Members of FRCC. Questions as to whether an entity is an Affiliate of a Voting Member shall be resolved by the Board.

Section 1.4 Adjunct Member. A person or entity may be approved as an Adjunct Member by the Board if such entity has a material interest in the reliability of the bulk power system in the FRCC region but does not meet the definitions and requirements to join as a Voting Member or Affiliate Member. Adjunct Members shall have no right to vote on any matter, nor any right to be elected or appointed to the Board. Except as to funding, Adjunct Members shall be bound by the same obligations as Voting Members and Affiliate Members of FRCC.

Section 1.5 New Members. The Board shall review and act upon membership applications. Prior to membership, the Board shall certify that an applicant complies with the eligibility requirements.

Section 1.6 Membership Commitment. Each Member of the FRCC shall be required to execute, in counterpart, a Member Agreement, as applicable, in the form shown in Appendix A to these Bylaws.

Section 1.7 Obligations.

(a) Each Member of the FRCC shall promote, support and comply with the purposes and policies of the FRCC as set forth in its Certificate of Incorporation and Bylaws, and the other documents governing the activities of FRCC identified in the Bylaws.

(b) Each Member of the FRCC shall appoint a representative as provided herein to receive notices from the FRCC and shall give to the FRCC Chief Executive Officer (“CEO”) in writing (signed by a duly authorized representative of the Member) the name, business address and electronic address of the person thus appointed. An appointed representative of a Member who is unable to attend a meeting may designate, in writing, an alternate to act on behalf of the Member.

Section 1.8 Participation.

(a) For purposes of these Bylaws, an entity and all of its Affiliates shall be considered one "Entity." No Entity shall simultaneously hold more than one Voting Member status or have more than one voting representative on a Standing Committee, or more than one seat on the Board.

(b) An Entity may join FRCC in any Sector in which it qualifies for Membership, provided that an Entity may join as a Voting Member in only one Sector. In the event that an Entity qualifies for more than one Sector, such Entity may join such other Sectors as an Affiliate Member upon payment of any applicable Affiliate Member Annual Fees in accordance with Article VI Section 6.2(b)(ii) for each Sector in which such Entity desires to participate as an Affiliate Member. Once an Entity has elected to be a Voting Member of one Sector, the Entity must continue to vote in that Sector for a minimum of one (1) year. If, at any point, it is determined that an Entity no longer meets the qualifications for the Sector it selected, the Entity may not vote in that Sector; however, that Entity may then immediately elect to become a Voting Member in any Sector for which it does qualify. Questions as to whether an Entity meets the qualifications of a Sector shall be resolved by the Board.

(c) Subject to the requirements of these Bylaws and the Articles of Incorporation, each Voting Member in good standing is entitled to vote on each matter submitted to a vote of the Voting Members. A Member in good standing is one that (i) meets all qualifications for membership as provided in these Bylaws, (ii) is not in arrears for payment of any applicable annual fees for membership or payment of any other fees owed to FRCC unless such payment is being disputed in good faith, and (iii) has not been found by a court to be in breach of any contract with FRCC. Voting Members that are not in good standing are not entitled to vote on any matter until they have regained good standing.

ARTICLE II

Meetings of Voting Members

Section 2.1 Annual Meeting of Voting Members. Voting Members shall meet at least annually on a date and at a place to be established by the Board ("Annual Meeting"). The Voting Members from each Sector shall elect, by majority vote, each Voting Member having one (1) vote, Directors to the Board who will represent their Sector. The Voting Members shall conduct such other business as may be properly brought before them. Meetings may be held by telephone conferencing, video conferencing or by other means enabling all participants in the meeting to communicate with each other. The Annual Meeting shall be open to Affiliate Members and Adjunct Members, and such other invitees as the Board may deem appropriate, provided that the Services Members, along with Affiliate and Adjunct Members that have paid the fees specified in Section 6.2(b)(ii) or (iii), may meet separately to consider matters relating to Member Services.

Section 2.2 Special Meetings. Special meetings of the Voting Members, for any purpose or purposes, unless otherwise prescribed by the laws of the State of Florida, or by the

Articles of Incorporation, may be called by the Chair of the Board. Special meetings of the Regional Entity Members shall be called upon request of six (6) or more Voting Members representing three (3) or more Sectors. Special meetings of the Services Members shall be called upon request of six (6) or more Voting Members that are Services Members representing three (3) or more Sectors. Notice of a special meeting stating the place, date, hour and agenda for the special meeting shall be given to the Voting Members not less than three (3) business days before the meeting. Such request for a special meeting shall state the purpose or purposes of the proposed special meeting, which shall be included as part of an agenda to be distributed to the Voting Members not less than three (3) business days before the meeting. Meetings may be held by telephone conferencing, video conferencing or by other means enabling all participants in the meeting to communicate with each other.

Section 2.3 Place of Meeting. All meetings shall be held at or near the principal office of the FRCC in Tampa, Florida, or at such other place within or outside the State of Florida as shall be determined from time to time by the Board.

Section 2.4 Notice of Meetings.

(a) Notice of the Annual Meeting or any regular or special meeting of the Voting Members shall be sent by mail or electronic means to each Member's representative at the business or electronic address specified in accordance with Section 1.7(b) at least ten (10) business days before the date of the meeting. The notice shall set forth a proposed agenda for the meeting, but any matter may be considered and acted upon at any meeting, whether or not the matter was listed in the proposed agenda, if addition of the item to the agenda is approved at the meeting by the vote of the eligible Voting Members whose votes equal sixty percent (60%) or more of the total weighted sector vote of the eligible Voting Members; provided, however, that at least three (3) Sectors are represented in the affirmative. Meetings may be held at any time without notice if all of the eligible Voting Members are present, or if those not present waive notice in writing either before or after the meeting.

(b) The record date for determining Members entitled to notice shall be one month prior to the meeting date.

Section 2.5 Quorum. Representation at any meeting of the Regional Entity Members of more than 50% of the Voting Members, or representation at any meeting of the Services Members of more than 50% of the Voting Members that are Services Members, shall constitute a quorum for the transaction of business at such meeting; provided, however, that in each case at least four (4) eligible Sectors are represented.

Section 2.6 Voting. Voting by Voting Members shall be by the six (6) Sectors as defined in Section 1.2, except as otherwise provided herein. Each Voting Member within a Sector has one non-divisible vote. Each Sector shall have a “Sector Vote” in proportion to the voting rights specified in Section 3.2(e), which is to be split into an affirmative and a negative component, in the proportion that each component bears to the total votes of the Voting Members within that Sector. Action by the Voting Members shall require affirmative Sector Votes greater than 6.50.

Section 2.7 Action without Meeting. Any action that may be taken at a meeting of the Regional Entity Members or the Services Members may be taken without a meeting if consent in writing, setting forth the action so to be taken, shall be signed by all Voting Members eligible to vote in such meeting before the action is taken.

Section 2.8 Remote Attendance. Any Member otherwise eligible may participate in any meeting by telephone, videoconference communications equipment, or other means enabling all persons participating in the meeting to communicate with each other. A Member participating in a meeting by such means shall be deemed present in person at such meeting.

Section 2.9 Termination of Members.

(a) A Member may be terminated for non-payment of fees or monies due FRCC as provided in Section 6.3, or for a significant violation of obligations as set forth in Section 1.7. The Board may, by resolution, establish a fair and reasonable procedure to terminate a Member.

(b) A Member whose membership has been terminated shall be liable to FRCC for fees and any other monies due FRCC as a result of obligations incurred or commitments made prior to termination.

Section 2.10 Withdrawal. Any other provision of these Bylaws notwithstanding, any Member may withdraw from participation in the activities of FRCC at any time upon written notice to the CEO, whereupon it shall cease to be a Member and shall cease to be entitled or obligated to participate in the activities of the Board, Standing Committees, or any subcommittees, and shall have no further obligations as a Member; provided, however, that if such notice is given more than thirty (30) days after such Member's receipt of its statement of fees and expenses for a fiscal year, the Member shall be obligated to pay its fees and other monies due to FRCC for the full fiscal year within which such termination is effective.

Section 2.11 Reinstatement. A former Member shall be required to apply for Membership as set forth in Section 1.1. The Board may reinstate Membership on any reasonable terms that the Board deems appropriate.

Section 2.12 Property Ownership and Control. Subject to applicable laws, rules, regulations, agreements, and FRCC protocols, each Member shall retain sole control of its own facilities and the use thereof, and nothing in these Bylaws shall require a Member to construct or dedicate facilities for the benefit of any other electric system or allow its facilities to be used by any other Member or to construct or provide any facilities for its own use, and nothing herein shall be deemed to impair the ability or right of any Member to take such actions or to fail to act, as it deems necessary or desirable, with respect to the management, extension, construction, maintenance and operation of its own facilities, present and future. A Member has no interest in the property of FRCC and waives the right to require a partition of any FRCC property.

ARTICLE III

Board of Directors

Section 3.1 Powers. The affairs of FRCC shall be managed by the Board of Directors ("Board"). The Board may exercise all such powers of the FRCC and do all such lawful acts and things as are not prohibited by the laws of the State of Florida, by the Federal Power Act, by the Articles of Incorporation or by these Bylaws.

Section 3.2 Number, Election, Tenure and Governance.

(a) Number. The Board shall include (16) Directors allocated among the Sectors as follows, and such other Directors as provided in by Section 3.2(b)(4):

- (1) Suppliers Sector- three (3) Directors
- (2) Non-Investor Owned Utility Wholesale Sector - two (2) Directors
- (3) Load Serving Entity Sector-
- Municipal - one (1) Director
- Cooperative - one (1) Director
- (4) Generating Load Serving Entity Sector - three (3) Directors

- (5) Investor Owned Utility Sector - Three (3) Directors
- (6) General Sector - Two (2) Directors
- (7) The CEO of FRCC - an ex-officio non-voting Director.

(b) Election.

(1) Directors, with the exception of the CEO, shall be elected as described herein.

(2) Within each Sector, only Voting Members from a given Sector may elect Directors for that Sector.

(3) Within the Load Serving Entity Sector, Director(s) representing 0.5 votes shall all be from a municipal and Director(s) representing 0.5 votes shall be from a cooperative.

(4) Within each Sector, Voting Members from a given Sector may, by majority vote, elect additional Directors subject to a maximum of five (5) Directors representing such Sector. The total votes of the Directors for such Sector shall not exceed the total votes of the Directors of such Sector specified in Section 3.2(a).

(c) Alternate Director. Any Director unable to attend a meeting may designate, in writing, an alternate to act on behalf of the Director.

(d) Term. The term for all Directors shall be two (2) years. Any Director may be reelected for consecutive terms, without limitation. Directors within a Sector shall have staggered terms as determined by the Sector.

(e) Voting Rights.

(1) Except as provided for in subsections (2) and (3) below, each Sector shall have the number of votes as specified below:

- Suppliers Sector 2.5 Votes
- Non-Investor Owned Utility Wholesale Sector 2.0 Votes
- Load Serving Entity Sector
 - Municipal 0.5 Votes
 - Cooperative 0.5 Votes
- Generating Load Serving Entity Sector 3.0 Votes
- Investor Owned Utility Sector 3.5 Votes
- General Sector 1.0 Vote

Total 13.0 Votes

(2) Each Director, as defined in Section 3.2(a) and 3.2 (b), shall have an equal proportional vote of that Sector's total voting strength. This provision shall

apply separately to the municipal and cooperative Directors of the Load Serving Entity Sector.

- (3) If the majority of the Voting Members of a Sector are Services Members, Directors elected by that sector shall be deemed "Services Member Directors." Only Services Member Directors shall be eligible to vote on questions governing Member Services or Member Services Activities. Deliberations on such matters may be limited to Services Member Directors, Voting Members that are Services Members, and Affiliate and Adjunct Members that have paid the fees specified in Section 6.2(b)(ii) or (iii), upon the vote of the Services Member Directors.
- (4) The CEO of FRCC shall not have a vote.

(f) **Limitations.** Each person or alternate serving on the Board shall be a representative of a Voting Member. Unless otherwise provided in these Bylaws, if a representative of a Voting Member is elected to serve on the Board, such person shall only be eligible to serve in such capacity so long as such person remains the representative of said Voting Member. A Voting Member shall not have more than one (1) officer, employee or agent serving as a Director.

Section 3.3 Meetings. Regular meetings of the Board shall be held at such times and places, within or outside the State of Florida, as may be determined by the Board. Special meetings of the Board may be called by the Chair. Special meetings shall be called upon request of six (6) or more Directors. Regular or Special Meetings may be held by telephone conferencing, video conferencing or by other means enabling all participants in the meeting to communicate with each other. Except as specified in Section 3.2(e)(3), the meetings of the Board shall be open to all Members, and such other invitees as the Board may deem appropriate. The Board may meet in closed session to discuss matters of a confidential nature, including but not limited to personnel matters, litigation, or commercially sensitive information of any person or entity.

Section 3.4 Notice of Meetings. Notice of any regular or special meeting of the Board shall be sent by mail or electronic means to each Director, and to each Member, at such Director's and Member's usual place of business at least (ten) 10 business days, in the case of a regular meeting, or (five) 5 business days, in the case of a special meeting, before the date of the meeting. Such notice shall also be sent to the observers of the Board specified in Section 8.1. The notice shall set forth a proposed agenda for the meeting. Subject to the requirements of Section 3.2(e)(3), no agenda item may be added to the agenda at any meeting of the Board which requires action by the Board unless all Directors are present and all agree to allow such an item to be put to a vote. Meetings may be held at any time without notice if all of the Directors of the Board are present, or if those not present waive notice in writing either before or after the meeting.

Section 3.5 Quorum. The presence at a meeting of the Directors whose votes equal sixty percent (60%) or more of the total voting strength of the Board, or in the case of matters governed by Section 3.2(e)(3), votes equal to sixty percent (60%) or more of the total voting

strength of the Directors eligible to vote, shall constitute a quorum for any action of the Board, provided, however, that in each case at least one Director from at least four (4) Sectors are present. If at any meeting a quorum shall fail to attend, a majority of those Directors present at the meeting may adjourn that meeting without further notice until a quorum shall attend. Once a quorum is present, any business may be transacted which might have been transacted at the meeting as originally called.

Section 3.6 Voting. Action by the Board shall require approval of sixty percent (60%) or more of the total eligible voting strength of the Board.

Section 3.7 Remote Attendance. Directors shall be deemed present and voting at a meeting of the Board if participating in the meeting by means of a conference telephone, video conferencing, or other means enabling all persons participating in the meeting to communicate with each other.

Section 3.8 Action without Meeting. Any action that may be taken at a meeting of the Board may be taken without a meeting if consent in writing, setting forth the action so to be taken, shall be signed before the action by all Directors eligible to participate in such action.

Section 3.9 Vacancies and Removal. A Director may be removed with cause at any time by an affirmative vote of 60% of the Voting Members of the Sector that elected that Director. In addition, the Board may remove a Director for cause, upon at least seventy-five percent (75%) affirmative votes of the remaining total voting strength of the Board. The right to elect Directors may not be assigned, sold, pledged or transferred in any manner. A vacancy may be filled only by the Voting Members of the Sector in which the vacancy occurs. Any Director so chosen shall hold office until his or her successor is duly elected and qualified or until his or her earlier resignation, ineligibility or removal.

Section 3.10 Officers. At the Board of Directors meeting following the Annual Meeting of the Voting Members, the Board shall elect a Chair, Vice Chair, and Secretary-Treasurer, who shall be the officers of the FRCC. No two officers of FRCC shall be officers, employees or agents of Voting Members of the same Sector or its Affiliates. The CEO of FRCC may not be elected to act as Chair, Vice-Chair or Secretary/Treasurer.

(a) Term of Office. Each officer of the Board of Directors shall hold office for two (2) fiscal years, and until his or her successor is duly elected and qualified.

(b) Removal of Officers. Any officer of the Board of Directors may be removed with or without cause at any time by the affirmative vote of seventy percent (70%) of the total voting strength of the Board.

(c) Compensation. There shall be no compensation paid to any officer of the Board of Directors of FRCC, provided that an officer serving on the staff of FRCC may be compensated for their services on the staff of FRCC.

Section 3.11 Responsibilities of Board of Director Officers

(a) Chair. The Chair shall serve as the Chair of the Board. The Chair shall preside at all meetings of the Members and Board, provided that, if the Chair is not eligible to vote in a meeting governed by Section 3.2(e)(3), the Directors that are eligible shall select one of the number to preside at such meeting. The Chair shall be responsible for the preparation of the agenda for all meetings of the Members and Board. The Chair shall be a member of and preside over a Personnel and Compensation Committee, which shall have responsibilities for such matters relating to staff.

(b) Vice Chair. The Vice Chair shall, in the absence or disability of the Chair, perform the duties and exercise the powers of the Chair, subject to the provisions of Section 3.11(a), and shall perform such other duties and have such other powers as the Board may from time to time prescribe. The Vice Chair shall be a member of a Personnel and Compensation Committee, which shall have responsibilities for such matters relating to staff.

(c) Secretary-Treasurer. The Secretary-Treasurer shall be responsible to assure that the FRCC staff has adequate procedures to distribute the agenda of the meetings of the Voting Members and the Board, keep the minutes of the proceedings of said meetings, and maintain the financial books and records of the FRCC, including disbursement of the funds of the FRCC in accordance with the authorized annual budget. The Secretary-Treasurer shall be a member of the Personnel and Compensation Committee, which shall have responsibilities for such matters relating to staff.

Section 3.12 Vacancy. Any vacancy in a Board of Director Officer occurring for any reason shall be filled as specified in Section 3.9.

ARTICLE IV

Chief Executive Officer

Section 4.1 CEO. The Board shall hire the CEO who, under the Board's direction, shall carry on the general affairs of the FRCC. The CEO shall be a member of the staff of FRCC and shall be a non-voting Director. It shall be the CEO's duty to approve the expenditure of the monies appropriated by the Board in accordance with the Budget approved by the Board. The CEO shall make an annual report and periodic reports to the Board concerning the activities of FRCC. The CEO shall serve as President of FRCC. The CEO shall comply with all directives of the Board. All agents and employees shall report, and be responsible, to the CEO. The CEO shall perform such other duties as may be determined from time to time by the Board.

ARTICLE V

Standing Committees

Section 5.1 Standing Committees. There shall be a Planning Committee, an Operating Committee, a Compliance Committee, and such other committees, subcommittees,

and task forces as the Board may appoint, when deemed necessary to carry out the purposes of the FRCC.

Section 5.2 Planning Committee. Each Voting Member may appoint one (1) representative, empowered to vote on behalf of the Voting Member, to serve on the Planning Committee. A representative may, if unable to attend a meeting, designate, in writing, an alternate to act on behalf of the representative. Affiliate Members and Adjunct Members may appoint a non-voting representative to serve on the Planning Committee. Quorum and Voting Rights shall be as defined in Sections 5.7 and 5.8. The Planning Committee shall report directly to the Board and is charged with the responsibility of promoting the reliability of the bulk power system in the FRCC Region, and assessing and encouraging generation and transmission adequacy. The Planning Committee may establish subcommittees and task forces as deemed necessary by its membership.

Section 5.3 Operating Committee. Each Voting Member may appoint one (1) representative, empowered to vote on behalf of the Voting Member, to serve on the Operating Committee. A representative may, if unable to attend a meeting, designate, in writing, an alternate to act on behalf of the representative. Affiliate Members and Adjunct Members may appoint a non-voting representative to serve on the Operating Committee. Quorum and Voting Rights shall be as defined in Sections 5.7 and 5.8. The Operating Committee shall report directly to the Board and is charged with responsibility for the coordination, operations planning, operation and maintenance of the bulk power system in the FRCC Region. The Operating Committee may establish subcommittees and task forces as deemed necessary by its membership.

Section 5.4 Compliance Committee. Each Voting Member may appoint one (1) representative, empowered to vote on behalf of the Voting Member, to serve on the Compliance Committee. A representative may, if unable to attend a meeting, designate, in writing, an alternate to act on behalf of the representative. Quorum and Voting Rights shall be as defined in Sections 5.7 and 5.8. The Compliance Committee shall report directly to the Board and is charged with the responsibility of promoting reliability of the bulk power system within the FRCC through compliance related activities ~~and is charged with responsibility for the development and implementation of programs to ensure compliance for both FRCC Regional Reliability Standards and NERC Reliability Standards.~~ The Compliance Committee is ~~not to be confused with~~ separate and distinct from the Board Compliance Committee which is primarily a “hearing body” and has a different voting structure as outlined in Exhibit D of the Delegation Agreement between the North American Electric Reliability Corporation and FRCC. The Compliance Committee may establish subcommittees and task forces as deemed necessary by its membership.

Section 5.5 Rules of Procedure. Each Standing Committee shall set its rules of procedure, provided that quorum, voting rights and voting shall be as specified in Sections 5.7 and 5.8. Such Rules of Procedure shall be as approved by the Board. All action by any Standing Committee shall be reported as prescribed herein and shall be subject to revision, alteration and approval by the Board.

Section 5.6 Quorum. Representation at any meeting of a Standing Committee of sixty percent (60%) or more of the total voting strength of the Standing Committee shall constitute a quorum for the transaction of business at such meeting; provided, however, that action on matters dealing with the scope or funding of Member Services shall require sixty percent (60%) or more of the total voting strength of members of the Standing Committee representing Voting Members that are Services Members; and provided further that a quorum shall require that at least three (3) Sectors are represented, all three of which shall be Sectors a majority of the members of which are Services Members in the case of a quorum for action on matters governing Member Services.

Section 5.7 Voting. Voting is by Sector. Each voting representative present at a meeting is assigned a vote equal to the voting strength of his or her Sector, as provided in this section, divided by the number of voting representatives present in that Sector, except that no voting representative present at a meeting shall have more than one (1) vote, except an Investor Owned Utility Sector voting representative who may have up to 1.167 votes. Action by a Standing Committee shall require an affirmative vote equal to or greater than sixty percent (60%) of the total eligible voting strength of the Standing Committee.

Sector Votes

(1) Suppliers Sector	2.5 Votes
(2) Non-Investor Owned Utility Wholesale Sector	2.0 Votes
(3) Load Serving Entity Sector	
Municipal	0.5 Vote
Cooperative	0.5 Vote
(4) Generating Load Serving Entity Sector	3.0 Votes
(5) Investor Owned Utility Sector	3.5 Votes
(6) General Sector	1.0 Vote
Total	13.0 Votes

Only representatives of Voting Members that are Services Members shall be eligible to vote on questions governing Member Services.

Section 5.8 Meetings. Regular meetings of the Standing Committees shall be held at such times and places, within or outside the State of Florida, as may be determined by the Standing Committees. Special meetings of the Standing Committees may be called by the Chair or upon the request of representatives from three (3) different Sectors. Regular or Special Meetings may be held by telephone conferencing, video conferencing, or by other means enabling all participants in the meeting to communicate with each other. The meetings of the Standing Committees shall be open to all Members, and such other invitees as the Board may deem appropriate.

ARTICLE VI

General Provisions

Section 6.1 Budget. The Board shall annually adopt a budget for the FRCC for administrative expenses of the FRCC, including salaries, and for the costs associated with the various committees, subcommittees, professional services, projects and studies. The Board shall approve the scope and funding of Member Services, in accordance with the provisions of these Bylaws. The funding for Member Services special projects approved by the Board may be based on a special funding, with an equitable allocation of the costs for the special project as approved by the Board. The budget may be amended from time to time during the fiscal year as determined by the Board, subject to the filing and approval requirements applicable to FRCC as a Regional Entity under the Delegation Agreement.

Section 6.2 Funding.

(a) The funding of FRCC's Regional Entity Activities shall be in accordance with the provisions of Exhibit E and the section numbered eight (8) of the Delegation Agreement.

(b) The Member Services of FRCC shall be funded through an allocation of their costs to all Members that are Services Members in accordance with the provisions of subsections 6.2(b)(i) - (iii) below. The funding of all Member Services shall be kept separate from the funding of Regional Entity Activities as specified in the Business Plan and Budget.

(i) Services Members. The allocation for Voting Members that are Services Members shall be based on the following calculation; provided, however, that in no event shall the allocation be less than \$20,000 per annum.

$$\text{Services Member Allocation} = 0.25 (I/N) + 0.25 (B/C) + 0.25 (D/E) + 0.25 (F/G)$$

- N Total number of voting Services Members
- B Voting Services Member's previous-year Full Requirements Energy for Load (FREL) within the FRCC
- C Total of factor B for all voting Services Members
- D Voting Services Member's Net Summer Generating Capacity within the FRCC Region as of December 31 of the previous year, as defined in the FRCC Load and Resource Plan

- E Total of factor D for all voting Services Members
- F Sum of Circuit Miles of Transmission Facilities (69kV and above) of voting Services Members within the FRCC Region times the respective operating voltage as of December 31 of the previous year
- G Total of factor F for all voting Services Members

Full Requirements Energy for Load (FREL) The net electrical energy requirements of the Services Member's electric system, and the net electric energy requirements of all full requirements customers of the Services Member, except if a full requirements customer of a Services Member joins FRCC. In such case, the electrical energy requirements of such full requirements customer will only be counted for the funding calculation for that Services Member who is the full requirements customer, and not for the Services Member who is the supplier of the full requirements. There should be no double counting of FREL between Services Members.

Net Summer Generating Capacity The maximum summer rated capacity, modified for ambient limitations, that a generating unit can sustain over a specified period, less the capacity used to supply the demand of station service or auxiliary needs. For jointly owned units, the Net Capacity will be allocated based on the ownership share of each Services Member who is a joint owner, unless otherwise mutually agreed by the joint owner Services Members.

Circuit Miles of Transmission Facilities The distance (following the path of transmission facility) in miles between substations or switching stations times the number of circuits at the same voltage level. For jointly owned transmission facilities, the Circuit Miles of Transmission Facilities will be allocated based on the ownership share of each Services Member who is a joint owner, unless otherwise mutually agreed by the joint owner Services Members.

(ii) Affiliate Members. The fee for an Affiliate Member that wishes to participate in Member Services activities shall be \$5,000 per annum. The fee for an Affiliate Member, only participating in Regional Entity Activities, shall be waived.

(iii) Adjunct Members. The fees for an Adjunct Member that wishes to participate in Member Services activities shall be \$5,000 per annum. The fee for an Adjunct Member, only participating in Regional Entity Activities, shall be waived.

Section 6.3 Fees. The Member Services membership fee shall be due and payable concurrent with the submission of the written application for membership. The initial membership fee will be prorated on an annual basis depending upon the quarter in which a Member joins. Thereafter, membership fees shall be due and payable on or before January 1st of each year or in installments as determined by the Board. The FRCC shall notify, in writing, any Member who is delinquent in the payment of any applicable membership fee. The notice shall provide a time certain, not to exceed thirty days (30) days from the date of the written notice, during which any such delinquency may be cured. Failure to cure a delinquency within the stated time will result in the loss of all membership rights and designations. In the event of an uncured lapse in the payment of a fee, membership in the FRCC shall be terminated.

Section 6.4 Staff. The FRCC shall employ a staff, including the CEO, to carry out the objectives of the organization. The CEO shall be a non-voting Director of the Board. The duties of the CEO are as defined in Article IV, Section 4.1.

Section 6.5 Expenses. The personal expenses of each Member and Director participating in the activities of the FRCC and its committees and subcommittees shall be borne by the Member on whose behalf such person is acting, unless determined otherwise by the Board.

Section 6.6 Minimum Sector Membership. If the number of Voting Members of a Sector is not greater than one (1), such Sector shall not be entitled to a vote at the Voting Members meetings, Board of Directors meetings, or the Standing Committee meetings.

Section 6.7 Indemnification. The FRCC shall indemnify and hold harmless, to the maximum extent permitted by law, any Member, Director, Member representative, agent, officer or employee of the FRCC and the heirs, estates, successors or assigns of any of them, from any and all claims or liabilities, including costs or attorneys' fees for defending against assertion of any such claim or liability, arising from any act or failure to act of such person for, on behalf of, or at the direction of the FRCC, unless such act or failure to act constituted a willful violation of state, federal or local law, willful misconduct, or gross negligence. With the approval of the Board, the FRCC may reimburse costs, attorneys fees, and other expenses for defending against assertions of any such claims or liabilities prior to the final disposition of any such proceeding. The foregoing rights to be indemnified, held harmless, or reimbursed shall not operate in derogation or prohibition of any other rights which the person indemnified, held harmless or reimbursed may have. The FRCC, by vote of the Board, shall purchase insurance against all or any part of the liabilities which may be incurred by the FRCC and may cause the FRCC to indemnify and hold harmless as and to the extent it may deem appropriate such other person or persons as it may deem appropriate.

Section 6.8 Fiscal Year. The fiscal year of the FRCC shall be the twelve (12) month period of January 1st through December 31st.

Section 6.9 Depositories. All funds of the FRCC shall be deposited in the name of the FRCC in such bank, banks or other financial institutions as the CEO shall from time to time designate and shall be drawn out on checks, drafts or other orders signed on behalf of the FRCC by such person or persons as the Board shall from time to time designate.

ARTICLE VII

Amendments

Section 7.1 Amendments. Subject to the provision that no amendment to these Bylaws may limit the rights of a Member to resign from Membership, subject to the provisions of Section 1.2, and subject to the requirements for approval by NERC and the Federal Energy Regulatory Commission applicable to the FRCC as a Regional Entity, these Bylaws may be amended, altered, or repealed through the following procedure:

(a) Any Voting Member or Director may suggest amendments to these Bylaws. Such suggestions must include a proposed amendment, and any necessary supporting documents. They should be sent to the CEO of FRCC for placement on the agenda for a Board meeting in the time and manner prescribed by the Board.

(b) If the proposal is approved by the Board of Directors, the Board shall place the proposal on the agenda of either the next Annual Meeting of the Voting Members, or pursuant to Board discretion, at a Special Meeting of the Voting Members called for that purpose.

(c) Voting Members shall vote to enact the Board-approved amendment in accordance with Sections 2.5 and 2.6, and subject to the provisions of Section 1.2 of the Bylaws.

Section 7.2 Review of Governance. The Board shall appoint a task force to review these Bylaws, and to submit recommendations to the Board on necessary amendments, at the discretion of the Board or if any of the following events occurs. Such task force shall include representation from each Sector.

(a) The number of Voting Members in a Sector is not greater than one (1).

(b) A Regional Transmission Organization of any type is approved by the Federal Energy Regulatory Commission to operate in the FRCC Region.

(c) Any federal or state legislation or regulatory action that significantly alters the functions of the FRCC.

(d) Any new entity that has or is expected to have financial transactions in the wholesale electric market in the FRCC Region wishes to join the FRCC, and does not otherwise meet the membership requirements as then defined in these Bylaws.

ARTICLE VIII

Observers of the Board

Section 8.1 Observers of the Board. The Chairman of the Florida Public Service Commission, or designee, shall be invited to attend meetings of the Board. The Board shall invite other observers as the Board deems appropriate.

ARTICLE IX

Section 9.1 Board Compliance Committee. FRCC shall establish and maintain a hearing body with authority to conduct and render decisions in compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan, which shall be the FRCC Board Compliance Committee (BCC), a balanced compliance panel reporting directly to the FRCC's Board of Directors.

The BCC will consist of one (1) Voting Member from each of the six (6) sectors in the FRCC, who shall be a member of the Board of Directors. Each year, two (2) members from each Sector of the FRCC Board of Directors will volunteer to serve in a BCC pool. At the time a hearing request is received, the Chair of the FRCC Board of Directors will appoint one member from each Sector to form the BCC for that hearing. The Board Member from the Registered Entity that has requested the hearing will not be selected for that BCC. In the event one (1) Sector of the FRCC declines to participate on the BCC, the Chair of the Board of Directors shall randomly select one (1) additional BCC member from the remaining five (5) Sectors to constitute the BCC. The Chair of the FRCC Board of Directors will appoint a Chair and Vice-Chair of the BCC. Terms of BCC members will be equivalent to the time it takes to complete the hearing for which they were selected. Members may be re-appointed to subsequent terms without any limits to the number of terms they serve.

FRCC Industry Sectors are as follows:

- One (1) Member from the Investor Owned Utility Sector
- One (1) Member from the Suppliers Sector
- One (1) Member from the Non-Investor Owned Utility Wholesale Sector
- One(1) Member from the Load Serving Entity Sector
- One (1) Member from the Generating Load Serving Entity Sector
- One (1) Member from the General Sector

Each member of the BCC shall be a full voting member. There will be no alternates or proxies for the BCC members. Decisions of the BCC shall require (i) a quorum to be present requiring at least fifty (50) percent of the number of members assigned to the BCC provided, however, that

in each case at least four (4) eligible Sectors are represented and (ii) a majority vote of the members of the BCC voting on the decision.

ARTICLE X

Audit

Section 10.1 Audit. The Board shall engage a certified public accounting firm to audit the books and accounts of the FRCC for each fiscal year.

ARTICLE XI

Miscellaneous Provisions

Section 11.1 Headings. The headings used in these Bylaws are for convenience and may not be considered in construing these Bylaws.

Section 11.2 Number and Gender. All singular words include the plural, and all plural words include the singular. All pronouns of one gender include reference to the other gender.

Section 11.3 Parties Bound. These Bylaws will bind and inure to the benefit of any Members, Director, Member representative, agent, officer, or employee of the FRCC and their respective administrators, legal representatives, successors, and assigns except as these Bylaws otherwise provide.

Section 11.4 Minority Positions. Any Voting Member or Standing Committee Representative who has a minority opinion on any significant issue may present the minority opinion to the Board in a manner as prescribed by the Board.

Amended March 2, 2006

Amended September 25, 2007

Amended June 27, 2008

Amended February 6, 2009

Exhibit C – Regional Standard Development Procedure

Exhibit C shall set forth the Regional Entity's standards development procedure, which NERC agrees meets the following common attributes:

COMMON ATTRIBUTE 1

Proposed regional reliability standards shall be subject to approval by NERC, as the electric reliability organization, and by FERC before becoming mandatory and enforceable under Section 215 of the FPA [add reference to any applicable authorities in Canada and Mexico]. No regional reliability standard shall be effective within the [Regional Entity Name] area unless filed by NERC with FERC [and applicable authorities in Canada and Mexico] and approved by FERC [and applicable authorities in Canada and Mexico].

COMMON ATTRIBUTE 2

[Regional Entity Name] regional reliability standards shall provide for as much uniformity as possible with reliability standards across the interconnected bulk power system of the North American continent. A [Regional Entity Name] reliability standard shall be more stringent than a continent-wide reliability standard, including a regional difference that addresses matters that the continent-wide reliability standard does not, or shall be a regional difference necessitated by a physical difference in the bulk power system. A regional reliability standard that satisfies the statutory and regulatory criteria for approval of proposed North American reliability standards, and that is more stringent than a continent-wide reliability standard, would generally be acceptable.

COMMON ATTRIBUTE 3

[Regional Entity Name] regional reliability standards, when approved by FERC [add applicable authorities in Canada], shall be made part of the body of NERC reliability standards and shall be enforced upon all applicable bulk power system owners, operators, and users within the [Regional Entity Name] area, regardless of membership in the region.

COMMON ATTRIBUTE 4

Requester — The requester is the sponsor of the regional reliability standard request and may assist in the development of the standard. Any member of [Regional Entity Name], or group within [Regional Entity Name] shall be allowed to request that a regional reliability standard be developed, modified, or withdrawn. Additionally, any entity (person, organization, company, government agency, individual, etc.) that is directly and materially affected by the reliability of the bulk power system in the [Regional Entity Name] area shall be allowed to request a regional reliability standard be developed, modified, or withdrawn.

COMMON ATTRIBUTE 5

[Standards or other named] committee — The [Regional Entity Name] [standards] committee manages the standards development process. The [standards] committee will consider which requests for new or revised standards shall be assigned for development (or existing standards considered for deletion). The [standards] committee will advise the [Regional Entity Name] board on standards presented for adoption.

COMMON ATTRIBUTE 6

[Alternative 6A: For a Regional Entity that chooses to vote using a balanced stakeholder committee.]

The [standards] committee is a balanced stakeholder committee, inclusive of all stakeholder interests that provide for or are materially impacted by the reliability of the bulk power system. [The [standards] committee votes to approve standards.] See Appendix A for the representation model of the [standards] committee.

[Alternative 6B: For a Regional Entity that chooses to vote using a balanced ballot body of stakeholders.]

[Registered ballot body] — The registered ballot body comprises all entities or individuals that qualify for one of the stakeholder segments; are registered with [Regional Entity Name] as potential ballot participants in the voting on standards; and are current with any designated fees. Each member of the registered ballot body is eligible to vote on standards. [Each standard action has its own ballot pool formed of interested members of the registered ballot body. Each ballot pool comprises those members of the registered ballot body that respond to a pre-ballot survey for that particular standard action indicating their desire to participate in such a ballot pool.] The representation model of the registered ballot body is provided in Appendix A.]

COMMON ATTRIBUTE 7

[Regional Entity Name] will coordinate with NERC such that the acknowledgement of receipt of a standard request identified in step 1, notice of comment posting period identified in step 4, and notice for vote identified in step 5 below are concurrently posted on both the [Regional Entity Name] and NERC websites.

COMMON ATTRIBUTE 8

An acceptable standard request shall contain a description of the proposed regional reliability standard subject matter containing sufficiently descriptive detail to clearly define the purpose, scope, impacted parties, and other relevant information of the proposed standard.

COMMON ATTRIBUTE 9

Within [no greater than 60] days of receipt of a completed standard request, the [standards] committee shall determine the disposition of the standard request.

COMMON ATTRIBUTE 10

The [standards] committee may take one of the following actions:

- Accept the standard request as a candidate for development of a new standard, revision of an existing standard, or deletion of an existing standard. The [standards] committee may, at its discretion, expand or narrow the scope of the standard request under consideration. The [standards] committee shall prioritize the development of standard in relation to other proposed standards, as may be required based on the volume of requests and resources.
- Reject the standard request. If the [standards] committee rejects a standard request, a written explanation for rejection will be delivered to the requester within [no greater than 30] days of the decision.
- Remand the standard request back to the requester for additional work. The standards process manager will make reasonable efforts to assist the requester in addressing the deficiencies identified by the [standards] committee. The requester may then resubmit the modified standard request using the process above. The requester may choose to withdraw the standard request from further consideration prior to acceptance by the [standards] committee.

COMMON ATTRIBUTE 11

Any standard request that is accepted by the [standards] committee for development of a standard (or modification or deletion of an existing standard) shall be posted for public viewing on the [Regional Entity Name] website within [no greater than 30] days of acceptance by the committee.

COMMON ATTRIBUTE 12

The standards process manager shall submit the proposed members of the drafting team to the [standards] committee. The [standards] committee shall approve the drafting team membership within 60 days of accepting a standard request for development, modifying the recommendations of the standards process manager as the committee deems appropriate, and assign development of the proposed standard to the drafting team.

COMMON ATTRIBUTE 13

At the direction from the [standards] committee, the standards process manager shall facilitate the posting of the draft standard on the [Regional Entity Name] website, along with a draft implementation plan and supporting documents, for a no less than a [30]-day comment period. The standards process manager shall provide notice to [Regional Entity Name] stakeholders and other potentially interested entities, both within and outside of the [Regional Entity Name] area, of the posting using communication procedures then currently in effect or by other means as deemed appropriate.

COMMON ATTRIBUTE 14

The drafting team shall prepare a summary of the comments received and the changes made to the proposed standard as a result of these comments. The drafting team shall summarize comments that were rejected by the drafting team and the reason(s) that these comments were rejected, in part or whole. The summary, along with a response to each comment received will be posted on the [Regional Entity Name] website no later than the next posting of the proposed standard.

COMMON ATTRIBUTE 15

Upon recommendation of the drafting team, and if the [standards] committee concurs that all of the requirements for development of the standard have been met, the standards process manager shall post the proposed standard and implementation plan for ballot and shall announce the vote to approve the standard, including when the vote will be conducted and the method for voting. Once the notice for a vote has been issued, no substantive modifications may be made to the proposed standard unless the revisions are posted and a new notice of the vote is issued.

COMMON ATTRIBUTE 16

The standards process manager shall schedule a vote by the [Regional Entity Name] [registered ballot body/[standards] committee]. The vote shall commence no sooner than [15] days and no later than [30] days following the issuance of the notice for the vote.

COMMON ATTRIBUTE 17

[Alternative 17A: For an RE that chooses to vote using a balanced stakeholder committee.]

The [standards] committee shall give due consideration to the work of the drafting team, as well as the comments of stakeholders and minority objections, in approving a proposed regional reliability standard for submittal to the [Regional Entity Name] board. The [standards]

committee may vote to approve or not approve the standard. Alternatively, the [standards] committee may remand the standard to the drafting team for further work or form a new drafting team for that purpose.

[Alternative 17B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

The [Regional Entity Name] registered ballot body shall be able to vote on the proposed standard during a period of [not less than 10] days.

COMMON ATTRIBUTE 18

[Alternative 18A: For an RE that chooses to vote using a balanced stakeholder committee.]

The [standards] committee may not itself modify the standard without issuing a new notice to stakeholders regarding a vote of the modified standard.

[Alternative 18B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

All members of [Regional Entity Name] are eligible to participate in voting on proposed new standards, standard revisions or standard deletions. [Alternatively: Each standard action requires formation of a ballot pool of interested members of the registered ballot body.]

COMMON ATTRIBUTE 19

[Alternative 19A: For an RE that chooses to vote using a balanced stakeholder committee.]

Actions by the committee shall be recorded in the regular minutes of the committee.

[Alternative 19B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

Approval of the proposed regional reliability standard shall require a [two thirds] majority in the affirmative (affirmative votes divided by the sum of affirmative and negative votes). Abstentions and non-responses shall not count toward the results, except that abstentions may be used in the determination of a quorum. A quorum shall mean [XX%] of the members of the [registered ballot body/ballot pool] submitted a ballot.

COMMON ATTRIBUTE 20

Under no circumstances may the board substantively modify the proposed regional reliability standard.

COMMON ATTRIBUTE 21

Once a regional reliability standard is approved by the board, the standard will be submitted to NERC for approval and filing with FERC [and applicable authorities in Canada and Mexico.]

COMMON ATTRIBUTE 22

- **Open** - Participation in the development of a regional reliability standard shall be open to all organizations that are directly and materially affected by the [Regional Entity Name] bulk power system reliability. There shall be no undue financial barriers to participation. Participation shall not be conditioned upon membership in [Regional Entity Name], and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements. Meetings of drafting teams shall be open to the [Regional Entity Name] members and others.

COMMON ATTRIBUTE 23

- **Balanced** - The [Regional Entity Name] standards development process strives to have an appropriate balance of interests and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter.

COMMON ATTRIBUTE 24

- **Inclusive** — Any entity (person, organization, company, government agency, individual, etc.) with a direct and material interest in the bulk power system in the [Regional Entity Name] area shall have a right to participate by: a) expressing a position and its basis, b) having that position considered, and c) having the right to appeal.

COMMON ATTRIBUTE 25

- **Fair due process** — The regional reliability standards development procedure shall provide for reasonable notice and opportunity for public comment. At a minimum, the procedure shall include public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of interested stakeholders.

COMMON ATTRIBUTE 26

- **Transparent** — All actions material to the development of regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the regional entity's Web site.

COMMON ATTRIBUTE 27

- Does not unnecessarily delay development of the proposed reliability standard.

COMMON ATTRIBUTE 28

Each standard shall enable or support one or more of the reliability principles, thereby ensuring that each standard serves a purpose in support of the reliability of the regional bulk power system. Each standard shall also be consistent with all of the reliability principles, thereby ensuring that no standard undermines reliability through an unintended consequence.

COMMON ATTRIBUTE 29

While reliability standards are intended to promote reliability, they must at the same time accommodate competitive electricity markets. Reliability is a necessity for electricity markets, and robust electricity markets can support reliability. Recognizing that bulk power system reliability and electricity markets are inseparable and mutually interdependent, all regional reliability standards shall be consistent with NERC's market interface principles. Consideration of the market interface principles is intended to ensure that standards are written such that they achieve their reliability objective without causing undue restrictions or adverse impacts on competitive electricity markets.

COMMON ATTRIBUTE 30

To ensure uniformity of regional reliability standards, a regional reliability standard shall consist of the elements identified in this section of the procedure. These elements are intended to apply a systematic discipline in the development and revision of standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

COMMON ATTRIBUTE 31

All mandatory requirements of a regional reliability standard shall be within the standard. Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself.

COMMON ATTRIBUTE 32

Applicability	<p>Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions.</p> <p>If not applicable to the entire [Regional Entity Name] area, then a clear identification of the portion of the bulk power system to which the standard applies.</p> <p>Any limitation on the applicability of the standard based on electric facility requirements should be described.</p>
----------------------	--

COMMON ATTRIBUTE 33

Measure(s)	<p>Each requirement shall be addressed by one or more measures. Measures are used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure will identify to whom the measure applies and the expected level of performance or outcomes required demonstrating compliance. Each measure shall be tangible, practical, and as objective as is practical. It is important to realize that measures are proxies to assess required performance or outcomes. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.</p>
-------------------	---

COMMON ATTRIBUTE 34

Compliance Monitoring Process	<p>Defines for each measure:</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible for providing the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes. • The entity that is responsible for evaluating data or
--------------------------------------	---

	<p>information to assess performance or outcomes.</p> <ul style="list-style-type: none">• The time period in which performance or outcomes is measured, evaluated, and then reset.• Measurement data retention requirements and assignment of responsibility for data archiving.

I. Introduction and Background

Purpose

This manual establishes the process for development, revision, withdrawal and approval of FRCC Regional Reliability Standards for the FRCC Region. FRCC Regional Reliability Standards apply to the reliability planning and reliable operation of the Bulk Power System in the FRCC Region. Proposed FRCC Regional Reliability Standards shall be subject to approval by the North American Electric Reliability Corporation (NERC), as the electric reliability organization, and by the Federal Energy Regulatory Commission (FERC) before becoming mandatory and enforceable under Section 215 of the Federal Power Act. FRCC Regional Reliability Standards, when approved by FERC, shall be made part of the body of NERC reliability standards and shall be enforced upon all applicable bulk power system owners, operators and users within the FRCC Region, regardless of membership in the region.

The FRCC Regional Reliability Standards Development Process is based on providing an open and fair process that ensures all interested and affected parties have an opportunity to participate in the development of FRCC Regional Reliability Standards. Any entity (person, organization, company, government agency, individual, etc.) with a direct and material interest in the reliability of the FRCC Bulk Power System has a right to participate by: a) expressing a position and its basis, b) having that position considered, c) voting on and d) having the right to appeal.

FRCC Regional Reliability Standard Principles

FRCC Regional Reliability Standards go beyond, add detail to, or implement NERC Reliability Standards, or cover matters not addressed in NERC Reliability Standards. FRCC Regional Reliability Standards shall not be inconsistent with or less stringent than NERC Reliability Standards.

FRCC Regional Reliability Standards are based on NERC's Reliability Principles and Market Interface Principles. Each FRCC Regional Reliability Standard shall enable or support one or more of NERC's Reliability Principles and must accommodate competitive electricity markets by being consistent with NERC's Market Interface Principles.

The FRCC Regional Reliability Standard Development Process defines the fair and open process for development, revision, withdrawal and approval of FRCC Regional Reliability Standards for the FRCC Region and has the following characteristics:

- **Due Process** – Any interested party, or any entity that is directly and materially affected by the reliability of the FRCC Bulk Power System has a right to participate in this process as indicated in this manual.
- **Openness** – Participation is open to any interested party or any entity that is directly and materially affected by the reliability of the FRCC Bulk Power System. Participation shall not be conditional upon membership in the FRCC. All FRCC Regional Reliability Standard development meetings will be open and noticed on the FRCC website.

- **Balance** – The FRCC Regional Reliability Standard Development Process shall have a balance of interests and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter.

II. FRCC Regional Reliability Standard Definition, Characteristics, and Elements

Definition

A FRCC Regional Reliability Standard defines certain obligations or requirements of all owners, operators and users of the FRCC Bulk Power System regardless of membership in the FRCC. The obligations or requirements must be material to reliability and measurable. Each obligation and requirement shall support one or more of the NERC reliability principles and shall be consistent with all of the NERC reliability and market interface principles.

FRCC Regional Reliability Standards go beyond, add detail to, or implement NERC reliability standards, or cover matters not addressed in NERC reliability standards. FRCC Regional Reliability Standards shall not be inconsistent with or less stringent than NERC reliability standards.

Characteristics

A FRCC Regional Reliability Standard shall have the following characteristics:

- **Material to Reliability** - A FRCC Regional Reliability Standard shall be material to the reliability of the FRCC Bulk Power System. If the reliability of the FRCC Bulk Power System could be compromised without a particular standard or by a failure to comply with that standard, then the standard is material to reliability.
- **Measurable** - A FRCC Regional Reliability Standard shall establish technical or performance requirements that can be practically measured.
- **Relative to NERC Reliability Standards** - A FRCC Regional Reliability Standard must go beyond, add detail to, or implement NERC reliability standards, or cover matters not addressed in NERC reliability standards.

Although FRCC Regional Reliability Standards have a common format and process, several types of Reliability Standards may exist, each with a different approach to measurement:

- **Technical standards** related to the provision, maintenance, operation, or state of Bulk Power System will likely contain measures of physical parameters and will often be technical in nature.
- **Performance standards** related to the actions of entities providing for or impacting the reliability of the FRCC Bulk Power System will likely contain measures of the results of such actions, or the nature of the performance of such actions.
- **Preparedness standards** related to the actions of entities to be prepared for conditions that are unlikely to occur but are critical to reliability will likely contain measures of such preparations or the state of preparedness.

Elements

A FRCC Regional Reliability Standard shall consist of the elements identified in this section of this manual. These elements are intended to apply a systematic discipline in the development and revision of Reliability Standards. The format allows a clear statement of the purpose, requirements, measures, and compliance elements associated with each Reliability Standard. Supporting documents to aid in the implementation of a Reliability Standard may be referenced by the Reliability Standard but are not part of the Reliability Standard itself.

Performance Elements of a FRCC Regional Reliability Standard

Identification Number	A unique identification number assigned in accordance with an administrative classification system to facilitate tracking and reference.
Title	A brief, descriptive phrase identifying the topic of the Reliability Standard.
Applicability	Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions. If not applicable to the entire FRCC, then a clear identification of the portion of the bulk power system to which the standard applies. Any limitation on the applicability of the standard based on electric facility requirements should be described.
Effective Date and Status	The effective date of the Reliability Standard or, the proposed effective date.
Purpose	The purpose of the Reliability Standard. The purpose shall explicitly state what outcome will be achieved or is expected by this Reliability Standard.
Requirement(s)	Explicitly stated technical, performance, and preparedness requirements. Each requirement identifies what entity is responsible and what action is to be performed or what outcome is to be achieved. Each statement in the requirements section shall be a statement for which compliance is mandatory. Any additional comments or statements for which compliance is not mandatory, such as background or explanatory information should be placed in a separate document and referenced.
Risk Factor(s)	The potential reliability significance of each requirement, designated as a High, Medium or Lower Risk Factor in accordance with the criteria listed below: A Lower Risk Factor requirement is administrative in nature and (a) is a requirement that, if violated, would not be expected to affect the electrical state or capability of the FRCC Bulk Power System, or the ability to effectively monitor and control the FRCC Bulk Power System; or (b) is a requirement in a planning time frame that, if violated, would not, under the emergency, abnormal, or restorative

	<p>conditions anticipated by the preparations, be expected to affect the electrical state or capability of the FRCC Bulk Power System, or the ability to effectively monitor, control, or restore the FRCC Bulk Power System.</p> <p>A Medium Risk Factor requirement (a) is one that, if violated, could directly affect the electrical state or the capability of the FRCC Bulk Power System but is unlikely to lead to FRCC Bulk Power System instability, separation, or cascading failures; or (b) is a requirement in the planning time frame that , if violated, could under emergency, abnormal, or restorative conditions anticipated by the preparations, directly affect the electrical state or capability of the FRCC Bulk Power System, or the ability to effectively monitor and control the FRCC Bulk Power System but is unlikely, under emergency, abnormal, or restoration conditions anticipated by the preparations, to lead to FRCC Bulk Power System instability, separation, or cascading failures, nor to hinder restoration to a normal condition.</p> <p>A High Risk Factor requirement (a) is one that, if violated, could directly cause or contribute to FRCC Bulk Power System instability, separation, or a cascading sequence of failures, or could place the FRCC Bulk Power System at an unacceptable risk of instability, separation, or cascading failures, or (b) is a requirement in a planning time frame that, if violated, could under emergency, abnormal, or restorative conditions anticipated by the preparations, directly cause or contribute to FRCC Bulk Power System instability, separation, or a cascading sequence of failures, or could place the FRCC Bulk Power System at an unacceptable risk of instability, separation, or cascading failures, or could hinder restoration to a normal condition.</p>
Measure(s)	<p>Each requirement shall be addressed by one or more measures. Measures that will be used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure identifies to whom the measure applies and the expected level of performance or outcomes required to demonstrate compliance. Each measure shall be tangible, practical, and as objective as is practical. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.</p>
Compliance Monitoring Process	<p>The compliance elements define:</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible to provide the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes.

	<ul style="list-style-type: none"> • The entity that is responsible for evaluating data or information to assess performance or outcomes. • The time period in which performance or outcomes is measured, evaluated, and then reset. • Measurement data retention requirements and assignment of responsibility for data archiving.
Violation Severity Levels	Defines the degree to which compliance with a requirement was not achieved. The violation severity levels, are part of the standard and are approved with the standard.

III. Roles in the FRCC Regional Reliability Standard Development Process

Nomination, Modification, or Withdrawal of A Regional Standard

Any member of the FRCC, or group (i.e. committee, subcommittee, working group or task force) within the FRCC, shall be allowed to request that a FRCC Regional Reliability Standard be developed, modified, or withdrawn. Additionally, any interested party or any entity that is directly and materially affected by the reliability of the FRCC Bulk Power System shall be allowed to request that a FRCC Regional Reliability Standard be developed, modified, or withdrawn.

Standard Development Process Roles

FRCC Board of Directors – The FRCC Board of Directors shall consider for adoption as FRCC Regional Reliability Standards, those Standards that have been developed and approved by this process. Once the Board adopts a FRCC Regional Reliability Standard, such Standard shall be submitted to NERC for approval. When approved by NERC, it will be submitted to FERC for approval.

Registered Ballot Body (RBB) – The registered ballot body votes to approve FRCC Regional Reliability Standards. The RBB comprises all entities or persons that qualify for one of the FRCC Industry Sectors as defined in Section 1.2 of the FRCC Bylaws, and are registered with FRCC as potential ballot participants in the voting on standards. FRCC membership is not a requirement to participate in the development of and voting on FRCC Regional Reliability Standards. Any entity or person that has a material interest in the reliability of the FRCC Bulk Power System shall be allowed to register as potential ballot participants in the RBB. (See Appendix C)

Ballot Pool (BP) – Each standard action has its own BP formed of interested members of the RBB. The BP comprises those members of the RBB that respond to a pre-ballot survey for that particular standard that indicates their desire to participate in the ballot of that standard. The BP will vote to approve each FRCC Regional Reliability Standard.

FRCC Operating Committee (OC) and FRCC Planning Committee (PC) – The FRCC OC and the FRCC PC (both of which are balanced stakeholder committees, see Appendix C) shall have the primary responsibility for the development, modification or withdrawal of FRCC Regional Reliability Standards.

FRCC Standards Process Manager – The FRCC Regional Reliability Standard Development Process shall be administered by the FRCC Standards Process Manager. The FRCC Standards Process Manager will ensure the integrity of the process and the consistency of quality and completeness of the FRCC Regional Reliability Standards. The FRCC Standards Process Manager will facilitate all steps in this process, and will coordinate with NERC to ensure required information is posted on both NERC and FRCC websites.

Standard Drafting Team – A team of technical experts, such as FRCC Subcommittees, Working Groups, Task Forces, or the FRCC Staff, will be appointed by the FRCC OC and/or PC, that will:

- Develop the details of the FRCC Regional Reliability Standard,
- Consider and respond to industry comments,
- Participate in forums to help build consensus on draft FRCC Regional Reliability Standards,
- Assist in the implementation of approved FRCC Regional Reliability Standards,
- Provide technical oversight in response to changing industry conditions,
- Assist in the identification of the need for new FRCC Regional Reliability Standards.

FRCC Compliance Staff – The FRCC compliance staff provides input and comments during the standard development process to ensure the requirements are not ambiguous, that measures will be effective and that the compliance elements of a standard can be practically implemented.

IV. Steps in Developing a FRCC Regional Reliability Standard

Step 1 – Request a new FRCC Regional Reliability Standard or modification to, or withdrawal of an existing FRCC Regional Reliability Standard

A request to develop, modify or withdraw a FRCC Regional Reliability Standard shall be submitted to the FRCC Standards Process Manager (via email to FRCCStandard@frcc.com) by any member of the FRCC, or group (i.e. committee, subcommittee, working group or task force) within the FRCC, or any interested party or any entity that is directly and materially affected by reliability of the FRCC Bulk Power System. The FRCC Standards Process Manager will acknowledge receipt of the request within fifteen (15) calendar days of its receipt.

Step 2 – Assignment of FRCC Regional Reliability Standard Request

The FRCC Standards Process Manager will assign the request to the FRCC OC, the FRCC PC, or both as appropriate.

Step 3 – Posting of FRCC Regional Reliability Standard Request

The request for standard development, modification or withdrawal will be posted for notification and comment on the FRCC public website for a period of fifteen (15) calendar days, and will be reviewed by the FRCC OC and/or PC. A notice of the posting for comment will be sent to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator to seek input on the proposed request.

Step 4 – Acceptance of a FRCC Regional Reliability Standard Request

The FRCC OC and/or the PC will review the request and any comments submitted to determine if the request received will be accepted or rejected within sixty (60) days of its submission. The decision will be posted and, if accepted, the OC and/or the PC will assign and direct a Standard Drafting Team to develop the draft Regional Reliability Standard. If the request is rejected, the FRCC Standards Process Manager will send notification to the entity making the request and to all entities that received the notice in Step 3 above.

Step 5 – Drafting and Posting of a FRCC Regional Reliability Standard

The FRCC OC and/or PC will assign a Standard Drafting Team, within 60 days of acceptance of the request, to develop, in a timely manner, a draft FRCC Regional Reliability Standard that will address the accepted request. The FRCC OC and/or PC may provide a timeframe that is desired for completion of the standard development.

Under the direction of the FRCC OC and/or PC, the Standard Drafting Team, will consider all comments received on the posting of the standard request and will develop a draft FRCC Regional Reliability Standard and corresponding implementation plan.

The draft FRCC Regional Reliability Standard, implementation plan and any supporting documents shall be posted for comments on the FRCC public website for a period of fifteen (15) calendar days, or such longer period as determined by the drafting team or as directed by the FRCC OC and/or the PC. Notice of the posting will go out to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public

Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator to seek comments.

Comments shall be submitted (via email) to the FRCC Standards Process Manager (FRCCStandard@frcc.com). All comments are due by the close of business on the 15th calendar day of posting, or such later date as determined by the drafting team or as directed by the FRCC OC and/or PC. If the comment due date falls on a weekend or nationally recognized holiday, the comments shall be due by the close of business on the next regularly scheduled business day.

Step 6 – Standards Drafting Team Review of Comments

All comments should be submitted electronically to the FRCC Standards Process Manager who will forward to the Standard Drafting Team for consideration. All timely comments will be considered.

Under the direction given by the FRCC OC and/or the PC, the Standard Drafting Team will review the comments received and revise the draft FRCC Regional Reliability Standard and/or implementation plan as needed. The Standard Drafting Team will develop written responses to each comment received.

All responses to the submitted comments will be documented and posted on the FRCC public website. If needed, a second draft of the FRCC Regional Reliability Standard will be posted for another comment period. Such comment period shall be fifteen (15) calendar days, or such longer period as determined by the drafting team or as directed by the FRCC OC and/or PC.

Notice of the posting will go out to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator to seek comments.

Based on comments received to the posting, Step 6 will be repeated as necessary until the Standards Drafting Team believes the draft FRCC Regional Reliability Standard is ready to submit to the Ballot Pool for approval.

Step 7 –Establishment of Ballot Pool

The Standard Drafting Team shall submit the final draft of the proposed FRCC Regional Reliability Standard, along with any minority opinions, and all comments and written responses received during the posting(s), to the FRCC Standards Process Manager. The FRCC Standards Process Manager shall establish a Ballot Pool for standard action at least fifteen (15) calendar days prior to the start of a ballot. A pre-ballot survey will be sent to each entity of the RBB to determine their desire to be placed in the Ballot Pool. Once the ballot period opens, the Ballot Pool will be closed and changes to the Ballot Pool participation will not be allowed.

Step 8 – Ballot of the new or revised FRCC Regional Reliability Standard

The FRCC Standards Process Manager will post the final draft of the standard on the FRCC website at least fifteen (15) calendar days before a ballot can begin. The Ballot Pool shall have a minimum of ten (10) calendar days to vote on a standard. The Ballot Pool may vote to approve or not approve the standard. If approved, the FRCC Standards Process Manager will submit the FRCC Regional Reliability Standard, proposed implementation plan, and any supporting documents to the FRCC Board of Directors for adoption.

If approval by the Ballot Pool is not obtained, the PC and/or OC will determine if the draft standard is to be sent back to the standard drafting team to repeat step 6 to incorporate any comments, or to take no further action.

If no further action is taken, the reason for such will be posted on the FRCC public website. A notice of the posting will be sent to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator.

Step 9 – Adoption of FRCC Regional Reliability Standards by the FRCC Board of Directors

At a regular or special meeting, the FRCC Board of Directors may consider adoption of the proposed FRCC Regional Reliability Standard that has been approved by the RBB Ballot Pool. A FRCC Regional Reliability Standard submitted for adoption by the FRCC Board of Directors must be posted for notification and comment on the FRCC public website at least ten (10) calendar days prior to action by the FRCC Board of Directors. Notice of the posting will be sent to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator. The FRCC Board of Directors shall consider the comments received, the responses provided, and any dissenting opinions. The FRCC Board of Directors shall adopt or reject a FRCC Regional Reliability Standard as submitted, but may not modify the proposed FRCC Regional Reliability Standard. If the FRCC Board of Directors chooses not to adopt a FRCC Regional Reliability Standard, it shall provide its reasons for not doing so.

If the FRCC Board of Directors chooses not to adopt the proposed FRCC Regional Reliability Standard, the reason for such decision will be posted on the FRCC public website. Notice of the posting will be sent to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator.

Step 10 – Submission to NERC and FERC

Once the FRCC Regional Reliability Standard is adopted by the FRCC Board of Directors, the FRCC Standard Process Manager shall submit the FRCC Regional Reliability Standard to NERC for approval. When approved by NERC, it shall be submitted by NERC to FERC for approval. If NERC or FERC rejects the FRCC Regional Reliability Standard, the FRCC Board of Directors will determine if the standard is to be sent back to the OC and/or PC to incorporate their comments or to take no further action on the standard. A FRCC Regional Reliability Standard that is adopted by the FRCC Board of Directors, approved by NERC and FERC, shall become effective on a date designated by FERC.

V. Special Procedures

Urgent Action

Under certain conditions, the entity making the request or the FRCC OC and/or the PC may designate a proposed or revised FRCC Regional Reliability Standard as requiring urgent action. Urgent action may be appropriate when a delay in implementing a proposed or revised FRCC Regional Reliability Standard will materially impact reliability of the Bulk Power System in the FRCC Region. The FRCC OC and/or the PC must use its judgment carefully to ensure an urgent action is truly necessary and not simply an expedient way to change or implement a FRCC Regional Reliability Standard.

The entity making the request, or the FRCC OC and/or the PC, will prepare a draft of the proposed FRCC Regional Reliability Standard and submit it to the Standards Process Manager for urgent action. The submission must include a justification for the urgent action. The Standards Process Manager shall immediately post the draft as specified in Step 5. The posting shall be a minimum of ten (10) calendar days before the RBB can consider the draft for approval. All comments received during the posting will be considered. Once approved by the RBB, the proposed urgent FRCC Regional Reliability Standard will be sent to the FRCC Board of Directors for adoption.

A FRCC Regional Reliability Standard that is adopted by the FRCC Board of Directors, as an urgent action shall have a termination date specified that shall not exceed 180 days from the approved date. Should there be a need to make the FRCC Regional Reliability Standard permanent, the replacement FRCC Regional Reliability Standard would be required to go through the full standards development process.

An urgent action FRCC Regional Reliability Standard that expires may be renewed by the FRCC Board of Directors using the urgent action process again, in the event a permanent FRCC Regional Reliability Standard has not been adopted. In determining whether to authorize the extension of an urgent action FRCC Regional Reliability Standard, the FRCC OC and/or the PC shall consider the impact to the reliability of the FRCC Bulk Electric System of not continuing the FRCC Regional Reliability Standard. In addition, consideration will be given to whether expeditious progress is being made toward a permanent replacement.

The FRCC OC and/or the PC shall not request the FRCC Board of Directors to extend an urgent action FRCC Regional Reliability Standard if there is insufficient progress toward adopting a permanent replacement FRCC Regional Standard or if the FRCC OC and/or the PC lack confidence that a reasonable completion date is achievable. The intent is to ensure that an urgent action FRCC Regional Reliability Standard does not in effect take on a degree of permanence due to the lack of an expeditious effort to develop a permanent replacement FRCC Regional Reliability Standard. With these principles, there is no pre-determined limit on the number of times an urgent action may be renewed. However, each urgent action FRCC Regional Reliability Standard renewal shall be effective only upon adoption by the FRCC Board of Directors, and approval by NERC and FERC.

Interpretations of Standards

Any member of the FRCC, or group within the FRCC, or an entity that is directly and materially affected by reliability of the FRCC Bulk Power System shall be permitted to request an interpretation of a FRCC Regional Reliability Standard. The entity requesting an interpretation shall send a request to the FRCC Standards Process Manager explaining the specific circumstances surrounding the request and what clarifications are required as applied to those circumstances. The request should indicate the material impact to the requesting party, or others, caused by the lack of clarity or a possible incorrect interpretation of the FRCC Regional Reliability Standard. The FRCC Standards Process Manager will assemble a team with the relevant expertise to address the clarification.

As soon as practical (but not more than thirty (30) calendar days following the receipt of the request), the team will draft a written interpretation of the FRCC Regional Reliability Standard addressing the issues raised. The FRCC Standards Process Manager will submit the written interpretation to the OC and/or PC for review and approval. If approved by the FRCC OC and/or the PC, the interpretation is appended to the FRCC Regional Reliability Standard and is effective immediately. The interpretation will stand until such time as the FRCC Regional Reliability Standard is revised through the normal process, at which time the FRCC Regional Reliability Standard will be modified to incorporate the clarifications provided by the interpretation.

Appeals

Any member of the FRCC, or group within the FRCC, or any entity that is directly and materially affected by reliability of the FRCC Bulk Power System, and who feel they have been or will be adversely affected by any substantive or procedural action or inaction related to the development, approval, revision, or withdrawal of a FRCC Regional Reliability Standard shall have the right to appeal. This appeals process applies only to the FRCC Regional Reliability Standards Process as defined in this document

The burden of proof to show adverse effect shall be on the appellant. Appeals shall be made within thirty (30) calendar days of the date of the action purported to cause the adverse effect. The final decisions of any appeal shall be documented in writing and posted on the FRCC public website. Notice of the posting will be sent to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator .

The appeals process provides two levels, with the goal of expeditiously resolving the issue to the satisfaction of the participants:

Level 1 Appeal

Level 1 is the required first step in this appeals process. The appellant submits to the FRCC Standards Process Manager a complaint in writing that describes the substantive or procedural action associated with a FRCC Regional Reliability Standard or the FRCC Regional Reliability Standards Process. The appellant describes in the complaint the actual or potential adverse impact to the appellant. Assisted by any necessary staff and committee resources, the FRCC Standards Process Manager shall prepare a written

response addressed to the appellant as soon as practical but not more than forty-five (45) calendar days after receipt of the complaint. If the appellant accepts the response as a satisfactory resolution of the issue, both the complaint and response will be made a part of the record associated with the FRCC Regional Reliability Standard.

Level 2 Appeal

If after the Level 1 Appeal, the appellant remains unsatisfied with the resolution, notification shall be made in writing to the FRCC Standards Process Manager. Within thirty (30) calendar days of receiving the notification, the FRCC Standards Process Manager shall convene a Level 2 Appeals Panel. This panel shall consist of five members appointed by the FRCC Board of Directors. In all cases, Level 2 Appeals Panel members shall have no direct affiliation with the participants in the appeal.

The FRCC Standards Process Manager shall post on the FRCC public website the notice of the Level 2 appeal and other relevant materials. Notice of the posting will be sent to (1) the Registered Ballot Body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator. At least fifteen (15) calendar days notice of the meeting of the Level 2 Appeals Panel will be made. In addition to the appellant, any entity that is directly and materially affected by the reliability of the FRCC Bulk Power System, and who is directly and materially affected by the substantive or procedural action referenced in the complaint shall be heard by the panel.

The Level 2 Appeals Panel shall not consider any expansion of the scope of the appeal that was not presented in the Level 1 Appeal. The Level 2 Appeals Panel may in its decision find for the appellant and remand the issue to the FRCC OC and/or the PC for resolution with a statement of the issues and facts in regard to which fair and equitable action was not taken. The Level 2 Appeals Panel may find against the appellant with a specific statement of the facts that demonstrate fair and equitable treatment of the appellant and the appellant's objections.

The Level 2 Appeals Panel may not, however, revise, approve, disapprove, or adopt a FRCC Regional Reliability Standard, as these responsibilities remain with the FRCC Board of Directors. The actions of the Level 2 Appeals Panel shall be posted on the FRCC public website. Notice of the posting will be sent to (1) the Registered Ballot body, (2) the FRCC standing committees, subcommittees and working groups, (3) the Florida Public Service Commission, and (4) the SERC Southern Sub-region Reliability Coordinator.

VI. Maintenance of the FRCC Regional Reliability Standards and Process

Requests to Revise the FRCC Regional Reliability Standard Development Process

Any member of the FRCC, or group (i.e. committee, subcommittee, working group or task force) within the FRCC, or any entity that is directly and materially affected by the reliability of the FRCC Bulk Power System may submit a written request to modify the FRCC Regional Reliability Standard Development Process Manual. The FRCC Standards Process Manager shall oversee the handling of the request. The FRCC OC and/or the PC shall review the request and submit recommendations to the FRCC Board of Directors for consideration. The FRCC Board of Directors, on its own motion, may amend the FRCC Regional Reliability Standard Process.

Five-Year Review

Each FRCC Regional Reliability Standard shall be reviewed at least once every five (5) years. The review date will be determined from the effective date or the latest revision date whichever is later. The review process shall be conducted in accordance with Steps 1 through 10 of the FRCC Regional Reliability Standard Development Process Manual. As a result of this review, a FRCC Regional Reliability Standard shall be reaffirmed, revised, or withdrawn.

Filing of FRCC Regional Standards with Regulatory Agencies

All adopted FRCC Regional Reliability Standards will be filed with FERC.

APPENDIX A

Email completed form to FRCCStandard@frcc.com

FRCC Regional Reliability Standard Request Form

Title of Proposed Standard
Request Date

Requestor Information	TYPE (Check a box for each one that applies)
Name	<input type="checkbox"/> New Standard
Primary Contact	<input type="checkbox"/> Revision to existing Standard
Telephone	<input type="checkbox"/> Withdrawal of existing Standard
Fax	
Email	<input type="checkbox"/> Urgent Action

Purpose (Describe the purpose of the standard – what the standard will achieve in support of reliability)

Industry Need (Provide a detailed statement justifying the need for the proposed standard, along with any supporting documentation)

Brief Description (Describe the proposed standard in sufficient detail to clearly define the scope in a manner that can be easily understood by others)

FRCC Regional Reliability Standard Request Form

The Standard will Apply to the Following Functions (Check box for each one that applies)

<input type="checkbox"/>	Reliability Coordinator	Ensures the reliability of the bulk transmission system within its Reliability Authority area.
<input type="checkbox"/>	Balancing Authority	Integrates resource plans ahead of time, and maintains load-interchange-resource balance within its metered boundary and supports system frequency in real time
<input type="checkbox"/>	Planning Authority	Plans the Bulk Electric System
<input type="checkbox"/>	Resource Planner	Develops a long-term plan for the resource adequacy of specific loads within a Planning Authority area
<input type="checkbox"/>	Transmission Planner	Develops a long-term plan for the reliability of transmission systems within its portion of the Planning Authority area
<input type="checkbox"/>	Transmission Service Provider	Provides transmission services to qualified market agreements
<input type="checkbox"/>	Transmission Owner	Owens transmission facilities
<input type="checkbox"/>	Transmission Operator	Operates and maintains the transmission facilities, and executes switching orders
<input type="checkbox"/>	Distribution Provider	Provides and operates the “wires” between the transmission system and the customer
<input type="checkbox"/>	Generator Owner	Owens and maintains generation unit(s)
<input type="checkbox"/>	Generator Operator	Operates generation units(s) and performs the functions of supplying energy and Interconnected Operations Services
<input type="checkbox"/>	Purchasing-Selling Entity	The function of purchasing or selling energy, capacity, and all necessary Interconnected Operations Services as required
<input type="checkbox"/>	Load-Serving Entity	Secures energy and transmission (and related generation services) to serve the end user

FRCC Regional Reliability Standard Request Form

NERC Reliability Principles

Applicable Reliability Principles (Check box for all that apply.)	
	1. Interconnected bulk electric systems shall be planned and operated in a coordinated manner to perform reliably under normal and abnormal conditions as defined in the NERC Standards.
	2. The frequency and voltage of interconnected bulk electric systems shall be controlled within defined limits through the balancing of real and reactive power supply and demand.
	3. Information necessary for the planning and operation of interconnected bulk electric systems shall be made available to those entities responsible for planning and operating the systems reliably.
	4. Plans for emergency operation and system restoration of interconnected bulk electric systems shall be developed, coordinated, maintained, and implemented.
	5. Facilities for communication, monitoring, and control shall be provided, used, and maintained for the reliability of interconnected bulk electric systems.
	6. Personnel responsible for planning and operating interconnected bulk electric systems shall be trained, qualified, and have the responsibility and authority to implement actions.
	7. The security of the interconnected bulk electric systems shall be assessed, monitored, and maintained on a wide-area basis.

NERC Market Interface Principles

Does the proposed Standard comply with all of the following Market Interface Principles?	
Recognizing that reliability is an essential requirement of a robust North American economy:	
yes or no	1. A reliability standard shall not give any market participant an unfair competitive advantage.
yes or no	2. A reliability standard shall neither mandate nor prohibit any specific market structure.
yes or no	3. A reliability standard shall not preclude market solutions to achieving compliance with that standard.
yes or no	4. A reliability standard shall not require the public disclosure of commercially sensitive information. All market participants shall have equal opportunity to access commercially non-sensitive information that is required for compliance with reliability standards.

Process Diagram

APPENDIX C

Development of and Voting of the Registered Ballot Body

1. Registration Procedures

The Registered Ballot Body (RBB) comprises all entities¹ and persons that:

- Qualify for one of the FRCC Industry Sectors, and
- Are registered with the FRCC as potential ballot participants in the voting on FRCC Regional Reliability Standards.

All registrations will be done electronically. All entities and persons will self-select to belong to the RBB. The sectors shall be identical to those in Section 1.2 of the FRCC Bylaws.

All RBB members will have the ability to vote on a standard. Voting will be done in writing (either email or facsimile) with each RBB member having one vote. The RBB representative will have the right to register and participate in ballot pools to cast their vote on a standard being considered for approval.

2. Sector Qualification Guidelines

The general guidelines are as follows:

- An entity or person may register in the RBB in any Sector in which it qualifies for provided that an entity or person registers as a potential ballot participant in only one (1) Sector.
- Any individual currently employed by an organization that is eligible to join one or more of the other five (5) sectors, shall not be qualified to join as a General Sector RBB member.

3. Ballot Pool Voting

A Ballot Pool will be established to vote on any proposed standards action. Each RBB member choosing to belong to a Ballot Pool will have one individual vote. Two-thirds of the individual votes of the Ballot Pool shall constitute a quorum.

Approval of a FRCC Regional Reliability Standard requires the affirmative vote of a two-thirds majority of the weighted sector votes cast. The number of votes cast in each sector is the sum of the affirmative and negative votes, excluding abstentions.

The following steps will be used to determine if there is sufficient affirmative votes:

1. The number of affirmative votes cast in each sector will be divided by the sum of affirmative and negative votes cast to determine the fractional affirmative vote for each sector. Abstentions will not be counted.

¹ An entity and all of its Affiliates (as defined in the FRCC Bylaws) shall be considered one entity for purposes of registering as a potential ballot participant.

2. The fractional affirmative vote for a sector will then be multiplied by the Sector Weight Factor to determine the weighted fractional affirmative vote for a sector. The Sector Weight Factors are:
 - a. Suppliers Sector: Weight Factor = 2.5
 - b. Non-Investor Owned Utility Wholesale Sector: Weight Factor = 2.0
 - c. Load Serving Entity Sector: Weight Factor = 1.0
 - d. Generating Load Serving Entity Sector: Weight Factor = 3.0
 - e. Investor Owned Utility Sector: Weight Factor = 3.5
 - f. General Sector: Weight Factor = 1.0
3. The sum of the weighted fractional affirmative votes from all sectors divided by the sum of the weights of the sectors voting will be used to determine if a two-thirds majority has been achieved. A sector will be considered as “voting” if any member of the sector in the Ballot Pool casts either an affirmative or negative vote.
4. A FRCC Regional Reliability Standard will be considered “approved” if the sum of the weighted fractional affirmative votes from all sectors divided by the sum of the weights of the voting sectors is two-thirds or greater.

History of Revisions

Approved March 2, 2006
Amended July 25, 2006
Amended October 24, 2006
Amended September 25, 2007

EXHIBIT D – COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

1.0 REGIONAL COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

~~[REGIONAL ENTITY]~~FRCC will implement the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure (which for purposes of this section 1.0 shall not include Attachment 2, Hearing Procedures), to monitor and enforce compliance with Reliability Standards by the owners, operators, and users within ~~[REGIONAL ENTITY]~~FRCC's geographic or electrical boundaries, and such other scope, set forth on Exhibit A of this Agreement.

2.0 REGIONAL HEARING OF COMPLIANCE MATTERS

~~[REGIONAL ENTITY]~~FRCC shall establish and maintain a hearing body with authority to conduct and render decisions in compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan, which shall be the FRCC Board Compliance Committee (BCC), a balanced compliance panel reporting directly to the FRCC's Board of Directors.

~~either [REGIONAL ENTITY]'s board or a balanced compliance panel reporting directly to [REGIONAL ENTITY]'s board. [REGIONAL ENTITY]'s hearing body is [its board] [if not the board, insert the name of the committee or group serving as the hearing body].~~

The BCC will consist of one (1) Voting Member from each of the six (6) sectors in the FRCC, who shall be a member of the Board of Directors. Each year, two (2) members from each Sector of the FRCC Board of Directors will volunteer to serve in a BCC pool. At the time a hearing request is received, the Chair of the FRCC Board of Directors will appoint one member from each Sector to form the BCC for that hearing. The Board Member from the Registered Entity that has requested the hearing will not be selected for that BCC. In the event one (1) Sector of the FRCC declines to participate on the BCC, the Chair of the Board of Directors shall randomly select one (1) additional BCC member from the remaining five (5) Sectors to constitute the BCC. The Chair of the FRCC Board of Directors will appoint a Chair and Vice-Chair of the BCC. Terms of BCC members will be equivalent to the time it takes to complete the hearing for which they were selected. Members may be re-appointed to subsequent terms without any limits to the number of terms they serve.

FRCC Industry Sectors are as follows:

- One (1) Member from the Investor Owned Utility Sector
- One (1) Member from the Suppliers Sector
- One (1) Member from the Non-Investor Owned Utility Wholesale Sector
- One(1) Member from the Load Serving Entity Sector
- One (1) Member from the Generating Load Serving Entity Sector

- One (1) Member from the General Sector

Each member of the BCC shall be a full voting member. There will be no alternates or proxies for the BCC members. Decisions of the BCC shall require (i) a quorum to be present requiring at least fifty (50) percent of the number of members assigned to the BCC provided, however, that in each case at least four (4) eligible Sectors are represented and (ii) a majority vote of the members of the BCC voting on the decision.

~~[If the hearing body is a compliance panel other than the board, provide here a description of how the members of the compliance panel are selected and the qualifications to be selected for the compliance panel.]~~

~~[REGIONAL ENTITY]~~FRCC shall conduct all compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, proposed Mitigation Plan, or a proposed Remedial Action Directive, in accordance with Attachment 2, Hearing Procedures, to the NERC Compliance Monitoring and Enforcement Program, subject to the following deviations, if any: ~~[Describe any deviations, or state "None". If there are deviations from the NERC pro forma Hearing Procedures, [REGIONAL ENTITY]'s Hearing Procedures shall be included as a separate attachment to this Exhibit D.]~~None.

3.0 OTHER DECISION-MAKING BODIES

~~If [Regional Entity] uses other decision-making bodies within its compliance program, provide here a description of the function of that body to the extent not described elsewhere in the Agreement or exhibits, how the members of that body are selected, and the qualifications to be selected for that body.]~~

The FRCC has engaged the SERC Reliability Corporation (SERC) to oversee the compliance monitoring and enforcement responsibility as related to FRCC's compliance with Reliability Standard requirements that are applicable to the functions for which FRCC is a Registered Entity.

Exhibit E — Funding

1. Scope of activities funded through the ERO funding mechanism

~~[Regional Entity]~~FRCC shall include in its annual budget submission to NERC amounts for costs it will incur in performing its delegated functions and related activities as described in Sections 5, 6 and 7 of the Agreement. These activities shall include:

- Reliability Standard Development
- Compliance Monitoring and Enforcement
- Organization Registration and Certification
- Reliability Assessment and Performance Analysis (including necessary data gathering activities)
- Event Analysis and Reliability Improvement
- Training and Education
- Situation Awareness
- Infrastructure Security

2. Preparation of Annual Business Plan and Budget

(a) NERC and ~~[Regional Entity]~~FRCC, in conjunction with the other Regional Entities, shall collaboratively develop an annual schedule for the development, submission, review and approval of [Regional Entity's] business plan and budget. The annual schedule for the preparation of business plans and budgets shall require ~~[Regional Entity]~~FRCC (i) to submit to NERC draft(s) of ~~[Regional Entity]~~FRCC's proposed business plan and budget and other preliminary documents and information, and (ii) to submit a final proposed business plan and budget that has been approved by ~~[Regional Entity]~~FRCC Board of Trustees to NERC by July 1 or such other agreed date as provides sufficient time for NERC's review, approval and submission of ~~[Regional Entity]~~FRCC's business plan and budget to the Commission 130 days in advance of the beginning of each fiscal year. The ~~[Regional Entity]~~FRCC business plan and budget submission shall include supporting materials, including ~~[Regional Entity]~~FRCC's complete business plan and organization chart, explaining the proposed collection of all assessments, dues, fees and charges, and the proposed expenditure of the funds to be collected in sufficient detail to justify the requested budgeted expenditures and assessments. ~~[Regional Entity]~~FRCC's business plan and budget and proposed assessments shall provide for reasonable reserve mechanisms for unforeseen and extraordinary expenses and other contingencies, consistent with generally accepted accounting principles.

(b) NERC shall review and approve ~~[Regional Entity]~~FRCC's proposed business plan and budget and proposed assessments for performing the delegated functions and related activities described in Sections 5, 6 and 7 of this Agreement and listed above in Section 1 of this **Exhibit E**, or shall direct ~~[Regional Entity]~~FRCC to make such revisions as NERC deems appropriate prior to approval. NERC shall submit ~~[Regional Entity]~~FRCC's approved business plan and budget and proposed assessments to the Commission for approval as part of NERC's overall business plan and budget submission, in accordance with the ERO Regulations.

3. Allocation of Costs

Assessments to fund the costs of ~~[REGIONAL ENTITY]~~FRCC's delegated functions and related activities pursuant to the Agreement shall be allocated among all load-serving entities on the basis of Net Energy for Load, unless a different method(s) of allocating and calculating such assessments has been submitted to and approved by NERC and the Commission in accordance with Section 9(b) of the Agreement. ~~[Regional Entity]~~FRCC shall submit to NERC annually at the same time it submits its budget request a list of the load-serving entities or designees within its geographic boundaries that shall be responsible for paying [Regional Entity's] assessment and the load-serving entities' proportionate Net Energy for Load, and such other data and information as is necessary to allocate and calculate the allocation of [Regional Entity's] assessment to the load-serving entities or designees under the method(s) of allocation and calculation that will be used.

4. Collection of Funding

~~[IF NERC WILL BILL AND COLLECT ASSESSMENTS DIRECTLY FROM LOAD-SERVING ENTITIES IN REGIONAL ENTITY'S REGION, USE THE FOLLOWING TEXT FOR SECTION 4(a):]~~

(a) NERC shall submit invoices to the load-serving entities or designees identified by ~~[Regional Entity]~~FRCC covering the NERC and ~~[Regional Entity]~~FRCC assessments approved for collection.

~~[IF THE REGIONAL ENTITY WILL ACT AS THE BILLING AND COLLECTION AGENT ON BEHALF OF NERC TO BILL AND COLLECT ASSESSMENTS FROM LOAD-SERVING ENTITIES IN REGIONAL ENTITY'S REGION, USE THE FOLLOWING TEXT FOR SECTION 4(a):]~~

~~(a) NERC and [Regional Entity] agree that [Regional Entity] shall act as the billing and collection agent on behalf of NERC to bill and collect [Regional Entity]'s assessments from load-serving entities and designees (or such other entities as agreed by NERC and [Regional Entity]). [Regional Entity] agrees that it shall (i) issue all invoices to load-serving entities and other entities in a prompt and timely manner after receipt from NERC of the information needed to issue the invoices; (ii) exercise commercially reasonable efforts to collect invoices that are not paid as of the due date(s); and (iii) transfer all funds collected to NERC in a timely manner, as follows: Prior to the start of each calendar quarter, and once per week thereafter until all billings for the quarter are collected, [Regional Entity] will electronically transfer to NERC, in immediately available funds, all payments received by [Regional Entity] from load-serving entities or other entities for payment of invoices. On the same day that [Regional Entity] makes each electronic transfer of funds to NERC, [Regional Entity] shall send an e-mail to the Chief Financial Officer or Controller of NERC detailing the collections being transmitted, including a listing of the load-serving entities or other entities from which payments were collected and the amount collected from each entity. [Note: If NERC and Regional Entity have a different collection and payment arrangement, the preceding two sentences will be modified accordingly to describe it.]~~

~~[Regional Entity] agrees that it shall not in any way use its position as billing and collection agent for NERC to attempt to influence NERC's policies or decisions on matters relating to adoption of Reliability Standards (including Regional Reliability Standards and Regional Variances), administration of the compliance monitoring and enforcement program and other compliance and enforcement matters, determination and imposition of penalties and sanctions, budgeting matters including review and approval of [Regional Entity's] budgets and business plans, or any other NERC decisions, including by issuing invoices, engaging in collection activities or transferring funds collected to NERC in an untimely manner or other than in accordance with this Agreement.~~

(b) NERC shall pursue any non-payments of assessment amounts and shall request assistance from ERO Governmental Authorities as necessary to secure collection. To the extent reasonably practicable, ~~[Regional Entity]~~FRCC shall assist NERC in pursuing and collecting any non-payments. Notwithstanding the foregoing, ~~[Regional Entity]~~FRCC is not responsible and does not assume any liability for recovering non-payments or underpayments of assessment amounts. NERC shall retain sole responsibility for recovering non-payments or underpayments of assessment amounts. NERC shall add the amount of any non-payments by end-users or designees within ~~[REGIONAL ENTITY]~~FRCC's region, that are reasonably determined to be uncollectible, to NERC's assessments for a subsequent year with the amount of such non-payments to be allocated to end-users within ~~[Regional Entity]~~FRCC's region.

(c) Upon approval by ERO Governmental Authorities of ~~[Regional Entity]~~FRCC's annual assessment to fund the costs of its delegated functions and related activities, NERC shall pay ~~[Regional Entity's]~~FRCC's annual assessment to Regional Entity in four equal quarterly payments on January 15, April 15, July 15 and October 15 of the budget year.

5. Application of Penalties

Except as otherwise approved by the Commission, all penalty monies received by ~~[Regional Entity]~~FRCC, ~~other than penalty monies received from an operational function or division or affiliated entity of [Regional Entity]~~, shall be applied as a general offset to ~~[Regional Entity]~~FRCC's budget requirements for U.S.-related activities under this Agreement for the subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity. ~~Except as otherwise approved by the Commission, any penalty monies received from an operational function or division or affiliated entity of [Regional Entity] shall be transmitted to or retained by NERC and shall be used by NERC as a general offset to NERC's budget for its activities as the ERO under the Act for the following year.~~

6. Budget and Funding for ~~FRCC's [Regional Entity's]~~ Non-Statutory Activities

In addition to its delegated functions and related activities, as specified in Sections 5, 6 and 7 of the Agreement and in Section 1 of this **Exhibit E** (such delegated functions and activities referred to in this Section 6 as "statutory activities"), ~~[Regional Entity]~~FRCC performs the following other functions and activities (such other functions and activities being referred to in

this Section 6 as "non-statutory activities"): ~~{List and describe all non-statutory activities performed by Regional Entity, or state "None".}~~

Non-Statutory Activities

The Member Services division of the FRCC provides, coordinates or administers a variety of services relating to the reliable planning and operation of the bulk power system in the FRCC Region. These services are carried out by the FRCC Planning Committee (PC) and the FRCC Operating Committee (OC), and its various subcommittees, task forces and working groups.

Planning Committee (PC)

The PC promotes the reliability of the bulk power system in the FRCC Region, and assesses and encourages generation and transmission adequacy. The PC, through the FRCC Regional Transmission Planning Process, provides a vehicle for ensuring that transmission planning within the FRCC will provide for the development of a robust transmission network within the FRCC Region. The activities of the PC include the activities of the following Member Services working groups: the Stability Working Group, the Transmission Working Group, the Resources Working Group, the ATC Working Group and the Fuel Reliability Working Group. The activities of these working groups pertain to the facilitated and coordinated effort for the running of engineering studies and communications in a cost effective, open and transparent manner for the members to complete common tasks to ensure future bulk power reliability. This includes any transmission planning that allows transmission owners to meet FERC's Order 890 requirement for wide area planning and implementation of data and reporting to the Florida Public Service Commission on resource adequacy and transmission reliability.

Operating Committee (OC)

The OC is responsible for the coordination, planning, operation and maintenance of reliable bulk power supply in the FRCC. Its primary reliability goals are the continuous improvement of the situational awareness of the operators interconnected within the FRCC, and ensuring that adequate physical, operational and cyber security objectives are in place for the Region's shared communications network. The OC ensures reliable operations are maintained through the development and implementation of the Reliability Process for the FRCC Bulk Electric System, formerly the FRCC Security Process.

Operating Reliability Subcommittee (ORS)

The ORS provides overall administration for the development and implementation of operating procedures and other reliability matters. The ORS reviews and assesses regional import and export limits, scheduled transmission outages, real-time system reliability, events analysis, information and data exchange and other reliability issues. The ORS provides formal oversight and implementation of the Reliability Process for the FRCC Bulk Electric System, formerly the FRCC Security Process, which establishes the reliability responsibilities of the various entities within the Region and specifically monitors the agents responsible for performing the ~~(RC)~~Reliability Coordinator and Operations Planning Coordinator ~~(OPC)~~ functions.

Data Exchange Working Group (DEWG)

The DEWG, subordinate to the ORS, supports the real-time data needs of the FRCC Reliability Coordinator and other entities identified by the FRCC ORS, and for developing methodologies to facilitate the exchange of real-time, modeling, and other operational data to help assure reliable electric power system operations. Within the FRCC, all entities provide system data via the FRCC Reliability Data Link (RDL). The FRCC RDL receives all substation topology information, line flows, voltage levels, unit parameters, etc. from the operating entities on a real-time basis. Data is available to all.

FRCC Telecommunications Subcommittee (TS)

The TS provides formal oversight over the TS budget which is included in the OC budget. The primary purpose of the TS is to ensure that adequate and redundant communications facilities are made available to the operating entities within the FRCC. The TS administers the FRCC hotline program, Satellite phone program, RDL program and also ensures that reliable and redundant communications are maintained with NERCNet, from a Regional communications perspective. All TS programs are in support of the RC function and are therefore non-statutory, with the exception of the FRCC satellite phone program which is a tool used by the Regional Entity to perform situational awareness and thus is budgeted as statutory.

Non Statutory Situation Awareness and Infrastructure Security Program

This program maintains and enhances the situational awareness of the operators of the interconnected system by supporting the tools necessary to efficiently communicate Electricity Sector Information Sharing and Analysis Center information within and outside of the FRCC Region. The program also ensures that the FRCC entity shared communications networks, include the appropriate physical, operational, and cyber security protections in order to function reliably.

~~{Regional Entity}~~FRCC shall employ the following methods and procedures to (i) keep its funding mechanisms for its statutory activities separate from its funding mechanisms for its non-statutory activities, and (ii) record the costs it incurs in the performance of its non-statutory functions separately from the costs it incurs in the performance of its statutory functions:

(i) Separation of funding sources for statutory activities and non-statutory activities. The FRCC maintains a separate bank account for Statutory receivable collection. The statutory billing is done at the beginning of each quarter and an invoice is rendered to NERC only for the statutory receivable. NERC wires monies due directly into the Statutory bank account. All non-statutory receivables are deposited into a separate bank account. Member Services invoices are rendered to each member quarterly and deposited into this separate account.

(ii) Separation of costs of statutory activities and non-statutory activities. FRCC has adopted the NERC Chart of Accounts for Expenses and the NERC Rules of Procedure Categories as well as Member Services Functional Categories and utilizes these in order to correctly code each invoice received for all goods and services as well as for staff to specify where their time is spent each day for their time accounting reports. These

methods are used to ensure that no statutory funds are used to pay for non-statutory expenses and that no non-statutory funds are used to pay for statutory expenses.

Each employee and officer (with the exception of the President and CEO) turns in a time sheet with their time accounted for between statutory and non-statutory functions that they personally spent their time on. Within statutory and non-statutory they further break down their time by the function areas. Each employee and officer fills out their time sheet daily and turns them in every two weeks to the Controller. The employees use the department codes to split their time according to what they did that day. These times are totaled by the Controller and Full-Time Equivalents (FTE's) for each function are calculated.

Accounting personnel route to the responsible department head all invoices pertaining to their job responsibility. The department head assigns the functional category, signs the invoices and returns it to accounting for payment processing. The accounting staff evaluates and assigns the appropriate General Ledger account number based on the Chart of Accounts and enters both the account number and the department number on the accounts payable system. Expenses such as Facilities Rent, stationary, utilities and other items of a general nature are split to each of the functions based on FTE's, on a monthly basis. Only expenses that cannot be determined to be specifically for a particular function are split on an allocated basis. Any expenses received that are for a particular function within a particular area are charged directly to that area and are not split.

All expenses are reviewed by a Department Head, an Accounting Assistant and the Controller for accuracy of coding and assignment to particular functions whether that be for Statutory or Non-statutory.

~~[List and describe the methods and procedures Regional Entity employs to keep costs and funding of statutory activities separate from costs and funding of non-statutory activities, including at a minimum a description of how Regional Entity's bank accounts and receivables/payables procedures are set up for both statutory and non-statutory functions, a description of how Regional Entity ensures each employee involved in both statutory and non-statutory functions keeps accurate time records reflecting his/her activities, and a description of how Regional Entity's general and administrative costs are allocated between statutory activities and non-statutory activities. If the necessary descriptions are lengthy they may be provided in a separate attachment labeled "Attachment E-1", and state here "See Attachment E-1." If Regional Entity has listed no non-statutory functions in the preceding paragraph, state here "Not applicable."]~~

~~[Regional Entity]FRCC~~ shall provide its budget for such non-statutory activities to NERC at the same time that ~~[Regional Entity]FRCC~~ submits its proposed annual business plan and budget for statutory activities to NERC pursuant to Section 9 of the Agreement. ~~[Regional Entity's]FRCC's~~ budget for non-statutory activities that is provided to NERC shall contain a detailed list of ~~[Regional Entity's]FRCC's~~ non-statutory activities and a description of the funding sources for the non-statutory activities. ~~[Regional Entity]FRCC~~ agrees that no costs (which shall include a reasonable allocation of ~~[Regional Entity]FRCC's~~ general and administrative costs) of non-statutory activities are to be included in the calculation of

~~{Regional Entity's}~~FRCC's assessments, dues, fees, and other charges for its statutory activities.

7. Amended or Supplemental Business Plans and Budgets

During the course of the fiscal year, if ~~{Regional Entity}~~FRCC determines it does not or will not have sufficient funds to carry out its delegated functions and related activities, ~~{Regional Entity}~~FRCC shall submit to NERC one or more proposed amended or supplemental business plans and budgets and requests for approval of supplemental assessments, reflecting costs, cost increases or funding shortfalls not provided for in ~~{Regional Entity}~~FRCC's approved business plan and budget for the fiscal year. NERC shall review and approve the proposed amended or supplemental business plan and budget and proposed supplemental assessment, or shall direct ~~{Regional Entity}~~FRCC to make such revisions as NERC deems appropriate prior to approval. NERC shall submit ~~{Regional Entity}~~FRCC's approved amended or supplemental business plan and budget and proposed supplemental assessment to the Commission for approval.

8. NERC Review of Regional Entity Financial Statements

NERC shall conduct reviews of the quarterly and annual financial statements submitted by ~~{Regional Entity}~~FRCC pursuant to Section 9(h) and (i) of the Agreement. ~~{Regional Entity}~~FRCC shall provide supporting documentation for the quarterly and annual financial statements as reasonably requested by NERC based on its reviews.

April 30th, 2010

David Cook, General Counsel
North American Electric Reliability Corporation
1120 G Street, NW, Suite 990
Washington, DC 20005

RE: Revised Regional Delegation Agreement

Dear Mr. Cook:

Pursuant to your request, this letter serves as notice that the Midwest Reliability Organization (MRO) Board of Directors met on April 26th, 2010 to review the revised Regional Delegation Agreement (RDA) that has been specifically drafted between the North American Electric Reliability Corporation (NERC) and MRO.

The MRO Board approved the revised RDA pending the removal of language pertaining to affiliated Regional Entities as it does not pertain to MRO, and passed the below motion.

"The MRO board approves the pro-forma Regional Delegation Agreement with the deletion of references to affiliates and affiliated functions as they are not applicable to MRO, and directs staff to complete the Regional Delegation Agreement and its exhibits, and, further directs the Midwest Reliability Organization President to execute the Regional Delegation Agreement in its substantive form."

Having received the MRO Board's endorsement, MRO staff will be prepared to execute the agreement upon Commission approval.

Please feel free to contact me with any questions or concerns regarding the above.

Sincerely,

Daniel P. Skaar

CC: Mr. Owen MacBride
Dale Landgren, MRO Board Chair

**AMENDED AND RESTATED DELEGATION AGREEMENT BETWEEN
NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION
AND MIDWEST RELIABILITY ORGANIZATION**

AMENDED AND RESTATED DELEGATION AGREEMENT (“Agreement”) made as of [January 1, 2011], between the North American Electric Reliability Corporation (“NERC”), an organization certified by the Federal Energy Regulatory Commission (“Commission”) pursuant to Section 215(c) of the Federal Power Act to establish and enforce Reliability Standards for the Bulk-Power System, and Midwest Reliability Organization, an organization established to develop and enforce Reliability Standards within the geographic boundaries identified on **Exhibit A** to this Agreement, and for other purposes. NERC and Midwest Reliability Organization may be individually referred to herein as “Party” or collectively as “Parties.”

WITNESSETH

WHEREAS, Subtitle A of the Electricity Modernization Act of 2005 added Section 215 to the Federal Power Act (16 U.S.C. § 824n) (hereafter “the Act”), which, among other things, provides for the establishment of an electric reliability organization (“ERO”) to develop and enforce Reliability Standards applicable to all owners, operators, and users of the Bulk-Power System;

WHEREAS, the Commission has adopted regulations for the implementation of the Act, which are set forth at Chapter I, Title 18, Code of Federal Regulations, Part 39 (the “ERO Regulations”);

WHEREAS, the Commission has certified NERC as the ERO that will, in accordance with the Act, establish and enforce Reliability Standards for the Bulk-Power System, subject to certain delegation provisions described below;

WHEREAS, the Act recognizes the international interdependency of electric reliability within North America and envisions the ERO and such applicable Regional Entities as international organizations;

WHEREAS, the Act and Section 39.8 of the ERO Regulations provide for the delegation by the ERO of authority to propose and enforce Reliability Standards to regional entities (“Regional Entities”) such as Midwest Reliability Organization provided that:

(A) The Regional Entity is governed by —

- (i) an independent board;
- (ii) a balanced stakeholder board; or
- (iii) a combination independent and balanced stakeholder board.

(B) The Regional Entity otherwise satisfies the provisions of Section 215(c)(1) and (2) of the Act; and

(C) The agreement promotes effective and efficient administration of Bulk-Power System reliability;

WHEREAS, certain Regional Entities are organized on an Interconnection-wide basis and are therefore entitled to the presumption set forth in the Act that: “[t]he ERO and the Commission shall rebuttably presume that a proposal for delegation to a Regional Entity organized on an Interconnection-wide basis promotes effective and efficient administration of bulk power system reliability and should be approved”;

WHEREAS, the Act further provides that the ERO shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Reliability Standard or modification to a Reliability Standard to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest;

WHEREAS, Midwest Reliability Organization is not organized on an Interconnection-wide basis and therefore is not entitled to the rebuttable presumptions accorded such an entity;

WHEREAS, NERC will work through Midwest Reliability Organization to carry out certain of its activities in furtherance of its responsibilities as the ERO under the Act;

WHEREAS, NERC has concluded that Midwest Reliability Organization meets all requirements of the Act, the ERO Regulations, and the NERC Rules of Procedure as approved by the Commission (“NERC Rules of Procedure”) necessary to qualify for delegation; and

WHEREAS, NERC and Midwest Reliability Organization having operated under a predecessor agreement to this Agreement, have negotiated this amended and restated Agreement so as to incorporate the benefits of their mutual experience and lessons learned while operating under the predecessor agreement and thereby provide for the more efficient and effective execution of their respective responsibilities in a transparent manner that is pursuant to Section 215 of the Act and the ERO Regulations;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, NERC and Midwest Reliability Organization agree as follows:

1. Definitions. The capitalized terms used in this Agreement shall be defined as set forth in the Act, the ERO Regulations, the NERC Rules of Procedure, or the NERC Glossary of Terms Used in Reliability Standards, or, if not so defined, shall be defined as set forth in this Section 1 or elsewhere in the text of this Agreement:

(a) Breach means (i) the failure of a Party to perform or observe any material term, condition or covenant of the Agreement or (ii) a representation in Section 2 of the Agreement shall have become materially untrue.

(b) Cross-Border Regional Entity means a Regional Entity that encompasses a part of the United States and a part of Canada or Mexico.

(c) Delegated Authority means the authority delegated by NERC to Midwest Reliability Organization to propose and enforce Reliability Standards pursuant to the Act and to undertake related activities set forth in this Agreement in furtherance of these delegated functions in accordance with the Act, the ERO Regulations and this Agreement.

2. Representations.

(a) For purposes of its Delegated Authority, Midwest Reliability Organization hereby represents and warrants to NERC that:

(i) Midwest Reliability Organization is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder. Midwest Reliability Organization is governed in accordance with its bylaws by a balanced stakeholder board. Pursuant to these bylaws, no two industry sectors can control any Midwest Reliability Organization decision and no single industry sector can veto any Midwest Reliability Organization decision. The bylaws are attached hereto in **Exhibit B**¹, and as so attached are in full force and effect. No other such corporate governance documents are binding upon Midwest Reliability Organization.

(ii) As set forth in **Exhibit C** hereto², Midwest Reliability Organization has developed a standards development procedure, which provides the process that Midwest Reliability Organization may use to develop Regional Reliability Standards that are proposed to NERC for adoption.

(iii) As set forth in **Exhibit D** hereto, Midwest Reliability Organization has adopted the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure, which provides for the enforcement of Reliability Standards within Midwest Reliability Organization's geographic boundaries as shown on **Exhibit A**.

(b) NERC hereby represents and warrants to Midwest Reliability Organization that:

(i) NERC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder; and

(ii) NERC has been certified as the ERO by the Commission pursuant to the Act.

¹ The **Exhibit B** from Midwest Reliability Organization shall meet the requirements contained in **Exhibit B** to this Agreement.

² The **Exhibit C** from Midwest Reliability Organization shall meet the requirements contained in **Exhibit C** to this Agreement.

3. Covenants.

(a) During the term of this Agreement, Midwest Reliability Organization shall maintain and preserve its qualifications for delegation pursuant to the Act and shall not amend its Regional Entity Rules without NERC's approval, which shall not be unreasonably withheld or delayed and which shall, in the case of a Regional Entity organized on an Interconnection-wide basis, be governed by the presumptions provided for in Section 215(d)(2) and (e)(4)(C) of the Act, and be subject to any required Commission approval.

(b) During the term of this Agreement, NERC shall maintain its qualification and status as the ERO pursuant to the Act and, subject to the provisions of Sections 17 and 18 of this Agreement, NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations or programs of Midwest Reliability Organization under this Agreement without first obtaining the consent of Midwest Reliability Organization which consent shall not be unreasonably withheld or delayed.

(c) During the term of this Agreement, NERC and Midwest Reliability Organization shall adhere to and require that all participants in their respective activities under this Agreement follow and comply with the NERC Antitrust Compliance Guidelines.

4. Delegation of Authority.

(a) Based upon the representations, warranties and covenants of Midwest Reliability Organization in Sections 2 and 3 above, the corporate governance documents set forth in **Exhibit B**, the standards development process set forth in **Exhibit C**, and the compliance monitoring and enforcement program set forth in **Exhibit D**, NERC hereby delegates authority, pursuant to Section 215(e)(4) of the Act, to Midwest Reliability Organization for the purpose of proposing Reliability Standards to NERC, as set forth in Section 5 of this Agreement, and enforcing Reliability Standards, as set forth in Section 6 of this Agreement, within the geographic boundaries and such other scope set forth on **Exhibit A**. Any exclusions from this delegation of authority to Midwest Reliability Organization within, or additions to this delegation of authority to Midwest Reliability Organization beyond, the geographic boundaries set forth on **Exhibit A** are stated on **Exhibit A**.

(b) [This subsection intentionally left blank].

(c) Nothing in this Agreement shall prohibit Midwest Reliability Organization from entering into an arrangement between one or more other Regional Entities to perform compliance monitoring and enforcement activities outside of its region, on behalf of NERC and/or other Regional Entities, for Registered Entities that have registered functions monitored by more than one Regional Entity, subject to approval by NERC.

(d) For Cross-Border Regional Entities, the authority delegated by this Agreement shall extend only to the portion of the region identified on **Exhibit A** that is within the United States. Any delegation of authority by ERO Governmental Authorities in Canada or Mexico shall be governed by a separate agreement and is outside the scope of this Agreement; provided, however, that both Midwest Reliability Organization and NERC shall endeavor to ensure that this Agreement and such separate agreements are compatible.

(e) As a condition to this delegation of authority and subject to the provisions of Section 17 of this Agreement, Midwest Reliability Organization shall comply with the applicable provisions of NERC's Certificate of Incorporation, Bylaws, Rules of Procedure, and Reliability Standards, as from time to time adopted, approved, or amended.

5. Development and Proposal of Reliability Standards.

(a) In connection with its Delegated Authority, Midwest Reliability Organization shall be entitled to:

(i) propose Reliability Standards, Regional Variances, or modifications thereof to NERC, which shall be considered by NERC through an open and inclusive process for proposing and adopting Reliability Standards that affords Midwest Reliability Organization reasonable notice and opportunity to be heard; and

(ii) develop Regional Reliability Standards through Midwest Reliability Organization's process as set forth in **Exhibit C**. Proposals approved through Midwest Reliability Organization's process shall be reviewed by the NERC Board after NERC provides notice and an opportunity for interested persons to comment. In the case of a proposal from a Regional Entity organized on an Interconnection-wide basis, comments shall be limited to the factors identified in NERC Rule of Procedure 312.3 as it may be amended from time to time. The NERC Board shall promptly thereafter consider such proposed Regional Reliability Standard or Regional Variance, applying the rebuttable presumption described in subsection

5(b) of this Agreement if the proposed Regional Reliability Standard or Regional Variance is from a Regional Entity organized on an Interconnection-wide basis, and either approve the proposed Regional Reliability Standard or Regional Variance and submit it to the Commission for approval, or disapprove it in writing setting forth its reasons. Midwest Reliability Organization may appeal any disapproval of a proposed Regional Reliability Standard or Regional Variance to the Commission.

(b) Pursuant to Section 215(d)(3) of the Act, NERC shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Regional Reliability Standard or Regional Variance or modification thereof to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. Any person challenging such proposal from the Regional Entity organized on an Interconnection-wide basis shall have the burden of proof. NERC shall not find that this presumption has been rebutted except based upon substantial evidence that has been disclosed to, and been subject to comment by, the Interconnection-wide Regional Entity during NERC's review of the proposal.

6. Enforcement of Compliance with Reliability Standards.

(a) In connection with its delegated authority pursuant to this Agreement, Midwest Reliability Organization shall enforce Reliability Standards (including Regional Reliability Standards and Regional Variances) within the geographic boundaries set forth, or as otherwise specified, in **Exhibit A** through the compliance monitoring and enforcement program set forth in **Exhibit D**. NERC and Midwest Reliability Organization agree that this compliance monitoring and enforcement program meets all applicable requirements of the Act, Order No. 672 of the Commission, and the ERO Regulations, including, *inter alia*, the requirement for an audit program pursuant to Section 39.7(a) of the ERO Regulations, the assessment of penalties pursuant to Section 39.7(c) through 39.7(g) of the ERO Regulations and the requirements for due process. Midwest Reliability Organization may not change its compliance monitoring and enforcement program set forth in **Exhibit D** absent NERC's approval, which shall not be unreasonably withheld or delayed, and the approval of the Commission. Subject to the rights and limitations specified in Sections 17 and 18 of this Agreement, Midwest Reliability Organization agrees to comply with the NERC Rules of Procedure, with any directives issued

pursuant to Section 8(c) of this Agreement, and with any guidance and directions issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, in implementing this program.

(b) Midwest Reliability Organization shall report promptly to NERC any Possible Violation, Alleged Violation, or Confirmed Violation of a Reliability Standard, and its eventual disposition by Midwest Reliability Organization. Such report shall include the owner's, operator's, or user's name, which Reliability Standard or Reliability Standards were the subject of the Possible Violation, Alleged Violation, or Confirmed Violation, when the Possible Violation, Alleged Violation, or Confirmed Violation occurred, other pertinent facts including circumstances surrounding the Possible Violation, Alleged Violation, or Confirmed Violation with any known risk to the Bulk-Power System, when the Possible Violation, Alleged Violation, or Confirmed Violation was or will be mitigated, the name of a person knowledgeable about the Possible Violation, Alleged Violation, or Confirmed Violation to serve as a point of contact with the Commission, and any other information required by NERC compliance program procedures. NERC shall promptly forward such report to the Commission. NERC and Midwest Reliability Organization shall cooperate in filing such periodic summary reports as the Commission shall from time to time direct on Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards and summary analyses of such Possible Violations, Alleged Violations, and Confirmed Violations.

(c) Each Possible Violation, Alleged Violation, or Confirmed Violation shall be treated as nonpublic unless the matter is filed with the Commission as a Notice of Penalty, or, if disclosure is required, dismissed. The disposition of each Possible Violation, Alleged Violation, or Confirmed Violation that relates to a Cybersecurity Incident or that would jeopardize the security of the Bulk-Power System if publicly disclosed shall remain nonpublic unless the Commission directs otherwise.

(d) All dispositions by Midwest Reliability Organization of Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards shall be reported to NERC for review and, in the case of Confirmed Violations, penalties or sanctions, and settlements, for approval. Following approval of a disposition by NERC, NERC shall file the disposition with the Commission, if required by, and in accordance with, Section 215(e) of the

Act and Section 39.7 of the ERO Regulations. NERC shall review Midwest Reliability Organization's dispositions based on the following criteria:

(i) whether the disposition is supported by a sufficient record compiled by Midwest Reliability Organization in accordance with the NERC Rules of Procedure, NERC directives and Commission requirements, taking into account the nature of the Possible Violation, Alleged Violation, or Confirmed Violation,

(ii) whether the disposition is consistent with any applicable directives issued pursuant to Section 8(c) of this Agreement, any applicable directions or guidance issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, or other applicable NERC guidance, concerning the Reliability Standards to which the Possible Violation, Alleged Violation, or Confirmed Violation relates,

(iii) if the disposition is a Confirmed Violation or settlement, whether it provides for a penalty or sanction, or a determination of no penalty or sanction, determined in accordance with the NERC Sanction Guidelines, Appendix 4B to the NERC Rules of Procedure, and

(iv) whether the disposition is reasonably consistent with other dispositions by Midwest Reliability Organization and by other Regional Entities of Possible Violations, Alleged Violations, and Confirmed Violations involving the same or similar facts and circumstances.

NERC may reject any disposition, with an explanation of why NERC believes the disposition does not meet the above criteria. Midwest Reliability Organization may submit a disposition requiring NERC approval that has been rejected by NERC, or a revised disposition following a rejection, directly to the NERC Board Compliance Committee for approval without revising the disposition to address all the grounds on which NERC originally rejected the disposition. The final approval of Midwest Reliability Organization's disposition of a Possible Violation, Alleged Violation, or Confirmed Violation shall be made by the NERC Board Compliance Committee, provided, that the NERC Board or NERC Board Compliance Committee may, by appropriate resolution, delegate authority for final approval of dispositions of specified categories of Possible Violations, Alleged Violations, or Confirmed Violations to the NERC President.

(e) All appeals of penalties imposed by Midwest Reliability Organization as a result of a decision by Midwest Reliability Organization's Hearing Body shall be filed with, heard by and disposed of by, NERC in accordance with the NERC Rules of Procedure.

(f) Midwest Reliability Organization shall maintain the capability to conduct investigations of Possible Violations and Alleged Violations of Reliability Standards and to conduct such investigations in a confidential manner.

(g) Midwest Reliability Organization shall maintain a program of proactive monitoring and enforcement of compliance with Reliability Standards, in accordance with the NERC Compliance Monitoring and Enforcement Program and the annual NERC Compliance Monitoring and Enforcement Program Implementation Plan.

(h) As part of its compliance monitoring and enforcement program, Midwest Reliability Organization shall maintain a conflict of interest policy that assures the integrity and independence of such program, including the integrity and independence of the persons or decision-making bodies making final determinations in compliance enforcement actions under Section 5.0 of the NERC Compliance Monitoring and Enforcement Program. A Regional Entity may have stakeholders lead or participate in its board compliance committee so long as integrity and independence are assured through reasonable and appropriate recusal procedures.

(i) As often as NERC deems necessary, but no less than every five years, NERC shall review Midwest Reliability Organization's compliance monitoring and enforcement program to determine that: (i) the program meets all applicable legal requirements; (ii) actual practices reflect the requirements; and (iii) the program administered pursuant to the Delegated Authority promotes consistent interpretations across North America of Reliability Standards and comparable levels of sanctions and penalties for violations of Reliability Standards constituting comparable levels of threat to reliability of the Bulk-Power System.

7. Delegation-Related Activities.

NERC will engage Midwest Reliability Organization on its behalf to carry out certain of its activities that are in furtherance of Bulk-Power System reliability and NERC's responsibilities as the ERO under the Act or in support of the Delegated Authority, as specified in the NERC Rules of Procedure and listed on **Exhibit E**. These delegation-related activities

shall include, but are not limited to, those described in subsections (a) through (f), each of which shall be considered a statutory activity:

(a) Certification of Bulk-Power System Entities. The NERC Board shall set criteria for certification in accordance with the NERC Rules of Procedure. Midwest Reliability Organization shall issue certifications in accordance with the NERC Rules of Procedure.

(b) Registration of owners, operators, and users of the Bulk-Power System as responsible for compliance with requirements of Reliability Standards.

(i) The NERC Board shall develop criteria for registration of owners, operators, and users of the Bulk-Power System as Registered Entities and shall apply the registration criteria to register owners, operators and users of the Bulk-Power System as Registered Entities.

(ii) NERC shall maintain a registration database of Registered Entities, based on data and information provided by Midwest Reliability Organization and other Regional Entities. Midwest Reliability Organization shall provide timely and accurate information relating to registrations to NERC, on at least a monthly basis, to enable NERC to maintain a registration database that is accurate and up-to-date.

(iii) The NERC Board Compliance Committee shall hear and decide appeals from owners, operators and users of the Bulk-Power System contesting registration, in accordance with the NERC Rules of Procedure. If the NERC Board Compliance Committee upholds the decision to register an owner, operator, or user, NERC shall defend the decision in any subsequent appeal of the decision by the Registered Entity to the Commission.

(c) Reliability Assessment and Performance Analysis. Midwest Reliability Organization shall develop assessments of the reliability of the Bulk-Power System, or ensure that data and information are collected, analyzed and provided to NERC in support of the development of reliability assessments, in accordance with the NERC Rules of Procedure. Midwest Reliability Organization shall also develop and maintain, and collect data in support of the development and maintenance of, reliability performance metrics and assessments of risks to the Reliable Operation of the Bulk-Power System, in accordance with the NERC Rules of Procedure and NERC directives. NERC shall develop data-gathering quality control procedures, forms and reporting mechanisms, which shall be used by Midwest Reliability Organization and other Regional Entities in carrying out their responsibilities under this subsection (c).

