**Re: Supplemental Information to NERC Compliance Filing in Response to the Order on Violation Severity Levels Proposed by the Electric Reliability Organization
FERC Docket Nos. RR08-4-000, RR08-4-001, RR08-4-002, and RR08-4-005**

Dear Ms. Bose:

On March 5, 2010, the North American Electric Reliability Corporation (“NERC”) submitted the first of two compliance filings¹ in Response to the Federal Energy Regulatory Commission’s (“FERC” or “Commission”) June 19, 2008 Order on Violation Severity Levels (“VSL”) Proposed by the Electric Reliability Organization.² The March 5, 2010 VSL Filing (“VSL Filing 1”) included the original set of 83 Reliability Standards approved by FERC and NUC-001-2, but did not include VSLs for certain requirements that NERC determined needed further input and justification. NERC submitted a second compliance filing providing VSLs for the remaining Reliability Standard requirements on December 1, 2010 (“VSL Filing 2”).³

Upon further review, NERC staff identified additional VSL modifications for 14 Reliability Standard requirements that were submitted in VSL Filing 1.⁴ Accordingly, NERC staff proposed changes for the 14 identified VSLs to ensure consistency with FERC VSL guidelines.⁵ On January 20, 2011, NERC posted the proposed changes for a 30-day public comment period that closed on February 18, 2011. NERC also conducted a nonbinding poll during the last 10 days of the public comment period, from February 9, 2011 through February 18, 2011, which was

¹ *Compliance Filing of the North American Electric Reliability Corporation in Response to the Order On Violation Severity Levels Proposed By The Electric Reliability Organization And Request For An Extension Of Time*, Docket Nos. RR08-4-000, RR08-4-001, RR08-4-002 (March 5, 2010) (“VSL Filing 1”).

² *Order on Violation Severity Levels Proposed by the Electric Reliability Organization*, 123 FERC ¶ 61,284 (2008).

³ *Compliance Filing of the North American Electric Reliability Corporation in Response to the Order on Violation Severity Levels Proposed by the Electric Reliability Organization*, Docket Nos. RR08-4-000, RR08-4-001, RR08-4-002, RR08-4-005 (December 1, 2010) (“VSL Filing 2”).

⁵ See VSL Filing 1 at pp. 4-5.

Ms. Kimberly Bose
Docket Nos. RR08-4-000, RR08-4-001, RR08-4-002
March 21, 2011
Page 2

extended through February 22, 2011. Following the non-binding poll, NERC staff made additional changes to VSLs for five Reliability Standard requirements, in accordance with the FERC VSL Guidelines.

By this filing, NERC submits revised VSLs for 14 Reliability Standard requirements that were submitted as part of VSL Filing 1 discussed above. Included as **Exhibit A** to this filing is a redline version of the revised VSLs. **Exhibit B** is a clean version of the revised VSLs. **Exhibit C**⁶ provides explanations for the revisions to the VSLs, in accordance with the FERC VSL guidelines 2b-4,⁷ and **Exhibit D** includes a consolidated list of current and pending VSLs filed with the Commission by NERC.⁸

NERC respectfully requests that the Commission accept this supplemental filing and issue an order consistent with the comments and exhibits provided herein.

Respectfully submitted,

/s/ Willie L. Phillips

⁶ In Exhibit C, the “Guideline 1 Comments” column states “See Guideline 1 Analysis.” This Guideline 1 Analysis was included in VSL Filing 1 as Exhibit D “Guideline 1 Report.”

⁷ Please note that PRC-001-1 R3.1 was included in the clean and redline portions of VSL Filing 1, but was inadvertently omitted from the “Guideline 2b-4 VSL Review and Findings” included as Exhibit C in VSL Filing 1. Exhibit C of this filing includes the Guideline 2b-4 explanation for PRC-001-1 R3.1.

⁸ VSL assignments for the Critical Infrastructure Protection (“CIP”) standards are not included in Exhibit D; however, NERC anticipates filing a full set of VSLs for CIP Versions 2, 3, and the proposed Version 4 on March 21, 2011.