(d) Event Analysis and Reliability Improvement. Midwest Reliability Organization shall conduct event analysis pursuant to the NERC Rules of Procedure and applicable governmental regulations. NERC and Midwest Reliability Organization shall coordinate event analysis to support the effective and efficient use of their collective resources, consistency in event analysis, and timely delivery of event analysis reports. In collaboration with NERC, Midwest Reliability Organization shall disseminate to the electric industry lessons learned and other information obtained or resulting from event analysis.

(e) Training and Education. Midwest Reliability Organization may provide training and education to Registered Entities, as it deems necessary, in support of its performance of delegated functions and related activities under this Agreement. NERC may also provide training and education programs to Registered Entities on topics relating to NERC's responsibilities as the ERO.

(f) Situation Awareness and Infrastructure Security.

(i) Midwest Reliability Organization shall gather and assess situation awareness information provided by Registered Entities pursuant to the NERC Rules of Procedure and applicable governmental regulations, and shall provide other data, information and assistance to NERC in support of NERC's activities in monitoring present conditions, and responding to events, on the Bulk-Power System.

(ii) Midwest Reliability Organization shall collaborate with NERC in its efforts to coordinate electric industry activities to promote critical infrastructure protection of the Bulk-Power System in North America.

8. Oversight of Performance of Delegated Functions and Related Activities.

This Section 8 sets forth processes and procedures which the Parties intend shall be used in NERC's oversight of Midwest Reliability Organization's performance of its Delegated Authority and related activities pursuant to this Agreement. It is the intent of NERC and Midwest Reliability Organization that matters relating to NERC's oversight of Midwest Reliability Organization's performance of its Delegated Authority and related activities shall be established or resolved by collaboration between NERC and Midwest Reliability Organization and, where applicable, other Regional Entities, to the maximum extent possible, consistent with the construct that NERC and the Regional Entities are operating together in a collaborative

manner to carry out the responsibilities of the ERO under Section 215 of the Act and the ERO Regulations.

(a) (i) NERC shall develop, in collaboration with Midwest Reliability Organization and other Regional Entities, performance goals, measures and other parameters (including, without limiting the scope of such goals, measures and parameters, financial performance goals, measures and parameters), and performance reports, which shall be used to measure NERC's and Midwest Reliability Organization's performance of their respective functions and related activities. The performance goals, measures and parameters and the form of performance reports shall be approved by the NERC President and shall be made public. Midwest Reliability Organization shall provide data, information and reports to NERC, in accordance with established schedules, to enable NERC to calculate Midwest Reliability Organization's performance to the agreed-upon goals, measures and parameters.

(ii) NERC shall use the performance goals, measures and parameters and performance reports to evaluate Midwest Reliability Organization's performance of its delegated functions and related activities and to provide advice and direction to Midwest Reliability Organization on performance improvements. The performance goals, measures and other parameters and the values of such goals, measures and parameters, shall be reviewed by NERC, Midwest Reliability Organization and the other Regional Entities, revised if appropriate, and made public, on the same timeline as the annual business planning and budgeting process described in Section 9 of this Agreement.

(iii) At the request of the President of NERC, Midwest Reliability Organization shall be required to develop, submit for NERC approval, and implement action plans to address areas of its performance that are reasonably determined by NERC, based on analysis of Midwest Reliability Organization's performance against the performance goals, measures and parameters, or performance of specific activities, to be unsatisfactory, *provided*, that prior to requiring Midwest Reliability Organization to adopt and implement an action plan or other remedial action, NERC shall issue a notice to Midwest Reliability Organization of the need and basis for an action plan or other remedial action and provide an opportunity for Midwest Reliability Organization to submit a written response contesting NERC's evaluation of Midwest Reliability Organization's performance and the need for an action plan. Midwest Reliability Organization may request that the President of NERC reconsider the request, and thereafter may

request that the NERC Board review and reconsider the request. NERC and Midwest Reliability Organization shall work collaboratively as needed in the development and implementation of Midwest Reliability Organization's action plan. A final action plan submitted by Midwest Reliability Organization to NERC shall be made public unless the President of NERC makes a written determination that the action plan or specific portions of the plan should be maintained as non-public.

(b) NERC shall make available to Midwest Reliability Organization standardized training and education programs, which shall be designed taking into account input from Midwest Reliability Organization and other Regional Entities, for Midwest Reliability Organization personnel on topics relating to the delegated functions and related activities.

(c) (i) NERC may issue directives to Midwest Reliability Organization concerning the manner in which Midwest Reliability Organization shall perform its delegated functions and related activities under this Agreement. The NERC Rules of Procedure, or any other ERO Rule requiring approval of the Commission, shall not be considered "directives." NERC shall initiate the development of a directive through a collaborative process with Midwest Reliability Organization and, if applicable, other Regional Entities to which the directive will apply. Any directive developed through the collaborative process shall be approved by, and issued under the signature of, the NERC President.

(ii) If after a period of time that is reasonable under the circumstances, NERC and Midwest Reliability Organization and, if applicable, other Regional Entities are unable to reach agreement on the contents of the directive, NERC may issue the directive with the approval of and under the signature of the NERC President; *provided*, that before the NERC President issues a directive pursuant to this paragraph (ii), Midwest Reliability Organization and, if applicable, other Regional Entities, shall be given a reasonable opportunity to present their positions on, and a suggested alternative version or versions of, the proposed directive to the NERC President.

(iii) Upon issuance of a directive by the NERC President, it shall be binding upon, and shall be complied with by, Midwest Reliability Organization subject to reasonable time periods for adoption, implementation, and funding of any necessary resources. Upon request by Midwest Reliability Organization the NERC Board (or a committee of the Board to which the Board delegates appropriate authority) shall review and shall confirm, revise or

revoke any directive that was issued by the NERC President without Midwest Reliability Organization's agreement, *provided*, that Midwest Reliability Organization shall request such review within thirty (30) days following issuance of the directive by the NERC President unless good cause can be shown for a later request.

(iv) NERC and Midwest Reliability Organization and, if applicable, other Regional Entities, shall collaborate in deciding whether a directive (whether issued pursuant to paragraph (ii) or paragraph (iii)) shall be made public. If no agreement is reached by the date of issuance as to whether the directive shall be made public, the NERC President shall decide whether the directive will be made public, *provided*, that is the intent of the Parties that the NERC President shall apply a presumption that directives should be made public, unless the NERC President makes a written determination stating a specific reason for maintaining a particular directive as non-public.

(d) In addition to the issuance of directives pursuant to subsection (c), the NERC Board (or a Board committee to which the Board has delegated authority) may issue guidance or directions as to the manner in which Midwest Reliability Organization and, if applicable, other Regional Entities, shall perform delegated functions and related activities. The Board or Board committee shall also establish reasonable time periods for the implementation of any such guidance or directions, taking into account the impact on the reliability of the Bulk-Power System and the need for funding of additional resources. Any such guidance or directions shall be stated in writing and shall be public, unless the Board or Board committee makes a written determination stating a specific reason for maintaining particular guidance or directions as non-public. Midwest Reliability Organization either individually or in conjunction with other Regional Entities, may request that the NERC Board or Board committee reconsider or revise the guidance or direction.

(e) NERC shall conduct collaborative reviews with Midwest Reliability Organization either individually or in conjunction with one or more other Regional Entities, that provide for the exchange of information on practices, experiences, and lessons learned in the implementation of the delegated functions.

(f) Any audits of Midwest Reliability Organization performed by NERC shall be limited to an examination of Midwest Reliability Organization's compliance with this Agreement,

NERC's Rules of Procedure, the Compliance Monitoring and Enforcement Program, Commission requirements, and directives that are in effect pursuant to Section 8(c)

9. Funding. Midwest Reliability Organization and NERC shall ensure, subject to Commission approval in accordance with the ERO Regulations, that the delegated functions and related activities described in Sections 5, 6 and 7 and listed on **Exhibit E** have reasonable and adequate funding and resources by undertaking the following:

(a) Midwest Reliability Organization shall develop, through a collaborative process with NERC, and propose, an annual business plan and budget, in accordance with ERO Regulations, Commission orders and NERC business planning and budgeting policies and instructions. Midwest Reliability Organization's proposed business plan and budget shall describe the activities necessary for, and provide a budget with adequate resources for, Midwest Reliability Organization to carry out its Delegated Authority under this Agreement, including the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E**. Midwest Reliability Organization's business plan and budget shall show the funding sources and amounts to fund the proposed budget, including as applicable assessments to end users, penalty monies, and other sources of funds.

(b) Midwest Reliability Organization and NERC agree that the portion of Midwest Reliability Organization's approved budget for the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E** that is to be funded by assessments, will be equitably allocated among end users within the geographic boundaries described in **Exhibit A** and recovered through a formula based on Net Energy for Load, or through such other formula as is proposed by Midwest Reliability Organization and approved by NERC and the Commission. If Midwest Reliability Organization proposes to use a formula other than Net Energy for Load beginning in the following year, Midwest Reliability Organization shall submit the proposed formula to NERC in sufficient time that NERC may review and approve the proposed formula and file it with the Commission by May 15 for approval, and the proposed formula shall be effective for the following year if approved by the Commission on or before the date the Commission approves the annual business plan and budget submitted by NERC and Midwest Reliability Organization to the Commission pursuant to the ERO Regulations for such year.

(c) NERC shall determine that the assessments to fund the costs for its statutory functions in its Commission-approved budget are first allocated fairly among the Interconnections and regions according to the applicability of this work to those Interconnections and regions, and then equitably among the end users of the applicable interconnections and regions as appropriate. Allocation on a Net Energy for Load basis will be presumed to satisfy this equitability requirement.

(d) NERC shall provide Midwest Reliability Organization with the form or forms for business plan and budget submittal, and any accompanying instructions, in accordance with the schedule for preparation of the business plan and budget developed by NERC and the Regional Entities.

(e) Midwest Reliability Organization shall submit its proposed annual business plan and budget for carrying out its Delegated Authority functions and related activities described in Sections 5, 6 and 7 and listed on Exhibit E, as well as for all other activities of Midwest Reliability Organization to NERC for review and approval in accordance with the annual schedule for the preparation of business plans and budgets which shall be developed collaboratively by NERC and the Regional Entities, as more fully described in **Exhibit E**.

(f) NERC shall fund Midwest Reliability Organization's performance of its Delegated Authority and related activities in accordance with Midwest Reliability Organization's Commission-approved business plan and budget, in the amount of Midwest Reliability Organization's assessments to end users approved by the Commission. **Exhibit E** sets forth the procedures and timing for billing and collecting Midwest Reliability Organization's approved assessments from end users and other entities and payment of the approved assessment amount to Midwest Reliability Organization unless otherwise modified and approved by NERC and the Commission. NERC shall not impose any material obligation or requirement regarding the Delegated Authority upon Midwest Reliability Organization that has not been provided for in an approved business plan and budget or an approved amended or supplemental business plan and budget, without Midwest Reliability Organization's consent.

(g) NERC shall develop, in consultation with the Regional Entities, a reasonable and consistent system of accounts, with a level of detail and record keeping comparable to the Commission's Uniform System of Accounts and sufficient to allow the Commission to compare each Commission-approved NERC and Midwest Reliability Organization fiscal year budget

with the actual results at the NERC and Regional Entity levels. Midwest Reliability Organization shall follow NERC's prescribed system of accounts except to the extent that NERC permits a departure from the prescribed system of accounts. NERC shall make an informational filing with the Commission describing any such waiver it permits and providing an explanation supporting the permitted departure.

(h) Midwest Reliability Organization shall submit unaudited quarterly interim financial statements in form provided by NERC no later than 20 days after the end of the fiscal quarter (March 31, June 30, September 30, and December 31).

(i) Midwest Reliability Organization shall submit audited financial statements annually, including supporting materials, in a form provided by NERC no later than May 1 of the following year.

(j) **Exhibit E** to this Agreement sets forth the mechanism through which Midwest Reliability Organization shall offset penalty monies it receives against its next year's annual budget for carrying out functions under this Agreement. *Provided*, that, subject to approval by NERC and the Commission, Midwest Reliability Organization may propose and implement an alternative use of penalty monies to that set forth in **Exhibit E**.

10. Assignment. This Agreement may be assigned by either Party only with the prior written consent of the other, which consent shall be granted or withheld in such non-assigning Party's sole discretion, subject to approval by the Commission. Any assignment under this Agreement shall not relieve a Party of its obligations, nor shall a Party's obligations be enlarged, in whole or in part, by reason thereof. Midwest Reliability Organization may not delegate in whole or in part its Delegated Authority to any other entity without NERC's express consent; provided, however, that nothing in this provision shall prohibit Midwest Reliability Organization from contracting with other entities to assist it in carrying out its Delegated Authority, provided Midwest Reliability Organization retains control and responsibility for such Delegated Authority.

11. Default and Cure. Upon a Breach, the non-breaching Party shall give written notice of such Breach to the breaching Party (the "Default Notice"). Subject to a suspension of the following deadlines as specified below, the breaching Party shall have thirty (30) calendar days from receipt of the Default Notice within which to cure such Breach; *provided however*, that if

such Breach is not capable of cure within thirty (30) calendar days, the breaching Party shall commence such cure within thirty (30) calendar days after notice and continuously and diligently complete such cure within ninety (90) calendar days from receipt of the Default Notice; and, if cured within such time, the Breach specified in such notice shall cease to exist. Subject to the limitation specified in the following sentence, if a Breach is not cured as provided in this Section 11, or if a Breach is not capable of being cured within the period provided for herein, the nonbreaching Party shall have the right to declare a default and terminate this Agreement by written notice at any time until cure occurs, and be relieved of any further obligation hereunder. The deadlines for cure and the right to declare a default and terminate this Agreement shall be suspended during the pendency of any efforts or proceedings in accordance with Section 18 of this Agreement to resolve a dispute as to whether a Breach has occurred or been cured. The provisions of this Section 11 will survive termination of this Agreement.

12. Term and Termination.

(a) This Agreement shall become effective on [January 1, 2011] (the “Effective Date”).

(b) The term of the Agreement shall be five (5) years from the Effective Date, prior to which time NERC shall conduct an audit pursuant to subsection 6(i) to ensure that Midwest Reliability Organization continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. If Midwest Reliability Organization meets such requirements, this Agreement may be renewed for another five (5) year term. This Agreement may be renewed for successive additional five (5) year renewal terms provided that prior to the end of each renewal term, NERC shall conduct an audit pursuant to subsection 6(i) to ensure that Midwest Reliability Organization continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. Provided, that either Party may terminate this Agreement as of the end of a term by giving written notice to terminate at least one (1) year prior to the end of the term. If this Agreement is not renewed or becomes subject to termination for any reason, the Parties shall work to provide for a transition of Midwest Reliability Organization’s Delegated Authority to NERC or to another eligible entity and to provide for the resolution of any wind-up costs associated with termination of this Agreement. The termination of this Agreement shall not take effect until such transition has

been effected, unless the transition period exceeds one year, at which time Midwest Reliability Organization may unilaterally terminate.

(c) If any provision of this Agreement, or the application thereof to any person, entity or circumstance, is held by a court or regulatory authority of competent jurisdiction to be invalid, void, or unenforceable, or if a modification or condition to this Agreement is imposed by a regulatory authority exercising jurisdiction over this Agreement, the Parties shall endeavor in good faith to negotiate such amendment or amendments to this Agreement as will restore the relative benefits and obligations of the signatories under this Agreement immediately prior to such holding, modification or condition. If either Party finds such holding, modification or condition unacceptable and the Parties are unable to renegotiate a mutually acceptable resolution, either Party may unilaterally terminate this Agreement. Such termination shall be effective one year following written notice by either Party to the other Party and to the Commission, or at such other time as may be mutually agreed by Midwest Reliability Organization and NERC.

(d) Notwithstanding any termination of this Agreement, provisions contained in Limitation of Liability (Section 13), No Third Party Beneficiaries (Section 14) and Confidentiality (Section 15) shall survive this Agreement in accordance with their terms until sixty (60) days following the expiration of any applicable statute of limitations.

13. Limitation of Liability. Midwest Reliability Organization and NERC agree not to sue each other or their directors, officers, employees, and persons serving on their committees and subgroups based on any act or omission of any of the foregoing in the performance of duties pursuant to this Agreement or in conducting activities under the authority of Section 215 of the Act, other than seeking a review of such action or inaction by the Commission. NERC and Midwest Reliability Organization shall not be liable to one another for any damages whatsoever, including without limitation, direct, indirect, incidental, special, multiple, consequential (including attorneys' fees and litigation costs), exemplary, or punitive damages arising out of or resulting from any act or omission associated with the performance of the Midwest Reliability Organization's or NERC's responsibilities under this Agreement or in conducting activities under the authority of Section 215 of the Act, except to the extent that the Midwest Reliability Organization or NERC is found liable for gross negligence or intentional

misconduct, in which case Midwest Reliability Organization or NERC shall not be liable for any indirect, incidental, special, multiple, consequential (including without limitation attorneys' fees and litigation costs), exemplary, or punitive damages.

14. No Third Party Beneficiaries. Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to, or any liability to, any third party.

15. Confidentiality. During the course of the Parties' performance under this Agreement, a Party may receive Confidential Information, as defined in Section 1500 of NERC's Rules of Procedure. Except as set forth herein, the Parties agree to keep in confidence and not to copy, disclose, or distribute any Confidential Information or any part thereof, without the prior written permission of the issuing Party, unless disclosure is required by subpoena, law, or other directive of a court, administrative agency, or arbitration panel, in which event the recipient hereby agrees to provide the Party that provided the Confidential Information with prompt notice of such request or requirement in order to enable such issuing Party to (a) seek an appropriate protective order or other remedy, (b) consult with the recipient with respect to taking steps to resist or narrow the scope of such request or legal process, or (c) waive compliance, in whole or in part, with the terms of this Section. In the event a protective order or other remedy is not obtained or the issuing Party waives compliance with the provisions, the recipient agrees to furnish only that portion of the Confidential Information which the recipient's counsel advises is legally required and to exercise best efforts to obtain assurance that confidential treatment will be accorded to such Confidential Information. In addition, each Party shall ensure that its officers, trustees, directors, employees, subcontractors and subcontractors' employees, and agents to whom Confidential Information is exposed are under obligations of confidentiality that are at least as restrictive as those contained herein. This confidentiality provision does not prohibit reporting and disclosure as directed by NERC, as set forth in Section 6 of this Agreement.

16. Amendment. Neither this Agreement nor any of the terms hereof, may be amended unless such amendment is made in writing, signed by the Parties, and filed with and approved by the Commission.

17. **Amendments to the NERC Rules of Procedure.** NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations, or programs of Midwest Reliability Organization under this Agreement without first obtaining the consent of Midwest Reliability Organization which consent shall not be unreasonably withheld or delayed. To the extent Midwest Reliability Organization does not consent, NERC shall have the right to invoke the dispute resolution provisions of Section 18 and, if such effort fails to resolve the dispute, to petition the Commission to adopt the amendment to the NERC Rules of Procedure. To the extent that the Commission issues an order amending or materially affecting the rights or obligations of Midwest Reliability Organization under this Agreement, Midwest Reliability Organization shall have the option, exercisable no later than 60 days after issuance of such order, to terminate this Agreement. Such termination shall be effective one year following written notice by Midwest Reliability Organization to NERC and the Commission, or at such other time as may be mutually agreed by Midwest Reliability Organization and NERC.

18. **Dispute Resolution.** In the event a dispute arises under this Agreement between NERC and Midwest Reliability Organization (including disputes relating to NERC's performance of its obligations under this Agreement and/or disputes relating to Midwest Reliability Organization's performance of its obligations under this Agreement) which cannot be resolved through discussions between representatives of the Parties in the normal course of operations, the Parties shall use the following procedures ("Dispute Resolution") to attempt to resolve the dispute. Midwest Reliability Organization shall not suspend performance of any delegated function, and the Parties shall continue to make reasonable, good faith efforts to comply with their obligations under this Agreement, during the pendency of Dispute Resolution. All notices required to be sent pursuant to this Dispute Resolution procedure shall be sent in accordance with Section 19 of this Agreement. This Dispute Resolution procedure is separate from and in addition to all other processes provided for in this Agreement.

(a) The Party invoking Dispute Resolution shall send a notice to the other Party describing the dispute, stating the invoking Party's position with respect to the dispute, stating that the Party is invoking Dispute Resolution, and naming the Party's designated representative

for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the invoking Party.

(b) Within three (3) business days after receipt of the notice invoking Dispute Resolution, the receiving Party shall send a notice to the invoking Party acknowledging receipt of the notice invoking Dispute Resolution, stating the receiving Party's position with respect to the dispute, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the receiving Party.

(c) During the period commencing three (3) business days and ending twenty (20) business days after the date of the receiving Party's notice, the designated representatives shall engage in good faith negotiations to attempt to resolve the dispute, *provided*, that the designated representatives may agree prior to the end of such twenty (20) business day period that the process should move to the next step of Dispute Resolution.

(d) If the designated representatives are unable to arrive at a resolution of the dispute by the end of the time period described in subsection (c), they shall notify the chief executive officers of their respective Parties. The chief executive officers of the Parties shall thereafter engage in good faith negotiations to attempt to resolve the dispute during the period of twenty (20) business days immediately following the time period described in subsection (c), *provided*, that the chief executive officers may agree prior to the end of such twenty (20) business day period that negotiations are at impasse and the process may move to the next step as described in subsection (f). Upon mutual agreement of the Parties, the twenty (20) business day period may be extended to pursue ongoing good faith negotiations.

(e) If a resolution of the dispute is achieved by the Parties, it shall be memorialized in a writing that is acceptable in form and substance to each party and is signed by the designated representative or chief executive officer on behalf of each Party.

(f) If the Parties are unable to resolve the dispute pursuant to the process described in subsections (a) through (e), then either Party may invoke any other available dispute resolution mechanism, including, without limitation, filing a complaint or petition with the Commission requesting resolution of the dispute by the Commission, or filing a complaint for relief in a court having jurisdiction over Parties and the subject matter of the dispute in accordance with Section 20. *Provided, however*, that: (i) it is the intent of the Parties that unresolved disputes shall be

presented to and resolved by the Commission if the Commission has and accepts jurisdiction over the subject matter of the dispute, (ii) the Parties may, by mutual agreement, attempt to resolve the dispute through arbitration, mediation, or other process involving resort to an impartial neutral, and (iii) it is the intent of the Parties that resolution of disputes through Commission proceedings, arbitration, mediation, or other use of an impartial neutral, is preferred over resort to judicial proceedings.

(g) This Section 18 shall not apply to compliance enforcement actions against individual Registered Entities.

19. Notice. Whether expressly so stated or not, all notices, demands, requests, and other communications required or permitted by or provided for in this Agreement shall be given in writing to a Party at the address set forth below, or at such other address as a Party shall designate for itself in writing in accordance with this Section, and shall be delivered by hand or reputable overnight courier:

If to NERC:

North American Electric
Reliability Corporation
116-390 Village Blvd.
Princeton, NJ 08540-5721
Attn: General Counsel
Facsimile: (609) 452-9550

If to Midwest Reliability Organization

Midwest Reliability Organization
2774 Cleveland Avenue North
Roseville, MN 55113
Attn: Sara Patrick
Facsimile: (651) 855-1712

20. Governing Law. When not in conflict with or preempted by federal law, this Agreement will be governed by and construed in accordance with the laws of New Jersey without giving effect to the conflict of law principles thereof. The Parties recognize and agree not to contest the exclusive or primary jurisdiction of the Commission to interpret and apply this Agreement; provided however that if the Commission declines to exercise or is precluded from exercising jurisdiction of any action arising out of or concerning this Agreement, such action shall be brought in any state or federal court of competent jurisdiction in New Jersey. All Parties hereby consent to the jurisdiction of any state or federal court of competent jurisdiction

in New Jersey for the purpose of hearing and determining any action not heard and determined by the Commission.

21. Headings. The headings and captions in this Agreement are for convenience of reference only and shall not define, limit, or otherwise affect any of the terms or provisions hereof.

22. Savings Clause. Nothing in this Agreement shall be construed to preempt or limit any authority that Midwest Reliability Organization may have to adopt reliability requirements or take other actions to maintain reliability of the Bulk-Power System within the geographic boundaries described in **Exhibit A** that are outside the Delegated Authority, as long as such reliability requirements and actions are not inconsistent with Reliability Standards applicable to the region described in **Exhibit A** and do not result in a lessening of reliability outside the region described in **Exhibit A**.

23. Entire Agreement. This Agreement constitutes the entire agreement, and supersedes all prior agreements and understandings, both written and oral, among the parties with respect to the subject matter of this Agreement.

24. Execution of Counterparts. This Agreement may be executed in counterparts and each shall have the same force and effect as the original.

NOW THEREFORE, the parties have caused this Agreement to be executed by its duly authorized representatives, effective as of the Effective Date.

NORTH AMERICAN
ELECTRIC RELIABILITY CORPORATION

MIDWEST RELIABILITY
ORGANIZATION

Exhibit A — Regional Boundaries

MRO is one of eight regional entities that comprise the North American Electric Reliability Corporation (NERC). MRO is a not for profit entity committed to safeguarding and improving reliability of the Bulk Power System in the upper Midwest part of North America and the Canadian provinces of Manitoba and Saskatchewan. The Midwest Reliability Organization region supplies approximately 280,000,000 terawatt-hours to more than twenty million people and covers roughly one million square miles.

There are several Regional Transmission Organizations that overlap MRO and other Regional Entity footprints. MRO coordinates its delegated responsibilities with these neighboring Regional Entities to avoid duplicity and ensure consistency and accuracy. MRO does not have affiliates and does not perform any reliability functions that would result in a conflict or inability to perform the delegated responsibilities of this Agreement.

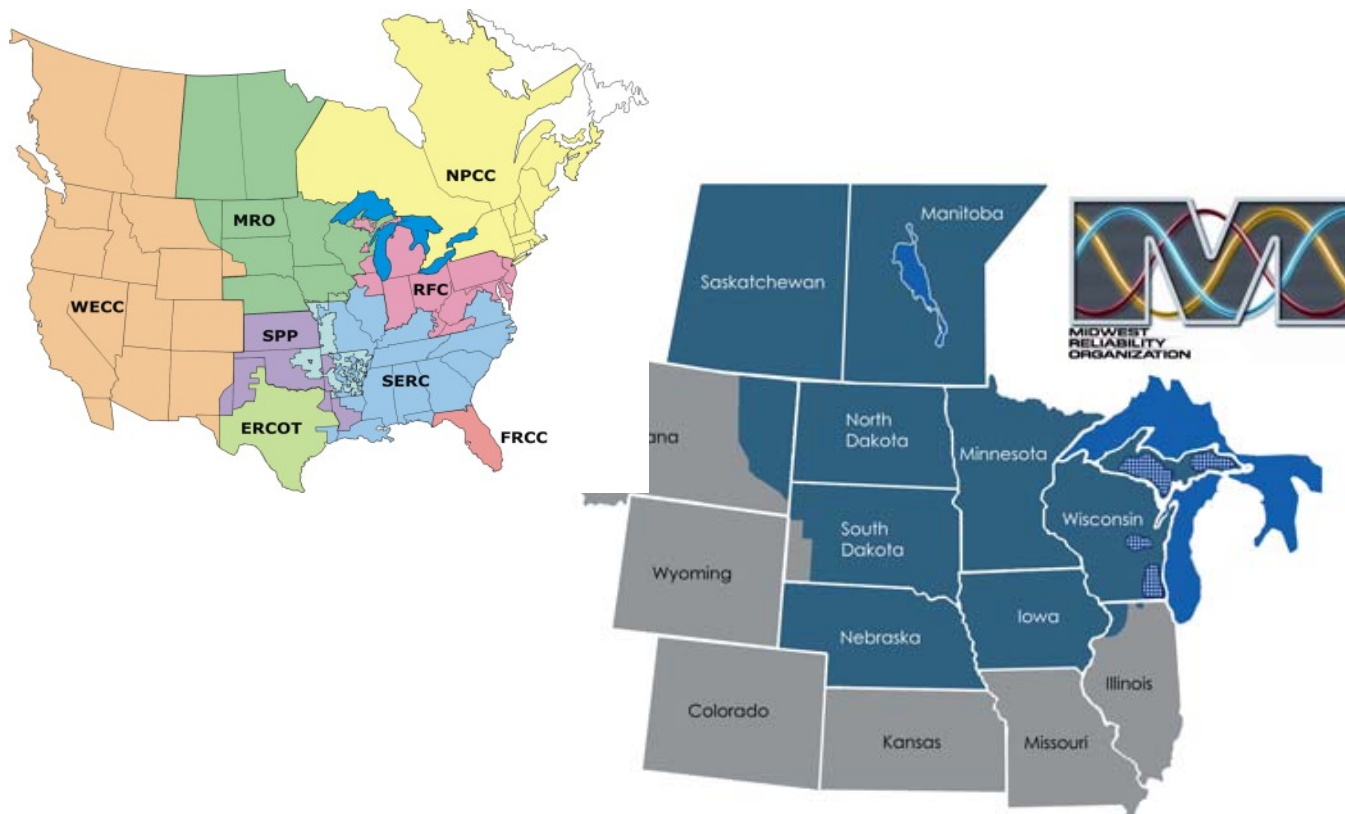

Exhibit B – Governance

Exhibit B shall set forth the Regional Entity’s bylaws, which NERC agrees demonstrate that the Regional Entity meets the following criteria:

CRITERION 1: The Regional Entity shall be governed by an independent board, a balanced stakeholder board, or a combination independent and balanced stakeholder board. (Federal Power Act § 215(e)(4)(A), 18 C.F.R. § 39.8(c)(1), Order No. 672 at ¶ 727.)

CRITERION 2: The Regional Entity has established rules that assure its independence of the users and owners and operators of the bulk power system, while assuring fair stakeholder representation in the selection of its directors. Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 699, 700.)

CRITERION 3: If the Regional Entity has members, the Regional Entity has established rules that assure that its membership is open, that it charges no more than a nominal membership fee and agrees to waive the fee for good cause shown, and that membership is not a condition for participating in the development of or voting on proposed Regional Reliability Standards. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 170-173.)

CRITERION 4: The Regional Entity has established rules that assure balance in its decision-making committees and subordinate organizational structures and assure no two industry sectors can control any action and no one industry sector can veto any action. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶ 728.)

CRITERION 5: The Regional Entity has established rules that provide reasonable notice and opportunity for public comment, due process, openness, and balance of interests in exercising its duties. (Federal Power Act § 215(c)(2)(D) and (e)(4), 18 C.F.R. § 39.8(c)(2).)

**BYLAWS OF THE
MIDWEST RELIABILITY ORGANIZATION, INC**
a Delaware nonprofit corporation
(the “Corporation”)

ARTICLE 1
DEFINITIONS

1.1 **Affiliate**

“Affiliate” means with respect to any entity, any other entity that, directly or indirectly, through one or more intermediaries, controls, or is controlled by, or is under common control with, such entity, as determined in the sole discretion of the board of directors of the Corporation. For this purpose, “control” may be presumed by the direct or indirect ownership of 50 percent or more of the outstanding voting capital stock or other equity interests having ordinary voting power. A member of, or owner of an interest in, a transmission company that FERC has found meets the independence requirements for a regional transmission organization shall not be deemed to be an affiliate of such transmission company.

1.2 **Bulk-Power System**

“Bulk-Power System” means (1) facilities and control systems necessary for operating an interconnected electric energy transmission network (or any portion thereof); and (2) electric energy from generation facilities needed to maintain transmission system reliability. The term does not include facilities used in local distribution of electric energy. The term Bulk-Power System shall be interpreted consistently with any definition given by NERC.

1.3 **Bulk-Power System Users**

“Bulk-Power System Users” means any entity that sells, purchases, or transmits electric power over the Bulk-Power System, or that owns, operates or maintains facilities or control systems that are part of the Bulk-Power System.

1.4 **Canadian Utilities**

“Canadian Utilities” means any government-owned utility serving in Canada within the Corporate Region.

1.5 **Cooperative**

“Cooperative” means an entity serving within the Corporate Region which generally has the following characteristics: (1) private independent electric utility; (2) incorporated under the laws of the states in which they operate; (3) established to provide electric service to its members; (4) owned by the consumers they serve; and (5) governed by a board of directors elected from the membership. This sector includes Generation and Transmission Cooperatives and Public Utility Districts.

1.6 Corporate Region

“Corporate Region” means the geographic area boundaries of the Bulk-Power Systems as designated by each of the Members.

1.7 FERC

“FERC” means the Federal Energy Regulatory Commission.

1.8 Federal Power Marketing Agencies

“Federal Power Marketing Agencies” means agencies of the federal government created to market power within the Corporate Region.

1.9 Generators and Power Marketers

“Generators and Power Marketers” means any entity that owns or operates more than 50 MW of generation in the Corporate Region, or is a power marketer doing business in the Corporate Region, and that does not qualify also to participate in the Investor-Owned Utility, Cooperative, Municipal Utility, Federal Power Marketing Agency or Canadian Utilities Sector.

1.10 Good Utility Practice

“Good Utility Practice” means any of the practices, methods and acts engaged in or approved by a significant portion of the electric utility industry during the relevant time period, or any of the practices, methods and acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result at a reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice, method, or act to the exclusion of all others, but rather to be acceptable practices, methods, or acts generally accepted in the region.

1.11 Industry Sector(s)

“Industry Sector or Sector(s)” means a group of Bulk-Power System Users in the Corporate Region with substantially similar reliability interests, as determined by these Bylaws. The Industry Sectors shall include the following: (1) Transmission System Operators; (2) Generators and Power Marketers; (3) Investor Owned Utilities (4) Cooperatives; (5) Municipal Utilities (6) Federal Power Marketing Agencies; (7) Canadian Utilities; (8) Large End-Use Electricity Customers; and (9) Small End-Use Load Electricity Customers.

1.12 Investor Owned Utility

“Investor Owned Utility” means any for-profit entity that owns and operates a distribution system and serves end-use load within the Corporate Region pursuant to an obligation to serve under state, federal or provincial law, including a default service obligation, or pursuant to a tariff by which the entity offers service to the general public.

1.13 Large End-Use Electricity Customers

“Large End-Use Electricity Customers” means any entity in North America with: (1) at least one service delivery taken at 50 kV or higher (radial supply or facilities dedicated to serve customers) that is not purchased for resale; or (2) any single end-use customer with an

average aggregated service load (not purchased for resale) of at least 50,000 MWh annually, excluding cogeneration or other back feed to the serving utility. This sector also includes organizations that represent the interest of such entities.

1.14 Member

“Member” means a member of the Corporation.

1.15 Municipal Utilities

“Municipal Utilities” means any electric utility that is owned by a state or municipality, or group of municipalities, including a joint action agency, which serves within the Corporate Region.

1.16 NERC

“NERC” means the North American Electric Reliability Corporation or a successor entity.

1.17 Person

“Person” means any natural person, corporation, Cooperative, partnership, association, or other private or public entity.

1.18 Public Utility District

“Public Utility District” means an entity that is a state political or governmental subdivision which owns electric generation, transmission and distribution facilities and that was created and organized under state statutes that are different than those that Municipal Utilities in the same state are created and organized under.

1.19 Regional Entity

“Regional Entity” means an entity having authority pursuant to a delegation agreement with NERC and pursuant to any agreements or laws relating to the Corporation’s functions in Canada.

1.20 Regulatory Participant

“Regulatory Participant” means any state or provincial regulatory agencies in the Corporate Region exercising authority over the rates, terms or conditions of electric service of an entity other than itself within the Corporate Region, or the planning, siting, construction or operation of electric facilities of an entity other than itself within the Corporate Region, as well as any representatives of FERC, regional advisory bodies that may be established by FERC, or representatives of any federal regulator or agency.

1.21 Reliability Standard

“Reliability Standard” means a NERC reliability standard, duly in effect, under the rules, regulations and laws governing such standards, to provide for reliable operation of the Bulk-Power System.

1.22 Small End-Use Electricity Customers

“Small End-Use Electricity Customers” means: (1) any person or entity within North America that takes service below 50 kV; or (2) any single end-use customer with an average

aggregated service load (not purchased for resale) of less than 50,000 MWh annually, excluding cogeneration or other back feed to the serving utility. This sector also includes organizations (including state consumer advocates) that represent the interests of such entities.

1.23 Transmission System Operator

“Transmission System Operator” means an entity that operates or controls operation of high voltage transmission facilities within the Corporate Region (more than 300 miles of transmission at 100 kV or greater) that does not also own, operate or control generation within the Corporate Region, except to the limited extent permitted by FERC for independent transmission organizations with respect to ancillary service obligations. Transmission System Operators include: (1) regional transmission organizations; (2) independent transmission providers; (3) independent system operators; (4) and transmission-only companies.

1.24 Regional Planning Entity

“Regional Planning Entity” means an entity which is subject to Reliability Standards in the MRO Region and shall be eligible for MRO membership.

**2.0
PURPOSE**

2.1 Purpose

The Corporation will be a Regional Entity within the NERC structure for the purpose of preserving and enhancing electric service reliability, adequacy and security in the Corporate Region and other interconnected regions for the benefit of all end-users of electricity and all entities engaged in providing electric services in the Corporate Region, with due regard for safety, environmental protection and economy of service.

2.2 Activities

In support and furtherance of its purpose, the Corporation’s responsibilities shall include, but not be limited to: (1) proposing Reliability Standards, including regional variances or regional Reliability Standards required to maintain and enhance electric service reliability, adequacy and security in the Corporate Region; (2) assessing compliance with and enforcing Reliability Standards, to the extent authorized by applicable agreements and/or law governing a Member's membership in the Corporation; (3) conducting investigations and data analysis on disturbances, system events, and related matters; (4) conducting long-term assessments of reliability within the Corporate region; and (5) other related activities.

2.3 Not-for-Profit Corporation

The Corporation is operated as a Delaware non-stock, nonprofit corporation and is organized pursuant to the general corporation law of the State of Delaware.

3.0 **POWERS**

3.1 **Powers**

The Corporation shall have the power to engage in any lawful act or activity for which corporations may be organized under the general corporation law of the State of Delaware, subject to any limitations provided in applicable federal, provincial or state law or in the Corporation's certificate of incorporation or these Bylaws.

4.0 **OFFICES**

4.1 **Offices**

The principal office of the Corporation shall be located initially within the Corporate Region, at such location as the board of directors may from time to time determine, giving consideration to the total cost to the Corporation and convenience of travel for staff, Members and Regulatory Participants. Once established, the principal office may remain in its location, even if outside the Corporate Region.

5.0 **MEMBERS**

5.1 **Classes of Members**

The Corporation shall have one class of Members. Each Affiliate of a Member may separately be a Member.

5.2 **Qualifications of Members**

A Member may be any entity eligible to be a member of an Industry Sector.

5.3 **Admission of Members**

New Members may join the Corporation upon submittal of an application, in a form approved by the president, and payment of the fees as established by the Corporation. The Member shall designate the Sector to which it belongs. A Member may change its Sector designation once each calendar year, by providing notice to the president at least sixty (60) days prior to the beginning of such year. The president shall review a membership application and may request demonstration by the applicant that it qualifies for membership in a particular Sector. Any dispute with respect to a Member's qualifications for a particular Sector shall be resolved by the board of directors. The president shall have authority to approve an application for membership, subject to review by the board of directors.

5.4 **Voting Rights**

Each Member in good standing shall be entitled to one vote in the Sector in which it is a Member, on matters submitted to a vote of Members. A Member delinquent in payment of its dues, fees or other obligations to the Corporation shall not be entitled to a vote.

5.5 Transfer of Membership

A Member of the Corporation may not transfer its membership or a right arising from such membership except to any Person succeeding to all or substantially all of the assets of the Member. The president shall have authority to approve any such transfer, subject to review by the board of directors.

5.6 Obligations of Members

By applying for and becoming a Member of the Corporation, each Member acknowledges that it is authorized and agrees to comply with, Reliability Standards, and other obligations of Members of the Corporation set forth in these Bylaws or duly adopted by the board of directors in order to achieve the purposes of the Corporation. Such obligations include but are not limited to requirements to provide data and information needed to perform the functions of the Corporation and the payment of dues and any authorized penalties, including penalties and other obligations resulting from violations of Reliability Standards assessed in accordance with NERC rules.

5.7 Withdrawal

A Member may withdraw from participation in the Corporation by providing written notice to the president of the Corporation of such withdrawal. Such notice shall specify a date, not earlier than thirty (30) days from the date of notice, on which the withdrawal shall become effective; provided however, that any such withdrawing Member shall remain liable to the Corporation for any fees, dues, sanctions or obligations to the Corporation incurred while it was a Member, as well as its share of any obligations of the Corporation for the current fiscal year. If notice is given after October 1 of the current calendar year, the Member will also be liable for any fees and dues included in the budget for the following fiscal year. . Section 5.7 does not apply to any fees, dues, or obligations associated with the Corporation responsibilities under delegated authority from NERC or applicable regulatory authorities.

5.8 Budget and Fees

The board of directors shall propose to NERC a budget for delegated functions exercised by the Corporation pursuant to a delegation agreement with NERC and pursuant to any agreements or laws relating to the Corporation's functions in Canada. For those functions outside the scope of the Corporation's delegated functions, the board of directors may from time to time fix the amount of dues, assessments, or fees, if any, and determine the methods of collection, consistent with this Section, the regulations of applicable government authorities, and any resolutions duly adopted by the Members under Section 6.5.2 of these Bylaws.

6.0

MEETING OF MEMBERS

6.1 Annual Meeting of Members

The Members shall hold an annual meeting each calendar year. The annual meeting of the Members shall be held in December of each year, or at such other time specified by the board of directors, in order for Members to review the proposed budget and operations of

the Corporation. All Members shall be entitled to at least thirty (30) days prior written notice of the annual meeting. At the annual meeting of Members: (1) each Sector shall elect the successor(s), if any, for any director(s) from their Sector whose term will expire before the next annual meeting of the Members, provided however, that any Sector may elect a successor director representing such Sector prior to such annual meeting, in accordance with the provisions of this Article 6, in which case the election of such succeeding director(s) shall be reported to the Corporation at such annual meeting; (2) the president and treasurer shall report on the activities and financial condition of the Corporation;; and (3) the Members shall consider and act upon such other matters as may be raised, consistent with the notice of the annual meeting. The failure to hold an annual meeting in accordance with these Bylaws shall not affect the validity of a corporate action.

6.2 Special Meetings of Members

6.2.1 Who May Call

Special meetings of the Members may be called by six (6) members of the board of directors, by the president or if at least 10 percent of the Members sign, date, and deliver to the president one or more written demands for a special meeting describing the purpose for which it is to be held.

6.2.2 Notice of Meeting

Within fifteen (15) days after receipt of a demand for a special meeting from Members, the president shall cause a special meeting to be called and held on notice no later than forty-five (45) days after receipt of the demand. If the president fails to cause a special meeting to be called and held as required by this section, a Member making the demand may call the meeting by giving notice under Section 6.3. In either event, notice of the meeting and the costs of the meeting shall be at the expense of the Corporation.

6.2.3 Time and Place of Special Meetings

Special meetings of Members shall be held at a location designated by the president or the board of directors. If a special meeting is demanded by the Members, the meeting must be held in a facility of appropriate size to accommodate the Membership and at a location within the Corporate Region.

6.2.4 Notice Requirements; Business Limited

The notice of a special meeting must contain a statement of the purposes of the meeting. The business transacted at a special meeting is limited to the purposes stated within the notice of the meeting. Business transacted at a special meeting that is not included in those stated purposes is voidable by or on behalf of the Corporation, unless 90 percent of the Members entitled to vote were present at such meeting or have waived notice of the meeting under Section 6.3.

6.3 Notice Requirements

6.3.1 To Whom Given

Notice of meetings of Members must be given to every Member as of the record date determined under Section 6.4. If the meeting is an adjourned meeting and the date, time and place of the meeting were announced at the time of the adjournment, notice is not required unless a new record date for the adjourned meeting is or must be fixed.

6.3.2 When Given; Contents

In all cases where a specific minimum notice period has not been fixed by law or these Bylaws, the notice must be given at least five (5) days before the date of a meeting and not more than sixty (60) days before the date of a meeting. The notice must contain the date, time and place of the meeting, and an agenda of the matters upon which action may be taken at the meeting. A matter may be added to the agenda of a meeting at the meeting upon the affirmative vote of three-quarters (3/4) of the Sector votes cast on a motion to amend the agenda.

6.3.3 Waiver of Notice; Objections

A Member may waive notice of a meeting of Members. A waiver of notice by a Member entitled to notice is effective whether given before, at, or after the meeting, and whether given in writing, or by attendance. Attendance by a Member at a meeting is a waiver of notice of that meeting, unless the Member objects at the beginning of the meeting to the transaction of business because the meeting is not lawfully called or convened, or objects before a vote on an item of business because the item may not lawfully be considered at that meeting and does not participate in the consideration of the item at that meeting.

6.4 Record Date; Determining Members Entitled to Notice and Vote

The board of directors may fix a date not more than forty (40) days before the date of a meeting of Members as the date for the determination of the Members entitled to notice of and entitled to vote at the meeting. When a date is so fixed, only Members on that date are entitled to notice and to vote at a membership meeting unless the board of directors fixes a new date for determining the right to notice and to vote, which it must do if the meeting is adjourned to a date more than sixty (60) days after the record date for determining Members entitled to notice of the original meeting.

6.5 Right to Vote; Act of Members

Voting of the Members shall be by Sector, with each Sector entitled to the same number of votes as it has directors on the board. If a quorum is present, except with respect to amendments of these Bylaws, modification of a budget approved by the board of directors or termination of the Corporation, the affirmative vote of the majority of the Sector votes present and entitled to vote, which must also be a majority of the required quorum, is the act of the Members. Within a Sector, each Member within the Sector shall have one vote. If a quorum is present with respect to the Sector, the affirmative vote of the majority of the Members within the Sector present and entitled to vote, which must also be a majority of the required quorum, is the act of the Sector. All of the Sector's votes shall be cast consistent

with the act of the Sector unless the Sector adopts a fractional voting alternative as described in Section 6.5.3.

6.5.1 Special Voting Requirements

In order to amend the Bylaws, except as provided in Article 20 with respect to the board of directors, two-thirds (2/3) of the Sector votes cast shall be required to approve the proposed amendment. The substance of the proposed amendment must be contained in the notice of the meeting at which the vote will be taken; provided that, the Members may modify a proposed bylaw amendment at the meeting. Two-thirds (2/3) of the Sector votes cast shall be required to approve any proposal to terminate the Corporation. To the extent practicable, all Member votes may be held electronically under such terms and conditions as are approved by the Board.

6.5.2 Change of Dues Structure

The Members may change the dues structure by resolution with an affirmative vote of two-thirds (2/3) of the Sector votes cast.

6.5.3 Fractional Voting Alternative

A Sector may adopt fractional voting. Member votes for and against are converted to percentages and multiplied by the applicable sector weight. Abstentions are not counted and do not impact the voting tabulation.

6.6 Quorum

A quorum for a meeting of Members is a majority of the Sector votes entitled to vote at the meeting. A quorum for a meeting of a Sector is a majority of the Members of that Sector present or voting electronically on matters before the meeting. A quorum is necessary for the transaction of business at a meeting of Members. If a quorum is not present, a meeting may be adjourned from time to time for that reason by the Sectors or Members then represented or present.

6.7 Action by Written Ballot

An action that may be taken at a regular or special meeting of Members may be taken without a meeting if the Corporation mails or delivers a written ballot to every Member entitled to vote on the matter. Whenever possible, voting by Sectors for directors shall be by written ballot preceding the regular meeting of the Members.

Approval by written ballot is valid only when the number of votes cast by ballot equals or exceeds the quorum required to be present at a meeting authorizing the action, and the number of approvals equals or exceeds the number of votes that would be required to approve the matter at a meeting at which the total number of votes cast was the same as the number of votes cast by ballot.

Solicitations for votes by written ballot must: (1) indicate the number of responses needed to meet the quorum requirements; (2) state the percentage of approvals necessary to approve the matter; and (3) specify the time by which a ballot must be received by the Corporation in order to be counted. A written ballot may not be revoked.

6.8 Action by Electronic Communication

Any vote of a Sector to elect a board member or for any other purpose may be taken by electronic means without a meeting or during a meeting. In addition, a conference among Members by a means of communication through which the participants may simultaneously hear each other during the conference is a meeting of the Members, if the same notice is given of the conference as would be required for a meeting and if the number of persons participating in the conference is a quorum. Participation in a meeting by this means is personal presence at the meeting. A Member may participate in a meeting of the Members by a means of communication through which the Member, other persons participating, and all persons physically present at the meeting may simultaneously communicate with each other during the meeting. Participation in a meeting by this means constitutes personal presence at the meeting.

6.9 Member Representatives; Proxies.

6.9.1. Designation of Representative

Each year prior to the annual meeting of Members, each Member shall designate the individual authorized to vote on Corporation matters on behalf of the Member, in accordance with procedures approved by the board. A Member may change such designation at any time.

6.9.2 Authorization

The individual designated to vote by a Member may appoint a proxy to vote or otherwise act for the Member at any meeting or electronically by signing an appointment form either personally or by an attorney so designated by the Member.

6.9.3 Effective Period

An appointment of a proxy is effective when received by the secretary or other officer or agent authorized to tabulate votes. An appointment is valid for the next regular or specially scheduled meeting or electronic ballot. However, a proxy is not valid for more than sixty (60) days from its date of execution.

6.9.4 Revocation

An appointment of a proxy is revocable by the Member. Appointment of a proxy is revoked by the person appointing the proxy by signing and delivering to the secretary or other officer or agent authorized to tabulate proxy votes. This may be done either in a written statement that the appointment of the proxy is revoked or a subsequent appointment form.

6.10 Reimbursement of Member Expenses

The Corporation will be under no obligation to reimburse Members for expenses associated with their attendance at regular or special Member meetings.

7.0
BOARD OF DIRECTORS

7.1 **Management of Corporation**

Consistent with these Bylaws, the business and affairs of the Corporation shall be managed by or under the direction of a board of directors. The duties of the board will include, but will not be limited to the following: (1) govern the Corporation and oversee all of its activities; (2) establish and oversee all organizational groups; (3) oversee accomplishment of all functions set forth in any delegation or other agreement with NERC or any governmental entity related to development, monitoring and enforcement of Reliability Standards and related matters; (4) approve, revise and enforce Member data and information requirements and related confidentiality requirements; (5) establish and approve an annual budget; (6) represent the Corporation in legal and regulatory proceedings; (7) hire the president. The board of directors shall select a chair and a vice-chair from among the members of the board. The board may establish board committees as appropriate.

7.2 **Voting**

Each director shall have one vote with respect to decisions of the board.

7.3 **Composition of the Board of Directors**

The board of directors shall consist of nineteen (19) board members elected by the Sectors as follows:

7.3.1.1 Three (3) directors from the Transmission System Operators Sector;

7.3.1.2 Two (2) directors from the Generators and Power Marketers Sector;

7.3.1.3 Five (5) directors from the Investor Owned Utilities Sector;

Two (2) directors must be from utilities with less than 3,000 megawatts of end-use load.

Three (3) directors must be from utilities with 3,000 megawatts or greater of end-use load.

7.3.1.4 Two (2) directors from the Cooperative Sector;

7.3.1.5 Two (2) directors from the Municipal Utilities Sector;

7.3.1.6 One (1) director from the Federal Power Marketing Agencies;

7.3.1.7 Two (2) directors from the Canadian Utilities Sector provided that both directors are not residents of the same Canadian province;

7.3.1.8 One (1) director from the Large End-Use Electricity Customers Sector, and

7.3.1.9 One (1) director from the Small End-Use Electricity Customers Sector.

Provided, however, that in choosing directors from a sector, there shall not be more directors from a particular Sector than there are actual Members of such Sector.

Members shall endeavor to select directors from among individuals holding senior management or officer positions in Member organizations, and with a view toward ensuring geographic representation of the Corporate Region on the board. No two directors may be employees of a single Member or employees of Members that are affiliates. To the extent the Members of a Sector do not select a director, that director position shall remain vacant until a director is selected by the Sector.

7.4 Terms of Directors

The directors will serve three-year, staggered terms. The terms of the initial directors will be selected by lot at the first meeting of the board of directors. Any director may be removed at any time by the affirmative vote of two-thirds (2/3) of the Members of the Sector selecting such director. A director may be removed by the board of directors for non-attendance of three consecutive board meetings.

7.5 Reimbursement

Directors shall have the right to reimbursement by the Corporation of their actual reasonable travel expenses to board meetings or when specifically selected to represent the Corporation at a business meeting.

7.6 Vacancies

If a director resigns, dies, changes corporate affiliation or is removed during the term of office for which elected, the directorship shall thereupon be vacant and shall be filled by the Members of the respective Sector, by written or electronic ballot in accordance with the procedures and requirements set forth above. The successor director elected by the Members of the Sector shall hold office for the unexpired term of the director replaced.

7.7 Meetings; Notice

An annual meeting of the board of directors shall be held without notice immediately following the annual meeting of the Members to elect the chair and vice-chair for the next year. In addition, regular meetings may be held at such time or times as fixed by the board of directors. Schedules of regular meetings of the board of directors shall be published by the secretary and provided to all Members. Special meetings of the board of directors may be called by the president or by three directors and shall be held at the principal office of the Corporation, or such other place within the Corporate Region as determined by the president after consultation with the board. Notice of the date, time, and place of a special meeting shall be given by the secretary not less than seven (7) days prior to the meeting by mail, telegram, or electronic communication to each director and Member. Except as necessary to discuss personnel issues, litigation or similar sensitive or confidential matters, all meetings of the board of directors shall be open to Members and other interested persons.

7.8 Quorum

A majority of the directors currently holding office is a quorum for the transaction of business.

7.9 Board Action

The act of a majority of the directors present at a meeting at which a quorum is present shall be the act of the board of directors, unless the act of a greater number is required by law or these Bylaws.

7.10 Action Without a Meeting

An action required or permitted to be taken at a board of directors meeting may be taken by written action, including electronic communication, signed by all of the directors of the Corporation. The written action is effective when signed by the required number of directors, unless a different effective time is provided in the written action.

7.11 Action by Electronic Communication

A conference among directors by a means of communication through which the directors may simultaneously hear each other during the conference is a board meeting if the same notice is given of the conference as would be required for a meeting and if the number of directors participating in the conference is a quorum. Participation in a meeting by this means constitutes personal presence at the meeting. A director may participate in a board meeting by any means of communication through which the director, other directors participating, and all directors physically present at the meeting may simultaneously communicate with each other during the meeting.

8.0

ORGANIZATIONAL GROUPS

8.1 Establishment of Organizational Groups

The board of directors shall establish such organizational groups, consisting of committees, sub-committees, task forces and working groups of Members, as are necessary and appropriate to accomplish the purposes of the Corporation in an efficient and cost-effective manner. All organizational groups shall be subject to the direction and control of the board. The membership of organizational groups shall be determined based upon experience, expertise and geographic diversity and to the extent practicable shall include balanced representation of the Sectors.

The board of directors shall establish policies and procedures governing the creation of organizational groups, how they are populated, how voting and related matters are conducted and how they may be reorganized. The board shall conduct a review of all organizational groups of the Corporation on a periodic basis to ensure that the business of the Corporation is conducted in an efficient, cost-effective manner and shall include a statement of its conclusions and resulting actions in the board's report to Members at the annual meeting.

8.2 Reimbursement

Consistent with the annual budget of the Corporation, the Board may authorize reimbursement by the Corporation for members of organizational groups (other than committees of the whole) of reasonable travel, meals and lodging expenses for

organizational group meetings or for representation of the Corporation at other business meetings as authorized by the board. The board of directors may authorize reimbursement for persons acting on behalf of the Corporation, as necessary in the interests of the Corporation.

9.0 OFFICERS

9.1 Officers

The officers of the Corporation shall include a president, a secretary, a treasurer and any other officers as may be elected or appointed in accordance with the provisions of this Article. The board of directors may elect or appoint any additional officers that it deems desirable, such other officers to have the authority and perform the duties prescribed by the board of directors. The same individual may hold any number of offices, except that of president.

9.2 Election and Term of Office

The officers of the Corporation shall be elected by the board of directors. Each officer shall hold office at the pleasure of the board. New officers may be created and the positions filled at any meeting of the board of directors. Each elected officer shall hold office until his or her successor has been duly elected and qualified.

9.3 Removal

Any officer elected by the board of directors may be removed by the affirmative vote of two-thirds (2/3) of the board of directors whenever in its judgment the best interests of the Corporation would be served thereby, but such removal shall be without prejudice to the contract rights, if any, of the officer so removed. Election or appointment of an officer or agent shall not of itself create contract rights.

9.4 Vacancies

A vacancy in any office because of death, resignation, removal, disqualification, or otherwise, may be filled by the board of directors for the unexpired portion of the term.

9.5 President

The president shall be, in the discretion of the board of directors, either an employee of or contractor to the Corporation and shall:

9.5.1.1 be the principal executive and operating officer of the Corporation;

9.5.1.2 sign certificates of membership, and may sign any deeds, mortgages, deeds of trust, notes, bonds, contracts or other instruments authorized by the board of directors to be executed, except in cases in which the signing and execution thereof shall be expressly delegated by the board of directors or by these Bylaws to some other officer or agent of the Corporation; and

9.5.1.3 perform all duties incident to the office of president, including hiring and directing staff, and such other duties as may be prescribed by the board of directors from time to time.

9.6 **Secretary**

The secretary shall ensure that the following duties are carried out:

9.6.1.1 the minutes of the meetings of the Members and of the board of directors are recorded;

9.6.1.2 all required notices are duly given in accordance with these Bylaws and as required by law;

9.6.1.3 a register of the current names and addresses of all Members is maintained;

9.6.1.4 a complete copy of the articles of incorporation and Bylaws of the Corporation containing all amendments thereto are kept on file at all times, which copies shall always be open to the inspection of any Member; and

9.6.1.5 generally perform all duties incident to the office of secretary and such other duties as may be prescribed by the board of directors from time to time.

9.7 **Treasurer**

The treasurer shall be responsible for the following activities:

9.7.1.1 maintain custody of all funds and securities of the Corporation;

9.7.1.2 receipt of and the issuance of receipts for all monies due and payable to the Corporation and for deposit of all such monies in the name of the Corporation in such bank or banks or financial institutions as shall be selected by the board of directors; and

9.7.1.3 generally perform all duties incident to the office of treasurer and such other duties as may be prescribed by the board of directors from time to time.

10.0

CERTIFICATES OF MEMBERSHIP

10.1 **Certificates of Membership**

The board of directors may provide for the issuance of certificates evidencing membership in the Corporation, which certificates shall be in such form as may be determined by the board.

11.0

BOOKS AND RECORDS

11.1 **Books and Records; Financial Statements**

The Corporation shall keep at its registered office correct and complete copies of its articles and Bylaws, accounting records, and minutes of meetings of Members, board of directors,

and committees having any of the authority of the board of directors. A Member, or the agent or attorney of a Member, may inspect all books and records and voting agreements for any proper purpose at any reasonable time. Upon request, the Corporation shall give the Member a statement showing the financial result of all operations and transactions affecting income and surplus during its last annual accounting period and a balance sheet containing a summary of its assets and liabilities as of the closing date of the accounting period.

12.0 **FISCAL YEAR**

12.1 **Fiscal Year**

The fiscal year of the Corporation shall be the calendar year.

13.0 **TRANSFER OF ASSETS**

13.1 **Member Approval Not Required**

The Corporation, by affirmative vote of the board of directors, may sell, lease, transfer, or dispose of its property and assets in the usual and regular course of its activities and grant a security interest in all or substantially all of its property and assets in the usual and regular course of its activities, upon those terms and conditions and for those considerations, which may be money, securities, or other instruments for the payment of money or other property, as the board of directors considers expedient, in which case no Member approval is required.

13.2 **Member approval; when required**

The Corporation may sell, lease, transfer, or dispose of all or substantially all of its property and assets, including its good will, not in the usual and regular course of its activities, upon those terms and conditions and for those considerations, which may be money, securities, or other instruments for the payment of money or other property, as the board of directors considers expedient only when approved at a regular or special meeting of the Members by the affirmative vote of two-thirds (2/3) of all the Members. Notice of the meeting must be given to the Members. The notice must state that a purpose of the meeting is to consider the sale, lease, transfer, or other disposition of all or substantially all of the property and assets of the Corporation.

14.0 **CONTRACTS, CHECKS, DEPOSITS, AND GIFTS**

14.1 **Contracts**

The board of directors may authorize any officer or officers or agent or agents of the Corporation, in addition to the officers so authorized by these Bylaws, to enter into any contract or execute and deliver any instrument in the name of and on behalf of the

Corporation, and such authority may be general or may be confined to specific instances.

14.2 Checks, Drafts, or Orders

All checks, drafts, or orders for the payment of money, notes, or other evidences of indebtedness issued in the name of the Corporation, shall be signed by such officer or officers or agent or agents of the Corporation, and in such manner as shall from time to time be determined by resolution of the board of directors.

14.3 Deposits

All funds of the Corporation shall be deposited to the credit of the Corporation in such banks, trust companies, or other depositories as the board of directors may select.

14.4 Gifts

The board of directors may accept on behalf of the Corporation any contribution, gift, bequest, or devise for any purpose of the Corporation.

15.0

INSURANCE, LIABILITY, AND INDEMNIFICATION

15.1 Insurance

The president is authorized to procure insurance to protect the Corporation against damages arising out of or related to any directive, order, procedure, action or requirement of the Corporation.

15.2 Limitations on Liability

No director, officer, agent, employee or other representative of the Corporation, and no corporation or other business organization that employs a director of the Corporation, or any director, officer, agent or employee of such corporation or other business organization, shall be personally liable to the Corporation or any Member of the Corporation for any act or omission on the part of any such director, officer, agent, employee, or other representative of the Corporation, which was performed or omitted in good faith in his official capacity as a director, officer, agent, employee or other representative of the Corporation. However, this release of liability shall not operate to release such a director, officer, agent, employee or other representative of the Corporation from any personal liability resulting from willful acts or omissions knowingly or intentionally committed or omitted by him in breach of these Bylaws for improper personal benefit or in bad faith.

15.3 Indemnification

It is the intent of the Corporation to indemnify its directors, officers, agents, employees, or other representatives to the maximum extent allowed by law consistent with these Bylaws. Each director, officer, agent, employee, or other representative of the Corporation shall be indemnified by the Corporation against all judgments, penalties, fines, settlements, and reasonable expenses, including legal fees, incurred by him as a result of, or in connection with, any threatened, pending or completed civil, criminal, administrative, or investigative proceedings to which he may be made a party by reason of his acting or having acted in his

official capacity as a director, officer, agent, employee, or representative of the Corporation, or in any other capacity which he may hold at the request of the Corporation, as its representative in any other organization, subject to the following conditions:

15.3.1.1 Such director, officer, agent, employee, or other representative must have conducted himself in good faith and, in the case of criminal proceedings, he must have had no reasonable cause to believe that his conduct was unlawful. When acting in his official capacity, he must have reasonably believed that his conduct was in the best interests of the Corporation, and, when acting in any other capacity, he must have reasonably believed that his conduct was at least not opposed to the best interests of the Corporation.

15.3.1.2 If the proceeding was brought by or on behalf of the Corporation, however, indemnification shall be made only with respect to reasonable expenses referenced above. No indemnification of any kind shall be made in any such proceeding in which the director, officer, agent, employee, or other representative shall have been adjudged liable to the Corporation.

15.3.1.3 In no event, however, will indemnification be made with respect to any described proceeding which charges or alleges improper personal benefit to a director, officer, agent, employee, or other representative and where liability is imposed upon him on the basis of the receipt of such improper personal benefit.

15.3.1.4 In order for any director, officer, agent, employee, or other representative to receive indemnification under this provision, he shall vigorously assert and pursue any and all defenses to those claims, charges, or proceedings covered hereby which are reasonable and legally available and shall fully cooperate with the Corporation or any attorneys involved in the defense of any such claim, charges, or proceedings on behalf of the Corporation.

15.3.1.5 No indemnification shall be made in any specific instance until it has been determined by the Corporation that indemnification is permissible in that specific case, under the standards set forth herein and that any expenses claimed or to be incurred are reasonable. These two (2) determinations shall be made by a majority vote of at least a quorum of the board consisting solely of directors who were not parties to the proceeding for which indemnification or reimbursement of expenses is claimed. If such a quorum cannot be obtained, a majority of at least a quorum of the full board, including directors who are parties to said proceeding, shall designate a special legal counsel who shall make said determinations on behalf of the Corporation. In making any such determinations, the termination of any proceeding by judgment, order, settlement, conviction, or upon plea of nolo contendere, or its equivalent, shall not, in and of itself, be conclusive that the person did not meet the standards set forth herein.

15.3.1.6 Any reasonable expenses, as shall be determined above, that have been incurred by a director, officer, agent, employee, or other representative who has been made a party to a proceeding as defined herein, may be paid or reimbursed in advance upon a majority vote of a quorum of the full board, including those who may be a party to the same proceeding. However, such director, officer, agent, employee, or other representative shall have provided the Corporation with (i) a written affirmation under oath that he, in good faith, believes that he has met the conditions for indemnification herein, and (ii) a written undertaking that he shall repay any amounts advanced, with interest accumulated at a reasonable rate, if it is

ultimately determined that he has not met such conditions. In addition to the indemnification and reimbursement of expenses provided herein, the president shall purchase insurance that would protect the Corporation, its directors, officers, agents, employees, or other representatives against reasonably expected liabilities and expenses arising out of the performance of their duties for the Corporation.

16.0

PARTICIPATION BY REGULATORY PARTICIPANTS

16.1

All Regulatory Participants shall be entitled to and be provided with the same rights to notice of and participation in meetings or other activities of the Corporation as are provided to Members, but shall not have the right to vote.

17.0

PARTICIPATION BY FEDERAL POWER MARKETING ADMINISTRATIONS

17.1

The participation by the United States through Federal power marketing administrations (PMA) in the Corporation is subject in all respects to acts of Congress and to regulations of the Secretary of Energy established thereunder. This reservation includes, but is not limited to, the statutory limitations upon the authority of the Secretary of Energy to submit disputes arising hereunder to arbitration. In the event of a conflict between this Article 18 and any other Article of these Bylaws, this Article 18 shall have precedence with respect to the application of these Bylaws to the United States.

17.2

Where activities provided for herein extend beyond the current fiscal year, continued expenditures by the United States are contingent upon Congress making the necessary appropriations required for the continued performance of the obligations of the PMA hereunder. In case such appropriations are not made, the Corporation and its Members hereby release the PMA from its contractual obligations under these Bylaws and from all liability due to the failure of Congress to make such appropriation.

17.3

No member of or delegate to Congress shall be admitted to any share or part of, or to any benefit that may have arisen from, these Bylaws, but this restriction shall not be construed to extend to these Bylaws if made with a corporation or company for its general benefit.

17.4

The Corporation and its Members warrant that no Person or selling agency has been employed or retained to solicit or secure participation by a PMA in the Corporation upon an agreement or understanding for a commission, percentage, brokerage or contingent fee, excepting *bona fide* employees or *bona fide* established commercial or selling agencies

maintained by the Members for the purpose of securing business. For breach or violation of this warranty, a PMA shall have the right to annul its participation in the Corporation without liability or, in its discretion, to deduct from its dues or fees the full amount of such commission, percentage, brokerage, or contingent fee.

17.5

For the purpose of this Section 18.5 the term “Contract” shall mean these Bylaws and the term “Contractor” shall mean the Corporation. During the performance of this Contract, the Contractor agrees to the following provisions.

17.5.1.

Section 202 of the Executive Order No. 11246, 30 Fed. Reg. 12319 (1965), as amended by Executive Order No. 12086, 43 Fed. Reg. 46501 (1978), which provides, among other things, that the Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin, is incorporated by reference in the Contract.

17.5.2.

The Contract, to the extent that it is of a character specified in Section 103 of the Contract Work Hours and Safety Standards Act, 40 U.S.C. § 329 (1986) (the “Act”), is subject to the provisions of the Act, 40 U.S.C. §§ 327-333 (1986), and to regulations promulgated by the Secretary of Labor pursuant to the Act.

17.5.3.

The Contractor agrees not to employ any person undergoing sentence of imprisonment in performing the Contract except as provided by 18 U.S.C. § 4082(c)(2) and Executive Order 11755, 39 Fed. Reg. 779 (1973).

18.0

HEARINGS AND DISPUTE RESOLUTION

18.1 Hearings

Except as otherwise provided in applicable agreements and/or law governing a Member's membership in the Corporation, the Corporation shall be responsible for making final determinations regarding whether a Member has violated a Reliability Standard in accordance with the NERC Rules of Procedure.

18.2 Disputes

Dispute resolution procedures will be established by the board of directors for disputes between Members, or between a Member and the Corporation, for issues arising under these Bylaws. Determinations related to violations of Reliability Standards will be resolved in accordance with the NERC Rules of Procedure, except as otherwise provided in applicable agreements and/or law governing a Member's membership in the corporation.

19.0
AMENDMENT OF BYLAWS

19.1

The power to adopt, amend or repeal these Bylaws is vested in the Members as set forth in Section 6.5 of these Bylaws; provided however, upon the passage of any federal reliability legislation and/or the adoption of related requirements and procedures by NERC or any regulatory agency with jurisdiction, the board of directors shall have authority upon a two-thirds (2/3) vote to amend these Bylaws as necessary and appropriate to comply with such law and related requirements.

Exhibit C – Regional Standard Development Procedure

Exhibit C shall set forth the Regional Entity’s standards development procedure, which NERC agrees meets the following common attributes:

COMMON ATTRIBUTE 1

Proposed regional reliability standards shall be subject to approval by NERC, as the electric reliability organization, and by FERC before becoming mandatory and enforceable under Section 215 of the FPA. No regional reliability standard shall be effective within the Midwest Reliability Organization area unless filed by NERC with FERC and approved by FERC.

COMMON ATTRIBUTE 2

Midwest Reliability Organization regional reliability standards shall provide for as much uniformity as possible with reliability standards across the interconnected bulk power system of the North American continent. A Midwest Reliability Organization reliability standard shall be more stringent than a continent-wide reliability standard, including a regional difference that addresses matters that the continent-wide reliability standard does not, or shall be a regional difference necessitated by a physical difference in the bulk power system. A regional reliability standard that satisfies the statutory and regulatory criteria for approval of proposed North American reliability standards, and that is more stringent than a continent-wide reliability standard, would generally be acceptable.

COMMON ATTRIBUTE 3

Midwest Reliability Organization regional reliability standards, when approved by FERC shall be made part of the body of NERC reliability standards and shall be enforced upon all applicable bulk power system owners, operators, and users within the Midwest Reliability Organization area, regardless of membership in the region.

COMMON ATTRIBUTE 4

Requester — The requester is the sponsor of the regional reliability standard request and may assist in the development of the standard. Any member of Midwest Reliability Organization, or group within Midwest Reliability Organization shall be allowed to request that a regional reliability standard be developed, modified, or withdrawn. Additionally, any entity (person, organization, company, government agency, individual, etc.) that is directly and materially affected by the reliability of the bulk power system in the Midwest Reliability Organization area shall be allowed to request a regional reliability standard be developed, modified, or withdrawn.

COMMON ATTRIBUTE 5

[Standards or other named] committee — The Midwest Reliability Organization Standards Committee manages the standards development process. The Standards Committee will consider which requests for new or revised standards shall be assigned for development (or existing standards considered for deletion). The Standards Committee will advise the Midwest Reliability Organization board on standards presented for adoption.

COMMON ATTRIBUTE 6

[Alternative 6A: For a Regional Entity that chooses to vote using a balanced stakeholder committee.] NOT APPLICABLE

The [standards] committee is a balanced stakeholder committee, inclusive of all stakeholder interests that provide for or are materially impacted by the reliability of the bulk power system. [The [standards] committee votes to approve standards.] See Appendix A for the representation model of the [standards] committee.

[Alternative 6B: For a Regional Entity that chooses to vote using a balanced ballot body of stakeholders.]

[Registered ballot body] — The registered ballot body comprises all entities or individuals that qualify for one of the stakeholder segments; are registered with Midwest Reliability Organization as potential ballot participants in the voting on standards; and are current with any designated fees. Each member of the registered ballot body is eligible to vote on standards. [Each standard action has its own ballot pool formed of interested members of the registered ballot body. Each ballot pool comprises those members of the registered ballot body that respond to a pre-ballot survey for that particular standard action indicating their desire to participate in such a ballot pool.] The representation model of the registered ballot body is provided in Appendix A.

COMMON ATTRIBUTE 7

Midwest Reliability Organization will coordinate with NERC such that the acknowledgement of receipt of a standard request identified in step 1, notice of comment posting period identified in step 4, and notice for vote identified in step 5 below are concurrently posted on both the Midwest Reliability Organization and NERC websites.

COMMON ATTRIBUTE 8

An acceptable standard request shall contain a description of the proposed regional reliability standard subject matter containing sufficiently descriptive detail to clearly define the purpose, scope, impacted parties, and other relevant information of the proposed standard.

COMMON ATTRIBUTE 9

Within [no greater than 60] days of receipt of a completed standard request, the Standards Committee shall determine the disposition of the standard request.

COMMON ATTRIBUTE 10

The Standards Committee may take one of the following actions:

- Accept the standard request as a candidate for development of a new standard, revision of an existing standard, or deletion of an existing standard. The Standards Committee may, at its discretion, expand or narrow the scope of the standard request under consideration. The Standards Committee shall prioritize the development of standard in relation to other proposed standards, as may be required based on the volume of requests and resources.
- Reject the standard request. If the Standards Committee rejects a standard request, a written explanation for rejection will be delivered to the requester within [no greater than 30] days of the decision.
- Remand the standard request back to the requester for additional work. The standards process manager will make reasonable efforts to assist the requester in addressing the deficiencies identified by the Standards Committee. The requester may then resubmit the modified standard request using the process above. The requester may choose to withdraw the standard request from further consideration prior to acceptance by the Standards Committee.

COMMON ATTRIBUTE 11

Any standard request that is accepted by the Standards Committee for development of a standard (or modification or deletion of an existing standard) shall be posted for public viewing on the Midwest Reliability Organization website within [no greater than 30] days of acceptance by the committee.

COMMON ATTRIBUTE 12

The standards process manager shall submit the proposed members of the drafting team to the Standards Committee. The Standards Committee shall approve the drafting team membership within 60 days of accepting a standard request for development, modifying the recommendations of the standards process manager as the committee deems appropriate, and assign development of the proposed standard to the drafting team.

COMMON ATTRIBUTE 13

At the direction from the Standards Committee, the standards process manager shall facilitate the posting of the draft standard on the Midwest Reliability Organization website, along with a draft implementation plan and supporting documents, for a no less than a 30-day comment period. The standards process manager shall provide notice to Midwest Reliability

Organization stakeholders and other potentially interested entities, both within and outside of the Midwest Reliability Organization area, of the posting using communication procedures then currently in effect or by other means as deemed appropriate.

COMMON ATTRIBUTE 14

The drafting team shall prepare a summary of the comments received and the changes made to the proposed standard as a result of these comments. The drafting team shall summarize comments that were rejected by the drafting team and the reason(s) that these comments were rejected, in part or whole. The summary, along with a response to each comment received will be posted on the Midwest Reliability Organization website no later than the next posting of the proposed standard.

COMMON ATTRIBUTE 15

Upon recommendation of the drafting team, and if the Standards Committee concurs that all of the requirements for development of the standard have been met, the standards process manager shall post the proposed standard and implementation plan for ballot and shall announce the vote to approve the standard, including when the vote will be conducted and the method for voting. Once the notice for a vote has been issued, no substantive modifications may be made to the proposed standard unless the revisions are posted and a new notice of the vote is issued.

COMMON ATTRIBUTE 16

The standards process manager shall schedule a vote by the Midwest Reliability Organization registered ballot body. The vote shall commence no sooner than 15 days and no later than 30 days following the issuance of the notice for the vote.

COMMON ATTRIBUTE 17

[Alternative 17A: For an RE that chooses to vote using a balanced stakeholder committee.] Not Applicable

The [standards] committee shall give due consideration to the work of the drafting team, as well as the comments of stakeholders and minority objections, in approving a proposed regional reliability standard for submittal to the [Regional Entity Name] board. The [standards] committee may vote to approve or not approve the standard. Alternatively, the [standards] committee may remand the standard to the drafting team for further work or form a new drafting team for that purpose.

[Alternative 17B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

The Midwest Reliability Organization registered ballot body shall be able to vote on the proposed standard during a period of not less than 10 days.

COMMON ATTRIBUTE 18

[Alternative 18A: For an RE that chooses to vote using a balanced stakeholder committee.] Not Applicable

The [standards] committee may not itself modify the standard without issuing a new notice to stakeholders regarding a vote of the modified standard.

[Alternative 18B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

All members of Midwest Reliability Organization are eligible to participate in voting on proposed new standards, standard revisions or standard deletions. [Alternatively: Each standard action requires formation of a ballot pool of interested members of the registered ballot body.]

COMMON ATTRIBUTE 19

[Alternative 19A: For an RE that chooses to vote using a balanced stakeholder committee.]

Actions by the committee shall be recorded in the regular minutes of the committee.

[Alternative 19B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

Approval of the proposed regional reliability standard shall require a two thirds majority in the affirmative (affirmative votes divided by the sum of affirmative and negative votes). Abstentions and non-responses shall not count toward the results, except that abstentions may be used in the determination of a quorum. A quorum shall mean 66.7% of the members of the [registered ballot body/ballot pool] submitted a ballot.

COMMON ATTRIBUTE 20

Under no circumstances may the board substantively modify the proposed regional reliability standard.

COMMON ATTRIBUTE 21

Once a regional reliability standard is approved by the board, the standard will be submitted to NERC for approval and filing with FERC

COMMON ATTRIBUTE 22

- **Open** - Participation in the development of a regional reliability standard shall be open to all organizations that are directly and materially affected by the Midwest Reliability

Organization power system reliability. There shall be no undue financial barriers to participation. Participation shall not be conditioned upon membership in Midwest Reliability Organization, and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements. Meetings of drafting teams shall be open to the Midwest Reliability Organization members and others.

COMMON ATTRIBUTE 23

- **Balanced** - The Midwest Reliability Organization standards development process strives to have an appropriate balance of interests and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter.

COMMON ATTRIBUTE 24

- **Inclusive** — Any entity (person, organization, company, government agency, individual, etc.) with a direct and material interest in the bulk power system in the Midwest Reliability Organization area shall have a right to participate by: a) expressing a position and its basis, b) having that position considered, and c) having the right to appeal.

COMMON ATTRIBUTE 25

- **Fair due process** — The regional reliability standards development procedure shall provide for reasonable notice and opportunity for public comment. At a minimum, the procedure shall include public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of interested stakeholders.

COMMON ATTRIBUTE 26

- **Transparent** — All actions material to the development of regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the regional entity's Web site.

COMMON ATTRIBUTE 27

- Does not unnecessarily delay development of the proposed reliability standard.

COMMON ATTRIBUTE 28

Each standard shall enable or support one or more of the reliability principles, thereby ensuring that each standard serves a purpose in support of the reliability of the regional bulk power system. Each standard shall also be consistent with all of the reliability principles, thereby ensuring that no standard undermines reliability through an unintended consequence.

COMMON ATTRIBUTE 29

While reliability standards are intended to promote reliability, they must at the same time accommodate competitive electricity markets. Reliability is a necessity for electricity markets, and robust electricity markets can support reliability. Recognizing that bulk power system reliability and electricity markets are inseparable and mutually interdependent, all regional reliability standards shall be consistent with NERC’s market interface principles. Consideration of the market interface principles is intended to ensure that standards are written such that they achieve their reliability objective without causing undue restrictions or adverse impacts on competitive electricity markets.

COMMON ATTRIBUTE 30

To ensure uniformity of regional reliability standards, a regional reliability standard shall consist of the elements identified in this section of the procedure. These elements are intended to apply a systematic discipline in the development and revision of standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

COMMON ATTRIBUTE 31

All mandatory requirements of a regional reliability standard shall be within the standard. Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself.

COMMON ATTRIBUTE 32

Applicability	Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions. If not applicable to the entire Midwest Reliability Organization area, then a clear identification of the portion of the bulk power system to which the standard applies. Any limitation on the applicability of the standard based on electric facility requirements should be described.
----------------------	--

COMMON ATTRIBUTE 33

Measure(s)	Each requirement shall be addressed by one or more measures. Measures are used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure will identify to whom the measure applies and the expected level of performance or outcomes
-------------------	--

	<p>required demonstrating compliance. Each measure shall be tangible, practical, and as objective as is practical. It is important to realize that measures are proxies to assess required performance or outcomes. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.</p>
--	--

COMMON ATTRIBUTE 34

<p>Compliance Monitoring Process</p>	<p>Defines for each measure:</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible for providing the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes. • The entity that is responsible for evaluating data or information to assess performance or outcomes. • The time period in which performance or outcomes is measured, evaluated, and then reset. • Measurement data retention requirements and assignment of responsibility for data archiving.

I. Introduction

Purpose: This manual defines the characteristics of a Midwest Reliability Organization (“MRO”) Regional Reliability Standard and establishes the process for proposing Regional Reliability Standards to North American Electric Reliability Corporation (“NERC”) for enforcement under direct or delegated regulatory authority consistent with the Energy Policy Act of 2005 (“EPAAct 2005”) in the United States and applicable Canadian authorities. The MRO plans to become a Cross-Border Regional Entity (“CBRE”) as defined in EPAAct 2005 and the final FERC reliability rule consistent with the US-Canadian Bilateral principles. For more information on the MRO please refer to <http://www.midwestreliability.org>.

The MRO standards process is consensus-based, technically vetted, and open to the public and bordering entities that may be impacted by a proposed Regional Reliability Standard by the MRO. MRO Regional Reliability Standards apply to the reliability planning, and operation of bulk power systems located within the MRO region. NERC as the Electric Reliability Organization (“ERO”), and the applicable regulatory authorities in the United States and Canada will have the ability to enforce these standards. The MRO region is defined in agreements (e.g. delegation agreement) with NERC and applicable regulatory authorities in the United States and Canada.

Applicable Regulatory Authorities in the United States and Canada: FERC is the Applicable Regulatory Authority in the United States. The Manitoba Public Utilities Board is the Applicable Regulatory Authority in Manitoba. The Provincial Government of Saskatchewan is the Applicable Regulatory Authority in Saskatchewan.

Authority: This manual is published by the authority of the MRO Board of Directors (“BOD”) who shall have the sole authority to modify the manual. A procedure for revising this manual is provided in the section titled “Maintenance of MRO Regional Reliability Standards and Process.”

Credits: This manual was developed from the NERC Reliability Standards Development Procedure (available at www.nerc.com). Thus, the MRO Regional Reliability Standards process is very similar to the NERC process and the format is the same as the NERC Reliability Standard format.

Background: NERC and the MRO work with all segments of the electric industry, including electricity end-users, to develop standards for the reliable planning and operation of bulk electric systems. The purpose of the NERC Reliability Standards is to promote reliability, while at the same time accommodating competitive electricity markets.

EPAAct 2005 and NERC, ERO provide for Regional Entities (“RE”) to propose Regional Reliability Standards to NERC for eventual enforcement within the region of the RE or CBRE. Regions (such as the MRO) may develop, through

their own processes, regional reliability standards that; go beyond, add detail to, or cover matters not addressed in NERC Reliability Standards. MRO Regional Reliability Standards are proposed to NERC for approval and become enforceable, once approved by NERC and the applicable regulatory authorities in the United States and Canada as Reliability Standards.

MRO Regional Reliability Standards that are proposed shall not be inconsistent with, or less stringent than established NERC Reliability Standards. All MRO Regional Reliability Standards obligate the MRO to monitor and enforce compliance, apply sanctions, if any, consistent with any regional agreements and the NERC rules.

Proposed MRO Regional Reliability Standards shall be subject to approval by NERC, as the ERO, and by applicable regulatory authorities in the United States and Canada, before becoming mandatory and enforceable. No Regional Reliability Standard shall be effective within the MRO area unless approved by NERC and the applicable regulatory authorities in the United States and Canada.

MRO proposed Regional Reliability Standards, when approved by NERC and the applicable regulatory authorities in the United States and Canada, shall be made part of the body of NERC Reliability Standards and shall be enforced upon all applicable bulk power system owners, operators, and users within the MRO region as defined in agreements (e.g. delegation agreements).

II. MRO Regional Reliability Standard Definition, Characteristics, and Elements

Definition of a MRO Regional Reliability Standard: A MRO Regional Reliability Standard defines certain obligations or requirements of entities that operate, plan, and use the bulk electric systems of the MRO region.

The Bylaws of the MRO define a Reliability Standard as: “a NERC requirement, duly in effect, to provide for reliable operation of the Bulk-Power System. The term includes requirements for the operation of existing Bulk-Power System facilities, including cybersecurity protection, and the design of planned additions or modifications to such facilities to the extent necessary to provide for reliable operation of the Bulk-Power System. The term does not include any requirement to enlarge such facilities or to construct new transmission capacity or generation capacity.”

When proposing a Regional Reliability Standard in the MRO region, the obligations or requirements must be material to reliability and be measurable.

Each MRO Regional Reliability Standard shall enable or support one or more of the NERC reliability principles, thereby ensuring that each standard serves

a purpose in support of the reliability of the regional bulk power system. Each of those standards shall also be consistent with all of the NERC reliability principles, thereby ensuring that no standard undermines reliability through an unintended consequence.

While MRO Regional Reliability Standards are intended to promote reliability, they must at the same time accommodate electricity markets. Reliability is a necessity for electricity markets, and robust electricity markets can support reliability. Recognizing that bulk power system reliability and electricity markets are inseparable and mutually interdependent, all MRO Regional Reliability Standards shall be consistent with NERC's market interface principles. Consideration of the market interface principles is intended to ensure that standards are written such that they achieve their reliability objective without causing undue restrictions or adverse impacts on electricity markets.

Characteristics of a MRO Regional Reliability Standard: A MRO Regional Reliability Standard may include standards for the operation and planning of interconnected systems as well as market interface practices. The format and process defined by this manual applies to all MRO Regional Reliability Standards.

A MRO Regional Reliability Standard shall have the following characteristics:

- **Material to Reliability** - A MRO Regional Reliability Standard shall be material to the reliability of bulk electric systems in the MRO region. If the reliability of the bulk electric systems could be compromised without a particular standard or by a failure to comply with that standard, then the standard is material to reliability.
- **Measurable** - A MRO Regional Reliability Standard shall establish technical or performance requirements that can be practically measured.
- **Relative to NERC Reliability Standards** - A MRO Regional Reliability Standard shall go beyond, add detail to, or cover matters not addressed in already approved NERC Reliability Standards.

Elements of a MRO Regional Reliability Standard: A MRO Regional Reliability Standard shall consist of the elements shown in the MRO Regional Reliability Standard Template.

These elements are intended to apply a systematic discipline in the development and revision of MRO Regional Reliability Standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

The format allows a clear statement of the purpose, requirements, measures, and penalties for non-compliance associated with each standard.

All mandatory requirements of a MRO Regional Reliability Standard shall be within an element of the standard.

Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself. Types of supporting documents are described in a later section of this manual.

MRO Regional Reliability Standard Template

The following are the core elements of a MRO Regional Reliability Standard

Identification Number	A unique identification number assigned by the SPM.
Title	A brief, descriptive phrase identifying the topic of the MRO Regional Reliability Standard.
Applicability	Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions.
Effective Date and Status	The effective date of the MRO Regional Reliability Standard shall be upon NERC and regulatory approvals. The status of the standard will be indicated as active or by reference to one of the numbered steps in the standards process.
Purpose	The purpose of the MRO Regional Reliability Standard shall explicitly state what outcome will be achieved by the approved Reliability Standard. The purpose is agreed to early in the process as a step toward obtaining approval to proceed with the development of the Reliability Standard. The purpose should link the standard to the relevant principle(s).
Requirement(s)	Explicitly stated technical, performance, preparedness, or certification requirements. Each requirement identifies who is responsible and what action is to be performed or what outcome is to be achieved. Each statement in the requirements section shall be a statement for which compliance is mandatory. Any additional comments or statements for which compliance is not mandatory, such as background or explanatory information, should be placed in a separate document and referenced (see Supporting References).

<p>Risk Factors</p>	<p>The potential reliability significance of each requirement, designated as a High, Medium, or Lower Risk Factor in accordance with the criteria listed below:</p> <p>A High Risk Factor requirement (a) is one that, if violated, could directly cause or contribute to bulk power system instability, separation, or a cascading sequence of failures, or could place the bulk power system at an unacceptable risk of instability, separation, or cascading failures; or (b) is a requirement in a planning timeframe that, if violated, could, under emergency, abnormal, or restorative conditions anticipated by the preparations, directly cause or contribute to bulk power system instability, separation, or a cascading sequence of failures, or could place the bulk power system at an unacceptable risk of instability, separation, or cascading failures, or could hinder restoration to a normal condition.</p> <p>A Medium Risk Factor requirement (a) is a requirement that, if violated, could directly affect the electrical state or the capability of the bulk power system, or the ability to effectively monitor and control the bulk power system, but is unlikely to lead to bulk power system instability, separation, or cascading failures; or (b) is a requirement in a planning timeframe that, if violated, could, under emergency, abnormal, or restorative conditions anticipated by the preparations, directly affect the electrical state or capability of the bulk power system, or the ability to effectively monitor, control, or restore the bulk power system, but is unlikely, under emergency, abnormal, or restoration conditions anticipated by the preparations, to lead to bulk power system instability, separation, or cascading failures, nor to hinder restoration to a normal condition.</p> <p>A Lower Risk Factor requirement is administrative in nature and (a) is a requirement that, if violated, would not be expected to affect the electrical state or capability of the bulk power system, or the ability to effectively monitor and control the bulk power system; or (b) is a requirement in a planning time frame that, if violated, would not, under the emergency, abnormal, or restorative conditions anticipated by the preparations, be expected to affect the electrical state or capability of the bulk power system, or the ability to effectively monitor, control, or restore the bulk power system.</p>
----------------------------	--

Measure(s)	<p>Each requirement shall be addressed by one or more measures. These measures will be used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above.</p> <p>Each measure shall identify to whom the measurement applies and the expected level of performance or outcomes required demonstrating compliance.</p> <p>Each measure shall be tangible, practical, and as objective as is practical.</p> <p>It is important to realize that measures are proxies to assess required performance or outcomes.</p> <p>Achieving the full compliance level of each measurement should be a necessary and sufficient indicator that the requirement was met.</p> <p>Each measure shall clearly refer to the requirement(s) to which it applies.</p>
-------------------	---

Glossary of Terms Used in Standards

Definitions of Terms:	<p>All defined terms used in MRO Regional Reliability Standards, shall be defined in the glossary. Definitions may be approved as part of a standards action or as a separate action. All definitions must be approved in accordance with the standards process.</p>
------------------------------	--

Compliance Administration Elements

Compliance Monitoring Process	<p>The following compliance elements, which are part of the standard and are balloted with the standard are developed for each measure in a standard by the NERC compliance program in coordination with the standard drafting team</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible for providing the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes • The entity that is responsible for evaluating such data or information. • The time period in which performance or outcomes is measured, evaluated, and then reset.
--------------------------------------	---

	<ul style="list-style-type: none"> • Measurement data retention requirements and assignment of responsibility for data archiving.
Violation Severity Levels	Defines the degree to which compliance with a requirement was not achieved. The violation severity levels, are part of the standard and are balloted with the standard, and developed by the MRO compliance program in coordination with the standard drafting team.

Supporting Information Elements

Interpretations	<p>Formal interpretations of Regional Reliability Standard(s) proposed by the MRO and approved by NERC, FERC, and the applicable Canadian regulatory authorities.</p> <p>Interpretations are temporary, as the standard should be revised to incorporate the interpretation.</p>
Implementation Plan	Each Regional Reliability Standard proposed by the MRO and approved by NERC, FERC and the applicable Canadian regulatory authorities shall have an associated implementation plan describing the effective date of the standard or effective dates if there is a phased implementation. The implementation plan may also describe the implementation of the standard in the compliance program and other considerations in the initial use of the standard, such as necessary tools, training, etc. The implementation plan must be posted for at least one public comment period and is approved as part of the ballot of the standard.
Supporting References	<p>This section will reference related documents that support implementation of the Reliability Standard proposed by the MRO and approved by NERC and the regulatory authorities, but are not themselves mandatory. Examples include, but are not limited to:</p> <ul style="list-style-type: none"> • Developmental history of the standard and prior versions • Notes pertaining to implementation or compliance • Standard references • Standard supplements • Procedures • Practices • Training references • Technical references • White papers • Internet links to related information

III. Roles in the MRO Regional Reliability Standards Development Process

Nomination, Revision or Withdrawal of a Standard: Any member of the MRO or group within the MRO region shall be allowed to request that a MRO Regional Reliability Standard be developed, modified, or withdrawn. Additionally, any person (organization, company, government agency, individual, etc.) who is directly and materially affected by the reliability of MRO bulk power system shall be allowed to request that a MRO Regional Reliability Standard be developed, modified, or withdrawn.

Process Roles

Board of Directors (BOD) - The BOD shall consider MRO Regional Reliability Standards that have been approved by the Registered Ballot Body ("RBB") to be proposed to NERC and the regulatory authorities for enforcement consistent with direct or delegated regulatory authorities of the MRO. Once the proposed MRO Regional Reliability Standard is approved by NERC and the regulatory authorities, it becomes effective in the MRO region consistent with the MRO's direct or delegated regulatory authority.

Compliance Committee (CC) - The mission of the MRO CC is to assure that the compliance program and policies are followed according to the rules and carried out in a non-discriminatory manner, subject to the BOD approval with MRO staff and BOD oversight. The compliance program is designed around compliance with Reliability Standards. The development of a MRO Regional Reliability Standard, in particular the measures and compliance administration portions of the standard, shall have direct input from the CC. Field-testing will be managed and coordinated with the CC. The Compliance Manager (CM), a MRO staff function, and the CC shall provide input and comments during the standards development process to ensure the measures will be effective and other aspects of the compliance program practically implemented.

Standards Committee (SC) -The responsibilities of the SC will include: management of the standards work flow so as not to overwhelm available resources, review of standards authorization requests and draft standards for such factors as completeness, sufficient detail, rational result, and compatibility with existing standards; clarifying standard development issues not specified in this procedure; and advising the BOD on standard development matters. Under no circumstance will the SC change the substance of a draft standard. The SC shall advise the BOD on MRO Regional Reliability Standards presented for their consideration in determining whether to propose such Reliability Standard to NERC.

Standards Process Manager (SPM) – This is a MRO staff function. The Standards Manager who will act as the SPM shall administer the MRO Regional Reliability Standards Process. The SPM is responsible for ensuring

that the development and revision of standards is in accordance with this manual. The SPM works to ensure the integrity of the process and consistency of quality and completeness of the MRO Regional Reliability Standards. The SPM facilitates all steps in the process.

Standards Process Staff - MRO staff will assist the SC, SPM, Requester, and Standard Drafting Team (SDT).

Registered Ballot Body (RBB) - The RBB comprises all entities that:

1. qualify for one of the Industry Segments approved by the BOD¹, and
2. are registered in the MRO RBB, and
3. are current with any MRO related designated fees associated with this program. Designated fees are defined as fees associated with the Standards Development process. At this time there are no fees for registration.

Each voter must be a member of the RBB. **Note: An individual's membership in the RBB will be in a "Pending" stage immediately following registration; in order to be able to vote, your registration must be activated, and activation may take up to 24 hours.**

Each registered member of the RBB is eligible to participate in the voting process for each Standards Action (add, change or withdraw). However, each MRO RBB member (company) may have only one vote per eligible segment.

The RBB will ensure, through its vote, the need for and the technical merits of, a proposed Standards Action and the appropriate consideration of views and objections received during the development process. The RBB votes to approve each Standards Action.

The MRO Regional Reliability Standards Process relies on open and inclusive participation by the electric utility industry and the interested public. Participation and voting is open to non-members of the MRO; at this time there are no fees for participation or voting.

Requester - A Requester is any person or entity (organization, company, government agency, etc.) that submits a complete request for development, revision, or withdrawal of a standard. Any person or entity that is directly and materially affected by an existing standard or the need for a new standard may submit a completed Standard Authorization Request (SAR) for any of the three following actions; a new standard to be developed, a revision to an existing standard, or a withdrawal of an existing standard.

¹ Appendix C contains a description of the latest version of the Industry Segments approved by the Board of Directors.

SAR Drafting Team - A team of technical experts assigned by the SC, that:

- assists in refining the SAR,
- considers and responds to comments, and
- participates in industry forums to help build consensus on the SAR.

SDT - A small team (5-10 people) of technical experts, approved by the SC, that:

- develops the details of the standard
- considers and responds to comments
- participates in industry or regional forums to help build consensus on posted draft standards

Sub-Regional Variance: An aspect of a Reliability Standard (one that is proposed for the MRO region for enforceability) that applies only within a particular regional entity sub-region. A Sub-Regional Variance may be used to exempt a group of entities within the MRO region from all or a portion of a Reliability Standard or may establish different measures or performance criteria as necessary to achieve reliability within the particular group of entities within the region. A Sub-Regional Variance may not be inconsistent with the Reliability Standard as it would otherwise exist without the variance. A Sub-regional variance cannot establish a level of reliability less than that set by a continent-wide Reliability Standard and such a variance would only exempt a group of entities from a MRO Reliability Standard. Such a variance may be proposed by a group of sub-regional entities and, if approved by NERC and regulatory authorities, shall be enforced within the MRO region pursuant to its delegated authority.

IV. MRO Regional Reliability Standards Consensus Development Process

Overview

The process for development of MRO Regional Reliability Standards to be proposed to NERC and regulatory authorities for approval and eventual enforcement under direct or delegated authority is illustrated in the Process Diagram in Appendix A and has the following characteristics:

- **Inclusive** – Any entity (person, organization, company, government agency, individual, etc.) with a direct material interest in the bulk power system in the MRO area shall have a right to participate by: a) expressing a position and its basis, b) having that position considered, and c) having the right to appeal.
- **Openness** - Participation is open to all persons who are directly and materially affected by the reliability of the MRO region bulk power

system. There shall be no undue financial barriers to participation. Participation shall not be conditional upon membership in the MRO or any organization, and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements.

- **Balance** - The MRO Regional Reliability Standards Development Process shall have a balance of interests and shall not be dominated by any two, interest categories and no single interest category shall be able to defeat a matter.
- **Transparent** - All actions material to the development of MRO regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the MRO Web site.
- **Timeliness** - The MRO Regional Reliability Standards Development Process does not unnecessarily delay development of the proposed reliability standard.
- **Fair Due Process** - The MRO Regional Reliability Standards Development Process provides for reasonable notice and opportunity for public comment. The procedure includes public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of all persons who are directly and materially affected.

The MRO Regional Reliability Standards development process is intended to develop consensus, first on the need for the standard, then on the standard itself. The process includes the following key elements:

- **Nomination of a proposed standard, revision to a standard, or withdrawal of a standard** using a Standard Authorization Request ("SAR").
- **Public posting of the SAR** to allow all parties to review and provide comments on the need for the proposed standard and the expected outcomes and impacts from implementing the proposed standard. Notice of standards shall provide an opportunity for participation by all directly and materially affected persons.
- **Review of the public comments** in response to the SAR and prioritization of proposed standards, leading to the authorization to develop standards for which there is a consensus-based need.
- **Assignment of teams** to draft the new or revised standard.
- **Drafting of the standard.**

- **Public posting of the draft standard** to allow all parties to review and provide comments on the draft standard. At this point the need for the standard has been established and comments should focus on aspects of the draft standard itself.
- **Field testing of the draft standard and measures:** The need and extent of recommendations for field testing shall be determined by the SDT and submitted through the SPM to the SC for approval. The SDT shall request input from the RAC and CC members.
 - Field-testing may be region-wide or may consist of one or more, lesser scale demonstrations, evaluations, or other SC approved methods.
 - Field-testing should be cost effective and practical, yet sufficient to validate the requirements, measures, measurement processes and other elements of the standard necessary to implement the Compliance Program.
 - For some standards and their associated measures, field-testing may not be appropriate, such as those measures that consist of administrative reports.
- **Formal balloting of the standard** for approval by the RBB.
- **Re-ballot to consider specific comments** by those submitting comments with negative votes.
- **Approval of a MRO Regional Reliability Standard.**
- **Appeals mechanism** as appropriate for the impartial handling of substantive and procedural complaints regarding action or inaction related to the standards process.

Process Steps

The first three steps in the MRO Regional Reliability Standards Development Process serve to establish consensus on the need for the standard.

Step 1 - Request to Develop a Standard or Revise an Existing Standard

Objective: A valid SAR that clearly justifies the purpose for, and describes the scope of, the proposed standards action. An example of a SAR form can be found in Appendix B.

Sequence Considerations: Submitting a valid SAR is the first step in proposing a standard action. A requester may prepare a draft of the

proposed standard (Step 5), which the SC may authorize for concurrent posting with the SAR. This could be useful for a standard action with a clearly defined and limited scope or one for which stakeholder consensus on the need and scope is likely. Complex standards where broad debate of issues is required should be, presented in two stages. The first stage is, the completion of a valid SAR to get agreement on the scope and purpose, the second stage is the development of the standard later in Step 6.

Requests to develop, revise, or withdraw² a MRO Regional Reliability Standard shall be submitted to the SPM by completing a SAR.

The SAR is a description of the subject matter of the new or revised standard along with a proposed implementation plan and includes:

- Descriptive detail to clearly define the scope of the standard.
- A statement of the purpose of the standard
- A needs statement that provides justification for the development or revision of the standard; including an assessment of the reliability and market interface impacts of implementing or not implementing the standard.

Appendix B provides a sample template of the SAR form.

The SPM shall maintain the SAR form and make it available electronically.

Any person or entity directly or materially affected by an existing standard or the need for a new or revised standard may initiate a SAR.

The Requester shall submit the SAR to the SPM electronically through the RSVP application and the SPM shall electronically acknowledge receipt of the SAR within 15 days. The SPM shall send the electronic acknowledgement simultaneously to the Requester and to NERC.

The SPM shall assist the Requester in developing the SAR, reviewing NERC Reliability Standards to see whether they already address the need, identify issues with interconnected regions, and verify that the SAR complies with this manual.

The SPM shall forward all properly completed SARs to the SC. The SC shall meet at established intervals to review all pending SARs. The frequency of the review process will depend on workload; in no case shall a properly completed SAR wait for SC action more than 60 days from the date of receipt.

² Actions in the remaining steps of the standards process apply to proposed new standards, revisions to existing standards, or withdrawal of existing standards, unless explicitly stated otherwise.

The SC may take one of the following actions:

- Remand the SAR back to the SPM for additional work and information from the Requester.
- Accept the SAR as a candidate for a new or revised standard. If the SC accepts a SAR as a candidate for a new or revised standard, it will provide technical support and analysis of comments for that SAR, and assist the Requester and the SPM in the remaining steps of the process.
- Reject the SAR. If the SC rejects a SAR, it will provide a written explanation for rejection to the Requester within 30 days of the rejection decision. If the SC rejects a SAR, the Requester may file an appeal following the Appeals Process.

The status of SAR shall be tracked electronically by the SPM. The SAR and its status shall be posted for public viewing including any actions or decisions.

Step 2 - Solicit Public Comments on the SAR

Objective: Establish that there is stakeholder consensus on the need, scope and applicability of the requester's proposed standards' action.

Sequence Considerations: A SAR may be posted only after completion of Step 1. A SAR may at the discretion of the SC, be posted for comment concurrently with a draft standard (Step 6).

Once a SAR has been accepted by the SC as a candidate for the development of a new or revised standard, the SPM shall post the SAR on the RSVP Application for the purpose of soliciting public comments.

The SPM shall notify the RBB, the MRO region, NERC, and other interested parties that the SAR has been accepted by the SC and posted for comment.

Within thirty (30) days of acceptance by the SC, the SAR shall be posted electronically and comments on the SAR(s) will be accepted for a 21-day period from the date of posting. Comments will be accepted on-line using the RSVP application. The SPM will provide a copy of the comments to the Requester. In addition, comments will be visible to the RBB during the commenting period. Based on the comments, the Requester may decide to: submit the SAR for authorization, withdraw the SAR, or revise and resubmit it to the SPM for another posting in the next available comment period.

The Requester shall give prompt consideration to the written views and objections of all participants. The Requester, with support from the SPM or SPM assigned staff, shall make an effort to resolve all expressed objections

and shall advise each objector of the disposition of the objection and the reasons therefore. In addition, the SPM shall inform each objector that an appeals process exists within the MRO standards process.

While there is no established limit on the number of times a SAR may be posted for comment, the SC retains the right to reverse its prior decision and reject a SAR if it believes continued revisions are not productive. Once again, the SC shall notify the Requester in writing of the rejection and the availability of the Appeals Process. During the SAR comment process, the Requester may become aware of potential sub-Regional differences (within the MRO) related to the proposed standard. To the extent possible, the Requester should make any sub-Regional differences or exceptions a part of the SAR so that, if the SAR is authorized, such variations will be made a part of the draft new or revised standard.

Step 3 - Authorization to Proceed With Drafting of a New or Revised Standard

Objective: Authorize development of a standard that is consistent with the SAR and for which there is stakeholder consensus on the need, scope and applicability.

Sequence Considerations: The SC may formally authorize the development of a standards' action only after due consideration of SAR comments to determine there is consensus on the need, scope and applicability of the proposed standard. This does not preclude, however, the requester from previously preparing a draft standard for consideration and the SC from authorizing a concurrent posting of the draft standard for comment along with the SAR.

After the public provides comments on the SAR, the Requester may decide to submit the SAR to the SC for authorization to draft the standard. The SC reviews the comments received in response to the SAR and any revisions to the SAR. The SC, considering the public comments received and their resolution, may then take one of the following actions:

- Authorize the drafting of the proposed standard or revisions to a standard.
- Reject the SAR with a written explanation to the Requester and post that explanation.

If the SC rejects a SAR, the Requester may file an appeal.

Step 4 – Formation of the SDT

Objective: Appoint a SDT that has the expertise, competencies, and diversity of views that are necessary to develop the standard.

Sequence Considerations: The SC may appoint a SDT concurrently with or after authorization of the development of a standard (Step 3).

For each new SAR, the SPM shall post a request that interested parties complete a "SDT Self-Nomination" form utilizing the RSVP application. Those individuals who complete and submit these self-nomination forms through the RSVP will be considered for appointment to the associated SDT.

Once a SAR has been authorized by the SC to proceed to the drafting stage, the SC shall assign the development of the standard to a SDT. The SPM shall recommend a list of candidates for appointment to the team and shall submit the list to the SC. The SC may accept the recommendations of the SPM or may select other individuals to serve on the SDT within 60 days.

The SDT shall elect a Chairman for their team. This team shall consist of a small group of people who collectively have the necessary technical expertise and work process skills. A representative of the CC or their designee, plus a Reliability Assessment Committee (RAC) representative or their designee should be included as a member of each SDT.

The SPM shall assign MRO Standards Process staff personnel to assist in the drafting of the standard.

Step 5 - Draft New or Revised Standard

Objective: Develop a standard within the scope of the SAR.

Sequence Considerations: Development of the draft standard follows the authorization by the SC (Step 3) and appointment of a SDT (Step 4). Steps 5 and 6 may be iterated as necessary to consider stakeholder comments and build consensus on the draft standard.

The drafting team shall develop a work plan for completing the regional reliability standard, including the establishment of a milestone schedule for completing critical elements of the work in sufficient detail to ensure that the drafting team will meet the objectives established by the SC. The drafting team shall submit its work plan to the SC for its concurrence.

The drafting team shall convene periodically, either in person or by electronic means as necessary, to establish work teams (made up of members of the drafting team) as necessary, and perform other activities to complete the proposed standard within the milestone date(s) agreed upon by the SC.

The work product of the drafting team will consist of the following:

- A draft standard consistent with the standard request on which it was based.

- An assessment of the reliability impact of the standard request within the region and in neighboring regions, including appropriate input from the neighboring regions if the standard request is determined to impact any neighboring region.
- An implementation plan, including the nature, extent and duration of field-testing needed, if any.
- Identification of any existing standard that will be deleted, in part or whole, or otherwise impacted by the implementation of the draft standard.
- Technical reports, white papers and/or work papers that provide technical support for the draft standard under consideration.

The team regularly (at frequency determined by the SC) shall inform the SC of its progress in meeting a timely completion of the draft standard.

The drafting of measures and compliance administration aspects of the standard will be coordinated with the CC.

If the SDT determines that the scope of the SAR is inappropriate based on its own work and stakeholder comments, the team shall notify the SC. The SDT may recommend the scope of the standard be reduced to allow the effort to continue forward, while still remaining within the scope of the SAR. Reducing the scope defined in the SAR is acceptable if the SDT finds, for instance, that additional technical research is needed prior to developing a portion of the standard or issues need to be resolved before consensus can be achieved on a portion of the standard. In this case, the SDT shall provide detailed justification of need for reducing the scope. The SC, based on the SDT recommendation and a review of stakeholder comments, will determine if the change in scope is acceptable.

If the SDT determines it is necessary to expand the scope of the standard or to modify the scope in a way that is no longer consistent with the scope defined in the SAR, then the SDT may initiate or recommend another requester initiate a new SAR (Step 1) to develop the expanded or modified scope. At no time will a SDT develop a standard that is not within the scope of the SAR that was authorized for development.

If the SDT elects to narrow the SAR, scope or identifies issues not in the SAR scope, then a report shall be prepared and sent to the SC.

Once the standard has been drafted, the SPM shall review the standard for consistency of quality and completeness. The SPM shall also ensure the draft standard is within the scope and purpose identified in the SAR. This review shall occur within a 15-day period.

The SPM shall post the new or revised standard for public comment once this review is completed. The SPM shall notify the RBB, the MRO region, NERC, and other interested parties that the new or revised standard has been posted for public comment.

Step 6 - Solicit Public Comments on Draft Standard

Objective: Receive stakeholder inputs on the draft standard for the purpose of assessing consensus on the draft standard, and modifying the draft standard as needed to achieve consensus.

Sequence Considerations: The posting of a draft standard will occur after the appointment of a SDT and development of a draft by the team. Alternatively, a draft standard submitted by the requester may be posted for comment concurrently with the associated SAR, with the condition that the SAR and draft standard meet the requirements of this procedure and are consistent with each other. In all cases, public comments on the draft standard shall be solicited prior to the SC approving the standard going to ballot (Step 9).

Once a draft standard has been verified by the SPM to be within the scope and purpose of the SAR and in compliance with this manual, the SPM will post the draft standard. The posting of the draft standard will be linked to the SAR for reference. Comments on the draft standard will be accepted for a 30-day period from the notice of posting. Comments will be accepted on-line using the RSVP application and will be viewable during the posted commenting period.

Since the need for the standard was established by authorization of the SAR, comments at this stage should identify specific issues with the draft standard and propose alternative language. The comments may include recommendations to accept or reject the standards and reasons for that recommendation.

The SDT shall develop an implementation plan for the standard that will be posted in conjunction with the standard for at least one stakeholder comment period. Once the implementation plan has been developed and posted for stakeholder comment, it shall remain part of the standard action for subsequent postings and shall be included on the ballot for the standard. The implementation plan shall describe when the standard will become effective. If the implementation is to be phased, the plan will describe which elements of the standard are to be applied to each class of responsible entities, and when. The plan will describe any deployment considerations unique to the standard, such as computer applications, measurement devices, databases, or training, as well as any other special steps necessary to prepare for and initially implement the standard.

Step 7 - Field Testing

Objective: Determine what testing is required to validate the concepts, requirements, measures and compliance elements of the standard and implement that testing.

Sequence Considerations: Testing may be completed during or after Steps 1 through 6. Testing and associated analysis of results (Step 8) must be completed prior to determining whether to submit the standard to ballot (Step 9).

Taking into consideration stakeholder comments received through Step 6, the SDT may recommend to the SC that a test of one or more aspects of a standard is needed. The MRO Compliance Manager will also evaluate whether field-testing of the compliance elements of the proposed new or revised standard is needed and advise the SC. The SC will approve all field tests of proposed standards based on the recommendations of the SDT and the compliance manager. If needed, the SC will also request inputs on technical matters from applicable standing committees or other experts.

Once the field-testing plan is approved, the SPM will, under the direction of the SC, oversee the field-testing of the standard.

In some cases, measurement may be an administrative task and no field-testing is required at all.

In other cases, one or more limited scale demonstrations, evaluations, or other SC approved method may be sufficient.

Step 8 - Analysis of the Comments and Field Test Results

Objective: Evaluate stakeholder comments and field test results to determine if there is consensus that the proposed standard should go to ballot or requires additional work.

Sequence Considerations: This step follows Steps 6 and 7 and must precede Step 9.

The SPM will assemble the comments on the draft standard and distribute those comments to the SDT and the requester. The SDT, assisted by the requester, shall give prompt consideration to the written views and objections of all participants. An effort to resolve all expressed objections shall be made, and each objector shall be advised of the disposition of the objection and the reasons therefore. The STD shall prepare a summary of the comments received and the changes made to the proposed standard as a result of these comments. The STD shall summarize comments that were rejected by the STD and the reason(s) that these comments were rejected, in part or whole. The summary, along with a response to each comment received will be posted on the MRO website no later than the next posting of the proposed standard. In addition, each objector will be informed that an appeals process exists within the MRO standards process.

Based on comments received, the SDT may determine there is an opportunity to achieve consensus for the standard. In this case, the SDT may elect to return to Step 5 and revise the draft for another posting. Although there is no predetermined limit on the number of times a draft standard may be revised and posted, the SDT should ensure the potential benefits of another posting outweigh the burden on the SDT and stakeholders. Returning to Step 5 to continue working on the standard is the prerogative of the SDT, subject to SC oversight.

If the SDT determines the draft standard is ready for ballot, the SDT shall submit the draft standard to the SC with a request to proceed to balloting, along with the comments received and responses to the comments. Based on the comments received and field-testing, the SDT may include revisions that are not substantive. Substantive changes to a draft standard shall not be permitted between the last posting for stakeholder comment and submittal for ballot. A substantive change is one that directly and materially affects the intent or use of the standard. For example, adding, deleting, or revising requirements; or adding, deleting, or revising measurements for which compliance is mandatory. Any non-substantive changes such as: spelling, grammar, or formatting, made prior to going to ballot, will be identified to stakeholders at the time of the ballot notice. If the SDT determines, based on comments received, that substantive changes to the standard are required, the standard will be re-posted for comment and a notice sent to the MRO region, the RBB, NERC, and other interested parties that the revised standard has been re-posted for public comment.

When the SC receives a draft standard that has been recommended for ballot, the SC will review the standard to ensure that the proposed standard is consistent with the scope of the SAR; addresses all of the objectives cited in Steps 1-8, as applicable; and is compatible with other existing standards. If the proposed standard does not pass this review, the SC shall remand the

proposed standard to the SDT to address the deficiencies. If the proposed standard passes the review, the SC shall set the proposed standard for ballot as soon as the workflow will accommodate.

If the SDT determines there is insufficient consensus to ballot the standard and that further work is unlikely to achieve consensus, the SDT may recommend to the SC that the standard drafting be terminated and the SAR withdrawn. The SC will consider the recommendation of the SDT and stakeholder comments and may terminate the standard drafting and accept the withdrawal of the SAR. If the SC believes the recommendation is unsubstantiated, the SC may direct other actions consistent with this procedure, such as requesting the SDT to continue or appointing a new SDT.

Step 9 - Ballot the New or Revised Standard

Objective: Approve the proposed standard by vote of industry stakeholders.

Sequence Considerations: The SC shall determine that all requirements of Steps 1 through 8 have been satisfactorily met before authorizing an action to go to ballot.

If the SDT decides to submit the standard to a vote, the SPM shall provide notice of such to the RBB, NERC, as well as other interested parties, and electronically post the standard, and all comments received, the responses to those comments, and an implementation plan.

First Ballot

Each voter must be a member of the Registered Ballot Body (RBB). **Note: An individual's membership in the RBB will be in a "Pending" stage immediately following registration; in order to be able to vote, your registration must be activated, and activation may take up to 24 hours.**

The ballot will be conducted electronically through the RSVP application. All members of the RBB shall be eligible to vote on the associated standard except, that only one member from an entity may vote in any given segment. It is the responsibility of the entity to identify and notify the SPM of the eligible voter. The voting options are:

- Affirmative, with or without comment;
- Negative, with or without comment (the comments for a negative vote may be given and, if possible, should include specific wording or actions that would resolve the objection);
- Abstain.

The time window for voting shall be designated when the draft standard is posted. In no case shall the voting time window start sooner than fifteen

(15) and no later than thirty (30) days from the notice of the posting. The voting time window will be a period of ten (10) days.

This provides a minimum total of twenty-five (25)-days from the initial notice until the end of the voting period. Approval of a MRO Regional Reliability Standard or revision to a MRO Regional Reliability Standard requires:

- a quorum, which is established by at least 4 of the Segments submitting a response with an affirmative vote, a negative vote, or an abstention; and
- an affirmative vote from at least two-thirds of the segments participating in the vote. Each segment vote is determined by the majority of the votes cast in the segment, either affirmative or negative. Abstentions and non-responses will not be counted.

Voting results, comments, and responses, if necessary, will be posted for public viewing as soon as practical after the balloting period closes. Voting results and comments maybe posted prior to the responses.

Balloting examples are provided in Appendix D.

Members of the RBB should submit any comments on the proposed standard during the public comment period. If any Negative votes with comments are received during the ballot period, they shall be addressed in accordance with *Step 8* and included with the re-circulation ballot.

The SPM shall facilitate the SDT, assisted by the Requester, in preparing a response to negative votes submitted with comments.

In addition, the SPM will inform each objector that an appeals process exists within the MRO standards process. A negative vote that does not contain comments does not require a response. If there are no negative votes with comments from the first ballot, then the results of the first ballot shall stand. If however, one or more members submit negative votes with comments, regardless of whether those comments are resolved, a second ballot shall be conducted.

If a quorum of the Segments is not established, the standard shall be re-balloted, allowing ten (10) days for the ballot. If a quorum is not established with the re-ballot, the SPM shall survey the RBB to establish interest in participating in a ballot on the standard.

Second Ballot

In the second ballot (also called a “re-circulation ballot”), members of the RBB shall again be presented the proposed standard (unchanged from the first ballot) along with the reasons for negative votes, the responses, and any resolution of the differences.

All members of the RBB eligible to vote shall be permitted to reconsider and change their vote from the first ballot. Eligible voting members of the RBB that did not respond to the first ballot shall be permitted to vote in the second ballot. Only one vote will be accepted from each organization within a segment.

In the second ballot, votes will be counted by exception only - members on the second ballot may indicate a revision to their original vote, otherwise their vote shall remain the same as in the first ballot. If a second ballot is conducted, the results of the second ballot shall determine the status of the standard, regardless of the outcome of the first ballot.

The voting time window for the second ballot is ten (10) days (to allow members to review comments and responses). The 21-day posting is not required for the second ballot. Members of the RBB may submit comments in the second ballot but no response to those comments is required.

In the second ballot step no revisions to the standard are permitted, as such revisions would not have been subject to public comment. However, if the SC determines that revisions proposed during the ballot process would likely provide an opportunity to achieve consensus on the standard, then such revisions may be made and the draft standard posted for public comment again beginning with Step 6 and continuing with subsequent steps.

The SPM shall post the final outcome of the ballot process. If the standard is rejected, the process is ended and any further work in this area would require a new SAR. If the standard is approved, the SPM shall post the consensus standard and the SC Chair shall present it to the BOD for consideration.

Step 10 –Approval of a Proposed MRO Regional Reliability Standard

Objective: To have the BOD approve the proposed new or revised, MRO Regional Reliability Standard. Once properly approved by the BOD, accepted by NERC, and accepted for filing by the applicable regulatory authorities in the United States and Canada, the Reliability Standard becomes enforceable.

Sequence Considerations: The thirty (30)-day notice prior to action by the BOD may begin concurrently with or any time after the start of the first ballot. The thirty (30)-day period shall not end any sooner than the end of the final ballot.

A MRO Regional Reliability Standard submitted for consideration to the BOD must be publicly posted and noticed no less than fifteen (15) and no more than thirty (30) days prior to action by the BOD, included with the standard is the implementation plan that was part of the posting process.

At a regular or special meeting, the BOD shall consider the proposed MRO Regional Reliability Standard. The BOD shall consider the results of the balloting and dissenting opinions. The BOD shall consider any advice offered by the MRO SC. The BOD may accept or reject a standard, but may not modify a proposed MRO Regional Reliability Standard. If the BOD chooses not to propose a standard to NERC and the applicable regulatory authorities in the United States and Canada, it shall provide its reasons for not doing so. Upon acceptance of the standard, the SPM will submit the standard to NERC for approval and filing with the applicable regulatory authorities in the United States and Canada.

A MRO Regional Reliability Standard that is approved by NERC and filed with the applicable regulatory authorities shall become effective in accordance with applicable NERC and applicable regulatory proceedings. The implementation plan is included with the proposed Reliability Standard.

The SPM shall publicly post the standard, showing the final status.

Step 11 - Implementation of the MRO Regional Reliability Standard

Objective: That Organizations subject to the standard use the standard, and the compliance program incorporates the standard into its compliance monitoring and enforcement process.

Sequence Considerations: The effective date of a standard is defined in the standard implementation plan.

After approval of a MRO Regional Reliability Standard by the applicable authorities in the United States and Canada, the SPM will forward the standard to the Compliance Manager for implementation, enforcement, and monitoring by the CC which will oversee the implementation and assess the effectiveness.

V. Interpretations and Appeals

Interpretations of MRO Regional Reliability Standards

All persons who are directly and materially affected by the reliability of MRO bulk power systems shall be permitted to request an interpretation of a MRO Regional Reliability Standard. The person requesting an interpretation shall send a request to the SPM explaining the specific circumstances surrounding the request and what clarifications are required as applied to those circumstances. The request should indicate the material impact to the requesting party or others caused by the lack of clarity or a possibly incorrect interpretation of the standard. The SPM shall provide notice to the MRO region within ten business days of such a request for interpretation.

The SPM shall recommend a list of candidates with the relevant expertise for appointment to an interpretation team and shall submit the list to the SC.

As soon as practical (not more than 45 days), the SDT will draft a written interpretation to the standard addressing the issues raised. The SPM shall take the draft interpretation to the SC for acceptance, which would be forwarded to the Board for approval, at the SC recommendation. If approved by the Board, the interpretation is appended to the standard and is effective immediately. The SPM will send notice to all entities that operate, plan, and use the bulk electric systems of the MRO region. The interpretation will stand until the standard is revised through the normal process, at which time the standard will be modified to incorporate the clarifications provided by the interpretation.

Appeals

Persons who have directly and materially affected interests and who have been or will be adversely affected by any substantive or procedural action or inaction related to the development, approval, revision, or withdrawal of a MRO Regional Reliability Standard shall have the right to appeal. This appeals process applies only to the MRO Regional Reliability Standards process as defined in this manual.

The burden of proof to show adverse effect shall be on the appellant. Appeals shall be made within 30 days of the date of the action purported to cause the adverse effect, except appeals for inaction, which may be made at any time. In all cases, the request for appeal must be made prior to the next step in the process.

The final decisions of any appeal shall be documented in writing and made public.

The appeals process provides two levels, with the goal of expeditiously resolving the issue to the satisfaction of the participants:

Level 1 Appeal

Level 1 is the required first step in the appeals process. The appellant shall submit to the SPM, a complaint in writing that describes the substantive or procedural action or inaction associated with a MRO Regional Reliability Standard or the MRO Regional Reliability Standards process. The appellant shall describe in the complaint the actual or potential adverse impact to the appellant. Assisted by any necessary staff and committee resources, the SPM shall prepare a written response addressed to the appellant as soon as practical but not more than 45 days after receipt of the complaint. If the appellant accepts the response as a satisfactory resolution of the issue, both the complaint and response shall be made a part of the public record associated with the standard.

Level 2 Appeal

If, after the Level 1 Appeal the appellant remains unsatisfied with the resolution, and indicates such in writing to the SPM, the SPM shall convene a Level 2 Appeals Panel. This panel shall consist of five (5), panel members total appointed by the BOD. In all cases, Level 2 Appeals Panel members shall have no direct affiliation with the participants in the appeal.

The SPM shall post the complaint and other relevant materials and provide at least 30 days notice of the meeting of the Level 2 Appeals Panel. In addition to the appellant, any person that is directly and materially affected by the substantive or procedural action or inaction referenced in the complaint shall be heard by the panel. The panel shall not consider any expansion to the scope of the appeal that was not presented in the Level 1 Appeal. The panel may in its decision find for the appellant and remand the issue to the SC with a statement of the issues and facts in regard to which fair and equitable action was not taken. The panel may find against the appellant with a specific statement of the facts that demonstrate fair and equitable treatment of the appellant and the appellant's objections. The panel may not, however, revise, approve, or disapprove a MRO Regional Reliability Standard, as these responsibilities remain with the standard's RBB and BOD respectively. The SPM shall publicly post the actions of the Level 2 Appeals Panel.

In addition to the foregoing, a procedural objection that has not been resolved may be submitted to the BOD for consideration at the time the BOD decides whether to approve proposing a particular MRO Regional Reliability Standard for NERC consideration and eventual enforceability. The objection must be in writing, signed by an officer of the objecting entity, and contain a concise statement of the relief requested and a clear demonstration of the facts that justify that relief. The objection must be filed no later than 30 days after the announcement of the vote by the RBB on the MRO Regional Reliability Standard in question.

VI. Maintenance of MRO Regional Reliability Standards and Process

Process Revisions

A request to substantively change the MRO Regional Reliability Standards Process Development process shall begin with the preparation of a SAR, and be handled using the same procedure as a request to revise a MRO Regional Reliability Standard. The exception is that a single ballot without regard to negative comments from the RBB shall be conducted and the results of that ballot will be binding. Non-substantive changes will be handled through the abbreviated process listed below. Once approved by the RBB, any proposed revisions to this manual would go to the BOD, NERC, and the applicable authorities in the United States and Canada for approval.

The BOD may make changes to the Industry Segments referenced in Appendix C. These changes shall be carried over to this process without the need to prepare a SAR. In addition, the SC may alter the document number on any existing or proposed standard without going through the MRO Regional Standards Process.

Abbreviated Process for Procedural/Administrative Changes

The SPM shall handle all procedural/administrative requests using an abbreviated process described here. The SPM shall post all proposed procedural/administrative revisions to the MRO Regional Reliability Standards Development Process for a 30-day public comment period. The SC shall consider all comments received and modify the proposed revisions as needed. Based on the degree of consensus for the revisions, the SC may:

- a. submit the revised procedure directly to the BOD for adoption;
- b. submit the revised procedure for ballot pool approval prior to submitting it for BOD adoption (the regular voting process in the procedure, including a re-circulation ballot if needed, would be used and the results of the ballot would be binding on the decision to move the revisions to the BOD or not);
- c. propose additional changes and repeat the posting for further comment;
- d. remand the proposal to the requester for further work; or
- e. reject the proposal.

The SPM shall post any proposed revisions submitted for BOD adoption for a period of 30 days prior to BOD action. The SC shall submit to the BOD a description of the basis for the procedure changes, a summary of the comments received, and any minority views expressed in the comment process. The proposed procedure revisions will be effective upon BOD adoption, or another date designated by the BOD.

Five-Year Review

Each MRO Regional Reliability Standard shall be reviewed at least once every five (5) years from the effective date of the standard or the latest revision to the standard, whichever is the later. The review process shall be conducted by soliciting comments from the stakeholders. If no changes are warranted, the SC shall recommend to the BOD that the Standard be reaffirmed. If the review indicates a need to revise or withdraw the standard, a SAR shall be prepared and submitted by the SC or any other stakeholder in accordance with the standards process. The SPM shall be responsible for administration of the five (5)-year review of MRO Regional Reliability Standards.

On-line Standards Information System

The SPM shall be responsible for maintaining an electronic database of information regarding currently proposed and currently in effect MRO Regional Reliability Standards. This information shall include current standards in effect, proposed revisions to standards, and proposed new standards. This information shall provide a record, for at a minimum the previous five years, of the review and approval process for each MRO Regional Reliability Standard, including public comments received during the development and approval process. This information shall be available through public Internet access.

Archived Standards Information

The SPM shall be responsible for maintaining an historical record of MRO Regional Reliability Standards information that is no longer maintained on-line. Archived information shall be retained indefinitely as practical, but in no case less than five years or one complete standard review cycle from the date on which the standard was no longer in effect. Archived records of standards information shall be available electronically within 30 days following the receipt by the SPM of a written request.

Numbering System

The SPM shall establish, maintain, and electronically post a system of identification numbers that allow MRO Regional Reliability Standards to be categorized and easily referenced. Re-numbering of approved standards does not warrant standard review but will be handled through the SC. The SPM will notify the MRO region and post the information on the RSVP system prior to making the change.

Supporting Documents

The following table identifies documents that may be developed to support a MRO Regional Reliability Standard. These documents may explain or facilitate implementation of standards but do not themselves contain

mandatory requirements subject to compliance review. Any requirements that are mandatory must be incorporated into the standard. For example, a procedure that must be followed as written must be incorporated into a MRO Regional Reliability Standard. If the procedure defines one way, but not necessarily the only way, to implement a standard it is more appropriately a reference.

<i>Type of Document</i>	<i>Description</i>	<i>Approval</i>
Standard Reference	Descriptive, explanatory information to support the understanding and interpretation of an MRO Regional Reliability Standard.	SC
Standard Supplement	Data forms, pro forma documents, and associated instructions that support the implementation of an MRO Regional Reliability Standard.	As assigned to the MRO Standing Committee
Procedure	Instructions defining a particular process or operation. Procedures may support the implementation of an MRO Regional Reliability Standard.	As assigned to the MRO Standing Committee
Technical Reference	Descriptive, technical information or analysis. A technical reference may support the implementation of an MRO Regional Reliability Standard.	As assigned to the MRO Standing Committee

¹After MRO Board approval, the standard is submitted to NERC for approval and filing to the applicable regulatory authorities. Upon regulatory acceptance or approval, the

standard becomes enforceable as a Reliability Standard. VIII. Appendix B – Information in a Standard Authorization Request

Below is a template of the required information to complete a Standard Authorization Request. The SPM shall be responsible for implementing and maintaining this form as needed to support the information requirements of the standards process.

Standard Authorization Request Form

Title of Proposed Standard
Request Date

SAR Requestor Information	SAR Type <i>(Check a box for each one that applies.)</i>
Name	<input type="checkbox"/> New Standard
Primary Contact	<input type="checkbox"/> Revision to existing Standard
Telephone Fax	<input type="checkbox"/> Withdrawal of existing Standard
E-mail	<input type="checkbox"/> Urgent Action

Purpose (Describe the purpose of the standard – what the standard will achieve in support of reliability.)

Industry Need (Provide a detailed statement justifying the need for the proposed standard, along with any supporting documentation.)

Brief Description (Describe the proposed standard in sufficient detail to clearly define the scope in a manner that can be easily understood by others.)

Reliability Functions

The Standard will apply to the Following Functions <i>(Check box for each one that applies.)</i>		
<input type="checkbox"/>	Reliability Authority	Ensures the reliability of the bulk transmission system within its Reliability Authority area. This is the highest Reliability Authority.
<input type="checkbox"/>	Balancing Authority	Integrates resource plans ahead of time, and maintains load-interchange-resource balance within its metered boundary and supports system frequency in real time.
<input type="checkbox"/>	Interchange Authority	Authorizes valid and balanced Interchange Schedules.
<input type="checkbox"/>	Planning Authority	Plans the Bulk Electric System.
<input type="checkbox"/>	Resource Planner	Develops a long-term (>one year) plan for the resource adequacy of specific loads within a Planning Authority area.
<input type="checkbox"/>	Transmission Planner	Develops a long-term (>one year) plan for the reliability of transmission systems within its portion of the Planning Authority area.
<input type="checkbox"/>	Transmission Service Provider	Provides transmission services to qualified market participants under applicable transmission service agreements
<input type="checkbox"/>	Transmission Owner	Owens transmission facilities.
<input type="checkbox"/>	Transmission Operator	Operates and maintains the transmission facilities, and executes switching orders.
<input type="checkbox"/>	Distribution Provider	Provides and operates the “wires” between the transmission system and the customer.
<input type="checkbox"/>	Generator Owner	Owens and maintains generation unit(s).
<input type="checkbox"/>	Generator Operator	Operates generation unit(s) and performs the functions of supplying energy and Interconnected Operations Services.
<input type="checkbox"/>	Purchasing-Selling Entity	The function of purchasing or selling energy, capacity, and all necessary Interconnected Operations Services as required.
<input type="checkbox"/>	Market Operator	Integrates energy, capacity, balancing, and transmission resources to achieve an economic, reliability-constrained dispatch.
<input type="checkbox"/>	Load-Serving Entity	Secures energy and transmission (and related generation services) to serve the end user.

NERC Reliability and Market Interface Principles

Applicable Reliability Principles (Check box for all that apply.)	
<input type="checkbox"/>	1. Interconnected bulk electric systems shall be planned and operated in a coordinated manner to perform reliably under normal and abnormal conditions as defined in the NERC Standards.
<input type="checkbox"/>	2. The frequency and voltage of interconnected bulk electric systems shall be controlled within defined limits through the balancing of real and reactive power supply and demand.
<input type="checkbox"/>	3. Information necessary for the planning and operation of interconnected bulk electric systems shall be made available to those entities responsible for planning and operating the systems reliably.
<input type="checkbox"/>	4. Plans for emergency operation and system restoration of interconnected bulk electric systems shall be developed, coordinated, maintained and implemented.
<input type="checkbox"/>	5. Facilities for communication, monitoring and control shall be provided, used and maintained for the reliability of interconnected bulk electric systems.
<input type="checkbox"/>	6. Personnel responsible for planning and operating interconnected bulk electric systems shall be trained, qualified, and have the responsibility and authority to implement actions.
<input type="checkbox"/>	7. The security of the interconnected bulk electric systems shall be assessed, monitored and maintained on a wide area basis.
<input type="checkbox"/>	8. Bulk power systems shall be protected from malicious physical or cyber attacks.
Does the proposed Standard comply with all of the following Market Interface Principles? (Select 'yes' or 'no' from the drop-down box.)	
1. The planning and operation of bulk electric systems shall recognize that reliability is an essential requirement of a robust North American economy. Yes	
2. A MRO Regional Reliability Standard shall not give any market participant an unfair competitive advantage. Yes	
3. A MRO Regional Reliability Standard shall neither mandate nor prohibit any specific market structure. Yes	
4. A MRO Regional Reliability Standard shall not preclude market solutions to achieving compliance with that Standard. Yes	
5. A MRO Regional Reliability Standard shall not require the public disclosure of commercially sensitive information. All market participants shall have equal opportunity to access commercially non-sensitive information that is required for compliance with reliability standards. Yes

IX. Appendix C –Registered Ballot Body (RBB) Registration Procedures

The RBB comprises all organizations and entities that:

1. qualify for one of the segments, and
2. are registered with MRO as ballot participants in the voting on standards, and
3. are current with any MRO designated fees associated with this program. Designated fees are defined as fees associated with the Standards Development process. At this time there are no fees for registration.

Each entity, when initially registering to join the RBB, and annually thereafter, will self-select to belong to one or more of the segments described below.

The SPM shall review all applications for joining the RBB, and make a determination of whether the self-selection satisfies at least one of the guidelines to belong to that segment. The entity will then be “credentialed” to participate as a voting member of that segment. The SC will decide disputes, with an appeal to the BOD.

In order to comment or vote you must have an active membership in the RBB. When you submit your registration request, you are placed in a “pending stage” until your account is activated. Activation of your account may take up to 24 hours. You will be unable to submit comments or vote until your account is activated.

All registrations must be done electronically via the RSVP application (<http://rsvp.midwestreliability.org/rsvp/action/PubMainAction.jsessionid=47DOEF7CB59688BED492EB007FD9A0DF?type=Init>). There is no fee for registration at this time.

Segment Qualification Guidelines

The segment qualification guidelines are inclusive; i.e., any entity with a legitimate interest in the electric industry that can meet any one of the guidelines for a segment is entitled to belong to and vote in that segment. Only one vote per entity per segment is permitted.

The general guidelines for all segments are:

- Corporations or organizations with integrated operations or with affiliates that qualify to belong to more than one segment (e.g., Transmission Owners and Load Serving Entities) may belong to each of the segments in which they qualify, provided that each segment constitutes a separate membership in the RBB and is represented by a

different representative. Only one vote per entity per segment registered is allowed.

- Corporations, organizations, and entities may participate freely in all subgroups.
- After their initial selection, registered participants may apply to change segments with thirty (30) days notice to the SPM. In addition, a registered participant cannot change segments during a balloting period once the participant has cast a vote or designated a proxy.
- Additionally, the SPM may change a participant segment under certain circumstances. These circumstances will be approved by the SC and posted on the RSVP.
- The qualification guidelines and rules for joining segments will be reviewed periodically by the SC to ensure that the process continues to be fair, open, balanced, and inclusive. Public input shall be solicited in the review of these guidelines.
- Since all balloting of standards will be done electronically, any registered participant may designate an agent or proxy to vote on its behalf. There are no limits on how many proxies an agent may hold. However, the MRO must have in its possession, either in writing or by e-mail, documentation that the voting right by proxy has been transferred from the registered participant to the agent prior to casting any vote.

Segments

Segment 1: Transmission Owners

- a. Any entity within the MRO region that owns or controls at least 200 circuit miles of integrated transmission facilities, or has an Open Access Transmission Tariff or equivalent on file with a regulatory authority.
- b. Transmission owners within the MRO region that have placed their transmission under the operational control of an RTO.
- c. Independent transmission companies or organizations, merchant transmission developers, and TRANSCOs that are in the MRO region and are not RTOs.
- d. Excludes RTOs, RCs and ISOs (that are eligible to belong to Segment 2).

Segment 2: Regional Transmission Organizations (RTOs), Regional Transmission Group (RTG), Independent System Operators (ISOs), Reliability Organizations, and Reliability Coordinators

- a. Authorized by appropriate regulator to operate as an RTO, RTG, or ISO within or adjacent to the MRO.
- b. Reliability Organizations certified by NERC or its successor.
- c. Check FERC definition.
- d. Reliability Coordinators within or adjacent to the MRO.
- e. In cases where the RTO or ISO and the RC have exactly the same geographic boundary, both may belong to this segment as long as they are separate entities.

Segment 3: Load-Serving Entities (LSEs)

- a. Entities within the MRO region serving end-use customers under a regulated tariff, a contract governed by a regulatory tariff, or other legal obligation to serve.
- b. A member within the MRO region of a G&T cooperative or a joint-action agency is permitted to designate the G&T or joint-action agency to represent it in this segment; such designation does not preclude the G&T or joint-action agency from participation and voting in another segment representing its direct interests.

Segment 4: Electric Generators

- a. Affiliated and independent generators within the MRO region.
- b. A corporation that sets up separate corporate entities for each one or two generating plants within the MRO region in which it is involved may only have one vote in this segment regardless of how many single-plant or two-plant corporations the parent corporation has established or is involved in.

Segment 5: Electricity Brokers, Aggregators, and Marketers

- a. Entities serving end-use customers under a power marketing agreement or other authorization not classified as a regulated tariff.
- b. An entity that buys, sells, or brokers energy and related services for resale in wholesale or retail markets, whether a non-jurisdictional entity operating within its charter or an entity licensed by a jurisdictional regulator.

- c. G&T cooperatives and joint-action agencies that perform as an electricity broker, aggregator, or marketer function are permitted to belong to this segment.

Segment 6: Electricity End Users

- a. Service delivery taken within the MRO region that is not purchased for resale.
- b. Agents, associations, consumer advocates can represent groups of end users or a transmission dependent utility. A Transmission Dependent Utility (TDU) is defined as; an entity that relies on another entity for transmission service to service the majority of their contractual loads.

Segment 7: Federal, State, and Provincial Regulatory or other Government Entities

- a. Does not include Federal PMAs or TVA.
- b. May include PUCs.

X. Appendix D – Balloting Examples

The MRO voting mechanism differs from NERC in that a quorum is established if at least four Segments have submitted an affirmative, negative or abstention vote. A majority vote within a Segment is determined based on the affirmative and negative votes. A Standard is approved if at least two-thirds of the voting Segments have an affirmative vote. The following are examples of potential voting scenarios. The yellow areas indicate where a Segment did not cast a vote. The green areas with **bold** numbers represent majority votes within a Segment.

Example RBB

Segment	Number Registered in the RBB
1. Transmission Owners	15
2. RTO's, ISO's, RRO's & Reliability Coordinators	4
3. Load Serving Entities	16
4. Electric Generators	21
5. Electricity Brokers, Aggregators, & Marketers	7
6. Electricity End Users	6
7. Federal, State, & Provincial Regulatory or other Government Entities	8
Totals	77

Example 1 – A quorum has been established with 5 of the 7 Segments having registered an affirmative, negative, or an abstention vote. Two-thirds of the Segments (4 of 5 voting Segments) have voted to approve the Standard. The Standard is approved.

Segment	Ballot Pool	Votes			
		Affirmative Votes	Negative Votes	Abstain Votes	No Ballot
1. Transmission Owners	15	10	2	1	2
2. RTO's, ISO's, RRO's & Reliability Coordinators	4	3	0	0	1
3. Load Serving Entities	16	3	6	2	5
4. Electric Generators	21	13	0	1	7
5. Electricity Brokers, Aggregators, & Marketers	7	0	0	0	7
6. Electricity End Users	6	0	0	0	6
7. Federal, State, & Provincial Regulatory or other Government Entities	8	3	0	1	4
Totals	77				

Example 2 – A quorum has been established with 4 of the 7 Segments having registered an affirmative, negative, or an abstention vote. Less than two-thirds of the Segments (1 of 4 voting Segments) have voted to approve the Standard. The Standard is NOT approved.

Segment	Ballot Pool	Votes			
		Affirmative Votes	Negative Votes	Abstain Votes	No Ballot
1. Transmission Owners	15	10	2	1	2
2. RTO's, ISO's, RRO's & Reliability Coordinators	4	1	2	0	1
3. Load Serving Entities	16	3	6	2	5
4. Electric Generators	21	0	0	0	21
5. Electricity Brokers, Aggregators, & Marketers	7	0	0	0	7
6. Electricity End Users	6	0	0	0	6
7. Federal, State, & Provincial Regulatory or other Government Entities	8	0	3	1	4
Totals	77				

Example 3 – A quorum has not been established because only 3 of the 7 Segments have registered an affirmative, negative, or an abstention vote. The Standard is NOT approved because of a lack of a quorum.

Segment	Ballot Pool	Votes			
		Affirmative Votes	Negative Votes	Abstain Votes	No Ballot
1. Transmission Owners	15	10	2	1	2
2. RTO's, ISO's, RRO's & Reliability Coordinators	4	4	0	0	0
3. Load Serving Entities	16	3	6	2	5
4. Electric Generators	21	0	0	0	21
5. Electricity Brokers, Aggregators, & Marketers	7	0	0	0	7
6. Electricity End Users	6	0	0	0	6
7. Federal, State, & Provincial Regulatory or other Government Entities	8	0	0	0	8
Totals	77				

Example 4 – A quorum has been established with 6 of the 7 Segments having registered an affirmative, negative, or an abstention vote. The Standard is NOT approved because two-thirds of the Segments did not cast an affirmative vote. Segment 2's vote is considered negative because a majority did not cast an affirmative vote.

Segment	Ballot Pool	Votes			
		Affirmative Votes	Negative Votes	Abstain Votes	No Ballot
1. Transmission Owners	15	10	2	1	2
2. RTO's, ISO's, RRO's & Reliability Coordinators	4	2	2	0	0
3. Load Serving Entities	16	3	6	2	5
4. Electric Generators	21	10	9	1	1
5. Electricity Brokers, Aggregators, & Marketers	7	4	3	0	0
6. Electricity End Users	6	0	0	0	6
7. Federal, State, & Provincial Regulatory or other Government Entities	8	2	3	0	3
Totals	77				

EXHIBIT D – COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

1.0 REGIONAL COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

Midwest Reliability Organization will implement the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure (which for purposes of this section 1.0 shall not include Attachment 2, Hearing Procedures), to monitor and enforce compliance with Reliability Standards by the owners, operators, and users within Midwest Reliability Organization's geographic or electrical boundaries, and such other scope, set forth on **Exhibit A** of this Agreement.

2.0 REGIONAL HEARING OF COMPLIANCE MATTERS

Midwest Reliability Organization shall establish and maintain a hearing body with authority to conduct and render decisions in compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan, which shall be either Midwest Reliability Organization's board or a balanced compliance panel reporting directly to Midwest Reliability Organization's board. Midwest Reliability Organization's hearing body is a balanced subset of its board that is appointed by the board with no more than one member from each sector.

Midwest Reliability Organization shall conduct all compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, proposed Mitigation Plan, or a proposed Remedial Action Directive, in accordance with Attachment 2, Hearing Procedures, to the NERC Compliance Monitoring and Enforcement Program, subject to the following deviations, if any: **NONE**.

3.0 OTHER DECISION-MAKING BODIES

A presiding officer who presides over the reception of evidence may prepare recommendations to be used by the board of directors in preparing its decision in a compliance hearing. In addition to compliance hearings, Midwest Reliability Organization's Hearing Body also reviews and approves settlements in a yes or no fashion, but is not permitted to make modifications to negotiated settlements/agreements.

Exhibit E — Funding

1. Scope of activities funded through the ERO funding mechanism

Midwest Reliability Organization shall include in its annual budget submission to NERC amounts for costs it will incur in performing its delegated functions and related activities as described in Sections 5, 6 and 7 of the Agreement. These activities shall include:

- Reliability Standard Development
- Compliance Monitoring and Enforcement
- Organization Registration and Certification
- Reliability Assessment and Performance Analysis (including necessary data gathering activities)
- Event Analysis and Reliability Improvement
- Training and Education
- Situation Awareness
- Infrastructure Security

2. Preparation of Annual Business Plan and Budget

(a) NERC and Midwest Reliability Organization in conjunction with the other Regional Entities, shall collaboratively develop an annual schedule for the development, submission, review and approval of Midwest Reliability Organization's business plan and budget. The annual schedule for the preparation of business plans and budgets shall require Midwest Reliability Organization (i) to submit to NERC draft(s) of Midwest Reliability Organization's proposed business plan and budget and other preliminary documents and information, and (ii) to submit a final proposed business plan and budget that has been approved by Midwest Reliability Organization Board of Directors to NERC by July 1 or such other agreed date as provides sufficient time for NERC's review, approval and submission of Midwest Reliability Organization's business plan and budget to the Commission 130 days in advance of the beginning of each fiscal year. The Midwest Reliability Organization business plan and budget submission shall include supporting materials, including Midwest Reliability Organization's complete business plan and organization chart, explaining the proposed collection of all assessments, dues, fees and charges, and the proposed expenditure of the funds to be collected in sufficient detail to justify the requested budgeted expenditures and assessments. Midwest Reliability Organization's business plan and budget and proposed assessments shall provide for reasonable reserve mechanisms for unforeseen and extraordinary expenses and other contingencies, consistent with generally accepted accounting principles.

(b) NERC shall review and approve Midwest Reliability Organization's proposed business plan and budget and proposed assessments for performing the delegated functions and related activities described in Sections 5, 6 and 7 of this Agreement and listed above in Section 1 of this **Exhibit E**, or shall direct Midwest Reliability Organization to make such revisions as NERC deems appropriate prior to approval. NERC shall submit Midwest Reliability Organization's approved business plan and budget and proposed assessments to

the Commission for approval as part of NERC's overall business plan and budget submission, in accordance with the ERO Regulations.

3. Allocation of Costs

Assessments to fund the costs of Midwest Reliability Organization's delegated functions and related activities pursuant to the Agreement shall be allocated among all load-serving entities on the basis of Net Energy for Load, unless a different method(s) of allocating and calculating such assessments has been submitted to and approved by NERC and the Commission in accordance with Section 9(b) of the Agreement. Midwest Reliability Organization shall submit to NERC annually at the same time it submits its budget request a list of the load-serving entities or designees within its geographic boundaries that shall be responsible for paying Midwest Reliability Organization's assessment and the load-serving entities' proportionate Net Energy for Load, and such other data and information as is necessary to allocate and calculate the allocation of Midwest Reliability Organization's assessment to the load-serving entities or designees under the method(s) of allocation and calculation that will be used.

4. Collection of Funding

(a) NERC shall submit invoices to the load-serving entities or designees identified by Midwest Reliability Organization covering the NERC and Midwest Reliability Organization assessments approved for collection.

(b) NERC shall pursue any non-payments of assessment amounts and shall request assistance from ERO Governmental Authorities as necessary to secure collection. To the extent reasonably practicable, [Regional Entity] shall assist NERC in pursuing and collecting any non-payments. Notwithstanding the foregoing, [Regional Entity] is not responsible and does not assume any liability for recovering non-payments or underpayments of assessment amounts. NERC shall retain sole responsibility for recovering non-payments or underpayments of assessment amounts. NERC shall add the amount of any non-payments by end-users or designees within [REGIONAL ENTITY]'s region, that are reasonably determined to be uncollectible, to NERC's assessments for a subsequent year with the amount of such non-payments to be allocated to end-users within [Regional Entity]'s region.

(c) Upon approval by ERO Governmental Authorities of [Regional Entity]'s annual assessment to fund the costs of its delegated functions and related activities, NERC shall pay [Regional Entity's] annual assessment to Regional Entity in four equal quarterly payments on January 15, April 15, July 15 and October 15 of the budget year.

5. Application of Penalties

Except as otherwise approved by the Commission, all penalty monies received by Midwest Reliability Organization shall be applied as a general offset to Midwest Reliability Organization's budget requirements for U.S.-related activities under this Agreement for the

subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity.

6. Budget and Funding for Midwest Reliability Organization Non-Statutory Activities

In addition to its delegated functions and related activities, as specified in Sections 5, 6 and 7 of the Agreement and in Section 1 of this **Exhibit E** (such delegated functions and activities referred to in this Section 6 as “statutory activities”), Midwest Reliability Organization performs the following other functions and activities (such other functions and activities being referred to in this Section 6 as "non-statutory activities"): **NONE**.

Midwest Reliability Organization shall employ the following methods and procedures to (i) keep its funding mechanisms for its statutory activities separate from its funding mechanisms for its non-statutory activities, and (ii) record the costs it incurs in the performance of its non-statutory functions separately from the costs it incurs in the performance of its statutory functions: **NOT APPLICABLE**.

Midwest Reliability Organization shall provide its budget for such non-statutory activities to NERC at the same time that Midwest Reliability Organization submits its proposed annual business plan and budget for statutory activities to NERC pursuant to Section 9 of the Agreement. Midwest Reliability Organization budget for non-statutory activities that is provided to NERC shall contain a detailed list of Midwest Reliability Organization’s non-statutory activities and a description of the funding sources for the non-statutory activities. Midwest Reliability Organization agrees that no costs (which shall include a reasonable allocation of Midwest Reliability Organization’s general and administrative costs) of non-statutory activities are to be included in the calculation of Midwest Reliability Organization’s assessments, dues, fees, and other charges for its statutory activities.

7. Amended or Supplemental Business Plans and Budgets

During the course of the fiscal year, if Midwest Reliability Organization determines it does not or will not have sufficient funds to carry out its delegated functions and related activities, Midwest Reliability Organization shall submit to NERC one or more proposed amended or supplemental business plans and budgets and requests for approval of supplemental assessments, reflecting costs, cost increases or funding shortfalls not provided for in Midwest Reliability Organization’s approved business plan and budget for the fiscal year. NERC shall review and approve the proposed amended or supplemental business plan and budget and proposed supplemental assessment, or shall direct Midwest Reliability Organization to make such revisions as NERC deems appropriate prior to approval. NERC shall submit Midwest Reliability Organization’s approved amended or supplemental business plan and budget and proposed supplemental assessment to the Commission for approval.

8. NERC Review of Regional Entity Financial Statements

NERC shall conduct reviews of the quarterly and annual financial statements submitted by Midwest Reliability Organization pursuant to Section 9(h) and (i) of the Agreement.

Midwest Reliability Organization shall provide supporting documentation for the quarterly and annual financial statements as reasonably requested by NERC based on its reviews.

ATTACHMENT 3B

NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION

REVISED DELEGATION AGREEMENT

WITH

MIDWEST RELIABILITY ORGANIZATION

REDLINED AGAINST

REVISED PRO FORMA DELEGATION AGREEMENT

**AMENDED AND RESTATED DELEGATION AGREEMENT BETWEEN
NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION
~~AND REGIONAL ENTITY~~
AND MIDWEST RELIABILITY ORGANIZATION**

AMENDED AND RESTATED DELEGATION AGREEMENT (“Agreement”) made as of [January 1, 2011], between the North American Electric Reliability Corporation (“NERC”), an organization certified by the Federal Energy Regulatory Commission (“Commission”) pursuant to Section 215(c) of the Federal Power Act to establish and enforce Reliability Standards for the Bulk-Power System, and ~~[REGIONAL ENTITY]~~Midwest Reliability Organization, an organization established to develop and enforce Reliability Standards within the geographic boundaries identified on **Exhibit A** to this Agreement, and for other purposes. NERC and ~~[REGIONAL ENTITY]~~Midwest Reliability Organization may be individually referred to herein as “Party” or collectively as “Parties.”

WITNESSETH

WHEREAS, Subtitle A of the Electricity Modernization Act of 2005 added Section 215 to the Federal Power Act (16 U.S.C. § 824n) (hereafter “the Act”), which, among other things, provides for the establishment of an electric reliability organization (“ERO”) to develop and enforce Reliability Standards applicable to all owners, operators, and users of the Bulk-Power System;

WHEREAS, the Commission has adopted regulations for the implementation of the Act, which are set forth at Chapter I, Title 18, Code of Federal Regulations, Part 39 (the “ERO Regulations”);

WHEREAS, the Commission has certified NERC as the ERO that will, in accordance with the Act, establish and enforce Reliability Standards for the Bulk-Power System, subject to certain delegation provisions described below;

WHEREAS, the Act recognizes the international interdependency of electric reliability within North America and envisions the ERO and such applicable Regional Entities as international organizations;

WHEREAS, the Act and Section 39.8 of the ERO Regulations provide for the delegation by the ERO of authority to propose and enforce Reliability Standards to regional entities (“Regional Entities”) such as ~~[REGIONAL ENTITY]~~Midwest Reliability Organization provided that:

(A) The Regional Entity is governed by —

- (i) an independent board;
- (ii) a balanced stakeholder board; or
- (iii) a combination independent and balanced stakeholder board.

(B) The Regional Entity otherwise satisfies the provisions of Section 215(c)(1) and (2) of the Act; and

(C) The agreement promotes effective and efficient administration of Bulk-Power System reliability;

WHEREAS, certain Regional Entities are organized on an Interconnection-wide basis and are therefore entitled to the presumption set forth in the Act that: “[t]he ERO and the Commission shall rebuttably presume that a proposal for delegation to a Regional Entity organized on an Interconnection-wide basis promotes effective and efficient administration of bulk power system reliability and should be approved”;

WHEREAS, the Act further provides that the ERO shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Reliability Standard or modification to a Reliability Standard to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest;

WHEREAS, ~~[REGIONAL ENTITY]~~Midwest Reliability Organization ~~is/is not~~ organized on an Interconnection-wide basis and therefore ~~is/is not~~ entitled to the rebuttable presumptions accorded such an entity;

WHEREAS, NERC will work through ~~[REGIONAL ENTITY]~~Midwest Reliability Organization to carry out certain of its activities in furtherance of its responsibilities as the ERO under the Act;

WHEREAS, NERC has concluded that ~~[REGIONAL ENTITY]~~Midwest Reliability Organization meets all requirements of the Act, the ERO Regulations, and the NERC Rules of Procedure as approved by the Commission (“NERC Rules of Procedure”) necessary to qualify for delegation; and

WHEREAS, NERC and ~~[REGIONAL ENTITY]~~Midwest Reliability Organization having operated under a predecessor agreement to this Agreement, have negotiated this amended and restated Agreement so as to incorporate the benefits of their mutual experience and lessons learned while operating under the predecessor agreement and thereby provide for the more efficient and effective execution of their respective responsibilities in a transparent manner that is pursuant to Section 215 of the Act and the ERO Regulations;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, NERC and ~~[REGIONAL ENTITY]~~Midwest Reliability Organization agree as follows:

1. Definitions. The capitalized terms used in this Agreement shall be defined as set forth in the Act, the ERO Regulations, the NERC Rules of Procedure, or the NERC Glossary of Terms Used in Reliability Standards, or, if not so defined, shall be defined as set forth in this Section 1 or elsewhere in the text of this Agreement:

(a) Breach means (i) the failure of a Party to perform or observe any material term, condition or covenant of the Agreement or (ii) a representation in Section 2 of the Agreement shall have become materially untrue.

(b) Cross-Border Regional Entity means a Regional Entity that encompasses a part of the United States and a part of Canada or Mexico.

(c) Delegated Authority means the authority delegated by NERC to ~~[REGIONAL ENTITY]~~Midwest Reliability Organization to propose and enforce Reliability Standards pursuant to the Act and to undertake related activities set forth in this Agreement in furtherance of these delegated functions in accordance with the Act, the ERO Regulations and this Agreement.

2. Representations.

(a) For purposes of its Delegated Authority, ~~{REGIONAL ENTITY}~~Midwest Reliability Organization hereby represents and warrants to NERC that:

(i) ~~{REGIONAL ENTITY}~~Midwest Reliability Organization is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder. ~~{REGIONAL ENTITY}~~Midwest Reliability Organization is governed in accordance with its bylaws by ~~{select appropriate: an independent board/a balanced stakeholder board/a combination independent and balanced stakeholder board}~~. Pursuant to these bylaws, no two industry sectors can control any ~~{REGIONAL ENTITY}~~Midwest Reliability Organization decision and no single industry sector can veto any ~~{REGIONAL ENTITY}~~Midwest Reliability Organization decision. ~~The relevant portions of such~~ bylaws are attached hereto in **Exhibit B**¹, and as so attached are in full force and effect. No other such corporate governance documents are binding upon ~~{REGIONAL ENTITY}~~Midwest Reliability Organization.

(ii) As set forth in **Exhibit C** hereto², ~~{REGIONAL ENTITY}~~Midwest Reliability Organization has developed a standards development procedure, which provides the process that ~~{REGIONAL ENTITY}~~Midwest Reliability Organization may use to develop Regional Reliability Standards ~~[and Regional Variances, if the regional entity is organized on an interconnection-wide basis]~~ that are proposed to NERC for adoption.

(iii) As set forth in **Exhibit D** hereto, ~~{REGIONAL ENTITY}~~Midwest Reliability Organization has adopted the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure, which provides for the enforcement of Reliability Standards within ~~{REGIONAL ENTITY}~~'sMidwest Reliability Organization's geographic boundaries as shown on **Exhibit A**.

¹ The **Exhibit B** from ~~{REGIONAL ENTITY}~~Midwest Reliability Organization shall meet the requirements contained in **Exhibit B** to this Agreement.

² The **Exhibit C** from ~~{REGIONAL ENTITY}~~Midwest Reliability Organization shall meet the requirements contained in **Exhibit C** to this Agreement.

(b) NERC hereby represents and warrants to ~~[REGIONAL ENTITY]~~Midwest Reliability Organization that:

(i) NERC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder; and

(ii) NERC has been certified as the ERO by the Commission pursuant to the Act.

3. Covenants.

(a) During the term of this Agreement, ~~[REGIONAL ENTITY]~~Midwest Reliability Organization shall maintain and preserve its qualifications for delegation pursuant to the Act and shall not amend its Regional Entity Rules without NERC's approval, which shall not be unreasonably withheld or delayed and which shall, in the case of a Regional Entity organized on an Interconnection-wide basis, be governed by the presumptions provided for in Section 215(d)(2) and (e)(4)(C) of the Act, and be subject to any required Commission approval.

(b) During the term of this Agreement, NERC shall maintain its qualification and status as the ERO pursuant to the Act and, subject to the provisions of Sections 17 and 18 of this Agreement, NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations or programs of ~~[REGIONAL ENTITY]~~Midwest Reliability Organization under this Agreement without first obtaining the consent of ~~[REGIONAL ENTITY]~~Midwest Reliability Organization which consent shall not be unreasonably withheld or delayed.

(c) During the term of this Agreement, NERC and ~~[REGIONAL ENTITY]~~Midwest Reliability Organization shall adhere to and require that all participants in their respective activities under this Agreement follow and comply with the NERC Antitrust Compliance Guidelines.

4. Delegation of Authority.

(a) Based upon the representations, warranties and covenants of ~~[REGIONAL ENTITY]~~Midwest Reliability Organization in Sections 2 and 3 above, the corporate governance documents set forth in **Exhibit B**, the standards development process set forth in **Exhibit C**, and the compliance monitoring and enforcement program set forth in **Exhibit D**, NERC hereby delegates authority, pursuant to Section 215(e)(4) of the Act, to ~~[REGIONAL ENTITY]~~Midwest Reliability Organization for the purpose of proposing Reliability Standards to NERC, as set forth in Section 5 of this Agreement, and enforcing Reliability Standards, as set forth in Section 6 of this Agreement, within the geographic boundaries and such other scope set forth on **Exhibit A**, ~~provided, that [REGIONAL ENTITY] shall not monitor and enforce compliance with Reliability Standards for [REGIONAL ENTITY] or an affiliated entity with respect to reliability functions for which [REGIONAL ENTITY] or an affiliate is a Registered Entity.~~ Any exclusions from this delegation of authority to ~~[REGIONAL ENTITY]~~Midwest Reliability Organization within, or additions to this delegation of authority to ~~[REGIONAL ENTITY]~~Midwest Reliability Organization beyond, the geographic boundaries set forth on **Exhibit A** are stated on **Exhibit A**.

(b) ~~In circumstances where [REGIONAL ENTITY] or an affiliated entity is a Registered Entity, [REGIONAL ENTITY] shall enter into an agreement with another Regional Entity or NERC for the other Regional Entity or NERC to monitor and enforce [REGIONAL ENTITY]'s or affiliate's compliance with Reliability Standards. Such agreements are subject to NERC and Commission approval.~~[This subsection intentionally left blank].

(c) Nothing in this Agreement ~~shall prohibit [REGIONAL ENTITY]~~Midwest Reliability Organization from entering into an arrangement between one or more other Regional Entities to perform compliance monitoring and enforcement activities outside of its region, on behalf of NERC and/or other Regional Entities, for Registered Entities that have registered functions monitored by more than one Regional Entity, subject to approval by NERC.

(d) For Cross-Border Regional Entities, the authority delegated by this Agreement shall extend only to the portion of the region identified on **Exhibit A** that is within the United States. Any delegation of authority by ERO Governmental Authorities in Canada or Mexico shall be governed by a separate agreement and is outside the scope of this Agreement; provided, however, that both ~~[REGIONAL ENTITY]~~Midwest Reliability Organization and NERC shall endeavor to ensure that this Agreement and such separate agreements are compatible.

(e) As a condition to this delegation of authority and subject to the provisions of Section 17 of this Agreement, ~~[REGIONAL ENTITY]~~Midwest Reliability Organization shall comply with the applicable provisions of NERC's Certificate of Incorporation, Bylaws, Rules of Procedure, and Reliability Standards, as from time to time adopted, approved, or amended.

5. Development and Proposal of Reliability Standards.

(a) In connection with its Delegated Authority, ~~[REGIONAL ENTITY]~~Midwest Reliability Organization shall be entitled to:

(i) propose Reliability Standards, Regional Variances, or modifications thereof to NERC, which shall be considered by NERC through an open and inclusive process for proposing and adopting Reliability Standards that affords ~~[REGIONAL ENTITY]~~Midwest Reliability Organization reasonable notice and opportunity to be heard; and

(ii) develop Regional Reliability Standards ~~and Regional Variances, if Regional Entity is organized on an Interconnection-wide basis~~ through ~~[REGIONAL ENTITY]'s~~Midwest Reliability Organization's process as set forth in **Exhibit C**. Proposals approved through ~~[REGIONAL ENTITY]'s~~Midwest Reliability Organization's process shall be reviewed by the NERC Board after NERC provides notice and an opportunity for interested persons to comment. In the case of a proposal from a Regional Entity organized on an Interconnection-wide basis, comments shall be limited to the factors identified in NERC Rule of Procedure 312.3 as it may be amended from time to time. The NERC Board shall promptly thereafter consider such proposed Regional Reliability Standard or Regional Variance, applying the rebuttable presumption described in subsection 5(b) of this Agreement if the proposed Regional Reliability Standard or Regional Variance is from a Regional Entity organized on an Interconnection-wide basis, and either approve the proposed Regional Reliability Standard or Regional Variance and submit it to the Commission for approval, or disapprove it in writing setting forth its reasons. ~~[REGIONAL ENTITY]~~Midwest Reliability Organization may appeal any disapproval of a proposed Regional Reliability Standard or Regional Variance to the Commission.

(b) Pursuant to Section 215(d)(3) of the Act, NERC shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Regional Reliability Standard or Regional Variance or modification thereof to be applicable on an

Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. Any person challenging such proposal from the Regional Entity organized on an Interconnection-wide basis shall have the burden of proof. NERC shall not find that this presumption has been rebutted except based upon substantial evidence that has been disclosed to, and been subject to comment by, the Interconnection-wide Regional Entity during NERC's review of the proposal.

6. Enforcement of Compliance with Reliability Standards.

(a) In connection with its delegated authority pursuant to this Agreement, ~~REGIONAL ENTITY~~ Midwest Reliability Organization shall enforce Reliability Standards (including Regional Reliability Standards and Regional Variances) within the geographic boundaries set forth, or as otherwise specified, in **Exhibit A** through the compliance monitoring and enforcement program set forth in **Exhibit D**. NERC and ~~REGIONAL ENTITY~~ Midwest Reliability Organization agree that this compliance monitoring and enforcement program meets all applicable requirements of the Act, Order No. 672 of the Commission, and the ERO Regulations, including, *inter alia*, the requirement for an audit program pursuant to Section 39.7(a) of the ERO Regulations, the assessment of penalties pursuant to Section 39.7(c) through 39.7(g) of the ERO Regulations and the requirements for due process. ~~REGIONAL ENTITY~~ Midwest Reliability Organization may not change its compliance monitoring and enforcement program set forth in **Exhibit D** absent NERC's approval, which shall not be unreasonably withheld or delayed, and the approval of the Commission. Subject to the rights and limitations specified in Sections 17 and 18 of this Agreement, ~~REGIONAL ENTITY~~ Midwest Reliability Organization agrees to comply with the NERC Rules of Procedure, with any directives issued pursuant to Section 8(c) of this Agreement, and with any guidance and directions issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, in implementing this program.

(b) ~~REGIONAL ENTITY~~ Midwest Reliability Organization shall report promptly to NERC any Possible Violation, Alleged Violation, or Confirmed Violation of a Reliability Standard, and its eventual disposition by ~~REGIONAL ENTITY~~ Midwest Reliability Organization. Such report shall include the owner's, operator's, or user's name, which Reliability Standard or Reliability Standards were the subject of the Possible Violation, Alleged

Violation, or Confirmed Violation, when the Possible Violation, Alleged Violation, or Confirmed Violation occurred, other pertinent facts including circumstances surrounding the Possible Violation, Alleged Violation, or Confirmed Violation with any known risk to the Bulk-Power System, when the Possible Violation, Alleged Violation, or Confirmed Violation was or will be mitigated, the name of a person knowledgeable about the Possible Violation, Alleged Violation, or Confirmed Violation to serve as a point of contact with the Commission, and any other information required by NERC compliance program procedures. NERC shall promptly forward such report to the Commission. NERC and ~~[REGIONAL ENTITY]~~Midwest Reliability Organization shall cooperate in filing such periodic summary reports as the Commission shall from time to time direct on Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards and summary analyses of such Possible Violations, Alleged Violations, and Confirmed Violations.

(c) Each Possible Violation, Alleged Violation, or Confirmed Violation shall be treated as nonpublic unless the matter is filed with the Commission as a Notice of Penalty, or, if disclosure is required, dismissed. The disposition of each Possible Violation, Alleged Violation, or Confirmed Violation that relates to a Cybersecurity Incident or that would jeopardize the security of the Bulk-Power System if publicly disclosed shall remain nonpublic unless the Commission directs otherwise.

(d) All dispositions by ~~[REGIONAL ENTITY]~~Midwest Reliability Organization of Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards shall be reported to NERC for review and, in the case of Confirmed Violations, penalties or sanctions, and settlements, for approval. Following approval of a disposition by NERC, NERC shall file the disposition with the Commission, if required by, and in accordance with, Section 215(e) of the Act and Section 39.7 of the ERO Regulations. NERC shall review ~~[REGIONAL ENTITY]~~'sMidwest Reliability Organization's dispositions based on the following criteria:

(i) whether the disposition is supported by a sufficient record compiled by ~~[REGIONAL ENTITY]~~Midwest Reliability Organization in accordance with the NERC Rules of Procedure, NERC directives and Commission requirements, taking into account the nature of the Possible Violation, Alleged Violation, or Confirmed Violation,

(ii) whether the disposition is consistent with any applicable directives issued pursuant to Section 8(c) of this Agreement, any applicable directions or guidance

issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, or other applicable NERC guidance, concerning the Reliability Standards to which the Possible Violation, Alleged Violation, or Confirmed Violation relates,

(iii) if the disposition is a Confirmed Violation or settlement, whether it provides for a penalty or sanction, or a determination of no penalty or sanction, determined in accordance with the NERC Sanction Guidelines, Appendix 4B to the NERC Rules of Procedure, and

(iv) whether the disposition is reasonably consistent with other dispositions by ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization and by other Regional Entities of Possible Violations, Alleged Violations, and Confirmed Violations involving the same or similar facts and circumstances.

NERC may reject any disposition, with an explanation of why NERC believes the disposition does not meet the above criteria. ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization may submit a disposition requiring NERC approval that has been rejected by NERC, or a revised disposition following a rejection, directly to the NERC Board Compliance Committee for approval without revising the disposition to address all the grounds on which NERC originally rejected the disposition. The final approval of ~~[REGIONAL ENTITY]'s~~ Midwest Reliability Organization's disposition of a Possible Violation, Alleged Violation, or Confirmed Violation shall be made by the NERC Board Compliance Committee, provided, that the NERC Board or NERC Board Compliance Committee may, by appropriate resolution, delegate authority for final approval of dispositions of specified categories of Possible Violations, Alleged Violations, or Confirmed Violations to the NERC President.

(e) All appeals of penalties imposed by ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization as a result of a decision by ~~[REGIONAL ENTITY]'s~~ Midwest Reliability Organization's Hearing Body shall be filed with, heard by and disposed of by, NERC in accordance with the NERC Rules of Procedure.

(f) ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization shall maintain the capability to conduct investigations of Possible Violations and Alleged Violations of Reliability Standards and to conduct such investigations in a confidential manner.

(g) ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization shall maintain a program of proactive monitoring and enforcement of compliance with Reliability Standards, in

accordance with the NERC Compliance Monitoring and Enforcement Program and the annual NERC Compliance Monitoring and Enforcement Program Implementation Plan.

(h) As part of its compliance monitoring and enforcement program, ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization shall maintain a conflict of interest policy that assures the integrity and independence of such program, including the integrity and independence of the persons or decision-making bodies making final determinations in compliance enforcement actions under Section 5.0 of the NERC Compliance Monitoring and Enforcement Program. A Regional Entity may have stakeholders lead or participate in its board compliance committee so long as integrity and independence are assured through reasonable and appropriate recusal procedures.

(i) As often as NERC deems necessary, but no less than every five years, NERC shall review ~~[REGIONAL ENTITY]'s~~ Midwest Reliability Organization's compliance monitoring and enforcement program to determine that: (i) the program meets all applicable legal requirements; (ii) actual practices reflect the requirements; and (iii) the program administered pursuant to the Delegated Authority promotes consistent interpretations across North America of Reliability Standards and comparable levels of sanctions and penalties for violations of Reliability Standards constituting comparable levels of threat to reliability of the Bulk-Power System.

7. Delegation-Related Activities.

NERC will engage ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization on its behalf to carry out certain of its activities that are in furtherance of Bulk-Power System reliability and NERC's responsibilities as the ERO under the Act or in support of the Delegated Authority, as specified in the NERC Rules of Procedure and listed on **Exhibit E**. These delegation-related activities shall include, but are not limited to, those described in subsections (a) through (f), each of which shall be considered a statutory activity:

(a) Certification of Bulk-Power System Entities. The NERC Board shall set criteria for certification in accordance with the NERC Rules of Procedure. ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization shall issue certifications in accordance with the NERC Rules of Procedure.

(b) Registration of owners, operators, and users of the Bulk-Power System as responsible for compliance with requirements of Reliability Standards.

(i) The NERC Board shall develop criteria for registration of owners, operators, and users of the Bulk-Power System as Registered Entities and shall apply the registration criteria to register owners, operators and users of the Bulk-Power System as Registered Entities.

(ii) NERC shall maintain a registration database of Registered Entities, based on data and information provided by ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization and other Regional Entities. ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization shall provide timely and accurate information relating to registrations to NERC, on at least a monthly basis, to enable NERC to maintain a registration database that is accurate and up-to-date.

(iii) The NERC Board Compliance Committee shall hear and decide appeals from owners, operators and users of the Bulk-Power System contesting registration, in accordance with the NERC Rules of Procedure. If the NERC Board Compliance Committee upholds the decision to register an owner, operator, or user, NERC shall defend the decision in any subsequent appeal of the decision by the Registered Entity to the Commission.

(c) Reliability Assessment and Performance Analysis. ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization shall develop assessments of the reliability of the Bulk-Power System, or ensure that data and information are collected, analyzed and provided to NERC in support of the development of reliability assessments, in accordance with the NERC Rules of Procedure. ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization shall also develop and maintain, and collect data in support of the development and maintenance of, reliability performance metrics and assessments of risks to the Reliable Operation of the Bulk-Power System, in accordance with the NERC Rules of Procedure and NERC directives. NERC shall develop data-gathering quality control procedures, forms and reporting mechanisms, which shall be used by ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization and other Regional Entities in carrying out their responsibilities under this subsection (c).

(d) Event Analysis and Reliability Improvement. ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization shall conduct event analysis pursuant to the NERC Rules of Procedure and applicable governmental regulations. NERC and ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization shall coordinate event analysis to support the effective and efficient use of their collective resources, consistency in event analysis, and timely delivery of event analysis

reports. In collaboration with NERC, ~~{REGIONAL ENTITY}~~Midwest Reliability Organization shall disseminate to the electric industry lessons learned and other information obtained or resulting from event analysis.

(e) Training and Education. ~~{REGIONAL ENTITY}~~Midwest Reliability Organization may provide training and education to Registered Entities, as it deems necessary, in support of its performance of delegated functions and related activities under this Agreement. NERC may also provide training and education programs to Registered Entities on topics relating to NERC's responsibilities as the ERO.

(f) Situation Awareness and Infrastructure Security.

(i) ~~{REGIONAL ENTITY}~~Midwest Reliability Organization shall gather and assess situation awareness information provided by Registered Entities pursuant to the NERC Rules of Procedure and applicable governmental regulations, and shall provide other data, information and assistance to NERC in support of NERC's activities in monitoring present conditions, and responding to events, on the Bulk-Power System.

(ii) ~~{REGIONAL ENTITY}~~Midwest Reliability Organization shall collaborate with NERC in its efforts to coordinate electric industry activities to promote critical infrastructure protection of the Bulk-Power System in North America.

8. Oversight of Performance of Delegated Functions and Related Activities.

This Section 8 sets forth processes and procedures which the Parties intend shall be used in NERC's oversight of ~~{REGIONAL ENTITY}~~'sMidwest Reliability Organization's performance of its Delegated Authority and related activities pursuant to this Agreement. It is the intent of NERC and ~~{REGIONAL ENTITY}~~Midwest Reliability Organization that matters relating to NERC's oversight of ~~{REGIONAL ENTITY}~~'sMidwest Reliability Organization's performance of its Delegated Authority and related activities shall be established or resolved by collaboration between NERC and ~~{REGIONAL ENTITY}~~Midwest Reliability Organization and, where applicable, other Regional Entities, to the maximum extent possible, consistent with the construct that NERC and the Regional Entities are operating together in a collaborative manner to carry out the responsibilities of the ERO under Section 215 of the Act and the ERO Regulations.

(a) (i) NERC shall develop, in collaboration with ~~{REGIONAL ENTITY}~~Midwest Reliability Organization and other Regional Entities, performance goals, measures and other parameters (including, without limiting the scope of such goals, measures and parameters, financial performance goals, measures and parameters), and performance reports, which shall be used to measure NERC's and ~~{REGIONAL ENTITY}~~'sMidwest Reliability Organization's performance of their respective functions and related activities. The performance goals, measures and parameters and the form of performance reports shall be approved by the NERC President and shall be made public. ~~{REGIONAL ENTITY}~~Midwest Reliability Organization shall provide data, information and reports to NERC, in accordance with established schedules, to enable NERC to calculate ~~{REGIONAL ENTITY}~~'sMidwest Reliability Organization's performance to the agreed-upon goals, measures and parameters.

(ii) NERC shall use the performance goals, measures and parameters and performance reports to evaluate ~~{REGIONAL ENTITY}~~'sMidwest Reliability Organization's performance of its delegated functions and related activities and to provide advice and direction to ~~{REGIONAL ENTITY}~~Midwest Reliability Organization on performance improvements. The performance goals, measures and other parameters and the values of such goals, measures and parameters, shall be reviewed by NERC, ~~{REGIONAL ENTITY}~~Midwest Reliability Organization and the other Regional Entities, revised if appropriate, and made public, on the same timeline as the annual business planning and budgeting process described in Section 9 of this Agreement.

(iii) At the request of the President of NERC, ~~{REGIONAL ENTITY}~~Midwest Reliability Organization shall be required to develop, submit for NERC approval, and implement action plans to address areas of its performance that are reasonably determined by NERC, based on analysis of ~~{REGIONAL ENTITY}~~'sMidwest Reliability Organization's performance against the performance goals, measures and parameters, or performance of specific activities, to be unsatisfactory, *provided*, that prior to requiring ~~{REGIONAL ENTITY}~~Midwest Reliability Organization to adopt and implement an action plan or other remedial action, NERC shall issue a notice to ~~{REGIONAL ENTITY}~~Midwest Reliability Organization of the need and basis for an action plan or other remedial action and provide an opportunity for ~~{REGIONAL ENTITY}~~Midwest Reliability Organization to submit a written response contesting NERC's evaluation of ~~{REGIONAL ENTITY}~~'sMidwest Reliability

Organization's performance and the need for an action plan. ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization may request that the President of NERC reconsider the request, and thereafter may request that the NERC Board review and reconsider the request. NERC and ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization shall work collaboratively as needed in the development and implementation of ~~[REGIONAL ENTITY]~~'s Midwest Reliability Organization's action plan. A final action plan submitted by ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization to NERC shall be made public unless the President of NERC makes a written determination that the action plan or specific portions of the plan should be maintained as non-public.

(b) NERC shall make available to ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization standardized training and education programs, which shall be designed taking into account input from ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization and other Regional Entities, for ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization personnel on topics relating to the delegated functions and related activities.

(c) (i) -NERC may issue directives to ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization concerning the manner in which ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization shall perform its delegated functions and related activities under this Agreement. The NERC Rules of Procedure, or any other ERO Rule requiring approval of the Commission, shall not be considered "directives." NERC shall initiate the development of a directive through a collaborative process with ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization and, if applicable, other Regional Entities to which the directive will apply. Any directive developed through the collaborative process shall be approved by, and issued under the signature of, the NERC President.

(ii) If after a period of time that is reasonable under the circumstances, NERC and ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization and, if applicable, other Regional Entities are unable to reach agreement on the contents of the directive, NERC may issue the directive with the approval of and under the signature of the NERC President; *provided*, that before the NERC President issues a directive pursuant to this paragraph (ii), ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization and, if applicable, other Regional Entities, shall be given a reasonable opportunity to present their positions on, and a suggested alternative version or versions of, the proposed directive to the NERC President.

(iii) Upon issuance of a directive by the NERC President, it shall be binding upon, and shall be complied with by, ~~{REGIONAL ENTITY}~~, Midwest Reliability Organization subject to reasonable time periods for adoption, implementation, and funding of any necessary resources. Upon request by ~~{REGIONAL ENTITY}~~, Midwest Reliability Organization the NERC Board (or a committee of the Board to which the Board delegates appropriate authority) shall review and shall confirm, revise or revoke any directive that was issued by the NERC President without ~~{REGIONAL ENTITY}~~'s Midwest Reliability Organization's agreement, *provided*, that ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization shall request such review within thirty (30) days following issuance of the directive by the NERC President unless good cause can be shown for a later request.

(iv) NERC and ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization and, if applicable, other Regional Entities, shall collaborate in deciding whether a directive (whether issued pursuant to paragraph (ii) or paragraph (iii)) shall be made public. If no agreement is reached by the date of issuance as to whether the directive shall be made public, the NERC President shall decide whether the directive will be made public, *provided*, that is the intent of the Parties that the NERC President shall apply a presumption that directives should be made public, unless the NERC President makes a written determination stating a specific reason for maintaining a particular directive as non-public.

(d) In addition to the issuance of directives pursuant to subsection (c), the NERC Board (or a Board committee to which the Board has delegated authority) may issue guidance or directions as to the manner in which ~~{REGIONAL ENTITY}~~, Midwest Reliability Organization and, if applicable, other Regional Entities, shall perform delegated functions and related activities. The Board or Board committee shall also establish reasonable time periods for the implementation of any such guidance or directions, taking into account the impact on the reliability of the Bulk-Power System and the need for funding of additional resources. Any such guidance or directions shall be stated in writing and shall be public, unless the Board or Board committee makes a written determination stating a specific reason for maintaining particular guidance or directions as non-public. ~~{REGIONAL ENTITY}~~, Midwest Reliability Organization either individually or in conjunction with other Regional Entities, may request that the NERC Board or Board committee reconsider or revise the guidance or direction.

(e) NERC shall conduct collaborative reviews with ~~{REGIONAL ENTITY}~~, Midwest Reliability Organization either individually or in conjunction with one or more other Regional Entities, that provide for the exchange of information on practices, experiences, and lessons learned in the implementation of the delegated functions.

(f) Any audits of ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization performed by NERC shall be limited to an examination of ~~{REGIONAL ENTITY}~~'s Midwest Reliability Organization's compliance with this Agreement, NERC's Rules of Procedure, the Compliance Monitoring and Enforcement Program, Commission requirements, and directives that are in effect pursuant to Section 8(c)

9. Funding. ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization and NERC shall ensure, subject to Commission approval in accordance with the ERO Regulations, that the delegated functions and related activities described in Sections 5, 6 and 7 and listed on **Exhibit E** have reasonable and adequate funding and resources by undertaking the following:

(a) ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization shall develop, through a collaborative process with NERC, and propose, an annual business plan and budget, in accordance with ERO Regulations, Commission orders and NERC business planning and budgeting policies and instructions. ~~{REGIONAL ENTITY}~~'s Midwest Reliability Organization's proposed business plan and budget shall describe the activities necessary for, and provide a budget with adequate resources for, ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization to carry out its Delegated Authority under this Agreement, including the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E**. ~~{REGIONAL ENTITY}~~'s Midwest Reliability Organization's business plan and budget shall show the funding sources and amounts to fund the proposed budget, including as applicable assessments to end users, penalty monies, and other sources of funds.

(b) ~~{REGIONAL ENTITY}~~ Midwest Reliability Organization and NERC agree that the portion of ~~{REGIONAL ENTITY}~~'s Midwest Reliability Organization's approved budget for the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E** that is to be funded by assessments, will be equitably allocated among end users within the geographic boundaries described in **Exhibit A** and recovered through a formula based on Net Energy for Load, or through such other formula as is proposed by ~~{REGIONAL ENTITY}~~ Midwest

Reliability Organization and approved by NERC and the Commission. If ~~[REGIONAL ENTITY]~~Midwest Reliability Organization proposes to use a formula other than Net Energy for Load beginning in the following year, ~~[REGIONAL ENTITY]~~Midwest Reliability Organization shall submit the proposed formula to NERC in sufficient time that NERC may review and approve the proposed formula and file it with the Commission by May 15 for approval, and the proposed formula shall be effective for the following year if approved by the Commission on or before the date the Commission approves the annual business plan and budget submitted by NERC and ~~[REGIONAL ENTITY]~~Midwest Reliability Organization to the Commission pursuant to the ERO Regulations for such year.

(c) NERC shall determine that the assessments to fund the costs for its statutory functions in its Commission-approved budget are first allocated fairly among the Interconnections and regions according to the applicability of this work to those Interconnections and regions, and then equitably among the end users of the applicable interconnections and regions as appropriate. Allocation on a Net Energy for Load basis will be presumed to satisfy this equitability requirement.

(d) NERC shall provide ~~[REGIONAL ENTITY]~~Midwest Reliability Organization with the form or forms for business plan and budget submittal, and any accompanying instructions, in accordance with the schedule for preparation of the business plan and budget developed by NERC and the Regional Entities.

~~(e)~~ ~~[REGIONAL ENTITY]~~(e) Midwest Reliability Organization shall submit its proposed annual business plan and budget for carrying out its Delegated Authority functions and related activities described in Sections 5, 6 and 7 and listed on Exhibit E, as well as for all other activities of ~~[REGIONAL ENTITY]~~Midwest Reliability Organization to NERC for review and approval in accordance with the annual schedule for the preparation of business plans and budgets which shall be developed collaboratively by NERC and the Regional Entities, as more fully described in **Exhibit E**.

(f) NERC shall fund ~~[REGIONAL ENTITY]~~'sMidwest Reliability Organization's performance of its Delegated Authority and related activities in accordance with ~~[REGIONAL ENTITY]~~'sMidwest Reliability Organization's Commission-approved business plan and budget, in the amount of ~~[REGIONAL ENTITY]~~'sMidwest Reliability Organization's assessments to end users approved by the Commission. **Exhibit E** sets forth the procedures and

timing for billing and collecting ~~[REGIONAL ENTITY]'s~~ Midwest Reliability Organization's approved assessments from end users and other entities and payment of the approved assessment amount to ~~[REGIONAL ENTITY],~~ Midwest Reliability Organization unless otherwise modified and approved by NERC and the Commission. NERC shall not impose any material obligation or requirement regarding the Delegated Authority upon ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization that has not been provided for in an approved business plan and budget or an approved amended or supplemental business plan and budget, without ~~[REGIONAL ENTITY]'s~~ Midwest Reliability Organization's consent.

(g) NERC shall develop, in consultation with the Regional Entities, a reasonable and consistent system of accounts, with a level of detail and record keeping comparable to the Commission's Uniform System of Accounts and sufficient to allow the Commission to compare each Commission-approved NERC and ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization fiscal year budget with the actual results at the NERC and Regional Entity levels. ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization shall follow NERC's prescribed system of accounts except to the extent that NERC permits a departure from the prescribed system of accounts. NERC shall make an informational filing with the Commission describing any such waiver it permits and providing an explanation supporting the permitted departure.

~~(h) — [REGIONAL ENTITY]~~ (h) Midwest Reliability Organization shall submit unaudited quarterly interim financial statements in form provided by NERC no later than 20 days after the end of the fiscal quarter (March 31, June 30, September 30, and December 31).

(i) ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization shall submit audited financial statements annually, including supporting materials, in a form provided by NERC no later than May 1 of the following year.

(j) **Exhibit E** to this Agreement sets forth the mechanism through which ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization shall offset penalty monies it receives ~~(other than penalty monies received from an operational function or division or affiliated entity of [REGIONAL ENTITY])~~ against its next year's annual budget for carrying out functions under this Agreement, ~~and the mechanism by which [REGIONAL ENTITY] shall transmit to NERC any penalty monies received from an operational function or division or affiliated entity of [REGIONAL ENTITY].~~ *Provided*, that, subject to approval by NERC and the Commission,

~~{REGIONAL ENTITY}~~Midwest Reliability Organization may propose and implement an alternative use of penalty monies to that set forth in **Exhibit E**.

10. Assignment. This Agreement may be assigned by either Party only with the prior written consent of the other, which consent shall be granted or withheld in such non-assigning Party's sole discretion, subject to approval by the Commission. Any assignment under this Agreement shall not relieve a Party of its obligations, nor shall a Party's obligations be enlarged, in whole or in part, by reason thereof. ~~{REGIONAL ENTITY}~~Midwest Reliability Organization may not delegate in whole or in part ~~its~~'s Delegated Authority to any other entity without NERC's express consent; provided, however, that nothing in this provision shall prohibit ~~{REGIONAL ENTITY}~~Midwest Reliability Organization from contracting with other entities to assist it in carrying out its Delegated Authority, provided ~~{REGIONAL ENTITY}~~Midwest Reliability Organization retains control and responsibility for such Delegated Authority.

11. Default and Cure. Upon a Breach, the non-breaching Party shall give written notice of such Breach to the breaching Party (the "Default Notice"). Subject to a suspension of the following deadlines as specified below, the breaching Party shall have thirty (30) calendar days from receipt of the Default Notice within which to cure such Breach; *provided however*, that if such Breach is not capable of cure within thirty (30) calendar days, the breaching Party shall commence such cure within thirty (30) calendar days after notice and continuously and diligently complete such cure within ninety (90) calendar days from receipt of the Default Notice; and, if cured within such time, the Breach specified in such notice shall cease to exist. Subject to the limitation specified in the following sentence, if a Breach is not cured as provided in this Section 11, or if a Breach is not capable of being cured within the period provided for herein, the nonbreaching Party shall have the right to declare a default and terminate this Agreement by written notice at any time until cure occurs, and be relieved of any further obligation hereunder. The deadlines for cure and the right to declare a default and terminate this Agreement shall be suspended during the pendency of any efforts or proceedings in accordance with Section 18 of this Agreement to resolve a dispute as to whether a Breach has occurred or been cured. The provisions of this Section 11 will survive termination of this Agreement.

12. Term and Termination.

(a) This Agreement shall become effective on [January 1, 2011] (the “Effective Date”).

(b) The term of the Agreement shall be five (5) years from the Effective Date, prior to which time NERC shall conduct an audit pursuant to subsection 6(i) to ensure that ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. If ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization meets such requirements, this Agreement may be renewed for another five (5) year term. This Agreement may be renewed for successive additional five (5) year renewal terms provided that prior to the end of each renewal term, NERC shall conduct an audit pursuant to subsection 6(i) to ensure that ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. Provided, that either Party may terminate this Agreement as of the end of a term by giving written notice to terminate at least one (1) year prior to the end of the term. If this Agreement is not renewed or becomes subject to termination for any reason, the Parties shall work to provide for a transition of ~~[REGIONAL ENTITY]~~'s Midwest Reliability Organization's Delegated Authority to NERC or to another eligible entity and to provide for the resolution of any wind-up costs associated with termination of this Agreement. The termination of this Agreement shall not take effect until such transition has been effected, unless the transition period exceeds one year, at which time ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization may unilaterally terminate.

(c) If any provision of this Agreement, or the application thereof to any person, entity or circumstance, is held by a court or regulatory authority of competent jurisdiction to be invalid, void, or unenforceable, or if a modification or condition to this Agreement is imposed by a regulatory authority exercising jurisdiction over this Agreement, the Parties shall endeavor in good faith to negotiate such amendment or amendments to this Agreement as will restore the relative benefits and obligations of the signatories under this Agreement immediately prior to such holding, modification or condition. If either Party finds such holding, modification or condition unacceptable and the Parties are unable to renegotiate a mutually acceptable resolution, either Party may unilaterally terminate this Agreement. Such termination shall be

effective one year following written notice by either Party to the other Party and to the Commission, or at such other time as may be mutually agreed by ~~{REGIONAL ENTITY}~~Midwest Reliability Organization and NERC.

(d) Notwithstanding any termination of this Agreement, provisions contained in Limitation of Liability (Section 13), No Third Party Beneficiaries (Section 14) and Confidentiality (Section 15) shall survive this Agreement in accordance with their terms until sixty (60) days following the expiration of any applicable statute of limitations.

13. Limitation of Liability. ~~{REGIONAL ENTITY}~~Midwest Reliability Organization and NERC agree not to sue each other or their directors, officers, employees, and persons serving on their committees and subgroups based on any act or omission of any of the foregoing in the performance of duties pursuant to this Agreement or in conducting activities under the authority of Section 215 of the Act, other than seeking a review of such action or inaction by the Commission. NERC and ~~{REGIONAL ENTITY}~~Midwest Reliability Organization shall not be liable to one another for any damages whatsoever, including without limitation, direct, indirect, incidental, special, multiple, consequential (including attorneys' fees and litigation costs), exemplary, or punitive damages arising out of or resulting from any act or omission associated with the performance of the ~~{REGIONAL ENTITY}~~'sMidwest Reliability Organization's or NERC's responsibilities under this Agreement or in conducting activities under the authority of Section 215 of the Act, except to the extent that the ~~{REGIONAL ENTITY}~~Midwest Reliability Organization or NERC is found liable for gross negligence or intentional misconduct, in which case ~~{REGIONAL ENTITY}~~Midwest Reliability Organization or NERC shall not be liable for any indirect, incidental, special, multiple, consequential (including without limitation attorneys' fees and litigation costs), exemplary, or punitive damages.

14. No Third Party Beneficiaries. Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to, or any liability to, any third party.

15. Confidentiality. During the course of the Parties' performance under this Agreement, a Party may receive Confidential Information, as defined in Section 1500 of NERC's Rules of Procedure. Except as set forth herein, the Parties agree to keep in confidence and not to copy,

disclose, or distribute any Confidential Information or any part thereof, without the prior written permission of the issuing Party, unless disclosure is required by subpoena, law, or other directive of a court, administrative agency, or arbitration panel, in which event the recipient hereby agrees to provide the Party that provided the Confidential Information with prompt notice of such request or requirement in order to enable such issuing Party to (a) seek an appropriate protective order or other remedy, (b) consult with the recipient with respect to taking steps to resist or narrow the scope of such request or legal process, or (c) waive compliance, in whole or in part, with the terms of this Section. In the event a protective order or other remedy is not obtained or the issuing Party waives compliance with the provisions, the recipient agrees to furnish only that portion of the Confidential Information which the recipient's counsel advises is legally required and to exercise best efforts to obtain assurance that confidential treatment will be accorded to such Confidential Information. In addition, each Party shall ensure that its officers, trustees, directors, employees, subcontractors and subcontractors' employees, and agents to whom Confidential Information is exposed are under obligations of confidentiality that are at least as restrictive as those contained herein. This confidentiality provision does not prohibit reporting and disclosure as directed by NERC, as set forth in Section 6 of this Agreement.

16. Amendment. Neither this Agreement nor any of the terms hereof, may be amended unless such amendment is made in writing, signed by the Parties, and filed with and approved by the Commission.

17. Amendments to the NERC Rules of Procedure. NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations, or programs of ~~{REGIONAL ENTITY}~~Midwest Reliability Organization under this Agreement without first obtaining the consent of ~~{REGIONAL ENTITY}~~Midwest Reliability Organization which consent shall not be unreasonably withheld or delayed. To the extent ~~{REGIONAL ENTITY}~~Midwest Reliability Organization does not consent, NERC shall have the right to invoke the dispute resolution provisions of Section 18 and, if such effort fails to resolve the dispute, to petition the Commission to adopt the amendment to the NERC Rules of Procedure. To the extent that the Commission issues an order amending or materially affecting the rights or

obligations of ~~[REGIONAL ENTITY]~~Midwest Reliability Organization under this Agreement, ~~[REGIONAL ENTITY]~~Midwest Reliability Organization shall have the option, exercisable no later than 60 days after issuance of such order, to terminate this Agreement. Such termination shall be effective one year following written notice by ~~[REGIONAL ENTITY]~~Midwest Reliability Organization to NERC and the Commission, or at such other time as may be mutually agreed by ~~[REGIONAL ENTITY]~~Midwest Reliability Organization and NERC.

18. Dispute Resolution. In the event a dispute arises under this Agreement between NERC and ~~[REGIONAL ENTITY]~~Midwest Reliability Organization (including disputes relating to NERC's performance of its obligations under this Agreement and/or disputes relating to ~~[REGIONAL ENTITY]~~'s Midwest Reliability Organization's performance of its obligations under this Agreement) which cannot be resolved through discussions between representatives of the Parties in the normal course of operations, the Parties shall use the following procedures ("Dispute Resolution") to attempt to resolve the dispute. ~~[REGIONAL ENTITY]~~ Midwest Reliability Organization shall not suspend performance of any delegated function, and the Parties shall continue to make reasonable, good faith efforts to comply with their obligations under this Agreement, during the pendency of Dispute Resolution. All notices required to be sent pursuant to this Dispute Resolution procedure shall be sent in accordance with Section 19 of this Agreement. This Dispute Resolution procedure is separate from and in addition to all other processes provided for in this Agreement.

(a) The Party invoking Dispute Resolution shall send a notice to the other Party describing the dispute, stating the invoking Party's position with respect to the dispute, stating that the Party is invoking Dispute Resolution, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the invoking Party.

(b) Within three (3) business days after receipt of the notice invoking Dispute Resolution, the receiving Party shall send a notice to the invoking Party acknowledging receipt of the notice invoking Dispute Resolution, stating the receiving Party's position with respect to the dispute, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the receiving Party.

(c) During the period commencing three (3) business days and ending twenty (20) business days after the date of the receiving Party's notice, the designated representatives shall engage in good faith negotiations to attempt to resolve the dispute, *provided*, that the designated representatives may agree prior to the end of such twenty (20) business day period that the process should move to the next step of Dispute Resolution.

(d) If the designated representatives are unable to arrive at a resolution of the dispute by the end of the time period described in subsection (c), they shall notify the chief executive officers of their respective Parties. The chief executive officers of the Parties shall thereafter engage in good faith negotiations to attempt to resolve the dispute during the period of twenty (20) business days immediately following the time period described in subsection (c), *provided*, that the chief executive officers may agree prior to the end of such twenty (20) business day period that negotiations are at impasse and the process may move to the next step as described in subsection (f). Upon mutual agreement of the Parties, the twenty (20) business day period may be extended to pursue ongoing good faith negotiations.

(e) If a resolution of the dispute is achieved by the Parties, it shall be memorialized in a writing that is acceptable in form and substance to each party and is signed by the designated representative or chief executive officer on behalf of each Party.

(f) If the Parties are unable to resolve the dispute pursuant to the process described in subsections (a) through (e), then either Party may invoke any other available dispute resolution mechanism, including, without limitation, filing a complaint or petition with the Commission requesting resolution of the dispute by the Commission, or filing a complaint for relief in a court having jurisdiction over Parties and the subject matter of the dispute in accordance with Section 20. *Provided, however*, that: (i) it is the intent of the Parties that unresolved disputes shall be presented to and resolved by the Commission if the Commission has and accepts jurisdiction over the subject matter of the dispute, (ii) the Parties may, by mutual agreement, attempt to resolve the dispute through arbitration, mediation, or other process involving resort to an impartial neutral, and (iii) it is the intent of the Parties that resolution of disputes through Commission proceedings, arbitration, mediation, or other use of an impartial neutral, is preferred over resort to judicial proceedings.

(g) This Section 18 shall not apply to compliance enforcement actions against individual Registered Entities.

19. **Notice.** Whether expressly so stated or not, all notices, demands, requests, and other communications required or permitted by or provided for in this Agreement shall be given in writing to a Party at the address set forth below, or at such other address as a Party shall designate for itself in writing in accordance with this Section, and shall be delivered by hand or reputable overnight courier:

20. **Governing Law.** When not in conflict with or preempted by federal law, this Agreement will be governed by and construed in accordance with the laws of New Jersey without giving effect to the conflict of law principles thereof. The Parties recognize and agree not to contest the exclusive or primary jurisdiction of the Commission to interpret and apply this Agreement; provided however that if the Commission declines to exercise or is precluded from exercising jurisdiction of any action arising out of or concerning this Agreement, such action shall be brought in any state or federal court of competent jurisdiction in New Jersey. All Parties hereby consent to the jurisdiction of any state or federal court of competent jurisdiction in New Jersey for the purpose of hearing and determining any action not heard and determined by the Commission.

21. **Headings.** The headings and captions in this Agreement are for convenience of reference only and shall not define, limit, or otherwise affect any of the terms or provisions hereof.

22. **Savings Clause.** Nothing in this Agreement shall be construed to preempt or limit any authority that ~~[REGIONAL ENTITY]~~Midwest Reliability Organization may have to adopt reliability requirements or take other actions to maintain reliability of the Bulk-Power System within the geographic boundaries described in **Exhibit A** that are outside the Delegated Authority, as long as such reliability requirements and actions are not inconsistent with Reliability Standards applicable to the region described in **Exhibit A** and do not result in a lessening of reliability outside the region described in **Exhibit A**.

23. **Entire Agreement.** This Agreement constitutes the entire agreement, and supersedes all prior agreements and understandings, both written and oral, among the parties with respect to the subject matter of this Agreement.

24. **Execution of Counterparts.** This Agreement may be executed in counterparts and each shall have the same force and effect as the original.

NOW THEREFORE, the parties have caused this Agreement to be executed by its duly authorized representatives, effective as of the Effective Date.

Exhibit A — Regional Boundaries

Exhibit A to the delegation agreement for each Regional Entity receiving Delegated Authority shall describe the geographic or electrical boundaries covered by the proposed delegation of authority. **Exhibit A** for each Regional Entity shall reflect coordination with neighboring Regional Entities, as appropriate, to ensure that all relevant areas are either included within the geographic boundaries of a Regional Entity or specifically identified as not being within the geographic boundaries of any Regional Entity. Any exclusions of geographic or electrical areas or of Registered Entities from the scope of the Regional Entity's Delegated Authority within the geographic or electrical boundaries shown on **Exhibit A**, and any additions of geographic or electrical areas or of Registered Entities located outside the boundaries shown on **Exhibit A** to the scope of the Regional Entity's Delegated Authority, shall be specifically stated or described in **Exhibit A**.

MRO is one of eight regional entities that comprise the North American Electric Reliability Corporation (NERC). MRO is a not for profit entity committed to safeguarding and improving reliability of the Bulk Power System in the upper Midwest part of North America and the Canadian provinces of Manitoba and Saskatchewan. The Midwest Reliability Organization region supplies approximately 280,000,000 terawatt-hours to more than twenty million people and covers roughly one million square miles.

There are several Regional Transmission Organizations that overlap MRO and other Regional Entity footprints. MRO coordinates its delegated responsibilities with these neighboring Regional Entities to avoid duplicity and ensure consistency and accuracy. MRO does not have affiliates and does not perform any reliability functions that would result in a conflict or inability to perform the delegated responsibilities of this Agreement.

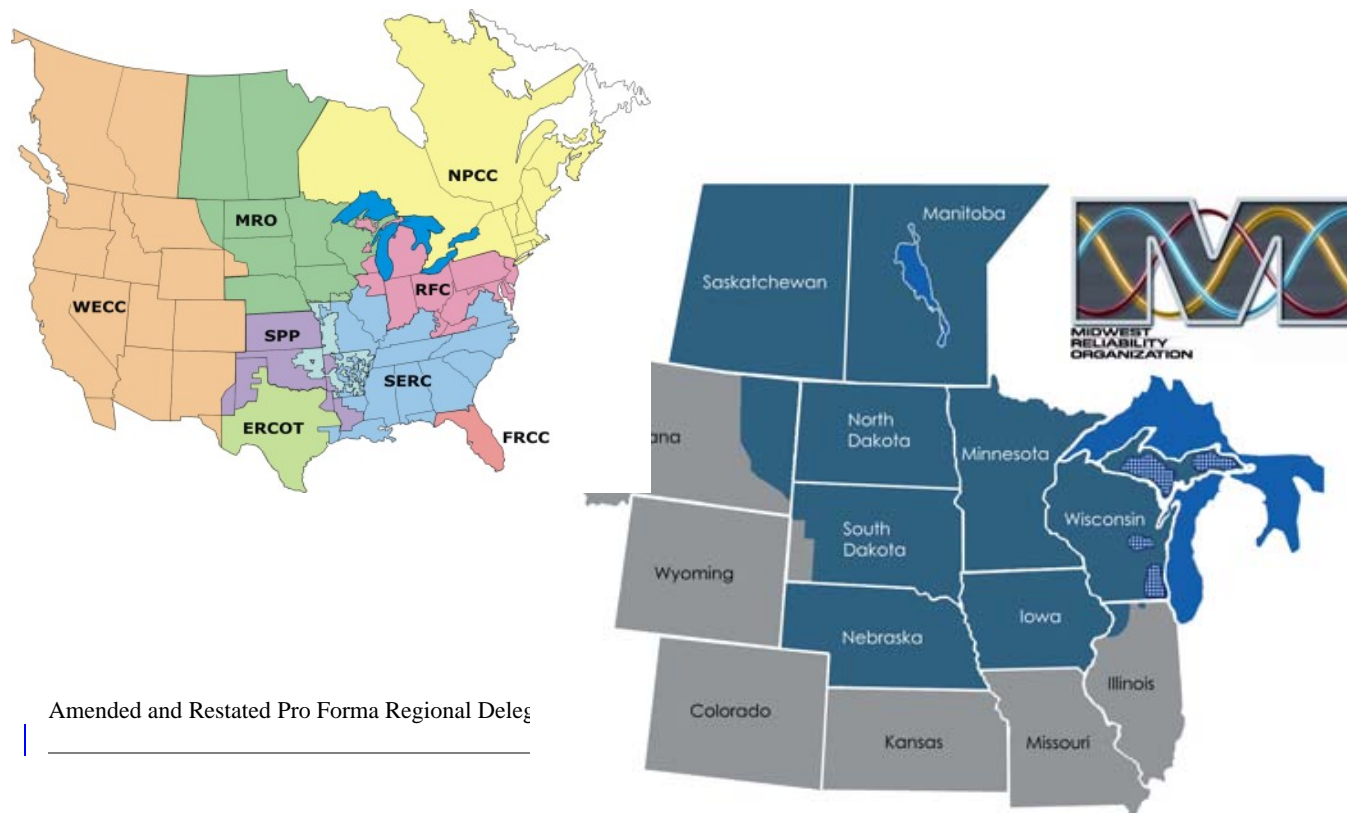

Exhibit B – Governance

Exhibit B shall set forth the Regional Entity’s bylaws, which NERC agrees demonstrate that the Regional Entity meets the following criteria:

CRITERION 1: The Regional Entity shall be governed by an independent board, a balanced stakeholder board, or a combination independent and balanced stakeholder board. (Federal Power Act § 215(e)(4)(A), 18 C.F.R. § 39.8(c)(1), Order No. 672 at ¶ 727.)

CRITERION 2: The Regional Entity has established rules that assure its independence of the users and owners and operators of the bulk power system, while assuring fair stakeholder representation in the selection of its directors. Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 699, 700.)

CRITERION 3: If the Regional Entity has members, the Regional Entity has established rules that assure that its membership is open, that it charges no more than a nominal membership fee and agrees to waive the fee for good cause shown, and that membership is not a condition for participating in the development of or voting on proposed Regional Reliability Standards. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 170-173.)

CRITERION 4: The Regional Entity has established rules that assure balance in its decision-making committees and subordinate organizational structures and assure no two industry sectors can control any action and no one industry sector can veto any action. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶ 728.)

CRITERION 5: The Regional Entity has established rules that provide reasonable notice and opportunity for public comment, due process, openness, and balance of interests in exercising its duties. (Federal Power Act § 215(c)(2)(D) and (e)(4), 18 C.F.R. § 39.8(c)(2).)

**BYLAWS
OF THE
MIDWEST RELIABILITY ORGANIZATION, INC
a Delaware nonprofit corporation
(the “Corporation”)**

**ARTICLE 1
DEFINITIONS**

Section 1.1 Affiliate. “Affiliate” means with respect to any entity, any other entity that, directly or indirectly, through one or more intermediaries, controls, or is controlled by, or is under common control with, such entity, as determined in the sole discretion of the board of directors of the Corporation. For this purpose, “control” may be presumed by the direct or indirect ownership of 50 percent or more of the outstanding voting capital stock or other equity interests having ordinary voting power. A member of, or owner of an interest in, a transmission company that FERC has found meets the independence requirements for a regional transmission organization shall not be deemed to be an affiliate of such transmission company.

Section 1.2 Bulk-Power System. “Bulk-Power System” means (1) facilities and control systems necessary for operating an interconnected electric energy transmission network (or any portion thereof); and (2) electric energy from generation facilities needed to maintain transmission system reliability. The term does not include facilities used in local distribution of electric energy. The term Bulk-Power System shall be interpreted consistently with any definition given by NERC.

Section 1.3 Bulk-Power System Users. “Bulk-Power System Users” means any entity that sells, purchases, or transmits electric power over the Bulk-Power System, or that owns, operates or maintains facilities or control systems that are part of the Bulk-Power System.

Section 1.4 Canadian Utilities. “Canadian Utilities” means any government-owned utility serving in Canada within the Corporate Region.

Section 1.5 Cooperative. “Cooperative” means an entity serving within the Corporate Region which generally has the following characteristics: (1) private independent electric utility; (2) incorporated under the laws of the states in which they operate; (3) established to provide electric service to its members; (4) owned by the consumers they serve; and (5) governed by a board of directors elected from the membership. This sector includes Generation and Transmission Cooperatives and Public Utility Districts.

Section 1.6 Corporate Region. “Corporate Region” means the geographic area boundaries of the Bulk-Power Systems as designated by each of the Members.

Section 1.7 FERC. “FERC” means the Federal Energy Regulatory Commission.

Section 1.8 Federal Power Marketing Agencies. “Federal Power Marketing Agencies” means agencies of the federal government created to market power within the Corporate Region.

Section 1.9 Generators and Power Marketers. “Generators and Power Marketers” means any entity that owns or operates more than 50 MW of generation in the Corporate Region, or is a power marketer doing business in the Corporate Region, and that does not qualify also to participate in the Investor-Owned Utility, Cooperative, Municipal Utility, Federal Power Marketing Agency or Canadian Utilities Sector.

Section 1.10 Good Utility Practice. “Good Utility Practice” means any of the practices, methods and acts engaged in or approved by a significant portion of the electric utility industry during the relevant time period, or any of the practices, methods and acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result at a reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice, method, or act to the exclusion of all others, but rather to be acceptable practices, methods, or acts generally accepted in the region.

Section 1.11 Industry Sector(s). “Industry Sector or Sector(s)” means a group of Bulk-Power System Users in the Corporate Region with substantially similar reliability interests, as determined by these Bylaws. The Industry Sectors shall include the following: (1) Transmission System Operators; (2) Generators and Power Marketers; (3) Investor Owned Utilities (4) Cooperatives; (5) Municipal Utilities (6) Federal Power Marketing Agencies; (7) Canadian Utilities; (8) Large End-Use Electricity Customers; and (9) Small End-Use Load Electricity Customers.

Section 1.12 Investor Owned Utility. “Investor Owned Utility” means any for-profit entity that owns and operates a distribution system and serves end-use load within the Corporate Region pursuant to an obligation to serve under state, federal or provincial law, including a default service obligation, or pursuant to a tariff by which the entity offers service to the general public.

Section 1.13 Large End-Use Electricity Customers. “Large End-Use Electricity Customers” means any entity in North America with: (1) at least one service delivery taken at 50 kV or higher (radial supply or facilities dedicated to serve customers) that is not purchased for resale; or (2) any single end-use customer with an average aggregated service load (not purchased for resale) of at least 50,000 MWh annually, excluding cogeneration or other back feed to the serving utility. This sector also includes organizations are represent the interest of such entities.

~~**Section 1.14 MAPP** “MAPP” means the MAPP Reliability Council, pursuant to the MAPP Restated Agreement, as of November 11, 2001.~~

~~**Section 1.15**~~**Section 1.14 Member.** “Member” means a member of the Corporation.

~~Section 1.16~~**Section 1.15 Municipal Utilities.** “Municipal Utilities” means any electric utility that is owned by a state or municipality, or group of municipalities, including a joint action agency, which serves within the Corporate Region.

~~Section 1.17~~**Section 1.16 NERC.** “NERC” means the North American Electric Reliability ~~Council~~Corporation or a successor entity.

~~Section 1.18 Organizational Standards.~~ “~~Organizational Standards~~” means a ~~standard, including adequacy requirements, outside the authority of NERC that has been duly approved by the board of directors of the Corporation. Organizational Standards do not include Reliability Standards approved by NERC. Such Organizational Standards may be filed with the appropriate regulatory authorities.~~

~~Section 1.19~~**Section 1.17 Person.** “Person” means any natural person, corporation, Cooperative, partnership, association, or other private or public entity.

~~Section 1.20~~**Section 1.18 Public Utility District.** “Public Utility District” means an entity that is a state political or governmental subdivision which owns electric generation, transmission and distribution facilities and that was created and organized under state statutes that are different than those that Municipal Utilities in the same state are created and organized under.

~~Section 1.21~~**Section 1.19 Regional Entity.** “Regional Entity” means an entity having ~~enforcement~~ authority pursuant to a delegation agreement with NERC and pursuant to any agreements or laws relating to the Corporation’s functions in Canada.

~~Section 1.22~~**Section 1.20 Regulatory Participant.** “Regulatory Participant” means any state or provincial regulatory agencies in the Corporate Region exercising authority over the rates, terms or conditions of electric service of an entity other than itself within the Corporate Region, or the planning, siting, construction or operation of electric facilities of an entity other than itself within the Corporate Region, as well as any representatives of FERC, regional advisory bodies that may be established by FERC, or representatives of any federal regulator or agency.

~~Section 1.23~~**Section 1.21 Reliability Standard.** “Reliability Standard” means a NERC reliability standard, duly in effect, under the rules, regulations and laws governing such standards, to provide for reliable operation of the Bulk-Power System.

~~Section 1.24~~**Section 1.22 Small End-Use Electricity Customers.** “Small End-Use Electricity Customers” means: (1) any person or entity within North America that takes service below 50 kV; or (2) any single end-use customer with an average aggregated service load (not purchased for resale) of less than 50,000 MWh annually, excluding cogeneration or other back feed to the serving utility. This sector also includes organizations (including state consumer advocates) that represent the interests of such entities.

Section 1.23 Transmission System Operator. “Transmission System Operator” means an entity that operates or controls operation of high voltage transmission facilities within the Corporate Region (more than 300 miles of transmission at 100 kV or greater) that

does not also own, operate or control generation within the Corporate Region, except to the limited extent permitted by FERC for independent transmission organizations with respect to ancillary service obligations. Transmission System Operators include: (1) regional transmission organizations; (2) independent transmission providers; (3) independent system operators ~~approved by FERC~~; (4) and transmission-only companies.

Section 1.24 Regional Planning Entity. “Regional Planning Entity” means an entity which is subject to Reliability Standards in the MRO Region and shall be eligible for MRO membership.

ARTICLE 2
PURPOSE

Section 2.1 Purpose. The Corporation will be a Regional Entity within the NERC structure for the purpose of preserving and enhancing electric service reliability, adequacy and security in the Corporate Region and other interconnected regions for the benefit of all end-users of electricity and all entities engaged in providing electric services in the Corporate Region, with due regard for safety, environmental protection and economy of service.

Section 2.2 Activities. In support and furtherance of its purpose, the Corporation’s responsibilities shall include, but not be limited to: ~~(1) proposing Reliability Standards, including regional variances or regional differences-Reliability Standards~~ required to maintain and enhance electric service reliability, adequacy and security in the Corporate Region; ~~(2) approving Organizational Standards;~~ ~~(23) assessing compliance with and enforcing Reliability Standards and Organizational Standards, to the extent authorized by applicable agreements and/or law governing a Member's membership in the Corporation;~~ ~~(34) conducting investigations and data analysis on disturbances, system events, and related matters;~~ ~~(45) conducting long-term assessments of reliability within the Corporate region;~~ and ~~(56) other related activities.~~

Section 2.3 Not-for-Profit Corporation. The Corporation is operated as a Delaware non-stock, nonprofit corporation and is organized pursuant to the general corporation law of the State of Delaware.

ARTICLE 3
POWERS

Section 3.1 Powers. The Corporation shall have the power to engage in any lawful act or activity for which corporations may be organized under the general corporation law of the State of Delaware, subject to any limitations provided in applicable federal, provincial or state law or in the Corporation’s certificate of incorporation or these Bylaws.

ARTICLE 4
OFFICES

Section 4.1 Offices. The principal office of the Corporation shall be located initially within the Corporate Region, at such location as the board of directors may from time to time determine, giving consideration to the total cost to the Corporation and

convenience of travel for staff, Members and Regulatory Participants. Once established, the principal office may remain in its location, even if outside the Corporate Region.

ARTICLE 5
MEMBERS

Section 5.1 Classes of Members. The Corporation shall have one class of Members. Each Affiliate of a Member may separately be a Member.

Section 5.2 Qualifications of Members. A Member may be any entity eligible to be a member of an Industry Sector.

Section 5.3 Admission of Members. New Members may join the Corporation upon submittal of an application, in a form approved by the president, and payment of the fees as established by the Corporation. The Member shall designate the Sector to which it belongs. A Member may change its Sector designation once each calendar year, by providing notice to the president at least sixty (60) days prior to the beginning of such year. The president shall review a membership application and may request demonstration by the applicant that it qualifies for membership in a particular Sector. Any dispute with respect to a Member's qualifications for a particular Sector shall be resolved by the board of directors. The president shall have authority to approve an application for membership, subject to review by the board of directors.

Section 5.4 Voting Rights. Each Member in good standing shall be entitled to one vote in the Sector in which it is a Member, on matters submitted to a vote of Members. A Member delinquent in payment of its dues, fees or other obligations to the Corporation shall not be entitled to a vote.

Section 5.5 Transfer of Membership. A Member of the Corporation may not transfer its membership or a right arising from such membership except to any Person succeeding to all or substantially all of the assets of the Member. The president shall have authority to approve any such transfer, subject to review by the board of directors.

Section 5.6 Obligations of Members. By applying for and becoming a Member of the Corporation, each Member acknowledges that it is authorized and agrees to comply with ~~Organizational Standards~~, Reliability Standards, and other obligations of Members of the Corporation set forth in these Bylaws or duly adopted by the board of directors in order to achieve the purposes of the Corporation. Such obligations include but are not limited to requirements to provide data and information needed to perform the functions of the Corporation and the payment of dues and any authorized penalties, including penalties and other obligations resulting from violations of: ~~(1) Reliability Standards assessed in accordance with NERC rules; and (2) Organizational Standards assessed in accordance with rules duly approved by the board of directors.~~ All monies, plus any accumulated interest that the Corporation collects from the issuance of penalties resulting from violations of ~~Organizational Standards shall be used by the Corporation to defer expenses or distributed in a fair and equitable manner to Members, as determined by the board of directors.~~

Section 5.7 Withdrawal. A Member may withdraw from participation in the Corporation by providing written notice to the president of the Corporation of such withdrawal. Such notice shall specify a date, not earlier than thirty (30) days from the date of notice, on which the withdrawal shall become effective; provided however, that any such withdrawing Member shall remain liable to the Corporation for any fees, dues, sanctions or obligations to the Corporation incurred while it was a Member, ~~or which apply to violations of Organizational Standards that occurred prior to the effective date of withdrawal,~~ as well as its share of any obligations of the Corporation for the current fiscal year. If notice is given after October 1 of the current calendar year, the Member will also be liable for any fees and dues included in the budget for the following fiscal year. ~~The Member will not be responsible for compliance with Organizational Standards after the withdrawal date.~~ Section 5.7 does not apply to any fees, dues, or obligations associated with the Corporation responsibilities under delegated authority from NERC or applicable regulatory authorities.

Section 5.8 Budget and Fees. The board of directors shall propose to NERC a budget for delegated functions exercised by the Corporation pursuant to a delegation agreement with NERC and pursuant to any agreements or laws relating to the Corporation's functions in Canada. For those functions outside the scope of the Corporation's delegated functions, the board of directors may from time to time fix the amount of dues, assessments, or fees, if any, and determine the methods of collection, consistent with this Section, the regulations of applicable government authorities, or with and any resolutions duly adopted by the Members under Section 6.5.2 of these Bylaws ~~and with regulations from applicable government authorities.~~

ARTICLE 6 **MEETING OF MEMBERS**

Section 6.1 Annual Meeting of Members. The Members shall hold an annual meeting each calendar year. The annual meeting of the Members shall be held in December of each year, or at such other time specified by the board of directors, in order for Members to review the proposed budget and operations of the Corporation. All Members shall be entitled to at least thirty (30) days prior written notice of the annual meeting. At the annual meeting of Members: (1) each Sector shall elect the successor(s), if any, for any director(s) from their Sector whose term will expire before the next annual meeting of the Members, provided however, that any Sector may elect a successor director representing such Sector prior to such annual meeting, in accordance with the provisions of this Article 6, in which case the election of such succeeding director(s) shall be reported to the Corporation at such annual meeting; (2) the president and treasurer shall report on the activities and financial condition of the Corporation; ~~(3) the Members shall review, and may modify, the budget of the Corporation for the ensuing year (if not modified, the budget as approved by the board of directors shall be deemed accepted);~~ and ~~(34)~~ the Members shall consider and act upon such other matters as may be raised, consistent with the notice of the annual meeting. The failure to hold an annual meeting in accordance with these Bylaws shall not affect the validity of a corporate action.

Section 6.2 Special Meetings of Members.

6.2.1 Who May Call. Special meetings of the Members may be called by six (6) members of the board of directors, by the president or if at least 10 percent of the Members sign, date, and deliver to the president one or more written demands for a special meeting describing the purpose for which it is to be held.

6.2.2 Notice of Meeting. Within fifteen (15) days after receipt of a demand for a special meeting from Members, the president shall cause a special meeting to be called and held on notice no later than forty-five (45) days after receipt of the demand. If the president fails to cause a special meeting to be called and held as required by this section, a Member making the demand may call the meeting by giving notice under Section 6.3. In either event, notice of the meeting and the costs of the meeting shall be at the expense of the Corporation.

6.2.3 Time and Place of Special Meetings. Special meetings of Members shall be held at a location designated by the president or the board of directors. If a special meeting is demanded by the Members, the meeting must be held in a facility of appropriate size to accommodate the Membership and at a location within the Corporate Region.

6.2.4 Notice Requirements; Business Limited. The notice of a special meeting must contain a statement of the purposes of the meeting. The business transacted at a special meeting is limited to the purposes stated within the notice of the meeting. Business transacted at a special meeting that is not included in those stated purposes is voidable by or on behalf of the Corporation, unless 90 percent of the Members entitled to vote were present at such meeting or have waived notice of the meeting under Section 6.3.

Section 6.3 Notice Requirements.

6.3.1 To Whom Given. Notice of meetings of Members must be given to every Member as of the record date determined under Section 6.4. If the meeting is an adjourned meeting and the date, time and place of the meeting were announced at the time of the adjournment, notice is not required unless a new record date for the adjourned meeting is or must be fixed.

6.3.2 When Given; Contents. In all cases where a specific minimum notice period has not been fixed by law or these Bylaws, the notice must be given at least five (5) days before the date of a meeting and not more than sixty (60) days before the date of a meeting. The notice must contain the date, time and place of the meeting, and an agenda of the matters upon which action may be taken at the meeting. A matter may be added to the agenda of a meeting at the meeting upon the affirmative vote of three-quarters (3/4) of the Sector votes cast on a motion to amend the agenda.

6.3.3 Waiver of Notice; Objections. A Member may waive notice of a meeting of Members. A waiver of notice by a Member entitled to notice is effective whether given before, at, or after the meeting, and whether given in writing, or by attendance. Attendance by a Member at a meeting is a waiver of notice of that meeting, unless the Member objects at the beginning of the meeting to the transaction of business because the meeting is not lawfully called or convened, or objects before a vote on an item of

business because the item may not lawfully be considered at that meeting and does not participate in the consideration of the item at that meeting.

Section 6.4 Record Date; Determining Members Entitled to Notice and Vote.

The board of directors may fix a date not more than forty (40) days before the date of a meeting of Members as the date for the determination of the Members entitled to notice of and entitled to vote at the meeting. When a date is so fixed, only Members on that date are entitled to notice and to vote at a membership meeting unless the board of directors fixes a new date for determining the right to notice and to vote, which it must do if the meeting is adjourned to a date more than sixty (60) days after the record date for determining Members entitled to notice of the original meeting.

Section 6.5 Right to Vote; Act of Members. Voting of the Members shall be by Sector, with each Sector entitled to the same number of votes as it has directors on the board. If a quorum is present, except with respect to amendments of these Bylaws, modification of a budget approved by the board of directors or termination of the Corporation, the affirmative vote of the majority of the Sector votes present and entitled to vote, which must also be a majority of the required quorum, is the act of the Members. Within a Sector, each Member within the Sector shall have one vote. If a quorum is present with respect to the Sector, the affirmative vote of the majority of the Members within the Sector present and entitled to vote, which must also be a majority of the required quorum, is the act of the Sector. All of the Sector's votes shall be cast consistent with the act of the Sector unless the Sector adopts a fractional voting alternative as described in Section 6.5.3.

6.5.1 Special Voting Requirements. In order to amend the Bylaws, except as provided in Article 20 with respect to the board of directors, two-thirds (2/3) of the Sector votes cast shall be required to approve the proposed amendment. The substance of the proposed amendment must be contained in the notice of the meeting at which the vote will be taken; provided that, the Members may modify a proposed bylaw amendment at the meeting. ~~Two-thirds (2/3) of the Sector votes cast shall be required to approve a proposed modification of a budget approved by the board.~~ Two-thirds (2/3) of the Sector votes cast shall be required to approve any proposal to terminate the Corporation. To the extent practicable, all Member votes may be held electronically under such terms and conditions as are approved by the Board.

6.5.2 Change of Dues Structure. The Members may change the dues structure by resolution with an affirmative vote of two-thirds (2/3) of the Sector votes cast.

6.5.3 Fractional Voting Alternative. A Sector may adopt fractional voting. Member votes for and against are converted to percentages and multiplied by the applicable sector weight. Abstentions are not counted and do not impact the voting tabulation.

Section 6.6 Quorum. A quorum for a meeting of Members is a majority of the Sector votes entitled to vote at the meeting. A quorum for a meeting of a Sector is a majority of the Members of that Sector present or voting electronically on matters before the meeting. A quorum is necessary for the transaction of business at a meeting of Members. If a quorum

is not present, a meeting may be adjourned from time to time for that reason by the Sectors or Members then represented or present.

Section 6.7 Action by Written Ballot. An action that may be taken at a regular or special meeting of Members may be taken without a meeting if the Corporation mails or delivers a written ballot to every Member entitled to vote on the matter. Whenever possible, voting by Sectors for directors shall be by written ballot preceding the regular meeting of the Members.

Approval by written ballot is valid only when the number of votes cast by ballot equals or exceeds the quorum required to be present at a meeting authorizing the action, and the number of approvals equals or exceeds the number of votes that would be required to approve the matter at a meeting at which the total number of votes cast was the same as the number of votes cast by ballot.

Solicitations for votes by written ballot must: (1) indicate the number of responses needed to meet the quorum requirements; (2) state the percentage of approvals necessary to approve the matter; and (3) specify the time by which a ballot must be received by the Corporation in order to be counted. A written ballot may not be revoked.

Section 6.8 Action by Electronic Communication. Any vote of a Sector to elect a board member or for any other purpose may be taken by electronic means without a meeting or during a meeting. In addition, a conference among Members by a means of communication through which the participants may simultaneously hear each other during the conference is a meeting of the Members, if the same notice is given of the conference as would be required for a meeting and if the number of persons participating in the conference is a quorum. Participation in a meeting by this means is personal presence at the meeting. A Member may participate in a meeting of the Members by a means of communication through which the Member, other persons participating, and all persons physically present at the meeting may simultaneously communicate with each other during the meeting. Participation in a meeting by this means constitutes personal presence at the meeting.

Section 6.9 Member Representatives; Proxies.

6.9.1. Designation of Representative. Each year prior to the annual meeting of Members, each Member shall designate the individual authorized to vote on Corporation matters on behalf of the Member, in accordance with procedures approved by the board. A Member may change such designation at any time.

6.9.2 Authorization. The individual designated to vote by a Member may appoint a proxy to vote or otherwise act for the Member at any meeting or electronically by signing an appointment form either personally or by an attorney so designated by the Member.

6.9.3 Effective Period. An appointment of a proxy is effective when received by the secretary or other officer or agent authorized to tabulate votes. An appointment is valid for the next regular or specially scheduled meeting or electronic ballot. However, a proxy is not valid for more than sixty (60) days from its date of execution.

6.9.4 Revocation. An appointment of a proxy is revocable by the Member. Appointment of a proxy is revoked by the person appointing the proxy by signing and delivering to the secretary or other officer or agent authorized to tabulate proxy votes. This may be done either in a written statement that the appointment of the proxy is revoked or a subsequent appointment form.

Section 6.10 Reimbursement of Member Expenses. The Corporation will be under no obligation to reimburse Members for expenses associated with their attendance at regular or special Member meetings.

ARTICLE 7 BOARD OF DIRECTORS

Section 7.1 Management of Corporation. Consistent with these Bylaws, the business and affairs of the Corporation shall be managed by or under the direction of a board of directors. The duties of the board will include, but will not be limited to the following: (1) govern the Corporation and oversee all of its activities; (2) establish and oversee all organizational groups; (3) oversee accomplishment of all functions set forth in any delegation or other agreement with NERC or any governmental entity related to development, monitoring and enforcement of Reliability Standards and related matters; (4) approve, revise and enforce ~~Organizational Standards, Member data and information requirements and related confidentiality requirements; (5) establish compliance monitoring procedures and requirements, and penalties and sanctions for non-compliance for Organizational Standards; (6) impose penalties and sanctions for violation of Organizational Standards consistent with these Bylaws and the procedures approved by the board~~ (57) establish and approve an annual budget; (68) represent the Corporation in legal and regulatory proceedings; (78) hire the president. The board of directors shall select a chair and a vice-chair from among the members of the board. The board may establish board committees as appropriate.

Section 7.2 Voting. Each director shall have one vote with respect to decisions of the board.

Section 7.3 Composition of the Board of Directors. The board of directors shall consist of nineteen (19) board members elected by the Sectors as follows:

- (a). Three (3) directors from the Transmission System Operators Sector;
- (b). Two (2) directors from the Generators and Power Marketers Sector;
- (c). Five (5) directors from the Investor Owned Utilities Sector;
 - (1). Two (2) directors must be from utilities with less than 3,000 megawatts of end-use load.
 - (2). Three (3) directors must be from utilities with 3,000 megawatts or greater of end-use load.

- (d). Two (2) directors from the Cooperative Sector;
- (e). Two (2) directors from the Municipal Utilities Sector;
- (f). One (1) director from the Federal Power Marketing Agencies;
- (g). Two (2) directors from the Canadian Utilities Sector provided that both directors are not residents of the same Canadian province;
- (h). One (1) director from the Large End-Use Electricity Customers Sector, and
- (i). One (1) director from the Small End-Use Electricity Customers Sector.

Provided, however, that in choosing directors from a sector, there shall not be more directors from a particular Sector than there are actual Members of such Sector.

Members shall endeavor to select directors from among individuals holding senior management ~~or officer~~ positions in Member organizations, and with a view toward ensuring geographic representation of the Corporate Region on the board. No two directors may be employees of a single Member or employees of Members that are affiliates. To the extent the Members of a Sector do not select a director, that director position shall remain vacant until a director is selected by the Sector. ~~A Sector may elect an alternate representative to participate in meetings of the board if the elected director of the Sector is not able to attend, provided however, that such representative shall not have any voting rights on the board and any participation by such representative in executive sessions of the board is at the board's discretion.~~

Section 7.4 Terms of Directors. The directors will serve three-year, staggered terms. The terms of the initial directors will be selected by lot at the first meeting of the board of directors. Any director may be removed at any time by the affirmative vote of two-thirds (2/3) of the Members of the Sector selecting such director. A director may be removed by the board of directors for non-attendance of three consecutive board meetings.

Section 7.5 Reimbursement. Directors shall have the right to reimbursement by the Corporation of their actual reasonable travel expenses to board meetings or when specifically selected to represent the Corporation at a business meeting.

Section 7.6 Vacancies. If a director resigns, dies, changes corporate affiliation or is removed during the term of office for which elected, the directorship shall thereupon be vacant and shall be filled by the Members of the respective Sector, by written or electronic ballot in accordance with the procedures and requirements set forth above. The successor director elected by the Members of the Sector shall hold office for the unexpired term of the director replaced.

Section 7.7 Meetings; Notice. An annual meeting of the board of directors shall be held without notice immediately following the annual meeting of the Members to elect the chair and vice-chair for the next year. In addition, regular meetings may be held at such time

or times as fixed by the board of directors. Schedules of regular meetings of the board of directors shall be published by the secretary and provided to all Members. Special meetings of the board of directors may be called by the president or by three directors and shall be held at the principal office of the Corporation, or such other place within the Corporate Region as determined by the president after consultation with the board. Notice of the date, time, and place of a special meeting shall be given by the secretary not less than seven (7) days prior to the meeting by mail, telegram, or electronic communication to each director and Member. Except as necessary to discuss personnel issues, litigation or similar sensitive or confidential matters, all meetings of the board of directors shall be open to Members and other interested persons.

Section 7.8 Quorum. ~~A majority Two-thirds (2/3) of the directors currently holding office is a quorum for the transaction of business. In the absence of a quorum, a majority of the directors present may adjourn a meeting from time to time until a quorum is present.~~

Section 7.9 Board Action. The act of a majority of the directors present at a meeting at which a quorum is present shall be the act of the board of directors, unless the act of a greater number is required by law or these Bylaws.

Section 7.10 Action Without a Meeting. An action required or permitted to be taken at a board of directors meeting may be taken by written action, including electronic communication, signed by all of the directors of the Corporation. The written action is effective when signed by the required number of directors, unless a different effective time is provided in the written action.

Section 7.11 Action by Electronic Communication. A conference among directors by a means of communication through which the directors may simultaneously hear each other during the conference is a board meeting if the same notice is given of the conference as would be required for a meeting and if the number of directors participating in the conference is a quorum. Participation in a meeting by this means constitutes personal presence at the meeting. A director may participate in a board meeting by any means of communication through which the director, other directors participating, and all directors physically present at the meeting may simultaneously communicate with each other during the meeting.

ARTICLE 8
ORGANIZATIONAL GROUPS

Section 8.1 Establishment of Organizational Groups. The board of directors shall establish such organizational groups, consisting of committees, sub-committees, task forces and working groups of Members, as are necessary and appropriate to accomplish the purposes of the Corporation in an efficient and cost-effective manner. All organizational groups shall be subject to the direction and control of the board. The membership of organizational groups shall be determined based upon experience, expertise and geographic diversity and to the extent practicable shall include balanced representation of the Sectors.

The board of directors shall establish policies and procedures governing the creation of organizational groups, how they are populated, how voting and related matters are conducted and how they may be reorganized. The board shall conduct a review of all organizational groups of the Corporation on a ~~periodic~~ annual basis to ensure that the business of the Corporation is conducted in an efficient, cost-effective manner and shall include a statement of its conclusions and resulting actions in the board's report to Members at the annual meeting.

Section 8.2 Reimbursement. Consistent with the annual budget of the Corporation, the Board may authorize reimbursement by the Corporation for members of organizational groups (other than committees of the whole) of reasonable travel, meals and lodging expenses for organizational group meetings or for representation of the Corporation at other business meetings as authorized by the board. The board of directors may authorize reimbursement for persons acting on behalf of the Corporation, as necessary in the interests of the Corporation.

ARTICLE 9 **OFFICERS**

Section 9.1 Officers. The officers of the Corporation shall include a president, a secretary, a treasurer and any other officers as may be elected or appointed in accordance with the provisions of this Article. The board of directors may elect or appoint any additional officers that it deems desirable, such other officers to have the authority and perform the duties prescribed by the board of directors. The same individual may hold any number of offices, except that of president.

Section 9.2 Election and Term of Office. The officers of the Corporation shall be elected by the board of directors. Each officer shall hold office at the pleasure of the board. New officers may be created and the positions filled at any meeting of the board of directors. Each elected officer shall hold office until his or her successor has been duly elected and qualified.

Section 9.3 Removal. Any officer elected by the board of directors may be removed by the affirmative vote of two-thirds (2/3) of the board of directors whenever in its judgment the best interests of the Corporation would be served thereby, but such removal shall be without prejudice to the contract rights, if any, of the officer so removed. Election or appointment of an officer or agent shall not of itself create contract rights.

Section 9.4 Vacancies. A vacancy in any office because of death, resignation, removal, disqualification, or otherwise, may be filled by the board of directors for the unexpired portion of the term.

Section 9.5 President. The president shall be, in the discretion of the board of directors, either an employee of or contractor to the Corporation and shall:

- (a). be the principal executive and operating officer of the Corporation;

(b). sign certificates of membership, and may sign any deeds, mortgages, deeds of trust, notes, bonds, contracts or other instruments authorized by the board of directors to be executed, except in cases in which the signing and execution thereof shall be expressly delegated by the board of directors or by these Bylaws to some other officer or agent of the Corporation; and

(c). perform all duties incident to the office of president, including hiring and directing staff, and such other duties as may be prescribed by the board of directors from time to time.

Section 9.6 Secretary. The secretary shall ensure that the following duties are carried out:

(a). the minutes of the meetings of the Members and of the board of directors are recorded;

(b). all required notices are duly given in accordance with these Bylaws and as required by law;

(c). a register of the current names and addresses of all Members is maintained;

(d). a complete copy of the articles of incorporation and Bylaws of the Corporation containing all amendments thereto are kept on file at all times, which copies shall always be open to the inspection of any Member; and

(e). generally perform all duties incident to the office of secretary and such other duties as may be prescribed by the board of directors from time to time.

Section 9.7 Treasurer. The treasurer shall be responsible for the following activities:

(a). maintain custody of all funds and securities of the Corporation;

(b). receipt of and the issuance of receipts for all monies due and payable to the Corporation and for deposit of all such monies in the name of the Corporation in such bank or banks or financial institutions as shall be selected by the board of directors; and

(c). generally perform all duties incident to the office of treasurer and such other duties as may be prescribed by the board of directors from time to time.

ARTICLE 10 **CERTIFICATES OF MEMBERSHIP**

Section 10.1 Certificates of Membership. The board of directors may provide for the issuance of certificates evidencing membership in the Corporation, which certificates shall be in such form as may be determined by the board.

ARTICLE 11
BOOKS AND RECORDS

Section 11.1 Books and Records; Financial Statements. The Corporation shall keep at its registered office correct and complete copies of its articles and Bylaws, accounting records, and minutes of meetings of Members, board of directors, and committees having any of the authority of the board of directors. A Member, or the agent or attorney of a Member, may inspect all books and records and voting agreements for any proper purpose at any reasonable time. Upon request, the Corporation shall give the Member a statement showing the financial result of all operations and transactions affecting income and surplus during its last annual accounting period and a balance sheet containing a summary of its assets and liabilities as of the closing date of the accounting period.

ARTICLE 12
FISCAL YEAR

Section 12.1 Fiscal Year. The fiscal year of the Corporation shall be the calendar year.

ARTICLE 13
TRANSFER OF ASSETS

Section 13.1 Member Approval Not Required. The Corporation, by affirmative vote of the board of directors, may sell, lease, transfer, or dispose of its property and assets in the usual and regular course of its activities and grant a security interest in all or substantially all of its property and assets in the usual and regular course of its activities, upon those terms and conditions and for those considerations, which may be money, securities, or other instruments for the payment of money or other property, as the board of directors considers expedient, in which case no Member approval is required.

Section 13.2 Member approval; when required. The Corporation may sell, lease, transfer, or dispose of all or substantially all of its property and assets, including its good will, not in the usual and regular course of its activities, upon those terms and conditions and for those considerations, which may be money, securities, or other instruments for the payment of money or other property, as the board of directors considers expedient only when approved at a regular or special meeting of the Members by the affirmative vote of two-thirds (2/3) of all the Members. Notice of the meeting must be given to the Members. The notice must state that a purpose of the meeting is to consider the sale, lease, transfer, or other disposition of all or substantially all of the property and assets of the Corporation.

ARTICLE 14
CONTRACTS, CHECKS, DEPOSITS, AND GIFTS

Section 14.1 Contracts. The board of directors may authorize any officer or officers or agent or agents of the Corporation, in addition to the officers so authorized by these Bylaws, to enter into any contract or execute and deliver any instrument in the name of and on behalf of the Corporation, and such authority may be general or may be confined to specific instances.

Section 14.2 Checks, Drafts, or Orders. All checks, drafts, or orders for the payment of money, notes, or other evidences of indebtedness issued in the name of the Corporation, shall be signed by such officer or officers or agent or agents of the Corporation, and in such manner as shall from time to time be determined by resolution of the board of directors.

Section 14.3 Deposits. All funds of the Corporation shall be deposited to the credit of the Corporation in such banks, trust companies, or other depositories as the board of directors may select.

Section 14.4 Gifts. The board of directors may accept on behalf of the Corporation any contribution, gift, bequest, or devise for any purpose of the Corporation.

ARTICLE 15 **INSURANCE, LIABILITY, AND INDEMNIFICATION**

Section 15.1 Insurance. The president is authorized to procure insurance to protect the Corporation against damages arising out of or related to any directive, order, procedure, action or requirement of the Corporation.

Section 15.2 Limitations on Liability. No director, officer, agent, employee or other representative of the Corporation, and no corporation or other business organization that employs a director of the Corporation, or any director, officer, agent or employee of such corporation or other business organization, shall be personally liable to the Corporation or any Member of the Corporation for any act or omission on the part of any such director, officer, agent, employee, or other representative of the Corporation, which was performed or omitted in good faith in his official capacity as a director, officer, agent, employee or other representative of the Corporation. However, this release of liability shall not operate to release such a director, officer, agent, employee or other representative of the Corporation from any personal liability resulting from willful acts or omissions knowingly or intentionally committed or omitted by him in breach of these Bylaws for improper personal benefit or in bad faith.

Section 15.3 Indemnification. It is the intent of the Corporation to indemnify its directors, officers, agents, employees, or other representatives to the maximum extent allowed by law consistent with these Bylaws. Each director, officer, agent, employee, or other representative of the Corporation shall be indemnified by the Corporation against all judgments, penalties, fines, settlements, and reasonable expenses, including legal fees, incurred by him as a result of, or in connection with, any threatened, pending or completed civil, criminal, administrative, or investigative proceedings to which he may be made a party by reason of his acting or having acted in his official capacity as a director, officer, agent, employee, or representative of the Corporation, or in any other capacity which he may hold at the request of the Corporation, as its representative in any other organization, subject to the following conditions:

(a). Such director, officer, agent, employee, or other representative must have conducted himself in good faith and, in the case of criminal proceedings, he must have

had no reasonable cause to believe that his conduct was unlawful. When acting in his official capacity, he must have reasonably believed that his conduct was in the best interests of the Corporation, and, when acting in any other capacity, he must have reasonably believed that his conduct was at least not opposed to the best interests of the Corporation.

(b). If the proceeding was brought by or on behalf of the Corporation, however, indemnification shall be made only with respect to reasonable expenses referenced above. No indemnification of any kind shall be made in any such proceeding in which the director, officer, agent, employee, or other representative shall have been adjudged liable to the Corporation.

(c). In no event, however, will indemnification be made with respect to any described proceeding which charges or alleges improper personal benefit to a director, officer, agent, employee, or other representative and where liability is imposed upon him on the basis of the receipt of such improper personal benefit.

(d). In order for any director, officer, agent, employee, or other representative to receive indemnification under this provision, he shall vigorously assert and pursue any and all defenses to those claims, charges, or proceedings covered hereby which are reasonable and legally available and shall fully cooperate with the Corporation or any attorneys involved in the defense of any such claim, charges, or proceedings on behalf of the Corporation.

(e). No indemnification shall be made in any specific instance until it has been determined by the Corporation that indemnification is permissible in that specific case, under the standards set forth herein and that any expenses claimed or to be incurred are reasonable. These two (2) determinations shall be made by a majority vote of at least a quorum of the board consisting solely of directors who were not parties to the proceeding for which indemnification or reimbursement of expenses is claimed. If such a quorum cannot be obtained, a majority of at least a quorum of the full board, including directors who are parties to said proceeding, shall designate a special legal counsel who shall make said determinations on behalf of the Corporation. In making any such determinations, the termination of any proceeding by judgment, order, settlement, conviction, or upon plea of nolo contendere, or its equivalent, shall not, in and of itself, be conclusive that the person did not meet the standards set forth herein.

(f). Any reasonable expenses, as shall be determined above, that have been incurred by a director, officer, agent, employee, or other representative who has been made a party to a proceeding as defined herein, may be paid or reimbursed in advance upon a majority vote of a quorum of the full board, including those who may be a party to the same proceeding. However, such director, officer, agent, employee, or other representative shall have provided the Corporation with (i) a written affirmation under oath that he, in good faith, believes that he has met the conditions for indemnification herein, and (ii) a written undertaking that he shall repay any amounts advanced, with interest accumulated at a reasonable rate, if it is ultimately determined that he has not met such conditions. In addition to the indemnification and reimbursement of expenses provided herein, the president shall purchase insurance that would protect the Corporation, its directors, officers, agents, employees, or other representatives against reasonably expected liabilities and expenses arising out of the performance of their duties for the Corporation.

TRANSITION

~~Except for those existing standards, criteria, rules, or guides that apply to the Generation Reserve Sharing Pool of the MAPP Restated Agreement, the Corporation will use the existing standards, criteria, rules or guides from each existing reliability council region for those Members that join the Corporation as in effect immediately prior to formation of the Corporation until such standards, criteria, rules or guides are adopted, superseded, or rejected by the Corporation. The Corporation will establish any necessary transition committees, subcommittees, working groups or task forces (including but not limited to a reliability committee) to administer the existing regional reliability standards, criteria, rules and guides until they are adopted, superseded, or rejected by the Corporation. The Corporation will employ its best efforts, within two years of its formation, to work toward a consistent set of Organizational and Reliability Standards (including operating reserves) for the entire Corporate Region, recognizing, however, that sub regional differences may warrant variances for certain sub regions.~~

Formatted: Indent: Left: 0.75"

ARTICLE 16 PARTICIPATION BY REGULATORY PARTICIPANTS

Section 16.1 All Regulatory Participants shall be entitled to and be provided with the same rights to notice of and participation in meetings or other activities of the Corporation as are provided to Members, but shall not have the right to vote.

ARTICLE 17 PARTICIPATION BY FEDERAL POWER MARKETING ADMINISTRATIONS

Section 17.1 The participation by the United States through Federal power marketing administrations (PMA) in the Corporation is subject in all respects to acts of Congress and to regulations of the Secretary of Energy established thereunder. This reservation includes, but is not limited to, the statutory limitations upon the authority of the Secretary of Energy to submit disputes arising hereunder to arbitration. In the event of a conflict between this Article 18 and any other Article of these Bylaws, this Article 18 shall have precedence with respect to the application of these Bylaws to the United States.

Section 17.2 Where activities provided for herein extend beyond the current fiscal year, continued expenditures by the United States are contingent upon Congress making the necessary appropriations required for the continued performance of the obligations of the PMA hereunder. In case such appropriations are not made, the Corporation and its Members hereby release the PMA from its contractual obligations under these Bylaws and from all liability due to the failure of Congress to make such appropriation.

Section 17.3 No member of or delegate to Congress shall be admitted to any share or part of, or to any benefit that may have arisen from, these Bylaws, but this restriction shall not be construed to extend to these Bylaws if made with a corporation or company for its general benefit.

Section 17.4 The Corporation and its Members warrant that no Person or selling agency has been employed or retained to solicit or secure participation by a PMA in the Corporation upon an agreement or understanding for a commission, percentage, brokerage or contingent fee, excepting *bona fide* employees or *bona fide* established commercial or selling agencies maintained by the Members for the purpose of securing business. For breach or violation of this warranty, a PMA shall have the right to annul its participation in the Corporation without liability or, in its discretion, to deduct from its dues or fees the full amount of such commission, percentage, brokerage, or contingent fee.

Section 17.5 For the purpose of this Section 18.5 the term “Contract” shall mean these Bylaws and the term “Contractor” shall mean the Corporation. During the performance of this Contract, the Contractor agrees to the following provisions.

187.5.1. Section 202 of the Executive Order No. 11246, 30 Fed. Reg. 12319 (1965), as amended by Executive Order No. 12086, 43 Fed. Reg. 46501 (1978), which provides, among other things, that the Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin, is incorporated by reference in the Contract.

178.5.2. The Contract, to the extent that it is of a character specified in Section 103 of the Contract Work Hours and Safety Standards Act, 40 U.S.C. § 329 (1986) (the “Act”), is subject to the provisions of the Act, 40 U.S.C. §§ 327-333 (1986), and to regulations promulgated by the Secretary of Labor pursuant to the Act.

178.5.3. The Contractor agrees not to employ any person undergoing sentence of imprisonment in performing the Contract except as provided by 18 U.S.C. § 4082(c)(2) and Executive Order 11755, 39 Fed. Reg. 779 (1973).

ARTICLE 18

HEARINGS DETERMINATION OF VIOLATIONS AND DISPUTE RESOLUTION

Section 18.1 Hearings. Except as otherwise provided in applicable agreements and/or law governing a Member's membership in the Corporation, the board of directors Corporation shall be responsible for making final determinations regarding whether (1) a Member has violated an Organizational Standard or a Reliability Standard; (2) an entity subject to a Reliability Standard has violated a Reliability Standard in connection with its operation in the Corporate Region; and (3) assessment of sanctions within the Corporate region resulting from such violations, following an initial determination by Corporation staff in accordance with the NERC Rules of Procedure. Any Member or entity organization subject to a Reliability Standard or Organizational Standard, against whom a penalty or other sanction has been recommended, shall have an opportunity to be heard by the board prior to the board's determination.

Formatted: Font: Bold, Underline

Section 18.2 Disputes. Dispute resolution procedures will be established by the board of directors for disputes between Members, or between a Member and the Corporation, for issues arising under these Bylaws. Determinations related to violations of Reliability Standards will be resolved in accordance with the NERC Rules of Procedure, except as

Formatted: Font: Bold, Underline

otherwise provided in applicable agreements and/or law governing a Member's membership in the corporation. provided that: (1) determinations by the Corporation related to violations of Reliability Standards shall only be appealed directly to NERC ; and (2) determinations of the Corporation related to violations of Organizational Standards shall be subject to dispute resolution only to the extent permitted by the rules of the Corporation regarding dispute resolution and provided that in any such dispute resolution proceeding the board of directors' determination of the meaning and scope of an Organizational Standard shall be final, subject to any right to appeal to any regulatory or other legal authority.

ARTICLE 19
AMENDMENT OF BYLAWS

Section 19.1 The power to adopt, amend or repeal these Bylaws is vested in the Members as set forth in Section 6.5 of these Bylaws; provided however, upon the passage of any federal reliability legislation, and/or the adoption of related requirements and procedures by NERC, ~~its successor under such legislation~~, or any regulatory agency with jurisdiction, the board or directors shall have authority upon a two-thirds (2/3) vote ~~of its members~~ to amend these Bylaws as necessary and appropriate to comply with such law and related requirements ~~and to qualify the Corporation for delegations of authority from NERC or its successor as provided in such legislation.~~

Exhibit C – Regional Standard Development Procedure

Exhibit C shall set forth the Regional Entity’s standards development procedure, which NERC agrees meets the following common attributes:

COMMON ATTRIBUTE 1

Proposed regional reliability standards shall be subject to approval by NERC, as the electric reliability organization, and by FERC before becoming mandatory and enforceable under Section 215 of the FPA ~~{add reference to any applicable authorities in Canada and Mexico}~~. No regional reliability standard shall be effective within the ~~{Regional Entity Name}~~ Midwest Reliability Organization area unless filed by NERC with FERC ~~{and applicable authorities in Canada and Mexico}~~ and approved by FERC ~~{and applicable authorities in Canada and Mexico}~~.

COMMON ATTRIBUTE 2

~~{Regional Entity Name}~~ Midwest Reliability Organization regional reliability standards shall provide for as much uniformity as possible with reliability standards across the interconnected bulk power system of the North American continent. ~~A {Regional Entity Name} A Midwest Reliability Organization~~ Midwest Reliability Organization reliability standard shall be more stringent than a continent-wide reliability standard, including a regional difference that addresses matters that the continent-wide reliability standard does not, or shall be a regional difference necessitated by a physical difference in the bulk power system. A regional reliability standard that satisfies the statutory and regulatory criteria for approval of proposed North American reliability standards, and that is more stringent than a continent-wide reliability standard, would generally be acceptable.

COMMON ATTRIBUTE 3

~~{Regional Entity Name}~~ Midwest Reliability Organization regional reliability standards, when approved by FERC ~~{add applicable authorities in Canada}~~, shall be made part of the body of NERC reliability standards and shall be enforced upon all applicable bulk power system owners, operators, and users within the ~~{Regional Entity Name}~~ Midwest Reliability Organization area, regardless of membership in the region.

COMMON ATTRIBUTE 4

Requester — The requester is the sponsor of the regional reliability standard request and may assist in the development of the standard. Any member of ~~{Regional Entity Name}~~, Midwest Reliability Organization, or group within ~~{Regional Entity Name}~~ Midwest Reliability Organization shall be allowed to request that a regional reliability standard be developed, modified, or withdrawn. Additionally, any entity (person, organization, company, government agency, individual, etc.) that is directly and materially affected by the reliability of the bulk

power system in the ~~[Regional Entity Name]~~Midwest Reliability Organization area shall be allowed to request a regional reliability standard be developed, modified, or withdrawn.

COMMON ATTRIBUTE 5

[Standards or other named] committee — The ~~[Regional Entity Name]~~Midwest Reliability Organization ~~[standards]~~Standards Ccommittee manages the standards development process. The ~~[standards]~~Standards Ccommittee will consider which requests for new or revised standards shall be assigned for development (or existing standards considered for deletion). The ~~[standards]~~Standards Ccommittee will advise the ~~[Regional Entity Name]~~Midwest Reliability Organization board on standards presented for adoption.

COMMON ATTRIBUTE 6

[Alternative 6A: For a Regional Entity -that chooses to vote using a balanced stakeholder committee.] NOT APPLICABLE

The [standards] committee is a balanced stakeholder committee, inclusive of all stakeholder interests that provide for or are materially impacted by the reliability of the bulk power system. [The [standards] committee votes to approve standards.] See Appendix A for the representation model of the [standards] committee.

[Alternative 6B: For a Regional Entity that chooses to vote using a balanced ballot body of stakeholders.]

[Registered ballot body — The registered ballot body comprises all entities or individuals that qualify for one of the stakeholder segments; are registered with ~~[Regional Entity Name]~~Midwest Reliability Organization as potential ballot participants in the voting on standards; and are current with any designated fees. Each member of the registered ballot body is eligible to vote on standards. [Each standard action has its own ballot pool formed of interested members of the registered ballot body. Each ballot pool comprises those members of the registered ballot body that respond to a pre-ballot survey for that particular standard action indicating their desire to participate in such a ballot pool.] The representation model of the registered ballot body is provided in Appendix A.]

COMMON ATTRIBUTE 7

~~[Regional Entity Name]~~Midwest Reliability Organization will coordinate with NERC such that the acknowledgement of receipt of a standard request identified in step 1, notice of comment posting period identified in step 4, and notice for vote identified in step 5 below are concurrently posted on both the ~~[Regional Entity Name]~~Midwest Reliability Organization and NERC websites.

COMMON ATTRIBUTE 8

An acceptable standard request shall contain a description of the proposed regional reliability standard subject matter containing sufficiently descriptive detail to clearly define the purpose, scope, impacted parties, and other relevant information of the proposed standard.

COMMON ATTRIBUTE 9

Within [no greater than 60] days of receipt of a completed standard request, the ~~{standards}~~Standards Ceommittee shall determine the disposition of the standard request.

COMMON ATTRIBUTE 10

The ~~{standards}~~Standards Ceommittee may take one of the following actions:

- Accept the standard request as a candidate for development of a new standard, revision of an existing standard, or deletion of an existing standard. The ~~{standards}~~Standards Ceommittee may, at its discretion, expand or narrow the scope of the standard request under consideration. The ~~{standards}~~Standards Ceommittee shall prioritize the development of standard in relation to other proposed standards, as may be required based on the volume of requests and resources.
- Reject the standard request. If the ~~{standards}~~Standards Ceommittee rejects a standard request, a written explanation for rejection will be delivered to the requester within [no greater than 30] days of the decision.
- Remand the standard request back to the requester for additional work. The standards process manager will make reasonable efforts to assist the requester in addressing the deficiencies identified by the ~~{standards}~~Standards Ceommittee. The requester may then resubmit the modified standard request using the process above. The requester may choose to withdraw the standard request from further consideration prior to acceptance by the ~~{standards}~~Standards Ceommittee.

COMMON ATTRIBUTE 11

Any standard request that is accepted by the ~~{standards}~~Standards Ceommittee for development of a standard (or modification or deletion of an existing standard) shall be posted for public viewing on the ~~[Regional Entity Name]~~Midwest Reliability Organization website within [no greater than 30] days of acceptance by the committee.

COMMON ATTRIBUTE 12

The standards process manager shall submit the proposed members of the drafting team to the ~~{standards}~~Standards Committee. The ~~{standards}~~Standards Committee shall approve the drafting team membership within 60 days of accepting a standard request for development, modifying the recommendations of the standards process manager as the committee deems appropriate, and assign development of the proposed standard to the drafting team.

COMMON ATTRIBUTE 13

At the direction from the ~~{standards}~~Standards Committee, the standards process manager shall facilitate the posting of the draft standard on the ~~{Regional Entity Name}~~Midwest Reliability Organization website, along with a draft implementation plan and supporting documents, for a no less than a {30}-day comment period. The standards process manager shall provide notice to ~~{Regional Entity Name}~~Midwest Reliability Organization stakeholders and other potentially interested entities, both within and outside of the ~~{Regional Entity Name}~~Midwest Reliability Organization area, of the posting using communication procedures then currently in effect or by other means as deemed appropriate.

COMMON ATTRIBUTE 14

The drafting team shall prepare a summary of the comments received and the changes made to the proposed standard as a result of these comments. The drafting team shall summarize comments that were rejected by the drafting team and the reason(s) that these comments were rejected, in part or whole. The summary, along with a response to each comment received will be posted on the ~~{Regional Entity Name}~~Midwest Reliability Organization website no later than the next posting of the proposed standard.

COMMON ATTRIBUTE 15

Upon recommendation of the drafting team, and if the ~~{standards}~~Standards Committee concurs that all of the requirements for development of the standard have been met, the standards process manager shall post the proposed standard and implementation plan for ballot and shall announce the vote to approve the standard, including when the vote will be conducted and the method for voting. Once the notice for a vote has been issued, no substantive modifications may be made to the proposed standard unless the revisions are posted and a new notice of the vote is issued.

COMMON ATTRIBUTE 16

The standards process manager shall schedule a vote by the ~~[Regional Entity Name]~~ Midwest Reliability Organization ~~[registered ballot body/standards]~~ committee. The vote shall commence no sooner than {15} days and no later than {30} days following the issuance of the notice for the vote.

COMMON ATTRIBUTE 17

[Alternative 17A: For an RE that chooses to vote using a balanced stakeholder committee.] Not Applicable

The [standards] committee shall give due consideration to the work of the drafting team, as well as the comments of stakeholders and minority objections, in approving a proposed regional reliability standard for submittal to the [Regional Entity Name] board. The [standards] committee may vote to approve or not approve the standard. Alternatively, the [standards] committee may remand the standard to the drafting team for further work or form a new drafting team for that purpose.

[Alternative 17B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

The ~~[Regional Entity Name]~~ The Midwest Reliability Organization registered ballot body shall be able to vote on the proposed standard during a period of {not less than 10} days.

COMMON ATTRIBUTE 18

[Alternative 18A: For an RE that chooses to vote using a balanced stakeholder committee.] Not Applicable

The [standards] committee may not itself modify the standard without issuing a new notice to stakeholders regarding a vote of the modified standard.

[Alternative 18B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

All members of ~~[Regional Entity Name]~~ Midwest Reliability Organization are eligible to participate in voting on proposed new standards, standard revisions or standard deletions. [Alternatively: Each standard action requires formation of a ballot pool of interested members of the registered ballot body.]

COMMON ATTRIBUTE 19

[Alternative 19A: For an RE that chooses to vote using a balanced stakeholder committee.]

Actions by the committee shall be recorded in the regular minutes of the committee.

[Alternative 19B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

Approval of the proposed regional reliability standard shall require a ~~two thirds~~ majority in the affirmative (affirmative votes divided by the sum of affirmative and negative votes). Abstentions and non-responses shall not count toward the results, except that abstentions may be used in the determination of a quorum. A quorum shall mean ~~XX%~~ 66.7% of the members of the [registered ballot body/ballot pool] submitted a ballot.

COMMON ATTRIBUTE 20

Under no circumstances may the board substantively modify the proposed regional reliability standard.

COMMON ATTRIBUTE 21

Once a regional reliability standard is approved by the board, the standard will be submitted to NERC for approval and filing with FERC ~~and applicable authorities in Canada and Mexico.~~

COMMON ATTRIBUTE 22

- **Open** - Participation in the development of a regional reliability standard shall be open to all organizations that are directly and materially affected by the ~~Regional Entity Name~~ Midwest Reliability Organization power system reliability. There shall be no undue financial barriers to participation. Participation shall not be conditioned upon membership in ~~Regional Entity Name~~, Midwest Reliability Organization, and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements. Meetings of drafting teams shall be open to the ~~Regional Entity Name~~ Midwest Reliability Organization members and others.

COMMON ATTRIBUTE 23

- **Balanced** - The ~~Regional Entity Name~~ Midwest Reliability Organization standards development process strives to have an appropriate balance of interests and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter.

COMMON ATTRIBUTE 24

- **Inclusive** — Any entity (person, organization, company, government agency, individual, etc.) with a direct and material interest in the bulk power system in the ~~[Regional Entity Name]~~Midwest Reliability Organization area shall have a right to participate by: a) expressing a position and its basis, b) having that position considered, and c) having the right to appeal.

COMMON ATTRIBUTE 25

- **Fair due process** — The regional reliability standards development procedure shall provide for reasonable notice and opportunity for public comment. At a minimum, the procedure shall include public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of interested stakeholders.

COMMON ATTRIBUTE 26

- **Transparent** — All actions material to the development of regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the regional entity's Web site.

COMMON ATTRIBUTE 27

- Does not unnecessarily delay development of the proposed reliability standard.

COMMON ATTRIBUTE 28

Each standard shall enable or support one or more of the reliability principles, thereby ensuring that each standard serves a purpose in support of the reliability of the regional bulk power system. Each standard shall also be consistent with all of the reliability principles, thereby ensuring that no standard undermines reliability through an unintended consequence.

COMMON ATTRIBUTE 29

While reliability standards are intended to promote reliability, they must at the same time accommodate competitive electricity markets. Reliability is a necessity for electricity markets, and robust electricity markets can support reliability. Recognizing that bulk power system

reliability and electricity markets are inseparable and mutually interdependent, all regional reliability standards shall be consistent with NERC’s market interface principles. Consideration of the market interface principles is intended to ensure that standards are written such that they achieve their reliability objective without causing undue restrictions or adverse impacts on competitive electricity markets.

COMMON ATTRIBUTE 30

To ensure uniformity of regional reliability standards, a regional reliability standard shall consist of the elements identified in this section of the procedure. These elements are intended to apply a systematic discipline in the development and revision of standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

COMMON ATTRIBUTE 31

All mandatory requirements of a regional reliability standard shall be within the standard. Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself.

COMMON ATTRIBUTE 32

Applicability	Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions. If not applicable to the entire Regional Entity Name Midwest Reliability Organization area, then a clear identification of the portion of the bulk power system to which the standard applies. Any limitation on the applicability of the standard based on electric facility requirements should be described.
----------------------	--

COMMON ATTRIBUTE 33

Measure(s)	Each requirement shall be addressed by one or more measures. Measures are used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure will identify to whom the measure applies and the expected level of performance or outcomes required demonstrating compliance. Each measure shall be tangible, practical, and as objective as is practical. It is important to realize that measures are
-------------------	---

	<p>proxies to assess required performance or outcomes. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.</p>
--	---

COMMON ATTRIBUTE 34

<p>Compliance Monitoring Process</p>	<p>Defines for each measure:</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible for providing the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes. • The entity that is responsible for evaluating data or information to assess performance or outcomes. • The time period in which performance or outcomes is measured, evaluated, and then reset. • Measurement data retention requirements and assignment of responsibility for data archiving.

- X. Appendix D: Balloting Examples 39

I. Introduction

Purpose: This manual defines the characteristics of a Midwest Reliability Organization (“MRO”) Regional Reliability Standard and establishes the process for proposing Regional Reliability Standards to North American Electric Reliability Corporation (“NERC”) for enforcement under direct or delegated regulatory authority consistent with the Energy Policy Act of 2005 (“EPAAct 2005”) in the United States and applicable Canadian authorities. The MRO plans to become a Cross-Border Regional Entity (“CBRE”) as defined in EPAAct 2005 and the final FERC reliability rule consistent with the US-Canadian Bilateral principles. For more information on the MRO please refer to <http://www.midwestreliability.org>.

The MRO standards process is consensus-based, technically vetted, and open to the public and bordering entities that may be impacted by a proposed Regional Reliability Standard by the MRO. MRO Regional Reliability Standards apply to the reliability planning, and operation of bulk power systems located within the MRO region. NERC as the Electric Reliability Organization (“ERO”), and the applicable regulatory authorities in the United States and Canada will have the ability to enforce these standards. The MRO region is defined in agreements (e.g. delegation agreement) with NERC and applicable regulatory authorities in the United States and Canada.

Applicable Regulatory Authorities in the United States and Canada: FERC is the Applicable Regulatory Authority in the United States. The Manitoba Public Utilities Board is the Applicable Regulatory Authority in Manitoba. The Provincial Government of Saskatchewan is the Applicable Regulatory Authority in Saskatchewan.

Authority: This manual is published by the authority of the MRO Board of Directors (“BOD”) who shall have the sole authority to modify the manual. A procedure for revising this manual is provided in the section titled “Maintenance of MRO Regional Reliability Standards and Process.”

Credits: This manual was developed from the NERC Reliability Standards Development Procedure (available at www.nerc.com). Thus, the MRO Regional Reliability Standards process is very similar to the NERC process and the format is the same as the NERC Reliability Standard format.

Background: NERC and the MRO work with all segments of the electric industry, including electricity end-users, to develop standards for the reliable planning and operation of bulk electric systems. The purpose of the NERC Reliability Standards is to promote reliability, while at the same time accommodating competitive electricity markets.

EPAAct 2005 and NERC, ERO provide for Regional Entities (“RE”) to propose Regional Reliability Standards to NERC for eventual enforcement within the region of the RE or CBRE. Regions (such as the MRO) may develop, through

their own processes, regional reliability standards that; go beyond, add detail to, or cover matters not addressed in NERC Reliability Standards. MRO Regional Reliability Standards are proposed to NERC for approval and become enforceable, once approved by NERC and the applicable regulatory authorities in the United States and Canada as Reliability Standards.

MRO Regional Reliability Standards that are proposed shall not be inconsistent with, or less stringent than established NERC Reliability Standards. All MRO Regional Reliability Standards obligate the MRO to monitor and enforce compliance, apply sanctions, if any, consistent with any regional agreements and the NERC rules.

Proposed MRO Regional Reliability Standards shall be subject to approval by NERC, as the ERO, and by applicable regulatory authorities in the United States and Canada, before becoming mandatory and enforceable. No Regional Reliability Standard shall be effective within the MRO area unless approved by NERC and the applicable regulatory authorities in the United States and Canada.

MRO proposed Regional Reliability Standards, when approved by NERC and the applicable regulatory authorities in the United States and Canada, shall be made part of the body of NERC Reliability Standards and shall be enforced upon all applicable bulk power system owners, operators, and users within the MRO region as defined in agreements (e.g. delegation agreements).

II. MRO Regional Reliability Standard Definition, Characteristics, and Elements

Definition of a MRO Regional Reliability Standard: A MRO Regional Reliability Standard defines certain obligations or requirements of entities that operate, plan, and use the bulk electric systems of the MRO region.

The Bylaws of the MRO define a Reliability Standard as: “a NERC requirement, duly in effect, to provide for reliable operation of the Bulk-Power System. The term includes requirements for the operation of existing Bulk-Power System facilities, including cybersecurity protection, and the design of planned additions or modifications to such facilities to the extent necessary to provide for reliable operation of the Bulk-Power System. The term does not include any requirement to enlarge such facilities or to construct new transmission capacity or generation capacity.”

When proposing a Regional Reliability Standard in the MRO region, the obligations or requirements must be material to reliability and be measurable.

Each MRO Regional Reliability Standard shall enable or support one or more of the NERC reliability principles, thereby ensuring that each standard serves

a purpose in support of the reliability of the regional bulk power system. Each of those standards shall also be consistent with all of the NERC reliability principles, thereby ensuring that no standard undermines reliability through an unintended consequence.

While MRO Regional Reliability Standards are intended to promote reliability, they must at the same time accommodate electricity markets. Reliability is a necessity for electricity markets, and robust electricity markets can support reliability. Recognizing that bulk power system reliability and electricity markets are inseparable and mutually interdependent, all MRO Regional Reliability Standards shall be consistent with NERC's market interface principles. Consideration of the market interface principles is intended to ensure that standards are written such that they achieve their reliability objective without causing undue restrictions or adverse impacts on electricity markets.

Characteristics of a MRO Regional Reliability Standard: A MRO Regional Reliability Standard may include standards for the operation and planning of interconnected systems as well as market interface practices. The format and process defined by this manual applies to all MRO Regional Reliability Standards.

A MRO Regional Reliability Standard shall have the following characteristics:

- **Material to Reliability** - A MRO Regional Reliability Standard shall be material to the reliability of bulk electric systems in the MRO region. If the reliability of the bulk electric systems could be compromised without a particular standard or by a failure to comply with that standard, then the standard is material to reliability.
- **Measurable** - A MRO Regional Reliability Standard shall establish technical or performance requirements that can be practically measured.
- **Relative to NERC Reliability Standards** - A MRO Regional Reliability Standard shall go beyond, add detail to, or cover matters not addressed in already approved NERC Reliability Standards.

Elements of a MRO Regional Reliability Standard: A MRO Regional Reliability Standard shall consist of the elements shown in the MRO Regional Reliability Standard Template.

These elements are intended to apply a systematic discipline in the development and revision of MRO Regional Reliability Standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

The format allows a clear statement of the purpose, requirements, measures, and penalties for non-compliance associated with each standard.

All mandatory requirements of a MRO Regional Reliability Standard shall be within an element of the standard.

Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself. Types of supporting documents are described in a later section of this manual.

MRO Regional Reliability Standard Template

The following are the core elements of a MRO Regional Reliability Standard

Identification Number	A unique identification number assigned by the SPM.
Title	A brief, descriptive phrase identifying the topic of the MRO Regional Reliability Standard.
Applicability	Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions.
Effective Date and Status	The effective date of the MRO Regional Reliability Standard shall be upon NERC and regulatory approvals. The status of the standard will be indicated as active or by reference to one of the numbered steps in the standards process.
Purpose	The purpose of the MRO Regional Reliability Standard shall explicitly state what outcome will be achieved by the approved Reliability Standard. The purpose is agreed to early in the process as a step toward obtaining approval to proceed with the development of the Reliability Standard. The purpose should link the standard to the relevant principle(s).
Requirement(s)	Explicitly stated technical, performance, preparedness, or certification requirements. Each requirement identifies who is responsible and what action is to be performed or what outcome is to be achieved. Each statement in the requirements section shall be a statement for which compliance is mandatory. Any additional comments or statements for which compliance is not mandatory, such as background or explanatory information, should be placed in a separate document and referenced (see Supporting References).

<p>Risk Factors</p>	<p>The potential reliability significance of each requirement, designated as a High, Medium, or Lower Risk Factor in accordance with the criteria listed below:</p> <p>A High Risk Factor requirement (a) is one that, if violated, could directly cause or contribute to bulk power system instability, separation, or a cascading sequence of failures, or could place the bulk power system at an unacceptable risk of instability, separation, or cascading failures; or (b) is a requirement in a planning timeframe that, if violated, could, under emergency, abnormal, or restorative conditions anticipated by the preparations, directly cause or contribute to bulk power system instability, separation, or a cascading sequence of failures, or could place the bulk power system at an unacceptable risk of instability, separation, or cascading failures, or could hinder restoration to a normal condition.</p> <p>A Medium Risk Factor requirement (a) is a requirement that, if violated, could directly affect the electrical state or the capability of the bulk power system, or the ability to effectively monitor and control the bulk power system, but is unlikely to lead to bulk power system instability, separation, or cascading failures; or (b) is a requirement in a planning timeframe that, if violated, could, under emergency, abnormal, or restorative conditions anticipated by the preparations, directly affect the electrical state or capability of the bulk power system, or the ability to effectively monitor, control, or restore the bulk power system, but is unlikely, under emergency, abnormal, or restoration conditions anticipated by the preparations, to lead to bulk power system instability, separation, or cascading failures, nor to hinder restoration to a normal condition.</p> <p>A Lower Risk Factor requirement is administrative in nature and (a) is a requirement that, if violated, would not be expected to affect the electrical state or capability of the bulk power system, or the ability to effectively monitor and control the bulk power system; or (b) is a requirement in a planning time frame that, if violated, would not, under the emergency, abnormal, or restorative conditions anticipated by the preparations, be expected to affect the electrical state or capability of the bulk power system, or the ability to effectively monitor, control, or restore the bulk power system.</p>
----------------------------	--

Measure(s)	<p>Each requirement shall be addressed by one or more measures. These measures will be used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above.</p> <p>Each measure shall identify to whom the measurement applies and the expected level of performance or outcomes required demonstrating compliance.</p> <p>Each measure shall be tangible, practical, and as objective as is practical.</p> <p>It is important to realize that measures are proxies to assess required performance or outcomes.</p> <p>Achieving the full compliance level of each measurement should be a necessary and sufficient indicator that the requirement was met.</p> <p>Each measure shall clearly refer to the requirement(s) to which it applies.</p>
-------------------	---

Glossary of Terms Used in Standards

Definitions of Terms:	<p>All defined terms used in MRO Regional Reliability Standards, shall be defined in the glossary. Definitions may be approved as part of a standards action or as a separate action. All definitions must be approved in accordance with the standards process.</p>
------------------------------	--

Compliance Administration Elements

Compliance Monitoring Process	<p>The following compliance elements, which are part of the standard and are balloted with the standard are developed for each measure in a standard by the NERC compliance program in coordination with the standard drafting team</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible for providing the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes • The entity that is responsible for evaluating such data or information. • The time period in which performance or outcomes is measured, evaluated, and then reset.
--------------------------------------	---

	<ul style="list-style-type: none"> • Measurement data retention requirements and assignment of responsibility for data archiving.
Violation Severity Levels	Defines the degree to which compliance with a requirement was not achieved. The violation severity levels, are part of the standard and are balloted with the standard, and developed by the MRO compliance program in coordination with the standard drafting team.

Supporting Information Elements

Interpretations	<p>Formal interpretations of Regional Reliability Standard(s) proposed by the MRO and approved by NERC, FERC, and the applicable Canadian regulatory authorities.</p> <p>Interpretations are temporary, as the standard should be revised to incorporate the interpretation.</p>
Implementation Plan	Each Regional Reliability Standard proposed by the MRO and approved by NERC, FERC and the applicable Canadian regulatory authorities shall have an associated implementation plan describing the effective date of the standard or effective dates if there is a phased implementation. The implementation plan may also describe the implementation of the standard in the compliance program and other considerations in the initial use of the standard, such as necessary tools, training, etc. The implementation plan must be posted for at least one public comment period and is approved as part of the ballot of the standard.
Supporting References	<p>This section will reference related documents that support implementation of the Reliability Standard proposed by the MRO and approved by NERC and the regulatory authorities, but are not themselves mandatory. Examples include, but are not limited to:</p> <ul style="list-style-type: none"> • Developmental history of the standard and prior versions • Notes pertaining to implementation or compliance • Standard references • Standard supplements • Procedures • Practices • Training references • Technical references • White papers • Internet links to related information

III. Roles in the MRO Regional Reliability Standards Development Process

Nomination, Revision or Withdrawal of a Standard: Any member of the MRO or group within the MRO region shall be allowed to request that a MRO Regional Reliability Standard be developed, modified, or withdrawn. Additionally, any person (organization, company, government agency, individual, etc.) who is directly and materially affected by the reliability of MRO bulk power system shall be allowed to request that a MRO Regional Reliability Standard be developed, modified, or withdrawn.

Process Roles

Board of Directors (BOD) - The BOD shall consider MRO Regional Reliability Standards that have been approved by the Registered Ballot Body ("RBB") to be proposed to NERC and the regulatory authorities for enforcement consistent with direct or delegated regulatory authorities of the MRO. Once the proposed MRO Regional Reliability Standard is approved by NERC and the regulatory authorities, it becomes effective in the MRO region consistent with the MRO's direct or delegated regulatory authority.

Compliance Committee (CC) - The mission of the MRO CC is to assure that the compliance program and policies are followed according to the rules and carried out in a non-discriminatory manner, subject to the BOD approval with MRO staff and BOD oversight. The compliance program is designed around compliance with Reliability Standards. The development of a MRO Regional Reliability Standard, in particular the measures and compliance administration portions of the standard, shall have direct input from the CC. Field-testing will be managed and coordinated with the CC. The Compliance Manager (CM), a MRO staff function, and the CC shall provide input and comments during the standards development process to ensure the measures will be effective and other aspects of the compliance program practically implemented.

Standards Committee (SC) -The responsibilities of the SC will include: management of the standards work flow so as not to overwhelm available resources, review of standards authorization requests and draft standards for such factors as completeness, sufficient detail, rational result, and compatibility with existing standards; clarifying standard development issues not specified in this procedure; and advising the BOD on standard development matters. Under no circumstance will the SC change the substance of a draft standard. The SC shall advise the BOD on MRO Regional Reliability Standards presented for their consideration in determining whether to propose such Reliability Standard to NERC.

Standards Process Manager (SPM) – This is a MRO staff function. The Standards Manager who will act as the SPM shall administer the MRO Regional Reliability Standards Process. The SPM is responsible for ensuring

that the development and revision of standards is in accordance with this manual. The SPM works to ensure the integrity of the process and consistency of quality and completeness of the MRO Regional Reliability Standards. The SPM facilitates all steps in the process.

Standards Process Staff - MRO staff will assist the SC, SPM, Requester, and Standard Drafting Team (SDT).

Registered Ballot Body (RBB) - The RBB comprises all entities that:

1. qualify for one of the Industry Segments approved by the BOD¹, and
2. are registered in the MRO RBB, and
3. are current with any MRO related designated fees associated with this program. Designated fees are defined as fees associated with the Standards Development process. At this time there are no fees for registration.

Each voter must be a member of the RBB. **Note: An individual's membership in the RBB will be in a "Pending" stage immediately following registration; in order to be able to vote, your registration must be activated, and activation may take up to 24 hours.**

Each registered member of the RBB is eligible to participate in the voting process for each Standards Action (add, change or withdraw). However, each MRO RBB member (company) may have only one vote per eligible segment.

The RBB will ensure, through its vote, the need for and the technical merits of, a proposed Standards Action and the appropriate consideration of views and objections received during the development process. The RBB votes to approve each Standards Action.

The MRO Regional Reliability Standards Process relies on open and inclusive participation by the electric utility industry and the interested public. Participation and voting is open to non-members of the MRO; at this time there are no fees for participation or voting.

Requester - A Requester is any person or entity (organization, company, government agency, etc.) that submits a complete request for development, revision, or withdrawal of a standard. Any person or entity that is directly and materially affected by an existing standard or the need for a new standard may submit a completed Standard Authorization Request (SAR) for any of the three following actions; a new standard to be developed, a revision to an existing standard, or a withdrawal of an existing standard.

¹ Appendix C contains a description of the latest version of the Industry Segments approved by the Board of Directors.

SAR Drafting Team - A team of technical experts assigned by the SC, that:

- assists in refining the SAR,
- considers and responds to comments, and
- participates in industry forums to help build consensus on the SAR.

SDT - A small team (5-10 people) of technical experts, approved by the SC, that:

- develops the details of the standard
- considers and responds to comments
- participates in industry or regional forums to help build consensus on posted draft standards

Sub-Regional Variance: An aspect of a Reliability Standard (one that is proposed for the MRO region for enforceability) that applies only within a particular regional entity sub-region. A Sub-Regional Variance may be used to exempt a group of entities within the MRO region from all or a portion of a Reliability Standard or may establish different measures or performance criteria as necessary to achieve reliability within the particular group of entities within the region. A Sub-Regional Variance may not be inconsistent with the Reliability Standard as it would otherwise exist without the variance. A Sub-regional variance cannot establish a level of reliability less than that set by a continent-wide Reliability Standard and such a variance would only exempt a group of entities from a MRO Reliability Standard. Such a variance may be proposed by a group of sub-regional entities and, if approved by NERC and regulatory authorities, shall be enforced within the MRO region pursuant to its delegated authority.

IV. MRO Regional Reliability Standards Consensus Development Process

Overview

The process for development of MRO Regional Reliability Standards to be proposed to NERC and regulatory authorities for approval and eventual enforcement under direct or delegated authority is illustrated in the Process Diagram in Appendix A and has the following characteristics:

- **Inclusive** – Any entity (person, organization, company, government agency, individual, etc.) with a direct material interest in the bulk power system in the MRO area shall have a right to participate by: a) expressing a position and its basis, b) having that position considered, and c) having the right to appeal.
- **Openness** - Participation is open to all persons who are directly and materially affected by the reliability of the MRO region bulk power

system. There shall be no undue financial barriers to participation. Participation shall not be conditional upon membership in the MRO or any organization, and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements.

- **Balance** - The MRO Regional Reliability Standards Development Process shall have a balance of interests and shall not be dominated by any two, interest categories and no single interest category shall be able to defeat a matter.
- **Transparent** - All actions material to the development of MRO regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the MRO Web site.
- **Timeliness** - The MRO Regional Reliability Standards Development Process does not unnecessarily delay development of the proposed reliability standard.
- **Fair Due Process** - The MRO Regional Reliability Standards Development Process provides for reasonable notice and opportunity for public comment. The procedure includes public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of all persons who are directly and materially affected.

The MRO Regional Reliability Standards development process is intended to develop consensus, first on the need for the standard, then on the standard itself. The process includes the following key elements:

- **Nomination of a proposed standard, revision to a standard, or withdrawal of a standard** using a Standard Authorization Request ("SAR").
- **Public posting of the SAR** to allow all parties to review and provide comments on the need for the proposed standard and the expected outcomes and impacts from implementing the proposed standard. Notice of standards shall provide an opportunity for participation by all directly and materially affected persons.
- **Review of the public comments** in response to the SAR and prioritization of proposed standards, leading to the authorization to develop standards for which there is a consensus-based need.
- **Assignment of teams** to draft the new or revised standard.
- **Drafting of the standard.**

- **Public posting of the draft standard** to allow all parties to review and provide comments on the draft standard. At this point the need for the standard has been established and comments should focus on aspects of the draft standard itself.
- **Field testing of the draft standard and measures:** The need and extent of recommendations for field testing shall be determined by the SDT and submitted through the SPM to the SC for approval. The SDT shall request input from the RAC and CC members.
 - Field-testing may be region-wide or may consist of one or more, lesser scale demonstrations, evaluations, or other SC approved methods.
 - Field-testing should be cost effective and practical, yet sufficient to validate the requirements, measures, measurement processes and other elements of the standard necessary to implement the Compliance Program.
 - For some standards and their associated measures, field-testing may not be appropriate, such as those measures that consist of administrative reports.
- **Formal balloting of the standard** for approval by the RBB.
- **Re-ballot to consider specific comments** by those submitting comments with negative votes.
- **Approval of a MRO Regional Reliability Standard.**
- **Appeals mechanism** as appropriate for the impartial handling of substantive and procedural complaints regarding action or inaction related to the standards process.

Process Steps

The first three steps in the MRO Regional Reliability Standards Development Process serve to establish consensus on the need for the standard.

Step 1 - Request to Develop a Standard or Revise an Existing Standard

Objective: A valid SAR that clearly justifies the purpose for, and describes the scope of, the proposed standards action. An example of a SAR form can be found in Appendix B.

Sequence Considerations: Submitting a valid SAR is the first step in proposing a standard action. A requester may prepare a draft of the

proposed standard (Step 5), which the SC may authorize for concurrent posting with the SAR. This could be useful for a standard action with a clearly defined and limited scope or one for which stakeholder consensus on the need and scope is likely. Complex standards where broad debate of issues is required should be, presented in two stages. The first stage is, the completion of a valid SAR to get agreement on the scope and purpose, the second stage is the development of the standard later in Step 6.

Requests to develop, revise, or withdraw² a MRO Regional Reliability Standard shall be submitted to the SPM by completing a SAR.

The SAR is a description of the subject matter of the new or revised standard along with a proposed implementation plan and includes:

- Descriptive detail to clearly define the scope of the standard.
- A statement of the purpose of the standard
- A needs statement that provides justification for the development or revision of the standard; including an assessment of the reliability and market interface impacts of implementing or not implementing the standard.

Appendix B provides a sample template of the SAR form.

The SPM shall maintain the SAR form and make it available electronically.

Any person or entity directly or materially affected by an existing standard or the need for a new or revised standard may initiate a SAR.

The Requester shall submit the SAR to the SPM electronically through the RSVP application and the SPM shall electronically acknowledge receipt of the SAR within 15 days. The SPM shall send the electronic acknowledgement simultaneously to the Requester and to NERC.

The SPM shall assist the Requester in developing the SAR, reviewing NERC Reliability Standards to see whether they already address the need, identify issues with interconnected regions, and verify that the SAR complies with this manual.

The SPM shall forward all properly completed SARs to the SC. The SC shall meet at established intervals to review all pending SARs. The frequency of the review process will depend on workload; in no case shall a properly completed SAR wait for SC action more than 60 days from the date of receipt.

² Actions in the remaining steps of the standards process apply to proposed new standards, revisions to existing standards, or withdrawal of existing standards, unless explicitly stated otherwise.

The SC may take one of the following actions:

- Remand the SAR back to the SPM for additional work and information from the Requester.
- Accept the SAR as a candidate for a new or revised standard. If the SC accepts a SAR as a candidate for a new or revised standard, it will provide technical support and analysis of comments for that SAR, and assist the Requester and the SPM in the remaining steps of the process.
- Reject the SAR. If the SC rejects a SAR, it will provide a written explanation for rejection to the Requester within 30 days of the rejection decision. If the SC rejects a SAR, the Requester may file an appeal following the Appeals Process.

The status of SAR shall be tracked electronically by the SPM. The SAR and its status shall be posted for public viewing including any actions or decisions.

Step 2 - Solicit Public Comments on the SAR

Objective: Establish that there is stakeholder consensus on the need, scope and applicability of the requester's proposed standards' action.

Sequence Considerations: A SAR may be posted only after completion of Step 1. A SAR may at the discretion of the SC, be posted for comment concurrently with a draft standard (Step 6).

Once a SAR has been accepted by the SC as a candidate for the development of a new or revised standard, the SPM shall post the SAR on the RSVP Application for the purpose of soliciting public comments.

The SPM shall notify the RBB, the MRO region, NERC, and other interested parties that the SAR has been accepted by the SC and posted for comment.

Within thirty (30) days of acceptance by the SC, the SAR shall be posted electronically and comments on the SAR(s) will be accepted for a 21-day period from the date of posting. Comments will be accepted on-line using the RSVP application. The SPM will provide a copy of the comments to the Requester. In addition, comments will be visible to the RBB during the commenting period. Based on the comments, the Requester may decide to: submit the SAR for authorization, withdraw the SAR, or revise and resubmit it to the SPM for another posting in the next available comment period.

The Requester shall give prompt consideration to the written views and objections of all participants. The Requester, with support from the SPM or SPM assigned staff, shall make an effort to resolve all expressed objections

and shall advise each objector of the disposition of the objection and the reasons therefore. In addition, the SPM shall inform each objector that an appeals process exists within the MRO standards process.

While there is no established limit on the number of times a SAR may be posted for comment, the SC retains the right to reverse its prior decision and reject a SAR if it believes continued revisions are not productive. Once again, the SC shall notify the Requester in writing of the rejection and the availability of the Appeals Process. During the SAR comment process, the Requester may become aware of potential sub-Regional differences (within the MRO) related to the proposed standard. To the extent possible, the Requester should make any sub-Regional differences or exceptions a part of the SAR so that, if the SAR is authorized, such variations will be made a part of the draft new or revised standard.

Step 3 - Authorization to Proceed With Drafting of a New or Revised Standard

Objective: Authorize development of a standard that is consistent with the SAR and for which there is stakeholder consensus on the need, scope and applicability.

Sequence Considerations: The SC may formally authorize the development of a standards' action only after due consideration of SAR comments to determine there is consensus on the need, scope and applicability of the proposed standard. This does not preclude, however, the requester from previously preparing a draft standard for consideration and the SC from authorizing a concurrent posting of the draft standard for comment along with the SAR.

After the public provides comments on the SAR, the Requester may decide to submit the SAR to the SC for authorization to draft the standard. The SC reviews the comments received in response to the SAR and any revisions to the SAR. The SC, considering the public comments received and their resolution, may then take one of the following actions:

- Authorize the drafting of the proposed standard or revisions to a standard.
- Reject the SAR with a written explanation to the Requester and post that explanation.

If the SC rejects a SAR, the Requester may file an appeal.

Step 4 – Formation of the SDT

Objective: Appoint a SDT that has the expertise, competencies, and diversity of views that are necessary to develop the standard.

Sequence Considerations: The SC may appoint a SDT concurrently with or after authorization of the development of a standard (Step 3).

For each new SAR, the SPM shall post a request that interested parties complete a "SDT Self-Nomination" form utilizing the RSVP application. Those individuals who complete and submit these self-nomination forms through the RSVP will be considered for appointment to the associated SDT.

Once a SAR has been authorized by the SC to proceed to the drafting stage, the SC shall assign the development of the standard to a SDT. The SPM shall recommend a list of candidates for appointment to the team and shall submit the list to the SC. The SC may accept the recommendations of the SPM or may select other individuals to serve on the SDT within 60 days.

The SDT shall elect a Chairman for their team. This team shall consist of a small group of people who collectively have the necessary technical expertise and work process skills. A representative of the CC or their designee, plus a Reliability Assessment Committee (RAC) representative or their designee should be included as a member of each SDT.

The SPM shall assign MRO Standards Process staff personnel to assist in the drafting of the standard.

Step 5 - Draft New or Revised Standard

Objective: Develop a standard within the scope of the SAR.

Sequence Considerations: Development of the draft standard follows the authorization by the SC (Step 3) and appointment of a SDT (Step 4). Steps 5 and 6 may be iterated as necessary to consider stakeholder comments and build consensus on the draft standard.

The drafting team shall develop a work plan for completing the regional reliability standard, including the establishment of a milestone schedule for completing critical elements of the work in sufficient detail to ensure that the drafting team will meet the objectives established by the SC. The drafting team shall submit its work plan to the SC for its concurrence.

The drafting team shall convene periodically, either in person or by electronic means as necessary, to establish work teams (made up of members of the drafting team) as necessary, and perform other activities to complete the proposed standard within the milestone date(s) agreed upon by the SC.

The work product of the drafting team will consist of the following:

- A draft standard consistent with the standard request on which it was based.

- An assessment of the reliability impact of the standard request within the region and in neighboring regions, including appropriate input from the neighboring regions if the standard request is determined to impact any neighboring region.
- An implementation plan, including the nature, extent and duration of field-testing needed, if any.
- Identification of any existing standard that will be deleted, in part or whole, or otherwise impacted by the implementation of the draft standard.
- Technical reports, white papers and/or work papers that provide technical support for the draft standard under consideration.

The team regularly (at frequency determined by the SC) shall inform the SC of its progress in meeting a timely completion of the draft standard.

The drafting of measures and compliance administration aspects of the standard will be coordinated with the CC.

If the SDT determines that the scope of the SAR is inappropriate based on its own work and stakeholder comments, the team shall notify the SC. The SDT may recommend the scope of the standard be reduced to allow the effort to continue forward, while still remaining within the scope of the SAR. Reducing the scope defined in the SAR is acceptable if the SDT finds, for instance, that additional technical research is needed prior to developing a portion of the standard or issues need to be resolved before consensus can be achieved on a portion of the standard. In this case, the SDT shall provide detailed justification of need for reducing the scope. The SC, based on the SDT recommendation and a review of stakeholder comments, will determine if the change in scope is acceptable.

If the SDT determines it is necessary to expand the scope of the standard or to modify the scope in a way that is no longer consistent with the scope defined in the SAR, then the SDT may initiate or recommend another requester initiate a new SAR (Step 1) to develop the expanded or modified scope. At no time will a SDT develop a standard that is not within the scope of the SAR that was authorized for development.

If the SDT elects to narrow the SAR, scope or identifies issues not in the SAR scope, then a report shall be prepared and sent to the SC.

Once the standard has been drafted, the SPM shall review the standard for consistency of quality and completeness. The SPM shall also ensure the draft standard is within the scope and purpose identified in the SAR. This review shall occur within a 15-day period.

The SPM shall post the new or revised standard for public comment once this review is completed. The SPM shall notify the RBB, the MRO region, NERC, and other interested parties that the new or revised standard has been posted for public comment.

Step 6 - Solicit Public Comments on Draft Standard

Objective: Receive stakeholder inputs on the draft standard for the purpose of assessing consensus on the draft standard, and modifying the draft standard as needed to achieve consensus.

Sequence Considerations: The posting of a draft standard will occur after the appointment of a SDT and development of a draft by the team. Alternatively, a draft standard submitted by the requester may be posted for comment concurrently with the associated SAR, with the condition that the SAR and draft standard meet the requirements of this procedure and are consistent with each other. In all cases, public comments on the draft standard shall be solicited prior to the SC approving the standard going to ballot (Step 9).

Once a draft standard has been verified by the SPM to be within the scope and purpose of the SAR and in compliance with this manual, the SPM will post the draft standard. The posting of the draft standard will be linked to the SAR for reference. Comments on the draft standard will be accepted for a 30-day period from the notice of posting. Comments will be accepted on-line using the RSVP application and will be viewable during the posted commenting period.

Since the need for the standard was established by authorization of the SAR, comments at this stage should identify specific issues with the draft standard and propose alternative language. The comments may include recommendations to accept or reject the standards and reasons for that recommendation.

The SDT shall develop an implementation plan for the standard that will be posted in conjunction with the standard for at least one stakeholder comment period. Once the implementation plan has been developed and posted for stakeholder comment, it shall remain part of the standard action for subsequent postings and shall be included on the ballot for the standard. The implementation plan shall describe when the standard will become effective. If the implementation is to be phased, the plan will describe which elements of the standard are to be applied to each class of responsible entities, and when. The plan will describe any deployment considerations unique to the standard, such as computer applications, measurement devices, databases, or training, as well as any other special steps necessary to prepare for and initially implement the standard.

Step 7 - Field Testing

Objective: Determine what testing is required to validate the concepts, requirements, measures and compliance elements of the standard and implement that testing.

Sequence Considerations: Testing may be completed during or after Steps 1 through 6. Testing and associated analysis of results (Step 8) must be completed prior to determining whether to submit the standard to ballot (Step 9).

Taking into consideration stakeholder comments received through Step 6, the SDT may recommend to the SC that a test of one or more aspects of a standard is needed. The MRO Compliance Manager will also evaluate whether field-testing of the compliance elements of the proposed new or revised standard is needed and advise the SC. The SC will approve all field tests of proposed standards based on the recommendations of the SDT and the compliance manager. If needed, the SC will also request inputs on technical matters from applicable standing committees or other experts.

Once the field-testing plan is approved, the SPM will, under the direction of the SC, oversee the field-testing of the standard.

In some cases, measurement may be an administrative task and no field-testing is required at all.

In other cases, one or more limited scale demonstrations, evaluations, or other SC approved method may be sufficient.

Step 8 - Analysis of the Comments and Field Test Results

Objective: Evaluate stakeholder comments and field test results to determine if there is consensus that the proposed standard should go to ballot or requires additional work.

Sequence Considerations: This step follows Steps 6 and 7 and must precede Step 9.

The SPM will assemble the comments on the draft standard and distribute those comments to the SDT and the requester. The SDT, assisted by the requester, shall give prompt consideration to the written views and objections of all participants. An effort to resolve all expressed objections shall be made, and each objector shall be advised of the disposition of the objection and the reasons therefore. The STD shall prepare a summary of the comments received and the changes made to the proposed standard as a result of these comments. The STD shall summarize comments that were rejected by the STD and the reason(s) that these comments were rejected, in part or whole. The summary, along with a response to each comment received will be posted on the MRO website no later than the next posting of the proposed standard. In addition, each objector will be informed that an appeals process exists within the MRO standards process.

Based on comments received, the SDT may determine there is an opportunity to achieve consensus for the standard. In this case, the SDT may elect to return to Step 5 and revise the draft for another posting. Although there is no predetermined limit on the number of times a draft standard may be revised and posted, the SDT should ensure the potential benefits of another posting outweigh the burden on the SDT and stakeholders. Returning to Step 5 to continue working on the standard is the prerogative of the SDT, subject to SC oversight.

If the SDT determines the draft standard is ready for ballot, the SDT shall submit the draft standard to the SC with a request to proceed to balloting, along with the comments received and responses to the comments. Based on the comments received and field-testing, the SDT may include revisions that are not substantive. Substantive changes to a draft standard shall not be permitted between the last posting for stakeholder comment and submittal for ballot. A substantive change is one that directly and materially affects the intent or use of the standard. For example, adding, deleting, or revising requirements; or adding, deleting, or revising measurements for which compliance is mandatory. Any non-substantive changes such as: spelling, grammar, or formatting, made prior to going to ballot, will be identified to stakeholders at the time of the ballot notice. If the SDT determines, based on comments received, that substantive changes to the standard are required, the standard will be re-posted for comment and a notice sent to the MRO region, the RBB, NERC, and other interested parties that the revised standard has been re-posted for public comment.

When the SC receives a draft standard that has been recommended for ballot, the SC will review the standard to ensure that the proposed standard is consistent with the scope of the SAR; addresses all of the objectives cited in Steps 1-8, as applicable; and is compatible with other existing standards. If the proposed standard does not pass this review, the SC shall remand the

proposed standard to the SDT to address the deficiencies. If the proposed standard passes the review, the SC shall set the proposed standard for ballot as soon as the workflow will accommodate.

If the SDT determines there is insufficient consensus to ballot the standard and that further work is unlikely to achieve consensus, the SDT may recommend to the SC that the standard drafting be terminated and the SAR withdrawn. The SC will consider the recommendation of the SDT and stakeholder comments and may terminate the standard drafting and accept the withdrawal of the SAR. If the SC believes the recommendation is unsubstantiated, the SC may direct other actions consistent with this procedure, such as requesting the SDT to continue or appointing a new SDT.

Step 9 - Ballot the New or Revised Standard

Objective: Approve the proposed standard by vote of industry stakeholders.

Sequence Considerations: The SC shall determine that all requirements of Steps 1 through 8 have been satisfactorily met before authorizing an action to go to ballot.

If the SDT decides to submit the standard to a vote, the SPM shall provide notice of such to the RBB, NERC, as well as other interested parties, and electronically post the standard, and all comments received, the responses to those comments, and an implementation plan.

First Ballot

Each voter must be a member of the Registered Ballot Body (RBB). **Note: An individual's membership in the RBB will be in a "Pending" stage immediately following registration; in order to be able to vote, your registration must be activated, and activation may take up to 24 hours.**

The ballot will be conducted electronically through the RSVP application. All members of the RBB shall be eligible to vote on the associated standard except, that only one member from an entity may vote in any given segment. It is the responsibility of the entity to identify and notify the SPM of the eligible voter. The voting options are:

- Affirmative, with or without comment;
- Negative, with or without comment (the comments for a negative vote may be given and, if possible, should include specific wording or actions that would resolve the objection);
- Abstain.

The time window for voting shall be designated when the draft standard is posted. In no case shall the voting time window start sooner than fifteen

(15) and no later than thirty (30) days from the notice of the posting. The voting time window will be a period of ten (10) days.

This provides a minimum total of twenty-five (25)-days from the initial notice until the end of the voting period. Approval of a MRO Regional Reliability Standard or revision to a MRO Regional Reliability Standard requires:

- a quorum, which is established by at least 4 of the Segments submitting a response with an affirmative vote, a negative vote, or an abstention; and
- an affirmative vote from at least two-thirds of the segments participating in the vote. Each segment vote is determined by the majority of the votes cast in the segment, either affirmative or negative. Abstentions and non-responses will not be counted.

Voting results, comments, and responses, if necessary, will be posted for public viewing as soon as practical after the balloting period closes. Voting results and comments maybe posted prior to the responses.

Balloting examples are provided in Appendix D.

Members of the RBB should submit any comments on the proposed standard during the public comment period. If any Negative votes with comments are received during the ballot period, they shall be addressed in accordance with *Step 8* and included with the re-circulation ballot.

The SPM shall facilitate the SDT, assisted by the Requester, in preparing a response to negative votes submitted with comments.

In addition, the SPM will inform each objector that an appeals process exists within the MRO standards process. A negative vote that does not contain comments does not require a response. If there are no negative votes with comments from the first ballot, then the results of the first ballot shall stand. If however, one or more members submit negative votes with comments, regardless of whether those comments are resolved, a second ballot shall be conducted.

If a quorum of the Segments is not established, the standard shall be re-balloted, allowing ten (10) days for the ballot. If a quorum is not established with the re-ballot, the SPM shall survey the RBB to establish interest in participating in a ballot on the standard.

Second Ballot

In the second ballot (also called a “re-circulation ballot”), members of the RBB shall again be presented the proposed standard (unchanged from the first ballot) along with the reasons for negative votes, the responses, and any resolution of the differences.

All members of the RBB eligible to vote shall be permitted to reconsider and change their vote from the first ballot. Eligible voting members of the RBB that did not respond to the first ballot shall be permitted to vote in the second ballot. Only one vote will be accepted from each organization within a segment.

In the second ballot, votes will be counted by exception only - members on the second ballot may indicate a revision to their original vote, otherwise their vote shall remain the same as in the first ballot. If a second ballot is conducted, the results of the second ballot shall determine the status of the standard, regardless of the outcome of the first ballot.

The voting time window for the second ballot is ten (10) days (to allow members to review comments and responses). The 21-day posting is not required for the second ballot. Members of the RBB may submit comments in the second ballot but no response to those comments is required.

In the second ballot step no revisions to the standard are permitted, as such revisions would not have been subject to public comment. However, if the SC determines that revisions proposed during the ballot process would likely provide an opportunity to achieve consensus on the standard, then such revisions may be made and the draft standard posted for public comment again beginning with Step 6 and continuing with subsequent steps.

The SPM shall post the final outcome of the ballot process. If the standard is rejected, the process is ended and any further work in this area would require a new SAR. If the standard is approved, the SPM shall post the consensus standard and the SC Chair shall present it to the BOD for consideration.

Step 10 –Approval of a Proposed MRO Regional Reliability Standard

Objective: To have the BOD approve the proposed new or revised, MRO Regional Reliability Standard. Once properly approved by the BOD, accepted by NERC, and accepted for filing by the applicable regulatory authorities in the United States and Canada, the Reliability Standard becomes enforceable.

Sequence Considerations: The thirty (30)-day notice prior to action by the BOD may begin concurrently with or any time after the start of the first ballot. The thirty (30)-day period shall not end any sooner than the end of the final ballot.

A MRO Regional Reliability Standard submitted for consideration to the BOD must be publicly posted and noticed no less than fifteen (15) and no more than thirty (30) days prior to action by the BOD, included with the standard is the implementation plan that was part of the posting process.

At a regular or special meeting, the BOD shall consider the proposed MRO Regional Reliability Standard. The BOD shall consider the results of the balloting and dissenting opinions. The BOD shall consider any advice offered by the MRO SC. The BOD may accept or reject a standard, but may not modify a proposed MRO Regional Reliability Standard. If the BOD chooses not to propose a standard to NERC and the applicable regulatory authorities in the United States and Canada, it shall provide its reasons for not doing so. Upon acceptance of the standard, the SPM will submit the standard to NERC for approval and filing with the applicable regulatory authorities in the United States and Canada.

A MRO Regional Reliability Standard that is approved by NERC and filed with the applicable regulatory authorities shall become effective in accordance with applicable NERC and applicable regulatory proceedings. The implementation plan is included with the proposed Reliability Standard.

The SPM shall publicly post the standard, showing the final status.

Step 11 - Implementation of the MRO Regional Reliability Standard

Objective: That Organizations subject to the standard use the standard, and the compliance program incorporates the standard into its compliance monitoring and enforcement process.

Sequence Considerations: The effective date of a standard is defined in the standard implementation plan.

After approval of a MRO Regional Reliability Standard by the applicable authorities in the United States and Canada, the SPM will forward the standard to the Compliance Manager for implementation, enforcement, and monitoring by the CC which will oversee the implementation and assess the effectiveness.

V. Interpretations and Appeals

Interpretations of MRO Regional Reliability Standards

All persons who are directly and materially affected by the reliability of MRO bulk power systems shall be permitted to request an interpretation of a MRO Regional Reliability Standard. The person requesting an interpretation shall send a request to the SPM explaining the specific circumstances surrounding the request and what clarifications are required as applied to those circumstances. The request should indicate the material impact to the requesting party or others caused by the lack of clarity or a possibly incorrect interpretation of the standard. The SPM shall provide notice to the MRO region within ten business days of such a request for interpretation.

The SPM shall recommend a list of candidates with the relevant expertise for appointment to an interpretation team and shall submit the list to the SC.

As soon as practical (not more than 45 days), the SDT will draft a written interpretation to the standard addressing the issues raised. The SPM shall take the draft interpretation to the SC for acceptance, which would be forwarded to the Board for approval, at the SC recommendation. If approved by the Board, the interpretation is appended to the standard and is effective immediately. The SPM will send notice to all entities that operate, plan, and use the bulk electric systems of the MRO region. The interpretation will stand until the standard is revised through the normal process, at which time the standard will be modified to incorporate the clarifications provided by the interpretation.

Appeals

Persons who have directly and materially affected interests and who have been or will be adversely affected by any substantive or procedural action or inaction related to the development, approval, revision, or withdrawal of a MRO Regional Reliability Standard shall have the right to appeal. This appeals process applies only to the MRO Regional Reliability Standards process as defined in this manual.

The burden of proof to show adverse effect shall be on the appellant. Appeals shall be made within 30 days of the date of the action purported to cause the adverse effect, except appeals for inaction, which may be made at any time. In all cases, the request for appeal must be made prior to the next step in the process.

The final decisions of any appeal shall be documented in writing and made public.

The appeals process provides two levels, with the goal of expeditiously resolving the issue to the satisfaction of the participants:

Level 1 Appeal

Level 1 is the required first step in the appeals process. The appellant shall submit to the SPM, a complaint in writing that describes the substantive or procedural action or inaction associated with a MRO Regional Reliability Standard or the MRO Regional Reliability Standards process. The appellant shall describe in the complaint the actual or potential adverse impact to the appellant. Assisted by any necessary staff and committee resources, the SPM shall prepare a written response addressed to the appellant as soon as practical but not more than 45 days after receipt of the complaint. If the appellant accepts the response as a satisfactory resolution of the issue, both the complaint and response shall be made a part of the public record associated with the standard.

Level 2 Appeal

If, after the Level 1 Appeal the appellant remains unsatisfied with the resolution, and indicates such in writing to the SPM, the SPM shall convene a Level 2 Appeals Panel. This panel shall consist of five (5), panel members total appointed by the BOD. In all cases, Level 2 Appeals Panel members shall have no direct affiliation with the participants in the appeal.

The SPM shall post the complaint and other relevant materials and provide at least 30 days notice of the meeting of the Level 2 Appeals Panel. In addition to the appellant, any person that is directly and materially affected by the substantive or procedural action or inaction referenced in the complaint shall be heard by the panel. The panel shall not consider any expansion to the scope of the appeal that was not presented in the Level 1 Appeal. The panel may in its decision find for the appellant and remand the issue to the SC with a statement of the issues and facts in regard to which fair and equitable action was not taken. The panel may find against the appellant with a specific statement of the facts that demonstrate fair and equitable treatment of the appellant and the appellant's objections. The panel may not, however, revise, approve, or disapprove a MRO Regional Reliability Standard, as these responsibilities remain with the standard's RBB and BOD respectively. The SPM shall publicly post the actions of the Level 2 Appeals Panel.

In addition to the foregoing, a procedural objection that has not been resolved may be submitted to the BOD for consideration at the time the BOD decides whether to approve proposing a particular MRO Regional Reliability Standard for NERC consideration and eventual enforceability. The objection must be in writing, signed by an officer of the objecting entity, and contain a concise statement of the relief requested and a clear demonstration of the facts that justify that relief. The objection must be filed no later than 30 days after the announcement of the vote by the RBB on the MRO Regional Reliability Standard in question.

VI. Maintenance of MRO Regional Reliability Standards and Process

Process Revisions

A request to substantively change the MRO Regional Reliability Standards Process Development process shall begin with the preparation of a SAR, and be handled using the same procedure as a request to revise a MRO Regional Reliability Standard. The exception is that a single ballot without regard to negative comments from the RBB shall be conducted and the results of that ballot will be binding. Non-substantive changes will be handled through the abbreviated process listed below. Once approved by the RBB, any proposed revisions to this manual would go to the BOD, NERC, and the applicable authorities in the United States and Canada for approval.

The BOD may make changes to the Industry Segments referenced in Appendix C. These changes shall be carried over to this process without the need to prepare a SAR. In addition, the SC may alter the document number on any existing or proposed standard without going through the MRO Regional Standards Process.

Abbreviated Process for Procedural/Administrative Changes

The SPM shall handle all procedural/administrative requests using an abbreviated process described here. The SPM shall post all proposed procedural/administrative revisions to the MRO Regional Reliability Standards Development Process for a 30-day public comment period. The SC shall consider all comments received and modify the proposed revisions as needed. Based on the degree of consensus for the revisions, the SC may:

- a. submit the revised procedure directly to the BOD for adoption;
- b. submit the revised procedure for ballot pool approval prior to submitting it for BOD adoption (the regular voting process in the procedure, including a re-circulation ballot if needed, would be used and the results of the ballot would be binding on the decision to move the revisions to the BOD or not);
- c. propose additional changes and repeat the posting for further comment;
- d. remand the proposal to the requester for further work; or
- e. reject the proposal.

The SPM shall post any proposed revisions submitted for BOD adoption for a period of 30 days prior to BOD action. The SC shall submit to the BOD a description of the basis for the procedure changes, a summary of the comments received, and any minority views expressed in the comment process. The proposed procedure revisions will be effective upon BOD adoption, or another date designated by the BOD.

Five-Year Review

Each MRO Regional Reliability Standard shall be reviewed at least once every five (5) years from the effective date of the standard or the latest revision to the standard, whichever is the later. The review process shall be conducted by soliciting comments from the stakeholders. If no changes are warranted, the SC shall recommend to the BOD that the Standard be reaffirmed. If the review indicates a need to revise or withdraw the standard, a SAR shall be prepared and submitted by the SC or any other stakeholder in accordance with the standards process. The SPM shall be responsible for administration of the five (5)-year review of MRO Regional Reliability Standards.

On-line Standards Information System

The SPM shall be responsible for maintaining an electronic database of information regarding currently proposed and currently in effect MRO Regional Reliability Standards. This information shall include current standards in effect, proposed revisions to standards, and proposed new standards. This information shall provide a record, for at a minimum the previous five years, of the review and approval process for each MRO Regional Reliability Standard, including public comments received during the development and approval process. This information shall be available through public Internet access.

Archived Standards Information

The SPM shall be responsible for maintaining an historical record of MRO Regional Reliability Standards information that is no longer maintained on-line. Archived information shall be retained indefinitely as practical, but in no case less than five years or one complete standard review cycle from the date on which the standard was no longer in effect. Archived records of standards information shall be available electronically within 30 days following the receipt by the SPM of a written request.

Numbering System

The SPM shall establish, maintain, and electronically post a system of identification numbers that allow MRO Regional Reliability Standards to be categorized and easily referenced. Re-numbering of approved standards does not warrant standard review but will be handled through the SC. The SPM will notify the MRO region and post the information on the RSVP system prior to making the change.

Supporting Documents

The following table identifies documents that may be developed to support a MRO Regional Reliability Standard. These documents may explain or facilitate implementation of standards but do not themselves contain

mandatory requirements subject to compliance review. Any requirements that are mandatory must be incorporated into the standard. For example, a procedure that must be followed as written must be incorporated into a MRO Regional Reliability Standard. If the procedure defines one way, but not necessarily the only way, to implement a standard it is more appropriately a reference.

<i>Type of Document</i>	<i>Description</i>	<i>Approval</i>
Standard Reference	Descriptive, explanatory information to support the understanding and interpretation of an MRO Regional Reliability Standard.	SC
Standard Supplement	Data forms, pro forma documents, and associated instructions that support the implementation of an MRO Regional Reliability Standard.	As assigned to the MRO Standing Committee
Procedure	Instructions defining a particular process or operation. Procedures may support the implementation of an MRO Regional Reliability Standard.	As assigned to the MRO Standing Committee
Technical Reference	Descriptive, technical information or analysis. A technical reference may support the implementation of an MRO Regional Reliability Standard.	As assigned to the MRO Standing Committee

¹After MRO Board approval, the standard is submitted to NERC for approval and filing to the applicable regulatory authorities. Upon regulatory acceptance or approval, the

standard becomes enforceable as a Reliability Standard. VIII. Appendix B – Information in a Standard Authorization Request

Below is a template of the required information to complete a Standard Authorization Request. The SPM shall be responsible for implementing and maintaining this form as needed to support the information requirements of the standards process.

Standard Authorization Request Form

Title of Proposed Standard
Request Date

SAR Requestor Information	SAR Type <i>(Check a box for each one that applies.)</i>
Name	<input type="checkbox"/> New Standard
Primary Contact	<input type="checkbox"/> Revision to existing Standard
Telephone Fax	<input type="checkbox"/> Withdrawal of existing Standard
E-mail	<input type="checkbox"/> Urgent Action

Purpose (Describe the purpose of the standard – what the standard will achieve in support of reliability.)

Industry Need (Provide a detailed statement justifying the need for the proposed standard, along with any supporting documentation.)

Brief Description (Describe the proposed standard in sufficient detail to clearly define the scope in a manner that can be easily understood by others.)

Reliability Functions

The Standard will apply to the Following Functions <i>(Check box for each one that applies.)</i>		
<input type="checkbox"/>	Reliability Authority	Ensures the reliability of the bulk transmission system within its Reliability Authority area. This is the highest Reliability Authority.
<input type="checkbox"/>	Balancing Authority	Integrates resource plans ahead of time, and maintains load-interchange-resource balance within its metered boundary and supports system frequency in real time.
<input type="checkbox"/>	Interchange Authority	Authorizes valid and balanced Interchange Schedules.
<input type="checkbox"/>	Planning Authority	Plans the Bulk Electric System.
<input type="checkbox"/>	Resource Planner	Develops a long-term (>one year) plan for the resource adequacy of specific loads within a Planning Authority area.
<input type="checkbox"/>	Transmission Planner	Develops a long-term (>one year) plan for the reliability of transmission systems within its portion of the Planning Authority area.
<input type="checkbox"/>	Transmission Service Provider	Provides transmission services to qualified market participants under applicable transmission service agreements
<input type="checkbox"/>	Transmission Owner	Owens transmission facilities.
<input type="checkbox"/>	Transmission Operator	Operates and maintains the transmission facilities, and executes switching orders.
<input type="checkbox"/>	Distribution Provider	Provides and operates the "wires" between the transmission system and the customer.
<input type="checkbox"/>	Generator Owner	Owens and maintains generation unit(s).
<input type="checkbox"/>	Generator Operator	Operates generation unit(s) and performs the functions of supplying energy and Interconnected Operations Services.
<input type="checkbox"/>	Purchasing-Selling Entity	The function of purchasing or selling energy, capacity, and all necessary Interconnected Operations Services as required.
<input type="checkbox"/>	Market Operator	Integrates energy, capacity, balancing, and transmission resources to achieve an economic, reliability-constrained dispatch.
<input type="checkbox"/>	Load-Serving Entity	Secures energy and transmission (and related generation services) to serve the end user.

NERC Reliability and Market Interface Principles

Applicable Reliability Principles (Check box for all that apply.)	
<input type="checkbox"/>	1. Interconnected bulk electric systems shall be planned and operated in a coordinated manner to perform reliably under normal and abnormal conditions as defined in the NERC Standards.
<input type="checkbox"/>	2. The frequency and voltage of interconnected bulk electric systems shall be controlled within defined limits through the balancing of real and reactive power supply and demand.
<input type="checkbox"/>	3. Information necessary for the planning and operation of interconnected bulk electric systems shall be made available to those entities responsible for planning and operating the systems reliably.
<input type="checkbox"/>	4. Plans for emergency operation and system restoration of interconnected bulk electric systems shall be developed, coordinated, maintained and implemented.
<input type="checkbox"/>	5. Facilities for communication, monitoring and control shall be provided, used and maintained for the reliability of interconnected bulk electric systems.
<input type="checkbox"/>	6. Personnel responsible for planning and operating interconnected bulk electric systems shall be trained, qualified, and have the responsibility and authority to implement actions.
<input type="checkbox"/>	7. The security of the interconnected bulk electric systems shall be assessed, monitored and maintained on a wide area basis.
<input type="checkbox"/>	8. Bulk power systems shall be protected from malicious physical or cyber attacks.
Does the proposed Standard comply with all of the following Market Interface Principles? (Select 'yes' or 'no' from the drop-down box.)	
1. The planning and operation of bulk electric systems shall recognize that reliability is an essential requirement of a robust North American economy. Yes	
2. A MRO Regional Reliability Standard shall not give any market participant an unfair competitive advantage. Yes	
3. A MRO Regional Reliability Standard shall neither mandate nor prohibit any specific market structure. Yes	
4. A MRO Regional Reliability Standard shall not preclude market solutions to achieving compliance with that Standard. Yes	
5. A MRO Regional Reliability Standard shall not require the public disclosure of commercially sensitive information. All market participants shall have equal opportunity to access commercially non-sensitive information that is required for compliance with reliability standards. Yes

IX. Appendix C –Registered Ballot Body (RBB) Registration Procedures

The RBB comprises all organizations and entities that:

1. qualify for one of the segments, and
2. are registered with MRO as ballot participants in the voting on standards, and
3. are current with any MRO designated fees associated with this program. Designated fees are defined as fees associated with the Standards Development process. At this time there are no fees for registration.

Each entity, when initially registering to join the RBB, and annually thereafter, will self-select to belong to one or more of the segments described below.

The SPM shall review all applications for joining the RBB, and make a determination of whether the self-selection satisfies at least one of the guidelines to belong to that segment. The entity will then be “credentialed” to participate as a voting member of that segment. The SC will decide disputes, with an appeal to the BOD.

In order to comment or vote you must have an active membership in the RBB. When you submit your registration request, you are placed in a “pending stage” until your account is activated. Activation of your account may take up to 24 hours. You will be unable to submit comments or vote until your account is activated.

All registrations must be done electronically via the RSVP application (<http://rsvp.midwestreliability.org/rsvp/action/PubMainAction.jsessionid=47DOEF7CB59688BED492EB007FD9A0DF?type=Init>). There is no fee for registration at this time.

Segment Qualification Guidelines

The segment qualification guidelines are inclusive; i.e., any entity with a legitimate interest in the electric industry that can meet any one of the guidelines for a segment is entitled to belong to and vote in that segment. Only one vote per entity per segment is permitted.

The general guidelines for all segments are:

- Corporations or organizations with integrated operations or with affiliates that qualify to belong to more than one segment (e.g., Transmission Owners and Load Serving Entities) may belong to each of the segments in which they qualify, provided that each segment constitutes a separate membership in the RBB and is represented by a

different representative. Only one vote per entity per segment registered is allowed.

- Corporations, organizations, and entities may participate freely in all subgroups.
- After their initial selection, registered participants may apply to change segments with thirty (30) days notice to the SPM. In addition, a registered participant cannot change segments during a balloting period once the participant has cast a vote or designated a proxy.
- Additionally, the SPM may change a participant segment under certain circumstances. These circumstances will be approved by the SC and posted on the RSVP.
- The qualification guidelines and rules for joining segments will be reviewed periodically by the SC to ensure that the process continues to be fair, open, balanced, and inclusive. Public input shall be solicited in the review of these guidelines.
- Since all balloting of standards will be done electronically, any registered participant may designate an agent or proxy to vote on its behalf. There are no limits on how many proxies an agent may hold. However, the MRO must have in its possession, either in writing or by e-mail, documentation that the voting right by proxy has been transferred from the registered participant to the agent prior to casting any vote.

Segments

Segment 1: Transmission Owners

- a. Any entity within the MRO region that owns or controls at least 200 circuit miles of integrated transmission facilities, or has an Open Access Transmission Tariff or equivalent on file with a regulatory authority.
- b. Transmission owners within the MRO region that have placed their transmission under the operational control of an RTO.
- c. Independent transmission companies or organizations, merchant transmission developers, and TRANSCOs that are in the MRO region and are not RTOs.
- d. Excludes RTOs, RCs and ISOs (that are eligible to belong to Segment 2).

Segment 2: Regional Transmission Organizations (RTOs), Regional Transmission Group (RTG), Independent System Operators (ISOs), Reliability Organizations, and Reliability Coordinators

- a. Authorized by appropriate regulator to operate as an RTO, RTG, or ISO within or adjacent to the MRO.
- b. Reliability Organizations certified by NERC or its successor.
- c. Check FERC definition.
- d. Reliability Coordinators within or adjacent to the MRO.
- e. In cases where the RTO or ISO and the RC have exactly the same geographic boundary, both may belong to this segment as long as they are separate entities.

Segment 3: Load-Serving Entities (LSEs)

- a. Entities within the MRO region serving end-use customers under a regulated tariff, a contract governed by a regulatory tariff, or other legal obligation to serve.
- b. A member within the MRO region of a G&T cooperative or a joint-action agency is permitted to designate the G&T or joint-action agency to represent it in this segment; such designation does not preclude the G&T or joint-action agency from participation and voting in another segment representing its direct interests.

Segment 4: Electric Generators

- a. Affiliated and independent generators within the MRO region.
- b. A corporation that sets up separate corporate entities for each one or two generating plants within the MRO region in which it is involved may only have one vote in this segment regardless of how many single-plant or two-plant corporations the parent corporation has established or is involved in.

Segment 5: Electricity Brokers, Aggregators, and Marketers

- a. Entities serving end-use customers under a power marketing agreement or other authorization not classified as a regulated tariff.
- b. An entity that buys, sells, or brokers energy and related services for resale in wholesale or retail markets, whether a non-jurisdictional entity operating within its charter or an entity licensed by a jurisdictional regulator.

- c. G&T cooperatives and joint-action agencies that perform as an electricity broker, aggregator, or marketer function are permitted to belong to this segment.

Segment 6: Electricity End Users

- a. Service delivery taken within the MRO region that is not purchased for resale.
- b. Agents, associations, consumer advocates can represent groups of end users or a transmission dependent utility. A Transmission Dependent Utility (TDU) is defined as; an entity that relies on another entity for transmission service to service the majority of their contractual loads.

Segment 7: Federal, State, and Provincial Regulatory or other Government Entities

- a. Does not include Federal PMAs or TVA.
- b. May include PUCs.

X. Appendix D – Balloting Examples

The MRO voting mechanism differs from NERC in that a quorum is established if at least four Segments have submitted an affirmative, negative or abstention vote. A majority vote within a Segment is determined based on the affirmative and negative votes. A Standard is approved if at least two-thirds of the voting Segments have an affirmative vote. The following are examples of potential voting scenarios. The yellow areas indicate where a Segment did not cast a vote. The green areas with **bold** numbers represent majority votes within a Segment.

Example RBB

Segment	Number Registered in the RBB
1. Transmission Owners	15
2. RTO's, ISO's, RRO's & Reliability Coordinators	4
3. Load Serving Entities	16
4. Electric Generators	21
5. Electricity Brokers, Aggregators, & Marketers	7
6. Electricity End Users	6
7. Federal, State, & Provincial Regulatory or other Government Entities	8
Totals	77

Example 1 – A quorum has been established with 5 of the 7 Segments having registered an affirmative, negative, or an abstention vote. Two-thirds of the Segments (4 of 5 voting Segments) have voted to approve the Standard. The Standard is approved.

Segment	Ballot Pool	Votes			
		Affirmative Votes	Negative Votes	Abstain Votes	No Ballot
1. Transmission Owners	15	10	2	1	2
2. RTO's, ISO's, RRO's & Reliability Coordinators	4	3	0	0	1
3. Load Serving Entities	16	3	6	2	5
4. Electric Generators	21	13	0	1	7
5. Electricity Brokers, Aggregators, & Marketers	7	0	0	0	7
6. Electricity End Users	6	0	0	0	6
7. Federal, State, & Provincial Regulatory or other Government Entities	8	3	0	1	4
Totals	77				

Example 2 – A quorum has been established with 4 of the 7 Segments having registered an affirmative, negative, or an abstention vote. Less than two-thirds of the Segments (1 of 4 voting Segments) have voted to approve the Standard. The Standard is NOT approved.

Segment	Ballot Pool	Votes			
		Affirmative Votes	Negative Votes	Abstain Votes	No Ballot
1. Transmission Owners	15	10	2	1	2
2. RTO's, ISO's, RRO's & Reliability Coordinators	4	1	2	0	1
3. Load Serving Entities	16	3	6	2	5
4. Electric Generators	21	0	0	0	21
5. Electricity Brokers, Aggregators, & Marketers	7	0	0	0	7
6. Electricity End Users	6	0	0	0	6
7. Federal, State, & Provincial Regulatory or other Government Entities	8	0	3	1	4
Totals	77				

Example 3 – A quorum has not been established because only 3 of the 7 Segments have registered an affirmative, negative, or an abstention vote. The Standard is NOT approved because of a lack of a quorum.

Segment	Ballot Pool	Votes			
		Affirmative Votes	Negative Votes	Abstain Votes	No Ballot
1. Transmission Owners	15	10	2	1	2
2. RTO's, ISO's, RRO's & Reliability Coordinators	4	4	0	0	0
3. Load Serving Entities	16	3	6	2	5
4. Electric Generators	21	0	0	0	21
5. Electricity Brokers, Aggregators, & Marketers	7	0	0	0	7
6. Electricity End Users	6	0	0	0	6
7. Federal, State, & Provincial Regulatory or other Government Entities	8	0	0	0	8
Totals	77				

Example 4 – A quorum has been established with 6 of the 7 Segments having registered an affirmative, negative, or an abstention vote. The Standard is NOT approved because two-thirds of the Segments did not cast an affirmative vote. Segment 2's vote is considered negative because a majority did not cast an affirmative vote.

Segment	Ballot Pool	Votes			
		Affirmative Votes	Negative Votes	Abstain Votes	No Ballot
1. Transmission Owners	15	10	2	1	2
2. RTO's, ISO's, RRO's & Reliability Coordinators	4	2	2	0	0
3. Load Serving Entities	16	3	6	2	5
4. Electric Generators	21	10	9	1	1
5. Electricity Brokers, Aggregators, & Marketers	7	4	3	0	0
6. Electricity End Users	6	0	0	0	6
7. Federal, State, & Provincial Regulatory or other Government Entities	8	2	3	0	3
Totals	77				

EXHIBIT D – COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

1.0 REGIONAL COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

~~[REGIONAL ENTITY]~~ Midwest Reliability Organization will implement the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure (which for purposes of this section 1.0 shall not include Attachment 2, Hearing Procedures), to monitor and enforce compliance with Reliability Standards by the owners, operators, and users within ~~[REGIONAL ENTITY]'s~~ Midwest Reliability Organization's geographic– or electrical boundaries, and such other scope, set forth on **Exhibit A** of this Agreement.

2.0 REGIONAL HEARING OF COMPLIANCE MATTERS

~~[REGIONAL ENTITY]~~ Midwest Reliability Organization shall establish and maintain a hearing body with authority to conduct and render decisions in compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan, which shall be either ~~[REGIONAL ENTITY]'s~~ Midwest Reliability Organization's board or a balanced compliance panel reporting directly to ~~[REGIONAL ENTITY]'s~~ Midwest Reliability Organization's board. ~~[REGIONAL ENTITY]'s~~ Midwest Reliability Organization's hearing body is ~~{a balanced subset of its board} {if not the board, insert the name of the committee or group serving as the hearing body}. that is appointed by the board with no more than one member from each sector.~~

~~{If the hearing body is a compliance panel other than the board, provide here a description of how the members of the compliance panel are selected and the qualifications to be selected for the compliance panel.}~~

~~[REGIONAL ENTITY]~~

Midwest Reliability Organization shall conduct all compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, proposed Mitigation Plan, or a proposed Remedial Action Directive, in accordance with Attachment 2, Hearing Procedures, to the NERC Compliance Monitoring and Enforcement Program, subject to the following deviations, if any: ~~{Describe any deviations, or state "None". If there are deviations from the NERC pro forma Hearing Procedures, [REGIONAL ENTITY]'s Hearing Procedures shall be included as a separate attachment to this Exhibit D.}~~ NONE.

3.0 OTHER DECISION-MAKING BODIES

~~If [Regional Entity] uses other decision-making bodies within its compliance program, provide here a description of the function of that body to the extent not described elsewhere in the Agreement or exhibits, how the members of that body are selected, and the qualifications to be~~

selected for that body.] A presiding officer who presides over the reception of evidence may prepare recommendations to be used by the board of directors in preparing its decision in a compliance hearing. In addition to compliance hearings, Midwest Reliability Organization's Hearing Body also reviews and approves settlements in a yes or no fashion, but is not permitted to make modifications to negotiated settlements/agreements.

Exhibit E — Funding

1. Scope of activities funded through the ERO funding mechanism

~~{Regional Entity}~~ Midwest Reliability Organization shall include in its annual budget submission to NERC amounts for costs it will incur in performing its delegated functions and related activities as described in Sections 5, 6 and 7 of the Agreement. These activities shall include:

- Reliability Standard Development
- Compliance Monitoring and Enforcement
- Organization Registration and Certification
- Reliability Assessment and Performance Analysis (including necessary data gathering activities)
- Event Analysis and Reliability Improvement
- Training and Education
- Situation Awareness
- Infrastructure Security

2. Preparation of Annual Business Plan and Budget

(a) NERC and ~~{Regional Entity}~~ Midwest Reliability Organization in conjunction with the other Regional Entities, shall collaboratively develop an annual schedule for the development, submission, review and approval of ~~{Regional Entity}'s~~ Midwest Reliability Organization's business plan and budget. The annual schedule for the preparation of business plans and budgets shall require ~~{Regional Entity}~~ Midwest Reliability Organization (i) to submit to NERC draft(s) of ~~{Regional Entity}'s~~ Midwest Reliability Organization's proposed business plan and budget and other preliminary documents and information, and (ii) to submit a final proposed business plan and budget that has been approved by ~~{Regional Entity}~~ Midwest Reliability Organization Board of ~~Trustees~~ Directors to NERC by July 1 or such other agreed date as provides sufficient time for NERC's review, approval and submission of ~~{Regional Entity}'s~~ Midwest Reliability Organization's business plan and budget to the Commission 130 days in advance of the beginning of each fiscal year. The ~~{Regional Entity}~~ Midwest Reliability Organization business plan and budget submission shall include supporting materials, including ~~{Regional Entity}'s~~ Midwest Reliability Organization's complete business plan and organization chart, explaining the proposed collection of all assessments, dues, fees and charges, and the proposed expenditure of the funds to be collected in sufficient detail to justify the requested budgeted expenditures and assessments. ~~{Regional Entity}'s~~ Midwest Reliability Organization's business plan and budget and proposed assessments shall provide for reasonable reserve mechanisms for unforeseen and extraordinary expenses and other contingencies, consistent with generally accepted accounting principles.

(b) NERC shall review and approve ~~{Regional Entity}'s~~ Midwest Reliability Organization's proposed business plan and budget and proposed assessments for performing the delegated functions and related activities described in Sections 5, 6 and 7 of this Agreement and listed above in Section 1 of this **Exhibit E**, or shall direct ~~{Regional~~

~~Entity]~~Midwest Reliability Organization to make such revisions as NERC deems appropriate prior to approval. NERC shall submit ~~[Regional Entity]'s~~Midwest Reliability Organization's approved business plan and budget and proposed assessments to the Commission for approval as part of NERC's overall business plan and budget submission, in accordance with the ERO Regulations.

3. Allocation of Costs

Assessments to fund the costs of ~~[REGIONAL ENTITY]'s~~Midwest Reliability Organization's delegated functions and related activities pursuant to the Agreement shall be allocated among all load-serving entities on the basis of Net Energy for Load, unless a different method(s) of allocating and calculating such assessments has been submitted to and approved by NERC and the Commission in accordance with Section 9(b) of the Agreement. ~~[Regional Entity]~~ Midwest Reliability Organization shall submit to NERC annually at the same time it submits its budget request a list of the load-serving entities or designees within its geographic boundaries that shall be responsible for paying ~~[Regional Entity's]~~Midwest Reliability Organization's assessment and the load-serving entities' proportionate Net Energy for Load, and such other data and information as is necessary to allocate and calculate the allocation of ~~[Regional Entity's]~~Midwest Reliability Organization's assessment to the load-serving entities or designees under the method(s) of allocation and calculation that will be used.

4. Collection of Funding

~~[IF NERC WILL BILL AND COLLECT ASSESSMENTS DIRECTLY FROM LOAD-SERVING ENTITIES IN REGIONAL ENTITY'S REGION, USE THE FOLLOWING TEXT FOR SECTION 4(a):]~~

(a) NERC shall submit invoices to the load-serving entities or designees identified by ~~[Regional Entity]~~Midwest Reliability Organization covering the NERC and ~~[Regional Entity]~~Midwest Reliability Organization assessments approved for collection.

~~[IF THE REGIONAL ENTITY WILL ACT AS THE BILLING AND COLLECTION AGENT ON BEHALF OF NERC TO BILL AND COLLECT ASSESSMENTS FROM LOAD-SERVING ENTITIES IN REGIONAL ENTITY'S REGION, USE THE FOLLOWING TEXT FOR SECTION 4(a):]~~

~~(a) NERC and [Regional Entity] agree that [Regional Entity] shall act as the billing and collection agent on behalf of NERC to bill and collect [Regional Entity]'s assessments from load-serving entities and designees (or such other entities as agreed by NERC and [Regional Entity]). [Regional Entity] agrees that it shall (i) issue all invoices to load-serving entities and other entities in a prompt and timely manner after receipt from NERC of the information needed to issue the invoices; (ii) exercise commercially reasonable efforts to collect invoices that are not paid as of the due date(s); and (iii) transfer all funds collected to NERC in a timely manner, as follows: Prior to the start of each calendar quarter, and once per week thereafter until all billings for the quarter are collected, [Regional Entity] will electronically transfer to NERC, in immediately available funds, all payments received by~~

~~[Regional Entity] from load serving entities or other entities for payment of invoices. On the same day that [Regional Entity] makes each electronic transfer of funds to NERC, [Regional Entity] shall send an e-mail to the Chief Financial Officer or Controller of NERC detailing the collections being transmitted, including a listing of the load serving entities or other entities from which payments were collected and the amount collected from each entity. [Note: If NERC and Regional Entity have a different collection and payment arrangement, the preceding two sentences will be modified accordingly to describe it.]~~

~~[Regional Entity] agrees that it shall not in any way use its position as billing and collection agent for NERC to attempt to influence NERC's policies or decisions on matters relating to adoption of Reliability Standards (including Regional Reliability Standards and Regional Variances), administration of the compliance monitoring and enforcement program and other compliance and enforcement matters, determination and imposition of penalties and sanctions, budgeting matters including review and approval of [Regional Entity's] budgets and business plans, or any other NERC decisions, including by issuing invoices, engaging in collection activities or transferring funds collected to NERC in an untimely manner or other than in accordance with this Agreement.~~

(b) NERC shall pursue any non-payments of assessment amounts and shall request assistance from ERO Governmental Authorities as necessary to secure collection. To the extent reasonably practicable, [Regional Entity] shall assist NERC in pursuing and collecting any non-payments. Notwithstanding the foregoing, [Regional Entity] is not responsible and does not assume any liability for recovering non-payments or underpayments of assessment amounts. NERC shall retain sole responsibility for recovering non-payments or underpayments of assessment amounts. NERC shall add the amount of any non-payments by end-users or designees within [REGIONAL ENTITY]'s region, that are reasonably determined to be uncollectible, to NERC's assessments for a subsequent year with the amount of such non-payments to be allocated to end-users within [Regional Entity]'s region.

(c) Upon approval by ERO Governmental Authorities of [Regional Entity]'s annual assessment to fund the costs of its delegated functions and related activities, NERC shall pay [Regional Entity's] annual assessment to Regional Entity in four equal quarterly payments on January 15, April 15, July 15 and October 15 of the budget year.

5. Application of Penalties

~~Except as otherwise approved by the Commission, all penalty monies received by [Regional Entity], other than penalty monies received from an operational function or division or affiliated entity of [Regional Entity], Midwest Reliability Organization shall be applied as a general offset to [Regional Entity]'s Midwest Reliability Organization's budget requirements for U.S.-related activities under this Agreement for the subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity. Except as otherwise approved by the Commission, any penalty monies received from an operational function or division or affiliated entity of [Regional Entity] shall be transmitted to or retained by NERC and shall be used by NERC as a general offset to NERC's budget for its activities as the ERO under the Act for the following year.~~

6. Budget and Funding for ~~[Regional Entity's]~~Midwest Reliability Organization Non-Statutory Activities

In addition to its delegated functions and related activities, as specified in Sections 5, 6 and 7 of the Agreement and in Section 1 of this **Exhibit E** (such delegated functions and activities referred to in this Section 6 as “statutory activities”), ~~[Regional Entity]~~Midwest Reliability Organization performs the following other functions and activities (such other functions and activities being referred to in this Section 6 as "non-statutory activities"): ~~[List and describe all non-statutory activities performed by Regional Entity, or state “None”.]~~NONE.

~~[Regional Entity]~~Midwest Reliability Organization shall employ the following methods and procedures to (i) keep its funding mechanisms for its statutory activities separate from its funding mechanisms for its non-statutory activities, and (ii) record the costs it incurs in the performance of its non-statutory functions separately from the costs it incurs in the performance of its statutory functions: ~~[List and describe the methods and procedures Regional Entity employs to keep costs and funding of statutory activities separate from costs and funding of non-statutory activities, including at a minimum a description of how Regional Entity's bank accounts and receivables/payables procedures are set up for both statutory and non-statutory functions, a description of how Regional Entity ensures each employee involved in both statutory and non-statutory functions keeps accurate time records reflecting his/her activities, and a description of how Regional Entity's general and administrative costs are allocated between statutory activities and non-statutory activities. If the necessary descriptions are lengthy they may be provided in a separate attachment labeled “Attachment E-1”, and state here “See Attachment E-1.” If Regional Entity has listed no non-statutory functions in the preceding paragraph, state here “Not applicable.”]~~NOT APPLICABLE.

~~[Regional Entity]~~Midwest Reliability Organization shall provide its budget for such non-statutory activities to NERC at the same time that ~~[Regional Entity]~~Midwest Reliability Organization submits its proposed annual business plan and budget for statutory activities to NERC pursuant to Section 9 of the Agreement. ~~[Regional Entity's]~~Midwest Reliability Organization budget for non-statutory activities that is provided to NERC shall contain a detailed list of ~~[Regional Entity's]~~Midwest Reliability Organization's non-statutory activities and a description of the funding sources for the non-statutory activities. ~~[Regional Entity]~~Midwest Reliability Organization agrees that no costs (which shall include a reasonable allocation of ~~[Regional Entity's]~~Midwest Reliability Organization's general and administrative costs) of non-statutory activities are to be included in the calculation of ~~[Regional Entity's]~~Midwest Reliability Organization's assessments, dues, fees, and other charges for its statutory activities.

7. Amended or Supplemental Business Plans and Budgets

During the course of the fiscal year, if ~~[Regional Entity]~~Midwest Reliability Organization determines it does not or will not have sufficient funds to carry out its delegated functions and related activities, ~~[Regional Entity]~~Midwest Reliability Organization shall submit to NERC one or more proposed amended or supplemental business plans and budgets and

requests for approval of supplemental assessments, reflecting costs, cost increases or funding shortfalls not provided for in ~~{Regional Entity}'s~~ Midwest Reliability Organization's approved business plan and budget for the fiscal year. NERC shall review and approve the proposed amended or supplemental business plan and budget and proposed supplemental assessment, or shall direct ~~{Regional Entity}~~ Midwest Reliability Organization to make such revisions as NERC deems appropriate prior to approval. NERC shall submit ~~{Regional Entity}'s~~ Midwest Reliability Organization's approved amended or supplemental business plan and budget and proposed supplemental- assessment to the Commission for approval.

8. NERC Review of Regional Entity Financial Statements

NERC shall conduct reviews of the quarterly and annual financial statements submitted by ~~{Regional Entity}~~ Midwest Reliability Organization pursuant to Section 9(h) and (i) of the Agreement. ~~{Regional Entity}~~ Midwest Reliability Organization shall provide supporting documentation for the quarterly and annual financial statements as reasonably requested by NERC based on its reviews.

NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION

REVISED DELEGATION AGREEMENT

WITH

NORTHEAST POWER COORDINATING COUNCIL

CLEAN VERSION

NORTHEAST POWER COORDINATING COUNCIL, INC.
1040 AVE OF THE AMERICAS, NEW YORK, NY 10018 TELEPHONE (212) 840-1070 FAX (212) 302-2782

April 30, 2010

Mr. David Cook
Vice President & General Counsel
NERC
1120 G St. NW, Suite 990
Washington, DC 20005

Re: REVISED AND AMENDED NPCC REGIONAL DELEGATION AGREEMENT

Dear David,

The Northeast Power Coordinating Council, Inc. Board of Directors unanimously approved a resolution in support of the Revised and Amended Regional Delegation Agreement during its April 27, 2010 teleconference meeting. The resolution reads in part:

***RESOLVED**, that the Board hereby approves the revised draft pro forma regional delegation agreement in substantially the form attached hereto as Exhibit A; and be it*

***FURTHER RESOLVED**, that the NPCC President and CEO be, and he hereby is, authorized to execute and deliver, in the name and on behalf of NPCC, an Amended and Restated Delegation Agreement between NERC and NPCC in substantially the form approved or authorized by the Board, with such changes therein or additions thereto that the NPCC President and CEO determines to be necessary, advisable...*

Pursuant to your request, NPCC is hereby providing the final NPCC Revised and Amended Regional Delegation Agreement to you for presentation to the NERC Board.

Thank you for your collaboration on this enhanced agreement.

Sincerely,

Edward A. Schwerdt
President and Chief Executive Officer

CC: NPCC Board of Directors

**AMENDED AND RESTATED DELEGATION AGREEMENT BETWEEN
NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION
AND NORTHEAST POWER COORDINATING COUNCIL, INC.**

AMENDED AND RESTATED DELEGATION AGREEMENT (“Agreement”) made as of January 1, 2011, between the North American Electric Reliability Corporation (“NERC”), an organization certified by the Federal Energy Regulatory Commission (“Commission”) pursuant to Section 215(c) of the Federal Power Act to establish and enforce Reliability Standards for the Bulk-Power System, and Northeast Power Coordinating Council, Inc. (“NPCC”), an organization established to develop and enforce Reliability Standards within the geographic boundaries identified on **Exhibit A** to this Agreement, and for other purposes. NERC and NPCC may be individually referred to herein as “Party” or collectively as “Parties.”

WITNESSETH

WHEREAS, Subtitle A of the Electricity Modernization Act of 2005 added Section 215 to the Federal Power Act (16 U.S.C. § 824n) (hereafter “the Act”), which, among other things, provides for the establishment of an electric reliability organization (“ERO”) to develop and enforce Reliability Standards applicable to all owners, operators, and users of the Bulk-Power System;

WHEREAS, the Commission has adopted regulations for the implementation of the Act, which are set forth at Chapter I, Title 18, Code of Federal Regulations, Part 39 (the “ERO Regulations”);

WHEREAS, the Commission has certified NERC as the ERO that will, in accordance with the Act, establish and enforce Reliability Standards for the Bulk-Power System, subject to certain delegation provisions described below;

WHEREAS, the Act recognizes the international interdependency of electric reliability within North America and envisions the ERO and such applicable Regional Entities as international organizations;

WHEREAS, the Act and Section 39.8 of the ERO Regulations provide for the delegation by the ERO of authority to propose and enforce Reliability Standards to regional entities (“Regional Entities”) such as NPCC provided that:

(A) The Regional Entity is governed by —

- (i) an independent board;
- (ii) a balanced stakeholder board; or
- (iii) a combination independent and balanced stakeholder board.

(B) The Regional Entity otherwise satisfies the provisions of Section 215(c)(1) and (2) of the Act; and

(C) The agreement promotes effective and efficient administration of Bulk-Power System reliability;

WHEREAS, certain Regional Entities are organized on an Interconnection-wide basis and are therefore entitled to the presumption set forth in the Act that: “[t]he ERO and the Commission shall rebuttably presume that a proposal for delegation to a Regional Entity organized on an Interconnection-wide basis promotes effective and efficient administration of bulk power system reliability and should be approved”;

WHEREAS, the Act further provides that the ERO shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Reliability Standard or modification to a Reliability Standard to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest;

WHEREAS, NPCC is not organized on an Interconnection-wide basis and therefore is not entitled to the rebuttable presumptions accorded such an entity;

WHEREAS, NERC will work through NPCC to carry out certain of its activities in furtherance of its responsibilities as the ERO under the Act;

WHEREAS, NERC has concluded that NPCC meets all requirements of the Act, the ERO Regulations, and the NERC Rules of Procedure as approved by the Commission (“NERC Rules of Procedure”) necessary to qualify for delegation; and

WHEREAS, NERC and NPCC having operated under a predecessor agreement to this Agreement, have negotiated this amended and restated Agreement so as to incorporate the benefits of their mutual experience and lessons learned while operating under the predecessor agreement and thereby provide for the more efficient and effective execution of their respective responsibilities in a transparent manner that is pursuant to Section 215 of the Act and the ERO Regulations;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, NERC and NPCC agree as follows:

1. Definitions. The capitalized terms used in this Agreement shall be defined as set forth in the Act, the ERO Regulations, the NERC Rules of Procedure, or the NERC Glossary of Terms Used in Reliability Standards, or, if not so defined, shall be defined as set forth in this Section 1 or elsewhere in the text of this Agreement:

(a) Breach means (i) the failure of a Party to perform or observe any material term, condition or covenant of the Agreement or (ii) a representation in Section 2 of the Agreement shall have become materially untrue.

(b) Cross-Border Regional Entity means a Regional Entity that encompasses a part of the United States and a part of Canada or Mexico.

(c) Delegated Authority means the authority delegated by NERC to NPCC to propose and enforce Reliability Standards pursuant to the Act and to undertake related activities set forth in this Agreement in furtherance of these delegated functions in accordance with the Act, the ERO Regulations and this Agreement.

2. Representations.

(a) For purposes of its Delegated Authority, NPCC hereby represents and warrants to NERC that:

(i) NPCC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder. NPCC is governed in accordance with its bylaws by a combination independent and balanced stakeholder board. Pursuant to these bylaws, no two industry sectors can control any NPCC decision and no single industry sector can veto any NPCC decision. The relevant portions of such bylaws are attached hereto in **Exhibit B**¹, and as so attached are in full force and effect. No other such corporate governance documents are binding upon NPCC.

(ii) As set forth in **Exhibit C** hereto², NPCC has developed a standards development procedure, which provides the process that NPCC may use to develop Regional Reliability Standards [and Regional Variances, if the regional entity is organized on an Interconnection-wide basis] that are proposed to NERC for adoption.

(iii) As set forth in **Exhibit D** hereto, NPCC has adopted the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure, which provides for the enforcement of Reliability Standards within NPCC geographic boundaries as shown on **Exhibit A**.

(b) NERC hereby represents and warrants to NPCC that:

(i) NERC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder; and

(ii) NERC has been certified as the ERO by the Commission pursuant to the Act.

¹ The **Exhibit B** from NPCC shall meet the requirements contained in **Exhibit B** to this Agreement.

² The **Exhibit C** from NPCC shall meet the requirements contained in **Exhibit C** to this Agreement.

3. Covenants.

(a) During the term of this Agreement, NPCC shall maintain and preserve its qualifications for delegation pursuant to the Act and shall not amend its Regional Entity Rules without NERC's approval, which shall not be unreasonably withheld or delayed and which shall, in the case of a Regional Entity organized on an Interconnection-wide basis, be governed by the presumptions provided for in Section 215(d)(2) and (e)(4)(C) of the Act, and be subject to any required Commission approval.

(b) During the term of this Agreement, NERC shall maintain its qualification and status as the ERO pursuant to the Act and, subject to the provisions of Sections 17 and 18 of this Agreement, NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations or programs of NPCC under this Agreement without first obtaining the consent of NPCC, which consent shall not be unreasonably withheld or delayed.

(c) During the term of this Agreement, NERC and NPCC shall adhere to and require that all participants in their respective activities under this Agreement follow and comply with the NERC Antitrust Compliance Guidelines.

4. Delegation of Authority.

(a) Based upon the representations, warranties and covenants of NPCC in Sections 2 and 3 above, the corporate governance documents set forth in **Exhibit B**, the standards development process set forth in **Exhibit C**, and the compliance monitoring and enforcement program set forth in **Exhibit D**, NERC hereby delegates authority, pursuant to Section 215(e)(4) of the Act, to NPCC for the purpose of proposing Reliability Standards to NERC, as set forth in Section 5 of this Agreement, and enforcing Reliability Standards, as set forth in Section 6 of this Agreement, within the geographic boundaries and such other scope set forth on **Exhibit A**, *provided*, that NPCC shall not monitor and enforce compliance with Reliability Standards for NPCC or an affiliated entity with respect to reliability functions for which NPCC or an affiliate is a Registered Entity. Any exclusions from this delegation of authority to NPCC within, or additions to this delegation of authority to NPCC beyond, the geographic boundaries set forth on **Exhibit A** are stated on **Exhibit A**.

(b) In circumstances where NPCC or an affiliated entity is a Registered Entity, NPCC shall enter into an agreement with another Regional Entity or NERC for the other

Regional Entity or NERC to monitor and enforce NPCC or affiliate's compliance with Reliability Standards. Such agreements are subject to NERC and Commission approval.

(c) Nothing in this Agreement shall prohibit NPCC from entering into an arrangement between one or more other Regional Entities to perform compliance monitoring and enforcement activities outside of its region, on behalf of NERC and/or other Regional Entities, for Registered Entities that have registered functions monitored by more than one Regional Entity, subject to approval by NERC.

(d) For Cross-Border Regional Entities, the authority delegated by this Agreement shall extend only to the portion of the region identified on **Exhibit A** that is within the United States. Any delegation of authority by ERO Governmental Authorities in Canada or Mexico shall be governed by a separate agreement and is outside the scope of this Agreement; provided, however, that both NPCC and NERC shall endeavor to ensure that this Agreement and such separate agreements are compatible.

(e) As a condition to this delegation of authority and subject to the provisions of Section 17 of this Agreement, NPCC shall comply with the applicable provisions of NERC's Certificate of Incorporation, Bylaws, Rules of Procedure, and Reliability Standards, as from time to time adopted, approved, or amended.

5. Development and Proposal of Reliability Standards.

- (a) In connection with its Delegated Authority, NPCC shall be entitled to:
- (i) propose Reliability Standards, Regional Variances, or modifications thereof to NERC, which shall be considered by NERC through an open and inclusive process for proposing and adopting Reliability Standards that affords NPCC reasonable notice and opportunity to be heard; and
 - (ii) develop Regional Reliability Standards [and Regional Variances, if Regional Entity is organized on an Interconnection-wide basis] through NPCC process as set forth in **Exhibit C**. Proposals approved through NPCC process shall be reviewed by the NERC Board after NERC provides notice and an opportunity for interested persons to comment. In the case of a proposal from a Regional Entity organized on an Interconnection-wide basis, comments shall be limited to the factors identified in NERC Rule of Procedure 312.3 as it may be amended from time to time. The NERC Board shall promptly thereafter consider such

proposed Regional Reliability Standard or Regional Variance, applying the rebuttable presumption described in subsection 5(b) of this Agreement if the proposed Regional Reliability Standard or Regional Variance is from a Regional Entity organized on an Interconnection-wide basis, and either approve the proposed Regional Reliability Standard or Regional Variance and submit it to the Commission for approval, or disapprove it in writing setting forth its reasons. NPCC may appeal any disapproval of a proposed Regional Reliability Standard or Regional Variance to the Commission.

(b) Pursuant to Section 215(d)(3) of the Act, NERC shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Regional Reliability Standard or Regional Variance or modification thereof to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. Any person challenging such proposal from the Regional Entity organized on an Interconnection-wide basis shall have the burden of proof. NERC shall not find that this presumption has been rebutted except based upon substantial evidence that has been disclosed to, and been subject to comment by, the Interconnection-wide Regional Entity during NERC's review of the proposal.

6. Enforcement of Compliance with Reliability Standards.

(a) In connection with its delegated authority pursuant to this Agreement, NPCC shall enforce Reliability Standards (including Regional Reliability Standards and Regional Variances) within the geographic boundaries set forth, or as otherwise specified, in **Exhibit A** through the compliance monitoring and enforcement program set forth in **Exhibit D**. NERC and NPCC agree that this compliance monitoring and enforcement program meets all applicable requirements of the Act, Order No. 672 of the Commission, and the ERO Regulations, including, *inter alia*, the requirement for an audit program pursuant to Section 39.7(a) of the ERO Regulations, the assessment of penalties pursuant to Section 39.7(c) through 39.7(g) of the ERO Regulations and the requirements for due process. NPCC may not change its compliance monitoring and enforcement program set forth in **Exhibit D** absent NERC's approval, which shall not be unreasonably withheld or delayed, and the approval of the Commission. Subject to the rights and limitations specified in Sections 17 and 18 of this Agreement, NPCC agrees to comply with the NERC Rules of Procedure, with any directives issued pursuant to Section 8(c)

of this Agreement, and with any guidance and directions issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, in implementing this program.

(b) NPCC shall report promptly to NERC any Possible Violation, Alleged Violation, or Confirmed Violation of a Reliability Standard, and its eventual disposition by NPCC. Such report shall include the owner's, operator's, or user's name, which Reliability Standard or Reliability Standards were the subject of the Possible Violation, Alleged Violation, or Confirmed Violation, when the Possible Violation, Alleged Violation, or Confirmed Violation occurred, other pertinent facts including circumstances surrounding the Possible Violation, Alleged Violation, or Confirmed Violation with any known risk to the Bulk-Power System, when the Possible Violation, Alleged Violation, or Confirmed Violation was or will be mitigated, the name of a person knowledgeable about the Possible Violation, Alleged Violation, or Confirmed Violation to serve as a point of contact with the Commission, and any other information required by NERC compliance program procedures. NERC shall promptly forward such report to the Commission. NERC and NPCC shall cooperate in filing such periodic summary reports as the Commission shall from time to time direct on Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards and summary analyses of such Possible Violations, Alleged Violations, and Confirmed Violations.

(c) Each Possible Violation, Alleged Violation, or Confirmed Violation shall be treated as nonpublic unless the matter is filed with the Commission as a Notice of Penalty, or, if disclosure is required, dismissed. The disposition of each Possible Violation, Alleged Violation, or Confirmed Violation that relates to a Cybersecurity Incident or that would jeopardize the security of the Bulk-Power System if publicly disclosed shall remain nonpublic unless the Commission directs otherwise.

(d) All dispositions by NPCC of Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards shall be reported to NERC for review and, in the case of Confirmed Violations, penalties or sanctions, and settlements, for approval. Following approval of a disposition by NERC, NERC shall file the disposition with the Commission, if required by, and in accordance with, Section 215(e) of the Act and Section 39.7 of the ERO Regulations. NERC shall review NPCC dispositions based on the following criteria:

(i) whether the disposition is supported by a sufficient record compiled by NPCC in accordance with the NERC Rules of Procedure, NERC directives and

Commission requirements, taking into account the nature of the Possible Violation, Alleged Violation, or Confirmed Violation,

(ii) whether the disposition is consistent with any applicable directives issued pursuant to Section 8(c) of this Agreement, any applicable directions or guidance issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, or other applicable NERC guidance, concerning the Reliability Standards to which the Possible Violation, Alleged Violation, or Confirmed Violation relates,

(iii) if the disposition is a Confirmed Violation or settlement, whether it provides for a penalty or sanction, or a determination of no penalty or sanction, determined in accordance with the NERC Sanction Guidelines, Appendix 4B to the NERC Rules of Procedure, and

(iv) whether the disposition is reasonably consistent with other dispositions by NPCC and by other Regional Entities of Possible Violations, Alleged Violations, and Confirmed Violations involving the same or similar facts and circumstances.

NERC may reject any disposition, with an explanation of why NERC believes the disposition does not meet the above criteria. NPCC may submit a disposition requiring NERC approval that has been rejected by NERC, or a revised disposition following a rejection, directly to the NERC Board Compliance Committee for approval without revising the disposition to address all the grounds on which NERC originally rejected the disposition. The final approval of NPCC disposition of a Possible Violation, Alleged Violation, or Confirmed Violation shall be made by the NERC Board Compliance Committee, provided, that the NERC Board or NERC Board Compliance Committee may, by appropriate resolution, delegate authority for final approval of dispositions of specified categories of Possible Violations, Alleged Violations, or Confirmed Violations to the NERC President.

(e) All appeals of penalties imposed by NPCC as a result of a decision by NPCC Hearing Body shall be filed with, heard by and disposed of by, NERC in accordance with the NERC Rules of Procedure.

(f) NPCC shall maintain the capability to conduct investigations of Possible Violations and Alleged Violations of Reliability Standards and to conduct such investigations in a confidential manner.

(g) NPCC shall maintain a program of proactive monitoring and enforcement of compliance with Reliability Standards, in accordance with the NERC Compliance Monitoring and Enforcement Program and the annual NERC Compliance Monitoring and Enforcement Program Implementation Plan.

(h) As part of its compliance monitoring and enforcement program, NPCC shall maintain a conflict of interest policy that assures the integrity and independence of such program, including the integrity and independence of the persons or decision-making bodies making final determinations in compliance enforcement actions under Section 5.0 of the NERC Compliance Monitoring and Enforcement Program. NPCC may have stakeholders lead or participate in its board compliance committee so long as integrity and independence are assured through reasonable and appropriate recusal procedures.

(i) As often as NERC deems necessary, but no less than every five years, NERC shall review NPCC compliance monitoring and enforcement program to determine that: (i) the program meets all applicable legal requirements; (ii) actual practices reflect the requirements; and (iii) the program administered pursuant to the Delegated Authority promotes consistent interpretations across North America of Reliability Standards and comparable levels of sanctions and penalties for violations of Reliability Standards constituting comparable levels of threat to reliability of the Bulk-Power System.

7. Delegation-Related Activities.

NERC will engage NPCC on its behalf to carry out certain of its activities that are in furtherance of Bulk-Power System reliability and NERC's responsibilities as the ERO under the Act or in support of the Delegated Authority, as specified in the NERC Rules of Procedure and listed on **Exhibit E**. These delegation-related activities shall include, but are not limited to, those described in subsections (a) through (f), each of which shall be considered a statutory activity:

(a) Certification of Bulk-Power System Entities. The NERC Board shall set criteria for certification in accordance with the NERC Rules of Procedure. NPCC shall issue certifications in accordance with the NERC Rules of Procedure.

(b) Registration of owners, operators, and users of the Bulk-Power System as responsible for compliance with requirements of Reliability Standards.

(i) The NERC Board shall develop criteria for registration of owners, operators, and users of the Bulk-Power System as Registered Entities and shall apply the registration criteria to register owners, operators and users of the Bulk-Power System as Registered Entities.

(ii) NERC shall maintain a registration database of Registered Entities, based on data and information provided by NPCC and other Regional Entities. NPCC shall provide timely and accurate information relating to registrations to NERC, on at least a monthly basis, to enable NERC to maintain a registration database that is accurate and up-to-date.

(iii) The NERC Board Compliance Committee shall hear and decide appeals from owners, operators and users of the Bulk-Power System contesting registration, in accordance with the NERC Rules of Procedure. If the NERC Board Compliance Committee upholds the decision to register an owner, operator, or user, NERC shall defend the decision in any subsequent appeal of the decision by the Registered Entity to the Commission.

(c) Reliability Assessment and Performance Analysis. NPCC shall develop assessments of the reliability of the Bulk-Power System, or ensure that data and information are collected, analyzed and provided to NERC in support of the development of reliability assessments, in accordance with the NERC Rules of Procedure. NPCC shall also develop and maintain, and collect data in support of the development and maintenance of, reliability performance metrics and assessments of risks to the Reliable Operation of the Bulk-Power System, in accordance with the NERC Rules of Procedure and NERC directives. NERC shall develop data-gathering quality control procedures, forms and reporting mechanisms, which shall be used by NPCC and other Regional Entities in carrying out their responsibilities under this subsection (c).

(d) Event Analysis and Reliability Improvement. NPCC shall conduct event analysis pursuant to the NERC Rules of Procedure and applicable governmental regulations. NERC and NPCC shall coordinate event analysis to support the effective and efficient use of their collective resources, consistency in event analysis, and timely delivery of event analysis reports. In collaboration with NERC, NPCC shall disseminate to the electric industry lessons learned and other information obtained or resulting from event analysis.

(e) Training and Education. NPCC may provide training and education to Registered Entities, as it deems necessary, in support of its performance of delegated functions and related activities under this Agreement. NERC may also provide training and education programs to Registered Entities on topics relating to NERC's responsibilities as the ERO.

(f) Situation Awareness and Infrastructure Security.

(i) NPCC shall gather and assess situation awareness information provided by Registered Entities pursuant to the NERC Rules of Procedure and applicable governmental regulations, and shall provide other data, information and assistance to NERC in support of NERC's activities in monitoring present conditions, and responding to events, on the Bulk-Power System

(ii) NPCC shall collaborate with NERC in its efforts to coordinate electric industry activities to promote critical infrastructure protection of the Bulk-Power System in North America.

8. Oversight of Performance of Delegated Functions and Related Activities.

This Section 8 sets forth processes and procedures which the Parties intend shall be used in NERC's oversight of NPCC performance of its Delegated Authority and related activities pursuant to this Agreement. It is the intent of NERC and NPCC that matters relating to NERC's oversight of NPCC performance of its Delegated Authority and related activities shall be established or resolved by collaboration between NERC and NPCC and, where applicable, other Regional Entities, to the maximum extent possible, consistent with the construct that NERC and the Regional Entities are operating together in a collaborative manner to carry out the responsibilities of the ERO under Section 215 of the Act and the ERO Regulations.

(a) (i) NERC shall develop, in collaboration with NPCC and other Regional Entities, performance goals, measures and other parameters (including, without limiting the scope of such goals, measures and parameters, financial performance goals, measures and parameters), and performance reports, which shall be used to measure NERC's and NPCC performance of their respective functions and related activities. The performance goals, measures and parameters and the form of performance reports shall be approved by the NERC President and shall be made public. NPCC shall provide data, information and reports to NERC, in accordance with established schedules, to enable NERC to calculate NPCC performance to the agreed-upon goals, measures and parameters.

(ii) NERC shall use the performance goals, measures and parameters and performance reports to evaluate NPCC performance of its delegated functions and related activities and to provide advice and direction to NPCC on performance improvements. The performance goals, measures and other parameters and the values of such goals, measures and parameters, shall be reviewed by NERC, NPCC and the other Regional Entities, revised if appropriate, and made public, on the same timeline as the annual business planning and budgeting process described in Section 9 of this Agreement.

(iii) At the request of the President of NERC, NPCC shall be required to develop, submit for NERC approval, and implement action plans to address areas of its performance that are reasonably determined by NERC, based on analysis of NPCC performance against the performance goals, measures and parameters, or performance of specific activities, to be unsatisfactory, *provided*, that prior to requiring NPCC to adopt and implement an action plan or other remedial action, NERC shall issue a notice to NPCC of the need and basis for an action plan or other remedial action and provide an opportunity for NPCC to submit a written response contesting NERC's evaluation of NPCC performance and the need for an action plan. NPCC may request that the President of NERC reconsider the request, and thereafter may request that the NERC Board review and reconsider the request. NERC and NPCC shall work collaboratively as needed in the development and implementation of NPCC action plan. A final action plan submitted by NPCC to NERC shall be made public unless the President of NERC makes a written determination that the action plan or specific portions of the plan should be maintained as non-public.

(b) NERC shall make available to NPCC standardized training and education programs, which shall be designed taking into account input from NPCC and other Regional Entities, for NPCC personnel on topics relating to the delegated functions and related activities.

(c) (i) NERC may issue directives to NPCC concerning the manner in which NPCC shall perform its delegated functions and related activities under this Agreement. The NERC Rules of Procedure, or any other ERO Rule requiring approval of the Commission, shall not be considered "directives." NERC shall initiate the development of a directive through a collaborative process with NPCC and, if applicable, other Regional Entities to which the directive will apply. Any directive developed through the collaborative process shall be approved by, and issued under the signature of, the NERC President.

(ii) If after a period of time that is reasonable under the circumstances, NERC and NPCC and, if applicable, other Regional Entities are unable to reach agreement on the contents of the directive, NERC may issue the directive with the approval of and under the signature of the NERC President; *provided*, that before the NERC President issues a directive pursuant to this paragraph (ii), NPCC and, if applicable, other Regional Entities, shall be given a reasonable opportunity to present their positions on, and a suggested alternative version or versions of, the proposed directive to the NERC President.

(iii) Upon issuance of a directive by the NERC President, it shall be binding upon, and shall be complied with by, NPCC subject to reasonable time periods for adoption, implementation, and funding of any necessary resources. Upon request by NPCC the NERC Board (or a committee of the Board to which the Board delegates appropriate authority) shall review and shall confirm, revise or revoke any directive that was issued by the NERC President without NPCC agreement, *provided*, that NPCC shall request such review within thirty (30) days following issuance of the directive by the NERC President unless good cause can be shown for a later request.

(iv) NERC and NPCC and, if applicable, other Regional Entities, shall collaborate in deciding whether a directive (whether issued pursuant to paragraph (ii) or paragraph (iii)) shall be made public. If no agreement is reached by the date of issuance as to whether the directive shall be made public, the NERC President shall decide whether the directive will be made public, *provided*, that is the intent of the Parties that the NERC President shall apply a presumption that directives should be made public, unless the NERC President makes a written determination stating a specific reason for maintaining a particular directive as non-public.

(d) In addition to the issuance of directives pursuant to subsection (c), the NERC Board (or a Board committee to which the Board has delegated authority) may issue guidance or directions as to the manner in which NPCC and, if applicable, other Regional Entities, shall perform delegated functions and related activities. The Board or Board committee shall also establish reasonable time periods for the implementation of any such guidance or directions, taking into account the impact on the reliability of the Bulk-Power System and the need for funding of additional resources. Any such guidance or directions shall be stated in writing and shall be public, unless the Board or Board committee makes a written determination stating a

specific reason for maintaining particular guidance or directions as non-public. NPCC either individually or in conjunction with other Regional Entities, may request that the NERC Board or Board committee reconsider or revise the guidance or direction.

(e) NERC shall conduct collaborative reviews with NPCC either individually or in conjunction with one or more other Regional Entities, that provide for the exchange of information on practices, experiences, and lessons learned in the implementation of the delegated functions.

(f) Any audits of NPCC performed by NERC shall be limited to an examination of NPCC compliance with this Agreement, NERC's Rules of Procedure, the Compliance Monitoring and Enforcement Program, Commission requirements, and directives that are in effect pursuant to Section 8(c).

9. Funding. NPCC and NERC shall ensure, subject to Commission approval in accordance with the ERO Regulations, that the delegated functions and related activities described in Sections 5, 6 and 7 and listed on **Exhibit E** have reasonable and adequate funding and resources by undertaking the following:

(a) NPCC shall develop, through a collaborative process with NERC, and propose, an annual business plan and budget, in accordance with ERO Regulations, Commission orders and NERC business planning and budgeting policies and instructions. NPCC proposed business plan and budget shall describe the activities necessary for, and provide a budget with adequate resources for, NPCC to carry out its Delegated Authority under this Agreement, including the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E**. NPCC business plan and budget shall show the funding sources and amounts to fund the proposed budget, including as applicable assessments to end users, penalty monies, and other sources of funds.

(b) NPCC and NERC agree that the portion of NPCC approved budget for the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E** that is to be funded by assessments, will be equitably allocated among end users within the geographic boundaries described in **Exhibit A** and recovered through a formula based on Net Energy for Load, or through such other formula as is proposed by NPCC and approved by NERC and the Commission. If NPCC proposes to use a formula other than Net Energy for Load beginning in

the following year, NPCC shall submit the proposed formula to NERC in sufficient time that NERC may review and approve the proposed formula and file it with the Commission by May 15 for approval, and the proposed formula shall be effective for the following year if approved by the Commission on or before the date the Commission approves the annual business plan and budget submitted by NERC and NPCC to the Commission pursuant to the ERO Regulations for such year.

(c) NERC shall determine that the assessments to fund the costs for its statutory functions in its Commission-approved budget are first allocated fairly among the Interconnections and regions according to the applicability of this work to those Interconnections and regions, and then equitably among the end users of the applicable interconnections and regions as appropriate. Allocation on a Net Energy for Load basis will be presumed to satisfy this equitability requirement.

(d) NERC shall provide NPCC with the form or forms for business plan and budget submittal, and any accompanying instructions, in accordance with the schedule for preparation of the business plan and budget developed by NERC and the Regional Entities.

(e) NPCC shall submit its proposed annual business plan and budget for carrying out its Delegated Authority functions and related activities described in Sections 5, 6 and 7 and listed on Exhibit E, as well as for all other activities of NPCC to NERC for review and approval in accordance with the annual schedule for the preparation of business plans and budgets which shall be developed collaboratively by NERC and the Regional Entities, as more fully described in **Exhibit E**.

(f) NERC shall fund NPCC performance of its Delegated Authority and related activities in accordance with NPCC Commission-approved business plan and budget, in the amount of NPCC assessments to end users approved by the Commission. **Exhibit E** sets forth the procedures and timing for billing and collecting NPCC approved assessments from end users and other entities and payment of the approved assessment amount to NPCC unless otherwise modified and approved by NERC and the Commission. NERC shall not impose any material obligation or requirement regarding the Delegated Authority upon NPCC that has not been provided for in an approved business plan and budget or an approved amended or supplemental business plan and budget, without NPCC consent.

(g) NERC shall develop, in consultation with the Regional Entities, a reasonable and consistent system of accounts, with a level of detail and record keeping comparable to the Commission's Uniform System of Accounts and sufficient to allow the Commission to compare each Commission-approved NERC and NPCC fiscal year budget with the actual results at the NERC and Regional Entity levels. NPCC shall follow NERC's prescribed system of accounts except to the extent that NERC permits a departure from the prescribed system of accounts. NERC shall make an informational filing with the Commission describing any such waiver it permits and providing an explanation supporting the permitted departure.

(h) NPCC shall submit unaudited quarterly interim financial statements in form provided by NERC no later than 20 days after the end of the fiscal quarter (March 31, June 30, September 30, and December 31).

(i) NPCC shall submit audited financial statements annually, including supporting materials, in a form provided by NERC no later than May 1 of the following year.

(j) **Exhibit E** to this Agreement sets forth the mechanism through which NPCC shall offset penalty monies it receives (other than penalty monies received from an operational function or division or affiliated entity of NPCC) against its next year's annual budget for carrying out functions under this Agreement, and the mechanism by which NPCC shall transmit to NERC any penalty monies received from an operational function or division or affiliated entity of NPCC. *Provided*, that, subject to approval by NERC and the Commission, NPCC may propose and implement an alternative use of penalty monies to that set forth in **Exhibit E**.

10. Assignment. This Agreement may be assigned by either Party only with the prior written consent of the other, which consent shall be granted or withheld in such non-assigning Party's sole discretion, subject to approval by the Commission. Any assignment under this Agreement shall not relieve a Party of its obligations, nor shall a Party's obligations be enlarged, in whole or in part, by reason thereof. NPCC may not delegate in whole or in part its Delegated Authority to any other entity without NERC's express consent; provided, however, that nothing in this provision shall prohibit NPCC from contracting with other entities to assist it in carrying out its Delegated Authority, provided NPCC retains control and responsibility for such Delegated Authority.

11. Default and Cure. Upon a Breach, the non-breaching Party shall give written notice of such Breach to the breaching Party (the “Default Notice”). Subject to a suspension of the following deadlines as specified below, the breaching Party shall have thirty (30) calendar days from receipt of the Default Notice within which to cure such Breach; *provided however*, that if such Breach is not capable of cure within thirty (30) calendar days, the breaching Party shall commence such cure within thirty (30) calendar days after notice and continuously and diligently complete such cure within ninety (90) calendar days from receipt of the Default Notice; and, if cured within such time, the Breach specified in such notice shall cease to exist. Subject to the limitation specified in the following sentence, if a Breach is not cured as provided in this Section 11, or if a Breach is not capable of being cured within the period provided for herein, the nonbreaching Party shall have the right to declare a default and terminate this Agreement by written notice at any time until cure occurs, and be relieved of any further obligation hereunder. The deadlines for cure and the right to declare a default and terminate this Agreement shall be suspended during the pendency of any efforts or proceedings in accordance with Section 18 of this Agreement to resolve a dispute as to whether a Breach has occurred or been cured. The provisions of this Section 11 will survive termination of this Agreement.

12. Term and Termination.

(a) This Agreement shall become effective on January 1, 2011 (the “Effective Date”).

(b) The term of the Agreement shall be five (5) years from the Effective Date, prior to which time NERC shall conduct an audit pursuant to subsection 6(i) to ensure that NPCC continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. If NPCC meets such requirements, this Agreement may be renewed for another five (5) year term. This Agreement may be renewed for successive additional five (5) year renewal terms provided that prior to the end of each renewal term, NERC shall conduct an audit pursuant to subsection 6(i) to ensure that NPCC continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. Provided, that either Party may terminate this Agreement as of the end of a term by giving written notice to terminate at least one (1) year prior to the end of the term. If this Agreement is not renewed or becomes subject to termination for any reason, the Parties shall work to provide

for a transition of NPCC Delegated Authority to NERC or to another eligible entity and to provide for the resolution of any wind-up costs associated with termination of this Agreement. The termination of this Agreement shall not take effect until such transition has been effected, unless the transition period exceeds one year, at which time NPCC may unilaterally terminate.

(c) If any provision of this Agreement, or the application thereof to any person, entity or circumstance, is held by a court or regulatory authority of competent jurisdiction to be invalid, void, or unenforceable, or if a modification or condition to this Agreement is imposed by a regulatory authority exercising jurisdiction over this Agreement, the Parties shall endeavor in good faith to negotiate such amendment or amendments to this Agreement as will restore the relative benefits and obligations of the signatories under this Agreement immediately prior to such holding, modification or condition. If either Party finds such holding, modification or condition unacceptable and the Parties are unable to renegotiate a mutually acceptable resolution, either Party may unilaterally terminate this Agreement. Such termination shall be effective one year following written notice by either Party to the other Party and to the Commission, or at such other time as may be mutually agreed by NPCC and NERC.

(d) Notwithstanding any termination of this Agreement, provisions contained in Limitation of Liability (Section 13), No Third Party Beneficiaries (Section 14) and Confidentiality (Section 15) shall survive this Agreement in accordance with their terms until sixty (60) days following the expiration of any applicable statute of limitations.

13. Limitation of Liability. NPCC and NERC agree not to sue each other or their directors, officers, employees, and persons serving on their committees and subgroups based on any act or omission of any of the foregoing in the performance of duties pursuant to this Agreement or in conducting activities under the authority of Section 215 of the Act, other than seeking a review of such action or inaction by the Commission. NERC and NPCC shall not be liable to one another for any damages whatsoever, including without limitation, direct, indirect, incidental, special, multiple, consequential (including attorneys' fees and litigation costs), exemplary, or punitive damages arising out of or resulting from any act or omission associated with the performance of the NPCC or NERC's responsibilities under this Agreement or in conducting activities under the authority of Section 215 of the Act, except to the extent that the NPCC or NERC is found liable for gross negligence or intentional misconduct, in which case NPCC or

NERC shall not be liable for any indirect, incidental, special, multiple, consequential (including without limitation attorneys' fees and litigation costs), exemplary, or punitive damages.

14. No Third Party Beneficiaries. Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to, or any liability to, any third party.

15. Confidentiality. During the course of the Parties' performance under this Agreement, a Party may receive Confidential Information, as defined in Section 1500 of NERC's Rules of Procedure. Except as set forth herein, the Parties agree to keep in confidence and not to copy, disclose, or distribute any Confidential Information or any part thereof, without the prior written permission of the issuing Party, unless disclosure is required by subpoena, law, or other directive of a court, administrative agency, or arbitration panel, in which event the recipient hereby agrees to provide the Party that provided the Confidential Information with prompt notice of such request or requirement in order to enable such issuing Party to (a) seek an appropriate protective order or other remedy, (b) consult with the recipient with respect to taking steps to resist or narrow the scope of such request or legal process, or (c) waive compliance, in whole or in part, with the terms of this Section. In the event a protective order or other remedy is not obtained or the issuing Party waives compliance with the provisions, the recipient agrees to furnish only that portion of the Confidential Information which the recipient's counsel advises is legally required and to exercise best efforts to obtain assurance that confidential treatment will be accorded to such Confidential Information. In addition, each Party shall ensure that its officers, trustees, directors, employees, subcontractors and subcontractors' employees, and agents to whom Confidential Information is exposed are under obligations of confidentiality that are at least as restrictive as those contained herein. This confidentiality provision does not prohibit reporting and disclosure as directed by NERC, as set forth in Section 6 of this Agreement.

16. Amendment. Neither this Agreement nor any of the terms hereof, may be amended unless such amendment is made in writing, signed by the Parties, and filed with and approved by the Commission.

17. Amendments to the NERC Rules of Procedure. NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations, or programs of NPCC under this Agreement without first obtaining the consent of NPCC which consent shall not be unreasonably withheld or delayed. To the extent NPCC does not consent, NERC shall have the right to invoke the dispute resolution provisions of Section 18 and, if such effort fails to resolve the dispute, to petition the Commission to adopt the amendment to the NERC Rules of Procedure. To the extent that the Commission issues an order amending or materially affecting the rights or obligations of NPCC under this Agreement, NPCC shall have the option, exercisable no later than 60 days after issuance of such order, to terminate this Agreement. Such termination shall be effective one year following written notice by NPCC to NERC and the Commission, or at such other time as may be mutually agreed by NPCC and NERC.

18. Dispute Resolution. In the event a dispute arises under this Agreement between NERC and NPCC (including disputes relating to NERC's performance of its obligations under this Agreement and/or disputes relating to NPCC's performance of its obligations under this Agreement) which cannot be resolved through discussions between representatives of the Parties in the normal course of operations, the Parties shall use the following procedures ("Dispute Resolution") to attempt to resolve the dispute. NPCC shall not suspend performance of any delegated function, and the Parties shall continue to make reasonable, good faith efforts to comply with their obligations under this Agreement, during the pendency of Dispute Resolution. All notices required to be sent pursuant to this Dispute Resolution procedure shall be sent in accordance with Section 19 of this Agreement. This Dispute Resolution procedure is separate from and in addition to all other processes provided for in this Agreement.

(a) The Party invoking Dispute Resolution shall send a notice to the other Party describing the dispute, stating the invoking Party's position with respect to the dispute, stating that the Party is invoking Dispute Resolution, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the invoking Party.

(b) Within three (3) business days after receipt of the notice invoking Dispute Resolution, the receiving Party shall send a notice to the invoking Party acknowledging receipt of the notice invoking Dispute Resolution, stating the receiving Party's position with respect to

the dispute, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the receiving Party.

(c) During the period commencing three (3) business days and ending twenty (20) business days after the date of the receiving Party's notice, the designated representatives shall engage in good faith negotiations to attempt to resolve the dispute, *provided*, that the designated representatives may agree prior to the end of such twenty (20) business day period that the process should move to the next step of Dispute Resolution.

(d) If the designated representatives are unable to arrive at a resolution of the dispute by the end of the time period described in subsection (c), they shall notify the chief executive officers of their respective Parties. The chief executive officers of the Parties shall thereafter engage in good faith negotiations to attempt to resolve the dispute during the period of twenty (20) business days immediately following the time period described in subsection (c), *provided*, that the chief executive officers may agree prior to the end of such twenty (20) business day period that negotiations are at impasse and the process may move to the next step as described in subsection (f). Upon mutual agreement of the Parties, the twenty (20) business day period may be extended to pursue ongoing good faith negotiations.

(e) If a resolution of the dispute is achieved by the Parties, it shall be memorialized in a writing that is acceptable in form and substance to each party and is signed by the designated representative or chief executive officer on behalf of each Party.

(f) If the Parties are unable to resolve the dispute pursuant to the process described in subsections (a) through (e), then either Party may invoke any other available dispute resolution mechanism, including, without limitation, filing a complaint or petition with the Commission requesting resolution of the dispute by the Commission, or filing a complaint for relief in a court having jurisdiction over Parties and the subject matter of the dispute in accordance with Section 20. *Provided, however*, that: (i) it is the intent of the Parties that unresolved disputes shall be presented to and resolved by the Commission if the Commission has and accepts jurisdiction over the subject matter of the dispute, (ii) the Parties may, by mutual agreement, attempt to resolve the dispute through arbitration, mediation, or other process involving resort to an impartial neutral, and (iii) it is the intent of the Parties that resolution of disputes through

Commission proceedings, arbitration, mediation, or other use of an impartial neutral, is preferred over resort to judicial proceedings.

(g) This Section 18 shall not apply to compliance enforcement actions against individual Registered Entities.

19. Notice. Whether expressly so stated or not, all notices, demands, requests, and other communications required or permitted by or provided for in this Agreement shall be given in writing to a Party at the address set forth below, or at such other address as a Party shall designate for itself in writing in accordance with this Section, and shall be delivered by hand or reputable overnight courier:

If to NERC:

North American Electric
Reliability Corporation
116-390 Village Blvd.
Princeton, NJ 08540-5721
Attn: General Counsel

Coordinating Council, Inc.
1040 Avenue of the Americas – 10th Floor
New York, New York 10018 -3703
Attn: Edward Schwerdt
Facsimile: 212-302-2782

20. Governing Law. When not in conflict with or preempted by federal law, this Agreement will be governed by and construed in accordance with the laws of New Jersey without giving effect to the conflict of law principles thereof. The Parties recognize and agree not to contest the exclusive or primary jurisdiction of the Commission to interpret and apply this Agreement; provided however that if the Commission declines to exercise or is precluded from exercising jurisdiction of any action arising out of or concerning this Agreement, such action shall be brought in any state or federal court of competent jurisdiction in New Jersey. All Parties hereby consent to the jurisdiction of any state or federal court of competent jurisdiction in New Jersey for the purpose of hearing and determining any action not heard and determined by the Commission.

21. Headings. The headings and captions in this Agreement are for convenience of reference only and shall not define, limit, or otherwise affect any of the terms or provisions hereof.

22. **Savings Clause.** Nothing in this Agreement shall be construed to preempt or limit any authority that NPCC may have to adopt reliability requirements or take other actions to maintain reliability of the Bulk-Power System within the geographic boundaries described in **Exhibit A** that are outside the Delegated Authority, as long as such reliability requirements and actions are not inconsistent with Reliability Standards applicable to the region described in **Exhibit A** and do not result in a lessening of reliability outside the region described in **Exhibit A**.

23. **Entire Agreement.** This Agreement constitutes the entire agreement, and supersedes all prior agreements and understandings, both written and oral, among the parties with respect to the subject matter of this Agreement.

24. **Execution of Counterparts.** This Agreement may be executed in counterparts and each shall have the same force and effect as the original.

NOW THEREFORE, the parties have caused this Agreement to be executed by its duly authorized representatives, effective as of the Effective Date.

Northeast Power Coordinating Council, Inc. (NPCC) Exhibit A – Geographic Area

The geographic area covered by NPCC includes New York state, the six New England states, and Ontario, Quebec, and the Maritime Provinces in Canada. The total population served is approximately 56 million. The area covered is approximately 1 million square miles.

Exhibit B – Governance

Exhibit B shall set forth the Regional Entity’s bylaws, which NERC agrees demonstrate that the Regional Entity meets the following criteria:

CRITERION 1: The Regional Entity shall be governed by an independent board, a balanced stakeholder board, or a combination independent and balanced stakeholder board. (Federal Power Act § 215(e)(4)(A), 18 C.F.R. § 39.8(c)(1), Order No. 672 at ¶ 727.)

CRITERION 2: The Regional Entity has established rules that assure its independence of the users and owners and operators of the bulk power system, while assuring fair stakeholder representation in the selection of its directors. Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 699, 700.)

CRITERION 3: If the Regional Entity has members, the Regional Entity has established rules that assure that its membership is open, that it charges no more than a nominal membership fee and agrees to waive the fee for good cause shown, and that membership is not a condition for participating in the development of or voting on proposed Regional Reliability Standards. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 170-173.)

CRITERION 4: The Regional Entity has established rules that assure balance in its decision-making committees and subordinate organizational structures and assure no two industry sectors can control any action and no one industry sector can veto any action. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶ 728.)

CRITERION 5: The Regional Entity has established rules that provide reasonable notice and opportunity for public comment, due process, openness, and balance of interests in exercising its duties. (Federal Power Act § 215(c)(2)(D) and (e)(4), 18 C.F.R. § 39.8(c)(2).)

Exhibit B – Governance

AMENDED AND RESTATED

BYLAWS

OF

NORTHEAST POWER COORDINATING COUNCIL, INC.

I. Offices

The principal office of Northeast Power Coordinating Council, Inc. (“NPCC”) shall be located in New York County, State of New York.

II. Purpose of Northeast Power Coordinating Council, Inc.

The purpose of NPCC is to promote and enhance the reliable and efficient operation of the international, interconnected bulk power system in Northeastern North America through (i) the development of regional reliability standards and compliance assessment and enforcement of continent-wide and regional reliability standards, coordination of system planning, design and operations, and assessment of reliability, pursuant to an agreement with the Electric Reliability Organization (“ERO”) which designates NPCC as a regional entity and delegates authority from the U.S. Federal Energy Regulatory Commission (“FERC”), and by Memoranda of Understanding with applicable Canadian Provincial regulatory and/or governmental authorities (collectively, “statutory activities”), and (ii) the establishment of regionally-specific criteria, and monitoring and enforcement of compliance with such criteria (collectively, “non-statutory criteria services”). In the development of regionally-specific reliability criteria, NPCC, to the extent possible, facilitates attainment of fair, effective and efficient competitive electric markets.

III. Terms

Terms not defined in these Bylaws shall have the definitions set forth in the Federal Power Act, Part 39 of the regulations of the FERC, as further clarified in FERC’s April 19, 2007 Order 119 FERC 61,060, and if not defined in any of those sources, shall be defined in accordance with their commonly understood and used technical meanings in the electric power industry, including applicable codes and standards.

“Bulk Power System” shall be deemed to refer to the interconnected electrical systems within Northeastern North America comprising generation and transmission facilities on which faults or disturbances can have a significant adverse impact outside of the local area. In this context, local areas and the specific facilities that comprise the bulk power system are determined by the Members of NPCC, utilizing a reliability impact based methodology.

“Northeastern North America” shall be deemed to comprise the geographical area within the perimeter border enclosing the State of New York, the six New England States of the United States, and the Canadian Provinces of Ontario, Québec, New Brunswick and Nova Scotia, including any radial load or generation connecting to these systems.

IV. Membership

- A. List of Members. The Members of NPCC are listed on Schedule A attached hereto.
- B. Eligibility. Upon suitable application describing the nature and activities of the applicant, additional entities shall be accepted by the Board of Directors of NPCC (the “Board”) as Members in the appropriate categories, defined as follows:
- (1) **General Membership** is voluntary and is open to any person or entity, including any entity participating in the Registered Ballot Body of the ERO that has an interest in the reliable operation of the Northeastern North American bulk power system. General Members are subject to compliance with reliability standards and receive additional services from the regional entity division of NPCC.
 - (2) **Full Membership** shall be available to entities which are General Members that also participate in electricity markets in the international, interconnected bulk power system in Northeastern North America. Independent system operators (“ISOs”), regional transmission organizations (“RTOs”), Transcos and other organizations or entities that perform the Balancing Authority function operating in Northeastern North America are expected to be Full Members of NPCC. The New York State Reliability Council and any other sub-regional reliability councils which may be formed are also expected to be Full Members. Full Members are subject to compliance with regionally-specific criteria, in addition to reliability standards, and receive additional services from the criteria services division of NPCC.
- C. Application as a Member. Any person or entity that is eligible to become a Member of NPCC in accordance with Article IV.B. may become either a General Member or a Full Member by completing and submitting to NPCC a membership application on a form prescribed by the Board. Any person or entity that applies to NPCC as a Member shall comply with the conditions and obligations of membership specified in these Bylaws. As an additional condition of membership in NPCC, each person or entity registering as a Member shall execute an agreement with NPCC, in a form to be specified by the Board, that such person or entity will hold all Directors, officers, employees and agents of NPCC, as well as volunteers participating in good faith in the activities of NPCC, harmless, to the extent permitted by U.S. Federal or Canadian Provincial laws, rules and regulations, for any injury or damage caused by any act or omission of any Director, officer, employee, agent or volunteer in the course of performance of his or her duties on behalf of NPCC, other than for acts of gross negligence, intentional misconduct or a breach of confidentiality.

If not a natural person, the Member shall designate a representative and an alternate representative with authority to receive notices, cast votes, execute waivers and consents, and enter into binding agreements on behalf of the Member. NPCC shall maintain a current roster of the Members of NPCC, including each Member’s designated representative and alternate representative. From time to time, the Board may establish a date by which Members shall submit their application renewals. All Members shall confirm their applications within thirty (30) calendar days of the date of receipt of request by NPCC, using an application renewal form prescribed by the Board. Any Member that has not submitted an application renewal within thirty (30) calendar days following the date established by the Board shall be removed from the NPCC roster. NPCC shall notify any Member that is removed from the roster of Members of such removal, by notice sent to such former Member’s last known address on the records of NPCC.

- D. **Voting. There shall be eight (8) voting sectors (“Voting Sectors”), defined as follows:**

Sector (1). Transmission Owners: This Voting Sector shall consist of any entity within Northeastern North America that owns at least 200 circuit miles of integrated transmission

facilities, or has an Open Access Transmission Tariff or equivalent on file with the FERC or the appropriate regulatory or governmental authority. This sector includes transmission owners that have placed their transmission under the operational control of an ISO/RTO, independent transmission companies and merchant transmission owners/developers.

Sector (2). Reliability Coordinators: This Voting Sector shall consist of any entity within Northeastern North America certified as a Reliability Coordinator.

Sector (3). Transmission Dependent Utilities (“TDUs”); Distribution Companies and Load-Serving Entities (“LSEs”). This Voting Sector shall consist of entities within Northeastern North America that are:

- (a) Entities with a regulatory contract, or other legal obligation to serve wholesale aggregators or end-use customers, and that depend primarily on the transmission systems of third parties to provide this service;
- (b) Agents or associates that represent groups of TDUs;
- (c) Electric distribution companies;
- (d) Entities serving end-use customers under a regulated tariff, a contract governed by a regulatory tariff, or other legal obligation to serve; or
- (e) Each member of a generation and transmission (“G&T”) cooperative or a joint-action agency permitted to designate the G&T or joint action agency to represent it in this sector.

Sector (4). Generator Owners: This Voting Sector shall consist of entities within Northeastern North America that are affiliated and/or independent generators.

Sector (5). Marketers, Brokers and Aggregators: This Voting Sector shall consist of entities within Northeastern North America that are:

- (a) Entities providing energy to end-use customers under a power marketing agreement or other authorization not classified as a regulated tariff;
- (b) Entities that buy, sell, or broker energy and related services for resale in wholesale or retail markets, whether a non-jurisdictional entity operating within its charter or an entity licensed by a jurisdictional regulator; or
- (c) Generation and transmission cooperatives and joint-action agencies that perform an electricity broker, aggregator, or marketer function.

Sector (6). Customers: This Voting Sector shall consist of entities within Northeastern North America that are:

- (a) Entities or customers that take delivery of energy that is not

purchased for resale within Northeastern North America;

- (b) Agents or associations representing groups of large end users within Northeastern North America; or
- (c) Agents, state consumer advocates, or other advocate groups representing groups of small customers within Northeastern North America.

Sector (7). State and Provincial Regulatory and/or Governmental Authorities.

This Voting Sector shall consist of State and Provincial regulatory or governmental authorities within Northeastern North America.

Sector (8). Sub-Regional Reliability Councils, other Regional Entities and Interested Entities: This Voting Sector shall consist of:

- (a) Any entity within Northeastern North America authorized by an appropriate regulatory and/or governmental authority to be a Sub-Regional Reliability Council;

Any other delegated Regional Entity; or

- (c) Any person or entity, including any entity participating in the Registered Ballot Body of the ERO, that has an interest in the reliable operation of the bulk power system in Northeastern North America.

- E. Assignment to Voting Sector. A new applicant for membership shall request to be assigned to a Voting Sector subject to Board approval. A Member may request to be assigned to any Voting Sector so long as membership in that Voting Sector is consistent with the Member's business or other activities within the NPCC region. Multiple memberships of the separate business functions of an entity are permitted, with each membership assigned to the appropriate separate sector and each membership designating a different representative and alternate. A consultant, attorney, agent, vendor, trade or industry association, state, provincial or local consumer advocate organization that provides services to or otherwise represents the interests of the Members of one or more Voting Sectors may elect to be assigned to one such Voting Sector subject to Board approval. Entities may elect to change their Voting Sector participation in connection with the Annual Meeting of Members of NPCC, subject to Board approval.
- F. Term of Membership. Membership in NPCC shall be retained so long as a Member meets its respective qualifications, obligations, and conditions of membership as set forth in this Article IV.

V. **Organization of NPCC**

- A. Each Member shall designate an executive level representative and an alternate representative with full authority to act on its behalf in carrying out the work of NPCC.
- B. NPCC shall have a Board of Directors and shall retain a Chairman, who shall serve as Chair of the Board. The Board shall also consist of two Co-Vice Chairs, the President and the Secretary, all *ex officio*; and additional Directors to be selected by the eight Voting Sectors of Members as specified below. The Directors shall designate two Co-Vice Chairs. The Co-Vice Chair designees shall be from different Voting Sectors and shall be elected by a vote of the entire Membership. In the temporary absence of the Chair, a Vice Chair designated by two-thirds vote of the Directors shall perform the duties of the Chair. NPCC's Chairman, President and officers, when serving *ex officio*, shall not have any vote on Board matters, except that the Co-Vice Chairs shall retain the voting rights that they otherwise held by virtue of serving as a Director.
- C. The officers of NPCC shall consist of a President, a Secretary and a Treasurer, with assistants as appropriate, and such additional officers as may be approved by the Members. Officers, except for the President, shall hold office for one year or until the next Annual Meeting of Members of NPCC and until their successors are duly elected and qualified.
- D. NPCC shall employ a President and staff, as required to carry out NPCC's mission and to perform the functions of NPCC. The President shall be appointed by the Board and shall serve at the Board's discretion. In the event of a vacancy in the presidency, the Board shall appoint an interim President who shall serve until such time as the Board appoints a new President.
- E. In the event a vacancy occurs in the Board of Directors, or in the office of Co-Vice Chair, Secretary, or Treasurer in the interim between Annual Meetings of Members of NPCC, the Chair may designate a person from the same Voting Sector to fill such vacancy with the approval of a majority vote of Members from the applicable Sector.
- F. In the event a vacancy occurs in the Office of Chair in the interim between Annual Meetings of Members of NPCC, the Board may fill such vacancy by a two-thirds affirmative majority of the weighted sector votes, with each Director casting one vote within the applicable sector, at a meeting of the Board at which a quorum is present. The term of office of the persons designated to fill any such vacancy shall expire on the date of the next subsequent Annual Meeting of Members of NPCC. The authority and responsibilities of the Chair and the President shall be defined by the Board.
- G. Statutory activities will be conducted by the regional entity division of NPCC. Non-statutory criteria services will be provided by the criteria services division of NPCC.

VI. **Board of Directors**

- A. **Hybrid Board.** NPCC shall have a Board of Directors consisting of stakeholders balanced by sector and an independent Chairman, two Co-Vice Chairs, the President, and the Secretary.
- B. **Term and Compensation.** The term of office of the Directors shall be three (3) years. Initial terms of Directors shall be staggered by the Board so that members serve initial terms of one, two, or three years. There shall be no limit on the number of terms which may be served by any individual. Directors shall serve without compensation, including when performing duties of a Co-Vice Chair.

- C. Powers and Duties. The Board shall develop NPCC policies, direct the activities of NPCC, accept additional entities as Members, review and approve or modify Member Voting Sector assignment, and make assignments to the committees of NPCC. The Board shall (i) approve a Regional Delegation Agreement with the ERO which delegates authority from FERC in the United States and additional agreements with appropriate Canadian Provincial regulatory and/or governmental authorities, (ii) approve and oversee NPCC's Regional Reliability Standards Development Process and submit such Regional Standards to the ERO for adoption by FERC and appropriate Canadian Provincial regulatory and/or governmental authorities, (iii) approve the NPCC Compliance Enforcement Program and the assessment and enforcement of mandatory compliance with Reliability Standards consistent with the Regional Delegation Agreement and agreements with Canadian Provincial regulatory and/or governmental authorities, and (iv) oversee NPCC's assessment and enforcement of mandatory compliance with regionally-specific reliability criteria through administration of the NPCC Reliability Compliance and Enforcement Program. The duties of the Board shall also include consideration and resolution of budgetary matters, including the levying of any special assessments, and determination of any annual membership fee for Full Members. However, the Board may not amend these Bylaws or establish, modify or eliminate any of NPCC's Regional Reliability Standards, regionally-specific reliability criteria, guides, programs or procedures; nor may the Board add, modify, or eliminate Voting Sectors established pursuant to these Bylaws.

To carry out the purposes of NPCC, the Board, acting through the President and NPCC staff, shall enlist such personnel from Members as may be necessary; and, within the limits of the annual budget, may employ such personnel, incur such administrative expenses, and retain such independent professional consulting services for NPCC and the committees of NPCC as it may deem desirable.

- D. Board Composition. NPCC shall have a Board of Directors that shall consist of up to eight (8) voting sectors. The voting sectors shall include the following:

Sector (1). Transmission Owners (Maximum of 3, with no more than 1 per Balancing Authority Area)

Sector (2). Reliability Coordinators (Maximum of 3)

Sector (3). Transmission Dependent Utilities ("TDUs"); Distribution Companies and Load-Serving Entities ("LSEs") (Maximum of 3)

Sector (4). Generator Owners (Maximum of 3)

Sector (5). Marketers, Brokers and Aggregators (Maximum of 3)

Sector (6). Customers (Maximum of 3)

Sector (7). Regulators (Maximum of 3)

Sector (8). Sub-Regional Reliability Councils, other Regional Entities and Interested Entities (Maximum of 3, with a representative of the New York State Reliability Council, LLC included)

- E. Quorum and Voting Requirements for the Board. At any meeting of the Board, attendance in person or by proxy by at least one-half of the Directors in each of at least sixty percent (60%) of the sectors shall constitute a quorum. Except as otherwise expressly provided in NPCC's Certificate of Incorporation, these Bylaws or applicable law, actions by the Board shall be approved upon receipt of a two-thirds affirmative majority of the weighted sector votes, with each

Director casting one vote within the applicable sector, at a meeting of the Board at which a quorum is present. The following process shall be used to determine if there are sufficient affirmative votes:

- The number of votes cast is the sum of affirmative and negative votes, excluding abstentions.
- The number of affirmative votes cast in each Voting Sector will be divided by the sum of affirmative and negative votes cast in that Voting Sector to determine the fractional affirmative vote for each Voting Sector. Abstentions will not be counted for the purposes of determining the fractional affirmative vote for a Voting Sector.
- The sum of the fractional affirmative votes from all sectors divided by the number of sectors voting will be used to determine if a two-thirds affirmative majority has been achieved. A sector will be considered as “voting” if any Member of the sector casts either an affirmative or a negative vote.

An action will be approved if the sum of fractional affirmative votes from all sectors divided by the number of voting sectors is at least two-thirds.

- F. Board Action Without Meeting. Any action required, or permitted to be taken at a meeting of the Board of Directors, may be taken without a meeting if the action is taken by all members of the Board. The action must be evidenced by one or more written consents (which may be in electronic form) describing the action taken, signed by each Director, and included in the minute book of NPCC. Any action taken under this Section VI.F. is effective when the last Director signs the consent, unless the consent specifies a different effective date.
- G. Election and Removal of Directors. The Initial Board shall be the persons named in the Certificate of Incorporation and shall serve until the first Annual Meeting of the Members. The Initial Board shall nominate a list of Directors consistent with the Board composition requirements set forth in Section VI.D. At the first meeting of the Members, the Members from each sector shall vote to elect Directors in their respective sector. A Director shall be elected by a vote of the majority of the Members in the respective sector. No sector shall elect more Directors than the number of Members in such sector.
- A Director may be removed for cause by at least two-thirds of the Members in their respective sector at a regular meeting or at a special meeting called for that purpose; *provided* that there is a quorum of that sector’s Members present at that meeting, or by at least a majority of the Directors present at a meeting called for that purpose, and *provided, further*, that there is a quorum of not less than a majority present at the meeting of Directors at which such action is taken.
- H. Indemnification. Subject to the limitation set forth in Section VI.I. below, NPCC shall indemnify its Directors, Officers, employees and other corporate agents, including volunteers participating in good faith in the activities of NPCC and persons serving on duly constituted committees of NPCC (collectively, “NPCC Indemnitees”), in each case, to the full extent from time to time permitted by New York Not-for-Profit Corporation Law (“N-PCL”) and other applicable law. Such right of indemnification shall inure to the benefit of the legal representative of any NPCC Indemnitee. The foregoing right of indemnification shall be in addition to, and not in restriction or limitation of, any right such NPCC Indemnitee may have under applicable law (including the N-PCL).

- I. Limitation on Indemnification. The maximum amount of losses (i.e., damages, judgments, fines, penalties, liability, costs and expenses, including reasonable attorneys' fees and expenses) for which NPCC will be obligated to indemnify the NPCC Indemnitees under Section VI.H. will be the policy limit of directors and officers' ("D&O") liability insurance set forth in the D&O insurance policy maintained by NPCC.

VII. Committees

NPCC shall have such committees, subcommittees, task forces and other groups as the Board may deem appropriate, including a Regional Standards Committee (RSC), a Compliance Committee (CC), a Reliability Coordinating Committee (NPCC's principal technical committee), a Public Information Committee and an Audit and Finance Committee.

The Audit and Finance Committee shall be comprised of at least three members of the Board and include one Director which shall be designated an audit committee financial expert by the Board. A chairperson of the Audit and Finance Committee shall be designated by the Board from among the members of the committee.

Committee members shall be nominated and approved by the Board in accordance with guidelines established by the Board. Quorum and voting rules applicable to the Board shall also apply to voting on any such NPCC decision making committees, unless otherwise determined by the Board. Each committee shall establish a charter or scope of work, which shall be presented to the Board for approval.

VIII. Members' Voting Rights

- A. Quorum and Voting Requirements for Meetings of Members. At any meeting of the Members of NPCC, attendance in person or by proxy by one-half of the Members in each of at least sixty percent (60%) of the Voting Sectors on the roster of Members maintained by NPCC shall constitute a quorum. Except as otherwise expressly provided in NPCC's Certificate of Incorporation, these Bylaws or applicable law, actions by the Members of NPCC shall be approved upon receipt of a two-thirds affirmative majority vote of the sectors at a meeting of the Members of NPCC at which a quorum is present, where (i) each Member shall have one vote within a sector, except that if less than one-half of the Members in a sector are present, in person or by proxy, at the meeting, the vote of that sector shall be weighted by a percentage equal to the number of Members of the sector present in person or by proxy at the meeting divided by one-half of the Members in the sector; (ii) the vote of each sector of NPCC shall be allocated for and against the proposed action based on the respective percentages of votes cast for and against the proposed action by the Members in that sector voting in person or by proxy; and (iii) the proportions of the votes of each sector allocated for and against the proposed action shall be summed to determine the total number of votes for and against the proposed action.

The following process is used to determine if there are sufficient affirmative votes:

- The number of votes cast is the sum of affirmative and negative votes, excluding abstentions.
- The number of affirmative votes cast in each sector will be divided by the sum of affirmative and negative votes cast to determine the fractional affirmative vote for each sector. Abstentions will not be counted for the purposes of determining the fractional affirmative vote for a sector.

- The sum of the fractional affirmative votes from all sectors divided by the number of sectors voting will be used to determine if a two-thirds affirmative majority has been achieved. (A sector will be considered as “voting” if any Member of the sector casts either an affirmative or a negative vote.)
- B. Waivers of Notice of Meetings of Members; Member Meeting Adjournments. Notice of a Meeting of Members need not be given to any Member who signs a waiver of notice, in person or by proxy, whether before or after the meeting. The attendance of any Member at a meeting, in person or by proxy, without protesting prior to the conclusion of the meeting the lack of notice of such meeting, shall constitute a waiver of notice of the meeting by such Member. When any Meeting of Members is adjourned to another time or place, it shall not be necessary to give notice of the adjourned meeting if the time and place to which the meeting is adjourned are announced at the meeting at which the adjournment is taken, and if at the adjourned meeting only such business is transacted as might have been transacted at the original meeting.
- C. Actions Without a Meeting of Members. Any action, required or permitted to be taken at a Meeting of Members, may be taken without a meeting if the action is consented to in writing by the minimum number of Members that would be required to approve the action at a Meeting of Members at which all Members were present. The call for action without a Meeting of Members may be initiated by the Chairman of the Board or by a number of Members constituting at least ten percent (10%) of the Members on the roster of Members maintained by NPCC, which number shall include Members in at least four (4) of the Voting Sectors. Notice of the proposal for action without a meeting shall be provided to all Members on the roster of Members maintained by NPCC at least seven (7) days prior to the date established for the tabulation of consents. The Members shall receive written notice of the results within fourteen (14) days of the action vote, and all written responses of the Members shall be filed with the minutes of proceedings of Members.
- D. Meeting of Members to be Open. Notice to the public of the dates, places, and times of Meetings of Members, and all non-confidential material provided to the Members, shall be posted on NPCC’s web site at approximately the same time that notice is given to the Members. Meetings of Members shall be open to the public, subject to reasonable limitations due to the availability and size of meeting facilities; *provided* that the meeting may be held in or adjourn to closed session to discuss matters of a confidential nature, including, but not limited to, personnel matters, compliance and enforcement matters, litigation, or commercially sensitive or critical energy infrastructure information of any entity.
- E. Electronic Voting. Upon completion of applicable processes that permit parties to comment on the subject issue(s), electronic voting on matters before the membership, Board or any committee is permitted. A quorum will be determined to exist for purposes of conducting an electronic vote when NPCC receives completed ballots from two-thirds of the total number of outstanding ballots. In the event that a quorum exists for purposes of an electronic vote but the matter has not been resolved, NPCC may continue to solicit additional responses in order to resolve the matter by electronic voting.

IX. Membership Rights and Obligations, and Organizational Process

- A. All General and Full Members shall have the following rights and obligations:
- (1) Rights:
 - (a) Attendance at all meetings of the general membership of NPCC; and, subject to procedures established by the committees and to the terms of applicable confidentiality agreements, attendance at

- meetings of NPCC's committees, task forces and any other such NPCC groups.
- (b) Access to minutes of each committee, subcommittee, task force or any other NPCC group, subject to procedures established by the committees and to the terms of applicable confidentiality agreements.
 - (c) Vote to amend these Bylaws.
 - (d) Vote to establish, modify or eliminate NPCC Regional Reliability Standards and programs.
 - (e) For Full Members only: Vote to establish, modify or eliminate NPCC regionally-specific reliability criteria.
- (2) Obligations:
- (a) Each Member shall agree, in writing, to accept the responsibility to promote, support, and comply with the purposes and policies of NPCC as set forth in its Certificate of Incorporation and Bylaws as from time to time adopted, approved or amended.
 - (b) Each Member acknowledges that it has the responsibility to plan and design its bulk power system and conduct its operations in compliance with ERO Reliability Standards, Regional Reliability Standards and Regional Variances consistent with applicable laws, regulations, permits and licenses.
 - (c) Each Member agrees to submit such data and reports as required by NPCC in order to perform compliance enforcement obligations delegated to it by the ERO, subject to established procedures and to the terms of applicable confidentiality agreements.
 - (d) In addition, each Full Member shall:
 - (i) plan and design its bulk power system in compliance with Criteria, Guides, and Procedures established by NPCC and applicable ERO Standards;
 - (ii) conduct its operations in compliance with Criteria, Guides, and Procedures established by NPCC and applicable ERO Standards consistent with applicable laws, regulations, permits and licenses;
 - (iii) assure that, whenever it enters into arrangements with non-members which could have an impact on the reliability of the international, interconnected bulk power systems in Northeastern North America, the arrangements will not adversely impact the ability of the Full Members to comply with regionally-specific criteria established by NPCC, ERO Standards, or the criteria of regional reliability organizations established in areas in which the facilities used for such arrangements are located;
 - (iv) notify NPCC of its existing facilities and operating procedures and of its plans for major additions or modifications affecting the operation of the interconnected systems; and shall report to NPCC any decision as to significant alterations or changes proposed for their respective electric systems, whether in generation, transmission, inter-system communication or control and protective equipment, or in operating procedures; such report to be submitted promptly and, except in cases

of emergency, before final commitments are undertaken or changes in operating procedures become effective;

- (v) promptly notify NPCC and all other Members in writing or electronically if its bulk power system is not being designed or operated, or its operations are not being conducted in compliance with Criteria, Guides, and Procedures established by NPCC, stating its reasons, and providing its plan and schedule to achieve compliance;
- (vi) submit such data and reports as required by the Reliability Compliance and Enforcement Program and to abide by the compliance assessments and sanctions prescribed by NPCC's enforcement procedures, subject to Alternative Dispute Resolution; and
- (vii) undertake and perform the administrative and financial obligations described in Article XIII of these Bylaws.

B. Standards Development Procedure. NPCC shall develop a Regional Reliability Standards Development Procedure that provides the design-basis approach to a consensus building process by which NPCC may develop Regional Reliability Standards and Regional Variances to be proposed to the ERO for adoption, under delegated authority by the FERC and the Canadian Provincial regulatory and/or governmental authorities.

C. Procedures for Enforcing Compliance with Reliability Standards. Where regulatory approval has been obtained or governmental authority has been provided, upon the determination of the NPCC Board that a user, owner or operator of the bulk power system has violated a reliability standard, NPCC shall enforce compliance for such violations, pursuant to procedures and processes that shall be specified in the NPCC Compliance Enforcement Program. Such procedures and processes shall provide for reasonable notice and opportunity for hearing. Any sanction imposed for a violation of a Reliability Standard shall bear a reasonable relation to the seriousness of the violation and shall take into consideration circumstances surrounding the violation and efforts of the owner, operator, or user of the bulk power system to remedy the violation in a timely manner. Subject to any necessary action by any applicable governmental authorities, no sanction imposed for a violation of a reliability standard shall take effect until the thirty-first (31st) day after the NPCC Board, where authorized by law or agreement, files with the FERC or other applicable Canadian regulatory and/or governmental authority's notice of the sanction and the record of the proceedings in which the violation and sanction were determined, or such other date as ordered by the FERC or other applicable Canadian regulatory and/or governmental authorities or as prescribed by applicable law.

X. Full Members: Enforcement of Mandatory Compliance With Regionally-specific Criteria
Subject to approval of the Full Members, NPCC shall establish an NPCC Reliability Criteria Compliance and Enforcement Program, including matrices for measuring compliance, levying non-monetary sanctions, and procedures for Alternative Dispute Resolution. Such program shall be administered by the NPCC Board. The Reliability Coordinating Committee, with the full cooperation of each member, shall expeditiously evaluate, as appropriate, alterations or measures designed to correct any assessed non-compliance and shall report such studies to the NPCC Board.

XI. Meetings

Meetings of NPCC may be held on such dates as the Board may from time to time determine and shall be held in such places as the Board may from time to time designate. Special meetings may be called from time to time by the Chair, the Board, or by a number of

Members constituting at least ten percent (10%) of the Members on the roster of Members maintained by NPCC, which number shall include Members in at least four (4) of the Voting Sectors. Notice of all meetings, stating the time and place, shall be given by NPCC in writing to each Member by issuing the notice at least one week prior to the date of the meeting. The Secretary, Assistant Secretary, or, in their absence, a secretary *pro tempore* designated by the Chair or the President, shall keep the records of NPCC meetings.

When appropriate, the membership, the Board and the committees may use proxies or teleconference facilities. Such participation shall constitute attendance for purposes of quorum requirements.

XII. Budget

The Board shall prepare or cause to be prepared an annual budget for the administrative and other expenses of NPCC, including the expenditures for the fiscal year for any material special projects undertaken by NPCC and reasonable and proper reserves and provisions for contingencies, an accompanying business plan for NPCC, and a funding mechanism including any supplemental funding mechanism, for each fiscal year. The annual budget, business plan, and funding mechanism of NPCC shall be developed in the form and format and on the schedule stipulated by the ERO for a fiscal year commencing on January 1 and ending on December 31. Each annual budget, business plan, and funding mechanism shall be approved by the Board at a regular meeting or a special meeting of the Board duly called for that purpose. The Board shall approve each annual budget, business plan, and funding mechanism on or before the date stipulated by the ERO during the year prior to the start of the fiscal year in order to allow for timely submittal of the approved annual budget, business plan, and funding mechanism to the FERC and the applicable Canadian regulatory and/or governmental authorities.

If the ERO or a regulatory and/or governmental authority by order remands an annual budget, business plan, or annual, modified, or supplemental funding mechanism, the Board shall promptly address such other through appropriate follow-up measures with the Members and regulatory and/or governmental authorities.

Each Full Member shall be notified of the annual administrative expense budget for the criteria services division, on or before December 1st of the preceding year.

XIII. Funding

NPCC's annual administrative expenses, including any special assessments approved by the Board, shall be apportioned and funded as follows:

- A. Funding of NPCC General Member regional entity division activities shall be through mechanisms established by the ERO, FERC and applicable Canadian regulatory and/or governmental authorities.
- B. General Members shall not be assessed an annual membership fee.
- C. Full Members, other than Full Members that perform the Balancing Authority function, shall not be assessed an annual membership fee.
- D. Full Members that perform the Balancing Authority function shall be assessed and pay a proportional share of the expenses for non-statutory criteria services in proportion to the ratio of the second previous year's Net Energy for Load within the Balancing Authority Area to the aggregate Net Energy for Load within all Balancing Authority Areas in Northeastern North America. NPCC will directly assign non-statutory criteria services costs to a Balancing Authority Area or entity where significant costs are incurred by NPCC for such Area or entity.
- E. No Full Member shall, without its consent, be responsible for expenses of NPCC in any one calendar year in excess of its assessed portion of the amount budgeted for non-statutory criteria services for that year; provided, however, that special assessments may be separately budgeted and their cost allocated by the Board to the Full Members that perform the Balancing Authority function.

XIV. Termination of Membership and Cessation of Non-Statutory Criteria Services

- A. Termination. All General Members and Full Members, other than Full Members that perform the Balancing Authority function, may terminate their membership in NPCC at any time upon fifteen (15) days' written or electronic notice without liability to NPCC. A Full Member that performs the Balancing Authority function may terminate its rights and obligations under these Bylaws (other than its obligation to pay its proportionate share of the non-statutory expenses of NPCC, including special assessments, if applicable, for the full calendar year within which such termination is effective) at any time upon one year's written notice to the President; whereupon, it shall cease to be a Full Member of NPCC as of the date such termination is effective. The President shall promptly inform all Members of receipt of any such notices.
- B. Cessation of Non-Statutory Criteria Services. The Full Members of NPCC may elect by a majority vote to cease non-statutory criteria services.

XV. Conflicts of Interest

NPCC has developed a Code of Conduct that sets forth NPCC policies with respect to, among other things, conflicts of interest. On an annual basis, Directors shall evidence their compliance with NPCC conflict of interest principles by either: (i) signing an Individual Participant Implementation Agreement and thereby agreeing to comply with NPCC's Code of Conduct to the best of his/her ability; or (ii) agreeing that the execution of a Member Entity Implementation Agreement by the employer of such Board member evidences the Board member's agreement to be bound by its employer's Code of Conduct when performing NPCC activities. The Board shall establish similar Code of Conduct compliance requirements for NPCC staff and membership personnel participating on committees, task forces, and working groups as appropriate.

XVI. General

- A. No Member shall be liable for the failure of any other Member to perform its obligations hereunder.
- B. No NPCC officer, member of the Board or member of any other NPCC committee or group, or employee of NPCC shall be personally liable to NPCC or any member thereof, for damages for breach of any duty owed to NPCC or any member thereof, except for liabilities arising from breach of any duty based upon an act or omission (i) in breach of the duty of loyalty owed to NPCC or any individual member, (ii) not in good faith or involving a knowing violation of law, or (iii) resulting in receipt of an improper personal benefit by such NPCC officer, member of the Board or member of any other NPCC committee or group, or employee of NPCC. Neither the amendment nor repeal of this paragraph, nor the adoption of any provision of these Bylaws inconsistent with this paragraph, shall eliminate or reduce the protection offered by this paragraph to an NPCC officer, member of the Board or member of any other such NPCC committee or group, or employee of NPCC in respect of any matter which occurred, or any cause of action, suit or claim which, but for this paragraph, would have accrued or arisen, prior to such amendment, repeal, or adoption.
- C. Those entities listed as Members on Schedule A and subsequent applicants granted membership in NPCC shall be deemed to have accepted and to be bound by all the terms and conditions of these Bylaws, as adopted on July 24, 2007.

APPROVED 7-24-07

Exhibit C – Regional Standard Development Procedure

Exhibit C shall set forth the Regional Entity’s standards development procedure, which NERC agrees meets the following common attributes:

COMMON ATTRIBUTE 1

Proposed regional reliability standards shall be subject to approval by NERC, as the electric reliability organization, and by FERC before becoming mandatory and enforceable under Section 215 of the FPA and any applicable authorities in Canada. No regional reliability standard shall be effective within the NPCC area unless filed by NERC with FERC and applicable authorities in Canada and approved by FERC and applicable authorities in Canada.

COMMON ATTRIBUTE 2

NPCC regional reliability standards shall provide for as much uniformity as possible with reliability standards across the interconnected bulk power system of the North American continent. A NPCC reliability standard shall be more stringent than a continent-wide reliability standard, including a regional difference that addresses matters that the continent-wide reliability standard does not, or shall be a regional difference necessitated by a physical difference in the bulk power system. A regional reliability standard that satisfies the statutory and regulatory criteria for approval of proposed North American reliability standards, and that is more stringent than a continent-wide reliability standard, would generally be acceptable.

COMMON ATTRIBUTE 3

NPCC regional reliability standards, when approved by FERC and applicable authorities in Canada, shall be made part of the body of NERC reliability standards and shall be enforced upon all applicable bulk power system owners, operators, and users within the NPCC area, regardless of membership in the region.

COMMON ATTRIBUTE 4

Requester — The requester is the sponsor of the regional reliability standard request and may assist in the development of the standard. Any member of NPCC or group within NPCC shall be allowed to request that a regional reliability standard be developed, modified, or withdrawn. Additionally, any entity (person, organization, company, government agency, individual, etc.) that is directly and materially affected by the reliability of the bulk power system in the NPCC area shall be allowed to request a regional reliability standard be developed, modified, or withdrawn.

COMMON ATTRIBUTE 5

Regional Standards Committee — The NPCC Regional Standards Committee manages the standards development process. The NPCC Regional Standards Committee will consider which requests for new or revised standards shall be assigned for development (or existing standards considered for deletion). The NPCC Regional Standards Committee will advise the NPCC board on standards presented for adoption.

COMMON ATTRIBUTE 6

Registered ballot body — The registered ballot body comprises all entities or individuals that qualify for one of the stakeholder segments; are registered with NPCC as potential ballot participants in the voting on standards; and are current with any designated fees. Each member of the registered ballot body is eligible to vote on standards. [Each standard action has its own ballot pool formed of interested members of the registered ballot body. Each ballot pool comprises those members of the registered ballot body that respond to a pre-ballot survey for that particular standard action indicating their desire to participate in such a ballot pool.] The representation model of the registered ballot body is provided in Appendix A.]

COMMON ATTRIBUTE 7

NPCC will coordinate with NERC such that the acknowledgement of receipt of a standard request identified in step 1, notice of comment posting period identified in step 4, and notice for vote identified in step 5 below are concurrently posted on both the NPCC and NERC websites.

COMMON ATTRIBUTE 8

An acceptable standard request shall contain a description of the proposed regional reliability standard subject matter containing sufficiently descriptive detail to clearly define the purpose, scope, impacted parties, and other relevant information of the proposed standard.

COMMON ATTRIBUTE 9

Within [no greater than 60] days of receipt of a completed standard request, the NPCC Regional Standards Committee shall determine the disposition of the standard request.

COMMON ATTRIBUTE 10

The NPCC Regional Standards Committee may take one of the following actions:

- Accept the standard request as a candidate for development of a new standard, revision of an existing standard, or deletion of an existing standard. The NPCC Regional Standards Committee may, at its discretion, expand or narrow the scope of the standard request under consideration. The NPCC Regional Standards Committee shall prioritize the development of standard in relation to other proposed standards, as may be required based on the volume of requests and resources.
- Reject the standard request. If the NPCC Regional Standards Committee rejects a standard request, a written explanation for rejection will be delivered to the requester within [no greater than 30] days of the decision.
- Remand the standard request back to the requester for additional work. The standards process manager will make reasonable efforts to assist the requester in addressing the deficiencies identified by the NPCC Regional Standards Committee. The requester may then resubmit the modified standard request using the process above. The requester may choose to withdraw the standard request from further consideration prior to acceptance by the NPCC Regional Standards Committee.

COMMON ATTRIBUTE 11

Any standard request that is accepted by the NPCC Regional Standards Committee for development of a standard (or modification or deletion of an existing standard) shall be posted for public viewing on the NPCC website within [no greater than 30] days of acceptance by the committee.

COMMON ATTRIBUTE 12

The standards process manager shall submit the proposed members of the drafting team to the NPCC Regional Standards Committee. The NPCC Regional Standards Committee shall approve the drafting team membership within 60 days of accepting a standard request for development, modifying the recommendations of the standards process manager as the committee deems appropriate, and assign development of the proposed standard to the drafting team.

COMMON ATTRIBUTE 13

At the direction from the NPCC Regional Standards Committee, the standards process manager shall facilitate the posting of the draft standard on the NPCC website, along with a draft implementation plan and supporting documents, for a no less than a [30]-day comment period. The standards process manager shall provide notice to NPCC stakeholders and other potentially interested entities, both within and outside of the NPCC area, of the posting using communication procedures then currently in effect or by other means as deemed appropriate.

COMMON ATTRIBUTE 14

The drafting team shall prepare a summary of the comments received and the changes made to the proposed standard as a result of these comments. The drafting team shall summarize comments that were rejected by the drafting team and the reason(s) that these comments were rejected, in part or whole. The summary, along with a response to each comment received will be posted on the NPCC website no later than the next posting of the proposed standard.

COMMON ATTRIBUTE 15

Upon recommendation of the drafting team, and if the NPCC Regional Standards Committee concurs that all of the requirements for development of the standard have been met, the standards process manager shall post the proposed standard and implementation plan for ballot and shall announce the vote to approve the standard, including when the vote will be conducted and the method for voting. Once the notice for a vote has been issued, no substantive modifications may be made to the proposed standard unless the revisions are posted and a new notice of the vote is issued.

COMMON ATTRIBUTE 16

The standards process manager shall schedule a vote by the NPCC registered ballot body. The vote shall commence no sooner than [15] days and no later than [30] days following the issuance of the notice for the vote.

COMMON ATTRIBUTE 17

The NPCC registered ballot body shall be able to vote on the proposed standard during period of not less than 10 days.

COMMON ATTRIBUTE 18

All members of NPCC are eligible to participate in voting on proposed new standards, standard revisions or standard deletions. [Alternatively: Each standard action requires formation of a ballot pool of interested members of the registered ballot body.]

COMMON ATTRIBUTE 19

Approval of the proposed regional reliability standard shall require a [two thirds] majority in the affirmative (affirmative votes divided by the sum of affirmative and negative votes). Abstentions and non-responses shall not count toward the results, except that abstentions may be used in the determination of a quorum. A quorum shall mean [XX%] of the members of the [registered ballot body/ballot pool] submitted a ballot.

COMMON ATTRIBUTE 20

Under no circumstances may the board substantively modify the proposed regional reliability standard.

COMMON ATTRIBUTE 21

Once a regional reliability standard is approved by the NPCC board, the standard will be submitted to NERC for approval and filing with FERC and applicable authorities in Canada.

COMMON ATTRIBUTE 22

- **Open** - Participation in the development of a regional reliability standard shall be open to all organizations that are directly and materially affected by the NPCC bulk power system reliability. There shall be no undue financial barriers to participation. Participation shall not be conditioned upon membership in NPCC, and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements. Meetings of drafting teams shall be open to the NPCC members and others.

COMMON ATTRIBUTE 23

- **Balanced** - The NPCC standards development process strives to have an appropriate balance of interests and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter.

COMMON ATTRIBUTE 24

- **Inclusive** — Any entity (person, organization, company, government agency, individual, etc.) with a direct and material interest in the bulk power system in the NPCC area shall have a right to participate by: a) expressing a position and its basis, b) having that position considered, and c) having the right to appeal.

COMMON ATTRIBUTE 25

- **Fair due process** — The regional reliability standards development procedure shall provide for reasonable notice and opportunity for public comment. At a minimum, the procedure shall include public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of interested stakeholders.

COMMON ATTRIBUTE 26

- **Transparent** — All actions material to the development of regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the NPCC Web site.

COMMON ATTRIBUTE 27

- Does not unnecessarily delay development of the proposed reliability standard.

COMMON ATTRIBUTE 28

Each standard shall enable or support one or more of the reliability principles, thereby ensuring that each standard serves a purpose in support of the reliability of the regional bulk power system. Each standard shall also be consistent with all of the reliability principles, thereby ensuring that no standard undermines reliability through an unintended consequence.

COMMON ATTRIBUTE 29

While reliability standards are intended to promote reliability, they must at the same time accommodate competitive electricity markets. Reliability is a necessity for electricity markets, and robust electricity markets can support reliability. Recognizing that bulk power system reliability and electricity markets are inseparable and mutually interdependent, all regional reliability standards shall be consistent with NERC’s market interface principles. Consideration of the market interface principles is intended to ensure that standards are written such that they achieve their reliability objective without causing undue restrictions or adverse impacts on competitive electricity markets.

COMMON ATTRIBUTE 30

To ensure uniformity of regional reliability standards, a regional reliability standard shall consist of the elements identified in this section of the procedure. These elements are intended to apply a systematic discipline in the development and revision of standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

COMMON ATTRIBUTE 31

All mandatory requirements of a regional reliability standard shall be within the standard. Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself.

COMMON ATTRIBUTE 32

Applicability	Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions. If not applicable to the entire NPCC area, then a clear identification of the portion of the bulk power system to which the standard applies. Any limitation on the applicability of the standard based on electric facility requirements should be described.
----------------------	--

COMMON ATTRIBUTE 33

Measure(s)	Each requirement shall be addressed by one or more measures. Measures are used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure will identify to whom the measure applies and the expected level of performance or outcomes required demonstrating compliance. Each measure shall be tangible, practical, and as objective as is practical. It is important to realize that measures are proxies to assess required performance or outcomes. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.
-------------------	--

COMMON ATTRIBUTE 34

Compliance Monitoring Process	Defines for each measure: <ul style="list-style-type: none">• The specific data or information that is required to measure performance or outcomes.• The entity that is responsible for providing the data or information for measuring performance or outcomes.• The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes.• The entity that is responsible for evaluating data or information to assess performance or outcomes.• The time period in which performance or outcomes is measured, evaluated, and then reset.• Measurement data retention requirements and assignment of responsibility for data archiving.

III. APPENDIX	
A) RSAR FORM	19

I. EXECUTIVE SUMMARY

The purpose of the Northeast Power Coordinating Council, Inc. ("NPCC"), is to enhance the reliability of the international, interconnected bulk power system in Northeastern North America through the development of more stringent and specific regional reliability standards and compliance assessment and enforcement of continent-wide and regional reliability standards pursuant to the execution and implementation of a Regional Delegation Agreement with the Electric Reliability Organization ("ERO") and applicable Canadian Memoranda of Understanding that are backstopped by the Federal Energy Regulatory Commission ("FERC") and Canadian Provincial authorities. In the development and enforcement of Regional Reliability Standards, NPCC, to the extent possible, facilitates attainment of fair, effective, efficient, and competitive electric markets.

General Membership in NPCC is voluntary and is open to any person or entity, including any entity participating in the Registered Ballot Body of the ERO that has an interest in the reliable operation of the Northeastern North American bulk power system.

The NPCC Regional Reliability Standards Development Procedure describes the procedures, policies and practices implemented to ensure an "open, fair, and inclusive" process for the transparent initiation, development, implementation and revision of NPCC Regional Reliability Standards necessary for the reliable operation of the international and interconnected bulk power system in Northeast North America. These Standards will, in all cases, not be inconsistent with or less stringent than any requirements of the North American Electric Reliability Council/Electric Reliability Organization (NERC/ERO) Reliability Standards. The procedure will not unnecessarily delay the development of the proposed reliability standards. Each regional reliability standard shall enable or support one or more of the reliability principles, thereby ensuring that each standard serves a purpose in support of the reliability of the regional bulk power system. Each standard shall also be consistent with all of pertinent reliability principles and criteria, thereby ensuring that no standard undermines reliability through an unintended consequence.

II. REGIONAL RELIABILITY STANDARD DEVELOPMENT PROCEDURE

1. CHARACTERISTIC ATTRIBUTES

The NPCC Regional Reliability Standards Development Procedure is:

- **Open** — The NPCC Regional Reliability Standards Development Procedure provides any person the ability to participate in the development of a standard. Any entity that is directly and materially affected by the reliability of the NPCC's bulk power system has the ability to participate in the development and approval of reliability standards. There are no undue financial barriers to participation. Participation in the open comment process is not conditional upon membership in the ERO, NPCC or any organization, and participation is not unreasonably restricted on the basis of technical qualifications or other such requirements. NPCC utilizes a website to accomplish this. Online posting and review of standards and the real time sharing of comments uploaded to the website allow complete transparency.

- **Inclusive** — The NPCC Regional Reliability Standards Development Procedure provides any person with a direct and material interest the right to participate by expressing an opinion and its basis, have that position considered, and appealed through an established appeals process if adversely affected.
- **Balanced** — The NPCC Regional Reliability Standards Development Procedure has a balance of interests and all those entities that are directly and materially affected by the reliability of the NPCC’s bulk power system are welcome to participate and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter. This will be accomplished through the NPCC Bylaws defining eight sectors (categories) for voting.
- **Fair Due Process** — The NPCC Regional Reliability Standards Development Procedure provides for reasonable notice and opportunity for public comment. The procedure includes public notice of the intent to develop a standard, a 45 calendar day public comment period on the proposed standard request, or standard with due consideration of those public comments, and responses to those comments will be posted on the NPCC website. A final draft will be posted for a 30 calendar day pre-balloting period, and then a ballot of NPCC Members will be conducted. Upon approval by the NPCC Members, the NPCC Board then votes to approve submittal of the Regional Standard to NERC.
- **Transparent** — All actions material to the development of Regional Reliability Standards are transparent and information regarding the progress is posted on the NPCC website as well as through extensive email lists.

In as much as NPCC is one of several regional entities within the Eastern Interconnection of North America, there will be **no presumption of validity** by the ERO for any NPCC Regional Reliability Standard. In order to receive the approval of the ERO, the NPCC Reliability Standards Development Process must also achieve the following objectives:

- **No Adverse Impact on Reliability of the Interconnection** — An NPCC Regional Reliability Standard provides a level of bulk power system reliability that is necessary and adequate to protect public health, safety, welfare, and North American security and will not have an adverse impact on the reliability of the Interconnection or other Regions within the Interconnection.
- **Justifiable Difference** — An NPCC Regional Reliability Standard is based on justifiable differences between Regions, such as different electrical systems or facilities, sensitivity of load to disruptions, sensitivity of generation to disruptions, frequency and voltage sensitivity, system operating limit development and facilities ratings process, electrical system interactions, etc.
- **Uniformity**- NPCC Regional Reliability Standards shall provide for as much uniformity as possible with reliability standards across the interconnected bulk power system of the North American continent. A NPCC Reliability Standard shall be more stringent than a continent-wide reliability standard, may include a regional variation that addresses matters that the continent-wide reliability standard does not, or shall be a regional difference necessitated by a physical difference in the northeast’s bulk power system, where the interpretation of the phrase “physical difference” will be consistent with FERC’s Order, issued September 22, 2004, Granting Request For Clarification

regarding Docket No. PL04-5-000, Policy Statement on Matters Related to Bulk Power System Reliability.

- **No Undue Adverse Impact on Commerce** — An NPCC Regional Reliability Standard will not cause any undue adverse impact on business activities that are not necessary for reliability of the Region and its interconnected Regions. All regional reliability standards shall be consistent with NERC's market principles.

Other Attributes of the NPCC Regional Reliability Standards Development Procedure include;

- **Maintenance of Regional Reliability Standards**-NPCC Regional Standards will be reviewed for possible revision at least every three years and follow the same process as a new standard. The old standard will remain in place until such time as the revised version has passed through the entire process, at which point the old standard will be retired in accordance with any applicable new implementation plan associated with the approved revised standard. The review process shall be conducted by soliciting comments from the stakeholders and through open posting on the NPCC website. If no changes are warranted, Regional Standards Committee (RSC) shall recommend to the NPCC Board that the standard be reaffirmed. If the review indicates a need to revise or withdraw a standard, a regional standard authorization request shall be prepared by the RSC and submitted in accordance with the standards development process contained in this procedure.
- **Maintenance of Regional Reliability Standards Development Procedure**-This NPCC Regional Reliability Standards Development Procedure will be reviewed for possible revision at least once every five years or more frequently if needed and subject to the same procedure as that of the development of a standard. All such revisions shall be subject to approval by the NPCC Board, NERC, FERC, and could be subject to approval, if required, by applicable authorities in Canada. The NPCC RSC has the authority to make non-substantive changes to this procedure and subsequently notify the NPCC Board for their concurrence at their next scheduled meeting.
- **Interpretation of Standards**- All persons who are directly and materially affected by the NPCC's bulk power system reliability shall be permitted to request an interpretation of a standard. The person requesting an interpretation will send an email request to the Regional Standards Process Manager (RSPM), as noted on the NPCC website, explaining the specific circumstances surrounding the request and what clarifications are required as applied to those circumstances. The request should indicate the material impact to the requesting party or others caused by the lack of clarity or a possibly incorrect interpretation of the standard. The RSPM along with guidance from the RSC will forward the request to the originating Task Force which acted as the drafting team for that regional reliability standard. The Task Force will address, through a written response, the request for clarification as soon as practical, but not more than 45 business days from its receipt by the Task Force. This written interpretation will be posted along with the final approved and adopted standard and will stand until such time as the standard is revised through the normal RSAR process, at which time the standard will be modified to incorporate the clarifications provided by the interpretation.

2. ELEMENTS OF A RELIABILITY STANDARD

- **Elements of a Regional Reliability Standard**
To ensure uniformity of regional reliability standards, a regional reliability standard shall consist of the elements identified in this section of the procedure. These elements are intended to apply a systematic discipline in the development and revision of standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

All mandatory requirements of a regional reliability standard shall be within the standard document. Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself.

The most current version of the approved NERC Reliability Standard template and its associated elements as or if applicable, will be used at the time of the development of the NPCC Regional Reliability Standard to ensure all essential elements are contained therein to achieve consistency and uniformity and meet all statutory requirements. A sample of the elements contained in the standard appears in Table 1 below, however the latest ERO Board approved Standard template, that may be found on the NERC website, will supersede the list below at the time the regional standard is developed.

Table 1- Elements of a Regional Reliability Standard

Identification Number	A unique identification number assigned in accordance with an administrative classification system to facilitate tracking and reference. (i.e. “NPCC- BAL-002-0-Date” which refers to NPCC Regional Standard, referencing NERC BAL-002 Version 0, with NPCC Effective Date-final adoption by all Regional Authorities)
Title	A brief, descriptive phrase identifying the topic of the standard.
Applicability	Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions. The standard will be applicable to the Bulk Power System unless otherwise noted.
Effective Date and Status	The effective date of the standard or, prior to approval of the standard, the proposed effective date.
Purpose	The purpose of the standard. The purpose shall explicitly state what outcome will be achieved or is expected by this standard.
Requirement(s)	Explicitly stated technical, performance, and preparedness requirements. Each requirement identifies what entity is responsible and what action is to be performed or what outcome is to be achieved. Each statement in the requirements section shall be a statement for which compliance is mandatory.
Risk Factor(s)	The potential reliability significance of each requirement, designated as a High, Medium, or Lower Risk Factor in accordance with the criteria listed below: A High Risk Factor requirement (a) is one that, if violated, could directly cause or contribute to bulk power system instability, separation, or a cascading sequence of failures, or could place the bulk power system at an unacceptable risk of instability, separation, or cascading failures; or (b) is a requirement in a planning timeframe that, if violated, could, under emergency, abnormal, or restorative conditions anticipated by the preparations, directly cause or contribute to bulk power system instability, separation, or a cascading sequence of failures, or could place the bulk power system at an unacceptable risk of instability, separation, or cascading failures, or could hinder restoration to a normal condition. A Medium Risk Factor requirement (a) is a requirement that, if violated, could directly affect the electrical state or the capability of the bulk power system, or the ability to effectively monitor and control the bulk power system, but is unlikely to lead to bulk power system instability, separation, or cascading failures; or (b) is a requirement in a planning timeframe that, if violated, could, under emergency, abnormal, or restorative conditions anticipated by the preparations, directly affect the electrical state or capability of the bulk power system, or the ability to effectively monitor, control, or restore the bulk power system, but is unlikely, under emergency, abnormal, or restoration conditions anticipated by the preparations, to lead to bulk power system instability, separation, or cascading failures, nor to hinder restoration to a normal

	<p>condition.</p> <p>A Lower Risk Factor requirement is administrative in nature and (a) is a requirement that, if violated, would not be expected to affect the electrical state or capability of the bulk power system, or the ability to effectively monitor and control the bulk power system; or (b) is a requirement in a planning time frame that, if violated, would not, under the emergency, abnormal, or restorative conditions anticipated by the preparations, be expected to affect the electrical state or capability of the bulk power system, or the ability to effectively monitor, control, or restore the bulk power system.</p>
Measure(s)	<p>Each requirement shall be addressed by one or more measures. Measures are used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure will identify to whom the measure applies and the expected level of performance or outcomes required demonstrating compliance. Each measure shall be tangible, practical, and as objective as is practical. It is important to realize that measures are proxies to assess required performance or outcomes. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.</p>

Table 2 — Compliance Elements of a Regional Reliability Standard

Compliance Monitoring Process	<p>Defines for each measure:</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible for providing the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes. • The entity that is responsible for evaluating data or information to assess performance or outcomes. • The time period in which performance or outcomes is measured, evaluated, and then reset. • Measurement data retention requirements and assignment of responsibility for data archiving. • Violation severity levels.
--------------------------------------	--

Supporting Information Elements

Interpretation	<p>Any interpretation of regional reliability standard that is developed and approved in accordance with the “Interpretation of Standards” section of Appendix A of this procedure, to expound on the application of the standard for unusual or unique situations or to provide clarifications.</p>
Implementation Plan	<p>Each regional reliability standard shall have an associated implementation plan describing the effective date of the standard or effective dates if there is a phased implementation. The implementation plan may also describe the implementation of the standard in the compliance program and other considerations in the initial use of the standard, such as necessary tools, training, etc. The implementation plan must be posted for at least one public</p>

	comment period and is approved as part of the ballot of the standard.
Supporting References	<p>This section references related documents that support reasons for, or otherwise provide additional information related to the regional reliability standard. Examples include, but are not limited to:</p> <ul style="list-style-type: none"> • Glossary of terms • Developmental history of the standard and prior versions • Notes pertaining to implementation or compliance • Standard references • Standard supplements • Procedures • Practices • Training references • Technical references • White papers • Internet links to related information

3. TERMS AND FUNCTIONS

- **Regional Standards Committee (RSC)**—An NPCC committee charged with management of the NPCC Standards Procedure under a sector based voting structure as described in the NPCC Bylaws. The NPCC RSC will consider requests for new or revised standards and be available for advisement to the NPCC Board on the standards.

The RSC may not itself modify the standard without issuing a new notice to stakeholders regarding a vote of the modified standard. Any RSC action will only be activated in the event of a minor correction of a standard such as errata.

The RSC is an open and balanced stakeholder committee inclusive of all stakeholder interests that provide for or are materially impacted by the reliability of the bulk power system.

The RSC disposition regarding the regional standard authorization request, which will in all cases be within 60 calendar days of receipt of a completed standard request, shall include:

- Accept the standard request as a candidate for development of a new standard, revision of an existing standard, or deletion of an existing standard. The RSC may, at its discretion, expand or narrow the scope of the standard request under consideration. The RSC shall prioritize the development of standards in relation to other proposed standards, as may be required based on the volume of requests and resources.
- Reject the standard request. If the RSC rejects a standard request, a written explanation for rejection will be delivered to the requester within 30 calendar days of the decision.
- Remand the standard request back to the requester for additional work. The standards process manager will make reasonable efforts to assist the requester in addressing the deficiencies identified by the RSC. The requester may then resubmit the modified standard request using the process above. The requester may choose to withdraw the standard request from further consideration prior to acceptance by the RSC.

The NPCC Standard Process responsibilities of the RSC will include:

- Review of NPCC Draft Standards for such factors as completeness, sufficient detail, rational result, and compatibility with existing standards; clarifying standard development issues not specified in this procedure. Under no circumstance will the RSC change the substance of a draft standard.
 - Due consideration to the work of the drafting team as well as the comments of stakeholders and minority objections, in approving a proposed regional reliability standard to go to ballot.
 - Approve standards for pre-ballot posting under a sector based voting structure as described later in the NPCC ~~Bylaws~~ Bylaws or
 - Remand the standard back to the Task Force acting as the drafting team for further work or recommend a change in those participating in the drafting team (i.e. a new drafting team).
- **Regional Standards Process Manager (RSPM)** - The Regional Reliability Standards Procedure shall be administered by a NPCC staff Regional Standards Process Manager. The RSPM is responsible for ensuring that the development and revision of standards is in accordance with this manual. The RSPM works to ensure the integrity of the process, format, consistency of quality, and completeness of the reliability standards. The RSPM facilitates all steps in the process.
 - **Reliability Coordinating Committee (RCC)** —The RCC, will support the standards development process through the assignment of NPCC Task Forces. They will also provide a technical advisory role in the Regional Reliability Standards development procedure through recommendations.
 - **Requester**— A Requester is any individual or an entity (organization, company, government authority, etc.) that submits a complete request for development, revision, or withdrawal of a standard. Any person or an entity that is directly and materially affected by an existing standard or the need for a new standard may submit a request for a new standard or revision to a standard. The Requester is assisted by the RSAR drafting team (if one is appointed by the RSC) to respond to comments and to decide if and when the RSAR is forwarded to the RSC with a request to draft a standard. The Requester is responsible for the RSAR, assisted by the RSAR drafting team and Regional Standards Process Manager, until such time the RSC authorizes development of the standard. The Requester has the option at any time to allow the RSAR drafting team to assume full responsibility for the RSAR. The Requester may chose to participate in subsequent standard drafting efforts related to the RSAR.
 - **Task Forces and Working Groups**,—The committees, task forces and working groups within NPCC , serve an active role in the standards process:
 - Identify the need for new or modified regional standards.
 - Initiate NPCC Standards actions by developing Regional Standard Authorization Requests (RSARs).
 - Develop comments (views and objections) to standards actions.
 - Participate in NPCC Standard drafting.
 - Provide technical oversight in response to changing industry conditions and ERO Requirements.
 - Conduct Field Tests as required

4. PROCEDURE DESCRIPTION

STEPS 1 AND 2: REQUEST TO DEVELOP A NEW REGIONAL STANDARD

Requests to develop a new Regional Reliability Standard shall be submitted to the RSPM by completing a **Regional Standard Authorization Request (RSAR)** (*see Appendix A*). The RSAR is a description of the new or revised standard in sufficient detail to clearly define the

scope, purpose, and importance of the Regional Standard, impacted parties or other relevant information. A “needs” statement will provide the justification for the development of the standard, including an assessment of the reliability and market interface impacts of implementing or not implementing the standard. The RSPM shall maintain the RSAR form and make it available electronically on the NPCC website.

Any person or entity (“Requester”) directly or materially affected by an existing standard or the need for a new or revised standard may initiate a RSAR.

The Requester will submit the RSAR to the RSPM electronically and the RSPM will acknowledge receipt of the RSAR immediately, through electronic receipt. The RSAR, as a minimum, needs to contain the following information in order to be qualified for consideration. The NPCC RSPM will assist the Requester to ensure all the following information is submitted (on the RSAR) in a form appearing in Appendix A:

1. Proposed Title and Date of New RSAR
2. Requester’s Name and Contact Information
3. Purpose of the Regional Standard
4. Description of Industry Need
5. Provide a Brief Description of the Standard
6. Identification of the Entities in the Functional Model as being responsible to adhere to the standard.
7. Necessary information to assist the drafting team, to the extent feasible, to allow them to draft the standard.
8. A cross references to existing NPCC or NERC documents

The RSPM shall forward all properly completed RSARs to the RSC. The RSC shall meet at established intervals to review all pending RSARs. The frequency of this review process will depend on workload, but in no case shall a properly completed RSAR wait for RSC action more than 60 calendar days from the date of receipt. The RSC may take one of the following actions:

- Remand the RSAR back to the RSPM for additional work. In this case, the RSPM may request additional information or clarification for the RSAR from the Requester.
- Accept the RSAR as a candidate for a new or revised standard. In this case, the RSC will forward the RSAR to the RCC to assign a NPCC Task Force to provide technical support and analysis of comments for that RSAR, and assist the Requester and the RSPM in the remaining steps of the process. The RSPM shall post notification of intent to develop a standard on both NPCC and ERO websites within 30 calendar days of acceptance.
- Reject the RSAR. In this case, the RSC will provide a written explanation for rejection to the Requester within 30 calendar days of the rejection decision.

STEPS 3, 4, AND 5: RSC ACCEPTS RSAR AND RCC ASSIGNS TF TO DRAFT NEW OR REVISED STANDARD

A RSAR that is accepted by the RSC will be submitted to the RCC. Within 60 calendar days the RCC shall assign the development of the standard to a Task Force Drafting Team. The RSPM shall solicit and recommend a list of additional candidates for appointment to the team and shall submit the list to the RSC. This list shall include the Requester. The RSC may select other individuals to serve, with the Task Force to draft the Standard. This team shall consist of a small group of people who collectively have the necessary technical expertise and work process skills.

The RSPM shall assign NPCC staff personnel to assist in the drafting of the standard including compliance measure, process and elements. The drafting of measures and compliance administration aspects of the standard will be coordinated with the Compliance Program.

STEP 6: SOLICIT PUBLIC COMMENTS ON DRAFT STANDARD

Once a draft standard has been verified by the RSC to be within the scope and purpose of the RSAR, the RSPM will post the draft standard for the purpose of soliciting public comments. The posting of the draft standard will be linked to the RSAR for reference. In addition to the standard, an implementation plan shall be posted to provide additional details to the public and aid in their commenting and decision process. Comments on the draft standard will be accepted for a 45 calendar day period from the public notice of posting. Comments will be accepted on-line using the NPCC Open Process web-based application.

Final draft standards will be concurrently posted on the ERO website for comments.

STEPS 7, 8, AND 9: OPEN PROCESS POSTING AND ANALYSIS OF THE COMMENTS

The RSPM will assemble the comments on the new draft standard and distribute those comments to the Task Force acting as the standard drafting team. The Task Force shall give prompt consideration to the written views and comments of all participants. An effort to address all expressed comments shall be made, and each commenter shall be advised of the disposition of the comment and the reasons therefore, in addition to public posting of the responses.

The Task Force acting as the Standard Drafting Team shall take one of the following actions:

- Submit the draft standard for RCC endorsement as it stands, along with the comments received and responses to the comments. Based on the comments received, the Task Force acting as the standard drafting team may include revisions that are not substantive. A substantive change is one that directly and materially affects the application of the standard, including, for example: changing “shall” to “should,” changing “should” to “shall”; adding, deleting, or revising requirements; or adding, deleting, or revising measures for which compliance is mandatory.
- Make substantive revisions to the draft standard and reposts it for further open review and comment.
- Task Force recommends Field Test if necessary to RSC.

Requester also may withdraw the request for a standard.

RCC submits proposed RRS to the RSC along with its recommendation based on comments, Task Force statements and any field test results.

STEPS 10 AND 11: RSC APPROVES OF THE NEW OR REVISED STANDARD FOR POSTING

If the RSC, acting with consideration of any recommendations by the RCC and utilizing the composite sector voting structure, as outlined in the NPCC, votes to post the draft standard for approval, the draft standard, all comments received, and the responses to those comments shall be posted electronically for the NPCC Members, by the RSPM and made public through the NPCC Website (www.npcc.org) for a 30 calendar day “pre-ballot review” and request for balloting. If the RSC decides more work is needed, the draft standard will be remanded back to

the drafting Task Force. All actions of the RCC, Task Forces acting as drafting teams and the Regional Standards Committee will be recorded in regular minutes of the group(s) and posted on the NPCC website. Once the notice for a ballot has been issued, no substantive modifications may be made to the proposed standard unless the revisions are posted and a new notice of the vote is issued

STEPS 12, 13 AND 14: BALLOT OF STANDARD

Upon notification of a ballot, the Members of NPCC's registered ballot body will cast their vote consistent with the NPCC Bylaws. This ballot shall commence no sooner than 15 calendar days and no later than 30 calendar days following the notification of ballot. All members of the NPCC are eligible to participate in the voting on proposed, standard revisions or deletions of regional standards. The ballot period will typically begin immediately following the 30 calendar day pre-ballot posting and will last at least 10 business days.

The NPCC registered ballot body comprises all entities or individuals that qualify for one of the eight NPCC stakeholder sectors and are registered with NPCC as potential ballot participants in the voting on standards. Each member of the NPCC registered ballot body is eligible to vote on standards.

In order for a NPCC Regional Standard to be approved;

- A quorum must be established by at least 50% of the NPCC Members of at least 60% of the Voting Sectors on the roster of Members maintained by NPCC.
- A two-thirds majority of the total weighted sector votes cast must be affirmative. The number of votes cast is the sum of affirmative and negative votes, excluding abstentions, and non-responses. Weighted sector vote will be calculated as follows;
 - Affirmative votes cast in each sector will be divided by the sum of affirmative and negative votes cast, in that same sector, to determine the fractional affirmative vote for each sector. Abstentions and non-responses will not be counted for the purposes of determining the fractional affirmative vote for a sector.
 - The sum of the fractional affirmative votes from all sectors divided by the number of sectors voting will be used to determine if a two-thirds majority has been achieved. (A sector will be considered as "voting" if any member of the sector in the ballot pool casts either an affirmative or a negative vote.)
 - A standard will be approved if the sum of fractional affirmative votes from all sectors divided by the number of voting sectors is at least 2/3.

Ballots will be cast electronically and alternatives are as follows;

- Affirmative
- Affirmative with Comments
- Negative
- Negative with Comments
- Abstain

The RSPM shall post the final outcome of the ballot process. If the standard is rejected, it may be withdrawn by either the RCC or the original Requester, or the standard may be remanded by the RSC back to the Task Force acting as the drafting team to address the issues. All comments submitted during the process will be posted and archived for consideration when redrafting the standard upon review.

The standard, once approved by ballot, and a recommendation will be forwarded to the NPCC Board for final Regional approval. The Board may not make substantive modifications to the standard. If the Board does not approve the standard for transmittal to NERC it will be remanded back to the RSC.

If the standard is approved, the standard will be submitted to the NERC/ERO Board of Trustees for approval.

STEPS 15, 16 AND 17: IMPLEMENTATION OF THE NPCC REGIONAL STANDARD

Upon approval within the NPCC , the standard will be submitted to the NERC/ERO for approval(s) and filing with FERC and applicable Canadian Governmental and/or Regulatory Authorities for adoption.

Once a reliability standard is adopted and made effective, all users, owners, planners, and operators of the Bulk Power System in the NPCC geographic area of the Northeast are required to comply with the standard. The NERC/ERO Board of Trustees has established a separate compliance program, also administered in the Northeast by NPCC , to measure compliance with the standards and administer sanctions as appropriate. After adoption of a NPCC Regional Standard, the standard will be forwarded to the compliance program for compliance monitoring and enforcement.

STEP 18: WITHDRAWAL OF STANDARD

Upon rejection of a proposed standard, the RCC or the requester may withdraw the standard completely or remand it back to the Task Force acting as the standard drafting team for further work.

5. Flowchart Regional Standards Development Procedure (Open Process)

6. ERO and Regulatory Process and Approvals

- **NERC/ERO Comment Period** —NERC/ERO shall publicly notice and request comment on the NPCC Regional Reliability Standard, allowing a minimum of 45 calendar days for comment on NERC’s website and actively notify all adjoining Regions. Concurrent with this regional posting, final drafts will be forwarded to NERC for posting on the NERC website to ensure full industry awareness of the standard and expedite and coordinate all commenting. All comments will be responded to electronically through a posted response on the NPCC website or a link on the NERC website. NPCC shall have an opportunity to resolve any objections identified in the comments and may choose to withdraw the request, revise the NPCC Regional Reliability Standard and request another posting for comment, or submit the NPCC Regional Reliability Standard along with a response to any objections received, for approval by NERC.
- **NERC/ERO Approval of NPCC Regional Reliability Standards** —Proposed regional reliability standards shall be subject to approval by the NERC/ERO who shall have a process to evaluate and recommend whether a proposed non-Interconnection-wide NPCC Regional Reliability Standard has been developed in accordance with all applicable procedural requirements and whether NPCC has considered and addressed stakeholder objections. NPCC Board, having been notified of the results of the regional ballot concerning a NPCC Regional Reliability Standard, shall vote to submit the Standard to the NERC/ERO Board for approval as a NERC Reliability Standard. The NERC/ERO Board shall consider NPCC’s request, the scope and implications of the Standard, the recommendation for action on the Standard, any unresolved stakeholder comments, and NPCC’s consideration of comments and unresolved issues if any, in determining whether to approve the NPCC Regional Reliability Standard as a NERC Reliability Standard.
- **Regulatory Authority Approval** — An NPCC Regional Reliability Standard that has been approved by the NERC/ERO board shall be filed with FERC and applicable Canadian Governmental and/or Regulatory Authorities for approval and shall become effective and enforceable within the U.S., per Section 215 of the Federal Power Act, only when adopted by FERC, and within Canada, only when adopted by applicable Canadian Governmental and/or Regulatory Authorities. The regional reliability standard, once adopted will be made part of the body of NERC reliability standards and shall be mandatory and enforceable on all applicable bulk power system owners, operators, and users within the NPCC Region, regardless of membership status.

7. Appeals

- Persons who have directly and materially affected interests and who have been or will be adversely affected by any substantive or procedural action or inaction related to the development, approval, revision, reaffirmation, or withdrawal of a regional reliability standard shall have the right to appeal. This appeals process applies only to the standards process as defined in this procedure.

The burden of proof to show adverse effect shall be on the appellant. Appeals shall be made within 30 calendar days of the date of the action purported to cause the adverse effect, except appeals for inaction, which may be made at any time. In all cases, the request for appeal must be made prior to the next step in the process.

The final decisions of any appeal shall be documented in writing and made public.

The appeals process provides two levels, with the goal of expeditiously resolving the issue to the satisfaction of the participants:

- Level 1 Appeal

Level 1 is the required first step in the appeals process. The appellant submits a complaint in writing to the RSPM that describes the substantive or procedural action or inaction associated with a reliability standard or the standards process. The appellant describes in the complaint the actual or potential adverse impact to the appellant. Assisted by any necessary staff and committee resources, the RSPM shall prepare a written response addressed to the appellant as soon as practical, but not more than 45 calendar days after receipt of the complaint. If the appellant accepts the response as a satisfactory resolution of the issue, both the complaint and response will be made a part of the public record associated with the standard and posted with the standard.

- Level 2 Appeal

If after the Level 1 Appeal the appellant remains unsatisfied with the resolution, as indicated by the appellant in writing to the regional standards process manager, the RSPM shall convene a Level 2 Appeals Panel. This panel shall consist of five members total appointed by the NPCC's board.

In all cases, Level 2 Appeals Panel members shall have no direct affiliation with the participants in the appeal.

The RSPM shall post the complaint and other relevant materials and provide at least 30 calendar days notice of the meeting of the Level 2 Appeals Panel. In addition to the appellant, any person that is directly and materially affected by the substantive or procedural action or inaction referenced in the complaint shall be heard by the panel. The panel shall not consider any expansion of the scope of the appeal that was not presented in the Level 1 Appeal. The panel may in its decision find for the appellant and remand the issue to the RSC with a statement of the issues and facts in regard to which fair and equitable action was not taken. The panel may find against the appellant with a specific statement of the facts that demonstrate fair and equitable treatment of the appellant and the appellant's objections. The panel may not, however, revise, approve, disapprove, or adopt a reliability standard. The actions of the Level 2 Appeals Panel shall be publicly posted.

In addition to the foregoing, a procedural objection that has not been resolved may be submitted to the NPCC Board for consideration at the time the board decides whether to adopt a particular reliability standard. The objection must be in writing, signed by an officer of the objecting entity, and contain a concise statement of the relief requested and a clear demonstration of the facts that justify that relief. The objection must be filed no later than 30 calendar days after the announcement of the vote on the standard in question.

APPENDIX A

Information in a Regional Standard Authorization Request (RSAR)

The tables below identify information to be submitted in a Regional Standard Authorization Request to the NPCC Regional Standards Process Manager, NPCCstandard@npcc.org. The NPCC Regional Standards Process Manager shall be responsible for implementing and maintaining this form as needed to support the information requirements of the standards process.

Regional Standard Authorization Request Form

Title of Proposed Standard:
Request Date:

RSAR Requester Information

<i>Name:</i>	RSAR Type (Check box for one of these selections.)	
Company:	<input type="checkbox"/>	New Standard
Telephone:	<input type="checkbox"/>	Revision to Existing Standard
Fax:	<input type="checkbox"/>	Withdrawal of Existing Standard
Email:	<input type="checkbox"/>	Urgent Action

Purpose (Describe the purpose of the proposed standard – what the standard will achieve in support of reliability.)
Industry Need (Provide a detailed statement justifying the need for the proposed standard, along with any supporting documentation.)
Brief Description (Describe the proposed standard in sufficient detail to clearly define the scope in a manner that can be easily understood by others.)

Reliability Functions

The Standard will Apply to the Following Functions (Check all applicable boxes.)		
<input type="checkbox"/>	Reliability Coordinator	The entity that is the highest level of authority who is responsible for the reliable operation of the Bulk Electric System, has the Wide Area view of the Bulk Electric System, and has the operating tools, processes and procedures, including the authority to prevent or mitigate emergency operating situations in both next-day analysis and real-time operations. The Reliability Coordinator has the purview that is broad enough to enable the calculation of Interconnection Reliability Operating Limits, which may be based on the operating parameters of transmission systems beyond any Transmission Operator’s vision.
<input type="checkbox"/>	Balancing Authority	The responsible entity that integrates resource plans ahead of time, maintains load-interchange-generation balance within a Balancing Authority Area, and supports Interconnection frequency in real time.
<input type="checkbox"/>	Interchange Authority	Authorizes valid and balanced Interchange Schedules.
<input type="checkbox"/>	Planning Authority	The responsible entity that coordinates and integrates transmission facility and service plans, resource plans, and protection systems.
<input type="checkbox"/>	Transmission Service Provider	The entity that administers the transmission tariff and provides Transmission Service to Transmission Customers under applicable transmission service agreements.
<input type="checkbox"/>	Transmission Owner	The entity that owns and maintains transmission facilities.
<input type="checkbox"/>	Transmission Operator	The entity responsible for the reliability of its “local” transmission system, and that operates or directs the operations of the transmission facilities.

<input type="checkbox"/>	Transmission Planner	The entity that develops a long-term (generally one year and beyond) plan for the reliability (adequacy) of the interconnected bulk electric transmission systems within its portion of the Planning Authority Area.
<input type="checkbox"/>	Resource Planner	The entity that develops a long-term (generally one year and beyond) plan for the resource adequacy of specific loads (customer demand and energy requirements) within a Planning Authority Area.
<input type="checkbox"/>	Generator Operator	The entity that operates generating unit(s) and performs the functions of supplying energy and Interconnected Operations Services.
<input type="checkbox"/>	Generator Owner	Entity that owns and maintains generating units.
<input type="checkbox"/>	Purchasing-Selling Entity	The entity that purchases or sells, and takes title to, energy, capacity, and Interconnected Operations Services. Purchasing-Selling Entities may be affiliated or unaffiliated merchants and may or may not own generating facilities.
<input type="checkbox"/>	Distribution Provider	Provides and operates the “wires” between the transmission system and the customer.
<input type="checkbox"/>	Load-Serving Entity	Secures energy and transmission service (and related Interconnected Operations Services) to serve the electrical demand and energy requirements of its end-use customers.

Reliability and Market Interface Principles

Applicable Reliability Principles <i>(Check all boxes that apply.)</i>	
<input type="checkbox"/>	1. Interconnected bulk power systems shall be planned and operated in a coordinated manner to perform reliably under normal and abnormal conditions as defined in the NERC Standards.
<input type="checkbox"/>	2. The frequency and voltage of interconnected bulk power systems shall be controlled within defined limits through the balancing of real and reactive power supply and demand.
<input type="checkbox"/>	3. Information necessary for the planning and operation of interconnected bulk power systems shall be made available to those entities responsible for planning and operating the systems reliably.
<input type="checkbox"/>	4. Plans for emergency operation and system restoration of interconnected bulk power systems shall be developed, coordinated, maintained, and implemented.
<input type="checkbox"/>	5. Facilities for communication, monitoring, and control shall be provided, used, and maintained for the reliability of interconnected bulk power systems.
<input type="checkbox"/>	6. Personnel responsible for planning and operating interconnected bulk power systems shall be trained, qualified, and have the responsibility and authority to implement actions.
<input type="checkbox"/>	7. The security of the interconnected bulk power systems shall be assessed, monitored, and maintained on a wide-area basis.

<p>Does the proposed Standard comply with all of the following Market Interface Principles? <i>(Select 'yes' or 'no' from the drop-down box.)</i></p>
<p>Recognizing that reliability is an Common Attribute of a robust North American economy:</p>
<p>1. A reliability standard shall not give any market participant an unfair competitive advantage. Yes</p>
<p>2. A reliability standard shall neither mandate nor prohibit any specific market structure. Yes</p>
<p>3. A reliability standard shall not preclude market solutions to achieving compliance with that standard. Yes</p>
<p>4. A reliability standard shall not require the public disclosure of commercially sensitive information. All market participants shall have equal opportunity to access commercially non-sensitive information that is required for compliance with reliability standards. Yes</p>

<p>Detailed Description (Provide enough detail so that an independent entity familiar with the industry could draft a standard based on this description.)</p>

Northeast Power Coordinating Council, Inc.

Exhibit D – Compliance Monitoring and Enforcement Program

1.0 Regional Compliance Monitoring and Enforcement Program

1.1 Obligations of NPCC

NPCC will implement the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure (which for purposes of this section 1.0 shall not include Attachment 2, Hearing Procedures), to monitor and enforce compliance with Reliability Standards by the owners, operators, and users within the U.S. portion of NPCC’s geographic or electrical boundaries, and such other scope, set forth on **Exhibit A** of this Agreement, subject to any deviations from the NERC Compliance Monitoring and Enforcement Program described in Section 1.2 below (the “Compliance Program”).

1.2 Deviations from the NERC Compliance Monitoring and Enforcement Program

Compliance monitoring and enforcement programs will be implemented within the Canadian portion of NPCC’s geographic area, consistent with individual Canadian Provincial Memoranda of Understanding (MOU) or Agreements and Canadian laws. All executed MOU’s and Agreements will be provided to NERC as allowable under Canadian law.

2.0 REGIONAL HEARING OF COMPLIANCE MATTERS

NPCC shall establish and maintain a hearing body with authority to render decisions in compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan. The NPCC Compliance Committee, reporting to the NPCC Board, will be responsible for impaneling a Hearing Body, when required. The Hearing Body will consist of five voting members of the NPCC Compliance Committee plus two alternates and business will always be conducted by five voting members as described in the *NPCC Hearing Procedure* (each member of the Hearing Body will be from a different voting sector). An independent Hearing Officer, who is not a member of the Compliance Committee, the NPCC Board, or NPCC Staff, will conduct the hearing. Committee members who represent the Registered Entity involved in the Hearing cannot participate on the Hearing Body. The Hearing Body will utilize a simple majority vote to resolve issues. This voting rule, along with the structure of the Hearing Body, fully supports the requirement that no two stakeholder sectors may control, and no single stakeholder sector may veto, a matter before the Hearing Body.

NPCC shall conduct all compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, proposed Mitigation Plan, or a proposed Remedial Action Directive, in accordance with Attachment 2, Hearing Procedures, to the NERC Compliance Monitoring and Enforcement Program, subject to the following deviations, if any:
None

3.0 OTHER DECISION-MAKING BODIES

NPCC Compliance Staff will be the sole decision making body to review and make final determinations on compliance submittals from Registered Entities related to Self-Certification; Self-Reporting; Exception Reporting; and Periodic Data Submittals. NPCC Compliance Staff will initially review all submittals received to assure that the information forwarded is accurate and complete. This process will be conducted by the staff members and may require contact via e-mail or phone to confirm information. If after, initially receiving a compliance submittal, the Compliance Staff identifies an instance of non-compliance, a Notice of Possible Violation (NOPV), without penalty, is issued to the registered entity and NERC while the Compliance Staff continues its more detailed and comprehensive review of the submittal. It is during this review that the Compliance Staff confirms the violation, calculates an appropriate penalty or sanction and issues a Notice of Confirmed Violation (NOCV).

Exhibit E — Funding

1. Scope of activities funded through the ERO funding mechanism

NPCC shall include in its annual budget submission to NERC amounts for costs it will incur in performing its delegated functions and related activities as described in Sections 5, 6 and 7 of the Agreement. These activities shall include:

- Reliability Standard Development
- Compliance Monitoring and Enforcement
- Organization Registration and Certification
- Reliability Assessment and Performance Analysis (including necessary data gathering activities)
- Event Analysis and Reliability Improvement
- Training and Education
- Situation Awareness
- Infrastructure Security

2. Preparation of Annual Business Plan and Budget

(a) NERC and NPCC in conjunction with the other Regional Entities shall collaboratively develop an annual schedule for the development, submission, review and approval of NPCC's business plan and budget. The annual schedule for the preparation of business plans and budgets shall require NPCC (i) to submit to NERC draft(s) of NPCC's proposed business plan and budget and other preliminary documents and information, and (ii) to submit a final proposed business plan and budget that has been approved by NPCC Board of Directors to NERC by July 1 or such other agreed date as provides sufficient time for NERC's review, approval and submission of NPCC's business plan and budget to the Commission 130 days in advance of the beginning of each fiscal year. The NPCC business plan and budget submission shall include supporting materials, including NPCC's complete business plan and organization chart, explaining the proposed collection of all assessments, dues, fees and charges, and the proposed expenditure of the funds to be collected in sufficient detail to justify the requested budgeted expenditures and assessments. NPCC's business plan and budget and proposed assessments shall provide for reasonable reserve mechanisms for unforeseen and extraordinary expenses and other contingencies, consistent with generally accepted accounting principles.

(b) NERC shall review and approve NPCC's proposed business plan and budget and proposed assessments for performing the delegated functions and related activities described in Sections 5, 6 and 7 of this Agreement and listed above in Section 1 of this **Exhibit E**, or shall direct NPCC to make such revisions as NERC deems appropriate prior to approval. NERC shall submit NPCC's approved business plan and budget and proposed assessments to the Commission for approval as part of NERC's overall business plan and budget submission, in accordance with the ERO Regulations.

3. Allocation of Costs

Assessments to fund the costs of NPCC delegated functions and related activities pursuant to the Agreement shall be allocated among all load-serving entities on the basis of Net Energy for Load, unless a different method(s) of allocating and calculating such assessments has been submitted to and approved by NERC and the Commission in accordance with Section 9(b) of the Agreement. NPCC shall submit to NERC annually at the same time it submits its budget request a list of the load-serving entities or designees within its geographic boundaries that shall be responsible for paying NPCC's assessment and the load-serving entities' proportionate Net Energy for Load, and such other data and information as is necessary to allocate and calculate the allocation of NPCC's assessment to the load-serving entities or designees under the method(s) of allocation and calculation that will be used.

4. Collection of Funding

(a) NERC shall submit invoices to the load-serving entities or designees identified by NPCC covering the NERC and NPCC assessments approved for collection.

(b) NERC shall pursue any non-payments of assessment amounts and shall request assistance from ERO Governmental Authorities as necessary to secure collection. To the extent reasonably practicable, NPCC shall assist NERC in pursuing and collecting any non-payments. Notwithstanding the foregoing, NPCC is not responsible and does not assume any liability for recovering non-payments or underpayments of assessment amounts. NERC shall retain sole responsibility for recovering non-payments or underpayments of assessment amounts. NERC shall add the amount of any non-payments by end-users or designees within NPCC region, that are reasonably determined to be uncollectible, to NERC's assessments for a subsequent year with the amount of such non-payments to be allocated to end-users within NPCC region.

(c) Upon approval by ERO Governmental Authorities of NPCC annual assessment to fund the costs of its delegated functions and related activities, NERC shall pay NPCC's annual assessment to NPCC in four equal quarterly payments on January 15, April 15, July 15 and October 15 of the budget year.

5. Application of Penalties

Except as otherwise approved by the Commission, all penalty monies received by NPCC other than penalty monies received from an operational function or division or affiliated entity of NPCC shall be applied as a general offset to NPCC budget requirements for U.S.-related activities under this Agreement for the subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity. Except as otherwise approved by the Commission, any penalty monies received from an operational function or division or affiliated entity of NPCC shall be transmitted to or retained by NERC and shall be used by NERC as a general offset to NERC's budget for its activities as the ERO under the Act for the following year.

6. Budget and Funding for NPCC's Non-Statutory Activities

In addition to its delegated functions and related activities, as specified in Sections 5, 6 and 7 of the Agreement and in Section 1 of this **Exhibit E** (such delegated functions and activities referred to in this Section 6 as "statutory activities"), NPCC's Criteria Services division performs the following other functions and activities (such other functions and activities being referred to in this Section 5 as "non-statutory activities"):

NPCC List of Criteria Services Division Functions (Non-Statutory Activities)

1. Regionally-specific Criteria
 - NPCC develops and maintains regionally-specific more stringent criteria
 - NPCC develops and maintains criteria establishing resource adequacy requirements within the Region
2. Criteria Compliance Program
 - NPCC monitors and assesses compliance with its more stringent regional criteria
 - NPCC conducts a Reliability Compliance and Enforcement Program (RCEP) utilizing non-monetary sanctions

NPCC shall employ the following methods and procedures to (i) keep its funding mechanisms for its regional entity division (statutory activities) separate from its funding mechanisms for its criteria services division (non-statutory activities), and (ii) record the costs it incurs in the performance of its non-statutory functions separately from the costs it incurs in the performance of its statutory functions:

1. Funding of NPCC Criteria Services Division (non-statutory activities).- A separate membership based funding mechanism is utilized for non-statutory activities.
2. NPCC procedures for separating funding and expenditures for regional entity division (statutory activities) and criteria services division (non-statutory activities)

NPCC utilizes the NERC System of Accounts (NSOA) to provide consistency for account codes, divisional separation codes and activity codes. In August of 2007, NPCC CBRE (which prior to the merger performed statutory activities) merged into and with Northeast Power Coordinating Council, Inc. (referred to as NPCC) (which prior to the merger performed non-statutory activities) with the merged corporation having divisional separation for Regional Entity and Criteria Services. As recommended by NERC, NPCC uses the not-for-profit MIP Fund Accounting program by Sage Software to accurately account for income, time and labor. Effective January 1, 2008, with corporate restructuring of NPCC completed in later 2007, 2008 actual program costs are being charged to appropriate program areas.

NPCC does not conduct resource or transmission planning, is not an Independent System Operator (ISO), nor does it perform the functions of a Reliability Coordinator (RC). As such, while at this time, there is a breakout for Criteria related activities, all functions performed by

NPCC are in the furtherance of NERC’s statutory mission and reliability of the international bulk power system in Northeastern North America.

Methodology

NPCC’s revenue and expenditure classification methodology identifies appropriate methods of accounting for income, time and costs to ensure that U.S. Federal/statutory and Canadian provincial and/or governmental authorities’ agreed upon revenue and expenses are accounted for separately from NPCC’s regionally-specific Criteria development and Criteria compliance (non-statutory) income, time and expense.

Division Codes

There are two division codes that are used by NPCC in accounting for revenues and expenses. The codes are as follows:

Division ID	Division Name
RE	Regional Entity – U.S. Statutory and Canadian Regulatory and/or Governmental Authority authorized
CSD	Criteria Services - Non-Statutory

The two division codes allow NPCC to separate Regional Entity statutory activity revenues and expenses from Criteria Services non-statutory activity revenues and expenses. These categories were developed to ensure that non-statutory related revenues and expenses are segregated and accounted for separately from statutory-related revenues and expenses.

Program Codes

As required by NERC, NPCC adopted a financial accounting system consistent with NERC’s functional categories. At NPCC, functional categories are referred to as Program Codes.

There are twelve program codes that are used by NPCC in accounting for expenses. The codes are as follows:

Program ID	Program Name
300	Reliability Standards
400	Compliance Enforcement and Organization Registration and Certification
800	Reliability Assessment and Performance Analysis
700	Reliability Readiness Evaluation and Improvement

	900	Training and Education
	1000	Situational Awareness and Infrastructure Security
	ADMIN	General Administration
	FINANCE	Accounting and Finance
	HR	Human Resources
	IT	Information Technology
	LEGAL	Legal and Regulatory
	MEMBERS	Members Forum

Program codes are used to further delineate expenses into functional groupings that are assigned to program heads. NPCC staff utilize their assigned program codes (the program where they reside for payroll purposes) when coding expenses, unless otherwise authorized by management.

When time is spent in support of both statutory activities and non-statutory activities (applicable to a limited number of employees in the Administrative Services functions of General Administration, Accounting and Finance, Human resources, Information Technology, Legal and Regulatory and Members Forms), staff members develop accurate timesheet allocations between division codes.

Divisional separation with regard to statutory activities (Regional Entity division) and non-statutory activities (Criteria Services division) is reflected in the NPCC balance sheet and general ledger through the MIP Fund Accounting software programs.

NPCC shall provide its budget for such non-statutory activities to NERC at the same time that NPCC submits its annual budget request to NERC pursuant to Section 1. NPCC's budget for non-statutory activities that is provided to NERC shall contain a detailed list of NPCC's non-statutory activities and a description of the funding sources for the non-statutory activities. NPCC agrees that no costs of non-statutory activities are to be included in the calculation of NPCC's charges for its activities pursuant to this Agreement.

7. Amended or Supplemental Business Plans and Budgets

During the course of the fiscal year, if NPCC determines it does not or will not have sufficient funds to carry out its delegated functions and related activities, NPCC shall submit to NERC one or more proposed amended or supplemental business plans and budgets and requests for approval of supplemental assessments, reflecting costs, cost increases or funding shortfalls not provided for in NPCC's approved business plan and budget for the fiscal year.

NERC shall review and approve the proposed amended or supplemental business plan and budget and proposed supplemental assessment, or shall direct NPCC to make such revisions as NERC deems appropriate prior to approval. NERC shall submit NPCC's approved amended or supplemental business plan and budget and proposed supplemental assessment to the Commission for approval.

8. NERC Review of NPCC Financial Statements

NERC shall conduct reviews of the quarterly and annual financial statements submitted by NPCC pursuant to Section 9(h) and (i) of the Agreement. NPCC shall provide supporting documentation for the quarterly and annual financial statements as reasonably requested by NERC based on its reviews.

ATTACHMENT 4B

NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION

REVISED DELEGATION AGREEMENT

WITH

NORTHEAST POWER COORDINATING COUNCIL

REDLINED AGAINST

REVISED PRO FORMA DELEGATION AGREEMENT

**AMENDED AND RESTATED DELEGATION AGREEMENT BETWEEN
NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION
AND ~~REGIONAL ENTITY~~NORTHEAST POWER COORDINATING COUNCIL,
INC.**

AMENDED AND RESTATED DELEGATION AGREEMENT (“Agreement”) made as of ~~January 1, 2011~~, between the North American Electric Reliability Corporation (“NERC”), an organization certified by the Federal Energy Regulatory Commission (“Commission”) pursuant to Section 215(c) of the Federal Power Act to establish and enforce Reliability Standards for the Bulk-Power System, and ~~REGIONAL ENTITY~~Northeast Power Coordinating Council, Inc. (“NPCC”), an organization established to develop and enforce Reliability Standards within the geographic boundaries identified on **Exhibit A** to this Agreement, and for other purposes. NERC and ~~REGIONAL ENTITY~~NPCC may be individually referred to herein as “Party” or collectively as “Parties.”

WITNESSETH

WHEREAS, Subtitle A of the Electricity Modernization Act of 2005 added Section 215 to the Federal Power Act (16 U.S.C. § 824n) (hereafter “the Act”), which, among other things, provides for the establishment of an electric reliability organization (“ERO”) to develop and enforce Reliability Standards applicable to all owners, operators, and users of the Bulk-Power System;

WHEREAS, the Commission has adopted regulations for the implementation of the Act, which are set forth at Chapter I, Title 18, Code of Federal Regulations, Part 39 (the “ERO Regulations”);

WHEREAS, the Commission has certified NERC as the ERO that will, in accordance with the Act, establish and enforce Reliability Standards for the Bulk-Power System, subject to certain delegation provisions described below;

WHEREAS, the Act recognizes the international interdependency of electric reliability within North America and envisions the ERO and such applicable Regional Entities as international organizations;

WHEREAS, the Act and Section 39.8 of the ERO Regulations provide for the delegation by the ERO of authority to propose and enforce Reliability Standards to regional entities (“Regional Entities”) such as ~~REGIONAL ENTITY~~NPCC provided that:

(A) The Regional Entity is governed by —

- (i) an independent board;
- (ii) a balanced stakeholder board; or
- (iii) a combination independent and balanced stakeholder board.

(B) The Regional Entity otherwise satisfies the provisions of Section 215(c)(1) and (2) of the Act; and

(C) The agreement promotes effective and efficient administration of Bulk-Power System reliability;

WHEREAS, certain Regional Entities are organized on an Interconnection-wide basis and are therefore entitled to the presumption set forth in the Act that: “[t]he ERO and the Commission shall rebuttably presume that a proposal for delegation to a Regional Entity organized on an Interconnection-wide basis promotes effective and efficient administration of bulk power system reliability and should be approved”;

WHEREAS, the Act further provides that the ERO shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Reliability Standard or modification to a Reliability Standard to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest;

WHEREAS, ~~REGIONAL ENTITY~~NPCC is not organized on an Interconnection-wide basis and therefore ~~is~~is not entitled to the rebuttable presumptions accorded such an entity;

WHEREAS, NERC will work through ~~REGIONAL ENTITY~~NPCC to carry out certain of its activities in furtherance of its responsibilities as the ERO under the Act;

WHEREAS, NERC has concluded that ~~[REGIONAL ENTITY]~~NPCC meets all requirements of the Act, the ERO Regulations, and the NERC Rules of Procedure as approved by the Commission (“NERC Rules of Procedure”) necessary to qualify for delegation; and

WHEREAS, NERC and ~~[REGIONAL ENTITY]~~NPCC having operated under a predecessor agreement to this Agreement, have negotiated this amended and restated Agreement so as to incorporate the benefits of their mutual experience and lessons learned while operating under the predecessor agreement and thereby provide for the more efficient and effective execution of their respective responsibilities in a transparent manner that is pursuant to Section 215 of the Act and the ERO Regulations;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, NERC and ~~[REGIONAL ENTITY]~~NPCC agree as follows:

1. Definitions. The capitalized terms used in this Agreement shall be defined as set forth in the Act, the ERO Regulations, the NERC Rules of Procedure, or the NERC Glossary of Terms Used in Reliability Standards, or, if not so defined, shall be defined as set forth in this Section 1 or elsewhere in the text of this Agreement:

(a) Breach means (i) the failure of a Party to perform or observe any material term, condition or covenant of the Agreement or (ii) a representation in Section 2 of the Agreement shall have become materially untrue.

(b) Cross-Border Regional Entity means a Regional Entity that encompasses a part of the United States and a part of Canada or Mexico.

(c) Delegated Authority means the authority delegated by NERC to ~~[REGIONAL ENTITY]~~NPCC to propose and enforce Reliability Standards pursuant to the Act and to undertake related activities set forth in this Agreement in furtherance of these delegated functions in accordance with the Act, the ERO Regulations and this Agreement.

2. Representations.

(a) For purposes of its Delegated Authority, ~~[REGIONAL ENTITY]~~NPCC hereby represents and warrants to NERC that:

(i) ~~[REGIONAL ENTITY]~~NPCC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder. ~~[REGIONAL ENTITY]~~NPCC is governed in accordance with its bylaws by ~~[select appropriate: an independent board/a balanced stakeholder board/~~a combination independent and balanced stakeholder board~~]~~. Pursuant to these bylaws, no two industry sectors can control any ~~[REGIONAL ENTITY]~~NPCC decision and no single industry sector can veto any ~~[REGIONAL ENTITY]~~NPCC decision. The relevant portions of such bylaws are attached hereto in **Exhibit B**¹, and as so attached are in full force and effect. No other such corporate governance documents are binding upon ~~[REGIONAL ENTITY]~~NPCC.

(ii) As set forth in **Exhibit C** hereto², ~~[REGIONAL ENTITY]~~NPCC has developed a standards development procedure, which provides the process that ~~[REGIONAL ENTITY]~~NPCC may use to develop Regional Reliability Standards [and Regional Variances, if the regional entity is organized on an Interconnection-wide basis] that are proposed to NERC for adoption.

(iii) As set forth in **Exhibit D** hereto, ~~[REGIONAL ENTITY]~~NPCC has adopted the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure, which provides for the enforcement of Reliability Standards within ~~[REGIONAL ENTITY]~~'sNPCC geographic boundaries as shown on **Exhibit A**.

(b) NERC hereby represents and warrants to ~~[REGIONAL ENTITY]~~NPCC that:

(i) NERC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder; and

¹ The **Exhibit B** from ~~[REGIONAL ENTITY]~~NPCC shall meet the requirements contained in **Exhibit B** to this Agreement.

² The **Exhibit C** from ~~[REGIONAL ENTITY]~~NPCC shall meet the requirements contained in **Exhibit C** to this Agreement.

(ii) NERC has been certified as the ERO by the Commission pursuant to the Act.

3. Covenants.

(a) During the term of this Agreement, ~~{REGIONAL ENTITY}~~NPCC shall maintain and preserve its qualifications for delegation pursuant to the Act and shall not amend its Regional Entity Rules without NERC's approval, which shall not be unreasonably withheld or delayed and which shall, in the case of a Regional Entity organized on an Interconnection-wide basis, be governed by the presumptions provided for in Section 215(d)(2) and (e)(4)(C) of the Act, and be subject to any required Commission approval.

(b) During the term of this Agreement, NERC shall maintain its qualification and status as the ERO pursuant to the Act and, subject to the provisions of Sections 17 and 18 of this Agreement, NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations or programs of ~~{REGIONAL ENTITY}~~NPCC under this Agreement without first obtaining the consent of ~~{REGIONAL ENTITY}~~NPCC, which consent shall not be unreasonably withheld or delayed.

(c) During the term of this Agreement, NERC and ~~{REGIONAL ENTITY}~~NPCC shall adhere to and require that all participants in their respective activities under this Agreement follow and comply with the NERC Antitrust Compliance Guidelines.

4. Delegation of Authority.

(a) Based upon the representations, warranties and covenants of ~~{REGIONAL ENTITY}~~NPCC in Sections 2 and 3 above, the corporate governance documents set forth in **Exhibit B**, the standards development process set forth in **Exhibit C**, and the compliance monitoring and enforcement program set forth in **Exhibit D**, NERC hereby delegates authority, pursuant to Section 215(e)(4) of the Act, to ~~{REGIONAL ENTITY}~~NPCC for the purpose of proposing Reliability Standards to NERC, as set forth in Section 5 of this Agreement, and enforcing Reliability Standards, as set forth in Section 6 of this Agreement, within the geographic boundaries and such other scope set forth on **Exhibit A**, *provided*, that ~~{REGIONAL ENTITY}~~NPCC shall not monitor and enforce compliance with Reliability

Standards for [REGIONAL ENTITY]NPCC or an affiliated entity with respect to reliability functions for which [REGIONAL ENTITY]NPCC or an affiliate is a Registered Entity. Any exclusions from this delegation of authority to [REGIONAL ENTITY]NPCC within, or additions to this delegation of authority to [REGIONAL ENTITY]NPCC beyond, the geographic boundaries set forth on **Exhibit A** are stated on **Exhibit A**.

(b) In circumstances where [REGIONAL ENTITY]NPCC or an affiliated entity is a Registered Entity, [REGIONAL ENTITY]NPCC shall enter into an agreement with another Regional Entity or NERC for the other Regional Entity or NERC to monitor and enforce [REGIONAL ENTITY]'sNPCC or affiliate's compliance with Reliability Standards. Such agreements are subject to NERC and Commission approval.

(c) Nothing in this Agreement shall prohibit [REGIONAL ENTITY]NPCC from entering into an arrangement between one or more other Regional Entities to perform compliance monitoring and enforcement activities outside of its region, on behalf of NERC and/or other Regional Entities, for Registered Entities that have registered functions monitored by more than one Regional Entity, subject to approval by NERC.

(d) For Cross-Border Regional Entities, the authority delegated by this Agreement shall extend only to the portion of the region identified on **Exhibit A** that is within the United States. Any delegation of authority by ERO Governmental Authorities in Canada or Mexico shall be governed by a separate agreement and is outside the scope of this Agreement; provided, however, that both [REGIONAL ENTITY]NPCC and NERC shall endeavor to ensure that this Agreement and such separate agreements are compatible.

(e) As a condition to this delegation of authority and subject to the provisions of Section 17 of this Agreement, [REGIONAL ENTITY]NPCC shall comply with the applicable provisions of NERC's Certificate of Incorporation, Bylaws, Rules of Procedure, and Reliability Standards, as from time to time adopted, approved, or amended.

5. Development and Proposal of Reliability Standards.

(a) In connection with its Delegated Authority, [REGIONAL ENTITY]NPCC shall be entitled to:

(i) propose Reliability Standards, Regional Variances, or modifications thereof to NERC, which shall be considered by NERC through an open and inclusive process

for proposing and adopting Reliability Standards that affords ~~REGIONAL ENTITY~~NPCC reasonable notice and opportunity to be heard; and

(ii) develop Regional Reliability Standards [and Regional Variances, if Regional Entity is organized on an Interconnection-wide basis] through ~~REGIONAL ENTITY~~'sNPCC process as set forth in **Exhibit C**. Proposals approved through ~~REGIONAL ENTITY~~'sNPCC process shall be reviewed by the NERC Board after NERC provides notice and an opportunity for interested persons to comment. In the case of a proposal from a Regional Entity organized on an Interconnection-wide basis, comments shall be limited to the factors identified in NERC Rule of Procedure 312.3 as it may be amended from time to time. The NERC Board shall promptly thereafter consider such proposed Regional Reliability Standard or Regional Variance, applying the rebuttable presumption described in subsection 5(b) of this Agreement if the proposed Regional Reliability Standard or Regional Variance is from a Regional Entity organized on an Interconnection-wide basis, and either approve the proposed Regional Reliability Standard or Regional Variance and submit it to the Commission for approval, or disapprove it in writing setting forth its reasons. ~~REGIONAL ENTITY~~NPCC may appeal any disapproval of a proposed Regional Reliability Standard or Regional Variance to the Commission.

(b) Pursuant to Section 215(d)(3) of the Act, NERC shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Regional Reliability Standard or Regional Variance or modification thereof to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. Any person challenging such proposal from the Regional Entity organized on an Interconnection-wide basis shall have the burden of proof. NERC shall not find that this presumption has been rebutted except based upon substantial evidence that has been disclosed to, and been subject to comment by, the Interconnection-wide Regional Entity during NERC's review of the proposal.

6. Enforcement of Compliance with Reliability Standards.

(a) In connection with its delegated authority pursuant to this Agreement, ~~REGIONAL ENTITY~~NPCC shall enforce Reliability Standards (including Regional Reliability Standards and Regional Variances) within the geographic boundaries set forth, or as

otherwise specified, in **Exhibit A** through the compliance monitoring and enforcement program set forth in **Exhibit D**. NERC and ~~{REGIONAL ENTITY}~~NPCC agree that this compliance monitoring and enforcement program meets all applicable requirements of the Act, Order No. 672 of the Commission, and the ERO Regulations, including, *inter alia*, the requirement for an audit program pursuant to Section 39.7(a) of the ERO Regulations, the assessment of penalties pursuant to Section 39.7(c) through 39.7(g) of the ERO Regulations and the requirements for due process. ~~{REGIONAL ENTITY}~~NPCC may not change its compliance monitoring and enforcement program set forth in **Exhibit D** absent NERC's approval, which shall not be unreasonably withheld or delayed, and the approval of the Commission. Subject to the rights and limitations specified in Sections 17 and 18 of this Agreement, ~~{REGIONAL ENTITY}~~NPCC agrees to comply with the NERC Rules of Procedure, with any directives issued pursuant to Section 8(c) of this Agreement, and with any guidance and directions issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, in implementing this program.

(b) ~~{REGIONAL ENTITY}~~NPCC shall report promptly to NERC any- Possible Violation, Alleged Violation, or Confirmed Violation of a Reliability Standard, and its eventual disposition by ~~{REGIONAL ENTITY}~~NPCC. Such report shall include the owner's, operator's, or user's name, which Reliability Standard or Reliability Standards were the subject of the Possible Violation, Alleged Violation, or Confirmed Violation, when the Possible Violation, Alleged Violation, or Confirmed Violation occurred, other pertinent facts including circumstances surrounding the Possible Violation, Alleged Violation, or Confirmed Violation with any known risk to the Bulk-Power System, when the Possible Violation, Alleged Violation, or Confirmed Violation was or will be mitigated, the name of a person knowledgeable about the Possible Violation, Alleged Violation, or Confirmed Violation to serve as a point of contact with the Commission, and any other information required by NERC compliance program procedures. NERC shall promptly forward such report to the Commission. NERC and ~~{REGIONAL ENTITY}~~NPCC shall cooperate in filing such periodic summary reports as the Commission shall from time to time direct on Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards and summary analyses of such Possible Violations, Alleged Violations, and Confirmed Violations.

(c) Each Possible Violation, Alleged Violation, or Confirmed Violation shall be treated as nonpublic unless the matter is filed with the Commission as a Notice of Penalty, or, if disclosure is required, dismissed. The disposition of each Possible Violation, Alleged Violation, or Confirmed Violation that relates to a Cybersecurity Incident or that would jeopardize the security of the Bulk-Power System if publicly disclosed shall remain nonpublic unless the Commission directs otherwise.

(d) All dispositions by ~~REGIONAL ENTITY~~NPCC of Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards shall be reported to NERC for review and, in the case of Confirmed Violations, penalties or sanctions, and settlements, for approval. Following approval of a disposition by NERC, NERC shall file the disposition with the Commission, if required by, and in accordance with, Section 215(e) of the Act and Section 39.7 of the ERO Regulations. NERC shall review ~~REGIONAL ENTITY~~'sNPCC dispositions based on the following criteria:

(i) whether the disposition is supported by a sufficient record compiled by ~~REGIONAL ENTITY~~NPCC in accordance with the NERC Rules of Procedure, NERC directives and Commission requirements, taking into account the nature of the Possible Violation, Alleged Violation, or Confirmed Violation,

(ii) whether the disposition is consistent with any applicable directives issued pursuant to Section 8(c) of this Agreement, any applicable directions or guidance issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, or other applicable NERC guidance, concerning the Reliability Standards to which the Possible Violation, Alleged Violation, or Confirmed Violation relates,

(iii) if the disposition is a Confirmed Violation or settlement, whether it provides for a penalty or sanction, or a determination of no penalty or sanction, determined in accordance with the NERC Sanction Guidelines, Appendix 4B to the NERC Rules of Procedure, and

(iv) whether the disposition is reasonably consistent with other dispositions by ~~REGIONAL ENTITY~~NPCC and by other Regional Entities of Possible Violations, Alleged Violations, and Confirmed Violations involving the same or similar facts and circumstances.

NERC may reject any disposition, with an explanation of why NERC believes the disposition does not meet the above criteria. ~~{REGIONAL ENTITY}~~NPCC may submit a disposition requiring NERC approval that has been rejected by NERC, or a revised disposition following a rejection, directly to the NERC Board Compliance Committee for approval without revising the disposition to address all the grounds on which NERC originally rejected the disposition. The final approval of ~~{REGIONAL ENTITY}~~'sNPCC disposition of a Possible Violation, Alleged Violation, or Confirmed Violation shall be made by the NERC Board Compliance Committee, provided, that the NERC Board or NERC Board Compliance Committee may, by appropriate resolution, delegate authority for final approval of dispositions of specified categories of Possible Violations, Alleged Violations, or Confirmed Violations to the NERC President.

(e) All appeals of penalties imposed by ~~{REGIONAL ENTITY}~~NPCC as a result of a decision by ~~{REGIONAL ENTITY}~~'sNPCC Hearing Body shall be filed with, heard by and disposed of by, NERC in accordance with the NERC Rules of Procedure.

(f) ~~{REGIONAL ENTITY}~~NPCC shall maintain the capability to conduct investigations of Possible Violations and Alleged Violations of Reliability Standards and to conduct such investigations in a confidential manner.

(g) ~~{REGIONAL ENTITY}~~NPCC shall maintain a program of proactive monitoring and enforcement of compliance with Reliability Standards, in accordance with the NERC Compliance Monitoring and Enforcement Program and the annual NERC Compliance Monitoring and Enforcement Program Implementation Plan.

(h) As part of its compliance monitoring and enforcement program, ~~{REGIONAL ENTITY}~~NPCC shall maintain a conflict of interest policy that assures the integrity and independence of such program, including the integrity and independence of the persons or decision-making bodies making final determinations in compliance enforcement actions under Section 5.0 of the NERC Compliance Monitoring and Enforcement Program. ~~A Regional Entity NPCC~~ may have stakeholders lead or participate in its board compliance committee so long as integrity and independence are assured through reasonable and appropriate recusal procedures.

(i) As often as NERC deems necessary, but no less than every five years, NERC shall review ~~{REGIONAL ENTITY}~~'sNPCC compliance monitoring and enforcement program to determine that: (i) the program meets all applicable legal requirements; (ii) actual practices

reflect the requirements; and (iii) the program administered pursuant to the Delegated Authority promotes consistent interpretations across North America of Reliability Standards and comparable levels of sanctions and penalties for violations of Reliability Standards constituting comparable levels of threat to reliability of the Bulk-Power System.

7. Delegation-Related Activities.

NERC will engage ~~[REGIONAL ENTITY]~~NPCC on its behalf to carry out certain of its activities that are in furtherance of Bulk-Power System reliability and NERC's responsibilities as the ERO under the Act or in support of the Delegated Authority, as specified in the NERC Rules of Procedure and listed on **Exhibit E**. These delegation-related activities shall include, but are not limited to, those described in subsections (a) through (f), each of which shall be considered a statutory activity:

(a) Certification of Bulk-Power System Entities. The NERC Board shall set criteria for certification in accordance with the NERC Rules of Procedure. ~~[REGIONAL ENTITY]~~NPCC shall issue certifications in accordance with the NERC Rules of Procedure.

(b) Registration of owners, operators, and users of the Bulk-Power System as responsible for compliance with requirements of Reliability Standards.

(i) The NERC Board shall develop criteria for registration of owners, operators, and users of the Bulk-Power System as Registered Entities and shall apply the registration criteria to register owners, operators and users of the Bulk-Power System as Registered Entities.

(ii) NERC shall maintain a registration database of Registered Entities, based on data and information provided by ~~[REGIONAL ENTITY]~~NPCC and other Regional Entities. ~~[REGIONAL ENTITY]~~NPCC shall provide timely and accurate information relating to registrations to NERC, on at least a monthly basis, to enable NERC to maintain a registration database that is accurate and up-to-date.

(iii) The NERC Board Compliance Committee shall hear and decide appeals from owners, operators and users of the Bulk-Power System contesting registration, in accordance with the NERC Rules of Procedure. If the NERC Board Compliance Committee upholds the decision to register an owner, operator, or user, NERC shall defend the decision in any subsequent appeal of the decision by the Registered Entity to the Commission.

(c) Reliability Assessment and Performance Analysis. ~~REGIONAL~~

~~ENTITY~~NPCC shall develop assessments of the reliability of the Bulk-Power System, or ensure that data and information are collected, analyzed and provided to NERC in support of the development of reliability assessments, in accordance with the NERC Rules of Procedure.

~~REGIONAL ENTITY~~NPCC shall also develop and maintain, and collect data in support of the development and maintenance of, reliability performance metrics and assessments of risks to the Reliable Operation of the Bulk-Power System, in accordance with the NERC Rules of Procedure and NERC directives. NERC shall develop data-gathering quality control procedures, forms and reporting mechanisms, which shall be used by ~~REGIONAL ENTITY~~NPCC and other Regional Entities in carrying out their responsibilities under this subsection (c).

(d) Event Analysis and Reliability Improvement. ~~REGIONAL ENTITY~~NPCC shall

conduct event analysis pursuant to the NERC Rules of Procedure and applicable governmental regulations. NERC and ~~REGIONAL ENTITY~~NPCC shall coordinate event analysis to support the effective and efficient use of their collective resources, consistency in event analysis, and timely delivery of event analysis reports. In collaboration with NERC, ~~REGIONAL ENTITY~~NPCC shall disseminate to the electric industry lessons learned and other information obtained or resulting from event analysis.

(e) Training and Education. ~~REGIONAL ENTITY~~NPCC may provide training and

education to Registered Entities, as it deems necessary, in support of its performance of delegated functions and related activities under this Agreement. NERC may also provide training and education programs to Registered Entities on topics relating to NERC's responsibilities as the ERO.

(f) Situation Awareness and Infrastructure Security.

(i) ~~REGIONAL ENTITY~~NPCC shall gather and assess situation awareness information provided by Registered Entities pursuant to the NERC Rules of Procedure and applicable governmental regulations, and shall provide other data, information and assistance to NERC in support of NERC's activities in monitoring present conditions, and responding to events, on the Bulk-Power System

(ii) ~~{REGIONAL ENTITY}'s~~NPCC shall collaborate with NERC in its efforts to coordinate electric industry activities to promote critical infrastructure protection of the Bulk-Power System in North America.

8. Oversight of Performance of Delegated Functions and Related Activities.

This Section 8 sets forth processes and procedures which the Parties intend shall be used in NERC's oversight of ~~{REGIONAL ENTITY}'s~~NPCC performance of its Delegated Authority and related activities pursuant to this Agreement. It is the intent of NERC and ~~{REGIONAL ENTITY}'s~~NPCC that matters relating to NERC's oversight of ~~{REGIONAL ENTITY}'s~~NPCC performance of its Delegated Authority and related activities shall be established or resolved by collaboration between NERC and ~~{REGIONAL ENTITY}'s~~NPCC and, where applicable, other Regional Entities, to the maximum extent possible, consistent with the construct that NERC and the Regional Entities are operating together in a collaborative manner to carry out the responsibilities of the ERO under Section 215 of the Act and the ERO Regulations.

(a) (i) NERC shall develop, in collaboration with ~~{REGIONAL ENTITY}'s~~NPCC and other Regional Entities, performance goals, measures and other parameters (including, without limiting the scope of such goals, measures and parameters, financial performance goals, measures and parameters), and performance reports, which shall be used to measure NERC's and ~~{REGIONAL ENTITY}'s~~NPCC performance of their respective functions and related activities. The performance goals, measures and parameters and the form of performance reports shall be approved by the NERC President and shall be made public. ~~{REGIONAL ENTITY}'s~~NPCC shall provide data, information and reports to NERC, in accordance with established schedules, to enable NERC to calculate ~~{REGIONAL ENTITY}'s~~NPCC performance to the agreed-upon goals, measures and parameters.

(ii) NERC shall use the performance goals, measures and parameters and performance reports to evaluate ~~{REGIONAL ENTITY}'s~~NPCC performance of its delegated functions and related activities and to provide advice and direction to ~~{REGIONAL ENTITY}'s~~NPCC on performance improvements. The performance goals, measures and other parameters and the values of such goals, measures and parameters, shall be reviewed by NERC, ~~{REGIONAL ENTITY}'s~~NPCC and the other Regional Entities, revised if appropriate, and made

public, on the same timeline as the annual business planning and budgeting process described in Section 9 of this Agreement.

(iii) At the request of the President of NERC, ~~{REGIONAL ENTITY}NPCC~~ shall be required to develop, submit for NERC approval, and implement action plans to address areas of its performance that are reasonably determined by NERC, based on analysis of ~~{REGIONAL ENTITY}'sNPCC~~ performance against the performance goals, measures and parameters, or performance of specific activities, to be unsatisfactory, *provided*, that prior to requiring ~~{REGIONAL ENTITY}NPCC~~ to adopt and implement an action plan or other remedial action, NERC shall issue a notice to ~~{REGIONAL ENTITY}NPCC~~ of the need and basis for an action plan or other remedial action and provide an opportunity for ~~{REGIONAL ENTITY}NPCC~~ to submit a written response contesting NERC's evaluation of ~~{REGIONAL ENTITY}'sNPCC~~ performance and the need for an action plan. ~~{REGIONAL ENTITY}NPCC~~ may request that the President of NERC reconsider the request, and thereafter may request that the NERC Board review and reconsider the request. NERC and ~~{REGIONAL ENTITY}NPCC~~ shall work collaboratively as needed in the development and implementation of ~~{REGIONAL ENTITY}'sNPCC~~ action plan. A final action plan submitted by ~~{REGIONAL ENTITY}NPCC~~ to NERC shall be made public unless the President of NERC makes a written determination that the action plan or specific portions of the plan should be maintained as non-public.

(b) NERC shall make available to ~~{REGIONAL ENTITY}NPCC~~ standardized training and education programs, which shall be designed taking into account input from ~~{REGIONAL ENTITY}NPCC~~ and other Regional Entities, for ~~{REGIONAL ENTITY}NPCC~~ personnel on topics relating to the delegated functions and related activities.

(c) (i) NERC may issue directives to ~~{REGIONAL ENTITY}NPCC~~ concerning the manner in which ~~{REGIONAL ENTITY}NPCC~~ shall perform its delegated functions and related activities under this Agreement. The NERC Rules of Procedure, or any other ERO Rule requiring approval of the Commission, shall not be considered "directives." NERC shall initiate the development of a directive through a collaborative process with ~~{REGIONAL ENTITY}NPCC~~ and, if applicable, other Regional Entities to which the directive will apply. Any directive developed through the collaborative process shall be approved by, and issued under the signature of, the NERC President.

(ii) If after a period of time that is reasonable under the circumstances, NERC and ~~REGIONAL ENTITY~~NPCC and, if applicable, other Regional Entities are unable to reach agreement on the contents of the directive, NERC may issue the directive with the approval of and under the signature of the NERC President; *provided*, that before the NERC President issues a directive pursuant to this paragraph (ii), ~~REGIONAL ENTITY~~NPCC and, if applicable, other Regional Entities, shall be given a reasonable opportunity to present their positions on, and a suggested alternative version or versions of, the proposed directive to the NERC President.

(iii) Upon issuance of a directive by the NERC President, it shall be binding upon, and shall be complied with by, ~~REGIONAL ENTITY~~NPCC subject to reasonable time periods for adoption, implementation, and funding of any necessary resources. Upon request by ~~REGIONAL ENTITY~~NPCC the NERC Board (or a committee of the Board to which the Board delegates appropriate authority) shall review and shall confirm, revise or revoke any directive that was issued by the NERC President without ~~REGIONAL ENTITY~~'sNPCC agreement, *provided*, that ~~REGIONAL ENTITY~~NPCC shall request such review within thirty (30) days following issuance of the directive by the NERC President unless good cause can be shown for a later request.

(iv) NERC and ~~REGIONAL ENTITY~~NPCC and, if applicable, other Regional Entities, shall collaborate in deciding whether a directive (whether issued pursuant to paragraph (ii) or paragraph (iii)) shall be made public. If no agreement is reached by the date of issuance as to whether the directive shall be made public, the NERC President shall decide whether the directive will be made public, *provided*, that is the intent of the Parties that the NERC President shall apply a presumption that directives should be made public, unless the NERC President makes a written determination stating a specific reason for maintaining a particular directive as non-public.

(d) In addition to the issuance of directives pursuant to subsection (c), the NERC Board (or a Board committee to which the Board has delegated authority) may issue guidance or directions as to the manner in which ~~REGIONAL ENTITY~~NPCC and, if applicable, other Regional Entities, shall perform delegated functions and related activities. The Board or Board committee shall also establish reasonable time periods for the implementation of any such guidance or directions, taking into account the impact on the reliability of the Bulk-Power

System and the need for funding of additional resources. Any such guidance or directions shall be stated in writing and shall be public, unless the Board or Board committee makes a written determination stating a specific reason for maintaining particular guidance or directions as non-public. ~~[REGIONAL ENTITY]~~NPCC either individually or in conjunction with other Regional Entities, may request that the NERC Board or Board committee reconsider or revise the guidance or direction.

(e) NERC shall conduct collaborative reviews with ~~[REGIONAL ENTITY]~~NPCC either individually or in conjunction with one or more other Regional Entities, that provide for the exchange of information on practices, experiences, and lessons learned in the implementation of the delegated functions.

(f) Any audits of ~~[REGIONAL ENTITY]~~NPCC performed by NERC shall be limited to an examination of ~~[REGIONAL ENTITY]'s~~NPCC compliance with this Agreement, NERC's Rules of Procedure, the Compliance Monitoring and Enforcement Program, Commission requirements, and directives that are in effect pursuant to Section 8(c).

9. Funding. ~~[REGIONAL ENTITY]~~NPCC and NERC shall ensure, subject to Commission approval in accordance with the ERO Regulations, that the delegated functions and related activities described in Sections 5, 6 and 7 and listed on **Exhibit E** have reasonable and adequate funding and resources by undertaking the following:

(a) ~~[REGIONAL ENTITY]~~NPCC shall develop, through a collaborative process with NERC, and propose, an annual business plan and budget, in accordance with ERO Regulations, Commission orders and NERC business planning and budgeting policies and instructions. ~~[REGIONAL ENTITY]'s~~ NPCC proposed business plan and budget shall describe the activities necessary for, and provide a budget with adequate resources for, ~~[REGIONAL ENTITY]~~NPCC to carry out its Delegated Authority under this Agreement, including the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E**. ~~[REGIONAL ENTITY]'s~~ NPCC business plan and budget shall show the funding sources and amounts to fund the proposed budget, including as applicable assessments to end users, penalty monies, and other sources of funds.

(b) ~~[REGIONAL ENTITY]~~NPCC and NERC agree that the portion of ~~[REGIONAL ENTITY]'s~~NPCC approved budget for the functions and activities described in Sections 5, 6

and 7 and listed on **Exhibit E** that is to be funded by assessments, will be equitably allocated among end users within the geographic boundaries described in **Exhibit A** and recovered through a formula based on Net Energy for Load, or through such other formula as is proposed by ~~REGIONAL ENTITY~~NPCC and approved by NERC and the Commission. If ~~REGIONAL ENTITY~~NPCC proposes to use a formula other than Net Energy for Load beginning in the following year, ~~REGIONAL ENTITY~~NPCC shall submit the proposed formula to NERC in sufficient time that NERC may review and approve the proposed formula and file it with the Commission by May 15 for approval, and the proposed formula shall be effective for the following year if approved by the Commission on or before the date the Commission approves the annual business plan and budget submitted by NERC and ~~REGIONAL ENTITY~~NPCC to the Commission pursuant to the ERO Regulations for such year.

(c) NERC shall determine that the assessments to fund the costs for its statutory functions in its Commission-approved budget are first allocated fairly among the Interconnections and regions according to the applicability of this work to those Interconnections and regions, and then equitably among the end users of the applicable interconnections and regions as appropriate. Allocation on a Net Energy for Load basis will be presumed to satisfy this equitability requirement.

(d) NERC shall provide ~~REGIONAL ENTITY~~NPCC with the form or forms for business plan and budget submittal, and any accompanying instructions, in accordance with the schedule for preparation of the business plan and budget developed by NERC and the Regional Entities.

(e) ~~REGIONAL ENTITY~~NPCC shall submit its proposed annual business plan and budget for carrying out its Delegated Authority functions and related activities described in Sections 5, 6 and 7 and listed on Exhibit E, as well as for all other activities of ~~REGIONAL ENTITY~~NPCC to NERC for review and approval in accordance with the annual schedule for the preparation of business plans and budgets which shall be developed collaboratively by NERC and the Regional Entities, as more fully described in **Exhibit E**.

(f) NERC shall fund ~~REGIONAL ENTITY~~'sNPCC performance of its Delegated Authority and related activities in accordance with ~~REGIONAL ENTITY~~'sNPCC Commission-approved business plan and budget, in the amount of ~~REGIONAL~~

~~ENTITY~~'s NPCC assessments to end users approved by the Commission. **Exhibit E** sets forth the procedures and timing for billing and collecting ~~REGIONAL ENTITY~~'s NPCC approved assessments from end users and other entities and payment of the approved assessment amount to ~~REGIONAL ENTITY~~, NPCC unless otherwise modified and approved by NERC and the Commission. NERC shall not impose any material obligation or requirement regarding the Delegated Authority upon ~~REGIONAL ENTITY~~, NPCC that has not been provided for in an approved business plan and budget or an approved amended or supplemental business plan and budget, without ~~REGIONAL ENTITY~~'s NPCC consent.

(g) NERC shall develop, in consultation with the Regional Entities, a reasonable and consistent system of accounts, with a level of detail and record keeping comparable to the Commission's Uniform System of Accounts and sufficient to allow the Commission to compare each Commission-approved NERC and ~~REGIONAL ENTITY~~, NPCC fiscal year budget with the actual results at the NERC and Regional Entity levels. ~~REGIONAL ENTITY~~, NPCC shall follow NERC's prescribed system of accounts except to the extent that NERC permits a departure from the prescribed system of accounts. NERC shall make an informational filing with the Commission describing any such waiver it permits and providing an explanation supporting the permitted departure.

(h) ~~REGIONAL ENTITY~~, NPCC shall submit unaudited quarterly interim financial statements in form provided by NERC no later than 20 days after the end of the fiscal quarter (March 31, June 30, September 30, and December 31).

(i) ~~REGIONAL ENTITY~~, NPCC shall submit audited financial statements annually, including supporting materials, in a form provided by NERC no later than May 1 of the following year.

(j) **Exhibit E** to this Agreement sets forth the mechanism through which ~~REGIONAL ENTITY~~, NPCC shall offset penalty monies it receives (other than penalty monies received from an operational function or division or affiliated entity of ~~REGIONAL ENTITY~~, NPCC) against its next year's annual budget for carrying out functions under this Agreement, and the mechanism by which ~~REGIONAL ENTITY~~, NPCC shall transmit to NERC any penalty monies received from an operational function or division or affiliated entity of ~~REGIONAL ENTITY~~, NPCC. *Provided*, that, subject to approval by NERC and the

Commission, ~~REGIONAL ENTITY~~NPCC may propose and implement an alternative use of penalty monies to that set forth in **Exhibit E**.

10. Assignment. This Agreement may be assigned by either Party only with the prior written consent of the other, which consent shall be granted or withheld in such non-assigning Party's sole discretion, subject to approval by the Commission. Any assignment under this Agreement shall not relieve a Party of its obligations, nor shall a Party's obligations be enlarged, in whole or in part, by reason thereof. ~~REGIONAL ENTITY~~NPCC may not delegate in whole or in part its Delegated Authority to any other entity without NERC's express consent; provided, however, that nothing in this provision shall prohibit ~~REGIONAL ENTITY~~NPCC from contracting with other entities to assist it in carrying out its Delegated Authority, provided ~~REGIONAL ENTITY~~NPCC retains control and responsibility for such Delegated Authority.

11. Default and Cure. Upon a Breach, the non-breaching Party shall give written notice of such Breach to the breaching Party (the "Default Notice"). Subject to a suspension of the following deadlines as specified below, the breaching Party shall have thirty (30) calendar days from receipt of the Default Notice within which to cure such Breach; *provided however*, that if such Breach is not capable of cure within thirty (30) calendar days, the breaching Party shall commence such cure within thirty (30) calendar days after notice and continuously and diligently complete such cure within ninety (90) calendar days from receipt of the Default Notice; and, if cured within such time, the Breach specified in such notice shall cease to exist. Subject to the limitation specified in the following sentence, if a Breach is not cured as provided in this Section 11, or if a Breach is not capable of being cured within the period provided for herein, the nonbreaching Party shall have the right to declare a default and terminate this Agreement by written notice at any time until cure occurs, and be relieved of any further obligation hereunder. The deadlines for cure and the right to declare a default and terminate this Agreement shall be suspended during the pendency of any efforts or proceedings in accordance with Section 18 of this Agreement to resolve a dispute as to whether a Breach has occurred or been cured. The provisions of this Section 11 will survive termination of this Agreement.

12. Term and Termination.

(a) This Agreement shall become effective on [January 1, 2011] (the “Effective Date”).

(b) The term of the Agreement shall be five (5) years from the Effective Date, prior to which time NERC shall conduct an audit pursuant to subsection 6(i) to ensure that ~~[REGIONAL ENTITY]~~NPCC continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. If ~~[REGIONAL ENTITY]~~NPCC meets such requirements, this Agreement may be renewed for another five (5) year term. This Agreement may be renewed for successive additional five (5) year renewal terms provided that prior to the end of each renewal term, NERC shall conduct an audit pursuant to subsection 6(i) to ensure that ~~[REGIONAL ENTITY]~~NPCC continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. Provided, that either Party may terminate this Agreement as of the end of a term by giving written notice to terminate at least one (1) year prior to the end of the term. If this Agreement is not renewed or becomes subject to termination for any reason, the Parties shall work to provide for a transition of ~~[REGIONAL ENTITY]~~'s NPCC Delegated Authority to NERC or to another eligible entity and to provide for the resolution of any wind-up costs associated with termination of this Agreement. The termination of this Agreement shall not take effect until such transition has been effected, unless the transition period exceeds one year, at which time ~~[REGIONAL ENTITY]~~NPCC may unilaterally terminate.

(c) If any provision of this Agreement, or the application thereof to any person, entity or circumstance, is held by a court or regulatory authority of competent jurisdiction to be invalid, void, or unenforceable, or if a modification or condition to this Agreement is imposed by a regulatory authority exercising jurisdiction over this Agreement, the Parties shall endeavor in good faith to negotiate such amendment or amendments to this Agreement as will restore the relative benefits and obligations of the signatories under this Agreement immediately prior to such holding, modification or condition. If either Party finds such holding, modification or condition unacceptable and the Parties are unable to renegotiate a mutually acceptable resolution, either Party may unilaterally terminate this Agreement. Such termination shall be effective one year following written notice by either Party to the other Party and to the Commission, or at such other time as may be mutually agreed by ~~[REGIONAL ENTITY]~~NPCC and NERC.

(d) Notwithstanding any termination of this Agreement, provisions contained in Limitation of Liability (Section 13), No Third Party Beneficiaries (Section 14) and Confidentiality (Section 15) shall survive this Agreement in accordance with their terms until sixty (60) days following the expiration of any applicable statute of limitations.

13. Limitation of Liability. ~~{REGIONAL ENTITY}~~NPCC and NERC agree not to sue each other or their directors, officers, employees, and persons serving on their committees and subgroups based on any act or omission of any of the foregoing in the performance of duties pursuant to this Agreement or in conducting activities under the authority of Section 215 of the Act, other than seeking a review of such action or inaction by the Commission. NERC and ~~{REGIONAL ENTITY}~~NPCC shall not be liable to one another for any damages whatsoever, including without limitation, direct, indirect, incidental, special, multiple, consequential (including attorneys' fees and litigation costs), exemplary, or punitive damages arising out of or resulting from any act or omission associated with the performance of the ~~{REGIONAL ENTITY}~~'sNPCC or NERC's responsibilities under this Agreement or in conducting activities under the authority of Section 215 of the Act, except to the extent that the ~~{REGIONAL ENTITY}~~NPCC or NERC is found liable for gross negligence or intentional misconduct, in which case ~~{REGIONAL ENTITY}~~NPCC or NERC shall not be liable for any indirect, incidental, special, multiple, consequential (including without limitation attorneys' fees and litigation costs), exemplary, or punitive damages.

14. No Third Party Beneficiaries. Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to, or any liability to, any third party.

15. Confidentiality. During the course of the Parties' performance under this Agreement, a Party may receive Confidential Information, as defined in Section 1500 of NERC's Rules of Procedure. Except as set forth herein, the Parties agree to keep in confidence and not to copy, disclose, or distribute any Confidential Information or any part thereof, without the prior written permission of the issuing Party, unless disclosure is required by subpoena, law, or other directive of a court, administrative agency, or arbitration panel, in which event the recipient hereby agrees to provide the Party that provided the Confidential Information with prompt

notice of such request or requirement in order to enable such issuing Party to (a) seek an appropriate protective order or other remedy, (b) consult with the recipient with respect to taking steps to resist or narrow the scope of such request or legal process, or (c) waive compliance, in whole or in part, with the terms of this Section. In the event a protective order or other remedy is not obtained or the issuing Party waives compliance with the provisions, the recipient agrees to furnish only that portion of the Confidential Information which the recipient's counsel advises is legally required and to exercise best efforts to obtain assurance that confidential treatment will be accorded to such Confidential Information. In addition, each Party shall ensure that its officers, trustees, directors, employees, subcontractors and subcontractors' employees, and agents to whom Confidential Information is exposed are under obligations of confidentiality that are at least as restrictive as those contained herein. This confidentiality provision does not prohibit reporting and disclosure as directed by NERC, as set forth in Section 6 of this Agreement.

16. Amendment. Neither this Agreement nor any of the terms hereof, may be amended unless such amendment is made in writing, signed by the Parties, and filed with and approved by the Commission.

17. Amendments to the NERC Rules of Procedure. NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations, or programs of ~~REGIONAL ENTITY~~NPCC under this Agreement without first obtaining the consent of ~~REGIONAL ENTITY~~NPCC which consent shall not be unreasonably withheld or delayed. To the extent ~~REGIONAL ENTITY~~NPCC does not consent, NERC shall have the right to invoke the dispute resolution provisions of Section 18 and, if such effort fails to resolve the dispute, to petition the Commission to adopt the amendment to the NERC Rules of Procedure. To the extent that the Commission issues an order amending or materially affecting the rights or obligations of ~~REGIONAL ENTITY~~NPCC under this Agreement, ~~REGIONAL ENTITY~~NPCC shall have the option, exercisable no later than 60 days after issuance of such order, to terminate this Agreement. Such termination shall be effective one year following written notice by ~~REGIONAL ENTITY~~NPCC to NERC and the Commission, or at such other time as may be mutually agreed by ~~REGIONAL ENTITY~~NPCC and NERC.

18. **Dispute Resolution**. In the event a dispute arises under this Agreement between NERC and ~~[REGIONAL ENTITY]~~NPCC (including disputes relating to NERC's performance of its obligations under this Agreement and/or disputes relating to ~~[REGIONAL ENTITY]'s~~NPCC performance of its obligations under this Agreement) which cannot be resolved through discussions between representatives of the Parties in the normal course of operations, the Parties shall use the following procedures ("Dispute Resolution") to attempt to resolve the dispute. ~~[REGIONAL ENTITY]~~NPCC shall not suspend performance of any delegated function, and the Parties shall continue to make reasonable, good faith efforts to comply with their obligations under this Agreement, during the pendency of Dispute Resolution. All notices required to be sent pursuant to this Dispute Resolution procedure shall be sent in accordance with Section 19 of this Agreement. This Dispute Resolution procedure is separate from and in addition to all other processes provided for in this Agreement.

(a) The Party invoking Dispute Resolution shall send a notice to the other Party describing the dispute, stating the invoking Party's position with respect to the dispute, stating that the Party is invoking Dispute Resolution, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the invoking Party.

(b) Within three (3) business days after receipt of the notice invoking Dispute Resolution, the receiving Party shall send a notice to the invoking Party acknowledging receipt of the notice invoking Dispute Resolution, stating the receiving Party's position with respect to the dispute, and naming the Party's designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the receiving Party.

(c) During the period commencing three (3) business days and ending twenty (20) business days after the date of the receiving Party's notice, the designated representatives shall engage in good faith negotiations to attempt to resolve the dispute, *provided*, that the designated representatives may agree prior to the end of such twenty (20) business day period that the process should move to the next step of Dispute Resolution.

(d) If the designated representatives are unable to arrive at a resolution of the dispute by the end of the time period described in subsection (c), they shall notify the chief executive

officers of their respective Parties. The chief executive officers of the Parties shall thereafter engage in good faith negotiations to attempt to resolve the dispute during the period of twenty (20) business days immediately following the time period described in subsection (c), *provided*, that the chief executive officers may agree prior to the end of such twenty (20) business day period that negotiations are at impasse and the process may move to the next step as described in subsection (f). Upon mutual agreement of the Parties, the twenty (20) business day period may be extended to pursue ongoing good faith negotiations.

(e) If a resolution of the dispute is achieved by the Parties, it shall be memorialized in a writing that is acceptable in form and substance to each party and is signed by the designated representative or chief executive officer on behalf of each Party.

(f) If the Parties are unable to resolve the dispute pursuant to the process described in subsections (a) through (e), then either Party may invoke any other available dispute resolution mechanism, including, without limitation, filing a complaint or petition with the Commission requesting resolution of the dispute by the Commission, or filing a complaint for relief in a court having jurisdiction over Parties and the subject matter of the dispute in accordance with Section 20. *Provided, however*, that: (i) it is the intent of the Parties that unresolved disputes shall be presented to and resolved by the Commission if the Commission has and accepts jurisdiction over the subject matter of the dispute, (ii) the Parties may, by mutual agreement, attempt to resolve the dispute through arbitration, mediation, or other process involving resort to an impartial neutral, and (iii) it is the intent of the Parties that resolution of disputes through Commission proceedings, arbitration, mediation, or other use of an impartial neutral, is preferred over resort to judicial proceedings.

(g) This Section 18 shall not apply to compliance enforcement actions against individual Registered Entities.

19. Notice. Whether expressly so stated or not, all notices, demands, requests, and other communications required or permitted by or provided for in this Agreement shall be given in writing to a Party at the address set forth below, or at such other address as a Party shall designate for itself in writing in accordance with this Section, and shall be delivered by hand or reputable overnight courier:

20. Governing Law. When not in conflict with or preempted by federal law, this Agreement will be governed by and construed in accordance with the laws of New Jersey without giving effect to the conflict of law principles thereof. The Parties recognize and agree not to contest the exclusive or primary jurisdiction of the Commission to interpret and apply this Agreement; provided however that if the Commission declines to exercise or is precluded from exercising jurisdiction of any action arising out of or concerning this Agreement, such action shall be brought in any state or federal court of competent jurisdiction in New Jersey. All Parties hereby consent to the jurisdiction of any state or federal court of competent jurisdiction in New Jersey for the purpose of hearing and determining any action not heard and determined by the Commission.

21. Headings. The headings and captions in this Agreement are for convenience of reference only and shall not define, limit, or otherwise affect any of the terms or provisions hereof.

22. Savings Clause. Nothing in this Agreement shall be construed to preempt or limit any authority that ~~REGIONAL ENTITY~~NPCC may have to adopt reliability requirements or take other actions to maintain reliability of the Bulk-Power System within the geographic boundaries described in **Exhibit A** that are outside the Delegated Authority, as long as such reliability requirements and actions are not inconsistent with Reliability Standards applicable to the region described in **Exhibit A** and do not result in a lessening of reliability outside the region described in **Exhibit A**.

23. **Entire Agreement.** This Agreement constitutes the entire agreement, and supersedes all prior agreements and understandings, both written and oral, among the parties with respect to the subject matter of this Agreement.

24. **Execution of Counterparts.** This Agreement may be executed in counterparts and each shall have the same force and effect as the original.

NOW THEREFORE, the parties have caused this Agreement to be executed by its duly authorized representatives, effective as of the Effective Date.

Northeast Power Coordinating Council, Inc. (NPCC)
Exhibit A — Regional Boundaries— Geographic Area

~~Exhibit A to the delegation agreement for each Regional Entity receiving Delegated Authority shall describe the geographic or electrical boundaries covered by the proposed delegation of authority. Exhibit A for each Regional Entity shall reflect coordination with neighboring Regional Entities, as appropriate, to ensure that all relevant areas are either included within the geographic boundaries of a Regional Entity or specifically identified as not being within the geographic boundaries of any Regional Entity. Any exclusions of geographic or electrical areas or of Registered Entities from the scope of the Regional Entity's Delegated Authority within the geographic or electrical boundaries shown on Exhibit A, and any additions of geographic or electrical areas or of Registered Entities located outside the boundaries shown on Exhibit A to the scope of the Regional Entity's Delegated Authority, shall be specifically stated or described in Exhibit A.~~

The geographic area covered by NPCC includes New York state, the six New England states, and Ontario, Quebec, and the Maritime Provinces in Canada. The total population served is approximately 56 million. The area covered is approximately 1 million square miles.

Exhibit B – Governance

Exhibit B shall set forth the Regional Entity’s bylaws, which NERC agrees demonstrate that the Regional Entity meets the following criteria:

CRITERION 1: The Regional Entity shall be governed by an independent board, a balanced stakeholder board, or a combination independent and balanced stakeholder board. (Federal Power Act § 215(e)(4)(A), 18 C.F.R. § 39.8(c)(1), Order No. 672 at ¶ 727.)

CRITERION 2: The Regional Entity has established rules that assure its independence of the users and owners and operators of the bulk power system, while assuring fair stakeholder representation in the selection of its directors. Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 699, 700.)

CRITERION 3: If the Regional Entity has members, the Regional Entity has established rules that assure that its membership is open, that it charges no more than a nominal membership fee and agrees to waive the fee for good cause shown, and that membership is not a condition for participating in the development of or voting on proposed Regional Reliability Standards. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 170-173.)

CRITERION 4: The Regional Entity has established rules that assure balance in its decision-making committees and subordinate organizational structures and assure no two industry sectors can control any action and no one industry sector can veto any action. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶ 728.)

CRITERION 5: The Regional Entity has established rules that provide reasonable notice and opportunity for public comment, due process, openness, and balance of interests in exercising its duties. (Federal Power Act § 215(c)(2)(D) and (e)(4), 18 C.F.R. § 39.8(c)(2).)

AMENDED AND RESTATED

BYLAWS

OF

NORTHEAST POWER COORDINATING COUNCIL, INC.

I. Offices

The principal office of Northeast Power Coordinating Council, Inc. (“NPCC”) shall be located in New York County, State of New York.

II. Purpose of Northeast Power Coordinating Council, Inc.

The purpose of NPCC is to promote and enhance the reliable and efficient operation of the international, interconnected bulk power system in Northeastern North America through (i) the development of regional reliability standards and compliance assessment and enforcement of continent-wide and regional reliability standards, coordination of system planning, design and operations, and assessment of reliability, pursuant to an agreement with the Electric Reliability Organization (“ERO”) which designates NPCC as a regional entity and delegates authority from the U.S. Federal Energy Regulatory Commission (“FERC”), and by Memoranda of Understanding with applicable Canadian Provincial regulatory and/or governmental authorities (collectively, “statutory activities”), and (ii) the establishment of regionally-specific criteria, and monitoring and enforcement of compliance with such criteria (collectively, “non-statutory criteria services”). In the development of regionally-specific reliability criteria, NPCC, to the extent possible, facilitates attainment of fair, effective and efficient competitive electric markets.

III. Terms

Terms not defined in these Bylaws shall have the definitions set forth in the Federal Power Act, Part 39 of the regulations of the FERC, as further clarified in FERC’s April 19, 2007 Order 119 FERC 61,060, and if not defined in any of those sources, shall be defined in accordance with their commonly understood and used technical meanings in the electric power industry, including applicable codes and standards.

Exhibit B – Governance

AMENDED AND RESTATED

BYLAWS

OF

NORTHEAST POWER COORDINATING COUNCIL, INC.

I. Offices

The principal office of Northeast Power Coordinating Council, Inc. (“NPCC”) shall be located in New York County, State of New York.

II. Purpose of Northeast Power Coordinating Council, Inc.

The purpose of NPCC is to promote and enhance the reliable and efficient operation of the international, interconnected bulk power system in Northeastern North America through (i) the development of regional reliability standards and compliance assessment and enforcement of continent-wide and regional reliability standards, coordination of system planning, design and operations, and assessment of reliability, pursuant to an agreement with the Electric Reliability Organization (“ERO”) which designates NPCC as a regional entity and delegates authority from the U.S. Federal Energy Regulatory Commission (“FERC”), and by Memoranda of Understanding with applicable Canadian Provincial regulatory and/or governmental authorities (collectively, “statutory activities”), and (ii) the establishment of regionally-specific criteria, and monitoring and enforcement of compliance with such criteria (collectively, “non-statutory criteria services”). In the development of regionally-specific reliability criteria, NPCC, to the extent possible, facilitates attainment of fair, effective and efficient competitive electric markets.

III. Terms

Terms not defined in these Bylaws shall have the definitions set forth in the Federal Power Act, Part 39 of the regulations of the FERC, as further clarified in FERC’s April 19, 2007 Order 119 FERC 61,060, and if not defined in any of those sources, shall be defined in accordance with their commonly understood and used technical meanings in the electric power industry, including applicable codes and standards.

“Bulk Power System” shall be deemed to refer to the interconnected electrical systems within Northeastern North America comprising generation and transmission facilities on which faults or disturbances can have a significant adverse impact outside of the local area. In this context, local areas and the specific facilities that comprise the bulk power system are determined by the Members of NPCC, utilizing a reliability impact based methodology.

“Northeastern North America” shall be deemed to comprise the geographical area within the perimeter border enclosing the State of New York, the six New England States of the United States, and the Canadian Provinces of Ontario, Québec, New Brunswick and Nova Scotia, including any radial load or generation connecting to these systems.

IV. Membership

- A. List of Members. The Members of NPCC are listed on Schedule A attached hereto.
- B. Eligibility. Upon suitable application describing the nature and activities of the applicant, additional entities shall be accepted by the Board of Directors of NPCC (the “Board”) as Members in the appropriate categories, defined as follows:
- (1) **General Membership** is voluntary and is open to any person or entity, including any entity participating in the Registered Ballot Body of the ERO that has an interest in the reliable operation of the Northeastern North American bulk power system. General Members are subject to compliance with reliability standards and receive additional services from the regional entity division of NPCC.
 - (2) **Full Membership** shall be available to entities which are General Members that also participate in electricity markets in the international, interconnected bulk power system in Northeastern North America. Independent system operators (“ISOs”), regional transmission organizations (“RTOs”), Transcos and other organizations or entities that perform the Balancing Authority function operating in Northeastern North America are expected to be Full Members of NPCC. The New York State Reliability Council and any other sub-regional reliability councils which may be formed are also expected to be Full Members. Full Members are subject to compliance with regionally-specific criteria, in addition to reliability standards, and receive additional services from the criteria services division of NPCC.
- C. Application as a Member. Any person or entity that is eligible to become a Member of NPCC in accordance with Article IV.B. may become either a General Member or a Full Member by completing and submitting to NPCC a membership application on a form prescribed by the Board. Any person or entity that applies to NPCC as a Member shall comply with the conditions and obligations of membership specified in these Bylaws. As an additional condition of membership in NPCC, each person or entity registering as a Member shall execute an agreement with NPCC, in a form to be specified by the Board, that such person or entity will hold all Directors, officers, employees and agents of NPCC, as well as volunteers participating in good faith in the activities of NPCC, harmless, to the extent permitted by U.S. Federal or Canadian Provincial laws, rules and regulations, for any injury or damage caused by any act or omission of any Director, officer, employee, agent or volunteer in the course of performance of his or her duties on behalf of NPCC, other than for acts of gross negligence, intentional misconduct or a breach of confidentiality.

If not a natural person, the Member shall designate a representative and an alternate representative with authority to receive notices, cast votes, execute waivers and consents, and enter into binding agreements on behalf of the Member. NPCC shall maintain a current roster of the Members of NPCC, including each Member’s designated representative and alternate representative. From time to time, the Board may establish a date by which Members shall submit their application renewals. All Members shall confirm their applications within thirty (30) calendar days of the date of receipt of request by NPCC, using an application renewal form prescribed by the Board. Any Member that has not submitted an application renewal within thirty (30) calendar days following the date established by the Board shall be removed from the NPCC roster. NPCC shall notify any Member that is removed from the roster of Members of such removal, by notice sent to such former Member’s last known address on the records of NPCC.

- D. **Voting. There shall be eight (8) voting sectors (“Voting Sectors”), defined as follows:**

Sector (1). Transmission Owners: This Voting Sector shall consist of any entity within Northeastern North America that owns at least 200 circuit miles of integrated transmission

facilities, or has an Open Access Transmission Tariff or equivalent on file with the FERC or the appropriate regulatory or governmental authority. This sector includes transmission owners that have placed their transmission under the operational control of an ISO/RTO, independent transmission companies and merchant transmission owners/developers.

Sector (2). Reliability Coordinators: This Voting Sector shall consist of any entity within Northeastern North America certified as a Reliability Coordinator.

Sector (3). Transmission Dependent Utilities (“TDUs”); Distribution Companies and Load-Serving Entities (“LSEs”). This Voting Sector shall consist of entities within Northeastern North America that are:

- (a) Entities with a regulatory contract, or other legal obligation to serve wholesale aggregators or end-use customers, and that depend primarily on the transmission systems of third parties to provide this service;
- (b) Agents or associates that represent groups of TDUs;
- (c) Electric distribution companies;
- (d) Entities serving end-use customers under a regulated tariff, a contract governed by a regulatory tariff, or other legal obligation to serve; or
- (e) Each member of a generation and transmission (“G&T”) cooperative or a joint-action agency permitted to designate the G&T or joint action agency to represent it in this sector.

Sector (4). Generator Owners: This Voting Sector shall consist of entities within Northeastern North America that are affiliated and/or independent generators.

Sector (5). Marketers, Brokers and Aggregators: This Voting Sector shall consist of entities within Northeastern North America that are:

- (a) Entities providing energy to end-use customers under a power marketing agreement or other authorization not classified as a regulated tariff;
- (b) Entities that buy, sell, or broker energy and related services for resale in wholesale or retail markets, whether a non-jurisdictional entity operating within its charter or an entity licensed by a jurisdictional regulator; or
- (c) Generation and transmission cooperatives and joint-action agencies that perform an electricity broker, aggregator, or marketer function.

Sector (6). Customers: This Voting Sector shall consist of entities within Northeastern North America that are:

- (a) Entities or customers that take delivery of energy that is not

purchased for resale within Northeastern North America;

- (b) Agents or associations representing groups of large end users within Northeastern North America; or
- (c) Agents, state consumer advocates, or other advocate groups representing groups of small customers within Northeastern North America.

Sector (7). State and Provincial Regulatory and/or Governmental Authorities.

This Voting Sector shall consist of State and Provincial regulatory or governmental authorities within Northeastern North America.

Sector (8). Sub-Regional Reliability Councils, other Regional Entities and Interested Entities: This Voting Sector shall consist of:

- (a) Any entity within Northeastern North America authorized by an appropriate regulatory and/or governmental authority to be a Sub-Regional Reliability Council;

Any other delegated Regional Entity; or

- (c) Any person or entity, including any entity participating in the Registered Ballot Body of the ERO, that has an interest in the reliable operation of the bulk power system in Northeastern North America.

- E. Assignment to Voting Sector. A new applicant for membership shall request to be assigned to a Voting Sector subject to Board approval. A Member may request to be assigned to any Voting Sector so long as membership in that Voting Sector is consistent with the Member's business or other activities within the NPCC region. Multiple memberships of the separate business functions of an entity are permitted, with each membership assigned to the appropriate separate sector and each membership designating a different representative and alternate. A consultant, attorney, agent, vendor, trade or industry association, state, provincial or local consumer advocate organization that provides services to or otherwise represents the interests of the Members of one or more Voting Sectors may elect to be assigned to one such Voting Sector subject to Board approval. Entities may elect to change their Voting Sector participation in connection with the Annual Meeting of Members of NPCC, subject to Board approval.
- F. Term of Membership. Membership in NPCC shall be retained so long as a Member meets its respective qualifications, obligations, and conditions of membership as set forth in this Article IV.

V. **Organization of NPCC**

- A. Each Member shall designate an executive level representative and an alternate representative with full authority to act on its behalf in carrying out the work of NPCC.
- B. NPCC shall have a Board of Directors and shall retain a Chairman, who shall serve as Chair of the Board. The Board shall also consist of two Co-Vice Chairs, the President and the Secretary, all *ex officio*; and additional Directors to be selected by the eight Voting Sectors of Members as specified below. The Directors shall designate two Co-Vice Chairs. The Co-Vice Chair designees shall be from different Voting Sectors and shall be elected by a vote of the entire Membership. In the temporary absence of the Chair, a Vice Chair designated by two-thirds vote of the Directors shall perform the duties of the Chair. NPCC's Chairman, President and officers, when serving *ex officio*, shall not have any vote on Board matters, except that the Co-Vice Chairs shall retain the voting rights that they otherwise held by virtue of serving as a Director.
- C. The officers of NPCC shall consist of a President, a Secretary and a Treasurer, with assistants as appropriate, and such additional officers as may be approved by the Members. Officers, except for the President, shall hold office for one year or until the next Annual Meeting of Members of NPCC and until their successors are duly elected and qualified.
- D. NPCC shall employ a President and staff, as required to carry out NPCC's mission and to perform the functions of NPCC. The President shall be appointed by the Board and shall serve at the Board's discretion. In the event of a vacancy in the presidency, the Board shall appoint an interim President who shall serve until such time as the Board appoints a new President.
- E. In the event a vacancy occurs in the Board of Directors, or in the office of Co-Vice Chair, Secretary, or Treasurer in the interim between Annual Meetings of Members of NPCC, the Chair may designate a person from the same Voting Sector to fill such vacancy with the approval of a majority vote of Members from the applicable Sector.
- F. In the event a vacancy occurs in the Office of Chair in the interim between Annual Meetings of Members of NPCC, the Board may fill such vacancy by a two-thirds affirmative majority of the weighted sector votes, with each Director casting one vote within the applicable sector, at a meeting of the Board at which a quorum is present. The term of office of the persons designated to fill any such vacancy shall expire on the date of the next subsequent Annual Meeting of Members of NPCC. The authority and responsibilities of the Chair and the President shall be defined by the Board.
- G. Statutory activities will be conducted by the regional entity division of NPCC. Non-statutory criteria services will be provided by the criteria services division of NPCC.

VI. **Board of Directors**

- A. **Hybrid Board.** NPCC shall have a Board of Directors consisting of stakeholders balanced by sector and an independent Chairman, two Co-Vice Chairs, the President, and the Secretary.
- B. **Term and Compensation.** The term of office of the Directors shall be three (3) years. Initial terms of Directors shall be staggered by the Board so that members serve initial terms of one, two, or three years. There shall be no limit on the number of terms which may be served by any individual. Directors shall serve without compensation, including when performing duties of a Co-Vice Chair.

- C. Powers and Duties. The Board shall develop NPCC policies, direct the activities of NPCC, accept additional entities as Members, review and approve or modify Member Voting Sector assignment, and make assignments to the committees of NPCC. The Board shall (i) approve a Regional Delegation Agreement with the ERO which delegates authority from FERC in the United States and additional agreements with appropriate Canadian Provincial regulatory and/or governmental authorities, (ii) approve and oversee NPCC's Regional Reliability Standards Development Process and submit such Regional Standards to the ERO for adoption by FERC and appropriate Canadian Provincial regulatory and/or governmental authorities, (iii) approve the NPCC Compliance Enforcement Program and the assessment and enforcement of mandatory compliance with Reliability Standards consistent with the Regional Delegation Agreement and agreements with Canadian Provincial regulatory and/or governmental authorities, and (iv) oversee NPCC's assessment and enforcement of mandatory compliance with regionally-specific reliability criteria through administration of the NPCC Reliability Compliance and Enforcement Program. The duties of the Board shall also include consideration and resolution of budgetary matters, including the levying of any special assessments, and determination of any annual membership fee for Full Members. However, the Board may not amend these Bylaws or establish, modify or eliminate any of NPCC's Regional Reliability Standards, regionally-specific reliability criteria, guides, programs or procedures; nor may the Board add, modify, or eliminate Voting Sectors established pursuant to these Bylaws.

To carry out the purposes of NPCC, the Board, acting through the President and NPCC staff, shall enlist such personnel from Members as may be necessary; and, within the limits of the annual budget, may employ such personnel, incur such administrative expenses, and retain such independent professional consulting services for NPCC and the committees of NPCC as it may deem desirable.

- D. Board Composition. NPCC shall have a Board of Directors that shall consist of up to eight (8) voting sectors. The voting sectors shall include the following:

Sector (1). Transmission Owners (Maximum of 3, with no more than 1 per Balancing Authority Area)

Sector (2). Reliability Coordinators (Maximum of 3)

Sector (3). Transmission Dependent Utilities ("TDUs"); Distribution Companies and Load-Serving Entities ("LSEs") (Maximum of 3)

Sector (4). Generator Owners (Maximum of 3)

Sector (5). Marketers, Brokers and Aggregators (Maximum of 3)

Sector (6). Customers (Maximum of 3)

Sector (7). Regulators (Maximum of 3)

Sector (8). Sub-Regional Reliability Councils, other Regional Entities and Interested Entities (Maximum of 3, with a representative of the New York State Reliability Council, LLC included)

- E. Quorum and Voting Requirements for the Board. At any meeting of the Board, attendance in person or by proxy by at least one-half of the Directors in each of at least sixty percent (60%) of the sectors shall constitute a quorum. Except as otherwise expressly provided in NPCC's Certificate of Incorporation, these Bylaws or applicable law, actions by the Board shall be approved upon receipt of a two-thirds affirmative majority of the weighted sector votes, with each

Director casting one vote within the applicable sector, at a meeting of the Board at which a quorum is present. The following process shall be used to determine if there are sufficient affirmative votes:

- The number of votes cast is the sum of affirmative and negative votes, excluding abstentions.
- The number of affirmative votes cast in each Voting Sector will be divided by the sum of affirmative and negative votes cast in that Voting Sector to determine the fractional affirmative vote for each Voting Sector. Abstentions will not be counted for the purposes of determining the fractional affirmative vote for a Voting Sector.
- The sum of the fractional affirmative votes from all sectors divided by the number of sectors voting will be used to determine if a two-thirds affirmative majority has been achieved. A sector will be considered as “voting” if any Member of the sector casts either an affirmative or a negative vote.

An action will be approved if the sum of fractional affirmative votes from all sectors divided by the number of voting sectors is at least two-thirds.

F. Board Action Without Meeting. Any action required, or permitted to be taken at a meeting of the Board of Directors, may be taken without a meeting if the action is taken by all members of the Board. The action must be evidenced by one or more written consents (which may be in electronic form) describing the action taken, signed by each Director, and included in the minute book of NPCC. Any action taken under this Section VI.F. is effective when the last Director signs the consent, unless the consent specifies a different effective date.

G. Election and Removal of Directors. The Initial Board shall be the persons named in the Certificate of Incorporation and shall serve until the first Annual Meeting of the Members. The Initial Board shall nominate a list of Directors consistent with the Board composition requirements set forth in Section VI.D. At the first meeting of the Members, the Members from each sector shall vote to elect Directors in their respective sector. A Director shall be elected by a vote of the majority of the Members in the respective sector. No sector shall elect more Directors than the number of Members in such sector.

A Director may be removed for cause by at least two-thirds of the Members in their respective sector at a regular meeting or at a special meeting called for that purpose; *provided* that there is a quorum of that sector’s Members present at that meeting, or by at least a majority of the Directors present at a meeting called for that purpose, and *provided, further*, that there is a quorum of not less than a majority present at the meeting of Directors at which such action is taken.

H. Indemnification. Subject to the limitation set forth in Section VI.I. below, NPCC shall indemnify its Directors, Officers, employees and other corporate agents, including volunteers participating in good faith in the activities of NPCC and persons serving on duly constituted committees of NPCC (collectively, “NPCC Indemnitees”), in each case, to the full extent from time to time permitted by New York Not-for-Profit Corporation Law (“N-PCL”) and other applicable law. Such right of indemnification shall inure to the benefit of the legal representative of any NPCC Indemnitee. The foregoing right of indemnification shall be in addition to, and not in restriction or limitation of, any right such NPCC Indemnitee may have under applicable law (including the N-PCL).

- I. Limitation on Indemnification. The maximum amount of losses (i.e., damages, judgments, fines, penalties, liability, costs and expenses, including reasonable attorneys' fees and expenses) for which NPCC will be obligated to indemnify the NPCC Indemnitees under Section VI.H. will be the policy limit of directors and officers' ("D&O") liability insurance set forth in the D&O insurance policy maintained by NPCC.

VII. Committees

NPCC shall have such committees, subcommittees, task forces and other groups as the Board may deem appropriate, including a Regional Standards Committee (RSC), a Compliance Committee (CC), a Reliability Coordinating Committee (NPCC's principal technical committee), a Public Information Committee and an Audit and Finance Committee.

The Audit and Finance Committee shall be comprised of at least three members of the Board and include one Director which shall be designated an audit committee financial expert by the Board. A chairperson of the Audit and Finance Committee shall be designated by the Board from among the members of the committee.

Committee members shall be nominated and approved by the Board in accordance with guidelines established by the Board. Quorum and voting rules applicable to the Board shall also apply to voting on any such NPCC decision making committees, unless otherwise determined by the Board. Each committee shall establish a charter or scope of work, which shall be presented to the Board for approval.

VIII. Members' Voting Rights

- A. Quorum and Voting Requirements for Meetings of Members. At any meeting of the Members of NPCC, attendance in person or by proxy by one-half of the Members in each of at least sixty percent (60%) of the Voting Sectors on the roster of Members maintained by NPCC shall constitute a quorum. Except as otherwise expressly provided in NPCC's Certificate of Incorporation, these Bylaws or applicable law, actions by the Members of NPCC shall be approved upon receipt of a two-thirds affirmative majority vote of the sectors at a meeting of the Members of NPCC at which a quorum is present, where (i) each Member shall have one vote within a sector, except that if less than one-half of the Members in a sector are present, in person or by proxy, at the meeting, the vote of that sector shall be weighted by a percentage equal to the number of Members of the sector present in person or by proxy at the meeting divided by one-half of the Members in the sector; (ii) the vote of each sector of NPCC shall be allocated for and against the proposed action based on the respective percentages of votes cast for and against the proposed action by the Members in that sector voting in person or by proxy; and (iii) the proportions of the votes of each sector allocated for and against the proposed action shall be summed to determine the total number of votes for and against the proposed action.

The following process is used to determine if there are sufficient affirmative votes:

- The number of votes cast is the sum of affirmative and negative votes, excluding abstentions.
- The number of affirmative votes cast in each sector will be divided by the sum of affirmative and negative votes cast to determine the fractional affirmative vote for each sector. Abstentions will not be counted for the purposes of determining the fractional affirmative vote for a sector.

- The sum of the fractional affirmative votes from all sectors divided by the number of sectors voting will be used to determine if a two-thirds affirmative majority has been achieved. (A sector will be considered as “voting” if any Member of the sector casts either an affirmative or a negative vote.)
- B. Waivers of Notice of Meetings of Members; Member Meeting Adjournments. Notice of a Meeting of Members need not be given to any Member who signs a waiver of notice, in person or by proxy, whether before or after the meeting. The attendance of any Member at a meeting, in person or by proxy, without protesting prior to the conclusion of the meeting the lack of notice of such meeting, shall constitute a waiver of notice of the meeting by such Member. When any Meeting of Members is adjourned to another time or place, it shall not be necessary to give notice of the adjourned meeting if the time and place to which the meeting is adjourned are announced at the meeting at which the adjournment is taken, and if at the adjourned meeting only such business is transacted as might have been transacted at the original meeting.
- C. Actions Without a Meeting of Members. Any action, required or permitted to be taken at a Meeting of Members, may be taken without a meeting if the action is consented to in writing by the minimum number of Members that would be required to approve the action at a Meeting of Members at which all Members were present. The call for action without a Meeting of Members may be initiated by the Chairman of the Board or by a number of Members constituting at least ten percent (10%) of the Members on the roster of Members maintained by NPCC, which number shall include Members in at least four (4) of the Voting Sectors. Notice of the proposal for action without a meeting shall be provided to all Members on the roster of Members maintained by NPCC at least seven (7) days prior to the date established for the tabulation of consents. The Members shall receive written notice of the results within fourteen (14) days of the action vote, and all written responses of the Members shall be filed with the minutes of proceedings of Members.
- D. Meeting of Members to be Open. Notice to the public of the dates, places, and times of Meetings of Members, and all non-confidential material provided to the Members, shall be posted on NPCC’s web site at approximately the same time that notice is given to the Members. Meetings of Members shall be open to the public, subject to reasonable limitations due to the availability and size of meeting facilities; *provided* that the meeting may be held in or adjourn to closed session to discuss matters of a confidential nature, including, but not limited to, personnel matters, compliance and enforcement matters, litigation, or commercially sensitive or critical energy infrastructure information of any entity.
- E. Electronic Voting. Upon completion of applicable processes that permit parties to comment on the subject issue(s), electronic voting on matters before the membership, Board or any committee is permitted. A quorum will be determined to exist for purposes of conducting an electronic vote when NPCC receives completed ballots from two-thirds of the total number of outstanding ballots. In the event that a quorum exists for purposes of an electronic vote but the matter has not been resolved, NPCC may continue to solicit additional responses in order to resolve the matter by electronic voting.

IX. Membership Rights and Obligations, and Organizational Process

- A. All General and Full Members shall have the following rights and obligations:
- (1) Rights:
 - (a) Attendance at all meetings of the general membership of NPCC; and, subject to procedures established by the committees and to the terms of applicable confidentiality agreements, attendance at

- meetings of NPCC's committees, task forces and any other such NPCC groups.
- (b) Access to minutes of each committee, subcommittee, task force or any other NPCC group, subject to procedures established by the committees and to the terms of applicable confidentiality agreements.
 - (c) Vote to amend these Bylaws.
 - (d) Vote to establish, modify or eliminate NPCC Regional Reliability Standards and programs.
 - (e) For Full Members only: Vote to establish, modify or eliminate NPCC regionally-specific reliability criteria.
- (2) Obligations:
- (a) Each Member shall agree, in writing, to accept the responsibility to promote, support, and comply with the purposes and policies of NPCC as set forth in its Certificate of Incorporation and Bylaws as from time to time adopted, approved or amended.
 - (b) Each Member acknowledges that it has the responsibility to plan and design its bulk power system and conduct its operations in compliance with ERO Reliability Standards, Regional Reliability Standards and Regional Variances consistent with applicable laws, regulations, permits and licenses.
 - (c) Each Member agrees to submit such data and reports as required by NPCC in order to perform compliance enforcement obligations delegated to it by the ERO, subject to established procedures and to the terms of applicable confidentiality agreements.
 - (d) In addition, each Full Member shall:
 - (i) plan and design its bulk power system in compliance with Criteria, Guides, and Procedures established by NPCC and applicable ERO Standards;
 - (ii) conduct its operations in compliance with Criteria, Guides, and Procedures established by NPCC and applicable ERO Standards consistent with applicable laws, regulations, permits and licenses;
 - (iii) assure that, whenever it enters into arrangements with non-members which could have an impact on the reliability of the international, interconnected bulk power systems in Northeastern North America, the arrangements will not adversely impact the ability of the Full Members to comply with regionally-specific criteria established by NPCC, ERO Standards, or the criteria of regional reliability organizations established in areas in which the facilities used for such arrangements are located;
 - (iv) notify NPCC of its existing facilities and operating procedures and of its plans for major additions or modifications affecting the operation of the interconnected systems; and shall report to NPCC any decision as to significant alterations or changes proposed for their respective electric systems, whether in generation, transmission, inter-system communication or control and protective equipment, or in operating procedures; such report to be submitted promptly and, except in cases

of emergency, before final commitments are undertaken or changes in operating procedures become effective;

- (v) promptly notify NPCC and all other Members in writing or electronically if its bulk power system is not being designed or operated, or its operations are not being conducted in compliance with Criteria, Guides, and Procedures established by NPCC, stating its reasons, and providing its plan and schedule to achieve compliance;
- (vi) submit such data and reports as required by the Reliability Compliance and Enforcement Program and to abide by the compliance assessments and sanctions prescribed by NPCC's enforcement procedures, subject to Alternative Dispute Resolution; and
- (vii) undertake and perform the administrative and financial obligations described in Article XIII of these Bylaws.

B. Standards Development Procedure. NPCC shall develop a Regional Reliability Standards Development Procedure that provides the design-basis approach to a consensus building process by which NPCC may develop Regional Reliability Standards and Regional Variances to be proposed to the ERO for adoption, under delegated authority by the FERC and the Canadian Provincial regulatory and/or governmental authorities.

C. Procedures for Enforcing Compliance with Reliability Standards. Where regulatory approval has been obtained or governmental authority has been provided, upon the determination of the NPCC Board that a user, owner or operator of the bulk power system has violated a reliability standard, NPCC shall enforce compliance for such violations, pursuant to procedures and processes that shall be specified in the NPCC Compliance Enforcement Program. Such procedures and processes shall provide for reasonable notice and opportunity for hearing. Any sanction imposed for a violation of a Reliability Standard shall bear a reasonable relation to the seriousness of the violation and shall take into consideration circumstances surrounding the violation and efforts of the owner, operator, or user of the bulk power system to remedy the violation in a timely manner. Subject to any necessary action by any applicable governmental authorities, no sanction imposed for a violation of a reliability standard shall take effect until the thirty-first (31st) day after the NPCC Board, where authorized by law or agreement, files with the FERC or other applicable Canadian regulatory and/or governmental authority's notice of the sanction and the record of the proceedings in which the violation and sanction were determined, or such other date as ordered by the FERC or other applicable Canadian regulatory and/or governmental authorities or as prescribed by applicable law.

X. Full Members: Enforcement of Mandatory Compliance With Regionally-specific Criteria
Subject to approval of the Full Members, NPCC shall establish an NPCC Reliability Criteria Compliance and Enforcement Program, including matrices for measuring compliance, levying non-monetary sanctions, and procedures for Alternative Dispute Resolution. Such program shall be administered by the NPCC Board. The Reliability Coordinating Committee, with the full cooperation of each member, shall expeditiously evaluate, as appropriate, alterations or measures designed to correct any assessed non-compliance and shall report such studies to the NPCC Board.

XI. Meetings

Meetings of NPCC may be held on such dates as the Board may from time to time determine and shall be held in such places as the Board may from time to time designate. Special meetings may be called from time to time by the Chair, the Board, or by a number of

Members constituting at least ten percent (10%) of the Members on the roster of Members maintained by NPCC, which number shall include Members in at least four (4) of the Voting Sectors. Notice of all meetings, stating the time and place, shall be given by NPCC in writing to each Member by issuing the notice at least one week prior to the date of the meeting. The Secretary, Assistant Secretary, or, in their absence, a secretary *pro tempore* designated by the Chair or the President, shall keep the records of NPCC meetings.

When appropriate, the membership, the Board and the committees may use proxies or teleconference facilities. Such participation shall constitute attendance for purposes of quorum requirements.

XII. Budget

The Board shall prepare or cause to be prepared an annual budget for the administrative and other expenses of NPCC, including the expenditures for the fiscal year for any material special projects undertaken by NPCC and reasonable and proper reserves and provisions for contingencies, an accompanying business plan for NPCC, and a funding mechanism including any supplemental funding mechanism, for each fiscal year. The annual budget, business plan, and funding mechanism of NPCC shall be developed in the form and format and on the schedule stipulated by the ERO for a fiscal year commencing on January 1 and ending on December 31. Each annual budget, business plan, and funding mechanism shall be approved by the Board at a regular meeting or a special meeting of the Board duly called for that purpose. The Board shall approve each annual budget, business plan, and funding mechanism on or before the date stipulated by the ERO during the year prior to the start of the fiscal year in order to allow for timely submittal of the approved annual budget, business plan, and funding mechanism to the FERC and the applicable Canadian regulatory and/or governmental authorities.

If the ERO or a regulatory and/or governmental authority by order remands an annual budget, business plan, or annual, modified, or supplemental funding mechanism, the Board shall promptly address such other through appropriate follow-up measures with the Members and regulatory and/or governmental authorities.

Each Full Member shall be notified of the annual administrative expense budget for the criteria services division, on or before December 1st of the preceding year.

XIII. Funding

NPCC's annual administrative expenses, including any special assessments approved by the Board, shall be apportioned and funded as follows:

- A. Funding of NPCC General Member regional entity division activities shall be through mechanisms established by the ERO, FERC and applicable Canadian regulatory and/or governmental authorities.
- B. General Members shall not be assessed an annual membership fee.
- C. Full Members, other than Full Members that perform the Balancing Authority function, shall not be assessed an annual membership fee.
- D. Full Members that perform the Balancing Authority function shall be assessed and pay a proportional share of the expenses for non-statutory criteria services in proportion to the ratio of the second previous year's Net Energy for Load within the Balancing Authority Area to the aggregate Net Energy for Load within all Balancing Authority Areas in Northeastern North America. NPCC will directly assign non-statutory criteria services costs to a Balancing Authority Area or entity where significant costs are incurred by NPCC for such Area or entity.
- E. No Full Member shall, without its consent, be responsible for expenses of NPCC in any one calendar year in excess of its assessed portion of the amount budgeted for non-statutory criteria services for that year; provided, however, that special assessments may be separately budgeted and their cost allocated by the Board to the Full Members that perform the Balancing Authority function.

XIV. Termination of Membership and Cessation of Non-Statutory Criteria Services

- A. Termination. All General Members and Full Members, other than Full Members that perform the Balancing Authority function, may terminate their membership in NPCC at any time upon fifteen (15) days' written or electronic notice without liability to NPCC. A Full Member that performs the Balancing Authority function may terminate its rights and obligations under these Bylaws (other than its obligation to pay its proportionate share of the non-statutory expenses of NPCC, including special assessments, if applicable, for the full calendar year within which such termination is effective) at any time upon one year's written notice to the President; whereupon, it shall cease to be a Full Member of NPCC as of the date such termination is effective. The President shall promptly inform all Members of receipt of any such notices.
- B. Cessation of Non-Statutory Criteria Services. The Full Members of NPCC may elect by a majority vote to cease non-statutory criteria services.

XV. Conflicts of Interest

NPCC has developed a Code of Conduct that sets forth NPCC policies with respect to, among other things, conflicts of interest. On an annual basis, Directors shall evidence their compliance with NPCC conflict of interest principles by either: (i) signing an Individual Participant Implementation Agreement and thereby agreeing to comply with NPCC's Code of Conduct to the best of his/her ability; or (ii) agreeing that the execution of a Member Entity Implementation Agreement by the employer of such Board member evidences the Board member's agreement to be bound by its employer's Code of Conduct when performing NPCC activities. The Board shall establish similar Code of Conduct compliance requirements for NPCC staff and membership personnel participating on committees, task forces, and working groups as appropriate.

XVI. General

- A. No Member shall be liable for the failure of any other Member to perform its obligations hereunder.
- B. No NPCC officer, member of the Board or member of any other NPCC committee or group, or employee of NPCC shall be personally liable to NPCC or any member thereof, for damages for breach of any duty owed to NPCC or any member thereof, except for liabilities arising from breach of any duty based upon an act or omission (i) in breach of the duty of loyalty owed to NPCC or any individual member, (ii) not in good faith or involving a knowing violation of law, or (iii) resulting in receipt of an improper personal benefit by such NPCC officer, member of the Board or member of any other NPCC committee or group, or employee of NPCC. Neither the amendment nor repeal of this paragraph, nor the adoption of any provision of these Bylaws inconsistent with this paragraph, shall eliminate or reduce the protection offered by this paragraph to an NPCC officer, member of the Board or member of any other such NPCC committee or group, or employee of NPCC in respect of any matter which occurred, or any cause of action, suit or claim which, but for this paragraph, would have accrued or arisen, prior to such amendment, repeal, or adoption.
- C. Those entities listed as Members on Schedule A and subsequent applicants granted membership in NPCC shall be deemed to have accepted and to be bound by all the terms and conditions of these Bylaws, as adopted on July 24, 2007.

APPROVED 7-24-07

Exhibit C – Regional Standard Development Procedure

Exhibit C shall set forth the Regional Entity’s standards development procedure, which NERC agrees meets the following common attributes:

COMMON ATTRIBUTE 1

Proposed regional reliability standards shall be subject to approval by NERC, as the electric reliability organization, and by FERC before becoming mandatory and enforceable under Section 215 of the FPA and any applicable authorities in Canada. No regional reliability standard shall be effective within the NPCC area unless filed by NERC with FERC and applicable authorities in Canada and approved by FERC and applicable authorities in Canada.

COMMON ATTRIBUTE 2

NPCC regional reliability standards shall provide for as much uniformity as possible with reliability standards across the interconnected bulk power system of the North American continent. A NPCC reliability standard shall be more stringent than a continent-wide reliability standard, including a regional difference that addresses matters that the continent-wide reliability standard does not, or shall be a regional difference necessitated by a physical difference in the bulk power system. A regional reliability standard that satisfies the statutory and regulatory criteria for approval of proposed North American reliability standards, and that is more stringent than a continent-wide reliability standard, would generally be acceptable.

COMMON ATTRIBUTE 3

NPCC regional reliability standards, when approved by FERC and applicable authorities in Canada, shall be made part of the body of NERC reliability standards and shall be enforced upon all applicable bulk power system owners, operators, and users within the NPCC area, regardless of membership in the region.

COMMON ATTRIBUTE 4

Requester — The requester is the sponsor of the regional reliability standard request and may assist in the development of the standard. Any member of ~~[Regional Entity Name], NPCC~~, or group within ~~[Regional Entity Name]NPCC~~ shall be allowed to request that a regional reliability standard be developed, modified, or withdrawn. Additionally, any entity (person, organization, company, government agency, individual, etc.) that is directly and materially affected by the reliability of the bulk power system in the NPCC area shall be allowed to request a regional reliability standard be developed, modified, or withdrawn.

COMMON ATTRIBUTE 5

Regional Standards Committee — The NPCC Regional Standards Committee manages the standards development process. The NPCC Regional Standards Committee will consider which requests for new or revised standards shall be assigned for development (or existing standards considered for deletion). The NPCC Regional Standards Committee will advise the NPCC board on standards presented for adoption.

COMMON ATTRIBUTE 6

[Registered ballot body — The registered ballot body comprises all entities or individuals that qualify for one of the stakeholder segments; are registered with NPCC as potential ballot participants in the voting on standards; and are current with any designated fees. Each member of the registered ballot body is eligible to vote on standards. [Each standard action has its own ballot pool formed of interested members of the registered ballot body. Each ballot pool comprises those members of the registered ballot body that respond to a pre-ballot survey for that particular standard action indicating their desire to participate in such a ballot pool.] The representation model of the registered ballot body is provided in Appendix A.]

COMMON ATTRIBUTE 7

NPCC will coordinate with NERC such that the acknowledgement of receipt of a standard request identified in step 1, notice of comment posting period identified in step 4, and notice for vote identified in step 5 below are concurrently posted on both the NPCC and NERC websites.

COMMON ATTRIBUTE 8

An acceptable standard request shall contain a description of the proposed regional reliability standard subject matter containing sufficiently descriptive detail to clearly define the purpose, scope, impacted parties, and other relevant information of the proposed standard.

COMMON ATTRIBUTE 9

Within [no greater than 60] days of receipt of a completed standard request, the NPCC Regional Standards Committee shall determine the disposition of the standard request.

COMMON ATTRIBUTE 10

The NPCC Regional Standards Committee may take one of the following actions:

- Accept the standard request as a candidate for development of a new standard, revision of an existing standard, or deletion of an existing standard. The [standards committee](#)NPCC Regional Standards Committee may, at its discretion, expand or narrow the scope of the standard request under consideration. The [standards committee](#)NPCC Regional Standards Committee shall prioritize the development of standard in relation to other proposed standards, as may be required based on the volume of requests and resources.
- Reject the standard request. If the [standards committee](#)NPCC Regional Standards Committee rejects a standard request, a written explanation for rejection will be delivered to the requester within [no greater than 30] days of the decision.
- Remand the standard request back to the requester for additional work. The standards process manager will make reasonable efforts to assist the requester in addressing the deficiencies identified by the NPCC Regional Standards Committee. The requester may then resubmit the modified standard request using the process above. The requester may choose to withdraw the standard request from further consideration prior to acceptance by the NPCC Regional Standards Committee.

COMMON ATTRIBUTE 11

Any standard request that is accepted by the NPCC Regional Standards Committee for development of a standard (or modification or deletion of an existing standard) shall be posted for public viewing on the NPCC website within [no greater than 30] days of acceptance by the committee.

COMMON ATTRIBUTE 12

The standards process manager shall submit the proposed members of the drafting team to the NPCC Regional Standards Committee. The NPCC Regional Standards Committee shall approve the drafting team membership within 60 days of accepting a standard request for development, modifying the recommendations of the standards process manager as the committee deems appropriate, and assign development of the proposed standard to the drafting team.

COMMON ATTRIBUTE 13

At the direction from the NPCC Regional Standards Committee, the NPCC standards process manager shall facilitate the posting of the draft standard on the [Regional Entity Name](#)NPCC website, along with a draft implementation plan and supporting documents, for a no less than a [30]-day comment period. The [NPCC](#) standards process manager shall provide notice to

~~{Regional Entity Name}NPCC~~ stakeholders and other potentially interested entities, both within and outside of the ~~{Regional Entity Name}NPCC~~ area, of the posting using communication procedures then currently in effect or by other means as deemed appropriate.

COMMON ATTRIBUTE 14

The drafting team shall prepare a summary of the comments received and the changes made to the proposed standard as a result of these comments. The drafting team shall summarize comments that were rejected by the drafting team and the reason(s) that these comments were rejected, in part or whole. The summary, along with a response to each comment received will be posted on the ~~{Regional Entity Name}NPCC~~ website no later than the next posting of the proposed standard.

COMMON ATTRIBUTE 15

Upon recommendation of the drafting team, and if the ~~{standards} committee~~NPCC Regional Standards Committee concurs that all of the requirements for development of the standard have been met, the standards process manager shall post the proposed standard and implementation plan for ballot and shall announce the vote to approve the standard, including when the vote will be conducted and the method for voting. Once the notice for a vote has been issued, no substantive modifications may be made to the proposed standard unless the revisions are posted and a new notice of the vote is issued.

COMMON ATTRIBUTE 16

The NPCC standards process manager shall schedule a vote by the ~~{Regional Entity Name} {NPCC Regional Standards Committee} registered ballot body~~{standards} committee. The vote shall commence no sooner than [15] days and no later than [30] days following the issuance of the notice for the vote.

COMMON ATTRIBUTE 17

~~{Alternative 17A: For an RE that chooses to vote using a balanced stakeholder committee.}~~

~~The {standards} committee shall give due consideration to the work of the drafting team, as well as the comments of stakeholders and minority objections, in approving a proposed regional~~

~~reliability standard for submittal to the [Regional Entity Name] board. The [standards] committee may vote to approve or not approve the standard. Alternatively, the [standards] committee may remand the standard to the drafting team for further work or form a new drafting team for that purpose.~~

~~[Alternative 17B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]~~

The ~~[Regional Entity Name]~~NPCC registered ballot body shall be able to vote on the proposed standard during a period of ~~[not less than 10]~~ days.

COMMON ATTRIBUTE 18

~~[Alternative 18A: For an RE that chooses to vote using a balanced stakeholder committee.]~~

~~The [standards] committee may not itself modify the standard without issuing a new notice to stakeholders regarding a vote of the modified standard.~~

~~[Alternative 18B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]~~

All members of ~~[Regional Entity Name]~~NPCC are eligible to participate in voting on proposed new standards, standard revisions or standard deletions. [Alternatively: Each standard action requires formation of a ballot pool of interested members of the registered ballot body.]

COMMON ATTRIBUTE 19

~~[Alternative 19A: For an RE that chooses to vote using a balanced stakeholder committee.]~~

~~Actions by the committee shall be recorded in the regular minutes of the committee.~~

~~[Alternative 19B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]~~

Approval of the proposed regional reliability standard shall require a [two thirds] majority in the affirmative (affirmative votes divided by the sum of affirmative and negative votes). Abstentions and non-responses shall not count toward the results, except that abstentions may be used in the determination of a quorum. A quorum shall mean [XX%] of the members of the [registered ballot body/ballot pool] submitted a ballot.

COMMON ATTRIBUTE 20

Under no circumstances may the board substantively modify the proposed regional reliability standard.

COMMON ATTRIBUTE 21

Once a regional reliability standard is approved by the [NPCC](#) board, the standard will be submitted to NERC for approval and filing with FERC [and applicable authorities in Canada and Mexico.]

COMMON ATTRIBUTE 22

- **Open** - Participation in the development of a regional reliability standard shall be open to all organizations that are directly and materially affected by the [\[Regional Entity Name\]NPCC](#) bulk power system reliability. There shall be no undue financial barriers to participation. Participation shall not be conditioned upon membership in [\[Regional Entity Name\]NPCC](#), and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements. Meetings of drafting teams shall be open to the [\[Regional Entity Name\]NPCC](#) members and others.

COMMON ATTRIBUTE 23

- **Balanced** - The [\[Regional Entity Name\]NPCC](#) standards development process strives to have an appropriate balance of interests and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter.

COMMON ATTRIBUTE 24

- **Inclusive** — Any entity (person, organization, company, government agency, individual, etc.) with a direct and material interest in the bulk power system in the [\[Regional Entity Name\]NPCC](#) area shall have a right to participate by: a) expressing a position and its basis, b) having that position considered, and c) having the right to appeal.

COMMON ATTRIBUTE 25

- **Fair due process** — The regional reliability standards development procedure shall provide for reasonable notice and opportunity for public comment. At a minimum, the procedure shall include public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of interested stakeholders.

COMMON ATTRIBUTE 26

- **Transparent** — All actions material to the development of regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the [regional entity's](#) Web site.

COMMON ATTRIBUTE 27

- Does not unnecessarily delay development of the proposed reliability standard.

COMMON ATTRIBUTE 28

Each standard shall enable or support one or more of the reliability principles, thereby ensuring that each standard serves a purpose in support of the reliability of the regional bulk power system. Each standard shall also be consistent with all of the reliability principles, thereby ensuring that no standard undermines reliability through an unintended consequence.

COMMON ATTRIBUTE 29

While reliability standards are intended to promote reliability, they must at the same time accommodate competitive electricity markets. Reliability is a necessity for electricity markets, and robust electricity markets can support reliability. Recognizing that bulk power system reliability and electricity markets are inseparable and mutually interdependent, all regional reliability standards shall be consistent with NERC's market interface principles. Consideration of the market interface principles is intended to ensure that standards are written such that they achieve their reliability objective without causing undue restrictions or adverse impacts on competitive electricity markets.

COMMON ATTRIBUTE 30

To ensure uniformity of regional reliability standards, a regional reliability standard shall consist of the elements identified in this section of the procedure. These elements are intended to apply a systematic discipline in the development and revision of standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

COMMON ATTRIBUTE 31

All mandatory requirements of a regional reliability standard shall be within the standard. Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself.

COMMON ATTRIBUTE 32

Applicability	<p>Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions.</p> <p>If not applicable to the entire [Regional Entity Name]NPCC area, then a clear identification of the portion of the bulk power system to which the standard applies. Any limitation on the applicability of the standard based on electric facility requirements should be described.</p>
----------------------	--

COMMON ATTRIBUTE 33

Measure(s)	<p>Each requirement shall be addressed by one or more measures. Measures are used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure will identify to whom the measure applies and the expected level of performance or outcomes required demonstrating compliance. Each measure shall be tangible, practical, and as objective as is practical. It is important to realize that measures are proxies to assess required performance or outcomes. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.</p>
-------------------	---

COMMON ATTRIBUTE 34

Compliance Monitoring Process	<p>Defines for each measure:</p> <ul style="list-style-type: none">• The specific data or information that is required to measure performance or outcomes.
--------------------------------------	--

	<p><u>2.</u>• The entity that is responsible for providing the data or information for measuring performance or outcomes.</p> <p><u>3.</u>• The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes.</p> <p><u>4.</u>• The entity that is responsible for evaluating data or information to assess performance or outcomes.</p> <p><u>5.</u>• The time period in which performance or outcomes is measured, evaluated, and then reset.</p> <p><u>6.</u>• Measurement data retention requirements and assignment of responsibility for data archiving.</p>

III. APPENDIX	
A) RSAR FORM	19

I. EXECUTIVE SUMMARY

The purpose of the Northeast Power Coordinating Council, Inc. ("NPCC"), is to enhance the reliability of the international, interconnected bulk power system in Northeastern North America through the development of more stringent and specific regional reliability standards and compliance assessment and enforcement of continent-wide and regional reliability standards pursuant to the execution and implementation of a Regional Delegation Agreement with the Electric Reliability Organization ("ERO") and applicable Canadian Memoranda of Understanding that are backstopped by the Federal Energy Regulatory Commission ("FERC") and Canadian Provincial authorities. In the development and enforcement of Regional Reliability Standards, NPCC, to the extent possible, facilitates attainment of fair, effective, efficient, and competitive electric markets.

General Membership in NPCC is voluntary and is open to any person or entity, including any entity participating in the Registered Ballot Body of the ERO that has an interest in the reliable operation of the Northeastern North American bulk power system.

The NPCC Regional Reliability Standards Development Procedure describes the procedures, policies and practices implemented to ensure an "open, fair, and inclusive" process for the transparent initiation, development, implementation and revision of NPCC Regional Reliability Standards necessary for the reliable operation of the international and interconnected bulk power system in Northeast North America. These Standards will, in all cases, not be inconsistent with or less stringent than any requirements of the North American Electric Reliability Council/Electric Reliability Organization (NERC/ERO) Reliability Standards. The procedure will not unnecessarily delay the development of the proposed reliability standards. Each regional reliability standard shall enable or support one or more of the reliability principles, thereby ensuring that each standard serves a purpose in support of the reliability of the regional bulk power system. Each standard shall also be consistent with all of pertinent reliability principles and criteria, thereby ensuring that no standard undermines reliability through an unintended consequence.

II. REGIONAL RELIABILITY STANDARD DEVELOPMENT PROCEDURE

1. CHARACTERISTIC ATTRIBUTES

The NPCC Regional Reliability Standards Development Procedure is:

- **Open** — The NPCC Regional Reliability Standards Development Procedure provides any person the ability to participate in the development of a standard. Any entity that is directly and materially affected by the reliability of the NPCC's bulk power system has the ability to participate in the development and approval of reliability standards. There are no undue financial barriers to participation. Participation in the open comment process is not conditional upon membership in the ERO, NPCC or any organization, and participation is not unreasonably restricted on the basis of technical qualifications or other such requirements. NPCC utilizes a website to accomplish this. Online posting and review of standards and the real time sharing of comments uploaded to the website allow complete transparency.

- **Inclusive** — The NPCC Regional Reliability Standards Development Procedure provides any person with a direct and material interest the right to participate by expressing an opinion and its basis, have that position considered, and appealed through an established appeals process if adversely affected.
- **Balanced** — The NPCC Regional Reliability Standards Development Procedure has a balance of interests and all those entities that are directly and materially affected by the reliability of the NPCC's bulk power system are welcome to participate and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter. This will be accomplished through the NPCC Bylaws defining eight sectors (categories) for voting.
- **Fair Due Process** — The NPCC Regional Reliability Standards Development Procedure provides for reasonable notice and opportunity for public comment. The procedure includes public notice of the intent to develop a standard, a 45 calendar day public comment period on the proposed standard request, or standard with due consideration of those public comments, and responses to those comments will be posted on the NPCC website. A final draft will be posted for a 30 calendar day pre-balloting period, and then a ballot of NPCC Members will be conducted. Upon approval by the NPCC Members, the NPCC Board then votes to approve submittal of the Regional Standard to NERC.
- **Transparent** — All actions material to the development of Regional Reliability Standards are transparent and information regarding the progress is posted on the NPCC website as well as through extensive email lists.

In as much as NPCC is one of several regional entities within the Eastern Interconnection of North America, there will be **no presumption of validity** by the ERO for any NPCC Regional Reliability Standard. In order to receive the approval of the ERO, the NPCC Reliability Standards Development Process must also achieve the following objectives:

- **No Adverse Impact on Reliability of the Interconnection** —An NPCC Regional Reliability Standard provides a level of bulk power system reliability that is necessary and adequate to protect public health, safety, welfare, and North American security and will not have an adverse impact on the reliability of the Interconnection or other Regions within the Interconnection.
- **Justifiable Difference** — An NPCC Regional Reliability Standard is based on justifiable differences between Regions, such as different electrical systems or facilities, sensitivity of load to disruptions, sensitivity of generation to disruptions, frequency and voltage sensitivity, system operating limit development and facilities ratings process, electrical system interactions, etc.
- **Uniformity**- NPCC Regional Reliability Standards shall provide for as much uniformity as possible with reliability standards across the interconnected bulk

power system of the North American continent. A NPCC Reliability Standard shall be more stringent than a continent-wide reliability standard, may include a regional variation that addresses matters that the continent-wide reliability standard does not, or shall be a regional difference necessitated by a physical difference in the northeast's bulk power system, where the interpretation of the phrase "physical difference" will be consistent with FERC's Order, issued September 22, 2004, Granting Request For Clarification regarding Docket No. PL04-5-000, Policy Statement on Matters Related to Bulk Power System Reliability.

- **No Undue Adverse Impact on Commerce** — An NPCC Regional Reliability Standard will not cause any undue adverse impact on business activities that are not necessary for reliability of the Region and its interconnected Regions. All regional reliability standards shall be consistent with NERC's market principles.

Other Attributes of the NPCC Regional Reliability Standards Development Procedure include;

- **Maintenance of Regional Reliability Standards**-NPCC Regional Standards will be reviewed for possible revision at least every three years and follow the same process as a new standard. The old standard will remain in place until such time as the revised version has passed through the entire process, at which point the old standard will be retired in accordance with any applicable new implementation plan associated with the approved revised standard. The review process shall be conducted by soliciting comments from the stakeholders and through open posting on the NPCC website. If no changes are warranted, Regional Standards Committee (RSC) shall recommend to the NPCC Board that the standard be reaffirmed. If the review indicates a need to revise or withdraw a standard, a regional standard authorization request shall be prepared by the RSC and submitted in accordance with the standards development process contained in this procedure.
- **Maintenance of Regional Reliability Standards Development Procedure**-This NPCC Regional Reliability Standards Development Procedure will be reviewed for possible revision at least once every five years or more frequently if needed and subject to the same procedure as that of the development of a standard. All such revisions shall be subject to approval by the NPCC Board, NERC, FERC, and could be subject to approval, if required, by applicable authorities in Canada. The NPCC RSC has the authority to make non-substantive changes to this procedure and subsequently notify the NPCC Board for their concurrence at their next scheduled meeting.
- **Interpretation of Standards**- All persons who are directly and materially affected by the NPCC's bulk power system reliability shall be permitted to request an interpretation of a standard. The person requesting an interpretation will send an email request to the Regional Standards Process Manager (RSPM), as noted on the NPCC website, explaining the specific circumstances surrounding the request and what clarifications are required as applied to those circumstances. The request should indicate the material

impact to the requesting party or others caused by the lack of clarity or a possibly incorrect interpretation of the standard. The RSPM along with guidance from the RSC will forward the request to the originating Task Force which acted as the drafting team for that regional reliability standard. The Task Force will address, through a written response, the request for clarification as soon as practical, but not more than 45 business days from its receipt by the Task Force. This written interpretation will be posted along with the final approved and adopted standard and will stand until such time as the standard is revised through the normal RSAR process, at which time the standard will be modified to incorporate the clarifications provided by the interpretation.

2. ELEMENTS OF A RELIABILITY STANDARD

- **Elements of a Regional Reliability Standard**

To ensure uniformity of regional reliability standards, a regional reliability standard shall consist of the elements identified in this section of the procedure. These elements are intended to apply a systematic discipline in the development and revision of standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

All mandatory requirements of a regional reliability standard shall be within the standard document. Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself.

The most current version of the approved NERC Reliability Standard template and its associated elements as or if applicable, will be used at the time of the development of the NPCC Regional Reliability Standard to ensure all essential elements are contained therein to achieve consistency and uniformity and meet all statutory requirements. A sample of the elements contained in the standard appears in Table 1 below, however the latest ERO Board approved Standard template, that may be found on the NERC website, will supersede the list below at the time the regional standard is developed.

Table 1- Elements of a Regional Reliability Standard

Identification Number	A unique identification number assigned in accordance with an administrative classification system to facilitate tracking and reference. (i.e. “NPCC- BAL-002-0-Date” which refers to NPCC Regional Standard, referencing NERC BAL-002 Version 0, with NPCC Effective Date-final adoption by all Regional Authorities)
Title	A brief, descriptive phrase identifying the topic of the standard.
Applicability	Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions. The standard will be applicable to the Bulk Power System unless otherwise noted.
Effective Date	The effective date of the standard or, prior to approval of the

and Status	standard, the proposed effective date.
Purpose	The purpose of the standard. The purpose shall explicitly state what outcome will be achieved or is expected by this standard.
Requirement(s)	Explicitly stated technical, performance, and preparedness requirements. Each requirement identifies what entity is responsible and what action is to be performed or what outcome is to be achieved. Each statement in the requirements section shall be a statement for which compliance is mandatory.
Risk Factor(s)	<p>The potential reliability significance of each requirement, designated as a High, Medium, or Lower Risk Factor in accordance with the criteria listed below:</p> <p>A High Risk Factor requirement (a) is one that, if violated, could directly cause or contribute to bulk power system instability, separation, or a cascading sequence of failures, or could place the bulk power system at an unacceptable risk of instability, separation, or cascading failures; or (b) is a requirement in a planning timeframe that, if violated, could, under emergency, abnormal, or restorative conditions anticipated by the preparations, directly cause or contribute to bulk power system instability, separation, or a cascading sequence of failures, or could place the bulk power system at an unacceptable risk of instability, separation, or cascading failures, or could hinder restoration to a normal condition.</p> <p>A Medium Risk Factor requirement (a) is a requirement that, if violated, could directly affect the electrical state or the capability of the bulk power system, or the ability to effectively monitor and control the bulk power system, but is unlikely to lead to bulk power system instability, separation, or cascading failures; or (b) is a requirement in a planning timeframe that, if violated, could, under emergency, abnormal, or restorative conditions anticipated by the preparations, directly affect the electrical state or capability of the bulk power system, or the ability to effectively monitor, control, or restore the bulk power system, but is unlikely, under emergency, abnormal, or restoration conditions anticipated by the preparations, to lead to bulk power system instability, separation, or cascading failures, nor to hinder restoration to a normal condition.</p> <p>A Lower Risk Factor requirement is administrative in nature and (a) is a requirement that, if violated, would not be expected to affect the electrical state or capability of the bulk power system, or the ability to effectively monitor and control the bulk power system; or (b) is a requirement in a planning time frame that, if violated, would not, under the emergency, abnormal, or restorative conditions anticipated by the preparations, be expected to affect the electrical state or capability of the bulk power system, or the ability to effectively monitor, control, or restore the bulk power system.</p>

Measure(s)	Each requirement shall be addressed by one or more measures. Measures are used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure will identify to whom the measure applies and the expected level of performance or outcomes required demonstrating compliance. Each measure shall be tangible, practical, and as objective as is practical. It is important to realize that measures are proxies to assess required performance or outcomes. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.
-------------------	--

Table 2 — Compliance Elements of a Regional Reliability Standard

Compliance Monitoring Process	<p>Defines for each measure:</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible for providing the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes. • The entity that is responsible for evaluating data or information to assess performance or outcomes. • The time period in which performance or outcomes is measured, evaluated, and then reset. • Measurement data retention requirements and assignment of responsibility for data archiving. • Violation severity levels.
--------------------------------------	--

Supporting Information Elements

Interpretation	Any interpretation of regional reliability standard that is developed and approved in accordance with the “Interpretation of Standards” section of Appendix A of this procedure, to expound on the application of the standard for unusual or unique situations or to provide clarifications.
Implementation Plan	Each regional reliability standard shall have an associated implementation plan describing the effective date of the standard or effective dates if there is a phased implementation. The implementation plan may also describe the implementation of the standard in the compliance program and other considerations in the initial use of the standard, such as necessary tools, training, etc. The implementation plan must be posted for at least one public comment period and is approved as part of the ballot of the standard.

<p>Supporting References</p>	<p>This section references related documents that support reasons for, or otherwise provide additional information related to the regional reliability standard. Examples include, but are not limited to:</p> <ul style="list-style-type: none"> • Glossary of terms • Developmental history of the standard and prior versions • Notes pertaining to implementation or compliance • Standard references • Standard supplements • Procedures • Practices • Training references • Technical references • White papers • Internet links to related information
-------------------------------------	--

3. TERMS AND FUNCTIONS

- **Regional Standards Committee (RSC)**—An NPCC committee charged with management of the NPCC Standards Procedure under a sector based voting structure as described in the NPCC Bylaws. The NPCC RSC will consider requests for new or revised standards and be available for advisement to the NPCC Board on the standards.

The RSC may not itself modify the standard without issuing a new notice to stakeholders regarding a vote of the modified standard. Any RSC action will only be activated in the event of a minor correction of a standard such as errata.

The RSC is an open and balanced stakeholder committee inclusive of all stakeholder interests that provide for or are materially impacted by the reliability of the bulk power system.

The RSC disposition regarding the regional standard authorization request, which will in all cases be within 60 calendar days of receipt of a completed standard request, shall include:

- Accept the standard request as a candidate for development of a new standard, revision of an existing standard, or deletion of an existing standard. The RSC may, at its discretion, expand or narrow the scope of the standard request under consideration. The RSC shall prioritize the development of standards in relation to other proposed standards, as may be required based on the volume of requests and resources.

- Reject the standard request. If the RSC rejects a standard request, a written explanation for rejection will be delivered to the requester within 30 calendar days of the decision.
- Remand the standard request back to the requester for additional work. The standards process manager will make reasonable efforts to assist the requester in addressing the deficiencies identified by the RSC. The requester may then resubmit the modified standard request using the process above. The requester may choose to withdraw the standard request from further consideration prior to acceptance by the RSC.

The NPCC Standard Process responsibilities of the RSC will include:

- Review of NPCC Draft Standards for such factors as completeness, sufficient detail, rational result, and compatibility with existing standards; clarifying standard development issues not specified in this procedure. Under no circumstance will the RSC change the substance of a draft standard.
 - Due consideration to the work of the drafting team as well as the comments of stakeholders and minority objections, in approving a proposed regional reliability standard to go to ballot.
 - Approve standards for pre-ballot posting under a sector based voting structure as described later in the NPCC ~~Inc.~~ Bylaws or
 - Remand the standard back to the Task Force acting as the drafting team for further work or recommend a change in those participating in the drafting team (i.e. a new drafting team).
- **Regional Standards Process Manager (RSPM)** - The Regional Reliability Standards Procedure shall be administered by a NPCC staff Regional Standards Process Manager. The RSPM is responsible for ensuring that the development and revision of standards is in accordance with this manual. The RSPM works to ensure the integrity of the process, format, consistency of quality, and completeness of the reliability standards. The RSPM facilitates all steps in the process.
 - **Reliability Coordinating Committee (RCC)** —The RCC, will support the standards development process through the assignment of NPCC Task Forces. They will also provide a technical advisory role in the Regional Reliability Standards development procedure through recommendations.
 - **Requester**— A Requester is any individual or an entity (organization, company, government authority, etc.) that submits a complete request for development, revision, or withdrawal of a standard. Any person or an entity that is directly and materially affected by an existing standard or the need for a new standard may submit a request for a new standard or revision to a standard. The Requester is assisted by the RSAR drafting team (if one is appointed by the RSC) to respond to comments and to decide if and when the RSAR is forwarded to the RSC with a request to draft a standard. The Requester is responsible for the RSAR, assisted by the RSAR drafting team and Regional Standards Process Manager, until such time the RSC authorizes

development of the standard. The Requester has the option at any time to allow the RSAR drafting team to assume full responsibility for the RSAR. The Requester may chose to participate in subsequent standard drafting efforts related to the RSAR.

- **Task Forces and Working Groups**,—The committees, task forces and working groups within NPCC , serve an active role in the standards process:
 - Identify the need for new or modified regional standards.
 - Initiate NPCC Standards actions by developing Regional Standard Authorization Requests (RSARs).
 - Develop comments (views and objections) to standards actions.
 - Participate in NPCC Standard drafting.
 - Provide technical oversight in response to changing industry conditions and ERO Requirements.
 - Conduct Field Tests as required

4. PROCEDURE DESCRIPTION

STEPS 1 AND 2: REQUEST TO DEVELOP A NEW REGIONAL STANDARD

Requests to develop a new Regional Reliability Standard shall be submitted to the RSPM by completing a **Regional Standard Authorization Request (RSAR)** (*see Appendix A*). The RSAR is a description of the new or revised standard in sufficient detail to clearly define the scope, purpose, and importance of the Regional Standard, impacted parties or other relevant information. A “needs” statement will provide the justification for the development of the standard, including an assessment of the reliability and market interface impacts of implementing or not implementing the standard. The RSPM shall maintain the RSAR form and make it available electronically on the NPCC website.

Any person or entity (“Requester”) directly or materially affected by an existing standard or the need for a new or revised standard may initiate a RSAR.

The Requester will submit the RSAR to the RSPM electronically and the RSPM will acknowledge receipt of the RSAR immediately, through electronic receipt. The RSAR, as a minimum, needs to contain the following information in order to be qualified for consideration. The NPCC RSPM will assist the Requester to ensure all the following information is submitted (on the RSAR) in a form appearing in Appendix A:

1. Proposed Title and Date of New RSAR
2. Requester’s Name and Contact Information
3. Purpose of the Regional Standard
4. Description of Industry Need
5. Provide a Brief Description of the Standard
6. Identification of the Entities in the Functional Model as being responsible to adhere to the standard.
7. Necessary information to assist the drafting the team, to the extent feasible, to allow them to draft the standard.
8. A cross references to existing NPCC or NERC documents

The RSPM shall forward all properly completed RSARs to the RSC. The RSC shall meet at established intervals to review all pending RSARs. The frequency of this review process will depend on workload, but in no case shall a properly completed RSAR wait for RSC action more than 60 calendar days from the date of receipt. The RSC may take one of the following actions:

- Remand the RSAR back to the RSPM for additional work. In this case, the RSPM may request additional information or clarification for the RSAR from the Requester.
- Accept the RSAR as a candidate for a new or revised standard. In this case, the RSC will forward the RSAR to the RCC to assign a NPCC Task Force to provide technical support and analysis of comments for that RSAR, and assist the Requester and the RSPM in the remaining steps of the process. The RSPM shall post notification of intent to develop a standard on both NPCC and ERO websites within 30 calendar days of acceptance.
- Reject the RSAR. In this case, the RSC will provide a written explanation for rejection to the Requester within 30 calendar days of the rejection decision.

STEPS 3, 4, AND 5: RSC ACCEPTS RSAR AND RCC ASSIGNS TF TO DRAFT NEW OR REVISED STANDARD

A RSAR that is accepted by the RSC will be submitted to the RCC. Within 60 calendar days the RCC shall assign the development of the standard to a Task Force Drafting Team. The RSPM shall solicit and recommend a list of additional candidates for appointment to the team and shall submit the list to the RSC. This list shall include the Requester. The RSC may select other individuals to serve, with the Task Force to draft the Standard. This team shall consist of a small group of people who collectively have the necessary technical expertise and work process skills.

The RSPM shall assign NPCC staff personnel to assist in the drafting of the standard including compliance measure, process and elements. The drafting of measures and compliance administration aspects of the standard will be coordinated with the Compliance Program.

STEP 6: SOLICIT PUBLIC COMMENTS ON DRAFT STANDARD

Once a draft standard has been verified by the RSC to be within the scope and purpose of the RSAR, the RSPM will post the draft standard for the purpose of soliciting public comments. The posting of the draft standard will be linked to the RSAR for reference. In addition to the standard, an implementation plan shall be posted to provide additional details to the public and aid in their commenting and decision process. Comments on the draft standard will be accepted for a 45 calendar day period from the public notice of posting. Comments will be accepted on-line using the NPCC Open Process web-based application.

Final draft standards will be concurrently posted on the ERO website for comments.

STEPS 7, 8, AND 9: OPEN PROCESS POSTING AND ANALYSIS OF THE COMMENTS

The RSPM will assemble the comments on the new draft standard and distribute those comments to the Task Force acting as the standard drafting team. The Task Force shall give prompt consideration to the written views and comments of all participants. An effort to address all expressed comments shall be made, and each commenter shall be advised of the disposition of the comment and the reasons therefore, in addition to public posting of the responses.

The Task Force acting as the Standard Drafting Team shall take one of the following actions:

- Submit the draft standard for RCC endorsement as it stands, along with the comments received and responses to the comments. Based on the comments received, the Task Force acting as the standard drafting team may include revisions that are not substantive. A substantive change is one that directly and materially affects the application of the standard, including, for example: changing “shall” to “should,” changing “should” to “shall”; adding, deleting, or revising requirements; or adding, deleting, or revising measures for which compliance is mandatory.
- Make substantive revisions to the draft standard and reposts it for further open review and comment.
- Task Force recommends Field Test if necessary to RSC.

Requester also may withdraw the request for a standard.

RCC submits proposed RRS to the RSC along with its recommendation based on comments, Task Force statements and any field test results.

STEPS 10 AND 11: RSC APPROVES OF THE NEW OR REVISED STANDARD FOR POSTING

If the RSC, acting with consideration of any recommendations by the RCC and utilizing the composite sector voting structure, as outlined in the NPCC, votes to post the draft standard for approval, the draft standard, all comments received, and the responses to those comments shall be posted electronically for the NPCC Members, by the RSPM and made public through the NPCC Website (www.npcc.org) for a 30 calendar day “pre-ballot review” and request for balloting. If the RSC decides more work is needed, the draft standard will be remanded back to the drafting Task Force. All actions of the RCC, Task Forces acting as drafting teams and the Regional Standards Committee will be recorded in regular minutes of the group(s) and posted on the NPCC website. Once the notice for a ballot has been issued, no substantive modifications may be made to the proposed standard unless the revisions are posted and a new notice of the vote is issued

STEPS 12, 13 AND 14: BALLOT OF STANDARD

Upon notification of a ballot, the Members of NPCC’s registered ballot body will cast their vote consistent with the NPCC Bylaws. This ballot shall commence no sooner than 15 calendar days and no later than 30 calendar days following the notification of ballot. All members of the NPCC are eligible to participate in the voting on proposed, standard revisions or deletions of regional standards. The ballot period will typically begin immediately following the 30 calendar day pre-ballot posting and will last at least 10 business days.

The NPCC registered ballot body comprises all entities or individuals that qualify for one of the eight NPCC stakeholder sectors and are registered with NPCC as potential Exhibit C – Amended and Restated NPCC Regional Delegation Agreement

Approved by FERC Effective January 3, 2009

ballot participants in the voting on standards. Each member of the NPCC registered ballot body is eligible to vote on standards.

In order for a NPCC Regional Standard to be approved;

- A quorum must be established by at least 50% of the NPCC Members of at least 60% of the Voting Sectors on the roster of Members maintained by NPCC.
- A two-thirds majority of the total weighted sector votes cast must be affirmative. The number of votes cast is the sum of affirmative and negative votes, excluding abstentions, and non-responses. Weighted sector vote will be calculated as follows;
 - Affirmative votes cast in each sector will be divided by the sum of affirmative and negative votes cast, in that same sector, to determine the fractional affirmative vote for each sector. Abstentions and non-responses will not be counted for the purposes of determining the fractional affirmative vote for a sector.
 - The sum of the fractional affirmative votes from all sectors divided by the number of sectors voting will be used to determine if a two-thirds majority has been achieved. (A sector will be considered as “voting” if any member of the sector in the ballot pool casts either an affirmative or a negative vote.)
 - A standard will be approved if the sum of fractional affirmative votes from all sectors divided by the number of voting sectors is at least 2/3.

Ballots will be cast electronically and alternatives are as follows;

- Affirmative
- Affirmative with Comments
- Negative
- Negative with Comments
- Abstain

The RSPM shall post the final outcome of the ballot process. If the standard is rejected, it may be withdrawn by either the RCC or the original Requester, or the standard may be remanded by the RSC back to the Task Force acting as the drafting team to address the issues. All comments submitted during the process will be posted and archived for consideration when redrafting the standard upon review.

The standard, once approved by ballot, and a recommendation will be forwarded to the NPCC Board for final Regional approval. The Board may not make substantive modifications to the standard. If the Board does not approve the standard for transmittal to NERC it will be remanded back to the RSC.

If the standard is approved, the standard will be submitted to the NERC/ERO Board of Trustees for approval.

STEPS 15, 16 AND 17: IMPLEMENTATION OF THE NPCC REGIONAL STANDARD

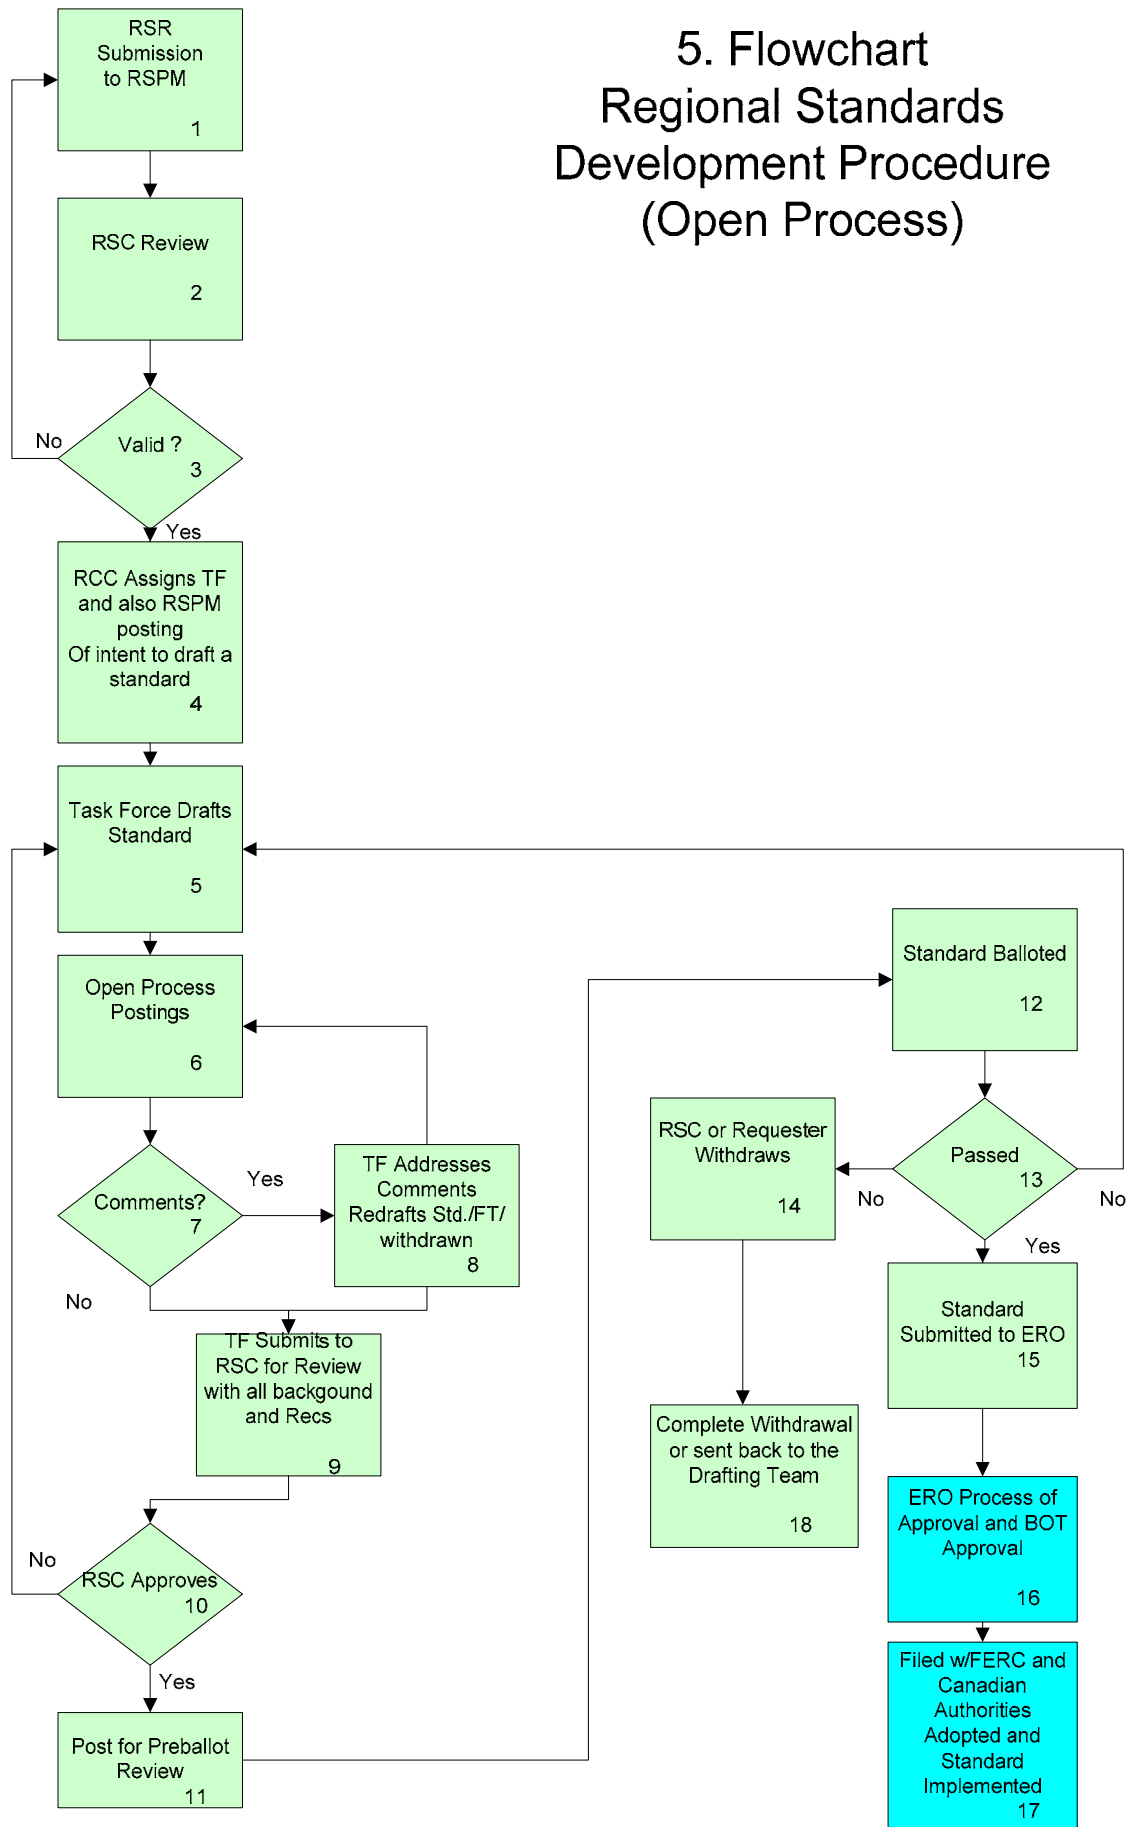

Upon approval within the NPCC , the standard will be submitted to the NERC/ERO for approval(s) and filing with FERC and applicable Canadian Governmental and/or Regulatory Authorities for adoption.

Once a reliability standard is adopted and made effective, all users, owners, planners, and operators of the Bulk Power System in the NPCC geographic area of the Northeast are required to comply with the standard. The NERC/ERO Board of Trustees has established a separate compliance program, also administered in the Northeast by NPCC , to measure compliance with the standards and administer sanctions as appropriate. After adoption of a NPCC Regional Standard, the standard will be forwarded to the compliance program for compliance monitoring and enforcement.

STEP 18: WITHDRAWAL OF STANDARD

Upon rejection of a proposed standard, the RCC or the requester may withdraw the standard completely or remand it back to the Task Force acting as the standard drafting team for further work.

5. Flowchart Regional Standards Development Procedure (Open Process)

6. ERO and Regulatory Process and Approvals

- **NERC/ERO Comment Period** —NERC/ERO shall publicly notice and request comment on the NPCC Regional Reliability Standard, allowing a minimum of 45 calendar days for comment on NERC’s website and actively notify all adjoining Regions. Concurrent with this regional posting, final drafts will be forwarded to NERC for posting on the NERC website to ensure full industry awareness of the standard and expedite and coordinate all commenting. All comments will be responded to electronically through a posted response on the NPCC website or a link on the NERC website. NPCC shall have an opportunity to resolve any objections identified in the comments and may choose to withdraw the request, revise the NPCC Regional Reliability Standard and request another posting for comment, or submit the NPCC Regional Reliability Standard along with a response to any objections received, for approval by NERC.
- **NERC/ERO Approval of NPCC Regional Reliability Standards** — Proposed regional reliability standards shall be subject to approval by the NERC/ERO who shall have a process to evaluate and recommend whether a proposed non-Interconnection-wide NPCC Regional Reliability Standard has been developed in accordance with all applicable procedural requirements and whether NPCC has considered and addressed stakeholder objections. NPCC Board, having been notified of the results of the regional ballot concerning a NPCC Regional Reliability Standard, shall vote to submit the Standard to the NERC/ERO Board for approval as a NERC Reliability Standard. The NERC/ERO Board shall consider NPCC’s request, the scope and implications of the Standard, the recommendation for action on the Standard, any unresolved stakeholder comments, and NPCC’s consideration of comments and unresolved issues if any, in determining whether to approve the NPCC Regional Reliability Standard as a NERC Reliability Standard.
- **Regulatory Authority Approval** — An NPCC Regional Reliability Standard that has been approved by the NERC/ERO board shall be filed with FERC and applicable Canadian Governmental and/or Regulatory Authorities for approval and shall become effective and enforceable within the U.S., per Section 215 of the Federal Power Act, only when adopted by FERC, and within Canada, only when adopted by applicable Canadian Governmental and/or Regulatory Authorities. The regional reliability standard, once adopted will be made part of the body of NERC reliability standards and shall be mandatory and enforceable on all applicable bulk power system owners, operators, and users within the NPCC Region, regardless of membership status.

7. Appeals

- Persons who have directly and materially affected interests and who have been or will be adversely affected by any substantive or procedural action or inaction related to the development, approval, revision, reaffirmation, or withdrawal of a regional reliability standard shall have the right to appeal.

This appeals process applies only to the standards process as defined in this procedure.

The burden of proof to show adverse effect shall be on the appellant. Appeals shall be made within 30 calendar days of the date of the action purported to cause the adverse effect, except appeals for inaction, which may be made at any time. In all cases, the request for appeal must be made prior to the next step in the process.

The final decisions of any appeal shall be documented in writing and made public.

The appeals process provides two levels, with the goal of expeditiously resolving the issue to the satisfaction of the participants:

- Level 1 Appeal

Level 1 is the required first step in the appeals process. The appellant submits a complaint in writing to the RSPM that describes the substantive or procedural action or inaction associated with a reliability standard or the standards process. The appellant describes in the complaint the actual or potential adverse impact to the appellant. Assisted by any necessary staff and committee resources, the RSPM shall prepare a written response addressed to the appellant as soon as practical, but not more than 45 calendar days after receipt of the complaint. If the appellant accepts the response as a satisfactory resolution of the issue, both the complaint and response will be made a part of the public record associated with the standard and posted with the standard.

- Level 2 Appeal

If after the Level 1 Appeal the appellant remains unsatisfied with the resolution, as indicated by the appellant in writing to the regional standards process manager, the RSPM shall convene a Level 2 Appeals Panel. This panel shall consist of five members total appointed by the NPCC's board.

In all cases, Level 2 Appeals Panel members shall have no direct affiliation with the participants in the appeal.

The RSPM shall post the complaint and other relevant materials and provide at least 30 calendar days notice of the meeting of the Level 2 Appeals Panel. In addition to the appellant, any person that is directly and materially affected by the substantive or procedural action or inaction referenced in the complaint shall be heard by the panel. The panel shall not consider any expansion of the scope of the appeal that was not presented in the Level 1 Appeal. The panel may in its decision find for the appellant and remand the issue to the RSC with a statement of the issues and facts in regard to which fair and equitable action was not taken. The panel may find against the appellant with a specific statement of the facts that demonstrate fair and equitable treatment of the appellant and the appellant's objections. The panel may not, however, revise,

approve, disapprove, or adopt a reliability standard. The actions of the Level 2 Appeals Panel shall be publicly posted.

In addition to the foregoing, a procedural objection that has not been resolved may be submitted to the NPCC Board for consideration at the time the board decides whether to adopt a particular reliability standard. The objection must be in writing, signed by an officer of the objecting entity, and contain a concise statement of the relief requested and a clear demonstration of the facts that justify that relief. The objection must be filed no later than 30 calendar days after the announcement of the vote on the standard in question.

APPENDIX A

Information in a Regional Standard Authorization Request (RSAR)

The tables below identify information to be submitted in a Regional Standard Authorization Request to the NPCC Regional Standards Process Manager, NPCCstandard@npcc.org . The NPCC Regional Standards Process Manager shall be responsible for implementing and maintaining this form as needed to support the information requirements of the standards process.

Regional Standard Authorization Request Form

Title of Proposed Standard:
Request Date:

RSAR Requester Information

<i>Name:</i>	RSAR Type (Check box for one of these selections.)	
Company:	<input type="checkbox"/>	New Standard
Telephone:	<input type="checkbox"/>	Revision to Existing Standard
Fax:	<input type="checkbox"/>	Withdrawal of Existing Standard
Email:	<input type="checkbox"/>	Urgent Action

Purpose (Describe the purpose of the proposed standard – what the standard will achieve in support of reliability.)
Industry Need (Provide a detailed statement justifying the need for the proposed standard, along with any supporting documentation.)
Brief Description (Describe the proposed standard in sufficient detail to clearly define the scope in a manner that can be easily understood by others.)

Reliability Functions

The Standard will Apply to the Following Functions (Check all applicable boxes.)		
<input type="checkbox"/>	Reliability Coordinator	The entity that is the highest level of authority who is responsible for the reliable operation of the Bulk Electric System, has the Wide Area view of the Bulk Electric System, and has the operating tools, processes and procedures, including the authority to prevent or mitigate emergency operating situations in both next-day analysis and real-time operations. The Reliability Coordinator has the purview that is broad enough to enable the calculation of Interconnection Reliability Operating Limits, which may be based on the operating parameters of transmission systems beyond any Transmission Operator’s vision.
<input type="checkbox"/>	Balancing Authority	The responsible entity that integrates resource plans ahead of time, maintains load-interchange-generation balance within a Balancing Authority Area, and supports Interconnection frequency in real time.
<input type="checkbox"/>	Interchange Authority	Authorizes valid and balanced Interchange Schedules.
<input type="checkbox"/>	Planning Authority	The responsible entity that coordinates and integrates transmission facility and service plans, resource plans, and protection systems.
<input type="checkbox"/>	Transmission Service Provider	The entity that administers the transmission tariff and provides Transmission Service to Transmission Customers under applicable transmission service agreements.
<input type="checkbox"/>	Transmission Owner	The entity that owns and maintains transmission facilities.
<input type="checkbox"/>	Transmission Operator	The entity responsible for the reliability of its “local” transmission system, and that operates or directs the operations of the transmission facilities.
<input type="checkbox"/>	Transmission Planner	The entity that develops a long-term (generally one year and beyond) plan for the reliability (adequacy) of the interconnected bulk electric transmission systems within its portion of the Planning Authority Area.

<input type="checkbox"/>	Resource Planner	The entity that develops a long-term (generally one year and beyond) plan for the resource adequacy of specific loads (customer demand and energy requirements) within a Planning Authority Area.
<input type="checkbox"/>	Generator Operator	The entity that operates generating unit(s) and performs the functions of supplying energy and Interconnected Operations Services.
<input type="checkbox"/>	Generator Owner	Entity that owns and maintains generating units.
<input type="checkbox"/>	Purchasing-Selling Entity	The entity that purchases or sells, and takes title to, energy, capacity, and Interconnected Operations Services. Purchasing-Selling Entities may be affiliated or unaffiliated merchants and may or may not own generating facilities.
<input type="checkbox"/>	Distribution Provider	Provides and operates the “wires” between the transmission system and the customer.
<input type="checkbox"/>	Load-Serving Entity	Secures energy and transmission service (and related Interconnected Operations Services) to serve the electrical demand and energy requirements of its end-use customers.

Reliability and Market Interface Principles

Applicable Reliability Principles (Check all boxes that apply.)	
<input type="checkbox"/>	1. Interconnected bulk power systems shall be planned and operated in a coordinated manner to perform reliably under normal and abnormal conditions as defined in the NERC Standards.
<input type="checkbox"/>	2. The frequency and voltage of interconnected bulk power systems shall be controlled within defined limits through the balancing of real and reactive power supply and demand.
<input type="checkbox"/>	3. Information necessary for the planning and operation of interconnected bulk power systems shall be made available to those entities responsible for planning and operating the systems reliably.
<input type="checkbox"/>	4. Plans for emergency operation and system restoration of interconnected bulk power systems shall be developed, coordinated, maintained, and implemented.
<input type="checkbox"/>	5. Facilities for communication, monitoring, and control shall be provided, used, and maintained for the reliability of interconnected bulk power systems.
<input type="checkbox"/>	6. Personnel responsible for planning and operating interconnected bulk power systems shall be trained, qualified, and have the responsibility and authority to implement actions.
<input type="checkbox"/>	7. The security of the interconnected bulk power systems shall be assessed, monitored, and maintained on a wide-area basis.
Does the proposed Standard comply with all of the following Market Interface Principles? (Select ‘yes’ or ‘no’ from the drop-down box.)	
Recognizing that reliability is a Common Attribute of a robust North American economy:	
1. A reliability standard shall not give any market participant an unfair competitive advantage. Yes	

2. A reliability standard shall neither mandate nor prohibit any specific market structure. Yes
3. A reliability standard shall not preclude market solutions to achieving compliance with that standard. Yes
4. A reliability standard shall not require the public disclosure of commercially sensitive information. All market participants shall have equal opportunity to access commercially non-sensitive information that is required for compliance with reliability standards. Yes

Detailed Description (Provide enough detail so that an independent entity familiar with the industry could draft a standard based on this description.)

Exhibit D – Compliance Monitoring and Enforcement Program

1.0 Regional Compliance Monitoring and Enforcement Program

1.1 Obligations of NPCC

NPCC will implement the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure (which for purposes of this section 1.0 shall not include Attachment 2, Hearing Procedures), to monitor and enforce compliance with Reliability Standards by the owners, operators, and users within [REGIONAL ENTITY]'s the U.S. portion of NPCC's geographic or electrical boundaries, and such other scope, set forth on Exhibit A of this Agreement, subject to any deviations from the NERC Compliance Monitoring and Enforcement Program described in Section 1.2 below (the "Compliance Program").

1.2 Deviations from the NERC Compliance Monitoring and Enforcement Program

Compliance monitoring and enforcement programs will be implemented within the Canadian portion of NPCC's geographic area, consistent with individual Canadian Provincial Memoranda of Understanding (MOU) or Agreements and Canadian laws. All executed MOU's and Agreements will be provided to NERC as allowable under Canadian law.

2.0 REGIONAL HEARING OF COMPLIANCE MATTERS

[REGIONAL ENTITY]NPCC shall establish and maintain a hearing body with authority to ~~conduct and~~ render decisions in compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan, ~~which shall be either [REGIONAL ENTITY]'s board or a balanced compliance panel.~~ The NPCC Compliance Committee, reporting directly to [REGIONAL ENTITY]'s board. ~~[REGIONAL ENTITY]'s hearing body is [its board]~~ [if not the board, insert the name of the committee or group serving as the hearing body].

[If the hearing body is a compliance panel other than the board, provide here a description of how the NPCC Board, will be responsible for impaneling a Hearing Body, when required. The Hearing Body will consist of five voting members of the ~~compliance panel are selected and~~ NPCC Compliance Committee plus two alternates and business will always be conducted by five voting members as described in the NPCC Hearing Procedure (each member of the Hearing Body will be from a different voting sector). An independent Hearing Officer, who is not a member of the Compliance Committee, the NPCC Board, or NPCC Staff, will conduct the hearing. Committee members who represent the Registered Entity involved in the ~~qualifications~~Hearing cannot participate on the Hearing Body. The Hearing Body will utilize a simple majority vote to ~~be selected for the compliance panel.~~] resolve issues. This voting rule, along with the structure of the Hearing Body,

fully supports the requirement that no two stakeholder sectors may control, and no single stakeholder sector may veto, a matter before the Hearing Body.

~~[REGIONAL ENTITY]~~

⁵ NPCC shall conduct all compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, proposed Mitigation Plan, or a proposed Remedial Action Directive, in accordance with Attachment 2, Hearing Procedures, to the NERC Compliance Monitoring and Enforcement Program, subject to the following deviations, if any: ~~[Describe any deviations, or state "None". If there are deviations from the NERC pro forma Hearing Procedures, [REGIONAL ENTITY]'s Hearing Procedures shall be included as a separate attachment to this Exhibit D.]None~~

3.0 OTHER DECISION-MAKING BODIES

~~If [Regional Entity] uses other decision making bodies within its compliance program, provide here a description of the function of that body to the extent not described elsewhere in the Agreement or exhibits, how the members of that body are selected, and the qualifications to be selected for that body.]~~

NPCC Compliance Staff will be the sole decision making body to review and make final determinations on compliance submittals from Registered Entities related to Self-Certification; Self-Reporting; Exception Reporting; and Periodic Data Submittals. NPCC Compliance Staff will initially review all submittals received to assure that the information forwarded is accurate and complete. This process will be conducted by the staff members and may require contact via e-mail or phone to confirm information. If after, initially receiving a compliance submittal, the Compliance Staff identifies an instance of non-compliance, a Notice of Possible Violation (NOPV), without penalty, is issued to the registered entity and NERC while the Compliance Staff continues its more detailed and comprehensive review of the submittal. It is during this review that the Compliance Staff confirms the violation, calculates an appropriate penalty or sanction and issues a Notice of Confirmed Violation (NOCV).

Exhibit E — Funding

1. Scope of activities funded through the ERO funding mechanism

~~[Regional Entity]~~NPCC shall include in its annual budget submission to NERC amounts for costs it will incur in performing its delegated functions and related activities as described in Sections 5, 6 and 7 of the Agreement. These activities shall include:

- Reliability Standard Development
- Compliance Monitoring and Enforcement
- Organization Registration and Certification
- Reliability Assessment and Performance Analysis (including necessary data gathering activities)
- Event Analysis and Reliability Improvement
- Training and Education
- Situation Awareness
- Infrastructure Security

2. Preparation of Annual Business Plan and Budget

(a) NERC and ~~[Regional Entity]~~NPCC in conjunction with the other Regional Entities, shall collaboratively develop an annual schedule for the development, submission, review and approval of ~~[Regional Entity's]~~NPCC's business plan and budget. The annual schedule for the preparation of business plans and budgets shall require ~~[Regional Entity]~~NPCC (i) to submit to NERC draft(s) of ~~[Regional Entity]'s~~NPCC's proposed business plan and budget and other preliminary documents and information, and (ii) to submit a final proposed business plan and budget that has been approved by ~~[Regional Entity]~~NPCC Board of ~~Trustees~~Directors to NERC by July 1 or such other agreed date as provides sufficient time for NERC's review, approval and submission of ~~[Regional Entity]'s~~NPCC's business plan and budget to the Commission 130 days in advance of the beginning of each fiscal year. The ~~[Regional Entity]~~NPCC business plan and budget submission shall include supporting materials, including ~~[Regional Entity]'s~~NPCC's complete business plan and organization chart, explaining the proposed collection of all assessments, dues, fees and charges, and the proposed expenditure of the funds to be collected in sufficient detail to justify the requested budgeted expenditures and assessments. ~~[Regional Entity]'s~~ NPCC's business plan and budget and proposed assessments shall provide for reasonable reserve mechanisms for unforeseen and extraordinary expenses and other contingencies, consistent with generally accepted accounting principles.

(b) -NERC shall review and approve ~~[Regional Entity]'s~~NPCC's proposed business plan and budget and proposed assessments for performing the delegated functions and related activities described in Sections 5, 6 and 7 of this Agreement and listed above in -Section 1 of this **Exhibit E**, or shall direct ~~[Regional Entity]~~NPCC to make such revisions as NERC deems appropriate prior to approval. NERC shall submit ~~[Regional Entity]'s~~NPCC's approved business plan and budget and proposed assessments to the Commission for approval as part of NERC's overall business plan and budget submission, in accordance with the ERO Regulations.

3. Allocation of Costs

Assessments to fund the costs of ~~[REGIONAL ENTITY]'s~~ NPCC delegated functions and related activities pursuant to the Agreement shall be allocated among all load-serving entities on the basis of Net Energy for Load, unless a different method(s) of allocating and calculating such assessments has been submitted to and approved by NERC and the Commission in accordance with Section 9(b) of the Agreement. ~~[Regional Entity]~~ NPCC shall submit to NERC annually at the same time it submits its budget request a list of the load-serving entities or designees within its geographic boundaries that shall be responsible for paying ~~[Regional Entity's]~~ NPCC's assessment and the load-serving entities' proportionate Net Energy for Load, and such other data and information as is necessary to allocate and calculate the allocation of ~~[Regional Entity's]~~ NPCC's assessment to the load-serving entities or designees under the method(s) of allocation and calculation that will be used.

4. Collection of Funding

~~[IF NERC WILL BILL AND COLLECT ASSESSMENTS DIRECTLY FROM LOAD-SERVING ENTITIES IN REGIONAL ENTITY'S REGION, USE THE FOLLOWING TEXT FOR SECTION 4(a):]~~

(a) NERC shall submit invoices to the load-serving entities or designees identified by ~~[Regional Entity]~~ NPCC covering the NERC and ~~[Regional Entity]~~ NPCC assessments approved for collection.

~~[IF THE REGIONAL ENTITY WILL ACT AS THE BILLING AND COLLECTION AGENT ON BEHALF OF NERC TO BILL AND COLLECT ASSESSMENTS FROM LOAD-SERVING ENTITIES IN REGIONAL ENTITY'S REGION, USE THE FOLLOWING TEXT FOR SECTION 4(a):]~~

~~(a) NERC and [Regional Entity] agree that [Regional Entity] shall act as the billing and collection agent on behalf of NERC to bill and collect [Regional Entity]'s assessments from load-serving entities and designees (or such other entities as agreed by NERC and [Regional Entity]). [Regional Entity] agrees that it shall (i) issue all invoices to load-serving entities and other entities in a prompt and timely manner after receipt from NERC of the information needed to issue the invoices; (ii) exercise commercially reasonable efforts to collect invoices that are not paid as of the due date(s); and (iii) transfer all funds collected to NERC in a timely manner, as follows: Prior to the start of each calendar quarter, and once per week thereafter until all billings for the quarter are collected, [Regional Entity] will electronically transfer to NERC, in immediately available funds, all payments received by [Regional Entity] from load-serving entities or other entities for payment of invoices. On the same day that [Regional Entity] makes each electronic transfer of funds to NERC, [Regional Entity] shall send an e-mail to the Chief Financial Officer or Controller of NERC detailing the~~

~~collections being transmitted, including a listing of the load-serving entities or other entities from which payments were collected and the amount collected from each entity. [Note: If NERC and Regional Entity have a different collection and payment arrangement, the preceding two sentences will be modified accordingly to describe it.]~~

~~[Regional Entity] agrees that it shall not in any way use its position as billing and collection agent for NERC to attempt to influence NERC's policies or decisions on matters relating to adoption of Reliability Standards (including Regional Reliability Standards and Regional Variances), administration of the compliance monitoring and enforcement program and other compliance and enforcement matters, determination and imposition of penalties and sanctions, budgeting matters including review and approval of [Regional Entity's] budgets and business plans, or any other NERC decisions, including by issuing invoices, engaging in collection activities or transferring funds collected to NERC in an untimely manner or other than in accordance with this Agreement.~~

(b) NERC shall pursue any non-payments of assessment amounts and shall request assistance from ERO Governmental Authorities as necessary to secure collection. To the extent reasonably practicable, ~~[Regional Entity]NPCC~~ shall assist NERC in pursuing and collecting any non-payments. Notwithstanding the foregoing, ~~[Regional Entity]NPCC~~ is not responsible and does not assume any liability for recovering non-payments or underpayments of assessment amounts. NERC shall retain sole responsibility for recovering non-payments or underpayments of assessment amounts. NERC shall add the amount of any non-payments by end-users or designees within ~~[REGIONAL ENTITY]'sNPCC~~ region, that are reasonably determined to be uncollectible, to NERC's assessments for a subsequent year with the amount of such non-payments to be allocated to end-users within ~~[Regional Entity]'sNPCC~~ region.

(c) Upon approval by ERO Governmental Authorities of ~~[Regional Entity]'sNPCC~~ annual assessment to fund the costs of its delegated functions and related activities, NERC shall pay ~~[Regional Entity's]NPCC's~~ annual assessment to ~~Regional EntityNPCC~~ in four equal quarterly payments on January 15, April 15, July 15 and October 15 of the budget year.

5. Application of Penalties

Except as otherwise approved by the Commission, all penalty monies received by ~~[Regional Entity],NPCC~~ other than penalty monies received from an operational function or division or affiliated entity of ~~[Regional Entity],NPCC~~ shall be applied as a general offset to ~~[Regional Entity]'sNPCC~~ budget requirements for U.S.-related activities under this Agreement for the subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity. Except as otherwise approved by the Commission, any penalty monies received from an operational function or division or affiliated entity of ~~[Regional Entity]NPCC~~ shall be transmitted to or retained by NERC and shall be used by NERC as a general offset to NERC's budget for its activities as the ERO under the Act for the following year.

6. Budget and Funding for ~~[Regional Entity's]NPCC's~~ Non-Statutory Activities

In addition to its delegated functions and related activities, as specified in Sections 5, 6 and 7 of the Agreement and in Section 1 of this Exhibit E (such delegated functions and activities referred to in this Section 6 as “statutory activities”), ~~[Regional Entity]~~NPCC’s Criteria Services division performs the following other functions and activities (such other functions and activities being referred to in this Section 6 as “non-statutory activities”): ~~[List and describe all non-statutory activities performed by Regional Entity, or state “None”.]~~

~~[Regional Entity]~~

NPCC List of Criteria Services Division Functions (Non-Statutory Activities)

1. Regionally-specific Criteria

- NPCC develops and maintains regionally-specific more stringent criteria
- NPCC develops and maintains criteria establishing resource adequacy requirements within the Region

2. Criteria Compliance Program

- NPCC monitors and assesses compliance with its more stringent regional criteria
- NPCC conducts a Reliability Compliance and Enforcement Program (RCEP) utilizing non-monetary sanctions

NPCC shall employ the following methods and procedures to (i) keep its funding mechanisms for its regional entity division (statutory activities) separate from its funding mechanisms for its criteria services division (non-statutory activities), and (ii) record the costs it incurs in the performance of its non-statutory functions separately from the costs it incurs in the performance of its statutory functions: ~~[List and describe the methods and procedures Regional Entity employs to keep costs and funding of statutory activities separate from costs and funding]~~

1. Funding of NPCC Criteria Services Division (non-statutory activities).- A separate membership based funding mechanism is utilized for non-statutory activities, including at a minimum a description of how Regional Entity’s bank accounts

2. NPCC procedures for separating funding and receivables/payables procedures are set up for both statutory and non-statutory functions, a description of how Regional Entity ensures each employee involved in both statutory and non-statutory functions keeps accurate time records reflecting his/her expenditures for regional entity division (statutory activities, and a description of how Regional Entity’s general and administrative costs are allocated between statutory activities and) and criteria services division (non-statutory activities.-#)

NPCC utilizes the necessary descriptions are lengthy they may be provided in a separate attachment labeled “Attachment E-1”, and state here “See Attachment E-1.” If Regional Entity has listed no non-statutory functions in the preceding paragraph, state here “Not applicable.”]NERC System of Accounts (NSOA) to provide consistency for account codes, divisional separation codes and activity codes. In August of 2007, NPCC CBRE (which prior to the merger performed statutory activities) merged into and with Northeast Power Coordinating Council, Inc. (referred to as NPCC) (which prior to the merger performed non-statutory activities) with the merged corporation having divisional separation for Regional Entity and Criteria Services. As recommended by NERC, NPCC uses the not-for-profit MIP Fund Accounting program by Sage Software to

accurately account for income, time and labor. Effective January 1, 2008, with corporate restructuring of NPCC completed in later 2007, 2008 actual program costs are being charged to appropriate program areas.

~~Regional Entity~~NPCC does not conduct resource or transmission planning, is not an Independent System Operator (ISO), nor does it perform the functions of a Reliability Coordinator (RC). As such, while at this time, there is a breakout for Criteria related activities, all functions performed by NPCC are in the furtherance of NERC's statutory mission and reliability of the international bulk power system in Northeastern North America.

Methodology

NPCC's revenue and expenditure classification methodology identifies appropriate methods of accounting for income, time and costs to ensure that U.S. Federal/statutory and Canadian provincial and/or governmental authorities' agreed upon revenue and expenses are accounted for separately from NPCC's regionally-specific Criteria development and Criteria compliance (non-statutory) income, time and expense.

Division Codes

There are two division codes that are used by NPCC in accounting for revenues and expenses. The codes are as follows:

<u>Division ID</u>	<u>Division Name</u>
<u>RE</u>	<u>Regional Entity – U.S. Statutory and Canadian Regulatory and/or Governmental Authority authorized</u>
<u>CSD</u>	<u>Criteria Services - Non-Statutory</u>

The two division codes allow NPCC to separate Regional Entity statutory activity revenues and expenses from Criteria Services non-statutory activity revenues and expenses. These categories were developed to ensure that non-statutory related revenues and expenses are segregated and accounted for separately from statutory-related revenues and expenses.

Program Codes

As required by NERC, NPCC adopted a financial accounting system consistent with NERC's functional categories. At NPCC, functional categories are referred to as Program Codes.

There are twelve program codes that are used by NPCC in accounting for expenses. The codes are as follows:

<u>Program ID</u>	<u>Program Name</u>
-------------------	---------------------

<u>300</u>	<u>Reliability Standards</u>
<u>400</u>	<u>Compliance Enforcement and Organization Registration and Certification</u>
<u>800</u>	<u>Reliability Assessment and Performance Analysis</u>
<u>700</u>	<u>Reliability Readiness Evaluation and Improvement</u>
<u>900</u>	<u>Training and Education</u>
<u>1000</u>	<u>Situational Awareness and Infrastructure Security</u>
<u>ADMIN</u>	<u>General Administration</u>
<u>FINANCE</u>	<u>Accounting and Finance</u>
<u>HR</u>	<u>Human Resources</u>
<u>IT</u>	<u>Information Technology</u>
<u>LEGAL</u>	<u>Legal and Regulatory</u>
<u>MEMBERS</u>	<u>Members Forum</u>

Program codes are used to further delineate expenses into functional groupings that are assigned to program heads. NPCC staff utilize their assigned program codes (the program where they reside for payroll purposes) when coding expenses, unless otherwise authorized by management.

When time is spent in support of both statutory activities and non-statutory activities (applicable to a limited number of employees in the Administrative Services functions of General Administration, Accounting and Finance, Human resources, Information Technology, Legal and Regulatory and Members Forms), staff members develop accurate timesheet allocations between division codes.

Divisional separation with regard to statutory activities (Regional Entity division) and non-statutory activities (Criteria Services division) is reflected in the NPCC balance sheet and general ledger through the MIP Fund Accounting software programs.

NPCC shall provide its budget for such non-statutory activities to NERC at the same time that ~~[Regional Entity]NPCC~~ submits its ~~proposed annual business plan and budget for statutory activities~~ request to NERC pursuant to Section 9 of the Agreement. ~~[Regional Entity's]~~. NPCC's budget for non-statutory activities that is provided to NERC shall contain a detailed list of ~~[Regional Entity's]NPCC's~~ non-statutory activities and a description of the funding sources for the non-statutory activities. ~~[Regional Entity] NPCC~~ agrees that no costs ~~(which shall include a~~

~~reasonable allocation of [Regional Entity]'s general and administrative costs)~~ of non-statutory activities are to be included in the calculation of ~~[Regional Entity's] assessments, dues, fees, and other~~ NPCC's charges for its ~~statutory~~ activities pursuant to this Agreement.

7. Amended or Supplemental Business Plans and Budgets

During the course of the fiscal year, if ~~[Regional Entity]NPCC~~ determines it does not or will not have sufficient funds to carry out its delegated functions and related activities, ~~[Regional Entity]NPCC~~ shall submit to NERC one or more proposed amended or supplemental business plans and budgets and requests for approval of supplemental assessments, reflecting costs, cost increases or funding shortfalls not provided for in ~~[Regional Entity]'sNPCC's~~ approved business plan and budget for the fiscal year. NERC shall review and approve the proposed amended or supplemental business plan and budget and proposed supplemental assessment, or shall direct ~~[Regional Entity]NPCC~~ to make such revisions as NERC deems appropriate prior to approval. NERC shall submit ~~[Regional Entity]'sNPCC's~~ approved amended or supplemental business plan and budget and proposed supplemental- assessment to the Commission for approval.

8. NERC Review of ~~Regional Entity~~NPCC Financial Statements

NERC shall conduct reviews of the quarterly and annual financial statements submitted by ~~[Regional Entity]NPCC~~ pursuant to Section 9(h) and (i) of the Agreement. ~~[Regional Entity]NPCC~~ shall provide supporting documentation for the quarterly and annual financial statements as reasonably requested by NERC based on its reviews.

Re: REVISED ReliabilityFirst REGIONAL DELEGATION AGREEMENT

Dear David,

The ReliabilityFirst Corporation (ReliabilityFirst) Board of Directors passed the motion below regarding the Revised and Amended Regional Delegation Agreement during the April 30, 2010 ReliabilityFirst Board of Directors meeting via conference call:

The ReliabilityFirst Board of Directors approves the proposed Revised and Amended pro-forma Regional Delegation Agreement and its exhibits and, further directs the President to execute the Regional Delegation Agreement. The Board understands that minor editorial changes may still be made to the Agreement as it is finalized and prepared for filing with FERC in May 2010.

Pursuant to your request, ReliabilityFirst is hereby providing final ReliabilityFirst Regional Delegation Agreement to you on April 30, 2010 for presentation to the NERC Board. Please do not hesitate to contact me with questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Tim R. Gallagher".

**AMENDED AND RESTATED DELEGATION AGREEMENT BETWEEN
NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION
AND RELIABILITYFIRST CORPORATION**

AMENDED AND RESTATED DELEGATION AGREEMENT (“Agreement”) made as of [January 1, 2011], between the North American Electric Reliability Corporation (“NERC”), an organization certified by the Federal Energy Regulatory Commission (“Commission”) pursuant to Section 215(c) of the Federal Power Act to establish and enforce Reliability Standards for the Bulk-Power System, and ReliabilityFirst Corporation (ReliabilityFirst), an organization established to develop and enforce Reliability Standards within the geographic boundaries identified on **Exhibit A** to this Agreement, and for other purposes. NERC and ReliabilityFirst may be individually referred to herein as “Party” or collectively as “Parties.”

WITNESSETH

WHEREAS, Subtitle A of the Electricity Modernization Act of 2005 added Section 215 to the Federal Power Act (16 U.S.C. § 824n) (hereafter “the Act”), which, among other things, provides for the establishment of an electric reliability organization (“ERO”) to develop and enforce Reliability Standards applicable to all owners, operators, and users of the Bulk-Power System;

WHEREAS, the Commission has adopted regulations for the implementation of the Act, which are set forth at Chapter I, Title 18, Code of Federal Regulations, Part 39 (the “ERO Regulations”);

WHEREAS, the Commission has certified NERC as the ERO that will, in accordance with the Act, establish and enforce Reliability Standards for the Bulk-Power System, subject to certain delegation provisions described below;

WHEREAS, the Act recognizes the international interdependency of electric reliability within North America and envisions the ERO and such applicable Regional Entities as international organizations;

WHEREAS, the Act and Section 39.8 of the ERO Regulations provide for the delegation by the ERO of authority to propose and enforce Reliability Standards to regional entities (“Regional Entities”) such as Reliability*First* provided that:

(A) The Regional Entity is governed by —

- (i) an independent board;
- (ii) a balanced stakeholder board; or
- (iii) a combination independent and balanced stakeholder board.

(B) The Regional Entity otherwise satisfies the provisions of Section 215(c)(1) and (2) of the Act; and

(C) The agreement promotes effective and efficient administration of Bulk-Power System reliability;

WHEREAS, certain Regional Entities are organized on an Interconnection-wide basis and are therefore entitled to the presumption set forth in the Act that: “[t]he ERO and the Commission shall rebuttably presume that a proposal for delegation to a Regional Entity organized on an Interconnection-wide basis promotes effective and efficient administration of bulk power system reliability and should be approved”;

WHEREAS, the Act further provides that the ERO shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Reliability Standard or modification to a Reliability Standard to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest;

WHEREAS, Reliability*First* is not organized on an Interconnection-wide basis and therefore is not entitled to the rebuttable presumptions accorded such an entity;

WHEREAS, NERC will work through Reliability*First* to carry out certain of its activities in furtherance of its responsibilities as the ERO under the Act;

WHEREAS, NERC has concluded that ReliabilityFirst meets all requirements of the Act, the ERO Regulations, and the NERC Rules of Procedure as approved by the Commission (“NERC Rules of Procedure”) necessary to qualify for delegation; and

WHEREAS, NERC and ReliabilityFirst, having operated under a predecessor agreement to this Agreement, have negotiated this amended and restated Agreement so as to incorporate the benefits of their mutual experience and lessons learned while operating under the predecessor agreement and thereby provide for the more efficient and effective execution of their respective responsibilities in a transparent manner that is pursuant to Section 215 of the Act and the ERO Regulations;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, NERC and ReliabilityFirst agree as follows:

1. Definitions. The capitalized terms used in this Agreement shall be defined as set forth in the Act, the ERO Regulations, the NERC Rules of Procedure, or the NERC Glossary of Terms Used in Reliability Standards, or, if not so defined, shall be defined as set forth in this Section 1 or elsewhere in the text of this Agreement:

(a) Breach means (i) the failure of a Party to perform or observe any material term, condition or covenant of the Agreement or (ii) a representation in Section 2 of the Agreement shall have become materially untrue.

(b) Cross-Border Regional Entity means a Regional Entity that encompasses a part of the United States and a part of Canada or Mexico.

(c) Delegated Authority means the authority delegated by NERC to ReliabilityFirst to propose and enforce Reliability Standards pursuant to the Act and to undertake related activities set forth in this Agreement in furtherance of these delegated functions in accordance with the Act, the ERO Regulations and this Agreement.

2. Representations.

(a) For purposes of its Delegated Authority, ReliabilityFirst hereby represents and warrants to NERC that:

(i) ReliabilityFirst is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder. ReliabilityFirst is governed in accordance with its bylaws by a combination independent and balanced stakeholder board. Pursuant to these bylaws, no two industry sectors can control any ReliabilityFirst decision and no single industry sector can veto any ReliabilityFirst decision. The relevant portions of such bylaws are attached hereto in **Exhibit B**¹, and as so attached are in full force and effect. No other such corporate governance documents are binding upon ReliabilityFirst.

(ii) As set forth in **Exhibit C** hereto², ReliabilityFirst has developed a standards development procedure, which provides the process that ReliabilityFirst may use to develop Regional Reliability Standards that are proposed to NERC for adoption.

(iii) As set forth in **Exhibit D** hereto, ReliabilityFirst has adopted the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure, which provides for the enforcement of Reliability Standards within ReliabilityFirst's geographic boundaries as shown on **Exhibit A**.

(b) NERC hereby represents and warrants to ReliabilityFirst that:

(i) NERC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder; and

(ii) NERC has been certified as the ERO by the Commission pursuant to the Act.

3. Covenants.

¹ The **Exhibit B** from ReliabilityFirst shall meet the requirements contained in **Exhibit B** to this Agreement.

² The **Exhibit C** from ReliabilityFirst shall meet the requirements contained in **Exhibit C** to this Agreement.

(a) During the term of this Agreement, ReliabilityFirst shall maintain and preserve its qualifications for delegation pursuant to the Act and shall not amend its Regional Entity Rules without NERC's approval, which shall not be unreasonably withheld or delayed and which shall, in the case of a Regional Entity organized on an Interconnection-wide basis, be governed by the presumptions provided for in Section 215(d)(2) and (e)(4)(C) of the Act, and be subject to any required Commission approval.

(b) During the term of this Agreement, NERC shall maintain its qualification and status as the ERO pursuant to the Act and, subject to the provisions of Sections 17 and 18 of this Agreement, NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations or programs of ReliabilityFirst under this Agreement without first obtaining the consent of ReliabilityFirst, which consent shall not be unreasonably withheld or delayed.

(c) During the term of this Agreement, NERC and ReliabilityFirst shall adhere to and require that all participants in their respective activities under this Agreement follow and comply with the NERC Antitrust Compliance Guidelines.

4. Delegation of Authority.

(a) Based upon the representations, warranties and covenants of ReliabilityFirst in Sections 2 and 3 above, the corporate governance documents set forth in **Exhibit B**, the standards development process set forth in **Exhibit C**, and the compliance monitoring and enforcement program set forth in **Exhibit D**, NERC hereby delegates authority, pursuant to Section 215(e)(4) of the Act, to ReliabilityFirst for the purpose of proposing Reliability Standards to NERC, as set forth in Section 5 of this Agreement, and enforcing Reliability Standards, as set forth in Section 6 of this Agreement, within the geographic boundaries and such other scope set forth on **Exhibit A**, *provided*, that ReliabilityFirst shall not monitor and enforce compliance with Reliability Standards for ReliabilityFirst or an affiliated entity with respect to reliability functions for which ReliabilityFirst or an affiliate is a Registered Entity. Any exclusions from this delegation of authority to ReliabilityFirst within, or additions to this delegation of authority to ReliabilityFirst beyond, the geographic boundaries set forth on **Exhibit A** are stated on **Exhibit A**.

(b) In circumstances where ReliabilityFirst or an affiliated entity is a Registered Entity, ReliabilityFirst shall enter into an agreement with another Regional Entity or NERC for the other Regional Entity or NERC to monitor and enforce ReliabilityFirst's or affiliate's compliance with Reliability Standards. Such agreements are subject to NERC and Commission approval.

(c) Nothing in this Agreement shall prohibit ReliabilityFirst from entering into an arrangement between one or more other Regional Entities to perform compliance monitoring and enforcement activities outside of its region, on behalf of NERC and/or other Regional Entities, for Registered Entities that have registered functions monitored by more than one Regional Entity, subject to approval by NERC.

(d) For Cross-Border Regional Entities, the authority delegated by this Agreement shall extend only to the portion of the region identified on **Exhibit A** that is within the United States. Any delegation of authority by ERO Governmental Authorities in Canada or Mexico shall be governed by a separate agreement and is outside the scope of this Agreement; provided, however, that both ReliabilityFirst and NERC shall endeavor to ensure that this Agreement and such separate agreements are compatible.

(e) As a condition to this delegation of authority and subject to the provisions of Section 17 of this Agreement, ReliabilityFirst shall comply with the applicable provisions of NERC's Certificate of Incorporation, Bylaws, Rules of Procedure, and Reliability Standards, as from time to time adopted, approved, or amended.

5. Development and Proposal of Reliability Standards.

(a) In connection with its Delegated Authority, ReliabilityFirst shall be entitled to:

- (i) propose Reliability Standards, Regional Variances, or modifications thereof to NERC, which shall be considered by NERC through an open and inclusive process for proposing and adopting Reliability Standards that affords ReliabilityFirst reasonable notice and opportunity to be heard; and
- (ii) develop Regional Reliability Standards through ReliabilityFirst's process as set forth in **Exhibit C**. Proposals approved through ReliabilityFirst's process shall be reviewed by the NERC Board after NERC provides notice and an opportunity for interested persons to comment. In the case of a proposal from a Regional Entity organized on an

Interconnection-wide basis, comments shall be limited to the factors identified in NERC Rule of Procedure 312.3 as it may be amended from time to time. The NERC Board shall promptly thereafter consider such proposed Regional Reliability Standard or Regional Variance, applying the rebuttable presumption described in subsection 5(b) of this Agreement if the proposed Regional Reliability Standard or Regional Variance is from a Regional Entity organized on an Interconnection-wide basis, and either approve the proposed Regional Reliability Standard or Regional Variance and submit it to the Commission for approval, or disapprove it in writing setting forth its reasons. ReliabilityFirst may appeal any disapproval of a proposed Regional Reliability Standard or Regional Variance to the Commission.

(b) Pursuant to Section 215(d)(3) of the Act, NERC shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Regional Reliability Standard or Regional Variance or modification thereof to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. Any person challenging such proposal from the Regional Entity organized on an Interconnection-wide basis shall have the burden of proof. NERC shall not find that this presumption has been rebutted except based upon substantial evidence that has been disclosed to, and been subject to comment by, the Interconnection-wide Regional Entity during NERC's review of the proposal.

6. Enforcement of Compliance with Reliability Standards.

(a) In connection with its delegated authority pursuant to this Agreement, ReliabilityFirst shall enforce Reliability Standards (including Regional Reliability Standards and Regional Variances) within the geographic boundaries set forth, or as otherwise specified, in **Exhibit A** through the compliance monitoring and enforcement program set forth in **Exhibit D**. NERC and ReliabilityFirst agree that this compliance monitoring and enforcement program meets all applicable requirements of the Act, Order No. 672 of the Commission, and the ERO Regulations, including, *inter alia*, the requirement for an audit program pursuant to Section 39.7(a) of the ERO Regulations, the assessment of penalties pursuant to Section 39.7(c) through 39.7(g) of the ERO Regulations and the requirements for due process. ReliabilityFirst may not change its compliance monitoring and enforcement program set forth in **Exhibit D** absent NERC's approval, which shall not be unreasonably withheld or delayed, and the approval of the

Commission. Subject to the rights and limitations specified in Sections 17 and 18 of this Agreement, ReliabilityFirst agrees to comply with the NERC Rules of Procedure, with any directives issued pursuant to Section 8(c) of this Agreement, and with any guidance and directions issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, in implementing this program.

(b) ReliabilityFirst shall report promptly to NERC any Possible Violation, Alleged Violation, or Confirmed Violation of a Reliability Standard, and its eventual disposition by ReliabilityFirst. Such report shall include the owner's, operator's, or user's name, which Reliability Standard or Reliability Standards were the subject of the Possible Violation, Alleged Violation, or Confirmed Violation, when the Possible Violation, Alleged Violation, or Confirmed Violation occurred, other pertinent facts including circumstances surrounding the Possible Violation, Alleged Violation, or Confirmed Violation with any known risk to the Bulk-Power System, when the Possible Violation, Alleged Violation, or Confirmed Violation was or will be mitigated, the name of a person knowledgeable about the Possible Violation, Alleged Violation, or Confirmed Violation to serve as a point of contact with the Commission, and any other information required by NERC compliance program procedures. NERC shall promptly forward such report to the Commission. NERC and ReliabilityFirst shall cooperate in filing such periodic summary reports as the Commission shall from time to time direct on Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards and summary analyses of such Possible Violations, Alleged Violations, and Confirmed Violations.

(c) Each Possible Violation, Alleged Violation, or Confirmed Violation shall be treated as nonpublic unless the matter is filed with the Commission as a Notice of Penalty, or, if disclosure is required, dismissed. The disposition of each Possible Violation, Alleged Violation, or Confirmed Violation that relates to a Cybersecurity Incident or that would jeopardize the security of the Bulk-Power System if publicly disclosed shall remain nonpublic unless the Commission directs otherwise.

(d) All dispositions by ReliabilityFirst of Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards shall be reported to NERC for review and, in the case of Confirmed Violations, penalties or sanctions, and settlements, for approval. Following approval of a disposition by NERC, NERC shall file the disposition with the Commission, if required by, and in accordance with, Section 215(e) of the Act and Section 39.7

of the ERO Regulations. NERC shall review ReliabilityFirst's dispositions based on the following criteria:

(i) whether the disposition is supported by a sufficient record compiled by ReliabilityFirst in accordance with the NERC Rules of Procedure, NERC directives and Commission requirements, taking into account the nature of the Possible Violation, Alleged Violation, or Confirmed Violation,

(ii) whether the disposition is consistent with any applicable directives issued pursuant to Section 8(c) of this Agreement, any applicable directions or guidance issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, or other applicable NERC guidance, concerning the Reliability Standards to which the Possible Violation, Alleged Violation, or Confirmed Violation relates,

(iii) if the disposition is a Confirmed Violation or settlement, whether it provides for a penalty or sanction, or a determination of no penalty or sanction, determined in accordance with the NERC Sanction Guidelines, Appendix 4B to the NERC Rules of Procedure, and

(iv) whether the disposition is reasonably consistent with other dispositions by ReliabilityFirst and by other Regional Entities of Possible Violations, Alleged Violations, and Confirmed Violations involving the same or similar facts and circumstances.

NERC may reject any disposition, with an explanation of why NERC believes the disposition does not meet the above criteria. ReliabilityFirst may submit a disposition requiring NERC approval that has been rejected by NERC, or a revised disposition following a rejection, directly to the NERC Board Compliance Committee for approval without revising the disposition to address all the grounds on which NERC originally rejected the disposition. The final approval of ReliabilityFirst's disposition of a Possible Violation, Alleged Violation, or Confirmed Violation shall be made by the NERC Board Compliance Committee, provided, that the NERC Board or NERC Board Compliance Committee may, by appropriate resolution, delegate authority for final approval of dispositions of specified categories of Possible Violations, Alleged Violations, or Confirmed Violations to the NERC President.

(e) All appeals of penalties imposed by ReliabilityFirst as a result of a decision by ReliabilityFirst's Hearing Body shall be filed with, heard by and disposed of by, NERC in accordance with the NERC Rules of Procedure.

(f) ReliabilityFirst shall maintain the capability to conduct investigations of Possible Violations and Alleged Violations of Reliability Standards and to conduct such investigations in a confidential manner.

(g) ReliabilityFirst shall maintain a program of proactive monitoring and enforcement of compliance with Reliability Standards, in accordance with the NERC Compliance Monitoring and Enforcement Program and the annual NERC Compliance Monitoring and Enforcement Program Implementation Plan.

(h) As part of its compliance monitoring and enforcement program, ReliabilityFirst shall maintain a conflict of interest policy that assures the integrity and independence of such program, including the integrity and independence of the persons or decision-making bodies making final determinations in compliance enforcement actions under Section 5.0 of the NERC Compliance Monitoring and Enforcement Program. A Regional Entity may have stakeholders lead or participate in its board compliance committee so long as integrity and independence are assured through reasonable and appropriate recusal procedures.

(i) As often as NERC deems necessary, but no less than every five years, NERC shall review ReliabilityFirst's compliance monitoring and enforcement program to determine that: (i) the program meets all applicable legal requirements; (ii) actual practices reflect the requirements; and (iii) the program administered pursuant to the Delegated Authority promotes consistent interpretations across North America of Reliability Standards and comparable levels of sanctions and penalties for violations of Reliability Standards constituting comparable levels of threat to reliability of the Bulk-Power System.

7. Delegation-Related Activities.

NERC will engage ReliabilityFirst on its behalf to carry out certain of its activities that are in furtherance of Bulk-Power System reliability and NERC's responsibilities as the ERO under the Act or in support of the Delegated Authority, as specified in the NERC Rules of Procedure and listed on **Exhibit E**. These delegation-related activities shall include, but are not

limited to, those described in subsections (a) through (f), each of which shall be considered a statutory activity:

(a) Certification of Bulk-Power System Entities. The NERC Board shall set criteria for certification in accordance with the NERC Rules of Procedure. ReliabilityFirst shall issue certifications in accordance with the NERC Rules of Procedure.

(b) Registration of owners, operators, and users of the Bulk-Power System as responsible for compliance with requirements of Reliability Standards.

(i) The NERC Board shall develop criteria for registration of owners, operators, and users of the Bulk-Power System as Registered Entities and shall apply the registration criteria to register owners, operators and users of the Bulk-Power System as Registered Entities.

(ii) NERC shall maintain a registration database of Registered Entities, based on data and information provided by ReliabilityFirst and other Regional Entities. ReliabilityFirst shall provide timely and accurate information relating to registrations to NERC, on at least a monthly basis, to enable NERC to maintain a registration database that is accurate and up-to-date.

(iii) The NERC Board Compliance Committee shall hear and decide appeals from owners, operators and users of the Bulk-Power System contesting registration, in accordance with the NERC Rules of Procedure. If the NERC Board Compliance Committee upholds the decision to register an owner, operator, or user, NERC shall defend the decision in any subsequent appeal of the decision by the Registered Entity to the Commission.

(c) Reliability Assessment and Performance Analysis. ReliabilityFirst shall develop assessments of the reliability of the Bulk-Power System, or ensure that data and information are collected, analyzed and provided to NERC in support of the development of reliability assessments, in accordance with the NERC Rules of Procedure. ReliabilityFirst shall also develop and maintain, and collect data in support of the development and maintenance of, reliability performance metrics and assessments of risks to the Reliable Operation of the Bulk-Power System, in accordance with the NERC Rules of Procedure and NERC directives. NERC shall develop data-gathering quality control procedures, forms and reporting mechanisms, which shall be used by ReliabilityFirst and other Regional Entities in carrying out their responsibilities under this subsection (c).

(d) Event Analysis and Reliability Improvement. ReliabilityFirst shall conduct event analysis pursuant to the NERC Rules of Procedure and applicable governmental regulations. NERC and ReliabilityFirst shall coordinate event analysis to support the effective and efficient use of their collective resources, consistency in event analysis, and timely delivery of event analysis reports. In collaboration with NERC, ReliabilityFirst shall disseminate to the electric industry lessons learned and other information obtained or resulting from event analysis.

(e) Training and Education. ReliabilityFirst may provide training and education to Registered Entities, as it deems necessary, in support of its performance of delegated functions and related activities under this Agreement. NERC may also provide training and education programs to Registered Entities on topics relating to NERC's responsibilities as the ERO.

(f) Situation Awareness and Infrastructure Security.

(i) ReliabilityFirst shall gather and assess situation awareness information provided by Registered Entities pursuant to the NERC Rules of Procedure and applicable governmental regulations, and shall provide other data, information and assistance to NERC in support of NERC's activities in monitoring present conditions, and responding to events, on the Bulk-Power System

(ii) ReliabilityFirst shall collaborate with NERC in its efforts to coordinate electric industry activities to promote critical infrastructure protection of the Bulk-Power System in North America.

8. Oversight of Performance of Delegated Functions and Related Activities.

This Section 8 sets forth processes and procedures which the Parties intend shall be used in NERC's oversight of ReliabilityFirst's performance of its Delegated Authority and related activities pursuant to this Agreement. It is the intent of NERC and ReliabilityFirst that matters relating to NERC's oversight of ReliabilityFirst's performance of its Delegated Authority and related activities shall be established or resolved by collaboration between NERC and ReliabilityFirst and, where applicable, other Regional Entities, to the maximum extent possible, consistent with the construct that NERC and the Regional Entities are operating together in a collaborative manner to carry out the responsibilities of the ERO under Section 215 of the Act and the ERO Regulations.

(a) (i) NERC shall develop, in collaboration with ReliabilityFirst and other Regional Entities, performance goals, measures and other parameters (including, without limiting the

scope of such goals, measures and parameters, financial performance goals, measures and parameters), and performance reports, which shall be used to measure NERC's and ReliabilityFirst's performance of their respective functions and related activities. The performance goals, measures and parameters and the form of performance reports shall be approved by the NERC President and shall be made public. ReliabilityFirst shall provide data, information and reports to NERC, in accordance with established schedules, to enable NERC to calculate ReliabilityFirst's performance to the agreed-upon goals, measures and parameters.

(ii) NERC shall use the performance goals, measures and parameters and performance reports to evaluate ReliabilityFirst's performance of its delegated functions and related activities and to provide advice and direction to ReliabilityFirst on performance improvements. The performance goals, measures and other parameters and the values of such goals, measures and parameters, shall be reviewed by NERC, ReliabilityFirst and the other Regional Entities, revised if appropriate, and made public, on the same timeline as the annual business planning and budgeting process described in Section 9 of this Agreement.

(iii) At the request of the President of NERC, ReliabilityFirst shall be required to develop, submit for NERC approval, and implement action plans to address areas of its performance that are reasonably determined by NERC, based on analysis of ReliabilityFirst's performance against the performance goals, measures and parameters, or performance of specific activities, to be unsatisfactory, *provided*, that prior to requiring ReliabilityFirst to adopt and implement an action plan or other remedial action, NERC shall issue a notice to ReliabilityFirst of the need and basis for an action plan or other remedial action and provide an opportunity for ReliabilityFirst to submit a written response contesting NERC's evaluation of ReliabilityFirst's performance and the need for an action plan. ReliabilityFirst may request that the President of NERC reconsider the request, and thereafter may request that the NERC Board review and reconsider the request. NERC and ReliabilityFirst shall work collaboratively as needed in the development and implementation of ReliabilityFirst's action plan. A final action plan submitted by ReliabilityFirst to NERC shall be made public unless the President of NERC makes a written determination that the action plan or specific portions of the plan should be maintained as non-public.

(b) NERC shall make available to ReliabilityFirst standardized training and education programs, which shall be designed taking into account input from ReliabilityFirst and other

Regional Entities, for ReliabilityFirst personnel on topics relating to the delegated functions and related activities.

(c) (i) NERC may issue directives to ReliabilityFirst concerning the manner in which ReliabilityFirst shall perform its delegated functions and related activities under this Agreement. The NERC Rules of Procedure, or any other ERO Rule requiring approval of the Commission, shall not be considered “directives.” NERC shall initiate the development of a directive through a collaborative process with ReliabilityFirst and, if applicable, other Regional Entities to which the directive will apply. Any directive developed through the collaborative process shall be approved by, and issued under the signature of, the NERC President.

(ii) If after a period of time that is reasonable under the circumstances, NERC and ReliabilityFirst and, if applicable, other Regional Entities are unable to reach agreement on the contents of the directive, NERC may issue the directive with the approval of and under the signature of the NERC President; *provided*, that before the NERC President issues a directive pursuant to this paragraph (ii), ReliabilityFirst and, if applicable, other Regional Entities, shall be given a reasonable opportunity to present their positions on, and a suggested alternative version or versions of, the proposed directive to the NERC President.

(iii) Upon issuance of a directive by the NERC President, it shall be binding upon, and shall be complied with by, ReliabilityFirst, subject to reasonable time periods for adoption, implementation, and funding of any necessary resources. Upon request by ReliabilityFirst, the NERC Board (or a committee of the Board to which the Board delegates appropriate authority) shall review and shall confirm, revise or revoke any directive that was issued by the NERC President without ReliabilityFirst’s agreement, *provided*, that ReliabilityFirst shall request such review within thirty (30) days following issuance of the directive by the NERC President unless good cause can be shown for a later request.

(iv) NERC and ReliabilityFirst and, if applicable, other Regional Entities, shall collaborate in deciding whether a directive (whether issued pursuant to paragraph (ii) or paragraph (iii)) shall be made public. If no agreement is reached by the date of issuance as to whether the directive shall be made public, the NERC President shall decide whether the directive will be made public, *provided*, that is the intent of the Parties that the NERC President shall apply a presumption that directives should be made public, unless the NERC President

makes a written determination stating a specific reason for maintaining a particular directive as non-public.

(d) In addition to the issuance of directives pursuant to subsection (c), the NERC Board (or a Board committee to which the Board has delegated authority) may issue guidance or directions as to the manner in which ReliabilityFirst, and, if applicable, other Regional Entities, shall perform delegated functions and related activities. The Board or Board committee shall also establish reasonable time periods for the implementation of any such guidance or directions, taking into account the impact on the reliability of the Bulk-Power System and the need for funding of additional resources. Any such guidance or directions shall be stated in writing and shall be public, unless the Board or Board committee makes a written determination stating a specific reason for maintaining particular guidance or directions as non-public. ReliabilityFirst, either individually or in conjunction with other Regional Entities, may request that the NERC Board or Board committee reconsider or revise the guidance or direction.

(e) NERC shall conduct collaborative reviews with ReliabilityFirst, either individually or in conjunction with one or more other Regional Entities, that provide for the exchange of information on practices, experiences, and lessons learned in the implementation of the delegated functions.

(f) Any audits of ReliabilityFirst performed by NERC shall be limited to an examination of ReliabilityFirst's compliance with this Agreement, NERC's Rules of Procedure, the Compliance Monitoring and Enforcement Program, Commission requirements, and directives that are in effect pursuant to Section 8(c)

9. Funding. ReliabilityFirst and NERC shall ensure, subject to Commission approval in accordance with the ERO Regulations, that the delegated functions and related activities described in Sections 5, 6 and 7 and listed on **Exhibit E** have reasonable and adequate funding and resources by undertaking the following:

(a) ReliabilityFirst shall develop, through a collaborative process with NERC, and propose, an annual business plan and budget, in accordance with ERO Regulations, Commission orders and NERC business planning and budgeting policies and instructions. ReliabilityFirst's proposed business plan and budget shall describe the activities necessary for, and provide a budget with adequate resources for, ReliabilityFirst to carry out its Delegated

Authority under this Agreement, including the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E**. ReliabilityFirst's business plan and budget shall show the funding sources and amounts to fund the proposed budget, including as applicable assessments to end users, penalty monies, and other sources of funds.

(b) ReliabilityFirst and NERC agree that the portion of ReliabilityFirst's approved budget for the functions and activities described in Sections 5, 6 and 7 and listed on **Exhibit E** that is to be funded by assessments, will be equitably allocated among end users within the geographic boundaries described in **Exhibit A** and recovered through a formula based on Net Energy for Load, or through such other formula as is proposed by ReliabilityFirst and approved by NERC and the Commission. If ReliabilityFirst proposes to use a formula other than Net Energy for Load beginning in the following year, ReliabilityFirst shall submit the proposed formula to NERC in sufficient time that NERC may review and approve the proposed formula and file it with the Commission by May 15 for approval, and the proposed formula shall be effective for the following year if approved by the Commission on or before the date the Commission approves the annual business plan and budget submitted by NERC and ReliabilityFirst to the Commission pursuant to the ERO Regulations for such year.

(c) NERC shall determine that the assessments to fund the costs for its statutory functions in its Commission-approved budget are first allocated fairly among the Interconnections and regions according to the applicability of this work to those Interconnections and regions, and then equitably among the end users of the applicable interconnections and regions as appropriate. Allocation on a Net Energy for Load basis will be presumed to satisfy this equity requirement.

(d) NERC shall provide ReliabilityFirst with the form or forms for business plan and budget submittal, and any accompanying instructions, in accordance with the schedule for preparation of the business plan and budget developed by NERC and the Regional Entities.

(e) ReliabilityFirst shall submit its proposed annual business plan and budget for carrying out its Delegated Authority functions and related activities described in Sections 5, 6 and 7 and listed on Exhibit E, as well as for all other activities of ReliabilityFirst, to NERC for review and approval in accordance with the annual schedule for the preparation of business plans and budgets which shall be developed collaboratively by NERC and the Regional Entities, as more fully described in **Exhibit E**.

(f) NERC shall fund ReliabilityFirst's performance of its Delegated Authority and related activities in accordance with ReliabilityFirst's Commission-approved business plan and budget, in the amount of ReliabilityFirst's assessments to end users approved by the Commission. **Exhibit E** sets forth the procedures and timing for billing and collecting ReliabilityFirst's approved assessments from end users and other entities and payment of the approved assessment amount to ReliabilityFirst, unless otherwise modified and approved by NERC and the Commission. NERC shall not impose any material obligation or requirement regarding the Delegated Authority upon ReliabilityFirst that has not been provided for in an approved business plan and budget or an approved amended or supplemental business plan and budget, without ReliabilityFirst's consent.

(g) NERC shall develop, in consultation with the Regional Entities, a reasonable and consistent system of accounts, with a level of detail and record keeping comparable to the Commission's Uniform System of Accounts and sufficient to allow the Commission to compare each Commission-approved NERC and ReliabilityFirst fiscal year budget with the actual results at the NERC and Regional Entity levels. ReliabilityFirst shall follow NERC's prescribed system of accounts except to the extent that NERC permits a departure from the prescribed system of accounts. NERC shall make an informational filing with the Commission describing any such waiver it permits and providing an explanation supporting the permitted departure.

(h) ReliabilityFirst shall submit unaudited quarterly interim financial statements in form provided by NERC no later than 20 days after the end of the fiscal quarter (March 31, June 30, September 30, and December 31).

(i) ReliabilityFirst shall submit audited financial statements annually, including supporting materials, in a form provided by NERC no later than May 1 of the following year.

(j) **Exhibit E** to this Agreement sets forth the mechanism through which ReliabilityFirst shall offset penalty monies it receives (other than penalty monies received from an operational function or division or affiliated entity of ReliabilityFirst) against its next year's annual budget for carrying out functions under this Agreement, and the mechanism by which ReliabilityFirst shall transmit to NERC any penalty monies received from an operational function or division or affiliated entity of ReliabilityFirst. *Provided*, that, subject to approval by NERC and the Commission, ReliabilityFirst may propose and implement an alternative use of penalty monies to that set forth in **Exhibit E**.

10. Assignment. This Agreement may be assigned by either Party only with the prior written consent of the other, which consent shall be granted or withheld in such non-assigning Party's sole discretion, subject to approval by the Commission. Any assignment under this Agreement shall not relieve a Party of its obligations, nor shall a Party's obligations be enlarged, in whole or in part, by reason thereof. ReliabilityFirst may not delegate in whole or in part its Delegated Authority to any other entity without NERC's express consent; provided, however, that nothing in this provision shall prohibit ReliabilityFirst from contracting with other entities to assist it in carrying out its Delegated Authority, provided ReliabilityFirst retains control and responsibility for such Delegated Authority.

11. Default and Cure. Upon a Breach, the non-breaching Party shall give written notice of such Breach to the breaching Party (the "Default Notice"). Subject to a suspension of the following deadlines as specified below, the breaching Party shall have thirty (30) calendar days from receipt of the Default Notice within which to cure such Breach; *provided however*, that if such Breach is not capable of cure within thirty (30) calendar days, the breaching Party shall commence such cure within thirty (30) calendar days after notice and continuously and diligently complete such cure within ninety (90) calendar days from receipt of the Default Notice; and, if cured within such time, the Breach specified in such notice shall cease to exist. Subject to the limitation specified in the following sentence, if a Breach is not cured as provided in this Section 11, or if a Breach is not capable of being cured within the period provided for herein, the nonbreaching Party shall have the right to declare a default and terminate this Agreement by written notice at any time until cure occurs, and be relieved of any further obligation hereunder. The deadlines for cure and the right to declare a default and terminate this Agreement shall be suspended during the pendency of any efforts or proceedings in accordance with Section 18 of this Agreement to resolve a dispute as to whether a Breach has occurred or been cured. The provisions of this Section 11 will survive termination of this Agreement.

12. Term and Termination.

(a) This Agreement shall become effective on [January 1, 2011] (the "Effective Date").

(b) The term of the Agreement shall be five (5) years from the Effective Date, prior to which time NERC shall conduct an audit pursuant to subsection 6(i) to ensure that ReliabilityFirst continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. If ReliabilityFirst meets such requirements, this Agreement may be renewed for another five (5) year term. This Agreement may be renewed for successive additional five (5) year renewal terms provided that prior to the end of each renewal term, NERC shall conduct an audit pursuant to subsection 6(i) to ensure that ReliabilityFirst continues to meet all applicable statutory and regulatory requirements necessary to maintain its eligibility for delegation. Provided, that either Party may terminate this Agreement as of the end of a term by giving written notice to terminate at least one (1) year prior to the end of the term. If this Agreement is not renewed or becomes subject to termination for any reason, the Parties shall work to provide for a transition of ReliabilityFirst's Delegated Authority to NERC or to another eligible entity and to provide for the resolution of any wind-up costs associated with termination of this Agreement. The termination of this Agreement shall not take effect until such transition has been effected, unless the transition period exceeds one year, at which time ReliabilityFirst may unilaterally terminate.

(c) If any provision of this Agreement, or the application thereof to any person, entity or circumstance, is held by a court or regulatory authority of competent jurisdiction to be invalid, void, or unenforceable, or if a modification or condition to this Agreement is imposed by a regulatory authority exercising jurisdiction over this Agreement, the Parties shall endeavor in good faith to negotiate such amendment or amendments to this Agreement as will restore the relative benefits and obligations of the signatories under this Agreement immediately prior to such holding, modification or condition. If either Party finds such holding, modification or condition unacceptable and the Parties are unable to renegotiate a mutually acceptable resolution, either Party may unilaterally terminate this Agreement. Such termination shall be effective one year following written notice by either Party to the other Party and to the Commission, or at such other time as may be mutually agreed by ReliabilityFirst and NERC.

(d) Notwithstanding any termination of this Agreement, provisions contained in Limitation of Liability (Section 13), No Third Party Beneficiaries (Section 14) and

Confidentiality (Section 15) shall survive this Agreement in accordance with their terms until sixty (60) days following the expiration of any applicable statute of limitations.

13. Limitation of Liability. ReliabilityFirst and NERC agree not to sue each other or their directors, officers, employees, and persons serving on their committees and subgroups based on any act or omission of any of the foregoing in the performance of duties pursuant to this Agreement or in conducting activities under the authority of Section 215 of the Act, other than seeking a review of such action or inaction by the Commission. NERC and ReliabilityFirst shall not be liable to one another for any damages whatsoever, including without limitation, direct, indirect, incidental, special, multiple, consequential (including attorneys' fees and litigation costs), exemplary, or punitive damages arising out of or resulting from any act or omission associated with the performance of the ReliabilityFirst's or NERC's responsibilities under this Agreement or in conducting activities under the authority of Section 215 of the Act, except to the extent that the ReliabilityFirst or NERC is found liable for gross negligence or intentional misconduct, in which case ReliabilityFirst or NERC shall not be liable for any indirect, incidental, special, multiple, consequential (including without limitation attorneys' fees and litigation costs), exemplary, or punitive damages.

14. No Third Party Beneficiaries. Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to, or any liability to, any third party.

15. Confidentiality. During the course of the Parties' performance under this Agreement, a Party may receive Confidential Information, as defined in Section 1500 of NERC's Rules of Procedure. Except as set forth herein, the Parties agree to keep in confidence and not to copy, disclose, or distribute any Confidential Information or any part thereof, without the prior written permission of the issuing Party, unless disclosure is required by subpoena, law, or other directive of a court, administrative agency, or arbitration panel, in which event the recipient hereby agrees to provide the Party that provided the Confidential Information with prompt notice of such request or requirement in order to enable such issuing Party to (a) seek an appropriate protective order or other remedy, (b) consult with the recipient with respect to taking steps to resist or narrow the scope of such request or legal process, or (c) waive

compliance, in whole or in part, with the terms of this Section. In the event a protective order or other remedy is not obtained or the issuing Party waives compliance with the provisions, the recipient agrees to furnish only that portion of the Confidential Information which the recipient's counsel advises is legally required and to exercise best efforts to obtain assurance that confidential treatment will be accorded to such Confidential Information. In addition, each Party shall ensure that its officers, trustees, directors, employees, subcontractors and subcontractors' employees, and agents to whom Confidential Information is exposed are under obligations of confidentiality that are at least as restrictive as those contained herein. This confidentiality provision does not prohibit reporting and disclosure as directed by NERC, as set forth in Section 6 of this Agreement.

16. Amendment. Neither this Agreement nor any of the terms hereof, may be amended unless such amendment is made in writing, signed by the Parties, and filed with and approved by the Commission.

17. Amendments to the NERC Rules of Procedure. NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations, or programs of ReliabilityFirst under this Agreement without first obtaining the consent of ReliabilityFirst, which consent shall not be unreasonably withheld or delayed. To the extent ReliabilityFirst does not consent, NERC shall have the right to invoke the dispute resolution provisions of Section 18 and, if such effort fails to resolve the dispute, to petition the Commission to adopt the amendment to the NERC Rules of Procedure. To the extent that the Commission issues an order amending or materially affecting the rights or obligations of ReliabilityFirst under this Agreement, ReliabilityFirst shall have the option, exercisable no later than 60 days after issuance of such order, to terminate this Agreement. Such termination shall be effective one year following written notice by ReliabilityFirst to NERC and the Commission, or at such other time as may be mutually agreed by ReliabilityFirst and NERC.

18. Dispute Resolution. In the event a dispute arises under this Agreement between NERC and ReliabilityFirst (including disputes relating to NERC's performance of its obligations under this Agreement and/or disputes relating to ReliabilityFirst's performance of its obligations

under this Agreement) which cannot be resolved through discussions between representatives of the Parties in the normal course of operations, the Parties shall use the following procedures (“Dispute Resolution”) to attempt to resolve the dispute. ReliabilityFirst shall not suspend performance of any delegated function, and the Parties shall continue to make reasonable, good faith efforts to comply with their obligations under this Agreement, during the pendency of Dispute Resolution. All notices required to be sent pursuant to this Dispute Resolution procedure shall be sent in accordance with Section 19 of this Agreement. This Dispute Resolution procedure is separate from and in addition to all other processes provided for in this Agreement.

(a) The Party invoking Dispute Resolution shall send a notice to the other Party describing the dispute, stating the invoking Party’s position with respect to the dispute, stating that the Party is invoking Dispute Resolution, and naming the Party’s designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the invoking Party.

(b) Within three (3) business days after receipt of the notice invoking Dispute Resolution, the receiving Party shall send a notice to the invoking Party acknowledging receipt of the notice invoking Dispute Resolution, stating the receiving Party’s position with respect to the dispute, and naming the Party’s designated representative for negotiating a resolution of the dispute. The designated representative shall have authority to resolve the dispute on behalf of the receiving Party.

(c) During the period commencing three (3) business days and ending twenty (20) business days after the date of the receiving Party’s notice, the designated representatives shall engage in good faith negotiations to attempt to resolve the dispute, *provided*, that the designated representatives may agree prior to the end of such twenty (20) business day period that the process should move to the next step of Dispute Resolution.

(d) If the designated representatives are unable to arrive at a resolution of the dispute by the end of the time period described in subsection (c), they shall notify the chief executive officers of their respective Parties. The chief executive officers of the Parties shall thereafter engage in good faith negotiations to attempt to resolve the dispute during the period of twenty (20) business days immediately following the time period described in subsection (c), *provided*, that the chief executive officers may agree prior to the end of such twenty (20) business day

period that negotiations are at impasse and the process may move to the next step as described in subsection (f). Upon mutual agreement of the Parties, the twenty (20) business day period may be extended to pursue ongoing good faith negotiations.

(e) If a resolution of the dispute is achieved by the Parties, it shall be memorialized in a writing that is acceptable in form and substance to each party and is signed by the designated representative or chief executive officer on behalf of each Party.

(f) If the Parties are unable to resolve the dispute pursuant to the process described in subsections (a) through (e), then either Party may invoke any other available dispute resolution mechanism, including, without limitation, filing a complaint or petition with the Commission requesting resolution of the dispute by the Commission, or filing a complaint for relief in a court having jurisdiction over Parties and the subject matter of the dispute in accordance with Section 20. *Provided, however*, that: (i) it is the intent of the Parties that unresolved disputes shall be presented to and resolved by the Commission if the Commission has and accepts jurisdiction over the subject matter of the dispute, (ii) the Parties may, by mutual agreement, attempt to resolve the dispute through arbitration, mediation, or other process involving resort to an impartial neutral, and (iii) it is the intent of the Parties that resolution of disputes through Commission proceedings, arbitration, mediation, or other use of an impartial neutral, is preferred over resort to judicial proceedings.

(g) This Section 18 shall not apply to compliance enforcement actions against individual Registered Entities.

19. Notice. Whether expressly so stated or not, all notices, demands, requests, and other communications required or permitted by or provided for in this Agreement shall be given in writing to a Party at the address set forth below, or at such other address as a Party shall designate for itself in writing in accordance with this Section, and shall be delivered by hand or reputable overnight courier:

If to NERC:

North American Electric
Reliability Corporation
116-390 Village Blvd.
Princeton, NJ 08540-5721

Suite 300
Akron, OH 44333
Attn: Timothy Gallagher, President

Facsimile: (609) 452-9550

Facsimile: (330) 456-3648

20. Governing Law. When not in conflict with or preempted by federal law, this Agreement will be governed by and construed in accordance with the laws of New Jersey without giving effect to the conflict of law principles thereof. The Parties recognize and agree not to contest the exclusive or primary jurisdiction of the Commission to interpret and apply this Agreement; provided however that if the Commission declines to exercise or is precluded from exercising jurisdiction of any action arising out of or concerning this Agreement, such action shall be brought in any state or federal court of competent jurisdiction in New Jersey. All Parties hereby consent to the jurisdiction of any state or federal court of competent jurisdiction in New Jersey for the purpose of hearing and determining any action not heard and determined by the Commission.

21. Headings. The headings and captions in this Agreement are for convenience of reference only and shall not define, limit, or otherwise affect any of the terms or provisions hereof.

22. Savings Clause. Nothing in this Agreement shall be construed to preempt or limit any authority that ReliabilityFirst may have to adopt reliability requirements or take other actions to maintain reliability of the Bulk-Power System within the geographic boundaries described in **Exhibit A** that are outside the Delegated Authority, as long as such reliability requirements and actions are not inconsistent with Reliability Standards applicable to the region described in **Exhibit A** and do not result in a lessening of reliability outside the region described in **Exhibit A**.

23. Entire Agreement. This Agreement constitutes the entire agreement, and supersedes all prior agreements and understandings, both written and oral, among the parties with respect to the subject matter of this Agreement.

24. Execution of Counterparts. This Agreement may be executed in counterparts and each shall have the same force and effect as the original.

NOW THEREFORE, the parties have caused this Agreement to be executed by its duly authorized representatives, effective as of the Effective Date.

Exhibit A - Boundaries of Delegation Agreement

The Boundaries of **ReliabilityFirst** Corporation (**ReliabilityFirst**) are defined by the service territories of Load Serving Entities (LSEs) and include all of New Jersey, Delaware, Pennsylvania, Maryland, District of Columbia, West Virginia, Ohio, Indiana, Lower Michigan and portions of Upper Michigan, Wisconsin, Illinois, Kentucky, Tennessee and Virginia as shown on the map below. In addition, transmission systems and generation within the metered boundaries of the LSEs are within **ReliabilityFirst** even if outside the respective service territories shown. The area is electrically contiguous.

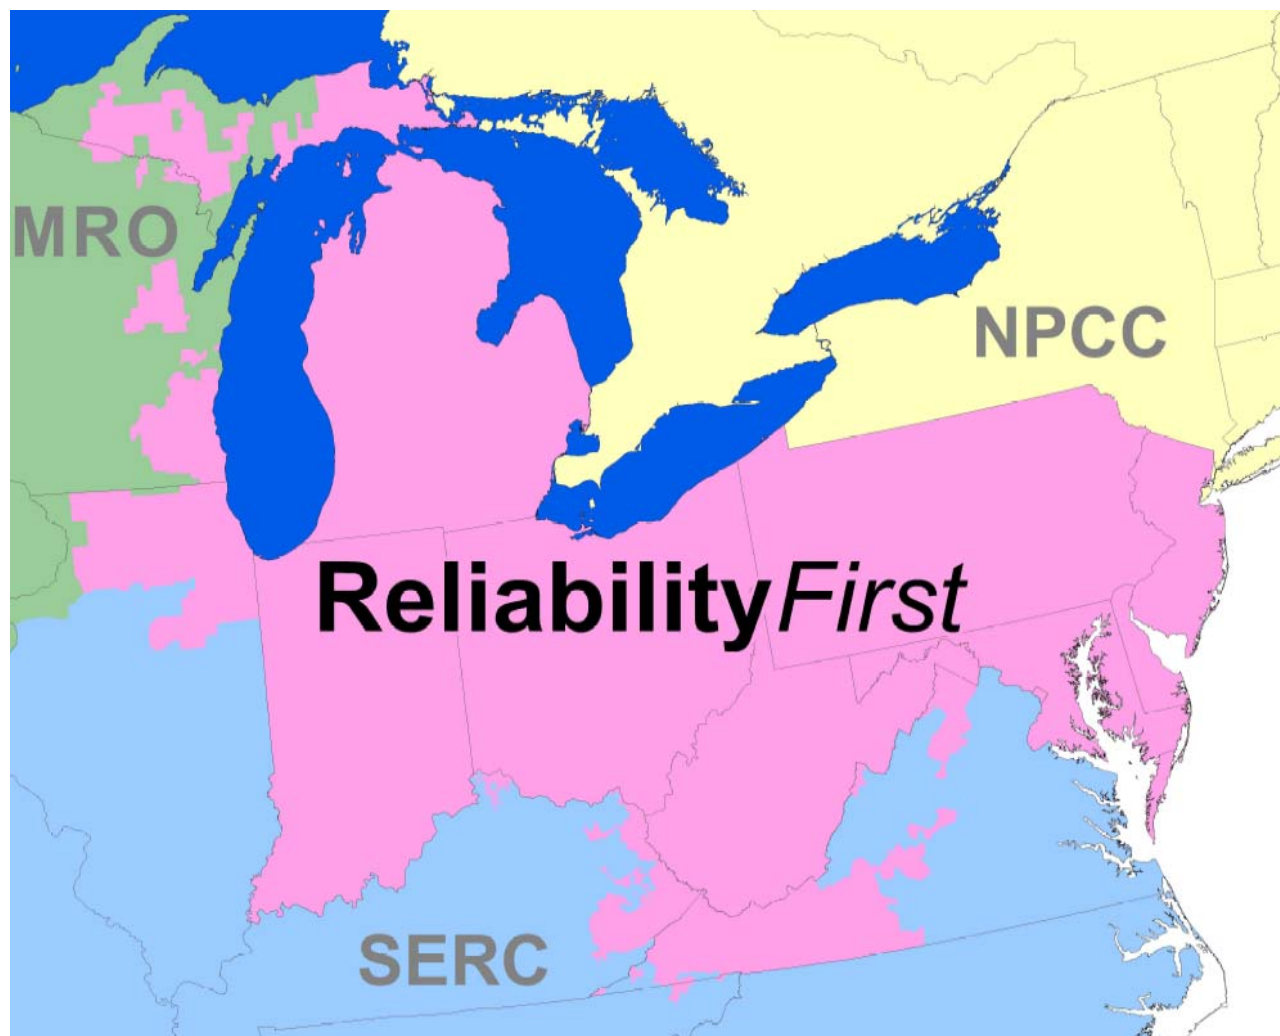

Exhibit B – Governance

Exhibit B shall set forth the Regional Entity’s bylaws, which, along with portions of the Standards Development Process as set out in Exhibit C, NERC agrees demonstrate that the Regional Entity meets the following criteria:

CRITERION 1: The Regional Entity shall be governed by an independent board, a balanced stakeholder board, or a combination independent and balanced stakeholder board. (Federal Power Act § 215(e)(4)(A), 18 C.F.R. § 39.8(c)(1), Order No. 672 at ¶ 727.)

CRITERION 2: The Regional Entity has established rules that assure its independence of the users and owners and operators of the bulk power system, while assuring fair stakeholder representation in the selection of its directors. Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 699, 700.)

CRITERION 3: If the Regional Entity has members, the Regional Entity has established rules that assure that its membership is open, that it charges no more than a nominal membership fee and agrees to waive the fee for good cause shown, and that membership is not a condition for participating in the development of or voting on proposed Regional Reliability Standards. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶¶ 170-173.)

CRITERION 4: The Regional Entity has established rules that assure balance in its decision-making committees and subordinate organizational structures and assure no two industry sectors can control any action and no one industry sector can veto any action. (Federal Power Act § 215(c)(2)(A) and (e)(4), 18 C.F.R. § 39.8(c)(2), Order No. 672 at ¶ 728.)

CRITERION 5: The Regional Entity has established rules that provide reasonable notice and opportunity for public comment, due process, openness, and balance of interests in exercising its duties. (Federal Power Act § 215(c)(2)(D) and (e)(4), 18 C.F.R. § 39.8(c)(2).)

**AMENDED AND RESTATED
BYLAWS OF
ReliabilityFirst Corporation
a Delaware nonprofit corporation
(the “Corporation”)**

[As adopted by the Members on December 19, 2006,
amended by the Board of Directors on September 21, 2007,
amended by the Members on December 6, 2007,
amended by the Board of Directors on May 22, 2008,
and amended by the Members on December 4, 2008]

**ARTICLE I.
DEFINITIONS**

Section 1.1. Act. “Act” shall mean Section 215 of the Federal Power Act (16 U.S.C. §824n).

Section 1.2. Adjunct Member. “Adjunct Member” shall mean any entity that does not qualify to join an Industry Sector but has been approved for membership. Adjunct Members may include Regulatory Participants.

Section 1.3. Affiliate. “Affiliate” shall mean, with respect to any entity, any other entity that, directly or indirectly, through one or more intermediaries, controls, or is controlled by, or is under common control with, such entity, as determined in the sole discretion of the Board of the Corporation. For this purpose, “control” may be presumed by the direct or indirect ownership of ten percent (10%) or more of the outstanding voting capital stock or other equity interests having ordinary voting power.

Section 1.4. Associate Member. “Associate Member” shall mean any entity that has joined an Industry Sector and is an Affiliate or Related Party of a Regular Member.

Section 1.5. Board. “Board” shall mean the Board of Directors of the Corporation.

Section 1.6. Bulk Power System. “Bulk Power System” shall mean facilities and control systems necessary for operating an interconnected electric energy transmission network (or any portion thereof) and electric energy from generation facilities needed to maintain transmission system reliability, but does not include facilities used in the local distribution of electricity.

Section 1.7. Certificate of Incorporation. “Certificate of Incorporation” shall mean the Certificate of Incorporation of the Corporation filed with the Delaware Secretary of State, as from time to time amended.

Section 1.8. Commission. “Commission” shall mean the Federal Energy Regulatory Commission.

Section 1.9. Delegation Agreement. “Delegation Agreement” shall mean the delegation agreement, as supplemented or amended from time to time, between NERC and the Corporation pursuant to which NERC has delegated its authority to the Corporation to propose and enforce Reliability Standards within the Region.

Section 1.10. Electronic Transmission. “Electronic transmission” shall mean any form of communication, not directly involving the physical transmission of paper, that creates a record that may be retained, retrieved and reviewed by a recipient thereof, and that may be directly reproduced in paper form by such a recipient through an automated process.

Section 1.11. ERO. “ERO” shall mean the electric reliability organization established under the Act to enforce Reliability Standards applicable to all owners, operators and users of the Bulk Power System in North America.

Section 1.12. Hearing Body. “Hearing Body” shall mean a group established with authority to conduct and render decisions in a formal compliance hearing of an entity registered in the NERC compliance registry who is the subject of a notice of alleged violation, proposed penalty or sanction, contested mitigation plan or contested remedial action directive.

Section 1.13. Industry Sector. “Industry Sector” shall mean a group of Bulk Power System owners, operators or users in the Region with substantially similar interests as pertinent to the purposes and operations of the Corporation of the Bulk Power System. The Industry Sectors shall consist of the following: (1) Suppliers, (2) Transmission Companies, (3) RTOs, (4) Small LSEs, (5) Medium LSEs, and (6) Large LSEs.

Section 1.14. Large LSEs. “Large LSEs” shall mean entities that serve, or whose Related Parties serve, end use load with annual energy delivery to such load in the Region of 50,000 GWh or greater.

Section 1.15. Medium LSEs. “Medium LSEs” shall mean entities that serve, or whose Related Parties serve, end use load with annual energy delivery to such load in the Region between 10,000 GWh and 50,000 GWh.

Section 1.16. Members. “Members” shall mean Regular Members, Associate Members and Adjunct Members.

Section 1.17. NERC. “NERC” shall mean the North American Electric Reliability Corporation, or any successor entity, which has been certified by the Commission as the ERO pursuant to the Act to establish and enforce Reliability Standards for the Bulk Power System.

Section 1.18. NERC Rules. “NERC Rules” shall mean the NERC Rules of Procedure as approved by the Commission.

Section 1.19. Net Energy for Load. “Net Energy for Load” shall mean net generation of an electric system plus energy received from others less energy delivered to others through interchange. It includes system losses, but excludes energy required for storage of energy at energy storage facilities. Calculations of net energy for load for all purposes under these Bylaws shall be based on the most recent calendar year for which data on net energy for load of the Region is available.

Section 1.20. Person. “Person” shall mean a natural person, corporation, cooperative, partnership, association, or other private or public entity.

Section 1.21. Region. “Region” shall mean the geographic boundaries of the Corporation described in the Delegation Agreement.

Section 1.22. Regional Entity. “Regional Entity” shall mean any entity with which NERC has entered into a delegation agreement to delegate, or which the Commission or a governmental authority in Canada or Mexico has directly assigned, enforcement authority for reliability standards for the Bulk Power System in a defined geographic area of North America.

Section 1.23. Regional Variance. “Regional Variance” shall mean an aspect of a Reliability Standard that applies only within a particular Regional Entity or group of Regional Entities. A Regional Variance may be used to qualify how a particular Regional Entity or Regional Entities achieves the objectives of a Reliability Standard or may establish different measures or performance criteria as necessary to achieve reliability within the particular Regional Entity or group of Regional Entities. A Regional Variance may not be inconsistent with any Reliability Standard as it would otherwise exist without the Regional Variance. Such a Regional Variance may be proposed by a Regional Entity and, if adopted by NERC and approved by the Commission, shall be enforced within the applicable Regional Entity or Regional Entities pursuant to delegated authority.

Section 1.24. Regional Reliability Standard. “Regional Reliability Standard” shall mean a type of Reliability Standard that is applicable only within a particular Regional Entity or group of Regional Entities. A Regional Reliability Standard may augment, add detail to, or implement another Reliability Standard or cover matters not addressed by other Reliability Standards. Regional Reliability Standards, upon adoption by NERC and approval by the Commission, shall be Reliability Standards and shall be enforced within the applicable Regional Entity or Regional Entities pursuant to delegated authorities.

Section 1.25. Regular Member. “Regular Member” shall mean any entity that has joined an Industry Sector that either (i) has no Affiliates or Related Parties that are Members or (ii) is the entity designated to be the Regular Member by any related group of Associate Members.

Section 1.26. Regulatory Participant. “Regulatory Participant” shall mean any state, District of Columbia or any provincial regulatory agency in the Region exercising authority over the rates, terms or conditions of electric service of an entity other than itself within the Region, or the planning, siting, construction or operation of electric

facilities of an entity other than itself within the Region, as well as the Commission, regional advisory bodies that may be established by the Commission, or any federal regulator or agency or any entity authorized by any state, the District of Columbia or any province to represent utility consumers.

Section 1.27. Related Party. “Related Party” shall mean, solely for purposes of the governance provisions of these Bylaws, any entity that is registered as part of another entity or is registered for other entities in the NERC Compliance Registry. For purposes of these Bylaws, a representative of a state or federal government agency shall not be deemed a Related Party with respect to each other, and a public body’s regulatory authority, if any, over a Member shall not be deemed to make it a Related Party with respect to that Member.

Section 1.28. Reliability Coordinator. “Reliability Coordinator” shall mean any entity that is recognized as a reliability coordinator by NERC in the Region that does not otherwise qualify as a Transmission Company or RTO.

Section 1.29. Reliability Standard. “Reliability Standard” shall mean a requirement to provide for Reliable Operation of the Bulk Power System, including, without limitation, the foregoing requirements for the operation of existing Bulk Power System facilities, including cyber security protection, and the design of planned additions or modifications to such facilities to the extent necessary for reliable operation of the Bulk Power System, but shall not include any requirement to enlarge Bulk Power System facilities or to construct new transmission capacity or generation capacity.

Section 1.30. Reliable Operation. “Reliable Operation” shall mean operating the elements of the Bulk Power System within equipment and electric system thermal, voltage and stability limits so that instability, uncontrolled separation, or cascading failure of the Bulk Power System will not occur as a result of a sudden disturbance, including a cyber security incident, or unanticipated failure of system elements.

Section 1.31. RTOs. “RTOs” shall mean PJM Interconnection L.L.C. and Midwest Independent Transmission System Operator, Inc., or such other entity that has been recognized by the Commission as a regional transmission operator or recognized functional equivalent in the Region.

Section 1.32. Small LSEs. “Small LSEs” shall mean (i) owners or operators of entities (or their representatives) that serve, or whose Related Parties serve, end use load with annual energy delivery to such load in the Region of 10,000 GWh or less, and (ii) end-use customers interconnected with the Bulk Power System with load of at least 100 MW at one location in the Region.

Section 1.33. Suppliers. “Suppliers” shall mean owners or operators of electric generation connected to the transmission system and wholesale power marketers in the Region.

Section 1.34. Transmission Companies. “Transmission companies” shall mean (i) owners (or those with ownership entitlement), planners and operators of

transmission facilities included in the Bulk Power System in the Region and (ii) Reliability Coordinators.

ARTICLE II. PURPOSE AND ACTIVITIES

Section 2.1. Purpose. The business or purposes to be conducted or promoted by the Corporation are:

- (a) to be a Regional Entity and exercise enforcement authority for Reliability Standards for the Bulk Power System in the Region pursuant to the Delegation Agreement;
- (b) to carry out certain of NERC's activities that are in furtherance of NERC's responsibilities as the ERO under the Act or in support of delegated functions, as specified in the NERC Rules or the Delegation Agreement; and
- (c) to engage in any other lawful act or activity for which not for profit corporations may be organized under the Delaware General Corporation Law.

The Corporation shall be exempt from federal income taxation pursuant to Section 501(c) of the Internal Revenue Code of 1986, as amended (hereinafter the "Code") as an organization described in Section 501(c)(6) of the Code. The Corporation shall not engage directly or indirectly in any activity which would invalidate its status as an organization exempt from taxation under Section 501(a) of the Code as an organization described in Section 501(c)(6) of the Code. No part of the net income to the Corporation shall inure to the benefit of or be distributed to its directors, officers, members or other private persons, except that the Corporation shall be authorized and empowered to pay reasonable compensation for services actually rendered.

Section 2.2. Activities. In support and furtherance of its purpose, and in accordance with and at all times subject to the NERC Rules and the Delegation Agreement, the Corporation's responsibilities shall include, but not be limited to, the following:

- (a) Reliability Standards. The Corporation shall:
 - (1) propose Reliability Standards, Regional Variances or modifications thereof to NERC; and
 - (2) develop Regional Reliability Standards through the Corporation's standards development procedure.
- (b) Enforcement. The Corporation shall enforce Reliability Standards (including Regional Reliability Standards and Regional Variances) within the Region through the Corporation's compliance enforcement program.

(c) Delegation-Related Services. The Corporation, on behalf of NERC, shall carry out certain of NERC's activities that are in furtherance of NERC's responsibilities as the ERO under the Act or in support of delegated functions, including:

- (1) Organization registration and certification.
- (2) Reliability readiness audit and improvement.
- (3) Reliability assessment and performance analysis.
- (4) Training and education.
- (5) Situational awareness and infrastructure security.

(d) Budget. The Corporation shall prepare and submit a budget to NERC for the amount of costs the Corporation will incur in support of delegated functions that are in furtherance of NERC's responsibilities as the ERO under the Act.

(e) Non-delegated Functions. The Corporation may conduct such other activities for or on behalf of the Members that are not delegated to the Corporation by NERC under the Delegation Agreement if authorized by the Board and not inconsistent with the Act, NERC Rules, the Delegation Agreement or these Bylaws.

Section 2.3. Not-for-Profit Corporation. The Corporation is operated as a Delaware non-stock nonprofit corporation and is organized pursuant to the general corporation law of the State of Delaware.

ARTICLE III. POWERS

Section 3.1. Powers. The Corporation shall have the power to engage in any lawful act or activity for which corporations may be organized under the general corporation law of the State of Delaware, subject to any limitations provided in applicable federal, provincial or state law or in the Certificate of Incorporation or these Bylaws.

ARTICLE IV. OFFICES

Section 4.1. Principal Office. The principal office of the Corporation shall be located initially within the Region, at such location as the Board may from time to time determine, giving consideration to the total cost to the Corporation and convenience of travel for staff, Members and Regulatory Participants. Once established, the principal office may remain in its location, even if outside the Region.

ARTICLE V. MEMBERS

Section 5.1. General. The terms and conditions of membership in the Corporation shall be as provided in the Certificate of Incorporation and these Bylaws if not inconsistent therewith. All Regular Members and Associate Members shall be required to join a single Industry Sector.

Section 5.2. Classes of Members. The Corporation shall have three (3) classes of Members: Regular Members, Associate Members and Adjunct Members.

5.2.1 Regular Members. Except as set forth in Sections 5.5 and 6.5 of these Bylaws, Regular Members shall have the right to vote on all matters within their Industry Sector. Regular Members shall have all the rights and obligations of being a Member in the Corporation.

5.2.2 Associate Members. Associate Members shall not be entitled to vote within their Industry Sector or for any other purpose as a Member. Associate Members shall otherwise have all the rights and obligations of being a Member in the Corporation.

5.2.3 Adjunct Members. Adjunct Members shall not be entitled to vote for any purpose as a Member. Adjunct Members shall otherwise have all the rights of being a Member in the Corporation.

Section 5.3. Qualifications of Members. Any entity eligible to join an Industry Sector may be a Regular Member or Associate Member of the Corporation. Any entity not eligible to join an Industry Sector may be an Adjunct Member of the Corporation.

Section 5.4. Admission of Members. New Members may join the Corporation upon submittal of an application, in a form approved by the Board, and upon payment of such fees or charges, if any, as may be established by the Board or required by NERC. Each Regular Member and Associate Member shall designate the Industry Sector it wishes to join. A Regular Member and Associate Member may change its Industry Sector designation once each calendar year upon notice to the Corporation. Such notice must be provided to the Secretary of the Corporation at least sixty (60) days before an annual or other meeting of Members if the change is to be effective for such meeting. The President shall review a membership application and may request demonstration by the applicant that it qualifies for membership in a particular Industry Sector. Any dispute with respect to a Regular Member's or Associate Member's qualifications for a particular Industry Sector shall be resolved by the Board. The President shall have authority to approve an application for membership, subject to review by the Board.

Section 5.5. Voting Rights. Each Regular Member in good standing shall be entitled to one vote in the Industry Sector in which it belongs on all matters submitted to a vote of Members. The Board may suspend voting rights for a Regular Member delinquent by more than 60 days in payment of any penalties or because of the Regular Member's failure to meet other obligations to the Corporation. Except with respect to the election of Industry Sector directors as described elsewhere in the Certificate of

Incorporation and these Bylaws, matters properly brought before the Members at an annual or special meeting shall be acted upon by the Industry Sectors voting together as a single class. The vote of each Industry Sector shall be split into an affirmative component based on votes for the matter(s) presented, and a negative component based on votes against the matter(s) presented, in direct proportion to the votes cast within the Industry Sector for and against the matter presented, rounded to two decimal places. If authorized in advance by the Board, voting may be held electronically under such terms and conditions as are approved by the Board.

Section 5.6. Transfer of Membership. A Member of the Corporation may not transfer its membership or a right arising from it except to any Person succeeding to all or substantially all of the assets of the Member. If challenged, the President shall have authority to approve any such transfer, subject to review by the Board.

Section 5.7. Obligations of Members. By applying for and becoming a Regular or Associate Member of the Corporation, each Member agrees to comply with all Reliability Standards, all NERC standards and requirements, and the other obligations of Members of the Corporation set forth in these Bylaws or duly adopted by the Board in order to achieve the purposes of the Corporation. A Regular or Associate Member also agrees to obligate all of its Affiliates that have an impact on reliability in the Region to comply with all Reliability Standards and NERC standards and requirements. These obligations include but are not limited to: (a) obligations to provide data and information needed to perform the functions of the Corporation, (b) payment of any authorized penalties resulting from non-compliance with Reliability Standards, (c) in the case of Regular Members, electing the Board, and (d) providing qualified candidates to serve on organizational working groups. Adjunct Members agree to provide data and information needed to perform the functions of the Corporation.

Section 5.8. Withdrawal. A Member may withdraw from participation in the Corporation upon notice given in writing or by electronic transmission to the Corporation. Such notice shall specify a date, not earlier than thirty (30) days from the date of notice, on which the withdrawal shall become effective.

Section 5.9. Funding and Dues.

5.9.1 NERC Funding. In accordance with and at all times subject to the NERC Rules and the Delegation Agreement, the Corporation shall equitably allocate its dues, fees and other charges for the delegated functions conducted by the Corporation among all end users. The Corporation shall submit to NERC annually a list of all load-serving entities within the Region. NERC will bill all load-serving entities in the Region for the Corporation's costs for the delegated functions based on Net Energy for Load and be responsible for collection.

5.9.2 Application Fee, User-Fees and Other Charges. The Corporation may charge a nominal fee, which shall be determined by the President, for the submission of

applications for membership. The Board of Directors may from time to time fix the amount of user-fees or other charges, if any, for activities that are not delegated to the Corporation by NERC under the Delegation Agreement and determine the methods of collection from entities that choose to participate in such activities.

Section 5.10. Penalties. If the Corporation initiates an investigation that leads to the imposition of a penalty, the Corporation shall receive any penalty monies that results from the investigation. All monies which the Corporation collects from the issuance of penalties shall be applied as a general offset to the Corporation's budget requirements for the subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the Corporation.

ARTICLE VI. MEETING OF MEMBERS

Section 6.1. Annual Meeting of Members. The Members shall hold an annual meeting in December of each year, or at such other time specified by the Board. At the annual meeting of Members: (i) each Industry Sector shall elect the successor(s), if any, for any director(s) from their Industry Sector whose term will expire before the next annual meeting of the Members, provided however, that any Industry Sector may elect a successor director representing such Industry Sector prior to such annual meeting, in accordance with the provisions of this Article VI, in which case the election of such succeeding director(s) shall be reported to the Corporation at such annual meeting; (ii) the President and Treasurer shall report on the activities and financial condition of the Corporation; (iii) the Industry Sectors shall elect a slate of at-large and independent directors to fill vacancies or expiring terms; and (iv) the Industry Sectors shall consider and act upon such other matters as are consistent with the notice of the annual meeting. The failure to hold an annual meeting in accordance with these Bylaws shall not affect the validity of a corporate action.

Section 6.2. Special Meetings of Members. Special meetings of the Members may be called by six (6) directors on the Board, by the President, or by Members if at least ten percent (10%) of the Regular Members sign, date, and deliver to the President one or more written demands for a special meeting describing the purpose for which it is to be held. Within fifteen (15) days after receipt of a demand for a special meeting from Regular Members, the President shall cause a special meeting to be called and held on notice in accordance with Section 6.4 of these Bylaws. If the President fails to cause a special meeting to be called and held as required by this Section 6.2, a Regular Member making the demand may call the meeting by giving notice under Section 6.4. In either event, notice of the meeting and the costs of the meeting shall be at the expense of the Corporation. The business transacted at a special meeting is limited to the purposes stated within the notice of the meeting. Business transacted at a special meeting that is not included in those stated purposes is voidable by or on behalf of the Corporation, unless ninety percent (90%) of the Regular Members entitled to vote were present at such meeting or have waived notice of the meeting under Section 6.4.

Section 6.3. Location of Meetings of Members. Meetings of Members shall be held at a location designated by the President or the Board. If a Regular Member calls

a meeting pursuant to Section 6.2, the Regular Members making the demand for the meeting may designate the location, provided the meeting must be held within the Region and in a facility of appropriate size to accommodate the Members.

Section 6.4. Notice of Meetings.

6.4.1 Notice Requirements. Notice of meetings of Members must be given at least five (5) days before the date of a meeting and not more than sixty (60) days before the date of a meeting. The notice must contain the date, time and place of the meeting, instructions for electronic attendance or voting, if applicable, and an agenda of the matters upon which action may be taken at the meeting. A matter may be added to the agenda of a meeting at the meeting upon the affirmative vote of three-quarters (3/4) of the Industry Sector votes cast on a motion to amend the agenda. If the meeting is an adjourned meeting and the date, time and place of the meeting were announced at the time of the adjournment, notice is not required unless a new record date for the adjourned meeting is or must be fixed. Notice shall be deemed given by the Corporation to the Members when (a) posted on the Corporation's public website in a reasonably prominent location, and (b) sent by mail, facsimile or reputable overnight delivery service or by electronic transmission to each Member's representative authorized pursuant to Section 6.10.1

6.4.2 Waiver of Notice; Objections. A Member may waive notice of a meeting of Members. A waiver of notice by a Member entitled to notice is effective whether given before, at, or after the meeting, and whether given in writing, or by attendance. Attendance by a Member at a meeting is a waiver of notice of that meeting, unless the Member objects at the beginning of the meeting to the transaction of business because the meeting is not lawfully called or convened, or objects before a vote on an item of business because the item may not lawfully be considered at that meeting and does not participate in the consideration of the item at that meeting.

Section 6.5. Record Date. The Board may fix a date not more than sixty (60) days before the date of a meeting of Members as the date for the determination of the Members entitled to notice of and entitled to vote at the meeting. When a date is so fixed, only Members on that date are entitled to notice and to vote at the meeting unless the Board fixes a new date for determining the right to notice and to vote, which it must do if the meeting is adjourned to a date more than sixty (60) days after the record date for determining Members entitled to notice of the original meeting.

Section 6.6. Right to Vote; Act of Members.

6.6.1 Industry Sector Voting. Voting of the Members shall be by Industry Sector, with each Industry Sector entitled to cast one vote. Each Member entitled to vote in an Industry Sector shall be entitled to cast one vote in its Industry Sector. The vote of each Industry Sector shall be split into an affirmative component based on votes for the pending motion, and a negative component based on votes against the pending motion, in direct proportion to the votes cast within the Industry Sector for and against the pending motion, rounded to two decimal places. To the extent practicable, all Member votes may be held electronically under such terms and conditions as are approved by the Board.

6.6.2 Act of Members. If a quorum is present, except with respect to any matter described in Section 6.6.3, a majority of the Industry Sector votes cast on the matter shall be the act of the Members.

6.6.3 Special Voting Requirements. Notwithstanding any other provision of these Bylaws, and except as set forth in the Certificate of Incorporation and Section 13.2 of these Bylaws, two-thirds (2/3) of the Industry Sector votes cast shall be required to:

(a) Amend the Bylaws, except as otherwise provided in Section 19.1 of these Bylaws. The substance of the proposed amendment must be contained in the notice of the meeting at which the vote will be taken; however, the Members may modify a proposed Bylaw amendment at the meeting.

(b) Approve any proposal to terminate the Corporation.

Section 6.7. Quorum. A quorum for a meeting of Members is a majority of the Regular Members entitled to vote in each Industry Sector at the meeting. A quorum for a meeting of an Industry Sector is a majority of the Regular Members of that Industry Sector entitled to vote at the meeting. In both cases, electronic participation is acceptable if authorized by the Board. A quorum is necessary for the transaction of business at a meeting of Members or of any Industry Sector. If a quorum is not present, a meeting may be adjourned for that reason by the Industry Sectors or Regular Members then represented or present.

Section 6.8. Action by Ballot. All elections of directors shall be by written ballot. Any other action that may be taken at a regular or special meeting of Members or any Industry Sector may be taken without a meeting or during a meeting if the Corporation mails or delivers a written ballot to every Regular Member entitled to vote on the matter. Approval by written ballot is valid only when the number of votes cast by ballot equals or exceeds the quorum required to be present at a meeting authorizing the action, and the number of approvals equals or exceeds the number of votes that would be required to approve the matter at a meeting at which the total number of votes cast was the same as the number of votes cast by ballot. Solicitations for votes by written ballot must: (i) indicate the number of responses needed to meet the quorum requirements; (ii) state the percentage of approvals necessary to approve the matter; (iii) specify the time by which a ballot must be received by the Corporation in order to be counted; and (iv) may not be revoked once received. If authorized by the Board, the requirement of a written ballot shall be satisfied by a ballot submitted by electronic transmission provided that any such electronic transmission must either set forth or be submitted with information from which it can be determined that the electronic transmission was authorized by the Member.

Section 6.9. Action by Electronic Communication. A conference among Members by a means of communication through which the participants may simultaneously hear each other during the conference is a meeting of the Members, if the same notice is given of the conference as would be required for a meeting and if the number of persons participating in the conference is a quorum. Participation in a meeting by this means is personal presence at the meeting. A Member may participate

in a meeting of the Members by a means of communication through which the Member, other persons participating, and all persons physically present at the meeting may simultaneously communicate with each other during the meeting. Participation in a meeting by this means constitutes personal presence at the meeting.

Section 6.10. Member Representatives; Proxies.

6.10.1 Designation of Representative. Each year prior to the annual meeting of Members, each Regular Member shall designate the individual authorized to vote on Corporation matters on behalf of the Member, in accordance with procedures approved by the Board. A Regular Member may change such designation at any time by providing at least twenty-four (24) hour written notice to the Secretary of the Corporation. Such notice may be provided by electronic transmission.

6.10.2 Authorization. The individual designated to vote by a Regular Member may appoint a proxy to vote or otherwise act for the Regular Member at any meeting by signing an appointment form either personally or by an attorney so designated by the Regular Member. Such authorization may be in writing or by means of electronic transmission to the person who will be the holder of the proxy, provided that such electronic transmission must either set forth or be submitted with information from which it can be determined that the electronic transmission was authorized by the Member representative.

6.10.3 Effective Period. An appointment of a proxy is effective when received by the Secretary or other officer or agent authorized to tabulate votes. An appointment is valid for the next regular or specially scheduled meeting or ballot by electronic transmission. However, a proxy is not valid for more than sixty (60) days from its date of execution.

6.10.4 Revocation. An appointment of a proxy is revocable by a Regular Member. Appointment of a proxy is revoked by the person appointing the proxy either by open declaration at a meeting or by signing and delivering a revocation in writing or by electronic transmission to the Secretary or other officer or agent authorized to tabulate proxy votes. This may be done either in a statement that the appointment of the proxy is revoked or by a subsequent appointment that shall serve to cancel all prior proxies.

Section 6.11. Public Notice of Member Meetings. Notice to the public of the dates, times and places of meetings of the Members, and all nonconfidential material provided to the Members, shall be posted on the Corporation's website at approximately the same time that notice is given to the Members. Meetings of the Members shall be open to the public, subject to reasonable limitations due to the availability and size of meeting facilities; provided, that the meeting may be held in or adjourn to closed session to discuss matters of a confidential nature, including, but not limited to, personnel matters, compliance and enforcement matters, litigation or commercially sensitive or critical infrastructure information of a Member or other Person.

Section 6.12. Posting of Minutes. Minutes of meetings of Members shall be posted on the Corporation's website when available.

Section 6.13. Reimbursement of Member Expenses. The Corporation will be under no obligation to reimburse Members for expenses associated with their attendance at regular or special Member meetings.

ARTICLE VII. BOARD OF DIRECTORS

Section 7.1. General. The composition of the Board and the terms of office of the directors, the manner of their nomination, election or appointment, and other terms and conditions of their service, shall be as provided in the Certificate of Incorporation and these Bylaws if not inconsistent therewith.

Section 7.2. Management of Corporation. The business of the Corporation shall be managed under the direction of the Board. Specific functions of the Board shall include, but not be limited to:

- (a) govern the Corporation and oversee all of its activities;
- (b) establish and oversee all organizational groups;
- (c) approve, revise and enforce Reliability Standards utilizing a fair, open, balanced and inclusive process;
- (d) establish compliance monitoring procedures and requirements, and penalties and sanctions for non-compliance consistent with applicable NERC Rules;
- (e) impose penalties and sanctions consistent with the NERC Rules and the procedures approved by the Board;
- (f) establish and approve an annual budget for submission to NERC;
- (g) hire the Corporation's president and approve his or her salary;
- (h) annually at the first regular Board meeting following the annual meeting of Members, elect a Chair ("Chair") and a vice-chair from among the directors on the Board; and
- (i) establish Board committees as appropriate.

Section 7.3. Voting. Each director shall have one vote with respect to decisions of the Board.

Section 7.4. Composition of the Board.

- (a) The Board shall consist of fourteen (14) or fifteen (15) directors which number shall be established from time to time by resolution of the Board,

which resolution shall in no event have the effect of terminating the term of any incumbent director.

(b) Eight directors shall be elected by the Industry Sectors as follows:

- (i) Suppliers shall elect two (2) directors;
- (ii) Transmission Companies shall elect two (2) directors;
- (iii) RTOs shall select one (1) director;
- (iv) Small LSEs shall elect one (1) director;
- (v) Medium LSEs shall elect one (1) director; and
- (vi) Large LSEs shall elect one (1) director.

(c) Three (3) directors shall be at-large. At-large directors shall be elected by all of the Industry Sectors voting together as a single class.

(d) Three (3) directors, if the Board consists of fourteen (14) directors, and four (4) directors, if the Board consists of fifteen (15) directors, shall be independent from the Corporation and any Member or any Affiliate or Related Party of any Member. Independent directors shall be elected by all of the Industry Sectors voting together as a single class.

(e) Industry Sectors shall elect their respective sector and at-large directors from among individuals holding senior management positions in Member organizations. Any sector-elected or at-large director whose Member organization changes Industry Sectors or who ceases to hold a senior management position in a Member organization shall continue to serve out his or her remaining term, unless such director resigns or is removed. When selecting at-large directors, Industry Sectors shall consider such factors as the geographic and functional representation of the Board. No two directors may be employees of a single Member or any Affiliate or Related Party of a Member or any Affiliate.

(f) An independent director is a person (i) who is not an officer or employee of the Corporation, an officer, director, or employee of a Member, or an officer, director or employee of any entity that would reasonably be perceived as having a direct financial interest in the outcome the Board's decisions, or (ii) who does not have a relationship that would interfere with the exercise of independent judgment in carry out the responsibilities of a director. The Board may adopt additional standards for director independence not inconsistent herewith.

(g) At-large and independent directors shall be nominated by the nominating and governance committee of the Board. The nominating and governance committee shall seek out for nomination independent directors from diverse backgrounds, who will contribute to the effective functioning of the Board and the Corporation by bringing a broad range of industry expertise, viewpoints,

experiences, skill sets and knowledge. If an incumbent independent director is not re-nominated, the nominating and governance committee will use reasonable efforts to ensure that diverse candidates are in the pool of potential nominees for the open independent director position and may retain an independent consultant to identify individuals qualified and willing to serve as an independent director.

(h) Any director which the full Board has determined has a conflict of interest on any compliance or enforcement matter brought before the Board shall not vote on such matter and shall recuse himself or herself from all Board deliberations concerning such matter.

(i) There will be no alternates or proxies for directors.

Section 7.5. Terms of Directors. The directors will be divided into three classes. The number of directors in each class shall be as nearly equal as possible. The term of office of the first class will expire at the second annual meeting of Members; the term of office of the second class will expire one year thereafter; and the term of office of the third class two years thereafter. At each annual meeting of Members, directors shall be chosen for a three year term to succeed those whose term expires. No two at-large directors and no two directors of the same Industry Sector shall be in the same class. At least one (1) independent director shall be in each class. Each director shall hold office until (a) the expiration of the term for which he or she was elected and until his or her successor is elected and qualified, or (b) his or her earlier death, resignation or removal. Any director may be removed at any time by the affirmative vote of two-thirds of the Industry Sector or Industry Sectors, as applicable, electing such director. A director may be removed by the Board for non-attendance at three consecutive Board meetings.

Section 7.6. Reimbursement. Independent directors shall have the right to reimbursement by the Corporation of their actual reasonable travel expenses to Board meetings or when specifically selected to represent the Corporation at a business meeting. The directors elected by the Industry Sectors and the at-large directors shall not be reimbursed by the Corporation for any expenses, unless specifically approved in advance by resolution of the Board.

Section 7.7. Resignations; Vacancies.

(a) Resignations. A director may resign at any time from the Board upon notice given in writing or by electronic transmission to the Corporation. Such resignation shall take effect at the time of its receipt by the Corporation.

(b) Vacancies. If an Industry Sector or at-large director resigns, dies or otherwise becomes incapacitated or is removed during the term of office for which elected, the directorship shall thereupon be vacant and shall be filled by the Industry Sector or Industry Sectors, as applicable, by written or electronic ballot in accordance with the procedures and requirements set forth above. The successor director elected by the Industry Sector shall hold office for the unexpired term of the vacated directorship replaced. If an independent director resigns, dies or otherwise becomes incapacitated or is removed during the term

of office for which elected or ceases to be independent, as determined by the Board, his or her directorship shall thereupon be vacant and may be filled by the Board until the next annual meeting of Members, at which time a permanent successor shall be elected by the Industry Sectors for the remainder of the unexpired term. Upon an increase in the number of directors on the Board in accordance with Section 7.4(a) of these Bylaws, the independent directorship created thereby may be filled by resolution of the Board and any independent director so chosen shall hold office until the next annual meeting of Members, at which time a permanent successor shall be elected by the Industry Sectors for the remainder of such director's unexpired term.

Section 7.8. Meetings; Notice; Waiver.

(a) Meetings. An annual meeting of the Board shall be held without notice immediately following the annual meeting of the Members. The Board shall elect the Chair and Vice-Chair for the next year at the annual meeting. In addition, regular meetings may be held at such time or times as fixed by the Board. Special meetings of the Board may be called by the Board's Chair, the President or by any three directors and shall be held at the principal office of the Corporation, or such other place within the Region as determined by the Chair or the President after consultation with the Board.

(b) Notice. Notice of the dates, times, and places of all regular and special meetings of the Board shall be published by the Secretary and provided to all directors and Members not less than three (3) days prior to the date of the meeting. Notice shall be deemed given by the Corporation to directors and the Members when (a) posted on the Corporation's public website in a reasonably prominent location, and (b) sent by mail, facsimile or reputable overnight delivery service or by electronic transmission to each director and each Member's representative authorized pursuant to Section 6.10.1.

(c) Waiver. Any person entitled to notice of a regular or special meeting of the Board may waive notice thereof. A waiver of notice by a person entitled to notice is effective whether given before, at, or after the meeting, and whether given in writing or by attendance. Attendance by a director at a meeting of the Board is a waiver of notice of that meeting, unless the director objects at the beginning of the meeting to the transaction of business because the meeting is not lawfully called or convened, or objects before a vote on an item of business because the item may not lawfully be considered at that meeting and does not participate in the consideration of the item at that meeting.

Section 7.9. Quorum. For the Board to take action at a meeting, a quorum of directors must be present. A quorum is a majority of the directors then in office, provided that: (a) if there are three or four independent directors holding office, two independent directors must be present to constitute a quorum, or (b) if there are two independent directors holding office, one independent director must be present to constitute a quorum. If there is only one independent director or no independent directors holding office, there is no requirement that an independent director be present

in order for the Board to have a quorum. In the absence of a quorum, a majority of the directors present may adjourn a meeting, without notice, except as may be given at such meeting, until a quorum is present.

Section 7.10. Board Action. The act of a majority of the directors present at a meeting at which a quorum is present shall be the act of the Board, unless the act of a greater number is required by law or these Bylaws.

Section 7.11. Action Without a Meeting. Any action required or permitted to be taken at any meeting of the Board or any committee thereof may be taken without a meeting if all members of the Board or committee, as the case may be, consent thereto in writing or by electronic transmission, and the writing or writings or electronic transmission or transmissions are filed with the minutes of proceeding of the Board or the committee. Any nonconfidential material provided to the Board or a committee in connection with such action shall be posted on the Corporation's website at approximately the same time that it is given to the Board or the committee. The results of all actions taken by the Board or any committee thereof without a meeting shall be promptly posted on the Corporation's website.

Section 7.12. Action by Electronic Communication. A conference among directors by a means of communication through which the directors may simultaneously hear each other during the conference is a Board meeting if the same notice is given of the conference as would be required for a meeting and if the number of directors participating in the conference is a quorum. Participation in a meeting by this means constitutes personal presence at the meeting. A director may participate in a Board meeting by any means of communication through which the director, other directors participating, and all directors physically present at the meeting may simultaneously communicate with each other during the meeting.

Section 7.13. Board Committees. The Board shall have an audit committee, compensation committee, nominating and governance committee and compliance committee, and such other committees the Board deems necessary and appropriate. Each committee shall be comprised of not less than three directors. The compliance committee shall be comprised of a minimum of five directors, a majority of whom are independent directors. All independent directors shall serve on the compliance committee. The Board may require that a minimum number of independent directors serve on any or all other Board committees. The Board shall have the power to appoint, and to delegate authority to, such other committees of the Board as it determines to be appropriate from time to time. The Board may require any committee to adopt a charter, subject to approval by the Board, governing the activities and authority of the committee and the composition of its members.

Section 7.14. Hearing Body. The Hearing Body shall consist of the Board compliance committee.

7.14.1 Quorum. For the Hearing Body to take action at a hearing, a quorum of members must be present. A quorum is a majority of members of the Hearing Body, provided that two independent directors are present. If a quorum of the Hearing Body does not remain after any recusals and rulings on motions for disqualification, the

compliance committee shall appoint a new member to the Hearing Body from among other directors to create a quorum, provided that the requirement that at least two independent directors are present for a quorum shall at all times continue to be met. Such new member shall serve on the Hearing Body for purposes of the subject hearing through the conclusion of the hearing but not thereafter.

7.14.2 Voting. Each Hearing Body member shall have one vote with respect to matters presented at a hearing. Action may be taken at a hearing at which a quorum is present upon the vote of the majority of members present.

Section 7.15. Public Notice of Board Meetings. Notice to the public of the dates, times and places of Board meetings, including committees thereof, and all nonconfidential material provided to the Board or the committees, shall be posted on the Corporation's website, and notice of Board and committee meetings shall be sent by electronic transmission to Members, at approximately the same time that notice is given to the Board or the committee, as the case may be. Board and committee Meetings shall be open to all Members and the public, subject to reasonable limitations due to the availability and size of meeting facilities; provided, that any meeting may be held in or adjourn to closed session to discuss matters of a confidential nature, including, but not limited to, personnel matters, compliance and enforcement matters, litigation or commercially sensitive or critical infrastructure information of a Member or other Person.

Section 7.16. Posting of Minutes. Minutes of Board and committee meetings shall be posted on the Corporation's website when available.

Section 7.17. Compensation of Directors. The directors elected by the Industry Sectors and the at-large directors shall not receive compensation for their service to the Corporation as directors on the Board. The independent directors shall be entitled to such compensation as the Board may from time to time determine. Nothing contained in these Bylaws shall preclude any director from receiving compensation for services to the Corporation in any other capacity.

ARTICLE VIII. ORGANIZATIONAL GROUPS

Section 8.1. Establishment of Organizational Groups. The Board shall establish such organizational groups, consisting of committees, sub-committees, task forces and working groups of Members, as are necessary and appropriate to accomplish the purposes of the Corporation in an efficient and cost-effective manner. All organizational groups shall be subject to the direction and control of the Board. The membership of organizational groups shall be determined based upon experience, expertise and geographic diversity and to the extent practicable shall include balanced representation of the Industry Sectors. The Board shall establish policies and procedures governing the creation of organizational groups, how they are populated, how voting and related matters are conducted, how they may be reorganized and the direction and termination of such groups. The Board shall conduct a review of all

organizational groups of the Corporation on an annual basis to ensure that the business of the Corporation is conducted in an efficient, cost-effective manner.

Section 8.2. Reimbursement. The Board may authorize reimbursement for persons acting on behalf of the Corporation, as necessary in the interests of the Corporation.

ARTICLE IX. OFFICERS

Section 9.1. Officers. The officers of the Corporation shall include a President, one or more Vice Presidents, a Secretary, a Treasurer and any other officers as may be elected or appointed in accordance with the provisions of this Article. The Board may elect or appoint any additional officers that it deems desirable, such other officers to have the authority and perform the duties prescribed by the Board. The same individual may hold any number of offices, except that of President.

Section 9.2. Election and Term of Office. The officers of the Corporation shall be elected annually by the Board at the annual meeting of the Board. Each officer shall hold office at the pleasure of the Board. If the election of officers is not held at such meeting, such election shall be held as soon thereafter as is convenient. New officers may be created and the positions filled at any meeting of the Board. Each elected officer shall hold office until his or her successor has been duly elected and qualified or upon his or her earlier resignation or removal.

Section 9.3. Removal. Any officer elected by the Board may be removed by the affirmative vote of two-thirds (2/3) of the Board whenever in its judgment the best interests of the Corporation would be served thereby, but such removal shall be without prejudice to the contract rights, if any, of the officer so removed. Election or appointment of an officer or agent shall not of itself create contract rights.

Section 9.4. Vacancies. A vacancy in any office because of death, incapacity, resignation, removal, disqualification, or otherwise, may be filled by the Board for the unexpired portion of the term.

Section 9.5. President. The President shall:

- (a) be the principal executive and operating officer of the Corporation;
- (b) sign certificates of membership, and may sign any deeds, mortgages, deeds of trust, notes, bonds, contracts or other instruments authorized by the Board to be executed, except in cases in which the signing and execution thereof shall be expressly delegated by the Board or by these Bylaws to some other officer or agent of the Corporation; and
- (c) perform all duties incident to the office of President, including hiring and directing staff, and such other duties as may be prescribed by the Board from time to time.

Section 9.6. Vice Presidents. The Vice President(s) shall perform such duties and have such powers as the Board or President may from time to time prescribe. At the request of the Board, the Vice President (or in the event there be more than one Vice President, the Vice Presidents in the order designated, or in the absence of any designation, then in the order of their election) shall perform the duties of the President, and when so acting, shall have all the powers of and be subject to all the restrictions upon the President.

Section 9.7. Secretary. The Secretary shall ensure that the following duties are carried out:

- (a) the minutes of the meetings of the Members and of the Board, and each committee thereof, are recorded;
- (b) all required notices are duly given in accordance with these Bylaws and as required by law;
- (c) a register of the current names and addresses of all Members is maintained and posted on the Corporation's website;
- (d) a complete copy of the Certificate of Incorporation and Bylaws of the Corporation containing all amendments thereto are kept on file at all times and posted on the Corporation's website, which copies shall always be open to the inspection of any Member; and
- (e) generally perform all duties incident to the office of Secretary and such other duties as may be prescribed by the Board from time to time.

Section 9.8. Treasurer. The Treasurer shall be responsible for the following activities:

- (a) maintain custody of all funds and securities of the Corporation;
- (b) receipt of and the issuance of receipts for all monies due and payable to the Corporation and for deposit of all such monies in the name of the Corporation in such bank or banks or financial institutions as shall be selected by the Board; and
- (c) generally perform all duties incident to the office of Treasurer and such other duties as may be prescribed by the Board from time to time.

ARTICLE X. CERTIFICATES OF MEMBERSHIP

Section 10.1. Certificates of Membership. The Board may, but need not, provide for the issuance of certificates evidencing membership in the Corporation, which certificates shall be in such form as may be determined by the Board.

ARTICLE XI.
BOOKS AND RECORDS

Section 11.1. Books and Records; Financial Statements. The Corporation shall keep at such office selected by the Board correct and complete copies of its Certificate of Incorporation and Bylaws, accounting records, and minutes of meetings of Members, Board, and committees having any of the authority of the Board. A Member, or the agent or attorney of a Member, may inspect all books and records for any proper purpose at any reasonable time. Upon request, the Corporation shall give the Member a statement showing the financial result of all operations and transactions affecting income and expenses during its last annual accounting period and a balance sheet containing a summary of its assets and liabilities as of the closing date of the accounting period.

ARTICLE XII.
FISCAL YEAR

Section 12.1. Fiscal Year. The fiscal year of the Corporation shall be the calendar year.

ARTICLE XIII.
TRANSFER OF ASSETS

Section 13.1. Member Approval Not Required. Subject to restrictions set forth in the Certificate of Incorporation, the Corporation, by affirmative vote of the Board, may sell, lease, transfer, or dispose of its property and assets in the usual and regular course of its activities and grant a security interest in all or substantially all of its property and assets in the usual and regular course of its activities, upon those terms and conditions and for those considerations, which may be money, securities, or other instruments for the payment of money or other property, as the Board considers expedient, in which case no Member approval is required.

Section 13.2. Member Approval Required. Subject to restrictions set forth in the Certificate of Incorporation, the Corporation may sell, lease, transfer, or dispose of all or substantially all of its property and assets, including its good will, not in the usual and regular course of its activities, upon those terms and conditions and for those considerations, which may be money, securities, or other instruments for the payment of money or other property, as the Board considers expedient only when approved at a regular or special meeting of the Members by the affirmative vote of two-thirds (2/3) of all the Members. Notice of the meeting must be given to the Members. The notice must state that a purpose of the meeting is to consider the sale, lease, transfer, or other disposition of all or substantially all of the property and assets of the Corporation.

ARTICLE XIV.
CONTRACTS, CHECKS, DEPOSITS, AND GIFTS

Section 14.1. Contracts. The Board may authorize any officer or officers or agent or agents of the Corporation, in addition to the officers so authorized by these Bylaws, to enter into any contract or execute and deliver any instrument in the name of and on behalf of the Corporation, and such authority may be general or may be confined to specific instances.

Section 14.2. Checks, Drafts, or Orders. All checks, drafts, or orders for the payment of money, notes, or other evidences of indebtedness issued in the name of the Corporation, may be signed by such officer or officers or agent or agents of the Corporation, and in such manner, as shall from time to time be determined by resolution of the Board.

Section 14.3. Deposits. All funds of the Corporation shall be deposited to the credit of the Corporation in such banks, trust companies, or other depositories as the Board may select.

Section 14.4. Gifts. The Board may accept on behalf of the Corporation any contribution, gift, bequest, or devise for any purpose of the Corporation.

ARTICLE XV.
INSURANCE, LIMITATION ON LIABILITY AND INDEMNIFICATION

Section 15.1. Insurance. The President is authorized to procure insurance to protect the Corporation against damages arising out of or related to any directive, order, procedure, action or requirement of the Corporation.

Section 15.2. Limitations on Liability. As provided in Article Fourteenth of the Certificate of Incorporation, a director of the Corporation shall not be personally liable to the Corporation or its Members for monetary damages for breach of fiduciary duty as a director, except for liability (i) for any breach of the director's duty of loyalty to the Corporation or its Members, (ii) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law, (iii) under Section 174 of the Delaware General Corporation Law or (iv) for any transaction from which the director derived any improper personal benefit. If the Delaware General Corporation Law is amended to authorize corporate action further eliminating or limiting the personal liability of directors, then the liability of a director of the Corporation shall be eliminated or limited to the fullest extent permitted by the Delaware General Corporation Law, as so amended. Any repeal or modification of Article Fifteenth of these Bylaws by the Members of the Corporation shall not adversely affect any right or protection of a director of the Corporation existing at the time of such repeal or modification.

Section 15.3. Right to Indemnification.

15.3.1 Indemnified Persons. Each person who was or is made a party or is threatened to be made a party to or is involved in or called as a witness in any Proceeding because he or she is an Indemnified Person shall be indemnified and held

harmless by the Corporation to the fullest extent permitted under the Delaware General Corporation Law (the “DGCL”), as the same now exists or may hereafter be amended (but, in the case of any such amendment, only to the extent that such amendment permits the Corporation to provide broader indemnification rights than the DGCL permitted the Corporation to provide prior to such amendment). Such indemnification shall cover all expenses incurred by an Indemnified Person (including, but not limited to, attorneys’ fees and other expenses of litigation) and all liabilities and losses (including, but not limited to, judgments, fines, ERISA or other excise taxes or penalties and amounts paid or to be paid in settlement) incurred by such person in connection therewith.

15.3.2 Denial of Authorization for Certain Proceedings. Notwithstanding anything to the contrary in this Section 15.3, except with respect to indemnification of Indemnified Persons specified in paragraph 15.3.3 of this Section 15.3, the Corporation shall indemnify an Indemnified Person in connection with a Proceeding (or part thereof) initiated by such person only if authorization for such Proceeding (or part thereof) was not denied by the Board of the Corporation prior to the earlier of 60 days after receipt of notice thereof from such Indemnified Person.

15.3.3 Certain Defined Terms. For purposes of this Section 15.3, the following terms shall have the following meanings (such meanings to be equally applicable to both the singular and plural forms of the terms defined):

(1) a “Proceeding” is any investigation, action, suit or proceeding, whether civil, criminal, administrative or investigative, and any appeal therefrom.

(2) an “Indemnified Person” is a person who is, was, or had agreed to become a Director of the Corporation (including, in the case of such person seeking indemnification while serving as a Director who is or was an officer of the Corporation, such person in his capacity as an officer.)

15.3.4 Expenses. Expenses, including attorneys’ fees, incurred by a person indemnified pursuant to paragraph 15.3.1 in defending or otherwise being involved in a Proceeding shall be paid by the Corporation in advance of the final disposition of such Proceeding, including any appeal therefrom, upon receipt of an undertaking (the “Undertaking”) by or on behalf of such person to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by the Corporation; provided that in connection with a Proceeding (or part thereof) initiated by such person, except a Proceeding authorized by paragraph 15.3.5, the Corporation shall pay said expenses in advance of final disposition only if authorization for such Proceeding (or part thereof) was not denied by the Board of the Corporation prior to the earlier of 60 days after receipt of a request for such advancement accompanied by the Undertaking. A person to whom expenses are advanced pursuant hereto shall not be obligated to repay such expenses until the final determination of any pending Proceeding in a court of competent jurisdiction concerning the right of such person to be indemnified or the obligation of such person to repay such expenses.

15.3.5 Protection of Rights. If a claim by an Indemnified Person under paragraph 15.3.1 is not promptly paid in full by the Corporation after a written claim has been

received by the Corporation or if expenses pursuant to paragraph 15.3.4 have not been promptly advanced after a written request for such advancement by an Indemnified Person (accompanied by the Undertaking required by paragraph 15.3.4) has been received by the Corporation, the claimant may at any time thereafter bring suit against the Corporation to recover the unpaid amount of the claim or the advancement of expenses. If successful, in whole or in part, in such suit, such claimant shall also be entitled to be paid the reasonable expense thereof. It shall be a defense to any such action (other than an action brought to enforce a claim for expenses incurred in defending any Proceeding in advance of its final disposition where the Undertaking has been tendered to the Corporation that indemnification of the claimant is prohibited by law, but the burden of proving such defense shall be on the Corporation. Neither the failure of the Corporation (including the Board, independent legal counsel, or the Members) to have made a determination, if required, prior to the commencement of such action that indemnification of the claimant is proper in the circumstances, nor an actual determination by the Corporation (including the Board, independent legal counsel, or the Members) that indemnification of the claimant is prohibited, shall be a defense to the action or create a presumption that indemnification of the claimant is prohibited.

15.3.6 Miscellaneous.

(a) Non-Exclusivity of Rights. The rights conferred on any person by this Section 15.3 shall not be exclusive of any other rights which such person may have or hereafter acquire under any statute, provision of the Certificate of Incorporation, Bylaw, agreement, vote of Members or disinterested directors or otherwise. The Board shall have the authority, by resolution, to provide for such other indemnification of directors, and such indemnification of officers, delegates, employees, agents, or others of the Corporation as it shall deem appropriate.

(b) Insurance, contracts, and funding. The Corporation may maintain insurance, at its expense, to protect itself and any director, officer, employee, delegate or agent of the Corporation against any expenses, liabilities or losses, whether or not the Corporation would have the power to indemnify such person against such expenses, liabilities or losses under the DGCL. The Corporation may enter into contracts with any director, officer, or employee of the Corporation in furtherance of the provisions of this Section 15.3 and may create a trust fund, grant a security interest or use other means (including, without limitation, a letter of credit) to ensure the payment of such amounts as may be necessary to effect the advancing of expenses and indemnification as provided in such contracts or as otherwise provided in this Section 15.3.

(c) Contractual nature. The provisions of this Section 15.3 shall continue as to a person who has ceased to be a director and shall inure to the benefit of the heirs, executors and administrators of such person. This Section 15.3 shall be deemed to be a contract between the Corporation and each person who, at any time that this Section 15.3 is in effect, serves or agrees to serve in any capacity which entitles him to indemnification and advancement of expenses hereunder and any repeal or other modification of this Section 15.3 or any repeal

or modification of the DGCL or any other applicable law shall not limit any rights of indemnification for Proceedings then existing or arising out of events, acts or omissions occurring prior to such repeal or modification, including, without limitation, the right to indemnification and advancement of expenses for Proceedings commenced after such repeal or modification to enforce this Section 15.3 with regard to Proceedings arising out of acts, omissions or events arising prior to such repeal or modification.

(d) Cooperation. Each Indemnified Person shall cooperate with the person, persons or entity making the determination with respect to such Indemnified Person's entitlement to indemnification under this Section 15.3, including providing to such person, persons or entity upon reasonable advance request any documentation or information which is not privileged or otherwise protected from disclosure and which is reasonably available to such Indemnified Person and reasonably necessary to such determination. Any costs or expenses (including attorneys' fees and disbursements) incurred by such Indemnified Person in so cooperating with the person, persons or entity making such determination shall be borne by the Corporation (irrespective of the determination as to such Indemnified Person's entitlement to indemnification) and the Corporation hereby indemnifies and agrees to hold such Indemnified Person harmless therefrom.

(e) Subrogation. In the event of any payment under this Section 15.3 to an Indemnified Person, the Corporation shall be subrogated to the extent of such payment to all of the rights of recovery of such Indemnified Person, who shall execute all papers required and take all action necessary to secure such rights, including execution of such documents as are necessary to enable the Corporation to bring suit to enforce such rights.

(f) Severability. If this Section 15.3 or any portion hereof shall be invalidated or held to be unenforceable on any ground by any court of competent jurisdiction, the decision of which shall not have been reversed on appeal, this Section 15.3 shall be deemed to be modified to the minimum extent necessary to avoid a violation of law and, as so modified, this Section 15.3 and the remaining provisions hereof shall remain valid and enforceable in accordance with their terms to the fullest extent permitted by law.

ARTICLE XVI. TRANSITION

Section 16.1. Transition Standards. The Corporation will use the existing standards, criteria, rules or guides from each existing reliability council region for those Members that join the Corporation as in effect immediately prior to formation of the Corporation until such standards, criteria, rules or guides are adopted, superseded, or rejected by the Corporation. The Corporation will establish any necessary transition committees, subcommittees, working groups or task forces to administer the existing regional reliability standards, criteria, rules and guides until they are adopted, superseded, or rejected by the Corporation. The Corporation will employ its best

efforts, within two (2) years of its formation, to work toward a uniform set of Reliability Standards for the entire Region. The Board will develop and implement a standards process and a plan for transition to new Reliability Standards. This process will include a requirement that two-thirds of the directors present at a meeting must vote to adopt new Reliability Standards.

ARTICLE XVII.
PARTICIPATION BY REGULATORY PARTICIPANTS

Section 17.1. Regulatory Participants. All Regulatory Participants shall be entitled to and be provided with the same rights to notice of and participation in meetings or other activities of the Corporation as are provided to Members, but shall not have the right to vote.

ARTICLE XVIII.
BUDGET AND BUSINESS PLAN

Section 18.1. Budget and Business Plan. Each annual budget and business plan of the Corporation shall be approved by the Board in sufficient time in each fiscal year to allow for timely submittal of the approved annual budget and business plan to NERC in accordance with the NERC Rules. The Corporation shall post a draft of each budget and business plan on the Corporation's website for purposes of review and comment by the Members at least ten (10) days prior to the Board meeting at which the budget and business plan are to be approved.

ARTICLE XIX.
AMENDMENT OF BYLAWS

Section 19.1. Amendment Of Bylaws. The power to adopt, amend or repeal these Bylaws is vested in the Members as set forth in Section 6.6.3 of these Bylaws; provided, however, that upon the passage of any federal electric reliability legislation, and/or the adoption of any rules or regulations of the Commission, NERC or other governmental entity with jurisdiction, the Board shall have authority to amend these Bylaws as necessary and appropriate to comply with such law, legislation, rules and regulations.

Exhibit C – Regional Standard Development Procedure

Exhibit C shall set forth the Regional Entity's standards development procedure, which NERC agrees meets the following common attributes:

COMMON ATTRIBUTE 1

Proposed regional reliability standards shall be subject to approval by NERC, as the electric reliability organization, and by FERC before becoming mandatory and enforceable under Section 215 of the FPA [add reference to any applicable authorities in Canada and Mexico]. No regional reliability standard shall be effective within the [Regional Entity Name] area unless filed by NERC with FERC [and applicable authorities in Canada and Mexico] and approved by FERC [and applicable authorities in Canada and Mexico].

COMMON ATTRIBUTE 2

[Regional Entity Name] regional reliability standards shall provide for as much uniformity as possible with reliability standards across the interconnected bulk power system of the North American continent. A [Regional Entity Name] reliability standard shall be more stringent than a continent-wide reliability standard, including a regional difference that addresses matters that the continent-wide reliability standard does not, or shall be a regional difference necessitated by a physical difference in the bulk power system. A regional reliability standard that satisfies the statutory and regulatory criteria for approval of proposed North American reliability standards, and that is more stringent than a continent-wide reliability standard, would generally be acceptable.

COMMON ATTRIBUTE 3

[Regional Entity Name] regional reliability standards, when approved by FERC [add applicable authorities in Canada], shall be made part of the body of NERC reliability standards and shall be enforced upon all applicable bulk power system owners, operators, and users within the [Regional Entity Name] area, regardless of membership in the region.

COMMON ATTRIBUTE 4

Requester — The requester is the sponsor of the regional reliability standard request and may assist in the development of the standard. Any member of [Regional Entity Name], or group within [Regional Entity Name] shall be allowed to request that a regional reliability standard be developed, modified, or withdrawn. Additionally, any entity (person, organization, company, government agency, individual, etc.) that is directly and materially affected by the reliability of the bulk power system in the [Regional Entity Name] area shall be allowed to request a regional reliability standard be developed, modified, or withdrawn.

COMMON ATTRIBUTE 5

[Standards or other named] committee — The [Regional Entity Name] [standards] committee manages the standards development process. The [standards] committee will consider which requests for new or revised standards shall be assigned for development (or existing standards considered for deletion). The [standards] committee will advise the [Regional Entity Name] board on standards presented for adoption.

COMMON ATTRIBUTE 6

[Alternative 6A: For a Regional Entity that chooses to vote using a balanced stakeholder committee.]

The [standards] committee is a balanced stakeholder committee, inclusive of all stakeholder interests that provide for or are materially impacted by the reliability of the bulk power system. [The [standards] committee votes to approve standards.] See Appendix A for the representation model of the [standards] committee.

[Alternative 6B: For a Regional Entity that chooses to vote using a balanced ballot body of stakeholders.]

[Registered ballot body] — The registered ballot body comprises all entities or individuals that qualify for one of the stakeholder segments; are registered with [Regional Entity Name] as potential ballot participants in the voting on standards; and are current with any designated fees. Each member of the registered ballot body is eligible to vote on standards. [Each standard action has its own ballot pool formed of interested members of the registered ballot body. Each ballot pool comprises those members of the registered ballot body that respond to a pre-ballot survey for that particular standard action indicating their desire to participate in such a ballot pool.] The representation model of the registered ballot body is provided in Appendix A.]

COMMON ATTRIBUTE 7

[Regional Entity Name] will coordinate with NERC such that the acknowledgement of receipt of a standard request identified in step 1, notice of comment posting period identified in step 4, and notice for vote identified in step 5 below are concurrently posted on both the [Regional Entity Name] and NERC websites.

COMMON ATTRIBUTE 8

An acceptable standard request shall contain a description of the proposed regional reliability standard subject matter containing sufficiently descriptive detail to clearly define the purpose, scope, impacted parties, and other relevant information of the proposed standard.

COMMON ATTRIBUTE 9

Within [no greater than 60] days of receipt of a completed standard request, the [standards] committee shall determine the disposition of the standard request.

COMMON ATTRIBUTE 10

The [standards] committee may take one of the following actions:

- Accept the standard request as a candidate for development of a new standard, revision of an existing standard, or deletion of an existing standard. The [standards] committee may, at its discretion, expand or narrow the scope of the standard request under consideration. The [standards] committee shall prioritize the development of standard in relation to other proposed standards, as may be required based on the volume of requests and resources.
- Reject the standard request. If the [standards] committee rejects a standard request, a written explanation for rejection will be delivered to the requester within [no greater than 30] days of the decision.
- Remand the standard request back to the requester for additional work. The standards process manager will make reasonable efforts to assist the requester in addressing the deficiencies identified by the [standards] committee. The requester may then resubmit the modified standard request using the process above. The requester may choose to withdraw the standard request from further consideration prior to acceptance by the [standards] committee.

COMMON ATTRIBUTE 11

Any standard request that is accepted by the [standards] committee for development of a standard (or modification or deletion of an existing standard) shall be posted for public viewing on the [Regional Entity Name] website within [no greater than 30] days of acceptance by the committee.

COMMON ATTRIBUTE 12

The standards process manager shall submit the proposed members of the drafting team to the [standards] committee. The [standards] committee shall approve the drafting team membership within 60 days of accepting a standard request for development, modifying the recommendations of the standards process manager as the committee deems appropriate, and assign development of the proposed standard to the drafting team.

COMMON ATTRIBUTE 13

At the direction from the [standards] committee, the standards process manager shall facilitate the posting of the draft standard on the [Regional Entity Name] website, along with a draft implementation plan and supporting documents, for a no less than a [30]-day comment period. The standards process manager shall provide notice to [Regional Entity Name] stakeholders and other potentially interested entities, both within and outside of the [Regional Entity Name] area, of the posting using communication procedures then currently in effect or by other means as deemed appropriate.

COMMON ATTRIBUTE 14

The drafting team shall prepare a summary of the comments received and the changes made to the proposed standard as a result of these comments. The drafting team shall summarize comments that were rejected by the drafting team and the reason(s) that these comments were rejected, in part or whole. The summary, along with a response to each comment received will be posted on the [Regional Entity Name] website no later than the next posting of the proposed standard.

COMMON ATTRIBUTE 15

Upon recommendation of the drafting team, and if the [standards] committee concurs that all of the requirements for development of the standard have been met, the standards process manager shall post the proposed standard and implementation plan for ballot and shall announce the vote to approve the standard, including when the vote will be conducted and the method for voting. Once the notice for a vote has been issued, no substantive modifications may be made to the proposed standard unless the revisions are posted and a new notice of the vote is issued.

COMMON ATTRIBUTE 16

The standards process manager shall schedule a vote by the [Regional Entity Name] [registered ballot body/[standards] committee]. The vote shall commence no sooner than [15] days and no later than [30] days following the issuance of the notice for the vote.

COMMON ATTRIBUTE 17

[Alternative 17A: For an RE that chooses to vote using a balanced stakeholder committee.]

The [standards] committee shall give due consideration to the work of the drafting team, as well as the comments of stakeholders and minority objections, in approving a proposed regional reliability standard for submittal to the [Regional Entity Name] board. The [standards]

committee may vote to approve or not approve the standard. Alternatively, the [standards] committee may remand the standard to the drafting team for further work or form a new drafting team for that purpose.

[Alternative 17B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

The [Regional Entity Name] registered ballot body shall be able to vote on the proposed standard during a period of [not less than 10] days.

COMMON ATTRIBUTE 18

[Alternative 18A: For an RE that chooses to vote using a balanced stakeholder committee.]

The [standards] committee may not itself modify the standard without issuing a new notice to stakeholders regarding a vote of the modified standard.

[Alternative 18B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

All members of [Regional Entity Name] are eligible to participate in voting on proposed new standards, standard revisions or standard deletions. [Alternatively: Each standard action requires formation of a ballot pool of interested members of the registered ballot body.]

COMMON ATTRIBUTE 19

[Alternative 19A: For an RE that chooses to vote using a balanced stakeholder committee.]

Actions by the committee shall be recorded in the regular minutes of the committee.

[Alternative 19B: For an RE that chooses to vote using a balanced ballot body of stakeholders.]

Approval of the proposed regional reliability standard shall require a [two thirds] majority in the affirmative (affirmative votes divided by the sum of affirmative and negative votes). Abstentions and non-responses shall not count toward the results, except that abstentions may be used in the determination of a quorum. A quorum shall mean [XX%] of the members of the [registered ballot body/ballot pool] submitted a ballot.

COMMON ATTRIBUTE 20

Under no circumstances may the board substantively modify the proposed regional reliability standard.

COMMON ATTRIBUTE 21

Once a regional reliability standard is approved by the board, the standard will be submitted to NERC for approval and filing with FERC [and applicable authorities in Canada and Mexico.]

COMMON ATTRIBUTE 22

- **Open** - Participation in the development of a regional reliability standard shall be open to all organizations that are directly and materially affected by the [Regional Entity Name] bulk power system reliability. There shall be no undue financial barriers to participation. Participation shall not be conditioned upon membership in [Regional Entity Name], and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements. Meetings of drafting teams shall be open to the [Regional Entity Name] members and others.

COMMON ATTRIBUTE 23

- **Balanced** - The [Regional Entity Name] standards development process strives to have an appropriate balance of interests and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter.

COMMON ATTRIBUTE 24

- **Inclusive** — Any entity (person, organization, company, government agency, individual, etc.) with a direct and material interest in the bulk power system in the [Regional Entity Name] area shall have a right to participate by: a) expressing a position and its basis, b) having that position considered, and c) having the right to appeal.

COMMON ATTRIBUTE 25

- **Fair due process** — The regional reliability standards development procedure shall provide for reasonable notice and opportunity for public comment. At a minimum, the procedure shall include public notice of the intent to develop a standard, a public comment period on the proposed standard, due consideration of those public comments, and a ballot of interested stakeholders.

COMMON ATTRIBUTE 26

- **Transparent** — All actions material to the development of regional reliability standards shall be transparent. All standards development meetings shall be open and publicly noticed on the regional entity's Web site.

COMMON ATTRIBUTE 27

- Does not unnecessarily delay development of the proposed reliability standard.

COMMON ATTRIBUTE 28

Each standard shall enable or support one or more of the reliability principles, thereby ensuring that each standard serves a purpose in support of the reliability of the regional bulk power system. Each standard shall also be consistent with all of the reliability principles, thereby ensuring that no standard undermines reliability through an unintended consequence.

COMMON ATTRIBUTE 29

While reliability standards are intended to promote reliability, they must at the same time accommodate competitive electricity markets. Reliability is a necessity for electricity markets, and robust electricity markets can support reliability. Recognizing that bulk power system reliability and electricity markets are inseparable and mutually interdependent, all regional reliability standards shall be consistent with NERC's market interface principles. Consideration of the market interface principles is intended to ensure that standards are written such that they achieve their reliability objective without causing undue restrictions or adverse impacts on competitive electricity markets.

COMMON ATTRIBUTE 30

To ensure uniformity of regional reliability standards, a regional reliability standard shall consist of the elements identified in this section of the procedure. These elements are intended to apply a systematic discipline in the development and revision of standards. This discipline is necessary to achieving standards that are measurable, enforceable, and consistent.

COMMON ATTRIBUTE 31

All mandatory requirements of a regional reliability standard shall be within the standard. Supporting documents to aid in the implementation of a standard may be referenced by the standard but are not part of the standard itself.

COMMON ATTRIBUTE 32

Applicability	<p>Clear identification of the functional classes of entities responsible for complying with the standard, noting any specific additions or exceptions.</p> <p>If not applicable to the entire [Regional Entity Name] area, then a clear identification of the portion of the bulk power system to which the standard applies.</p> <p>Any limitation on the applicability of the standard based on electric facility requirements should be described.</p>
----------------------	--

COMMON ATTRIBUTE 33

Measure(s)	<p>Each requirement shall be addressed by one or more measures. Measures are used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measure will identify to whom the measure applies and the expected level of performance or outcomes required demonstrating compliance. Each measure shall be tangible, practical, and as objective as is practical. It is important to realize that measures are proxies to assess required performance or outcomes. Achieving the measure should be a necessary and sufficient indicator that the requirement was met. Each measure shall clearly refer to the requirement(s) to which it applies.</p>
-------------------	---

COMMON ATTRIBUTE 34

Compliance Monitoring Process	<p>Defines for each measure:</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible for providing the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes. • The entity that is responsible for evaluating data or
--------------------------------------	---

	<p>information to assess performance or outcomes.</p> <ul style="list-style-type: none">• The time period in which performance or outcomes is measured, evaluated, and then reset.• Measurement data retention requirements and assignment of responsibility for data archiving.

Reliability*First* Corporation Reliability Standards Development Procedure

Introduction

This procedure establishes the process for adoption of a Regional Reliability Standard¹ (hereinafter referred to as “Standard”) of the Reliability*First* Corporation (Reliability*First*) and the development of consensus for adoption, approval, revision, reaffirmation, and deletion of such Standards¹. Reliability*First* Standards provide for the reliable regional and sub-regional planning and operation of the Bulk Power System² (BPS), consistent with Good Utility Practice² within the Reliability*First* geographical footprint.

This procedure was developed under the direction of the Reliability*First* Board of Directors (Board), who may request changes to this Reliability*First* Reliability Standards Development Procedure (hereinafter referred to as “this Procedure”) as deemed appropriate. A procedure for revising this Procedure is contained in Appendix A. This Procedure is consistent with the North American Electric Reliability Council (NERC) Reliability Standards Development Procedure.

Proposed Standards shall be subject to approval by NERC, as the electric reliability organization, and by the Federal Energy Regulatory Commission (FERC) before becoming mandatory and enforceable under Section 215 of the FPA. No Standard shall be effective within the Reliability*First* area unless filed by NERC with FERC and approved by FERC.

Reliability*First* Standards shall provide for as much uniformity as possible with NERC reliability standards across the interconnected BPS. A Reliability*First* Standard shall be more stringent than a NERC reliability standard, including a regional difference that addresses matters that the NERC reliability standard does not, or shall be a regional difference necessitated by a physical difference in the BPS. A Reliability*First* Standard that satisfies the statutory and regulatory criteria for approval of proposed NERC reliability standards, and that is more stringent than a NERC reliability standard, would generally be acceptable.

Reliability*First* Standards, when approved by FERC, shall be made part of the body of NERC reliability standards and shall be enforced upon all applicable BPS owners, operators, and users within the Reliability*First* area, regardless of membership in the region.

¹ Legacy standards, such as ECAR Documents, MAIN Guides, and MAAC Procedures shall be considered Reliability*First* Regional Reliability Standards for the purposes of this document until otherwise acted upon by the Reliability*First* Board

² As defined in the Reliability*First* By-laws Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

Background

Regions may develop, through their own processes, separate “Regional Standards” (Reliability*First* Standards) that go beyond, add detail to, or implement NERC reliability standards, or otherwise address issues that are not addressed in NERC reliability standards.

As a condition of Reliability*First* membership, all Reliability*First* Members² agree to adhere to the NERC reliability standards. As such, the Reliability*First* and its Members will adhere to the NERC reliability standards in addition to the Reliability*First* Standards. NERC reliability standards and the Reliability*First* Standards are both to be included within the Reliability*First* Compliance Program.

Reliability*First* Standards are intended to apply only to that part of the Eastern Interconnection within the Reliability*First* geographical footprint. The development of these Reliability*First* Standards is developed according to the following principles via the process contained within this Procedure:

- Developed in a fair and open process that provided an opportunity for all interested parties to participate;
- Does not have an adverse impact on commerce that is not necessary for reliability;
- Provides a level of BPS reliability that is adequate to protect public health, safety, welfare, and national security and would not have a significant adverse impact on reliability; and
- Based on a justifiable difference between Regions or between sub-Regions within the Regional geographic area.

² As defined in the Reliability*First* By-laws
Board Approval December 6th, 2007
Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

Regional Reliability Standard Definition, Characteristics, and Elements

Definition of a Reliability Standard

As contained in the ReliabilityFirst By-laws, ReliabilityFirst “Regional Reliability Standard” shall mean a type of Reliability Standard that is applicable only within a particular Regional Entity or group of Regional Entities. A Regional Reliability Standard may augment, add detail to, or implement another Reliability Standard or cover matters not addressed by other Reliability Standards. Regional Reliability Standards, upon adoption by NERC and approval by the Commission, shall be Reliability Standards and shall be enforced within the applicable Regional Entity or Regional Entities pursuant to delegated authorities.

Inherent in this definition, a ReliabilityFirst Standard will define certain obligations or requirements of entities that own, operate, plan, and use the BPS within the ReliabilityFirst geographical footprint. These obligations or requirements as contained in the ReliabilityFirst Standards are to be measurable consistent with Good Utility Practice. Standards are not to include processes or procedures that implement a Standard. In addition, obligations, requirements or procedures imposed upon ReliabilityFirst by NERC reliability standards are not to be ReliabilityFirst Standards, unless those obligations, requirements or procedures require the establishment of a “policy or standard” as defined by the ReliabilityFirst By-laws.

Characteristics of a Regional Reliability Standard

A Standard is policy or standard, including adequacy criteria to provide for the reliable regional and sub-regional planning and operation of the BPS, consistent with Good Utility Practice

A Standard shall generally have the following characteristics:

- **Measurable** - A Standard shall establish technical or performance requirements that can be practically measured.
- **Relative to NERC Reliability Standards** - A Standard generally must go beyond, add detail to, or implement NERC Reliability Standards, or cover matters not addressed in NERC Reliability Standards.

Format Requirements of a Regional Reliability Standard

A Standard shall consist of the format requirements shown in the Regional Reliability Standard Template. These requirements apply to the development and revision of Standards. These requirements are necessary to achieve Standards that are measurable,

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

enforceable, and consistent. Supporting documents to aid in the implementation of a Standard may be referenced by the Standard but are not part of the Standard itself.

Regional Reliability Standard Format Requirement Template

Identification Number	A unique identification number assigned in accordance with an administrative classification system to facilitate tracking and reference Reliability <i>First</i> documentation.
Title	A brief, descriptive phrase identifying the topic of the Standard.
Applicability	Clear identification of the functional classes of entities responsible for complying with the Standard, noting any specific additions or exceptions. If not applicable to the entire Reliability <i>First</i> area, then a clear identification of the portion of the BPS to which the Standard applies. Any limitation on the applicability of the Standard based on electric facility requirements should be described.
Effective Date and Status	The effective date of the Standard or, prior to approval of the Standard, the proposed effective date.
Purpose	The purpose of the Standard. The purpose shall explicitly state what outcome will be achieved or is expected by this Standard.
Requirement(s)	Explicitly stated technical, performance, and preparedness requirements. Each requirement identifies what entity is responsible and what action is to be performed or what outcome is to be achieved. Each statement in the requirements section shall be a statement for which compliance is mandatory.

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

Risk Factor(s)	<p>The potential reliability significance of each requirement, designated as a High, Medium, or Lower Risk Factor in accordance with the criteria listed below:</p> <p>A High Risk Factor requirement (a) is one that, if violated, could directly cause or contribute to BPS instability, separation, or a cascading sequence of failures, or could place the BPS at an unacceptable risk of instability, separation, or cascading failures; or (b) is a requirement in a planning timeframe that, if violated, could, under emergency, abnormal, or restorative conditions anticipated by the preparations, directly cause or contribute to BPS instability, separation, or a cascading sequence of failures, or could place the BPS at an unacceptable risk of instability, separation, or cascading failures, or could hinder restoration to abnormal condition.</p> <p>A Medium Risk Factor requirement (a) is a requirement that, if violated, could directly affect the electrical state or the capability of the BPS, or the ability to effectively monitor and control the BPS, but is unlikely to lead to BPS instability, separation, or cascading failures; or (b) is a requirement in a planning timeframe that, if violated, could, under emergency, abnormal, or restorative conditions anticipated by the preparations, directly affect the electrical state or capability of the BPS, or the ability to effectively monitor, control, or restore the BPS, but is unlikely, under emergency, abnormal, or restoration conditions anticipated by the preparations, to lead to BPS instability, separation, or cascading failures, nor to hinder restoration to a normal condition.</p> <p>A Lower Risk Factor requirement is administrative in nature and (a) is a requirement that, if violated, would not be expected to affect the electrical state or capability of the BPS, or the ability to effectively monitor and control the BPS; or (b) is a requirement in a planning time frame that, if violated, would not, under the emergency, abnormal, or restorative conditions anticipated by the preparations, be expected to affect the electrical state or capability of the BPS, or the ability to effectively monitor, control, or restore the BPS.</p>
Measure(s)	<p>Each requirement shall be addressed by one or more measurements. Measurements that will be used to assess performance and outcomes for the purpose of determining compliance with the requirements stated above. Each measurement identifies to whom the measurement applies. Each measurement shall be tangible, practical, and as objective as is practical. Achieving the full compliance level of each measurement should be a necessary and sufficient indicator that the requirement was met.</p>

Compliance Administration Elements

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

<p>Compliance Monitoring Process</p>	<p>Defines for each measure:</p> <ul style="list-style-type: none"> • The specific data or information that is required to measure performance or outcomes. • The entity that is responsible to provide the data or information for measuring performance or outcomes. • The process that will be used to evaluate data or information for the purpose of assessing performance or outcomes. • The entity that is responsible for evaluating data or information to assess performance or outcomes. • The time period in which performance or outcomes is measured, evaluated, and then reset. • Measurement data retention requirements and assignment of responsibility for data archiving. • Violation severity levels.
---	---

Supporting Information Elements

Interpretations	Any Reliability <i>First</i> interpretations of the Standards that were developed, and approved in accordance with the “Interpretation of Standards” section of this Procedure, to expound on the application of the Standard for unusual or unique situations or provide clarifications.
Implementation Plan	Each Reliability <i>First</i> Standard shall have an associated implementation plan describing the effective date of the Standard or effective dates if there is a phased implementation. The implementation plan may also describe the implementation of the Standard in the compliance program and other considerations in the initial use of the Standard, such as necessary tools, training, etc. The implementation plan must be posted for at least one public comment period and is approved as part of the ballot of the standard.
Supporting References	This section references related documents that support reasons for, or otherwise provide additional information related to the Standard Examples include, but are not limited to: <ul style="list-style-type: none"> • Glossary of Terms • Developmental history of the Standard and prior versions • Subcommittee(s) responsible for Standard • Notes pertaining to implementation or compliance • Standard references • Procedures/Practices • Training and/or Technical Reference

Roles in the Regional Reliability Standards Development Process

Process Roles

Originator - Any entity (person, organization, company, government agency, individual, etc.) that is directly and materially affected by the reliability of the Reliability*First* BPS, is allowed to request a Standard be developed or an existing Standard is modified, or deleted, by creating a Standards Authorization Request (SAR). See Appendix B.

Board – The Reliability*First* Board shall act on any proposed Standard that has gone through the process contained in this Procedure. Once the Reliability*First* Board approves a Standard, compliance with the Standard will be enforced consistent with the By-laws and the terms of the Standard.

Standards Committee (SC) - The Reliability*First* SC will consider which requests for new or revised Standards shall be assigned for development (or existing Standards considered for deletion). The SC manages the Standards development process. The SC

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

will advise the ReliabilityFirst Board on Standards presented for adoption by the ReliabilityFirst Board.

Standards Process Manager (SPM) – A person or persons on the ReliabilityFirst staff assigned the task of ensuring that the development, revision or deletion of Standards is in accordance with this Procedure. The SPM works to ensure the integrity of the process and consistency of quality and completeness of the Standards. The SPM facilitates the administration of all actions contained in all steps in the process.

Standards Process Staff – Employees of the ReliabilityFirst that work with or for the SPM.

Interim Compliance Committee (ICC) – The ReliabilityFirst committee responsible for the administration of the ReliabilityFirst Compliance Program. The duties of this committee includes, but not limited to, providing inputs and comments during the standards development process to ensure the measures will be effective and other aspects of the Compliance Program can be practically implemented.

Standard Drafting Team (SDT) – Normally a team of technical experts, and typically includes a member of the ReliabilityFirst Standards staff and the Originator, assigned the task of developing a proposed Standard based upon an approved SAR using the Standard development process contained in this Procedure.

Ballot Body (BB) – The Ballot Body comprises all entities that qualify for one or more of the categories and are registered with ReliabilityFirst as potential ballot participants in the voting on standards. The categories of registration within the Ballot Body and the registration process are described in Appendix D.

Ballot Pool – The Ballot Pool is comprised of those members of the Ballot Body that register to vote for each particular standard that is up for vote. A separate Ballot Pool is established for each standard up for vote. Only individuals who have joined the Ballot Pool for that particular standard are eligible to vote on a standard.

Regional Reliability Standard Development Process (Flow chart of Process shown in Appendix C)

Assumptions and Prerequisites

The ReliabilityFirst Regional Reliability Standards Development Process has the following characteristics:

- **Fair due process** - The ReliabilityFirst standards development process shall provide for reasonable notice and opportunity for public comment. At a minimum, the procedure shall include public notice of the intent to develop a standard, a public comment period on the

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

proposed standard, due consideration of those public comments, and a ballot of interested stakeholders.

- **Openness** - Participation is open to all Organizations who are directly and materially affected by the Reliability*First* region BPS reliability. There shall be no undue financial barriers to participation. Participation shall not be conditioned upon membership in the Reliability*First*, and shall not be unreasonably restricted on the basis of technical qualifications or other such requirements. Meetings of SDTs are open to the Reliability*First* membership and to others.
- **Balanced** - The Reliability*First* standards development process strives to have an appropriate balance of interests and shall not be dominated by any two interest categories and no single interest category shall be able to defeat a matter.
- **Inclusive** - Any entity (person, organization, company, government agency, individual, etc.) with a direct and material interest in the BPS in the Reliability*First* area shall have a right to participate by: a) expressing a position and its basis, b) having that position considered, and c) having the right to appeal.
- **Transparent** - All actions material to the development of Reliability*First* Standards shall be transparent. All standards development meetings shall be open and publicly noticed on Reliability*First*'s Web site.
- Does not unnecessarily delay development of the proposed Standard.

Note: The term “days” refers to calendar days.

Each standard shall enable or support one or more of the reliability principles, thereby ensuring that each standard serves a purpose in support of the reliability of the regional BPS. Each standard shall also be consistent with all of the reliability principles, thereby ensuring that no standard undermines reliability through an unintended consequence.

While Reliability*First* Standards are intended to promote reliability, they must at the same time accommodate competitive electricity markets. Reliability is a necessity for electricity markets, and robust electricity markets can support reliability. Recognizing that BPS reliability and electricity markets are inseparable and mutually interdependent, all Reliability*First* Standards shall be consistent with NERC's market interface principles. Consideration of the market interface principles is intended to ensure that standards are written such that they achieve their reliability objective without causing undue restrictions or adverse impacts on competitive electricity markets.

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

ReliabilityFirst will coordinate with NERC such that the acknowledgement of receipt of a standard request identified in step 1, notice of comment posting period identified in step 4, and notice for vote identified in step 5 below are concurrently posted on both the ReliabilityFirst and NERC websites.

Step 1 - Development of a Standards Authorization Request (SAR) to Develop, Revise or Delete a Regional Reliability Standard

Any individual representing an organization (Originator) which is directly or materially impacted by the operation of the BPS within the geographical footprint of the ReliabilityFirst may request, via a submittal of a Standard Authorization Request (SAR) form, the development, modification, or deletion of a ReliabilityFirst Standard. Any such request shall be submitted to the ReliabilityFirst SPM, or his/her designee, or by another process as otherwise posted on the ReliabilityFirst website. The SAR form may be downloaded from the ReliabilityFirst website.

The SAR contains a description of the proposed Standard subject matter containing sufficiently descriptive detail to clearly define the purpose, scope, impacted parties, and other relevant information of the proposed Standard. The SPM will verify that the submitted SAR form has been adequately completed. The SPM may offer the Originator suggestions regarding changes and/or improvements to improve clarity and assist the ReliabilityFirst community to understand the Originator's intent and objectives. The Originator is free to accept or reject these suggestions. Within 15 days the SPM will electronically acknowledge receipt of the SAR.

The SPM will forward all adequately completed SARs to the ReliabilityFirst SC. Within 60 days of receipt of an adequately completed SAR, the SC shall determine the disposition of the SAR. The disposition decision and decision process shall use the normal "business rules and procedures" of the SC then in effect. The SC may take one of the following actions:

- Accept the SAR as a candidate for: development of a new Standard, revision of an existing Standard or deletion of an existing Standard. The SC may, in its sole discretion, expand or narrow the scope of the SAR under consideration. The SC shall prioritize the development of SARs as may be required based on the number of SARs under development at any time.
- Reject the SAR. If the SC rejects a SAR, a written explanation for rejection will be delivered to the Originator within 30 days of the decision.
- Remand the SAR back to the Originator for additional work. The SPM will make reasonable efforts to assist the Originator in addressing the deficiencies identified by the SC. The Originator may then resubmit the modified SAR using the process above. The Originator may choose to withdraw the SAR from further consideration prior to re-submittal to the SC

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

Any SAR that is accepted by the SC for development of a Standard (or modification or deletion of an existing Standard) shall be posted for public viewing on the ReliabilityFirst website within no greater than 30 days of acceptance by the SC. The status of posted SARs will be publicly noted at regularly scheduled (appropriately two weeks) intervals.

Any documentation of the deliberations of the SC concerning SARs shall be made available according to the “ReliabilityFirst Standards Committee Governance” document then in effect.

The SC shall submit a written report to the ReliabilityFirst Board on a periodic basis (at least at every regularly scheduled ReliabilityFirst Board meeting) showing the status of all SARs that have been brought to the SC for consideration.

Step 2 – Formation of the Standard Drafting Team and Declaration of Milestone Date

Upon acceptance by the SC of a SAR for development of a new Standard (or modification or deletion of an existing Standard), the SC shall direct the SPM to develop a qualified balance slate for the SDT using the specific directions and preferences of the SC. The SPM will send out self-nomination forms to solicit SDT nominees. The SDT will consist of a group of people (members of ReliabilityFirst and, as appropriate, non-members) who collectively have the necessary technical expertise and work process skills. The SPM will recommend a slate of ad-hoc individuals or a preexisting task force, work group or similar for the SDT based upon the SC’s desired SDT capabilities.

The SC may also direct the SPM to designate an existing ReliabilityFirst committee (or subset thereof) as the SDT augmented by other persons as may be appropriate for the subject matter. The SC will insure that SDT membership includes all necessary administrative support. This support typically includes a ReliabilityFirst staff member and the Originator if he/she chooses to participate. The SC appoints the interim chair (should not be a staff person) of the SDT. The SDT will elect the permanent Chair and Vice-chair at its first meeting.

The SPM submits the proposed list of names of the SDT to the SC. The SC will either accept the recommendations of the SPM or modify the SDT slate, as it deems appropriate within 60 days of accepting a SAR for development.

Upon approval of the SDT slate, the SC will declare a preliminary date on which the SDT is expected to have ready a completed draft Standard and associated supporting documentation available for consideration by the ReliabilityFirst membership.

Step 3 – Work and Work Product of the Standard Drafting Team

The SDT will then develop a work plan for completing the Standard development work, including the establishment of milestones for completing critical elements of the work in sufficient detail to ensure that the SDT will meet the date objective established by the SC

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

or the SDT shall propose an alternative date. This plan is then delivered to the SC for its concurrence.

The SDT is to meet, either in person or via electronic means as necessary, establish sub-work teams (made up of members of the SDT) as necessary, and performs other activities to address the parameters of the SAR and the milestone date(s) established by the SC.

The work product of the SDT will consist of the following:

- A draft Standard consistent with the SAR on which it was based.
- An assessment of the impact of the SAR on neighboring regions, and appropriate input from the neighboring regions if the SAR is determined to impact any neighboring region.
- An implementation plan, including the nature, extent and duration of field-testing, if any.
- Identification of any existing Standard that will be deleted, in part or whole, or otherwise impacted by the implementation of the draft Standard.
- Technical reports, white papers and/or work papers that provide technical support for the draft Standard under consideration.
- Document the perceived reliability impact should the Standard be approved.

Upon completion of these tasks, the SDT submits these documents to the SC, which will verify that the proposed Standard is consistent with the SAR on which it was developed

The SDT regularly (at least once each month) informs the SC of its progress in meeting a timely completion of the draft Standard. The SDT may request of the SC scope changes of the SAR at any point in the Standard development process.

The SC may, at any time, exercise its authority over the Standards development process by directing the SDT to move to Step 4 and post for comment the current work product. If there are competing drafts, the SC may, at its sole discretion, have posted the version(s) of the draft Standard for comment on the Reliability*First* website. The SC may take this step at any time after a SDT has been commissioned to develop the Standard.

Step 4 – Comment Posting Period

At the direction from the SC, the SPM then facilitates the posting of the draft Standard on the Reliability*First* website, along with a draft implementation plan and supporting documents, for a 30-day comment period. The SPM shall also inform Reliability*First* Members and other potentially interested entities inside or outside of Reliability*First* of the posting using typical membership communication procedures then currently in effect or by other means as deemed appropriate. As early as the start of the first posting for comment, entities may join one of the five categories of the Ballot Pool established for the eventual voting on the proposed standard being posted. The Ballot Pool category description and associated requirements are in Appendix D.

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

Within 30 days of the conclusion of 30-day comment posting period the SDT shall convene and consider changes to the draft Standard, the implementation plan and/or supporting technical documents based upon comments received. Based upon these comments, the SDT may elect to return to step 3 to revise the draft Standard, implementation plan and/or supporting technical documentation.

The SDT shall prepare a “modification report” summarizing the comments received and the changes made as a result of these comments. The modification report also summarizes comments that were rejected by the SDT and the reason(s) that these comments were rejected, in part or whole. Responses to all comments will be posted on the ReliabilityFirst website no later than the next posting of the proposed Standard.

Step 5 – Posting for Voting by ReliabilityFirst Registered Ballot Body

Upon recommendation of the SDT, and if the SC concurs that all of the requirements for development of the Standard have been met, the SPM will post the revised draft Standard, implementation plan, supporting technical documentation and the “modification report”. Once the notice for a vote has been issued, no substantive modifications may be made to the proposed standard unless the revisions are posted and a new notice of the vote is issued.

Entities may register in the BB at any time during the Standards process. The BB category description and associated rules are in Appendix D.

By 11:59 PM Central Prevailing Time (CPT) of the seventh day of the 15 day pre ballot posting period, registered BB entities intending to vote on the proposed standard must have joined one of the five categories of the Ballot Pool established for the eventual voting on the proposed standard being posted. The SPM will schedule a Vote by the Ballot Pool which is to be scheduled to commence no sooner than 15 days and no later than 30 days following this posting. The Vote by the Ballot Pool is an advisory to the ReliabilityFirst Board.

The Ballot Pool shall be allowed to vote over a period of 15 days. It is expected that votes will be submitted electronically, but may be submitted through other means as approved by the SC.

All entities registered as part of the BB are eligible to participate in voting on proposed new Standards, Standard revisions or Standard deletions. There is a requirement to separately join a Ballot Pool to participate in voting for each standard. Each entity can join only in one category of the Ballot Pool and shall have one vote.

The voting results will be composed of only the votes from BB entities that have joined the Ballot Pool for the standard being voted on and responding within the 15 day voting period. Votes may be accompanied by comments explaining the vote, but are not required. All comments shall be responded to and posted to the ReliabilityFirst website prior to going to the SC or Board.

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

Step 6A – Voting Receives Simple Majority of Affirmative Category Votes

A simple majority³ of votes within a category determines the vote for that category. If there is a simple affirmative majority of category votes (only those categories with votes cast will be considered) during the 15-day voting period and a quorum is met (a quorum consists of a simple majority of individuals who have joined the Ballot Pool), the SC will forward the Standard to the Reliability*First* Board for action (Step 7).

Step 6B – Voting Does Not Receive Simple Majority of Affirmative Category Votes or a Quorum is Not Met

If a draft Standard does not receive a simple affirmative majority of votes determined for each category (only those categories with votes cast will be considered) during the 15-day voting period or a quorum is not met during the 15-day voting period, the SC may:

- Direct the existing SDT to reconsider or modify certain aspects of the draft Standard and/or implementation plan. The resulting draft Standard and/or implementation plan will be posted for a second voting period. The SC may require a second comment period prior to the second voting period. The second posting of the draft Standard, implementation plan, and supporting documentation shall be within 60 days of the SC action.
 - If there is a simple affirmative majority of categories with votes cast and a quorum is met during the second voting period, the SC will forward it to the Reliability*First* Board for action (Step 7).
 - If a draft Standard does not receive a simple majority of affirmative category votes cast during the second voting period or a quorum is not met, the SC will refer the draft Standard and implementation plan to the Reliability*First* Board. The SC may also submit an assessment, opinion and recommendations to the Reliability*First* Board (Step 7).
- Revise the SAR on which the draft Standard was based and remand the development work back to the original SDT or a newly appointed SDT. The resulting draft Standard and/or implementation plan will be posted for a second voting period. The SC may require a second comment period prior to a second voting period. The second posting of the draft Standard, implementation plan, and supporting documentation shall be within 60 days of the SC action.
 - If there is a simple affirmative majority of categories with votes cast during the second voting period and a quorum is met, the SC will forward it to the Reliability*First* Board for action (Step 7).

³ For the purposes of determining majority within a category, an abstention is not considered a vote. Board Approval December 6th, 2007
Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008
Page 14 of 31

- If a draft Standard does not receive a simple majority of affirmative category votes cast during the second voting period or a quorum is not met, the SC will refer the draft Standard and implementation plan to the *ReliabilityFirst* Board. The SC may also submit an assessment, opinion and recommendations to the *ReliabilityFirst* Board (Step 7).
- Recommend termination of all work on the development of the Standard action under consideration and so notify the *ReliabilityFirst* Board.

Step 7 – Action by the ReliabilityFirst Board

A draft Standard submitted to the *ReliabilityFirst* Board for action must be publicly posted at least 30 days prior to action by the Board. At a regular or special meeting, the *ReliabilityFirst* Board shall consider adoption of the draft Standard. The Board will consider the results of the voting and dissenting opinions. The Board will consider any advice offered by the SC.

Draft Standards that received a simple affirmative majority of categories with votes cast shall be delivered to the *ReliabilityFirst* Board for their action. The *ReliabilityFirst* Board shall be provided with an “informational package” which includes:

- The draft Standard and any modification or deletion of other related existing Standard(s)
- Implementation Plan (including recommending field testing and effective dates)
- Technical Documentation supporting the draft Standard
- A summary of the vote and summary of the comments and responses that accompanied the votes.

The *ReliabilityFirst* Board is expected to either:

- Approve the draft Standard action with only minor or no modification. Under no circumstances may the Board substantively modify the proposed regional reliability standard.
- Remand to the SC with comments and instructions, or
- Disapprove the draft Standard action without recourse.

Draft Standards that did not receive a simple affirmative majority of categories with votes cast in the second voting period shall be delivered to the *ReliabilityFirst* Board for their action. The *ReliabilityFirst* Board shall be provided with an “informational package”.

The *ReliabilityFirst* Board is expected to either:

- Approve the draft Standard action with only minor or no modification. Under no circumstances may the Board substantively modify the proposed regional reliability standard.

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

- Remand to the SC with comments and instructions, or
- Disapprove the draft Standard action without recourse.

Once a regional Reliability*First* Standard is approved by the Board, the standard will be submitted to NERC for approval and filing with FERC.

Step 8 - Implementation of a Regional Reliability Standard

Upon approval of a draft Standard action by FERC, the SPM will notify the membership of the effective date through the normal and customary membership communication procedures and processes then in effect. The SPM will also notify the Reliability*First* Compliance Staff for integration into the Reliability*First* Compliance Program.

Appendix A

Maintenance of Regional Reliability Standards Development Process

Significant changes to this Procedure shall begin with the preparation of a SAR and be handled using the same procedure as a request to add, modify, or delete a Standard.

The Reliability*First* SC has the authority to make ‘minor’ changes to this Procedure as deemed appropriate by the SC and subject to the SC voting practices and procedures according to the “Reliability*First* Standards Committee Governance” document then in effect. The SC shall promptly notify the Reliability*First* Board of such ‘minor’ changes to this Procedure for their review and concurrence at the next Reliability*First* Board meeting.

Maintenance of Regional Reliability Standards

The SC shall ensure that each Standard shall be reviewed at least once every five years from the effective date of the Standard or the latest revision to the Standard, whichever is the later. The review process shall be conducted by soliciting comments from the stakeholders. If no changes are warranted, the SC shall recommend to the Reliability*First* Board that the Standard be reaffirmed. If the review indicates a need to revise or delete a Standard, a SAR shall be prepared and submitted in accordance with the standards development process contained in this Procedure.

Urgent Action

Under certain conditions, the SC may designate a proposed Standard or revision to a Standard as requiring urgent action. Urgent action may be appropriate when a delay in implementing a proposed Standard or revision could materially impact reliability of the BPS. The SC must use its judgment carefully to ensure an urgent action is truly necessary and not simply an expedient way to change or implement a Standard.

A requester prepares a SAR and a draft of the proposed Standard and submits both to the SPM. The SAR must include a justification for urgent action. The SPM submits the request to the SC for its consideration. If the SC designates the requested Standard or revision as an urgent action item, then the SPM shall immediately post the draft for pre-ballot review. This posting requires a minimum 30-day posting period before the ballot and applies the same voting procedure as detailed in Step 5. Processing will continue as outlined in the subsequent steps. In the event additional drafting is required, a SDT will be assembled as outlined in the Procedure.

Any Standard approved as an urgent action shall have a termination date specified that shall not exceed one year from the approval date. Should there be a need to make the Standard permanent, then the Standard would be required to go through the full Standard

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

development process. All urgent action Standards require ReliabilityFirst Board, NERC and FERC approval, as outlined for Standards in the regular process.

Urgent actions that expire may be renewed using the urgent action process again, in the event a permanent Standard is not adopted. In determining whether to authorize an urgent action Standard for a renewal ballot, the SC shall consider the impact of the Standard on the reliability of the BPS and whether expeditious progress is being made toward a permanent replacement Standard. The SC shall not authorize a renewal ballot if there is insufficient progress toward adopting a permanent replacement Standard or if the SC lacks confidence that a reasonable completion date is achievable. The intent is to ensure that an urgent action Standard does not in effect take on a degree of permanence due to the lack of an expeditious effort to develop a permanent replacement Standard. With these principles, there is no predetermined limit on the number of times an urgent action may be renewed. However, each urgent action Standard renewal shall be effective only upon approval by the ReliabilityFirst Board, NERC and FERC.

Any person or entity, including the SDT working on a permanent replacement Standard, may at any time submit a SAR proposing that an urgent action Standard become a permanent Standard by following the full Standards process.

Interpretations of Standards

All persons who are directly and materially affected by the reliability of ReliabilityFirst BPS shall be permitted to request an interpretation of the standard. The person requesting an interpretation will send a request to the SPM explaining the specific circumstances surrounding the request and what clarifications are required as applied to those circumstances. The request should indicate the material impact to the requesting party or others caused by the lack of clarity or a possibly incorrect interpretation of the standard.

The SPM, along with guidance from the SC, will assemble a team with the relevant expertise to address the request. The Interpretation Drafting Team (IDT) typically consists of members from the original SDT. The SPM submits the proposed list of names of the IDT to the SC. The SC will either accept the recommendations of the SPM or modify the IDT slate.

As soon as practical (not more than 45 days), the team will draft a written interpretation to the standard addressing the issues raised. Once the IDT has completed a draft interpretation to the Standard addressing only the issues raised, the team will forward the draft interpretation to the SPM. The SPM will forward the draft interpretation to the Interim Compliance Committee (ICC). The ICC is to assess if the inclusion of the interpretation lessens the measurability of the Standard. In addition, the SPM will forward the interpretation to the Reliability Committee (RC). Barring receipt of an opinion from either the ICC or RC within 21 calendar days, that the interpretation sufficiently lessens measurability or is not technically appropriate for the Standard, respectively, the SPM will forward the interpretation to the SC. The SC will determine if

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

the interpretation is consistent with the Standard. The SC will forward the interpretation to the Reliability *First* Board for informational purposes as being appended to the approved Standard.

Note: In the event that the ICC determines that measurability is lessened, the ICC shall provide an explanation of its reasoning to the SPM and IDT for inclusion in a subsequent revision. The RC shall in a similar manner provide an explanation of its reasoning if it determines that the interpretation makes the standard technically inappropriate. In either case, the IDT and SPM will continue to re-circulate the interpretation as stated above.

The interpretation will stand until such time as the standard is revised through the normal process, at which time the standard will be modified to incorporate the clarifications provided by the interpretation.

Appeals

Persons who have directly and materially affected interests and who have been or will be adversely affected by any substantive or procedural action or inaction related to the development, approval, revision, reaffirmation, or withdrawal of a Standard shall have the right to appeal. This appeals process applies only to the Standards process as defined in this Procedure.

The burden of proof to show adverse effect shall be on the appellant. Appeals shall be made within 30 days of the date of the action purported to cause the adverse effect, except appeals for inaction, which may be made at any time. In all cases, the request for appeal must be made prior to the next step in the process.

The final decisions of any appeal shall be documented in writing and made public.

The appeals process provides two levels, with the goal of expeditiously resolving the issue to the satisfaction of the participants:

Level 1 Appeal

Level 1 is the required first step in the appeals process. The appellant submits a complaint in writing to the SPM that describes the substantive or procedural action or inaction associated with a Standard or the standards process. The appellant describes in the complaint the actual or potential adverse impact to the appellant. Assisted by any necessary staff and committee resources, the SPM shall prepare a written response addressed to the appellant as soon as practical but not more than 45-days after receipt of the complaint. If the appellant accepts the response as a satisfactory resolution of the issue, both the complaint and response will be made a part of the public record associated with the standard.

Level 2 Appeal

Board Approval December 6th, 2007
Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

If after the Level 1 Appeal the appellant remains unsatisfied with the resolution, as indicated by the appellant in writing to the SPM, the SPM shall convene a Level 2 Appeals Panel. This panel shall consist of five members total appointed by the Reliability*First* Board.

In all cases, Level 2 Appeals Panel members shall have no direct affiliation with the participants in the appeal.

The SPM shall post the complaint and other relevant materials and provide at least 30-days notice of the meeting of the Level 2 Appeals Panel. In addition to the appellant, any person that is directly and materially affected by the substantive or procedural action or inaction referenced in the complaint shall be heard by the panel. The panel shall not consider any expansion of the scope of the appeal that was not presented in the Level 1 Appeal. The panel may in its decision find for the appellant and remand the issue to the SC with a statement of the issues and facts in regard to which fair and equitable action was not taken. The panel may find against the appellant with a specific statement of the facts that demonstrate fair and equitable treatment of the appellant and the appellant's objections. The panel may not, however, revise, approve, disapprove, or adopt a reliability standard. The actions of the Level 2 Appeals Panel shall be publicly posted.

In addition to the foregoing, a procedural objection that has not been resolved may be submitted to the Reliability*First* Board for consideration at the time the Board decides whether to adopt a particular reliability standard. The objection must be in writing, signed by an officer of the objecting entity, and contain a concise statement of the relief requested and a clear demonstration of the facts that justify that relief. The objection must be filed no later than 30-days after the announcement of the vote on the Standard in question.

Appendix B

Standard Authorization Request

The SC shall be responsible for implementing and maintaining this form as needed to support the information requirements of the standards development process in this Procedure. Changes to this form are considered minor, and therefore subject to only the approval of the SC.

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

Brief Description (A few sentences or a paragraph.)

Reliability Functions

The Standard will Apply to the Following Functions (Check box for each one that applies.)

	Reliability Authority	Ensures the reliability of the bulk transmission system within its Reliability Authority area. This is the highest reliability authority.
	Balancing Authority	Integrates resource plans ahead of time, and maintains load-interchange-resource balance within its metered boundary and supports system frequency in real time
	Generator Owner	Owns and maintains generating units
	Interchange Authority	Authorizes valid and balanced Interchange Schedules
	Planning Authority	Plans the BPS
	Resource Planner	Develops a long-term (generally one year and beyond) plan for the resource adequacy of specific loads (customer demand and energy requirements) within a Planning Authority Area
	Transmission Planner	Develops a long-term (generally one year and beyond) plan for the reliability (adequacy) of the interconnected bulk electric transmission systems within its portion of the Planning Authority Area
	Transmission Service Provider	Provides transmission services to qualified market participants under applicable transmission service agreements
	Transmission Owner	Owns transmission facilities
	Transmission Operator	Operates and maintains the transmission facilities, and executes switching orders
	Distribution Provider	Provides and operates the “wires” between the transmission system and the customer

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

	Generator Operator	Operates generating unit(s) and performs the functions of supplying energy and Interconnected Operations Services
	Purchasing-Selling Entity	The function of purchasing or selling energy, capacity and all necessary Interconnected Operations Services as required
	Load-Serving Entity	Secures energy and transmission (and related generation services) to serve the end user
	Market Operator	Integrates energy, capacity, balancing, and transmission resources to achieve an economic, reliability-constrained dispatch of resources. The dispatch may be either cost-based or bid-based
	Regional Reliability Organizations	An entity that ensures that a defined area of the BPS is reliable, adequate and secure. A member of the North American Electric Reliability Council. The Regional Reliability Organization can serve as the Compliance Monitor

NOTE: The SDT may find it necessary to modify the initial reliability function responsibility assignment as a result of the standards development and comments received.

Reliability Principles

<i>Applicable Reliability Principles (Check box for all that apply.)</i>	
	1. Interconnected BPS shall be planned and operated in a coordinated manner to perform reliably under normal and abnormal conditions as defined in the NERC Standards.
	2. The frequency and voltage of interconnected BPS shall be controlled within defined limits through the balancing of real and reactive power supply and demand.
	3. Information necessary for the planning and operation of interconnected BPS shall be made available to those entities responsible for planning and operating the systems reliably.
	4. Plans for emergency operation and system restoration of interconnected BPS shall be developed, coordinated, maintained, and implemented.
	5. Facilities for communication, monitoring, and control shall be provided, used, and maintained for the reliability of interconnected BPS.
	6. Personnel responsible for planning and operating interconnected BPS shall be trained, qualified, and have the responsibility and authority to implement actions.
	7. The security of the interconnected BPS shall be assessed, monitored, and maintained on a wide-area basis.

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

Market Interface Principles

<i>Does the proposed Standard comply with all of the following Market Interface Principles?</i>	
Recognizing that reliability is an essential requirement of a robust North American economy:	
yes or no	1. A reliability standard shall not give any market participant an unfair competitive advantage.
yes or no	2. A reliability standard shall neither mandate nor prohibit any specific market structure.
yes or no	3. A reliability standard shall not preclude market solutions to achieving compliance with that standard.
yes or no	4. A reliability standard shall not require the public disclosure of commercially sensitive information. All market participants shall have equal opportunity to access commercially non-sensitive information that is required for compliance with reliability standards.

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

Flowchart for Standards Process

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

Appendix D

Ballot Pool Categories

For the purposes of category Ballot Pool registration and voting, an entity shall register in only one of the following categories for each standard that will be voted on (only one vote is allowed per entity per vote):

Category 1 – Transmission Owner, Transmission Operator, Transmission Service Provider

Category 2 – Generator Owner, Generator Operator

Category 3 – Load Serving Entity, Purchasing and Selling Entity, End User

Category 4 – Reliability Coordinator, Planning Coordinator, Transmission Planner, Resource Planner, Regional Transmission Organization, Balancing Authority, regulatory or governmental agency

Category 5 – Distribution Provider

Ballot Body Registration

Entities may register in the BB at any time during the Standards process. The SPM shall review all applications for joining the BB, and make a determination of whether they qualify for the self-selection category(ies). In order to comment or vote you must have an active membership in the BB. When you submit your registration request to join the BB, you are placed in a “pending stage” until your account is activated. Activation of your account may take up to 24 hours. You will be unable to submit comments or join a Ballot Pool until your account is activated. The contact designated as primary representative to ReliabilityFirst is the voting member with the secondary contact as the backup.

Note: Registration for a BB is not the same as registration for the compliance registry. Although the terminology used to describe the BB categories in most cases has the same meaning as the terms used in the NERC Functional Model, registration in a BB goes beyond the compliance registry in that entities smaller than those stated in the compliance registry guidelines are allowed to register in a BB. Entities shall have evidence that they qualify for the BB category they register in. Such evidence shall be available for the SPM review to verify BB registration and may include compliance registration.

Ballot Pool Formation

Board Approval December 6th, 2007

Standards Committee Modified April 1st, 2008 - Board Concurrence May 22nd, 2008

In order to participate in voting on a particular standard, an entity must join the Ballot Pool being established for the standard as follows:

1 – As early as the start of the first posting for comment, entities may join one of the five categories of the Ballot Pool established for the eventual voting on the proposed standard being posted.

2 - By close of business of the seventh day of the 15 day pre ballot posting period, entities wishing to vote must have joined one of the five categories of the Ballot Pool established for the eventual voting on the proposed standard being posted.

EXHIBIT D – COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

1.0 REGIONAL COMPLIANCE MONITORING AND ENFORCEMENT PROGRAM

ReliabilityFirst will implement the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure (which for purposes of this section 1.0 shall not include Attachment 2, Hearing Procedures), to monitor and enforce compliance with Reliability Standards by the owners, operators, and users within ReliabilityFirst's geographic or electrical boundaries, and such other scope, set forth on **Exhibit A** of this Agreement.

2.0 REGIONAL HEARING OF COMPLIANCE MATTERS

ReliabilityFirst shall establish and maintain a hearing body with authority to conduct and render decisions in compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, or a proposed mitigation plan, which shall be either ReliabilityFirst's board or a balanced compliance panel reporting directly to ReliabilityFirst's board. ReliabilityFirst's hearing body is a composition of members of the ReliabilityFirst Compliance Committee as established by the Board of Directors of ReliabilityFirst as set out in the ReliabilityFirst Compliance Committee Charter. No two industry sectors may control any decision and no single segment may veto any matter brought before the Hearing Body either before or after any recusals or disqualifications.

ReliabilityFirst shall conduct all compliance hearings in which a Registered Entity may contest a finding of alleged violation, proposed penalty or sanction, proposed Mitigation Plan, or a proposed Remedial Action Directive, in accordance with Attachment 2, Hearing Procedures, to the NERC Compliance Monitoring and Enforcement Program, subject to the following deviations, if any: None.

3.0 OTHER DECISION-MAKING BODIES

None.

Exhibit E — Funding

1. Scope of activities funded through the ERO funding mechanism

ReliabilityFirst shall include in its annual budget submission to NERC amounts for costs it will incur in performing its delegated functions and related activities as described in Sections 5, 6 and 7 of the Agreement. These activities shall include:

- Reliability Standard Development
- Compliance Monitoring and Enforcement
- Organization Registration and Certification
- Reliability Assessment and Performance Analysis (including necessary data gathering activities)
- Event Analysis and Reliability Improvement
- Training and Education
- Situation Awareness
- Infrastructure Security

2. Preparation of Annual Business Plan and Budget

(a) NERC and ReliabilityFirst, in conjunction with the other Regional Entities, shall collaboratively develop an annual schedule for the development, submission, review and approval of ReliabilityFirst's business plan and budget. The annual schedule for the preparation of business plans and budgets shall require ReliabilityFirst (i) to submit to NERC draft(s) of ReliabilityFirst's proposed business plan and budget and other preliminary documents and information, and (ii) to submit a final proposed business plan and budget that has been approved by ReliabilityFirst Board of Trustees to NERC by July 1 or such other agreed date as provides sufficient time for NERC's review, approval and submission of ReliabilityFirst's business plan and budget to the Commission 130 days in advance of the beginning of each fiscal year. The ReliabilityFirst business plan and budget submission shall include supporting materials, including ReliabilityFirst's complete business plan and organization chart, explaining the proposed collection of all assessments, dues, fees and charges, and the proposed expenditure of the funds to be collected in sufficient detail to justify the requested budgeted expenditures and assessments. ReliabilityFirst's business plan and budget and proposed assessments shall provide for reasonable reserve mechanisms for unforeseen and extraordinary expenses and other contingencies, consistent with generally accepted accounting principles.

(b) NERC shall review and approve ReliabilityFirst's proposed business plan and budget and proposed assessments for performing the delegated functions and related activities described in Sections 5, 6 and 7 of this Agreement and listed above in Section 1 of this **Exhibit E**, or shall direct ReliabilityFirst to make such revisions as NERC deems appropriate prior to approval. NERC shall submit ReliabilityFirst's approved business plan and budget and proposed assessments to the Commission for approval as part of NERC's overall business plan and budget submission, in accordance with the ERO Regulations.

3. Allocation of Costs

Assessments to fund the costs of *ReliabilityFirst's* delegated functions and related activities pursuant to the Agreement shall be allocated among all load-serving entities on the basis of Net Energy for Load, unless a different method(s) of allocating and calculating such assessments has been submitted to and approved by NERC and the Commission in accordance with Section 9(b) of the Agreement. *ReliabilityFirst* shall submit to NERC annually at the same time it submits its budget request a list of the load-serving entities or designees within its geographic boundaries that shall be responsible for paying *ReliabilityFirst's* assessment and the load-serving entities' proportionate Net Energy for Load, and such other data and information as is necessary to allocate and calculate the allocation of *ReliabilityFirst's* assessment to the load-serving entities or designees under the method(s) of allocation and calculation that will be used.

4. Collection of Funding

(a) NERC shall submit invoices to the load-serving entities or designees identified by *ReliabilityFirst* covering the NERC and *ReliabilityFirst* assessments approved for collection.

(b) NERC shall pursue any non-payments of assessment amounts and shall request assistance from ERO Governmental Authorities as necessary to secure collection. To the extent reasonably practicable, *ReliabilityFirst* shall assist NERC in pursuing and collecting any non-payments. Notwithstanding the foregoing, *ReliabilityFirst* is not responsible and does not assume any liability for recovering non-payments or underpayments of assessment amounts. NERC shall retain sole responsibility for recovering non-payments or underpayments of assessment amounts. NERC shall add the amount of any non-payments by end-users or designees within *ReliabilityFirst's* region, that are reasonably determined to be uncollectible, to NERC's assessments for a subsequent year with the amount of such non-payments to be allocated to end-users within *ReliabilityFirst's* region.

(c) Upon approval by ERO Governmental Authorities of *ReliabilityFirst's* annual assessment to fund the costs of its delegated functions and related activities, NERC shall pay *ReliabilityFirst's* annual assessment to Regional Entity in four equal quarterly payments on January 15, April 15, July 15 and October 15 of the budget year.

5. Application of Penalties

Except as otherwise approved by the Commission, all penalty monies received by *ReliabilityFirst*, other than penalty monies received from an operational function or division or affiliated entity of *ReliabilityFirst*, shall be applied as a general offset to *ReliabilityFirst's* budget requirements for U.S.-related activities under this Agreement for the subsequent fiscal year. Funds from financial penalties shall not be directly applied to any program maintained by the investigating entity. Except as otherwise approved by the Commission, any penalty monies received from an operational function or division or affiliated entity of *ReliabilityFirst* shall be transmitted to or retained by NERC and shall be used by NERC as a general offset to NERC's budget for its activities as the ERO under the Act for the following year.

6. Budget and Funding for ReliabilityFirst's Non-Statutory Activities

In addition to its delegated functions and related activities, as specified in Sections 5, 6 and 7 of the Agreement and in Section 1 of this **Exhibit E** (such delegated functions and activities referred to in this Section 6 as "statutory activities"), ReliabilityFirst performs the following other functions and activities (such other functions and activities being referred to in this Section 6 as "non-statutory activities"): **None**

ReliabilityFirst shall employ the following methods and procedures to (i) keep its funding mechanisms for its statutory activities separate from its funding mechanisms for its non-statutory activities, and (ii) record the costs it incurs in the performance of its non-statutory functions separately from the costs it incurs in the performance of its statutory functions: [List and describe the methods and procedures Regional Entity employs to keep costs and funding of statutory activities separate from costs and funding of non-statutory activities, including at a minimum a description of how Regional Entity's bank accounts and receivables/payables procedures are set up for both statutory and non-statutory functions, a description of how Regional Entity ensures each employee involved in both statutory and non-statutory functions keeps accurate time records reflecting his/her activities, and a description of how Regional Entity's general and administrative costs are allocated between statutory activities and non-statutory activities. If the necessary descriptions are lengthy they may be provided in a separate attachment labeled "Attachment E-1", and state here "See Attachment E-1." **Not applicable**

ReliabilityFirst shall provide its budget for such non-statutory activities to NERC at the same time that ReliabilityFirst submits its proposed annual business plan and budget for statutory activities to NERC pursuant to Section 9 of the Agreement. ReliabilityFirst's budget for non-statutory activities that is provided to NERC shall contain a detailed list of ReliabilityFirst's non-statutory activities and a description of the funding sources for the non-statutory activities. ReliabilityFirst agrees that no costs (which shall include a reasonable allocation of ReliabilityFirst's general and administrative costs) of non-statutory activities are to be included in the calculation of ReliabilityFirst's assessments, dues, fees, and other charges for its statutory activities. **Not applicable**

7. Amended or Supplemental Business Plans and Budgets

During the course of the fiscal year, if ReliabilityFirst determines it does not or will not have sufficient funds to carry out its delegated functions and related activities, ReliabilityFirst shall submit to NERC one or more proposed amended or supplemental business plans and budgets and requests for approval of supplemental assessments, reflecting costs, cost increases or funding shortfalls not provided for in ReliabilityFirst's approved business plan and budget for the fiscal year. NERC shall review and approve the proposed amended or supplemental business plan and budget and proposed supplemental assessment, or shall direct ReliabilityFirst to make such revisions as NERC deems appropriate prior to approval. NERC shall submit ReliabilityFirst's approved amended or supplemental business plan and budget and proposed supplemental assessment to the Commission for approval.

8. NERC Review of Regional Entity Financial Statements

NERC shall conduct reviews of the quarterly and annual financial statements submitted by ReliabilityFirst pursuant to Section 9(h) and (i) of the Agreement. ReliabilityFirst shall provide supporting documentation for the quarterly and annual financial statements as reasonably requested by NERC based on its reviews.

ATTACHMENT 5B

NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION

REVISED DELEGATION AGREEMENT

WITH

RELIABILITYFIRST CORPORATION

REDLINED AGAINST

REVISED PRO FORMA DELEGATION AGREEMENT

**AMENDED AND RESTATED DELEGATION AGREEMENT BETWEEN
NORTH AMERICAN ELECTRIC RELIABILITY CORPORATION
~~AND [REGIONAL ENTITY]~~**

AND RELIABILITYFIRST CORPORATION

AMENDED AND RESTATED DELEGATION AGREEMENT (“Agreement”) made as of [January 1, 2011], between the North American Electric Reliability Corporation (“NERC”), an organization certified by the Federal Energy Regulatory Commission (“Commission”) pursuant to Section 215(c) of the Federal Power Act to establish and enforce Reliability Standards for the Bulk-Power System, and ~~[REGIONAL ENTITY]~~ReliabilityFirst Corporation (ReliabilityFirst), an organization established to develop and enforce Reliability Standards within the geographic boundaries identified on **Exhibit A** to this Agreement, and for other purposes. NERC and ~~[REGIONAL ENTITY]~~ReliabilityFirst may be individually referred to herein as “Party” or collectively as “Parties.”

WITNESSETH

WHEREAS, Subtitle A of the Electricity Modernization Act of 2005 added Section 215 to the Federal Power Act (16 U.S.C. § 824n) (hereafter “the Act”), which, among other things, provides for the establishment of an electric reliability organization (“ERO”) to develop and enforce Reliability Standards applicable to all owners, operators, and users of the Bulk-Power System;

WHEREAS, the Commission has adopted regulations for the implementation of the Act, which are set forth at Chapter I, Title 18, Code of Federal Regulations, Part 39 (the “ERO Regulations”);

WHEREAS, the Commission has certified NERC as the ERO that will, in accordance with the Act, establish and enforce Reliability Standards for the Bulk-Power System, subject to certain delegation provisions described below;

WHEREAS, the Act recognizes the international interdependency of electric reliability within North America and envisions the ERO and such applicable Regional Entities as international organizations;

WHEREAS, the Act and Section 39.8 of the ERO Regulations provide for the delegation by the ERO of authority to propose and enforce Reliability Standards to regional entities (“Regional Entities”) such as ~~[REGIONAL ENTITY]~~ReliabilityFirst provided that:

(A) The Regional Entity is governed by —

- (i) an independent board;
- (ii) a balanced stakeholder board; or
- (iii) a combination independent and balanced stakeholder board.

(B) The Regional Entity otherwise satisfies the provisions of Section 215(c)(1) and (2) of the Act; and

(C) The agreement promotes effective and efficient administration of Bulk-Power System reliability;

WHEREAS, certain Regional Entities are organized on an Interconnection-wide basis and are therefore entitled to the presumption set forth in the Act that: “[t]he ERO and the Commission shall rebuttably presume that a proposal for delegation to a Regional Entity organized on an Interconnection-wide basis promotes effective and efficient administration of bulk power system reliability and should be approved”;

WHEREAS, the Act further provides that the ERO shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Reliability Standard or modification to a Reliability Standard to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest;

WHEREAS, ~~[REGIONAL ENTITY]~~ReliabilityFirst is not organized on an Interconnection-wide basis and therefore ~~[is/is not]~~ entitled to the rebuttable presumptions accorded such an entity;

WHEREAS, NERC will work through ~~[REGIONAL ENTITY]~~ReliabilityFirst to carry out certain of its activities in furtherance of its responsibilities as the ERO under the Act;

WHEREAS, NERC has concluded that ~~[REGIONAL ENTITY]~~ReliabilityFirst meets all requirements of the Act, the ERO Regulations, and the NERC Rules of Procedure as approved by the Commission (“NERC Rules of Procedure”) necessary to qualify for delegation; and

WHEREAS, NERC and ~~[REGIONAL ENTITY]~~ReliabilityFirst, having operated under a predecessor agreement to this Agreement, have negotiated this amended and restated Agreement so as to incorporate the benefits of their mutual experience and lessons learned while operating under the predecessor agreement and thereby provide for the more efficient and effective execution of their respective responsibilities in a transparent manner that is pursuant to Section 215 of the Act and the ERO Regulations;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, NERC and ~~[REGIONAL ENTITY]~~ReliabilityFirst agree as follows:

1. Definitions. The capitalized terms used in this Agreement shall be defined as set forth in the Act, the ERO Regulations, the NERC Rules of Procedure, or the NERC Glossary of Terms Used in Reliability Standards, or, if not so defined, shall be defined as set forth in this Section 1 or elsewhere in the text of this Agreement:

(a) Breach means (i) the failure of a Party to perform or observe any material term, condition or covenant of the Agreement or (ii) a representation in Section 2 of the Agreement shall have become materially untrue.

(b) Cross-Border Regional Entity means a Regional Entity that encompasses a part of the United States and a part of Canada or Mexico.

(c) Delegated Authority means the authority delegated by NERC to ~~[REGIONAL ENTITY]~~ReliabilityFirst to propose and enforce Reliability Standards pursuant to the Act and to undertake related activities set forth in this Agreement in furtherance of these delegated functions in accordance with the Act, the ERO Regulations and this Agreement.

2. Representations.

(a) For purposes of its Delegated Authority, ~~REGIONAL ENTITY~~ ReliabilityFirst hereby represents and warrants to NERC that:

(i) ~~REGIONAL ENTITY~~ ReliabilityFirst is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder. ~~REGIONAL ENTITY~~ ReliabilityFirst is governed in accordance with its bylaws by ~~[select appropriate: an independent board/a balanced stakeholder board/~~ a combination independent and balanced stakeholder board]. Pursuant to these bylaws, no two industry sectors can control any ~~REGIONAL ENTITY~~ ReliabilityFirst decision and no single industry sector can veto any ~~REGIONAL ENTITY~~ ReliabilityFirst decision. The relevant portions of such bylaws are attached hereto in **Exhibit B**¹, and as so attached are in full force and effect. No other such corporate governance documents are binding upon ~~REGIONAL ENTITY~~ ReliabilityFirst.

(ii) As set forth in **Exhibit C** hereto², ~~REGIONAL ENTITY~~ ReliabilityFirst has developed a standards development procedure, which provides the process that ~~REGIONAL ENTITY~~ ReliabilityFirst may use to develop Regional Reliability Standards ~~[and Regional Variances, if the regional entity is organized on an Interconnection-wide basis]~~ that are proposed to NERC for adoption.

(iii) As set forth in **Exhibit D** hereto, ~~REGIONAL ENTITY~~ ReliabilityFirst has adopted the NERC Compliance Monitoring and Enforcement Program, Appendix 4C to the NERC Rules of Procedure, which provides for the enforcement of Reliability Standards within ~~REGIONAL ENTITY~~ ReliabilityFirst's geographic boundaries as shown on **Exhibit A**.

¹ The **Exhibit B** from ~~REGIONAL ENTITY~~ ReliabilityFirst shall meet the requirements contained in **Exhibit B** to this Agreement.

² The **Exhibit C** from ~~REGIONAL ENTITY~~ ReliabilityFirst shall meet the requirements contained in **Exhibit C** to this Agreement.

(b) NERC hereby represents and warrants to ~~[REGIONAL ENTITY]~~ReliabilityFirst that:

(i) NERC is and shall remain during the term of this Agreement validly existing and in good standing pursuant to all applicable laws relevant to this Agreement and that no applicable law, contract or other legal obligation prevents it from executing this Agreement and fulfilling its obligations hereunder; and

(ii) NERC has been certified as the ERO by the Commission pursuant to the Act.

3. Covenants.

(a) During the term of this Agreement, ~~[REGIONAL ENTITY]~~ReliabilityFirst shall maintain and preserve its qualifications for delegation pursuant to the Act and shall not amend its Regional Entity Rules without NERC's approval, which shall not be unreasonably withheld or delayed and which shall, in the case of a Regional Entity organized on an Interconnection-wide basis, be governed by the presumptions provided for in Section 215(d)(2) and (e)(4)(C) of the Act, and be subject to any required Commission approval.

(b) During the term of this Agreement, NERC shall maintain its qualification and status as the ERO pursuant to the Act and, subject to the provisions of Sections 17 and 18 of this Agreement, NERC shall not adopt amendments to the NERC Rules of Procedure that conflict with the rights, obligations or programs of ~~[REGIONAL ENTITY]~~ReliabilityFirst under this Agreement without first obtaining the consent of ~~[REGIONAL ENTITY]~~ReliabilityFirst, which consent shall not be unreasonably withheld or delayed.

(c) During the term of this Agreement, NERC and ~~[REGIONAL ENTITY]~~ReliabilityFirst shall adhere to and require that all participants in their respective activities under this Agreement follow and comply with the NERC Antitrust Compliance Guidelines.

4. Delegation of Authority.

(a) Based upon the representations, warranties and covenants of ~~[REGIONAL ENTITY]~~ReliabilityFirst in Sections 2 and 3 above, the corporate governance documents set forth in **Exhibit B**, the standards development process set forth in **Exhibit C**, and the

compliance monitoring and enforcement program set forth in **Exhibit D**, NERC hereby delegates authority, pursuant to Section 215(e)(4) of the Act, to ~~{REGIONAL ENTITY}~~ReliabilityFirst for the purpose of proposing Reliability Standards to NERC, as set forth in Section 5 of this Agreement, and enforcing Reliability Standards, as set forth in Section 6 of this Agreement, within the geographic boundaries and such other scope set forth on **Exhibit A**, *provided*, that ~~{REGIONAL ENTITY}~~ReliabilityFirst shall not monitor and enforce compliance with Reliability Standards for ~~{REGIONAL ENTITY}~~ReliabilityFirst or an affiliated entity with respect to reliability functions for which ~~{REGIONAL ENTITY}~~ReliabilityFirst or an affiliate is a Registered Entity. Any exclusions from this delegation of authority to ~~{REGIONAL ENTITY}~~ReliabilityFirst within, or additions to this delegation of authority to ~~{REGIONAL ENTITY}~~ReliabilityFirst beyond, the geographic boundaries set forth on **Exhibit A** are stated on **Exhibit A**.

(b) In circumstances where ~~{REGIONAL ENTITY}~~ReliabilityFirst or an affiliated entity is a Registered Entity, ~~{REGIONAL ENTITY}~~ReliabilityFirst shall enter into an agreement with another Regional Entity or NERC for the other Regional Entity or NERC to monitor and enforce ~~{REGIONAL ENTITY}~~ReliabilityFirst's or affiliate's compliance with Reliability Standards. Such agreements are subject to NERC and Commission approval.

(c) Nothing in this Agreement shall prohibit ~~{REGIONAL ENTITY}~~ReliabilityFirst from entering into an arrangement between one or more other Regional Entities to perform compliance monitoring and enforcement activities outside of its region, on behalf of NERC and/or other Regional Entities, for Registered Entities that have registered functions monitored by more than one Regional Entity, subject to approval by NERC.

(d) For Cross-Border Regional Entities, the authority delegated by this Agreement shall extend only to the portion of the region identified on **Exhibit A** that is within the United States. Any delegation of authority by ERO Governmental Authorities in Canada or Mexico shall be governed by a separate agreement and is outside the scope of this Agreement; provided, however, that both ~~{REGIONAL ENTITY}~~ReliabilityFirst and NERC shall endeavor to ensure that this Agreement and such separate agreements are compatible.

(e) As a condition to this delegation of authority and subject to the provisions of Section 17 of this Agreement, ~~{REGIONAL ENTITY}~~ReliabilityFirst shall comply with the

applicable provisions of NERC's Certificate of Incorporation, Bylaws, Rules of Procedure, and Reliability Standards, as from time to time adopted, approved, or amended.

5. Development and Proposal of Reliability Standards.

(a) In connection with its Delegated Authority, ~~REGIONAL ENTITY~~ ReliabilityFirst shall be entitled to:

(i) propose Reliability Standards, Regional Variances, or modifications thereof to NERC, which shall be considered by NERC through an open and inclusive process for proposing and adopting Reliability Standards that affords ~~REGIONAL ENTITY~~ ReliabilityFirst reasonable notice and opportunity to be heard; and

(ii) develop Regional Reliability Standards ~~and Regional Variances, if Regional Entity is organized on an Interconnection-wide basis~~ through ~~REGIONAL ENTITY~~ through ReliabilityFirst's process as set forth in **Exhibit C**. Proposals approved through ~~REGIONAL ENTITY~~ ReliabilityFirst's process shall be reviewed by the NERC Board after NERC provides notice and an opportunity for interested persons to comment. In the case of a proposal from a Regional Entity organized on an Interconnection-wide basis, comments shall be limited to the factors identified in NERC Rule of Procedure 312.3 as it may be amended from time to time. The NERC Board shall promptly thereafter consider such proposed Regional Reliability Standard or Regional Variance, applying the rebuttable presumption described in subsection 5(b) of this Agreement if the proposed Regional Reliability Standard or Regional Variance is from a Regional Entity organized on an Interconnection-wide basis, and either approve the proposed Regional Reliability Standard or Regional Variance and submit it to the Commission for approval, or disapprove it in writing setting forth its reasons. ~~REGIONAL ENTITY~~ ReliabilityFirst may appeal any disapproval of a proposed Regional Reliability Standard or Regional Variance to the Commission.

(b) Pursuant to Section 215(d)(3) of the Act, NERC shall rebuttably presume that a proposal from a Regional Entity organized on an Interconnection-wide basis for a Regional Reliability Standard or Regional Variance or modification thereof to be applicable on an Interconnection-wide basis is just, reasonable, and not unduly discriminatory or preferential, and in the public interest. Any person challenging such proposal from the Regional Entity organized on an Interconnection-wide basis shall have the burden of proof. NERC shall not

find that this presumption has been rebutted except based upon substantial evidence that has been disclosed to, and been subject to comment by, the Interconnection-wide Regional Entity during NERC's review of the proposal.

6. Enforcement of Compliance with Reliability Standards.

(a) In connection with its delegated authority pursuant to this Agreement, ~~[REGIONAL ENTITY]~~ReliabilityFirst shall enforce Reliability Standards (including Regional Reliability Standards and Regional Variances) within the geographic boundaries set forth, or as otherwise specified, in **Exhibit A** through the compliance monitoring and enforcement program set forth in **Exhibit D**. NERC and ~~[REGIONAL ENTITY]~~ReliabilityFirst agree that this compliance monitoring and enforcement program meets all applicable requirements of the Act, Order No. 672 of the Commission, and the ERO Regulations, including, *inter alia*, the requirement for an audit program pursuant to Section 39.7(a) of the ERO Regulations, the assessment of penalties pursuant to Section 39.7(c) through 39.7(g) of the ERO Regulations and the requirements for due process. ~~[REGIONAL ENTITY]~~ReliabilityFirst may not change its compliance monitoring and enforcement program set forth in **Exhibit D** absent NERC's approval, which shall not be unreasonably withheld or delayed, and the approval of the Commission. Subject to the rights and limitations specified in Sections 17 and 18 of this Agreement, ~~[REGIONAL ENTITY]~~ReliabilityFirst agrees to comply with the NERC Rules of Procedure, with any directives issued pursuant to Section 8(c) of this Agreement, and with any guidance and directions issued by the NERC Board or a Board committee pursuant to Section 8(d) of this Agreement, in implementing this program.

(b) ~~[REGIONAL ENTITY]~~ReliabilityFirst shall report promptly to NERC any Possible Violation, Alleged Violation, or Confirmed Violation of a Reliability Standard, and its eventual disposition by ~~[REGIONAL ENTITY]~~ReliabilityFirst. Such report shall include the owner's, operator's, or user's name, which Reliability Standard or Reliability Standards were the subject of the Possible Violation, Alleged Violation, or Confirmed Violation, when the Possible Violation, Alleged Violation, or Confirmed Violation occurred, other pertinent facts including circumstances surrounding the Possible Violation, Alleged Violation, or Confirmed Violation with any known risk to the Bulk-Power System, when the Possible Violation, Alleged Violation, or Confirmed Violation was or will be mitigated, the name of a person

knowledgeable about the Possible Violation, Alleged Violation, or Confirmed Violation to serve as a point of contact with the Commission, and any other information required by NERC compliance program procedures. NERC shall promptly forward such report to the Commission. NERC and ~~[REGIONAL ENTITY]~~ReliabilityFirst shall cooperate in filing such periodic summary reports as the Commission shall from time to time direct on Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards and summary analyses of such Possible Violations, Alleged Violations, and Confirmed Violations.

(c) Each Possible Violation, Alleged Violation, or Confirmed Violation shall be treated as nonpublic unless the matter is filed with the Commission as a Notice of Penalty, or, if disclosure is required, dismissed. The disposition of each Possible Violation, Alleged Violation, or Confirmed Violation that relates to a Cybersecurity Incident or that would jeopardize the security of the Bulk-Power System if publicly disclosed shall remain nonpublic unless the Commission directs otherwise.

(d) All dispositions by ~~[REGIONAL ENTITY]~~ReliabilityFirst of Possible Violations, Alleged Violations, and Confirmed Violations of Reliability Standards shall be reported to NERC for review and, in the case of Confirmed Violations, penalties or sanctions, and settlements, for approval. Following approval of a disposition by NERC, NERC shall file the disposition with the Commission, if required by, and in accordance with, Section 215(e) of the Act and Section 39.7 of the ERO Regulations. NERC shall review ~~[REGIONAL ENTITY]~~ReliabilityFirst's dispositions based on the following criteria:
